- The treatment or follow-up of complications of dialysis, including:
 - The evaluation of related diagnostic tests and procedures
 - Services that are involved in the prescription of therapy for illnesses that are unrelated to renal disease, if the treatment occurs without increasing the number of physician-client contacts

The following physician services are a benefit for physician supervision of outpatient ESRD dialysis services:

Procedure Codes									
90951	90952	90953	90954	90955	90956	90957	90958	90959	90960
90961	90962	90963	90964	90965	90966	90967	90968	90969	90970

Procedure codes 90935, 90937, 90945, and 90947 are a benefit for:

- ESRD or non-ESRD services in the inpatient setting when the physician is present during dialysis treatment. The physician must be physically present and involved during the course of dialysis. These codes are not payable for a cursory visit by the physician. Hospital visit procedure codes must be used for a cursory visit.
- Non-ESRD services when provided by a physician, nurse practitioner, clinical nurse specialist, or physician assistant in an office or outpatient setting.

Only one of the following procedure codes 90935, 90937, 90945, or 90947 may be reimbursed per day by any provider.

If the physician sees the client only when the client is not dialyzing, the physician must submit the appropriate hospital visit procedure code. The inpatient dialysis procedure code must not be submitted for payment.

Providers must use one of the following procedure codes to submit claims for services when the client:

- Is not on home dialysis.
- Has had a complete assessment visit during the calendar month.
- Has received a full month of ESRD related services

Procedure Codes									
90951	90952	90953	90954	90955	90956	90957	90958	90959	90960
90961	90962								

When a full calendar month of ESRD-related services are submitted for clients on home dialysis, providers must use procedure code 90963, 90964, 90965, or 90966.

Providers must submit claims with procedure code 90967, 90968, 90969, or 90970 if ESRD-related services are provided for less than a full month, per day, under the following conditions:

- Partial month during which a client who is not on home dialysis received one or more face-to-face visits but did not receive a complete assessment.
- A client who is on home dialysis received less than a full month of services.
- Transient client.
- Client was hospitalized during a month of services before a complete assessment could be performed.
- Dialysis was stopped due to recovery or death of a client.
- Client received a kidney transplant.

Procedure codes 90967, 90968, 90969, and 90970 are limited to one per day by any provider. When submitting claims for these procedure codes, providers must indicate the dates of service on which supervision was provided.

Procedure codes 90967, 90968, 90969, and 90970 will be denied if they are submitted with dates of service in the same calendar month by any provider as the following procedure codes:

Procedure Codes									
90951	90952	90953	90954	90955	90956	90957	90958	90959	90960
90961	90962	90963	90964	90965	90966				

Only one of the procedure codes in the previous table will be reimbursed per calendar month by any provider.

The following services may be provided in conjunction with physician supervision of outpatient ESRD dialysis but are considered nonroutine and may be submitted for reimbursement separately.

- Declotting of shunts when performed by the physician.
- Physician services to inpatients.

If one of the following occurs:

- A client is hospitalized during a calendar month of ESRD-related services before a complete assessment is performed.
- The client receives one or more face-to-face assessments, but the timing of inpatient admission prevents the client from receiving a complete assessment.

Then the physician must submit both of the following:

- Procedure code 90967, 90968, 90969, or 90970 for each date of outpatient supervision.
- The appropriate hospital evaluation and management code for individual services provided on the days during which the client was hospitalized.

If a client has a complete assessment in the month during which the client is hospitalized, one of the following procedure codes must be submitted for the month of supervision:

Procedure Codes									
90951	90952	90953	90954	90955	90956	90957	90958	90959	90960
90961	90962								

The appropriate inpatient evaluation and management codes must be reported for procedures provided during the hospitalization.

- Dialysis at an outpatient facility other than the usual dialysis setting for a client of a physician who bills the MCP. The physician must submit procedure code 90967, 90968, 90969, or 90970 for each date on which supervision is provided. The physician may not submit claims for days that the client dialyzed elsewhere.
- Physician services beyond those that are related to the treatment of the client’s renal condition that cause the number of physician-client contacts to increase. Physicians may submit claims on a fee-for-service basis if they supply documentation on the claim that the illness is not related to the renal condition and that additional visits are required.

Inpatient services that are provided to a hospitalized client for whom the physician has agreed to submit monthly claims, may be reimbursed in one of the following ways:

- The physician may elect to continue monthly billing, in which case the physician may not bill for individual services that were provided to the hospitalized client.
- The physician may reduce the monthly amount submitted by 1/30th for each day of hospitalization and may charge fees for individual services that were provided on the hospitalized days.
- The physician may submit a claim for inpatient dialysis services using the inpatient dialysis procedure codes. The physician must be present and involved with the client during the course of the dialysis.

Clients may receive dialysis at an outpatient facility other than the client's usual dialysis setting, even if their physician bills for monthly dialysis coordination. The physician must reduce the monthly amount submitted for reimbursement by 1/30th for each day the client is dialyzed elsewhere.

Physician services beyond those related to the treatment of the client's renal condition may be reimbursed on a fee-for-service basis. The physician must provide medical documentation with the claim that identifies how the illness is not related to the renal condition and added visits are required.

Payment is made for physician training services in addition to the MCP for physician supervision rendered to maintenance facility clients.

6.2.1.1 Unscheduled or Emergency Dialysis in a Non-Certified ESRD Facility

For some medical situations in which ESRD clients cannot obtain their regularly scheduled dialysis treatment at a certified ESRD facility, Texas Medicaid will allow for non-routine dialysis treatments furnished in the outpatient department of a hospital that does not have a certified dialysis facility.

Unscheduled dialysis for clients may be a benefit for one of the following reasons:

- Dialysis was performed following, or in connection with, a vascular access procedure.
- Dialysis was performed following treatment for an unrelated medical emergency (e.g., a client goes to the emergency room and, as a result, misses a regularly scheduled dialysis treatment that cannot be rescheduled).
- Emergency dialysis was performed for clients who would otherwise have to be admitted as inpatient in order for the hospital to receive payment.

Providers must submit claims using procedure code G0257 with revenue code 880 in order to receive payment for unscheduled outpatient dialysis.

Procedure code G0257 is only reimbursed to clients with ESRD and must be billed with revenue code 880 on the same claim. If procedure code G0257 is not on the same claim as revenue code 880, it will be denied.

Procedure code G0257 is limited to diagnosis codes 5855 and 5856 and is limited to one service per day, any provider.

Erythropoietin (procedure code Q4081) may be billed separately and must be billed with revenue code 634 or 635 on the same claim.

Texas Medicaid will provide a single payment to reimburse unscheduled or emergency dialysis treatments furnished to ESRD clients in the outpatient department of a hospital that does not have a certified ESRD facility.

Reimbursement for procedure code G0257 is limited to the same services included in the Method 1 composite. Providers will not be reimbursed for individual services related to dialysis.

Repeated billing of this service by the same provider for the same clients may indicate routine dialysis treatments are being performed and providers will be subject to recoupment upon medical record review.

Reimbursement of other outpatient hospital services are only reimbursed if they are not related to the dialysis services and are determined to be medically necessary with supporting documentation.

6.2.2 Renal Dialysis Facilities-Method I Composite Rate

The composite rate includes all necessary equipment, supplies, and services for the client receiving dialysis whether in the home or in a facility. The facility's charge must not include the charge for the physician's routine supervision. Examples of services included in the composite rate include, but are not limited to:

- Cardiac monitoring—procedure code 93040 or 93041.
- Catheter changes—procedure code 36000 or 49421.
- Crash cart usage for cardiac arrest.
- Declotting of shunt (procedure code 36593) and any supplies used to decлот shunts performed by facility staff in the dialysis unit.
- Dialysate—procedure code A4720, A4722, A4723, A4724, A4725, A4726, or A4765.
- Oxygen—procedure code E0424, E0431, E0434, E0439, E0441, E0442, E0443, or E0444.
- Routine laboratory services for dialysis.

***Note:** When one of these laboratory services is required more frequently, renal dialysis facility providers must submit the appropriate procedure code with modifier 91 for separate reimbursement.*

- Staff time to administer blood, separately billable drugs, and blood collection for laboratory—procedure code 36430 or 36591.
- Suture removal or dressing changes.
- Certain drugs such as those to elevate or decrease blood pressure, antiarrhythmics, blood thinners or expanders, antihistamines or antibiotics to treat infections or peritonitis related to peritoneal dialysis are included in the composite rate. Examples include, but are not limited to:
 - Hydralazine—procedure code J0360
 - Diphenhydramine—procedure code J1200
 - Heparin—procedure code J1642 or J1644
 - Dopamine—procedure code J1265
 - Glucose
 - Propranolol—procedure code J1800
 - Insulin
 - Digoxin—procedure code J1160
 - Norepinephrine bitartrate
 - Mannitol—procedure code J2150
 - Procaine
 - Protamine—procedure code J2720
 - Saline—procedure code A4216 or A4217

- Hydrocortisone sodium succinate—procedure code J1720
- Verapamil

Medically necessary drugs that are not included in the composite rate may be separately reimbursed when provided by and administered in the dialysis facility by facility staff. Staff time and supplies used to administer the drugs are included in the composite rate. Examples include, but are not limited to, the following:

- Antibiotics, except when prescribed for clients to treat infections or peritonitis related to peritoneal dialysis
- Hematinics
- Anabolics
- Muscle relaxants
- Analgesics
- Sedatives
- Tranquilizers
- Erythropoietin
- Thrombolytics used to declot central venous catheters
- Intravenous levocarnitine (procedure code J1955), for ESRD clients who have been on dialysis for a minimum of three months with one of the following indications (All other indications for levocarnitine are not covered.):
 - Carnitine deficiency, defined as a plasma free carnitine level less than 40 micromoles per liter.
 - Signs and symptoms of erythropoietin-resistant anemia that has not responded to standard erythropoietin with iron replacement, and for which other causes have been investigated and adequately treated.
 - Hypotension on hemodialysis that interferes with delivery of the intended dialysis despite application of usual measures deemed appropriate (e.g., fluid management) (such episodes of hypotension must have occurred during at least two dialysis treatments in a 30-day period).

Note: Continued use of levocarnitine is not covered if improvement has not been demonstrated within six months of the initiation of treatment.

The ordering physician must maintain documentation in the client's medical record to support medical necessity.

6.2.3 Method II Dealing Direct-Support Services

With Method II, the client selects and works with a single supplier to obtain supplies and equipment to dialyze at home. The selected supplier cannot be a dialysis facility, although the supplier must maintain a written agreement with a support dialysis facility to provide backup and support services. Method II support services are reimbursed under revenue codes 845 and 855.

Support services reimbursed monthly under Method II are limited to clients who are 20 years of age and younger, and include, but are not limited to:

- Periodic monitoring of a client's adaptation to home dialysis and performance of dialysis, including provisions for visits to the home or the facility.
- Visits by trained personnel for the client with a qualified social worker and a qualified dietitian, made in accordance with a plan prepared and periodically reviewed by a professional team, which includes the physician.

- Individual unscheduled visits to a facility made on an as-needed basis (e.g., assistance with difficult access situations).
- ESRD-related laboratory tests covered under the composite rate.
- Providing, installing, repairing, testing, and maintaining home dialysis equipment, including appropriate water testing and treatment.
- Ordering of supplies on an ongoing basis.
- A record keeping system that assures continuity of care.
- Support services specifically applicable to chronic ambulatory peritoneal dialysis (CAPD) also include, but are not limited to:
 - Changing the connecting tube and administration set.
 - Monitoring the client's performance of CAPD, assuring that it is done correctly, and reviewing proper techniques with the client or informing the client of modifications to apparatus or technique.
 - Documenting whether the client has or has had peritonitis that requires physician intervention or hospitalization (unless there is evidence of peritonitis, a culture for peritonitis is not necessary).
 - Inspecting the catheter site.

Routine laboratory services are included in the support services and are not reimbursed separately.

Equipment and supplies are:

- Reimbursed under Method II to only one provider per month who must agree to submit claims once per month for only one month's quantity per claim.
- Limited to clients who are 20 years of age and younger.
- Reimbursed separately up to the total monthly allowable as determined by HHSC.

The following equipment, supply, and services procedure codes are benefits of Texas Medicaid under Method II:

Procedure Codes									
36000	36430	36591	36593	49421	93040	93041	A4216	A4217	A4651
A4652	A4657	A4660	A4663	A4670	A4680	A4690	A4706	A4707	A4708
A4709	A4714	A4719	A4720	A4721	A4722	A4723	A4724	A4725	A4726
A4730	A4736	A4737	A4740	A4750	A4755	A4760	A4765	A4766	A4772
A4773	A4774	A4802	A4860	A4911	A4913	A4918	A4927	A4928	A4929
A4930	A4931	A4932	E0424	E0431	E0434	E0439	E0441	E0442	E0443
E0444	E1510	E1520	E1530	E1540	E1550	E1560	E1570	E1575	E1580
E1590	E1592	E1594	E1600	E1620	E1630	E1632	E1635	E1637	E1639
E1699	J0360	J1160	J1200	J1265	J1642	J1644	J1720	J1800	J1955
J2150	J2720								

Installation and repair of home hemodialysis machines are not a benefit of Texas Medicaid. Home modifications for use of medical equipment are not a benefit of Texas Medicaid.

A Medicaid client may receive CAPD and continuous cycle peritoneal dialysis (CCPD) support services furnished by the facility on a monthly basis. Charges for support services in excess of this frequency must include documentation of medical necessity.

