Table of Contents

Disclosure Statement

Preface

This Companion Guide to the v5010 ASC X12N Implementation Guide and associated errata adopted under Health Insurance Portability and Accountability Act of 1996 (HIPAA) clarifies and specifies the data content when exchanging electronically with Texas Medicaid. Transmissions based on this Companion Guide, used in tandem with the v5010 ASC X12N Implementation Guides, are compliant with both ASC X12N syntax and those guides. This Companion Guide is intended to convey information that is within the framework of the ASC X12N Implementation Guides adopted for use under HIPAA. The Companion Guide is not intended to convey information that in any way exceeds the requirements or usages of data expressed in the TR3/Implementation Guides.

1 INTRODUCTION

Scope

Under the Administrative Simplification provisions of the Health Insurance Portability and Accountability Act (HIPAA) of 1996, the Secretary of the Department of Health and Human Services (HHS) is directed to adopt standards to support the electronic exchange of administrative and financial health care transactions. The purpose of the Administrative Simplification portion of HIPAA is to enable health information to be exchanged electronically and to adopt standards for those transactions.

Texas Medicaid defines a Trading Partner as any entity trading data with Texas Medicaid using Electronic Data Interchange (EDI). Trading partners include vendors, clearinghouses, providers and billing agents.

The Accredited Standards Committee (ASC) X12 Standards for EDI Technical Report Type 3 (TR3) dated May 2006 was used to create this Companion Guide for the 278 request and response file formats. All instructions in this document are written using information known at the time of publication and are subject to change.

Overview

This guide is intended as a resource to assist submitters in successfully conducting batch EDI 278 Health Care Services- Request for Review and Response transactions for Preadmission Screening & Resident Review (PASRR) Nursing Facility Specialized Services (NFSS) Authorization with Texas Medicaid. To view the 278 requests submitted via batch mode or to submit 278 requests interactively, submitters must log in to the Long Term Care (LTC) Online Portal. This document does not provide detailed data specifications, which are published separately by the industry committees responsible for their creation and maintenance.

The instructions in this companion guide are not intended to be stand-alone requirements documents and must be used in conjunction with the associated American National Standards Institute Accredited Standards Committee (ANSI ASC X12N) National Implementation Guide. This companion guide conforms to all the requirements of any associated ASC X12 Implementation Guide and is in conformance with ASC X12's Fair Use and Copyright statements.

1.1 Additional Information

Security and Privacy Statement

Covered entities were required to implement HIPAA Privacy Regulations no later than April 14, 2003. A covered entity is defined as a health plan, a health care clearinghouse, or a health care provider who transmits any health information in electronic form in connection with a HIPAA transaction. Providers that conduct certain electronic transmissions are responsible for ensuring these privacy regulations are implemented in their business practices. Texas Health and Human Services Commission (HHSC) is a HIPAA Covered Entity. Accordingly, Texas Medicaid is operating as a HIPAA Business Associate of HHSC as defined by the federally mandated rules of HIPAA. A Business Associate is defined as a person or organization that performs a function or activity on behalf of a covered entity but is not part of the covered entity's workforce.

The privacy regulation has three major purposes:

1. To protect and enhance the rights of consumers by providing them access to their health information and controlling the appropriate use of that information;

2. To improve the quality of health care in the United States by restoring trust in the health care system among consumers, health care professionals and the many organizations and individuals committed to the delivery of health care; and

3. To improve the efficiency and effectiveness of health care delivery by creating a national framework for health privacy and protection.

2 GETTING STARTED

Working with Texas Medicaid

This section describes how to interact with Texas Medicaid's Electronic Data Interchange (EDI) systems.

EDI Help Desk is available to assist trading partners in exchanging data with Texas Medicaid. Below are details on how to register and contact the department for assistance.

Trading Partner Registration

HHSC requires any entity exchanging electronic data with Texas Medicaid to be enrolled in the Texas Medicaid Program and approved for the submission of X12 transaction sets.

Texas Medicaid Enrollment Forms and instructions are available at:

https://www.tmhp.com/topics/provider-enrollment

Successful enrollment in Texas Medicaid is required before proceeding with EDI.

To get started with EDI transactions, the necessary forms and instructions are available at:

https://www.tmhp.com/resources/forms?field_topics_target_id=96

3 TESTING WITH TEXAS MEDICAID

Texas Medicaid requires that all Trading Partners who submit electronic data to successfully complete the testing process prior to submitting electronic data.

If the Provider or Billing Agent utilizes a Clearinghouse to submit the electronic data, the entity connecting with Texas Medicaid must have successfully completed the testing process prior to data submission.

Texas Medicaid provides a self-testing tool through Edifecs software. Testing and Certification instructions, along with setup information can be found in Section 9.1 of the Texas Medicaid EDI Connectivity Guide found at:

https://www.tmhp.com/sites/default/files/filelibrary/edi/TMHP_EDI_Connectivity_Guide.pdf

4 CONNECTIVITY WITH THE SUBMITTER/COMMUNICATIONS

Transmission Administrative Procedures

The Texas Medicaid EDI Connectivity Guide that contains specific instructions regarding connectivity options, can be found on the EDI page of the Texas Medicaid website at:

https://www.tmhp.com/sites/default/files/file-library/edi/TMHP_EDI_Connectivity_Guide.pdf

Communication protocol specifications

The Texas Medicaid EDI Connectivity Guide that contains specific instructions regarding connectivity options, along with CORE compliant Safe Harbor information, can be found on the EDI page of the Texas Medicaid website at:

https://www.tmhp.com/sites/default/files/file-library/edi/TMHP_EDI_Connectivity_Guide.pdf

Passwords

Texas Medicaid provides instruction on resetting of passwords in section 5.1 of the Texas Medicaid EDI Connectivity Guide found at:

https://www.tmhp.com/sites/default/files/file-library/edi/TMHP_EDI_Connectivity_Guide.pdf

5 CONTACT INFORMATION

Customer Service

Texas Medicaid EDI Help Desk

The EDI Help Desk provides technical assistance only by troubleshooting Texas Medicaid EDI issues. Contact your system administrator for assistance with network, hardware, or telephone line issues.

To reach the Texas Medicaid EDI Help Desk, select one of the following methods:

- Fax 1-512-514-4230 or 1-512-514-4228
- Call 1-888-863-3638, (or call 1-512-514-4150)

Applicable websites/e-mail

This section contains detailed information about useful web sites and email addresses.

Texas Medicaid EDI Technical Information, such as code references, vendor file specifications, and additional Companion Guides can be found at:

https://www.tmhp.com/topics/edi

The Texas Medicaid Provider Procedures Manual is found at:

https://www.tmhp.com/resources/provider-manuals

Texas Health and Human Services Commission

6   CONTROL SEGMENTS/ENVELOPES
ISA-IEA

- Texas Medicaid does not support repetition of a simple data element or a composite data structure.

- Texas Medicaid will send and accept only one ISA/IEA in each file and one GS/GE per ISA.

- Texas Medicaid uses "*" (asterisk) as the element separator, and "~" (tilde) as the segment separator.

GS-GE

- For the 278 Request file and the 278 Response file, the Sender ID and Receiver ID information is submitted in the GS02 and GS03.

7   TEXAS MEDICAID SPECIFIC BUSINESS RULES AND LIMITATIONS

Texas Medicaid will accept up to 5000 transactions per batch. If a file is submitted with more than 5000 transactions the entire file will be rejected and not processed by Texas Medicaid.

X12 files with more than one GS-GE Functional Group will fail to process in the Texas Medicaid system.

The Texas Medicaid Provider Procedures Manual is the providers' principal source of information about Texas Medicaid. The most recent version is found at:

https://www.tmhp.com/resources/provider-manuals

8 ACKNOWLEDGEMENTS AND/OR REPORTS

Texas Medicaid provides HIPAA responses and acknowledgements that should be utilized by the Trading Partner for reconciliation purposes. Texas Medicaid does not provide proprietary reports as a standard part of the NFSS data process. Trading Partners should utilize the HIPAA responses provided for each transmission to reconcile NFSS submissions.