Clients may have a one month reserve of supplies available for use. Renal dialysis services beyond these limitations may be considered for clients who are 20 years of age and younger through the Comprehensive Care Program (CCP) with prior authorization.

6.2.4 Facility Revenue Codes

The following services are a benefit for renal dialysis centers billing under reimbursement methodology I composite rate or II dealing direct.

Service	Revenue Code	Description
Maintenance	821	Hemodialysis (outpatient/home)–composite or other rate
	831	Peritoneal Dialysis (outpatient/home)–composite or other rate
	841	CAPD (outpatient/home)–composite or other rate
	851	CCPD (outpatient/home)–composite or other rate
Training	829	Hemodialysis (outpatient/home)–other
	839	Peritoneal Dialysis (outpatient/home)–other
	849	CAPD (outpatient/home)–other
	859	CCPD (outpatient/home)–other
Support	845	CAPD (outpatient/home)–support services
	855	CCPD (outpatient/home)–support services
Miscellaneous	881	Miscellaneous dialysis–ultrafiltration

All services except ultrafiltration (revenue code 881) are restricted to the following diagnosis codes: 5845, 5846, 5847, 5848, 5849, 5851, 5852, 5853, 5854, 5855, 5856, and 5859.

The facility charge must not include the charge for the physician's routine supervision.

6.2.5 Training for Hemodialysis, Intermittent Peritoneal Dialysis (IPD), Continuous Cycle Peritoneal Dialysis (CCPD), and Chronic Ambulatory Peritoneal Dialysis (CAPD)

Most self-dialysis training for hemodialysis, IPD, CCPD, and CAPD is provided in an outpatient setting. Dialysis training provided in an inpatient setting will be reimbursed at the same rate as the facility's outpatient training rate.

Reimbursement for hemodialysis, IPD, CCPD, and CAPD training services and supplies provided by the dialysis facility includes personnel services, parenteral items routinely used in dialysis, training manuals and materials, and routine dialysis laboratory tests.

No frequency limitation is applied to routine laboratory tests during the training period because these tests commonly are given during each day of training. Nonroutine laboratory tests performed during the training period may be reimbursed when documentation of medical necessity is submitted with the claim.

It may be necessary to supplement the patient's dialysis during CAPD training with intermittent peritoneal dialysis or hemodialysis because the client has not mastered the CAPD technique.

Training is limited to once per day. The composite rate will be denied as part of dialysis training when submitted for the same date of service.

6.2.6 Maintenance Hemodialysis

The facility composite rate applies when a chronic renal dialysis client receives hemodialysis in an approved renal dialysis facility. Reimbursement is based on the facility's per-treatment composite rate, as calculated by Medicare. Services included in the facility's charge are routine laboratory tests, personnel services, equipment, supplies, and other services associated with the treatment.

For hospitals to be reimbursed for maintenance hemodialysis, they must be enrolled as an approved dialysis facility with the appropriate provider identifier. When a client is admitted for hospitalization for no reason other than to receive maintenance renal dialysis, the dialysis services are considered outpatient services and are covered if the hospital has been designated as a CMS certified renal dialysis center.

6.2.7 Maintenance IPD

Maintenance IPD is usually performed in sessions of 10 to 12 hours duration, three times per week. It may also be performed in fewer sessions that are longer in duration. If more than three sessions occur in one week, the provider must supply documentation of medical necessity with the claim.

6.2.8 Maintenance CAPD and CCPD

Support services for maintenance furnished to clients receiving CAPD or CCPD in the home may be reimbursed to dialysis facilities. Home dialysis support services must be furnished by the facility in either the home or the facility. CAPD and CCPD support services are limited to once per day.

6.2.9 Laboratory and Radiology Services

All providers of laboratory services must comply with the rules and regulations of CLIA. Providers who do not comply with CLIA will not be reimbursed for laboratory services.

Refer to: Subsection 2.1.1, "Clinical Laboratory Improvement Amendments (CLIA)" in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

6.2.9.1 In-Facility Dialysis—Routine Laboratory

Laboratory testing may be obtained and processed in the renal dialysis facility or by an outside laboratory. Charges for routine laboratory tests performed according to the established frequencies in the following tables are included in the facility's composite rate submitted to Texas Medicaid regardless of where tests were processed. If the routine laboratory testing is processed by an outside laboratory, the outside laboratory will bill the renal dialysis facility. The renal dialysis facility will then submit a claim to Texas Medicaid unless the test results are inclusive tests.

If additional in-facility laboratory testing is medically necessary beyond the routine frequencies identified below, providers must bill with modifier 91 to indicate the billed laboratory procedure is medically necessary. The billing provider must also submit documentation supporting the medical necessity with the claim and maintain the documentation in the client's medical record.

Modifier 91 is used to indicate that a test was performed more than once on the same day for the same client only when it is necessary to obtain multiple results in the course of the treatment. This modifier may not be used to indicate any of the following:

- When tests are rerun to confirm initial results
- Testing problems with specimens or equipment
- When a normal one-time, reportable result is all that is required
- When there are standard HCPCS codes available that describe the series of results (e.g., glucose tolerance tests, evocative/suppression testing).

Modifier 91 may only be used for laboratory tests paid under the clinical diagnostic laboratory fee schedule.

Per Dialysis

Procedure Codes			
85014	85018	85345	85347

Per Week

Procedure Codes		
82565	84520	85610

Per Month

Procedure Codes									
82040	82310	82374	82435	83615	84075	84100	84132	84155	84450
85025	85027								

The routine tests listed in the previous tables are frequently performed as an automated battery of tests such as the sequential multi-channel analysis with computer (SMAC)-12 (chemistry panels). These tests are considered routine and are included in the charge for dialysis, unless there is an additional diagnosis to document medical necessity for performing the tests in excess of the recommended frequencies.

6.2.9.2 In-Facility Dialysis—Nonroutine Laboratory

The following procedure codes are considered necessary, nonroutine tests. They must be submitted separately from the dialysis charge when performed in the renal dialysis facility or by an outside laboratory that bills the facility for laboratory services. All nonroutine laboratory and radiology tests beyond the recommended frequencies below must be medically necessary.

If additional in-facility laboratory testing is medically necessary beyond the nonroutine frequencies identified below, providers must submit the claim with modifier 91 to indicate the billed laboratory procedure is medically necessary. The billing provider must also submit documentation supporting the medical necessity with the claim and maintain the documentation in the client’s medical record.

Once a Month

Procedure Codes
87340

Every 3 Months

Procedure Codes
93005

Every 6 Months

Procedure Codes								
71010	71020	95907	95908	95909	95910	95911	95912	95913

Annually

Procedure Codes		
78300	78305	78306

A handling fee (procedure code 99001) for nonroutine laboratory services may be submitted to Texas Medicaid only if the specimen is obtained by venipuncture or catheterization and sent to an outside lab. The claim form must document that the handling fee is for nonroutine laboratory services.

6.2.9.3 CAPD Laboratory

The following laboratory tests are routine for home maintenance CAPD clients when performed according to the indicated frequency. These laboratory tests may be reimbursed separately when the client is dialyzing in the home and is not undergoing IPD or hemodialysis in the facility. The provider must indicate the client’s diagnosis and the type of dialysis on the claim form. Tests in excess of this frequency or tests not listed in the tables require documentation of medical necessity for payment to be made.

Every Month

Procedure Codes									
82040	82310	82374	82565	83615	83735	84075	84100	84132	84155
84295	84450	84520	85018						

Every 3 Months

Procedure Codes					
85004	85007	85008	85014	85027	85041

Every 6 Months

Procedure Codes									
71010	71020	78300	78305	78306	80069	81050	95907	95908	95909
95910	95911	95912	95913						

6.2.9.4 Hematopoietic Injections

Medicaid reimbursement is allowed for hematopoietic injections that are administered to clients who have anemia that is associated with chronic renal failure.

Providers must submit the client’s most recent dated hemoglobin or hematocrit levels in the comments section of the claim form. Frequency and quantity limitations apply.

Refer to: Subsection 9.2.39.12, “Fluocinolone Acetonide (Retisert)” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information about benefit and limitation criteria.

6.2.9.5 Blood Transfusions

Whole blood transfusions may be reimbursed separately to dialysis facilities when medically indicated for a Medicaid eligible client.

6.2.10 Prior Authorization

Prior authorization is not required for renal dialysis services. Prior authorization must be obtained for transplant-related services provided to clients who are not eligible for Medicare and are eligible only for Medicaid.

6.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including renal dialysis services. Renal dialysis services are subject to retrospective review and recoupment if documentation does not support the service submitted for reimbursement. All physicians', renal dialysis centers', and medical suppliers' supporting documentation is subject to retrospective review.

6.4 Claims Filing and Reimbursement

6.4.1 Claims Information

Renal dialysis facility services must be submitted to TMHP in an approved electronic claims format or on a UB-04 CMS-1450 paper claim form. Providers may purchase UB-04 CMS-1450 paper claim forms from the vendor of their choice. TMHP does not supply them.

When completing a UB-04 CMS-1450 paper claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

“Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.6, “UB-04 CMS-1450 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Reminder: *The original onset date must be included on the claim form to prevent claim denial. The original onset date must be the same date entered on Form CMS-2728 sent to the Social Security office.*

6.4.2 Reimbursement

Renal dialysis facilities are reimbursed according to composite rates, which are based on the CMS-specified calculations and the Texas Medicaid Reimbursement Methodology (TMRM). Texas Medicaid may reimburse for dialysis services through either Method I or Method II as defined by CMS.

The hemodialysis, IPD, CAPD and CCPD laboratory and radiology services and the physician supervision of dialysis clients limitations pertain to both Method I and Method II reimbursement.

Texas Medicaid implemented mandated rate reductions for certain services. Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

Refer to: Section 2.3, “Reimbursement Methodology” (*Vol. 1, General Information*) for more information about reimbursement.

6.4.2.1 NCCI and MUE Guidelines

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals. Providers should refer to the [CMS NCCI web page](#) for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

6.5 Medicare and Medicaid

Medicaid coverage of a renal dialysis client who may be eligible for Medicare coverage begins with the original onset date of the dialysis treatments and may continue for a period of three months. During this period, Medicare eligibility is reviewed through the Health and Human Services Commission (HHSC). If HHSC determines that the client is Medicare-eligible, Medicaid coverage begins with the original onset date and continues until Medicare coverage begins.

If HHSC determines that the client is not eligible for Medicare, Medicaid coverage of eligible clients begins with the original onset date and continues as long as the dialysis treatments are medically necessary and the client is eligible for Medicaid. The date of onset is the date of the first dialysis treatment and does not change even if the client sees another provider.

Medicare eligibility usually begins after a three-month waiting period has been served. Medicare eligibility begins before the waiting period has expired if the individual receives a transplant or participates in a self-dialysis training program during the waiting period.

6.5.1 Facility Providers

Texas Medicaid pays the Medicare coinsurance less 5 percent and full Medicare deductible for Medicare crossover claims that are submitted by nephrology (hemodialysis, renal dialysis) and renal dialysis facility providers.

6.5.2 Physician Providers

The five percent reduction does not apply to physician-billed services. Nephrologists that are enrolled in Texas Medicaid as physician providers may be reimbursed according to the current payment guidelines.

Refer to: Subsection 2.7, “Medicare Crossover Claim Reimbursement” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (*Vol. I, General Information*) for additional information about Medicare coinsurance and deductible reimbursement for professional and outpatient services.

7 Rural Health Clinic

7.1 Enrollment

To enroll in Texas Medicaid and qualify for participation as a Title XIX RHC, RHCs must be enrolled in Medicare. A nine-digit provider identifier is issued to the RHC after a certification letter from Medicare is received, stating that the clinic qualifies for Medicaid participation. An RHC can also apply for enrollment as a family planning agency.

All providers of laboratory services must comply with the rules and regulations of CLIA. Providers who do not comply with CLIA are not reimbursed for laboratory services.

7.1.1 Initial Cost Reporting

New RHCs must file a projected cost report within 90 days of their designation as an RHC to establish an initial payment rate. The cost report will contain the RHC’s reasonable costs anticipated to be incurred during the RHC’s first full fiscal year. The projected cost report must contain a minimum of six months of information. The RHC must file a cost report within five months of the end of the RHC’s initial fiscal year. The cost settlement must be completed within six months of the receipt of a cost report. The cost per visit rate established by the cost settlement process shall be the base rate. Any subsequent increases or decreases shall be calculated as provided herein. A new RHC location established by an existing RHC participating in Texas Medicaid will receive the same effective rate as the RHC establishing the new location. An RHC establishing a new location may request an adjustment to its effective rate as provided herein if its costs have increased as a result of establishing a new location.

Providers must submit initial cost reports to the following address:

Texas Medicaid & Healthcare Partnership
Medicaid Audit
PO Box 200345
Austin, TX 78720-0345

Providers can refer to 1 TAC §355.8101 for more information about reimbursement.

Refer to: Subsection 1.1, “Provider Enrollment and Reenrollment” in Section 1, “Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for more information.
Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

7.2 Services, Benefits, Limitations, and Prior Authorization

7.2.1 Services Rendered by the RHC Facility Provider

General services and copayments are billed using the RHC’s National Provider Identifier (NPI). All other services billed using the RHC’s NPI are processed as informational only.