The following responses will be received by the Trading Partner in response to file submissions:

TA1 Transaction	Interchange Acknowledgement The TA1 will be sent if the submitter ID is not known or if the file received is structurally incorrect.
BID Document	Batch ID Report The BID file is sent as acknowledgement of file reception. This is not an indicator that the file was accepted; only received. This zero-byte file will provide the Texas Medicaid assigned batch ID within the file name. *This response will not be returned for files exchanged over the CORE Operating Rule "Safe Harbor" connection method.
999 Transaction	Implementation Acknowledgement This file provides high level transaction set response details for the 278 received. It does not contain transaction level responses.
278 Response	Health Care Services Response The 278 includes transaction level acknowledgements including acceptance/rejection information. This file will not be sent if a negative 999 (rejection) or TA1 file has been returned.
824	Application Advice The 824 response file is used to notify the sender the document has been accepted, or to report on errors.

9 TRADING PARTNER AGREEMENTS

Trading Partners

An EDI Trading Partner is defined as any Texas Medicaid customer (provider, billing service, software vendor, employer group, financial institution, etc.) that transmits to, or receives electronic data from, Texas Medicaid.

Submitters must have EDI Trading Partner Agreements that accompany the standard implementation guide to ensure the integrity of the electronic transaction process. The Trading Partner Agreement is related to the electronic exchange of information, whether the agreement is an entity or a part of a larger agreement, between each party to the agreement.

For example, a Trading Partner Agreement may specify, among other things, the roles and responsibilities of each party to the agreement in conducting standard transactions.

Texas Medicaid Trading Partner Agreement will be found on this web page:

https://www.tmhp.com/resources/forms?field_topics_target_id=96

10 TRANSACTION SPECIFIC INFORMATION

This section describes how ASC X12N Implementation Guides (IGs) adopted under HIPAA will be detailed with the use of a table. The table contains a row for each segment that Texas Medicaid has something additional, over and above, the information in the IGs. That information can:

1. Limit the repeat of loops, or segments.

2. Limit the length of a simple data element.

3. Specify a sub-set of the IGs internal code listings.

4. Clarify the use of loops, segments, composite and simple data elements.

5. Any other information tied directly to a loop, segment, composite or simple data element pertinent to trading electronically with Texas Medicaid.

In addition to the row for each segment, one or more additional rows are used to describe Texas Medicaid's usage for composite and simple data elements and for any other information. Notes and comments should be placed at the deepest level of detail. For example, a note about a code value should be placed on a row specifically for that code value, not in a general note about the segment.

This section is used to describe the required data values to process Health Care Services Review Requests by Texas Medicaid. The 278 format is used for Health Care Services Review Request files. This file is sent to Texas Medicaid for processing. Once the request is processed a 278 response will be sent from Texas Medicaid.

Filename formats

Request file:
The X12 278 request file is created with a filename using one of the following naming conventions:

- Filename.txt or Filename.dat or Filename.zip

Note: If the filename does not have above extensions, it will not be picked up for processing.

Response file:
The X12 278 response file from Texas Medicaid is created with a filename using the following file naming convention:

<Submitter ID.File ID.278>

- 9-digit Submitter ID (assigned by Texas Medicaid during trading partner testing)

- Texas Medicaid assigned 8-character File ID (also known as Batch ID)

- Last 3 characters represent the file extension.

Example: The filename, "123456789.D1234567.278", consists of the 9-digit Submitter ID "123456789," File ID (aka Batch ID) "D1234567," and the file extension ".278."

X12 278 Transaction

A complete authorization request for PASRR NFSS via EDI requires the submission of both an X12 278 transaction which contains a Health Care Services Request for Review and an associated X12 275 transaction which contains additional detailed NFSS request information including attachments to support a Health Care Services Review. Both transactions must be submitted separately. Linking the two transactions is explained in detail in the X12 275 Companion Guide.

An X12 278 transaction submission is expected to be received prior to the corresponding unsolicited and solicited X12 275 transactions. If the unsolicited X12 275 transaction is received prior to the corresponding X12 278 transaction, the X12 275 transaction will remain in wait status for 5 calendar days and not processed. After 5 calendar days the X12 275 transaction will be rejected in the absence of a corresponding X12 278 transaction. Once the X12 278 and corresponding X12 275 transaction have processed successfully, the Nursing Facility must log in to the Long Term Care Online Portal (LTCOP) to view the form and take further action to work the form.