Important: *If an RHC facility provider submits a claim for THSteps and Family Planning services, the services will process as informational only and will not be reimbursed.*

The following services are benefits of Texas Medicaid when provided in an RHC:

- Physician services
- Services and supplies furnished as incidental to physician services
- Services provided by an NP, a CNM, a clinical social worker, or a PA’s services
- Services and supplies furnished as incidental to the NP’s or PA’s services
- Visiting nurse services on a part-time or intermittent basis to homebound clients in areas determined to have a shortage of home health agencies (A homebound client is someone who is permanently or temporarily confined to his place of residence, not including a hospital or skilled nursing facility (SNF), because of a medical condition.)

When an RHC bills for visiting nurse services, the written plan of treatment to be used for the visiting nurse must be developed by the RHC supervising physician. It must be approved and ordered by the client’s treating physician if different from the supervising physician. The plan of treatment must be reviewed and approved by the supervising physician of the clinic at least every 60 days.

A *visit* is a face-to-face encounter between an RHC client and a physician, PA, NP, CNM, visiting nurse, or clinical NP. Encounters with more than one health professional and multiple encounters with the same health professional that take place on the same day and at a single location constitute a single visit, except where one or the other of the following conditions exists:

- After the first encounter, the client suffers illness or injury requiring additional diagnosis or treatment.
- The RHC client has a medical visit and an *other* health visit.

An *other* health visit includes, but is not limited to, a face-to-face encounter between an RHC client and a clinical social worker.

For freestanding RHCs, all laboratory services provided in the RHC’s laboratory are included in the encounter. This includes the basic laboratory tests as well as any other laboratory tests provided in the RHC laboratory. Consequently, there is no separate billing for laboratory services. However, if the RHC laboratory becomes a certified Medicare laboratory with its own supplier number, and enrolls in

Medicaid as an independent laboratory, all laboratory tests (except the basic laboratory tests) performed for RHC and non-RHC clients can be billed to Medicaid. The claim must be filed under their independent laboratory Medicaid provider identifier and using the appropriate HCPCS codes.

Refer to: The Medicare website at www.cms.gov for more information about Medicare RHC laboratory requirements.

7.2.1.1 Encounter Rates

An encounter rate may be reimbursed to the RHC facility only for the following services:

General Medical Services (encounter may be reimbursed to the RHC facility only)			
T1015			
General medical services must be submitted using one of the appropriate modifiers AJ, AM, SA, TD, TE, or U7. Adult preventative care must be submitted with diagnosis code V700.			

Note: If the encounter is for antepartum or postpartum care, use modifier TH in addition to the modifier required to clarify the service that was performed.

7.2.1.2 Medicaid Fee-for-Service Reimbursement Rates

The following copayments may be reimbursed to RHC providers billing under their own NPI, and are reimbursed at the Medicaid fee-for-service rate.

Copayments			
CP001	CP002	CP005	CP006

7.2.1.3 Freestanding Rural Health Clinic Services

The services listed below cannot be reimbursed to freestanding RHCs using only the RHC provider identifier. Use of the RHC provider identifier for billing these services causes claims to be processed as informational only. Services in any of these categories must be billed using the professional (non-RHC) provider identifier and the appropriate benefit code:

- THSteps medical checkups, which includes immunizations
- Family planning services (including implantable contraceptive capsules provision, insertion, or removal)

These services must be billed with an AM, SA, or U7 modifier.

Physician supplies are not a benefit of Texas Medicaid. Costs of supplies are included in the reimbursement for office visits. Outpatient hospital services (including emergency room services) and inpatient hospital services provided outside the RHC setting are to be billed using the individual or group physician provider identifier.

Exception: If later in the same day the client suffers an additional illness or injury requiring diagnosis or treatment, the clinic may submit a claim for a second visit.

Freestanding RHCs submit an all-inclusive encounter for services provided. All services provided that are incidental to the encounter, including developmental screening, must be included in the total charge for the encounter. A claim for these services may not be submitted as a separate encounter.

If immunizations are given outside of a THSteps medical checkup, procedure codes given in the THSteps section of this manual should be identified on the claim. These procedure codes are informational only, and are not payable.

All services provided during a freestanding RHC encounter must be submitted using procedure code T1015. The total submitted amount should be the combined charges for all services provided during that encounter.

One of the following modifiers must be reported with procedure code T1015 to designate the health-care professional providing the services: AH, AJ, AM, SA, TD, TE, or U7. If the encounter is for antepartum or postpartum care, use modifier TH in addition to the modifier required to designate the health-care professional providing the service.

Reminder: *The primary initial contact is defined as “the health-care professional who spends the greatest amount of time with the client during that encounter.”*

If more than one health-care professional is seen during the encounter, the modifier (if appropriate) must indicate the primary contact. For example, if an NP or a PA performs an antepartum exam, modifiers SA or U7, and TH, must be entered. A maximum of two modifiers may be reported with each encounter.

Providers who render services in an RHC setting for THSteps Medical services or Family Planning services may be reimbursed an encounter rate.

THSteps Medical Services

RHC facility providers may be reimbursed for THSteps medical services using their RHC NPI with the appropriate benefit code.

If the appropriate benefit code is not included, the service will process as informational only and will not be reimbursed.

THSteps Medical Services									
99381	99382	99383	99384	99385	99391	99392	99393	99394	99395
THSteps medical services must be billed using modifier EP and one of the following modifiers: AM, SA, or U7.									

7.2.1.4 Family Planning Services

RHC facility providers may be reimbursed for family planning services using their RHC NPI with the appropriate benefit code.

If the appropriate benefit code is not included, the service will process as informational only and will not be reimbursed

Family Planning Services*									
99201	99202	99203	99204	99205	99211	99212	99213	99214	99215
J7300	J7302								
* Family planning services performed in the RHC setting must be billed with the appropriate modifier: AM, SA, or U7.									

Family Planning Diagnosis Codes									
V2502	V2504	V2509	V251	V2511	V2512	V2513	V252	V2540	V2541
V2542	V2543	V2549	V255	V258	V259	V265	V2652*		
* Not covered by the Texas Women’s Health Program.									

Refer to: Subsection 6.3.5, “* Modifiers” in Section 6, “Claims Filing” (*Vol. 1, General Information*) for a definition of modifiers.

Section 9, “Physician,” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

Section 5, “THSteps Medical,” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)*.

Section 2, “Medicaid Title XIX family planning services,” in the *Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks)*.

Subsection 6.12.2.2, “Health Maintenance Organization (HMO) Copayments” in Section 6, “Claims Filing” (*Vol. 1, General Information*).

Subsection 9.2.59.1.2, “Preventive Care Visits” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

7.2.2 Services Rendered by Non-RHC Providers In An RHC Setting

Non-RHC providers (i.e., physicians and non-physician practitioners) submitting claims for THSteps and Family Planning services in the RHC setting must use their own NPI and the appropriate benefit code.

The following services, when rendered in an RHC setting by a non-RHC provider, will process as an encounter and will be reimbursed to the non-RHC provider as an encounter rate equivalent to the host facility:

- THSteps medical services
- Family planning services

Non-RHC providers rendering services in an RHC setting must use the appropriate national place of service (72) in order for claims to process as encounters.

7.2.3 Hospital-Based Rural Health Clinic Services

Hospital-based RHCs must use the encounter code T1015. A hospital-based RHC is paid based on an all-inclusive encounter rate. One of the following modifiers must be submitted for general medical services: AH, AJ, AM, SA, TD, TE, or U7.

The services listed below must be submitted using the physician’s Texas Provider Identifier (TPI) and the appropriate benefit code:

- THSteps medical checkups
- Family planning services (including implantable contraceptive capsules provision, insertion, or removal)
- Immunizations provided in hospital-based RHCs

Note: Refer to the tables in the above sections for procedure codes.

These services must be submitted with an AM, SA, or U7 modifier if performed in an RHC setting. Claims are paid under the PPS reimbursement methodology. When submitting a claim on the CMS-1450 paper claim form, providers must use the appropriate national POS (72) for an RHC setting.

Outpatient hospital services (including emergency room services) and inpatient hospital services provided outside the RHC setting are to be submitted using the individual or group physician provider identifier. Hospital-based RHCs must submit claims for pneumococcal and influenza vaccines as non-RHC services, under their hospital provider identifier.

7.2.3.1 After-Hours Care

After-hours care for RHCs is defined as care provided on weekends, federal holidays, or before 8 a.m. and after 5 p.m., Monday through Friday.

7.3 Prior Authorization

Prior authorization or authorization is not required for RHC services.

7.4 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including RHC services. RHC services are subject to retrospective review and recoupment if documentation does not support the service billed.

7.4.1 Record Retention

Freestanding RHCs must retain their records for a minimum of six years. Hospital-based RHCs must retain their records for a minimum of ten years.

7.5 Claims Filing and Reimbursement

7.5.1 Claims Information

General services and copayments are billed using the RHC's NPI. For all other services, providers must submit claims using their NPI and the appropriate benefit code.

Refer to: Subsection 8.2, "Services, Benefits, Limitations, and Prior Authorization" in this handbook.

Place of service 72 must be used on all claims when billing for services other than general medical. Benefit code EP1 must be used on claims for THSteps medical services.

Freestanding and hospital-based RHC services must be submitted to TMHP in an approved electronic format or on a UB-04 CMS-1450 paper claim form. Providers may purchase UB-04 CMS-1450 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a UB-04 CMS-1450 paper claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

7.5.2 Reimbursement

Freestanding and hospital-based RHCs are reimbursed provider-specific per visit rates calculated in accordance with 1 TAC §355.8101. Texas Medicaid implemented mandated rate reductions for certain services. Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

7.5.2.1 Medicare Crossover Claims Pricing

For Medicare Part B cost sharing obligations, all deductible obligations will be reimbursed at 100 percent of the deductible amount owed, even if the cost sharing comparison results in a lower payment. For all other cost sharing obligations (including Medicare Part A, B, and C), the cost sharing comparison is performed according to current guidelines.

For RHC Medicare crossover claims, Texas Medicaid will reimburse the lesser of the following:

- The coinsurance and full deductible payment.
- The amount remaining after the Medicare payment amount is subtracted from the allowed Medicaid fee or encounter rate for the service. If this amount is less than the deductible, then the full deductible is reimbursed instead.

If the Medicare payment is equal to, or exceeds the Medicaid allowed amount or encounter payment for the service, Texas Medicaid will not make a payment for coinsurance.

The client has no liability for any balance or Medicare coinsurance and deductible related to Medicaid-covered services.

Refer to: Subsection 2.7, “Medicare Crossover Claim Reimbursement” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (*Vol.1 General Information*).

7.5.2.2 NCCI and MUE Guidelines

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals. Providers should refer to the [CMS NCCI web page](#) for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

8 Tuberculosis Services

TB clinics must be enrolled in Texas Medicaid and provide services in accordance with 1 TAC, §354.1371.

8.1 Enrollment

To enroll in Texas Medicaid, a TB clinic must be either:

- A public entity operating under an HHSC tax identification number (TB regional clinic)
- A public entity operating under a non-HHSC tax identification number (city/county/local clinic)
- A non-hospital-based entity for private providers

Providers of TB-related clinic services must complete a provider application from the TB Services Branch within DSHS. Per Texas DSHS policy, TB clinics must develop and operate under a set of written policies and procedures that specify the criteria for licensed and non-licensed staff to provide services. The policies and procedures must include the following:

- The personnel file requirements for staff who provide directly observed therapy (DOT).
- The training and supervision that are required for outreach workers to be considered qualified to perform the assigned services.
- The written delegation protocol for services that are not performed by a physician, advanced practice registered nurse (APRN), or PA.
- The documentation that is required for all client encounters.

Upon written notice of approval by TB Services Branch, Medicaid enrollment applications from TMHP Provider Enrollment are sent to HHSC-approved providers of TB-related clinic services.

TMHP is responsible for issuing a group or individual a nine-digit provider identifier. Providers that list additional (satellite) clinics in the TB Services Branch provider application will receive nine-digit performing provider identifiers for each off-site clinic. TB off-site clinics operating under the jurisdiction of the applying provider must use the assigned group provider identifier and their nine-digit performing provider identifier.

Enrollment as a Medicaid provider is not complete until the TMHP enrollment packet has been finalized and a nine-digit provider identifier number is issued to the provider.

The effective date for participation is the date an approved provider application with the TB Services Branch is established.

To receive a TB Services Branch provider application form or provider supplement, send a request to the following address:

Texas Department of State Health Services
 TB/HIV/STD/Viral Hepatitis Unit
 Tuberculosis Services Branch
 Mail Code 1939
 1100 West 49th Street
 PO Box 149347
 Austin, TX 78714-9347

Refer to: Subsection 1.1, “Provider Enrollment and Reenrollment” in Section 1, “Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for more information about enrollment procedures related to the TMHP Medicaid enrollment applications.

8.1.1 Managed Care Program Enrollment

TB clinics do not need to enroll with the Medicaid managed care health plans. All services provided by TB clinics are submitted to TMHP for all Medicaid clients, including Medicaid managed care clients.

8.2 Services, Benefits, Limitations, and Prior Authorization

The level of service provided varies depending on whether the services are delivered by a nonphysician or physician and if medications are prescribed.

8.2.1 TB-Related Clinic Services

The following services may be performed by a physician, APRN, or PA in the TB clinic:

Procedure Codes									
99201	99202	99203	99204	99205	99211	99212	99213	99214	99215

A physician’s presence is not required to perform procedure code 99211; however, the physician must provide direct supervision by being present in the clinic and immediately available to furnish assistance and direction at the time service is provided.

Before TB treatment can be initiated, an initial screening (procedure code T1023) by an RN, LPN, or LVN, or a new patient physician E/M visit (procedure code 99201, 99202, 99203, 99204, or 99205) must be performed. If the treatment is initiated by a nursing screening, a new patient physician E/M visit must be completed within 90 days, or subsequent reimbursement for DOT (procedure code H0033) will be denied.

Following the initial new patient physician E/M visit, an established patient physician E/M visit (procedure code 99212, 99213, 99214, or 99215) must be billed every 90 days throughout the course of treatment, or subsequent reimbursement for DOT (procedure code H0033) will be denied.

Clients with latent TB infection, including those in a high-risk group (children who are 4 years of age and younger, those who are immunocompromised, and clients who are HIV-positive), and those with active TB disease, must be seen by a physician every 90 days throughout the course of treatment.

A physician must evaluate each client with active or latent TB disease prior to discharge from TB treatment.

Procedure codes H0033, T1002, T1003, and T1023 may be provided under established clinic protocols.

The initial TB screening (procedure code T1023), performed by an RN, LPN, or LVN includes, but is not limited to the following:

- Brief mental and physical assessment
- Exposure history
- Referral for lab or X-ray per protocol
- Referral for social or other medical services
- Other assessment

Procedure code T1023 may be reimbursed prior to the client being seen by a physician, and no more often than once per 12 months. One RN or LVN/LPN (procedure codes T1023, T1002, and T1003) service may be reimbursed per day, per client, when physician services are not performed.

Subsequent nursing services (Procedure code T1002 and T1003) may be a benefit when not provided the same day as a physician E/M visit.

Reimbursement for DOT services (procedure code H0033) provided in the clinic or other places of service, excluding inpatient hospitals, SNFs, intermediate care facilities (ICFs), outpatient hospitals, independent laboratories, birthing centers, and extended care facilities will be limited to one per day, and a maximum of five per week, per client, throughout the course of treatment.

Procedure codes T1002 and T1003 are limited to a maximum of eight 15-minute units per day, per client.

- Minutes of nursing services cannot be accumulated over multiple days. Minutes of nursing services can only be billed per calendar day.
- If the total number of minutes of nursing services per procedure code is less than 8 minutes for a calendar day, then no unit of service can be billed for that day. The minutes cannot be added to minutes of nursing services from any previous or subsequent days for billing purposes.
- If more than 1 unit of service is billed, every unit except the last must be for the complete 15 minutes, with the last unit being no less than 8 minutes of nursing service.
- Time spent in contact investigations in not reimbursable.

Reimbursement for new client examinations (procedure code 99201, 99202, 99203, 99204, and 99205) are limited to new clients who have not received services in the same clinic for a period of three years.

One physician E/M service may be reimbursed per day, per client.

8.2.2 Ancillary Services

The following ancillary TB services are a benefit of Texas Medicaid:

Procedure Codes									
71010	71020	71021	71022	71030	71035	81025	86580	86701*	86703*
89220	96365	96366	96367	96368	96374	96375	99000	99001***	J0278
J1840	J1956	J2020**	J2280**	J3000**					
*Must be billed with QW modifier									
**Must be billed with KX modifier when oral formulation is not appropriate for the client									
*** No longer reimbursed for TB services rendered in an office setting. Limited to services rendered in an outpatient hospital only.									

Certain injectable TB medications (procedure codes J2020, J2280, and J3000), which also have an oral formulation, must be billed with modifier KX to indicate that the oral formulation is not appropriate for the client.

All drugs for which Medicaid is billed must have been purchased by the TB clinic. In the event that the clinic received the drug at no cost through DSHS or another source, it cannot be billed to Texas Medicaid. All medication claims are subject to retrospective review.

Handling or conveyance of a specimen from the patient in the clinic to a laboratory (procedure code 99001) will be reimbursed only when submitted with one of the following professional or nursing services performed on the same date of service. Procedure code 99000 for Tuberculosis (TB) Clinics is a benefit of Texas Medicaid for services rendered in an individual or group TB clinic. Prior authorization is not required for procedure code 99000.

Procedure Codes									
99201	99202	99203	99204	99205	99211	99212	99213	99214	99215
T1002	T1003*	T1023							
* Reimbursed for individual or group TB clinics for services rendered in the home or other setting.									

8.2.3 Prior Authorization

Prior authorization is not required for TB-related services.

8.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including TB services. TB services are subject to retrospective review and recoupment if documentation does not support the service billed.

8.4 Provider Responsibilities

If approved to submit claims as a TB clinic under Texas Medicaid, the provider must adhere to the following requirements:

- Be a facility that is not an administrative, organizational, or financial part of a hospital, but is organized and operated to provide medical care to outpatients.
- Comply with all applicable federal, state, and local laws and regulations.
- Employ or have a contract or formal arrangement with a licensed physician (M.D. or D.O.) who is responsible for providing medical direction and supervision over all services provided to the clinic's clients. To meet this requirement, a physician must see the client at least once every 90 days to prescribe the type of care provided and, if the services are not limited by the prescription, periodically review the need for continued care.
- Adhere to the guidelines issued by HHSC, under the authority of the Texas Health and Safety Code, and ensure that services are consistent with the recommendations of the American Thoracic Society and the Centers for Disease Control and Prevention (CDC). For more information, visit the website at www.cdc.gov/tb/default.htm.
- Maintain complete and accurate medical records of each recipient's care and treatment and accurately document all services provided and the medical necessity for the services.
- Ensure that services provided to each client are commensurate with the client's medical needs based on the client's assessment or evaluation, diagnostic studies, plan of care, and physician direction. These services must be documented in the client's medical records.
- Be enrolled and approved for participation in Texas Medicaid.
- Sign a written provider agreement with HHSC or its designee. By signing the agreement, the provider of TB-related clinic services agrees to comply with the terms of the agreement and all requirements of Texas Medicaid including regulations, rules, handbooks, standards, and guidelines published by HHSC or its designee.

- Submit claims for services covered by Texas Medicaid in the manner and format prescribed by HHSC or its designee.
- Be organized and operated to provide TB-related services, which include, but are not limited to, the covered services as indicated in subsection 8.2, “Services, Benefits, Limitations, and Prior Authorization” in this handbook.
- Not provide services within an SNF, ICF, or intermediate care facility for persons with intellectual disability (ICF-ID)

Refer to: Subsection 1.1, “Provider Enrollment and Reenrollment” in Section 1, “Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for more information.

8.5 Claims Filing and Reimbursement

8.5.1 Claims Information

TB-related clinic services must use benefit code TB1 on all claims and authorization requests. All TB-related clinic services must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 paper claim form from the vendor of their choice. TMHP does not supply them. When completing a CMS-1500 paper claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

“Section 6: Claims Filing” (*Vol. 1, General Information*).

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

8.5.1.1 Managed Care Clients

TB-related services are carved out of the Medicaid Managed Care Program and must be billed to TMHP for payment consideration. Carved-out services are those that are rendered to Medicaid Managed Care clients, but are administered by TMHP and not the client’s MCO.

8.5.2 Reimbursement

The Medicaid reimbursement rates for TB clinics are calculated in accordance with 1 TAC §355.8081.

X-ray services are reimbursed in accordance with 355.8081 and are listed in the current [physician fee schedule](#) on the TMHP website at www.tmhp.com. Texas Medicaid implemented mandated rate reductions for certain services. The Online Fee Lookup (OFL) and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

8.5.2.1 NCCI and MUE Guidelines

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the *Texas Medicaid Provider Procedures Manual*. Providers should refer to the [CMS NCCI web page](#) for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

9 Claims Resources

Refer to the following sections or forms when filing claims:

Resource	Location
Automated Inquiry System (AIS)	TMHP Telephone and Fax Communication (<i>Vol. 1, General Information</i>)
CMS-1500 Paper Claim Filing Instructions	Subsection 6.5 (<i>Vol. 1, General Information</i>)
2012 American Dental Association (ADA) Dental Claim Filing Instructions	Subsection 6.7 (<i>Vol. 1, General Information</i>)
Appendix A: State, Federal, and TMHP Contact Information	Appendix A (<i>Vol. 1, General Information</i>)
TMHP Electronic Claims Submission	Subsection 6.2 (<i>Vol. 1, General Information</i>)
Section 3: TMHP Electronic Data Interchange (EDI)	Section 3 (<i>Vol. 1, General Information</i>)
Tuberculosis Screening and Guidelines	Subsection A.5, <i>Children's Services Handbook (Vol. 2, Provider Handbooks)</i>
UB-04 CMS-1450 Paper Claim Filing Instructions	Subsection 6.6 (<i>Vol. 1, General Information</i>)

1 General Information

The information in this handbook is intended for Texas Medicaid home health durable medical equipment (DME), DME medical supplier, and medical supply company providers. This handbook provides information about the Texas Medicaid benefits, policies, and procedures that are applicable to these providers.

This handbook contains information about Texas Medicaid fee-for-service benefits. For information about managed care benefits, refer to the Texas Medicaid Managed Care Handbook.

Managed care carve-out services are administered as fee-for-service benefits. A list of all carve-out services is available in Section 8, “Carve-Out Services” in the *Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks)*.

All providers are required to report suspected child abuse or neglect as outlined in subsection 1.6.1.2, “Reporting Child Abuse or Neglect” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*).

Important: *All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

Refer to: “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) (*Vol. 1, General Information*) for more information about enrollment procedures.

1.1 Payment Window Reimbursement Guidelines for Services Preceding an Inpatient Admission

According to the three-day and one-day payment window reimbursement guidelines, most professional and outpatient diagnostic and nondiagnostic services that are rendered within the designated timeframe of an inpatient hospital stay, and are related to the inpatient hospital admission, will not be reimbursed separately from the inpatient hospital stay if the services are rendered by the hospital or an entity that is wholly owned or operated by the hospital.

These reimbursement guidelines do not apply in the following circumstances:

- The professional services are rendered in the inpatient hospital setting.
- The hospital and the physician office or other entity are both owned by a third party, such as a health system.
- The hospital is not the sole or 100-percent owner of the entity.

Refer to: Subsection 3.7.3.8, “Payment Window Reimbursement Guidelines” in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for additional information about the payment window reimbursement guidelines.

2 Texas Medicaid (Title XIX) Home Health Services

2.1 Enrollment

Enrolled providers of DME and medical supplies will be issued a DME-Home Health Services (DMEH) provider identifier that is specific to home health providers. Providers will also be issued a separate DME/Medical Supplier provider identifier that is specific to the Comprehensive Care Program (CCP). All DME providers must be Medicare-certified before applying for enrollment in Texas Medicaid.

Providers that render custom DME wheeled mobility systems to Texas Medicaid clients must enroll in Texas Medicaid as a specialized/custom wheeled mobility group provider and must have at least one qualified rehabilitation professional (QRP) performing provider.

Certified QRP providers must enroll in Texas Medicaid as performing providers under DME provider groups.

To enroll in Texas Medicaid as a QRP performing provider, individual professionals must be certified by the National Registry of Rehabilitation Technology Suppliers (NRRTS) or Rehabilitation Engineering and Assistive Technology Society of North America (RESNA) and must enroll as a performing provider under a Specialized /Custom Wheeled Mobility group.

Providers may download the Texas Medicaid Provider Enrollment Application at www.tmhp.com or request a paper application form by contacting Texas Medicaid & Healthcare Partnership (TMHP) directly at 1-800-925-9126.

Providers may also obtain the paper enrollment application by writing to the following address:

Texas Medicaid & Healthcare Partnership
Provider Enrollment
PO Box 200795
Austin, TX 78720-0795
1-800-925-9126
Fax: 1-512-514-4214

Providers may request prior authorization for home health services by contacting:

Texas Medicaid & Healthcare Partnership
Home Health Services
PO Box 202977
Austin, TX 78720-2977
1-800-925-8957
Fax: 1-512-514-4209

2.1.1 Pending Agency Certification

DMEH suppliers that submit claims before the enrollment process is complete or without prior authorization for services issued by the TMHP Home Health Services Prior Authorization Department will not be reimbursed. The effective date of enrollment is the date on which all Medicaid provider enrollment forms have been received and approved by TMHP.

Upon the receipt of notice of Medicaid enrollment, the supplier must contact the TMHP Home Health Services Prior Authorization Department before rendering to a Medicaid client, services that require a prior authorization number. Prior authorization cannot be issued before Medicaid enrollment has been completed. Regular prior authorization procedures are followed at that time.

Providers must not submit home health services claims for payment until they have received their Medicaid certification and a prior authorization number has been assigned.

Refer to: Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

2.1.2 Surety Bond Requirements

All newly enrolling and re-enrolling durable medical equipment (DME) providers must, as a condition of enrollment and continued participation into Texas Medicaid, obtain a surety bond that complies with Title 1, Texas Administrative Code (TAC) §352.15.