CMWC or DME Type of Service Requested -

If submitting an authorization request for a CMWC (Customized Manual Wheel Chair) assessment or a DME (Durable Medical Equipment) assessment, only Loop 2000E is required and Loop 2000F must not be submitted in the X12 278 transaction. If submitting a CMWC service or a DME service, both Loop 2000E and Loop 2000F must be submitted in the X12 278 transaction.

Therapy Type of Service Requested -

If the type of service requested is Physical, Occupational, or Speech Therapy, both Loop 2000E and Loop 2000F are required since the MSG01 segment in Loop 2000F denotes whether the request is just for an assessment ("A") or for a service ("S") in the X12 278 transaction.

278 Health Care Services Review Request

This Companion Guide describes the use of the X12 278 Health Care Services Review — Request for Review and Response only for the purposes of submission of an Authorization Request for PASRR NFSS. The table below specifies the required loops and elements for the 278 request file for PASRR NFSS. For details on format validations refer to Appendices.

282	2010F	REF02		Enter Therapist's License No. or Referring Physician's Military Spec Code based on the qualifier in REF01.
282	2010F	REF03	1st – 2nd position	1st to 2nd position: Enter Therapist's or Referring Physician's License State based on the qualifier in 2010F.NM101 3rd position: If 2010F.NM101="SJ" send "1" (Occupational), "2" (Physical) or "3" (Speech) for Therapist's License Type.
282	2010F	REF02		If REF01= "1J" above, send a second REF segment with REF02 (where REF01=N7) as the Referring Physician's License State.
2010F N3/N4 SERVICE PROVIDER ADDRESS				
283	2010F	N301		For Therapy, send Referring Physician's Street Address or LAR Street Address based on the qualifier in NM101. For CMWC or DME, send Supplier's Street Address.
284	2010F	N401		For Therapy, send Referring Physician's City or LAR City based on the qualifier in NM101For CMWC or DME, send Supplier's City.
284	2010F	N402		For Therapy, send Referring Physician's State or LAR State based on the qualifier in NM101. For CMWC or DME, send Supplier's State.

TR3 Page #	Loop ID	Element ID	Data Value	Description
Control Segments				
284	2010F	N403		For Therapy, send Referring Physician's ZIP Code or LAR Zip Code based on the qualifier in NM101. For CMWC or DME, send Supplier's ZIP Code.
2000F PER PATIENT EVENT PROVIDER CONTACT INFORMATION				
286	2010F	PER02		Enter CMWC or DME Supplier's Business Name where NM101 = "QB".
286	2010F	PER04		For Therapy, send Therapist's or Referring Physician's or LAR Phone Number based on the qualifier in NM101. For CMWC or DME, send Supplier's Phone Number.
286	2010F	PER06		For Therapy, send Therapist's Fax Number. For CMWC or DME, send Supplier's Fax Number.

278 Health Care Service Review Response

Below are the required Loops and Elements for a 278 Health Care Service Review Response for PASRR NFSS. Texas Medicaid will send and accept only one ISA/IEA in each file and one GS/GE per ISA. Texas Medicaid uses "*" (asterisk) as the element separator, and "~" (tilde) as the segment separator.

Business edits for X12 278 transaction

Refer to Appendices section 11.

11 APPENDICES

11.1 Transmission Examples

This is used to describe the required data sets by Texas Medicaid for NFSS form processing. The X12 278 format is used for submission of Healthcare Service Review requests.

NOTE: For the NFSS form data transmitted to Texas Medicaid, Insured/Patient data is captured from the Subscriber level loops; data in the Dependent level loops is ignored.

11.2 278 Response Examples:

Example of 278 Response Accepted Transaction

The following example represents the response to a request for review. In this case Texas Medicaid accepts the submission of the authorization request for PASRR NFSS. DLN is present in REF*NT* segment since the transaction passed all validations or else set only warning edits.

Example of 278 Response Rejected Transaction

The following example represents the response to the request for review, when Texas Medicaid has rejected the transaction. Notice that the response includes the AAA error segment and also the business edit number in 2000E.MSG segment. Business edit codes and descriptions are described in Appendices (278 Business Error Codes and Description).