Important: *Surety bonds obtained for the purpose of accreditation in the Medicare program, which lists the Centers for Medicare & Medicaid Services (CMS) as obligee, do not fulfill the surety bond requirement for Texas Medicaid.*

The surety bond submitted to Texas Medicaid must meet the following requirements:

- A bond in an amount of no less than \$50,000 must be provided for each enrolled location.
 - Note:** *Only one surety bond is required if the provider has multiple Medicaid DME provider numbers related to the same location. For example, if the provider has a TPI with a suffix for home health, a second suffix for Comprehensive Care Program (CCP), and a third suffix for Specialized Custom Wheeled Mobility all for the same practice location, only one surety bond is required.*
- The bond must be submitted on the [State of Texas Medicaid Provider Surety Bond Form](#). No other form will be accepted. The use of this form designates the Health and Human Services Commission (HHSC) as the sole obligee of the bond. Instructions are included with the form.
- The bond must be issued for a term of 12 months. Bonds for longer or shorter terms are not acceptable.
- The bond must be in effect on the date that the provider enrollment application is submitted to TMHP for consideration. The effective date stated on the bond must be:
 - No later than the date that the provider enrollment application is submitted.
 - No earlier than 12 months before the date that the provider enrollment application is submitted.
- The bond must be a continuous bond. A continuous bond remains in full force and effect from term to term unless the bond is canceled.

Important: *An annual bond that specifies effective and expiration dates for the bond, is not acceptable.*

At the time of enrollment or re-enrollment, providers must submit the surety bond form with original signatures and a copy of the Power of Attorney document from the surety company that issued the bond.

Note: *Surety companies may refer to Texas Department of Insurance (TDI) file #9212562912 or TDI link #132456 when filing the bond.*

2.1.2.1 Proof of Continuation

DME providers must maintain a current surety bond to continue participation in Texas Medicaid. Each year, providers must submit documentation that shows proof of continuation of the bond for a new 12-month term. The document may be submitted on the surety bond company's form and must include the following components:

- Bond number
- Principal's name, address, and Tax ID or Medicaid provider number (Texas Provider Identifier)
- Surety's company name and address
- Date of the original bond
- New "good through" date

To avoid losing Medicaid enrollment status, providers must submit the proof of continuation to the TMHP Provider Enrollment before the expiration date of the bond that is currently on file. The completed proof of continuation document must include the original signatures of the authorized corporate representative of the DME provider (principal), and the attorney-in-fact of the surety company. Providers may submit a copy of the proof of continuation (i.e., scan, fax, photocopy) pending the submission of the original document.

Submission Information

The surety bond must be submitted to the TMHP Provider Enrollment Department at the following address:

Texas Medicaid & Health Partnership
ATTN: Provider Enrollment
PO Box 200795
Austin, TX 78720-0795
Fax: 1-512-514-4214

2.2 Services, Benefits, Limitations, and Prior Authorization

Home health services include home health skilled nursing (SN), home health aide (HHA), physical therapy (PT) and occupational therapy (OT) services; DME; and expendable medical supplies that are provided to eligible Medicaid clients at their place of residence.

Note: *THSteps-eligible clients who qualify for medically necessary services beyond the limits of this Home Health Services benefit may receive those services through CCP.*

Refer to: Subsection 5.1.1, “Overview” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for more information on clients who are birth through 20 years of age.

Section 3, “Home Health Nursing and Therapy Services” in the *Nursing and Therapy Services Handbook (Vol. 2, Provider Handbooks)* for more information on nursing and therapy services.

2.2.1 * Home Health Services

The benefit period for home health professional services is up to 60 days with a current plan of care (POC). For all DME and medical supplies with or without prior authorization requirements, providers must complete a Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form except as outlined in subsection 2.2.11 of this handbook. In chronic and stable situations, the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form is valid for up to, but no more than, 6 months from the date of the physician’s signature on the form, unless otherwise noted in this handbook. If necessary, DME and supplies that are ordered on a Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form may be prior authorized for up to 6 months with medical necessity determination. Because Medicaid clients have a one-month eligibility period, providers must bill for a one month supply at a time, even though prior authorization may be granted for up to 6 months. This extended prior authorization period begins on the date that clients receive their first prior-authorized home health service. Texas Medicaid allows additional DME or supplies that have been determined to be medically necessary and have been prior authorized by TMHP Home Health Services Prior Authorization Department. Providers must retain all orders, signed and dated Title XIX forms, delivery slips, and **corresponding** invoices for all supplies provided to a client and must disclose them to HHSC or its designee on request. These records and claims must be retained for a minimum of five years from the date of service (DOS) or until audit questions, appeals, hearings, investigations, or court cases are resolved. Use of these services is subject to retrospective review.

2.2.1.1 Client Eligibility

Home health clients do not have to be homebound to qualify for services.

To qualify for home health services, the Medicaid client must be eligible on the DOS and must:

- Have a medical need for home health professional services, DME, or supplies that is documented in the client's POC and considered a benefit under home health services.
- Receive services that meet the client's existing medical needs and can be safely provided in the client's home.
- Receive prior authorization from TMHP for most home health professional services, DME, and supplies.

Unless otherwise noted in this handbook, certain DME/supplies may be obtained without prior authorization although providers must retain a Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form that has been reviewed, signed, and dated by the treating physician for these clients.

Refer to: "Automated Inquiry System (AIS)" in "State, Federal, and TMHP Contact Information" (*Vol. 1, General Information*).

Section 6: Claims Filing in the *Children's Services Handbook (Vol. 2, Provider Handbooks)* for more information on clients who are 20 years of age and younger.

2.2.1.2 Prior Authorization Requests for Clients with Retroactive Eligibility

Retroactive eligibility occurs when the effective date of a client's Medicaid coverage is before the date on which the client's Medicaid eligibility is added to TMHP's eligibility file, which is called the "add date."

For clients with retroactive eligibility, prior authorization requests must be submitted after the client's add date and before a claim is submitted to TMHP.

For services provided to fee-for-service Medicaid clients during the client's retroactive eligibility period (i.e., the period from the effective date to the add date), prior authorization must be obtained within 95 days of the client's add date and before a claim for those services is submitted to TMHP. For services provided on or after the client's add date, the provider must obtain prior authorization within three business days of the date of service.

The provider is responsible for verifying eligibility. The provider is strongly encouraged to access AIS or TexMedConnect to verify eligibility frequently while providing services to the client. If services are discontinued before the client's add date, the provider must still obtain prior authorization within 95 days of the add date to be able to submit claims.

Refer to: Section 4: Client Eligibility (*Vol. 1, General Information*).

2.2.1.3 Prior Authorization

Prior authorization must be obtained for some supplies and most DME from TMHP within three business days of the DOS. Although providers may supply some DME and medical supplies to a client without prior authorization, they must still retain a copy of the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form that has Section B completed, signed, and dated by the client's attending physician, unless otherwise noted in this handbook.

The following prior authorization requests can be submitted on the TMHP website at www.tmhp.com:

- External Insulin Pump
- Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form
- Home Health Services POC
- Medicaid Certificate of Medical Necessity for CPAP/BiPAP or Oxygen Therapy

- Medicaid Certificate of Necessity for Chest Physiotherapy Device Form—Initial Request
- Medicaid Certificate of Necessity for Chest Physiotherapy Device Form—Extended Request
- Statement for Initial Wound Therapy System In-Home Use
- Statement for Recertification of Wound Therapy System In-Home Use
- Wheelchair/Scooter/Stroller Seating Assessment Form (CCP/Home Health Services) (Attachments will be sent separately due to size and detailed information)

Refer to: Subsection 5.5.1, “Prior Authorization Requests Through the TMHP Website” in Section 5, “Prior Authorization” (*Vol. 1, General Information*) for more information, including mandatory documentation requirements.

If a client’s primary coverage is private insurance and Medicaid is secondary, prior authorization is required for Medicaid reimbursement. If the primary coverage is Medicare, Medicare approves the service, and Medicaid is secondary, prior authorization is not required. TMHP will pay only the coinsurance or deductible according to current payment guidelines. If Medicare denied the service, then Medicaid prior authorization is required. TMHP must receive a prior authorization request within 30 days of the date of Medicare’s final disposition. The Medicare Remittance Advice Notice (MRAN) containing Medicare’s final disposition must accompany the prior authorization request. If the service is a Medicaid-only service, prior authorization is required within three business days of the DOS. The provider is responsible for determining whether eligibility is effective by using AIS, TexMedConnect, or an electronic eligibility inquiry through the TMHP EDI gateway.

The provider must contact the TMHP Home Health Services Prior Authorization Department within three business days of the DOS to obtain prior authorization for DME and medical supplies.

If inadequate or incomplete information is provided or medical necessity is lacking, the provider will be asked to furnish any required or additional documentation so that a decision about the request can be made. Because the documentation must often be obtained from the client’s physician, providers have two weeks to submit the requested documentation. If the additional documentation is received within the two-week period, prior authorization can be considered for the original date of contact. If the additional documentation is received more than two weeks after the request for the documentation, prior authorization is not considered before the date on which the additional documentation is received. It is the DME supplier’s responsibility to contact the physician to obtain the requested additional documentation. The physician must maintain documentation of medical necessity in the client’s record.

TMHP Home Health Services toll-free number is 1-800-925-8957.

Refer to: Subsection 2.2.2.2, “Prior Authorization” in this handbook for DME prior authorization information.

Subsection 2.3.1, “Medicaid Relationship to Medicare” in this handbook.

Client eligibility for Medicaid is for one month at a time. Providers should verify their client’s eligibility every month. Prior authorization does not guarantee payment.

2.2.2 * Durable Medical Equipment (DME) and Supplies

Texas Medicaid defines DME as:

Medical equipment or appliances that are manufactured to withstand repeated use, ordered by a physician for use in the home, and required to correct or ameliorate a client’s disability, condition, or illness.

Since there is no single authority, such as a federal agency, that confers the official status of “DME” on any device or product, HHSC retains the right to make such determinations with regard to DME benefits of Texas Medicaid. DME benefits of Texas Medicaid must have either a well-established history of efficacy or, in the case of novel or unique equipment, valid, peer-reviewed evidence that the equipment corrects or ameliorates a covered medical condition or functional disability.

Requested DME may be a benefit when it meets the Medicaid definition of DME. The majority of DME and expendable supplies are covered home health services. If a service cannot be provided for a client who is 20 years of age or younger through home health services, these services may be covered through CCP if they are determined to be medically necessary.

To be reimbursed as a home health benefit:

- The client must be eligible for home health benefits.
- The criteria listed for the requested equipment or supply must be met.
- The requested equipment or supply must be medically necessary, and Federal Financial Participation (FFP) must be available.
- The client's health status would be compromised without the requested equipment or supply.
- The requested equipment or supplies must be safe for use in the home.
- The client must be seen by a physician within one year of the DOS.

The provider must sign and have the client sign [DME Certification and Receipt Form](#) on the TMHP website at www.tmhp.com for all purchased DME for Medicaid clients before submitting a claim for payment. The client's signature means the DME is the property of the client. The certification form must include the date the client received the DME, the name of the item, and the printed names and signatures of the provider and the client or primary caregiver. This form must be maintained by the DME provider in the client's record.

The signed and dated DME Certification and Receipt Form must be submitted to TMHP for claims and appeals for DME that meet or exceed a billed amount of \$2,500.00. The form must also be submitted when multiple items that meet or exceed a total billed amount of \$2,500.00 are billed for the same DOS. The form is required in addition to obtaining prior authorization, when applicable.

If the DME Certification and Receipt Form is not submitted to TMHP, the claim payment or appeal will be reviewed and will be eligible for recoupment. Incomplete forms will be returned to the provider for correction and resubmission.

TMHP will contact clients that received DME that meets or exceeds a billed amount of \$2,500.00 to verify that services were rendered. If the delivery of the equipment cannot be verified by the client, the claim payment will be eligible for recoupment.

The provider must keep all Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Forms and Addendum to Home Health Services (Title XIX) DME/Medical Supplies Physician Order Forms on file. Providers must retain delivery slips or **corresponding** invoices and the signed and dated DME Certification and Receipt Form documenting the item and date of delivery for all DME provided to a client and must disclose them to HHSC or its designee on request.

- The DME must be used for medical or therapeutic purposes, and supplied through an enrolled DMEH provider in compliance with the client's POC.
- These records and claims must be retained for a minimum of five years from the DOS or until audit questions, appeals, hearings, investigations, or court cases are resolved. Use of these services is subject to retrospective review.

Note: *All purchased equipment must be new upon delivery to client. Used equipment may be utilized for lease, but when purchased, must be replaced with new equipment.*

HHSC/TMHP reserves the right to request the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form or Addendum to Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form at any time.

DME must meet the following requirements to qualify for reimbursement under Home Health Services:

- The client received the equipment as prescribed by the physician.
- The equipment has been properly fitted to the client or meets the client's needs.
- The client, the parent or guardian of the client, or the primary caregiver of the client, has received training and instruction regarding the equipment's proper use and maintenance.

DME must:

- Be medically necessary due to illness or injury or to improve the functioning of a body part, as documented by the physician in the client's POC or the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form.
- Be prior authorized by the TMHP Home Health Services Prior Authorization Department for rental or purchase of most equipment. Some equipment does not require prior authorization. Prior authorization for equipment rental can be issued for up to six months based on diagnosis and medical necessity. If an extension is needed, requests can be made up to 60 days before the start of the new prior authorization period with a new Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form.
- Meet the client's existing medical and treatment needs.
- Be considered safe for use in the home.
- Be provided through an enrolled DMEH provider or supplier.

Note: *Texas Health Steps (THSteps)-eligible clients who qualify for medically necessary services beyond the limits of this home health benefit will receive those services through CCP.*

DME that has been delivered to the client's home and then found to be inappropriate for the client's condition will not be eligible for an upgrade within the first six months following purchase unless there has been a significant change in the client's condition, as documented by the physician familiar with the client. All adjustments and modifications within the first six months after delivery are considered part of the purchase price.

All DME purchased for a client becomes the Medicaid client's property upon receipt of the item. This property includes equipment delivered which will not be prior authorized or reimbursed in the following instances:

- Equipment delivered to the client before the physician signature date on the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form or Addendum to Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form.
- Equipment delivered more than three business days before obtaining prior authorization from the TMHP Home Health Services Prior Authorization Department and meets the criteria for purchase.

Additional criteria:

- A determination as to whether the equipment will be rented, purchased, replaced, repaired, or modified will be made by HHSC or its designee based on the client's needs, duration of use, and age of the equipment.
- Periodic rental payments are made only for the lesser of either the period of time the equipment is medically necessary, or when the total monthly rental payments equal the reasonable purchase cost for the equipment.
- Purchase is justified when the estimated duration of need multiplied by the rental payments would exceed the reasonable purchase cost of the equipment or it is otherwise more practical to purchase the equipment.

- If a DME/medical supply provider is unable to deliver a prior authorized piece of equipment or supply, the provider should allow the client the option of obtaining the equipment or supplies from another provider.

Items or services are reimbursed at the lesser of:

- The provider's billed charges
- The published fee determined by HHSC
- Manual pricing as determined by HHSC based on one of the following:
 - The manufacturer's suggested retail price (MSRP) less 18 percent
 - The provider's documented invoice cost

If an item is manually priced, providers must submit documentation of one of the following for consideration of purchase or rental with the appropriate procedure codes:

- The MSRP or average wholesale price (AWP), whichever is applicable
- The provider's documented invoice cost

2.2.2.1 Modifications, Adjustments, and Repairs

Modifications are the replacement of components because of changes in the client's condition, not replacement because the component is no longer functioning as designed. All modifications and adjustments within the first six months after delivery are considered part of the purchase price.

Modifications to custom equipment may be prior authorized should a change occur in the client's needs, capabilities, or physical and mental status which cannot be anticipated.

Documentation must include the following:

- All projected changes in the client's mobility needs
- The date of purchase, and serial number of the current equipment
- The cost of purchasing new equipment versus modifying the current equipment

All modifications within the first six months after delivery are considered part of the purchase price.

Adjustments do not require supplies. Adjustments made within the first six months after delivery will not be prior authorized. Adjustments made within the first six months after delivery are considered part of the purchase price. A maximum of one hour of labor for adjustments may be prior authorized as needed after the first six months following delivery.

Repairs to client-owned equipment may be prior authorized as needed with documentation of medical necessity. Technician fees are considered part of the cost of the repair. Repairs require the replacement of components that are no longer functional. Providers are responsible for maintaining documentation in the client's medical record specifying the repairs and supporting medical necessity.

A DME repair will be considered based on the age of the item and cost to repair it.

A request for repair of DME must include a statement or medical information from the attending physician substantiating that the medical appliance or equipment continues to serve a specific medical purpose and an itemized estimated cost list from the vendor or DME provider of the repairs. Rental equipment may be provided to replace purchased medical equipment for the period of time it will take to make necessary repairs to purchased medical equipment.

Repairs will not be prior authorized in situations where the equipment has been abused or neglected by the client, client's family, or caregiver. Routine maintenance of rental equipment is the provider's responsibility. For clients requiring wheelchair repairs only, the date last seen by physician does not need to be filled in on the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form.

2.2.2.1.1 Accessories

Equipment accessories including, but not limited to, pressure support cushions, may be prior authorized with documentation of medical necessity.

2.2.2.2 Prior Authorization

Prior authorization is required for most DME and supplies provided through Home Health Services. These services include accessories, modifications, adjustments, and repairs for the equipment.

Providers must submit a completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form to the TMHP Home Health Services Prior Authorization Department.

Unless otherwise noted in this handbook, a completed Home Health Services (Title XIX) Durable Medical Equipment (DME) or Medical Supplies Physician Order Form prescribing the DME or supplies must be signed and dated by a physician and by the representative of the DME/Medical Supply provider familiar with the client before requesting prior authorization for all DME equipment and supplies. All signatures and dates must be current, unaltered, original, and handwritten. Computerized or stamped signatures or dates will not be accepted. A current signature and date is valid for no more than 90 days prior to the date of the requested prior authorization or the initiation of service. The completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form must include the procedure codes and numerical quantities for services requested.

The completed, signed, and dated form must be maintained by the DME provider and the prescribing physician in the client's medical record. The completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form with the original dated signature must be maintained by the prescribing physician.

To complete the prior authorization process by paper, the provider must fax or mail the completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form to the Home Health Services Prior Authorization Department and retain a copy of the signed and dated form in the client's medical record at the provider's place of business.

To complete the prior authorization process electronically, the provider must submit the prior authorization requirements through any approved electronic methods and retain a copy of the signed and dated Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form in the client's medical record at the provider's place of business.

Retrospective review may be performed to ensure that the documentation included in the client's medical record supports the medical necessity of the requested services.

The date last seen by the physician must be within the past 12 months unless a physician waiver is obtained. The physician's signature on the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form is only valid for 90 days before the initiation of services. The requesting provider may be asked for additional information to clarify or complete the request.

Providers must obtain prior authorization within three business days of providing the service by calling the TMHP Home Health Services Prior Authorization Department or faxing the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form.

To facilitate a determination of medical necessity and avoid unnecessary denials when requesting prior authorization, the physician must provide correct and complete information supporting the medical necessity of the equipment or supplies requested, including:

- Accurate diagnostic information pertaining to the underlying diagnosis or condition as well as any other medical diagnoses or conditions, to include the client's overall health status.
- Diagnosis or condition causing the impairment resulting in a need for the equipment or supplies requested.

Purchased DME is anticipated to last a minimum of five years, unless otherwise noted, and may be considered for replacement when the time has passed or the equipment is no longer functional or repairable. A copy of the police or fire report, when appropriate, and the measures to be taken to prevent reoccurrence must be submitted.

Prior authorization for equipment replacement is considered within five years of equipment purchase when one of the following occurs:

- There has been a significant change in the client's condition such that the current equipment no longer meets the client's needs.
- The equipment is no longer functional and either cannot be repaired or it is not cost-effective to repair.

Replacement of equipment is also considered when loss or irreparable damage has occurred. The following must be submitted with the prior authorization request:

- A copy of the police or fire report, when appropriate
- A statement about the measures to be taken in order to prevent reoccurrence

Payment may be prior authorized for repair of purchased DME. Maintenance of rental equipment (including repairs) is the supplier's responsibility. The toll-free number for the TMHP Home Health Services Prior Authorization Department is 1-800-925-8957. Requests for repairs must include the cost estimate, reasons for repairs, age of equipment, and serial number.

2.2.3 * Medical Supplies

Medical supplies are benefits of the Home Health Services Program if they meet the following criteria:

- Unless otherwise noted in this handbook, the representative of the DME/medical supply provider and a physician who is familiar with the client must sign and date a completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form that prescribes the DME or supplies before requesting prior authorization for the DME or supplies. All signatures and dates must be current, unaltered, original, and handwritten. Computerized or stamped signatures or dates will not be accepted. A current signature and date is valid for no more than 90 days prior to the date of the requested prior authorization or the initiation of service. The completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form must include the procedure codes and numerical quantities for the services requested.
- The provider must contact TMHP within three business days of providing the supplies to the client and obtain prior authorization, if required.
- The requesting provider and ordering physician must keep all Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Forms and Addendum to Home Health Services (Title XIX) DME/Medical Supplies Physician Order Forms on file. The physician must maintain the original signed and dated Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form in their records.

- Providers must retain individual delivery slips or invoices for each DOS that documents the date of delivery for all supplies provided to a client and must disclose them to HHSC or its designee upon request. Documentation of delivery must include one of the following:
 - Delivery slip or **corresponding** invoice signed and dated by client or **caregiver, or**
 - A dated carrier tracking document with shipping date and delivery date must be printed from the carrier's website as confirmation that the supplies were shipped and delivered. The dated carrier tracking document must be attached to the delivery slip or **corresponding** invoice.
- The dated delivery slip or invoice must include the client's full name, the address to which supplies were delivered, and an itemized list of goods that includes the descriptions and numerical quantities of the supplies delivered to the **client and the corresponding tracking number from the carrier**. This document could also include prices, shipping weights, shipping charges, or other descriptions.
- All claims submitted for medical supplies must include the same quantities or units that are documented on the delivery slip or **corresponding** invoice and on the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form. They must reflect the number of units by which each product is measured. For example, diapers are measured as individual units. If one package of 300 diapers is delivered, the delivery slip or **corresponding** invoice and the claim must reflect that 300 diapers were delivered and not that one package was delivered. Diaper wipes are measured as boxes or packages. If one box of 200 wipes is delivered, the delivery slip or invoice and the claim must reflect that one box was delivered and not that 200 individual wipes were delivered. There must be one dated delivery slip or invoice for each claim submitted for each client. All claims submitted for medical supplies must reflect the same date as the delivery slip or **corresponding** invoice and the same timeframe covered by the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form. The DME Certification and Receipt Form is still required for all equipment delivered.

***Note:** These records and claims must be retained for a minimum of five years from the DOS or until audit questions, appeals, hearings, investigations, or court cases are resolved. Use of these services is subject to retrospective review.*
- The requesting provider or ordering physician must document medical supplies as medically necessary in the client's POC or on a completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form and Addendum to Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form.

HHSC/TMHP reserves the right to request the signed and dated Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form or Addendum to Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form at any time.

***Note:** Client eligibility can change monthly. Providers are responsible for verifying eligibility before providing supplies.*

The DOS is the date on which supplies are delivered to the client or shipped by a carrier to the client as evidenced by the dated tracking document attached to the invoice for that date. The provider must maintain the signed and dated records supporting documentation that an item was not billed before delivery. These records are subject to retrospective review.

***Note:** THSteps-eligible clients who qualify for medically necessary services beyond the limits of this home health benefit will receive those services through CCP.*

Refer to: [Home Health Services \(Title XIX\) DME/Medical Supplies Physician Order Form](#) on the TMHP website at www.tmhp.com.

[Home Health Services \(Title XIX\) DME/Medical Supplies Physician Order Form Instructions](#) on the TMHP website at www.tmhp.com.

Subsection 2.6, “Durable Medical Equipment (DME) Supplier (CCP)” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for specific information about certain DME and medical supplies.

Subsection 2.2.1.1, “Client Eligibility” in this handbook.

2.2.3.1 Supply Procedure Codes

When submitting supplies on the CMS-1500 claim form, itemize the supplies, including quantities, and also provide the Healthcare Common Procedure Coding System (HCPCS) national procedure codes.

Refer to: Subsection 6.3.3, “Procedure Coding” in Section 6, “Claims Filing” (*Vol. 1, General Information*) for more information about HCPCS procedure codes.

2.2.3.2 Prior Authorization

TMHP must prior authorize most medical supplies. They must be used for medical or therapeutic purposes, and supplied through an enrolled DMEH provider in compliance with the client’s POC.

Some medical supplies may be obtained without prior authorization; however, the provider must retain a copy of the completed POC or Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form in the client’s file. Unless otherwise noted in this handbook, a completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form for medical supplies not requiring prior authorization may be valid for a maximum of six months, unless the physician indicates the duration of need is less. If the physician indicates the duration of need is less than six months, then a new Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form is required at the end of the determined duration of need.

For a list of DME/medical supplies that do not require prior authorization, providers can refer to Subsection 2.2.25, “Procedure Codes That Do Not Require Prior Authorization” in this handbook.

Clients with ongoing needs may receive up to six months of prior authorizations for some expendable medical supplies under Home Health Services when requested on a Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form. Providers may deliver medical supplies as ordered on a Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form for up to six months from the date of the physician’s signature. In these instances, a review of the supplies requested by the physician familiar with the client’s condition, and a new Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form is required for each new prior authorization request. Requests for prior authorization can be made up to 60 days before the start of the new prior authorization period. Professional Home Health Services prior authorization requests require a review by the physician familiar with the client’s condition and a physician signature every 60 days when requested on a POC.

Note: *These records and claims must be retained for a minimum of five years from the DOS or until audit questions, appeals, hearings, investigations, or court cases are resolved. Use of these services is subject to retrospective review.*

2.2.3.3 Cancelling a Prior Authorization

The client has the right to choose his DME/medical supply provider and change providers. If the client changes providers, TMHP must receive a change of provider letter with a new Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form. The client must sign and date the letter, which must include the name of the previous provider and the effective

date for the change. The client is responsible for notifying the original provider of the change and the effective date. Prior authorization for the new provider can only be issued up to three business days before the date TMHP receives the change of provider letter and the new Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form.

2.2.4 Augmentative Communication Device (ACD) System

An ACD system, also known as an augmentative and alternative communication (AAC) device system, allows a client with an expressive speech language disorder to electronically represent vocabulary and express thoughts or ideas in order to meet the client's functional speech needs.

Digitized speech devices and synthesized speech devices are benefits of Texas Medicaid Title XIX Home Health Services.

A digitized speech device, sometimes referred to as a "whole message" speech output device, uses words or phrases that have been recorded by someone other than the ACD system user for playback upon command by the ACD system user.

Providers must use procedure codes E2500, E2502, E2504, and E2506 when billing for a digitized speech device.

A synthesized speech device uses technology that translates a user's input into device-generated speech using algorithms representing linguistic rules. Users of synthesized speech ACD systems are not limited to prerecorded messages, but can independently create messages as their communication needs dictate. Some synthesized speech devices require the user to make physical contact with a keyboard, touch screen, or other display containing letters.

Providers must use procedure code E2508 when billing for a synthesized speech device.

Other synthesized devices allow for multiple methods of message formulation and multiple methods of device access. Multiple methods of message formulation must include message selection by two or more of the following methods:

- Letters
- Words
- Pictures
- Symbols

Multiple methods of access must include the capability to access the device by direct physical contact with a keyboard or touch screen and one or more of the following indirect selection techniques:

- Joystick/switches
- Head mouse
- Optical head pointer
- Light pointer
- Infrared pointer
- Scanning device
- Morse code

Note: *ACD systems that do not meet the criteria through Title XIX Home Health Services may be considered for clients who are birth through 20 years of age under CCP.*

Providers must use procedure code E2510 when billing for other synthesized speech devices.

Items included in the reimbursement for an ACD system and not reimbursed separately include, but are not limited to, the following:

- ACD
- Basic, essential software (except for software purchased specifically to enable a client-owned computer or personal digital assistant [PDA] to function as an ACD system)
- Batteries
- Battery charger
- Power supplies
- Interface cables
- Interconnects
- Sensors
- Moisture guard
- Alternating current (A/C) or other adapters
- Adequate memory to allow for system expansion within a three-year timeframe
- Access device, when necessary
- Mounting device, when necessary
- All basic operational training necessary to instruct the client and family/caregivers in the use of the ACD system
- Manufacturer's warranty

2.2.4.1 ACD System Accessories

Accessories are a benefit of Texas Medicaid if the criteria for ACD system prior authorization are met and the medical necessity for each accessory is clearly documented in the speech language pathologist (SLP) evaluation.

All accessories necessary for proper use of an ACD system, including those necessary for the potential growth and expansion of the ACD system (such as a memory card), must be included in the initial prescription/Title XIX form. The following accessories for an ACD system may be covered:

- Access devices for an ACD system include, but are not limited to, devices that enable selection of letters, words, or symbols by direct or indirect selection techniques such as optical head pointers, joysticks, and ACD scanning devices.
- Gross motor access devices, such as switches and buttons, may be considered for clients with poor fine motor and head control.
- Fine motor, head control access devices, such as laser or infrared pointers, may be considered for clients with poor hand control and good head control.

Mounting systems are devices necessary to place the ACD system, switches and other access devices within the reach of the client. Mounting devices may be considered for reimbursement when used to attach an ACD system or access device to a wheelchair or table.

A request for prior authorization of a wheelchair mounting device must include the manufacturer name, model, and purchase date of the wheelchair. One additional mounting device, separate from the one included in the system, may be considered for prior authorization for the same client.

Providers must use procedure codes E2512 and E2599 when billing for ACD system accessories.

2.2.4.1.1 Carrying Case

Carrying cases may be considered for separate reimbursement with supporting documentation of medical necessity.

Providers must use procedure code E2599 and modifier U1 when billing for the carrying case. Carrying cases are limited to one every three years.

Carrying cases may be considered for prior authorization. The prior authorization request must include the make, model, and purchase date of the ACD system.

2.2.4.1.2 Nonwarranty Repairs

Nonwarranty repairs of an ACD system may be considered for prior authorization using procedure code V5336 with documentation from the manufacturer explaining why the repair is not covered by the warranty.

2.2.4.1.3 Trial Period

In order to ensure the client's needs are met in the most cost effective manner and to ascertain the most appropriate system and access device for the client, the ACD system is prior authorized for purchase only after the client has completed a three-month trial period that includes experience with the requested system.

The ACD system for the trial period may be obtained through the rental, the school setting, or another setting determined by the licensed SLP.

In the situation where an ACD system is not available for rental and the client has recent documented experience with the requested ACD system, purchase can be considered.

A trial period is not required when replacing an existing ACD system, unless the client's needs have changed and another ACD system or access device is being considered.

2.2.4.1.4 Rental

Prior authorization may be provided for rental during this trial period. All components necessary for use of the device, such as access devices, mounting devices, and lap trays, must be evaluated during this trial period.

2.2.4.1.5 Purchase

Purchase of an ACD system may be considered for prior authorization when all of the following ACD system criteria are met:

- The evaluation/re-evaluation includes documentation that the client has had sufficient experience with the requested ACD system through trial, rental, school, or another setting. When the SLP has confirmed the appropriateness of a specific device for the client, the trial/rental period may be cancelled.
- A Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form listing the prescribed ACD system, access device, and accessories (such as a mounting device) must be completed, signed by the physician, and dated.

ACD systems, equipment, and accessories that have been purchased are anticipated to last a minimum of three years.

2.2.4.1.6 Replacement

Prior authorization for replacement may be considered within three years of purchase when one of the following occurs:

- There has been a significant change in the client's condition such that the current device no longer meets his or her communication needs.

- The ACD system is no longer functional and either cannot be repaired or it is not cost effective to repair.
- Three years have passed and the equipment is no longer repairable.

Note: Replacements for clients who are birth through 20 years of age that do not meet the criteria above may be considered through CCP.

2.2.4.1.7 Software

Computer software that enables a client's computer or PDA to function as an ACD system may be covered as an ACD system. Providers must use procedure code E2511 when billing for a speech generating software. Requests for ACD software may be considered for prior authorization if the software is more cost effective than an ACD system.

If an ACD system is more cost effective than adapting the client's computer or PDA, an ACD system may be prior authorized instead of the ACD software.

Laptop or desktop computers, PDAs, or other devices that are not dedicated ACD systems are not a benefit of Texas Medicaid, because they do not meet the definition of DME.

2.2.4.2 Non-Covered ACD System Items

Noncovered items that are not necessary to operate the system and are unrelated to the ACD system or software components are not benefits of Texas Medicaid. These items include, but are not limited to:

- Printer
- Wireless Internet access devices

2.2.4.3 Prior Authorization

Prior authorization is required for ACD systems provided through Home Health Services. The prior authorization also includes all related accessories and supplies. The physician must provide information supporting the medical necessity of the equipment or supplies requested, including:

- Accurate diagnostic information pertaining to the underlying diagnosis or condition and any other medical diagnoses or conditions, including the client's overall physical and cognitive limitations.
- Diagnosis or condition causing the impairment of speech.

Prior authorization for an ACD system and accessories (rental or purchase) must be requested using the following information:

- Medical diagnosis and how it relates to the client's communication needs.
- Any significant medical information pertinent to ACD system use.
- Limitations of the client's current communication abilities, systems, and devices.
- Statement as to why the prescribed ACD system is the most effective, including a comparison of benefits using other alternatives.
- Complete description of the ACD system with all accessories, components, mounting devices, or modifications necessary for client use (must include manufacturer's name, model number, and retail price).
- Documentation that the client is mentally, emotionally, and physically capable of operating the device.
- An evaluation and assessment must be conducted by a licensed SLP in conjunction with other disciplines, such as physical or occupational therapies. The prescribing physician must base the prescription on the professional evaluation and assessment.

The prior authorization request must include the specifications for the ACD system, all component accessories necessary for the proper use of the ACD, and all necessary therapies or training. It is recommended that the preliminary evaluation for an ACD system include the involvement of an occupational therapist or physical therapist to address the client's seating/postural needs and the motor skills required to utilize the ACD system.

The prescribing physician familiar with the client must review the SLP evaluation of the client's cognitive and language abilities and base the prescription and treatment plan on the SLP's recommendations.

An evaluation and assessment by a licensed SLP must be signed and dated before the date on the physician's prescription or the Title XIX form and include the following information:

- Documentation of medical necessity for an ACD system, including a formal written evaluation performed by a licensed SLP.
- Medical status or condition and medical diagnoses underlying the client's expressive speech-language disorder that justifies the need for an ACD system.
- Current expressive speech-language disorder, including the type, severity, anticipated course, and present language skills.
- Description of the practical limitations of the client's current aided and unaided modes of communication.
- Other forms of therapy or intervention that have been considered and ruled out.
- Rationale for the recommended ACD system and each accessory, including a statement as to why the recommended device is the most appropriate and least costly alternative for the client and how the recommended system will benefit the client.
- Documentation that the client possesses the cognitive and physical abilities to use the recommended system.
- Comprehensive description of how the ACD system will be integrated into the client's everyday life, including home, school, or work.
- Treatment plan that includes training in the basic operation of the recommended ACD system necessary to ensure optimal use by the client (if appropriate, the client's caregiver) and a therapy schedule for the client to gain proficiency in using the ACD system.
- Description of the client's speech-language goals and how the recommended ACD system will assist the client in achieving these goals.
- Description of the anticipated changes, modifications, or upgrades with projected time frames of the ACD system necessary to meet the client's short- and long-term speech-language needs.
- Identification of the assistance or support needed by, and available to, the client to use and maintain the ACD system.
- Statement that the licensed SLP is financially independent of the ACD system manufacturer/vendor.
- Speech- and language- skills assessment that includes the prognosis for speech or written communication.
- Interactional/behavioral and social abilities.
- Capabilities, including intellectual, postural, sensory (visual and auditory), and physical status.
- Motivation to communicate.
- Residential, vocational, and educational setting.

- Alternative ACD system considered with comparison of capabilities.
- Ability to meet projected communication needs, growth potential, and length of time it will meet the client's needs.

2.2.5 Bath and Bathroom Equipment

Bath and bathroom equipment is DME that is included in a treatment protocol, serves as a therapeutic agent for life and health maintenance, and is required to treat an identified medical condition. Bath and bathroom equipment may be considered for reimbursement for those clients who have physical limitations that do not allow for bathing, showering, or bathroom use without assistive equipment.

Note: THSteps-eligible clients who qualify for medically necessary services beyond the limits of this Home Health Services benefit may be considered under CCP.

Bath seats are not considered for clients who are younger than one year of age or weighing less than 30 pounds.

Rental of equipment includes all necessary supplies, adjustments, repairs, and replacement parts.

2.2.5.1 Hand-Held Shower Wand

A hand-held shower wand with attachments may be considered for prior authorization only if the client currently owns or meets the criteria for a bath or shower chair, tub stool or bench, or tub transfer bench. Prior authorization of a hand-held shower wand includes all attachments and accessories. Providers must use procedure code E1399 when billing for a hand-held shower wand. Hand-held shower wands with attachments are limited to one every five years.

2.2.5.2 Bath Equipment

2.2.5.2.1 Bath or Shower Chairs, Tub Stool or Bench, Tub Transfer Bench

A bath or shower chair is a stationary or mobile seat with or without upper body or head support used to support a client who is unable to stand or sit independently in the shower or tub.

Bath/shower chairs are grouped into three levels of design to assist the client based on their physical condition and mobility status:

- Level 1 - standard bath or shower chair is defined as stationary equipment.
- Level 2 - intermediate bath or shower chair is defined as mobile equipment with or without a commode cut out.
- Level 3 - complex bath or shower chair is defined as custom equipment (either stationary or mobile) with or without a commode cut out.

A tub stool or bench is a stationary seat or bench used to support a client who is unable to stand or sit independently in the shower or tub.

A tub transfer bench is a stationary bench that sits in the tub and extends outside the tub. It is used to support a client who is unable to stand or sit independently in the shower or tub and allows the client to scoot or slide over the side of the tub.

Bath or shower chairs, tub stools or benches, and tub transfers are limited to one every five years.

A custom bath or shower chair may be considered for prior authorization only if the client does not also have any type of commode chair.

Level 1 Group

A Level 1 device may be considered if the client:

- Is either unable to stand independently or is unstable while standing, or

- Is unable to independently enter or exit the shower or tub due to limited functional use of the upper or lower extremities, and
- Maintains the ability to ambulate short distances (with or without assistive device), or
- Has a condition that is defined as a short-term disability without a concomitant long-term disability (including, but not limited to postoperative status).

Providers must use procedure code E0240 without a modifier when billing for Level 1 group bath or shower chairs.

Level 2 Group

A Level 2 device may be considered if the client:

- Has good upper body stability, and
- Has impaired functional ambulation, including, but not limited to, lower body paralysis, osteoarthritis, or
- Is nonambulatory.

The client must have a shower that is adapted for rolling equipment; ramps will not be prior authorized for access to showers.

Providers must use procedure code E0240 and modifier TF (Intermediate Level) when billing for Level 2 group bath or shower chairs.

Level 3 Group

A Level 3 device may be considered if the client requires:

- Trunk or head or neck support, or
- Positioning to accommodate conditions, including, but not limited to, spasticity, or frequent and uncontrolled seizures.

Providers must use procedure code E0240 and modifier TG (Complex/high Level) when billing for Level 3 group bath/shower chairs.

A bath or shower chair may be prior authorized for clients who meet the Level 1, 2, or 3 criteria. A Level 3 custom bath or shower chair may be prior authorized only if the client does not also have any type of commode chair. A Level 3 mobile bath or shower chair may be considered for clients who have a shower that is adapted for rolling equipment; ramps will not be prior authorized for access to showers.

A tub stool or bench may be prior authorized for clients who meet the Level 1 criteria. Providers must use procedure code E0245 when billing for a tub stool or bench.

A tub transfer bench may be considered for clients who meet the Level 1 or 2 criteria. Providers must use procedure code E0247 when billing for a tub transfer bench.

A heavy duty tub transfer bench may be considered for clients who meet the Level 1 or 2 criteria and who weigh more than 200 pounds. Providers must use procedure code E0248 when billing for a heavy duty tub transfer bench.

2.2.5.3 Bathroom Equipment

2.2.5.3.1 Non-fixed Toilet Rail, Bathtub Rail Attachment, and Raised Toilet Seat

Nonfixed toilet rails are limited to two every five years. A bathtub rail is limited to one every five years.

Raised toilet seats are limited to one every five years. Nonfixed toilet rails and bathtub rail attachments may be considered for prior authorization for a client who has decreased functional mobility and is unable to safely self-toilet or self-bathe without assistive equipment. Raised toilet seats do not require

prior authorization. Providers must use procedure code E0243 when billing for non-fixed toilet rails, procedure code E0244 when billing for raised toilet seats, and procedure code E0246 when billing for bathtub rails.

2.2.5.3.2 Toilet Seat Lifts

A toilet seat lift mechanism is designed for the top of the toilet to assist lifting the body from a sitting position to a standing position.

A toilet seat lift mechanism must be prior authorized. To qualify for prior authorization, clients must meet all the following criteria:

- The client must have severe arthritis of the hip or knee or have a severe neuromuscular disease.
- The toilet seat lift mechanism must be a part of the physician's course of treatment and be prescribed to correct or ameliorate the client's condition.
- Once standing, the client must have the ability to ambulate.
- The client must be completely incapable of standing up from a regular armchair or any chair in the client's home.

The client's difficulty or incapability of getting up from a chair is not sufficient justification for a toilet seat lift mechanism. Almost all clients who are capable of ambulating can get out of an ordinary chair if the seat height is appropriate and the chair has arms.

Prior authorization will be given for either mechanical or powered toilet assist devices, not for both. If a client already owns one or more mechanical toilet-assist devices, a powered toilet seat lift mechanism will not be prior authorized unless there has been a documented change in the client's condition such that the client can no longer use the mechanical equipment.

Toilet seat lift mechanisms are limited to those types that operate smoothly, can be controlled by the client, and effectively assist a client in standing up and sitting down without other assistance. A toilet seat lift operated by a spring release mechanism with a sudden, catapult-like motion that jolts the client from a seated to a standing position is not a benefit of Texas Medicaid.

Providers must use procedure code E0172 when billing for a toilet seat lift mechanism. A toilet seat lift mechanism is limited to one purchase every five years.

2.2.5.3.3 Commode Chairs and Foot Rests

Commode chairs, foot rests, and replacement commode pails or pans may be considered as benefits, depending on the client's level of need. The client must meet the criteria for the level of commode chair or foot rest requested.

A commode chair with or without a foot rest may be considered a benefit for the client who also has a stationary bath chair without a commode cutout.

Documentation must support medical necessity for a customized commode chair or the addition of attachments to a standard commode chair.

Level 1: Stationary Commode Chair

A Level 1 commode chair is defined as a stationary commode chair with fixed or removable attachments to support the arms.

A stationary commode chair with fixed or removable arms may be considered for prior authorization when the client has a medical condition that results in an inability to ambulate to the bathroom safely (with or without mobility aids).

Providers must use procedure code E0163 or E0165 when billing for a stationary and mobile commode chair.

Level 2: Mobile Commode Chair

A Level 2 commode chair is defined as a mobile commode chair with fixed or removable attachments to support the arms.

A mobile commode chair with fixed or removable arms may be considered for prior authorization when the following criteria are met:

- In addition to meeting the criteria for a Level 1 commode chair, the client must be on a bowel program and require a combination commode or bath chair for performing the bowel program and bathing after.
- A mobile commode chair will be considered for reimbursement with prior authorization only if the client does not also have any type of bath chair. If the client meets the criteria for a stationary bath chair, prior authorization of a stationary chair may be considered.

Level 3: Custom Commode Chair

A Level 3 commode chair is defined as a custom commode chair with all of the following characteristics:

- Is stationary or mobile
- Has fixed or removable attachments to support the arms, head, neck, or trunk.

A custom stationary or mobile commode chair with fixed or removable arms and head, neck, and/or trunk support attachments may be considered for prior authorization when the following criteria are met:

- In addition to meeting the criteria for a Level 1 or 2 commode chair, the client must have a medical condition that results in an inability to support their head, neck, or trunk without assistance.
- A mobile custom commode chair may be considered for reimbursement only if the client does not also have any type of bath chair.

Providers must use procedure code E0163 or E0165 with modifier TG when billing for a custom stationary or mobile commode chair.

Extra-wide and Heavy-Duty Commode Chair

An extra-wide, heavy-duty commode chair is defined as one with a width greater than or equal to 23 inches, and capable of supporting a client who weighs 300 pounds or more.

An extra-wide or heavy-duty commode chair may be considered for prior authorization when the client meets the criteria for a Level 1, 2, or 3 commode chair and weigh 300 pounds or more.

Providers must use procedure code E0168 and the appropriate modifiers when billing for an extra-wide or heavy-duty commode chair. Use modifier TF when billing for a mobile extra-wide, heavy-duty commode chair. Use modifier TG when billing for a custom extra-wide, heavy-duty commode chair.

Commode Chair With Integrated Seat Lift

A commode chair with integrated seat lift is designed to assist lifting the body from a sitting position to a standing position.

A commode chair with integrated seat lift mechanism for top of the commode must be prior authorized for clients who meet all the following criteria:

- The client must have severe arthritis of the hip or knee or have a severe neuromuscular disease.
- The client must be completely incapable of standing up from a regular toilet, commode, or any chair in their home.
- The commode chair with integrated seat lift must be a part of the physician's course of treatment and be prescribed to correct or ameliorate the client's condition.

- Once standing, the client must have the ability to ambulate independently for a short distance of no more than ten feet.

Note: *The fact that a client has difficulty or is even incapable of getting up from a chair, particularly a low chair, is not sufficient justification for a seat lift mechanism. Almost all clients who are capable of ambulating can get out of an ordinary chair if the seat height is appropriate and the chair has arms.*

Providers must use procedure code E0170 or E0171 when billing for a commode chair with integrated seat lift. The purchase of a commode chair with integrated seat lift is limited to one every five years.

Replacement Commode Pail or Pan

Replacement commode pails or pans are a benefit through Title XIX Home Health Services and are limited to one per year. Additional quantities may be considered for prior authorization with documentation of medical necessity.

Providers must use procedure code E0167 when billing for a commode pail or pan.

Foot Rest

A foot rest is used to support feet during use of the commode chair.

A foot rest may be considered for prior authorization if the client meets the criteria for a Level 1, 2, or 3 commode chair and the foot rest is necessary to support contractures of the lower extremities of clients who are paraplegic or quadriplegic.

Providers must use procedure code E0175 when billing for a foot rest.

2.2.5.3.4 Portable Sitz Bath

Portable sitz baths that fit over commode seats are limited to two per year for clients requiring any of the following:

- Cleaning, irrigation, or pain relief of a perianal wound.
- Relief of pain associated with the pelvic area (hemorrhoids, bladder, vaginal infections, prostate infections, herpes, testicle disorders).
- Muscle toning for bowel and bladder incontinence.

Providers must use procedure codes E0160 or E0161 when billing for portable sitz baths.

2.2.5.3.5 Bath Lifts

The purchase of a bath lift is limited to one every five years. The rental of a bath lift is limited to one per month.

The two types of bath lifts that are considered for reimbursement include:

- An outside the tub bath lift which is a portable transfer system used to move a nonambulatory client a short distance from bed or chair to bath and is designed to accommodate the smaller space. This type of lift is either hydraulic or electric and consists of a base with wheels or casters and a sling which can transfer the client in and out of the bath.
- An inside the tub bath lift is a portable transfer system used to lower and raise a nonambulatory client into and out of the bath tub. This type of lift is either hydraulic or electric and consists of a base which adheres to the tub surface using suction cups and a seat that will lower and raise the client into and out of the tub.

Providers must use procedure code E0625 with the appropriate modifier (U1, U2, or U3) if necessary when billing for a bath lift.

The bath lift must be free standing, it cannot be attached to the floor, walls, or ceiling. Home adaptation for use of medical equipment is not a benefit of Home Health Services.

A hydraulic bath lift is for a client who is unable to assist in their own transfers and is operated by the weight or pressure of a liquid.

An electric bath lift is operated by electricity and may be considered when a hydraulic lift will not meet the client's needs.

A bath lift is not a benefit for the convenience of a caregiver.

There are four levels of bath lifts:

- Level 1 - an outside the tub bath lift (hydraulic or electric) and must accommodate a client weighing up to 300 pounds. Providers must use procedure code E0625 when billing for the purchase of a Level 1 bath lift.
- Level 2 - an in-tub bath lift (hydraulic or electric) and must accommodate a client weighing up to 300 pounds. Providers must use procedure code E0625 and the U1 modifier when billing for the purchase of a Level 2 bath lift.
- Level 3 - a bariatric lift (hydraulic or electric, out of tub type) designed to lift a client weighing greater than 300 pounds. Providers must use procedure code E0625 and the U2 modifier when billing for the purchase of a Level 3 bath lift.
- Level 4 - a bariatric lift (hydraulic or electric, in tub type) designed to lift a client weighing greater than 300 pounds. Providers must use procedure code E0625 and the U3 modifier when billing for the purchase of a Level 4 bath lift.

A bath lift may be considered for prior authorization if the client:

- Has an inability to transfer to the bathtub or shower independently using assistive devices (including, but not limited to, a cane, walker, bathtub rails).
- Requires maximum assistance by the caregiver to transfer to the bathtub or shower.
- Has bathroom and tub or shower that meets the manufacturer's recommended depth, width, and height for safe bath lift installation and operation.

Providers must use procedure code E0621 when billing for a lift sling. The purchase of a lift sling is limited to one every five years.

The following are payable procedure codes for bath and bathroom equipment:

Procedure Code	Maximum Limitation
E0160	2 per year
E0161	2 per year
E0163	1 every 5 years
E0165	1 every 5 years
E0167	1 per year
E0168	1 every 5 years
E0170	1 every 5 years
E0171	1 every 5 years
E0172	1 every 5 years
E0175	1 every 5 years
E0240	1 every 5 years
E0243	2 every 5 years
E0244	1 every 5 years
E0245	1 every 5 years

Procedure Code	Maximum Limitation
E0246	1 every 5 years
E0247	1 every 5 years
E0248	1 every 5 years
E0621	1 per 5 years
E0625	1 purchase every 5 years; 1-month rental
E0630	1 purchase every 5 years; 1-month rental
E1399	1 every 5 years

2.2.5.4 Prior Authorization

Except as otherwise indicated in this section, prior authorization is required for all bath and bathroom equipment and related supplies, including any accessories, modifications, adjustments, replacements and repairs to the equipment. The bath and bathroom equipment must be able to accommodate a 20 percent change in the client's height or weight.

Bathroom and toilet lift rentals may be prior authorized during the period of repair up to a maximum of four months per lifetime per client.

Prior authorization will not be considered for modifications, adjustments, or repairs to bath or bathroom equipment delivered to a client's home and then found to be inappropriate for the client's condition within the first six months after delivery. This applies unless there is a significant change in the client's condition that is documented by a physician familiar with the client.

2.2.5.5 Documentation Requirements

2.2.5.5.1 Bath and Bathroom Equipment

To request prior authorization for all bath or bathroom equipment, the following documentation must be provided:

- Accurate diagnostic information pertaining to the underlying diagnosis or condition, including the client's overall health status, any other medical needs, developmental level, and functional mobility skills and why regular bath or bathroom equipment will not meet the client's needs.
- The age, height, and weight of the client.
- Assessment of the client's home to ensure the requested equipment can be safely accommodated.
- Anticipated changes in the client's needs, including anticipated modifications or accessory needs and the growth potential of any custom shower and bath equipment.

2.2.5.5.2 Toilet Seat Lifts

In addition to the above documentation, the submitted documentation for a toilet seat lift must include an assessment completed by a physician, physical therapist, or occupational therapist that includes all of the following:

- A description of the client's current level of function without the device
- An explanation why a nonmechanical toilet elevation device, such as toilet rails or elevated toilet seat, will not meet the client's needs
- Documentation that identifies how the toilet seat lift mechanism will improve the client's function
- A list of the mobility related activities of daily living (MRADLs) the client will be able to perform with the toilet seat lift mechanism that the client is unable to perform without the toilet seat lift mechanism and how the device will increase the client's independence
- The client's goals for use of the toilet seat lift mechanism

Supporting documentation must be kept in the client's record that all appropriate therapeutic modalities (e.g., medication or physical therapy) have been tried and that they failed to enable the client to transfer from a chair to a standing position.

2.2.6 Blood Pressure Devices

Blood pressure devices are a benefit of Home Health Services when:

- The devices are medically necessary and appropriate.
- The devices are prescribed by a physician.

A manual blood pressure device requires manual cuff inflation with real-time visualization of the results displayed on the manometer and does not require prior authorization for purchase when provided for one of the diagnosis codes listed in the table below. Providers must use procedure code A4660 when billing for a manual blood pressure device.

An automated blood pressure device inflates the cuff manually or automatically, displays the blood pressure results on a small screen, and does not require prior authorization for purchase when provided for one of the diagnosis codes listed in the table below. Providers must use procedure code A4670 when billing for an automated blood pressure device.

Repair of equipment may be considered with documentation of why the equipment needs repair. Providers must use procedure code A4660 when billing for the replacement of other components or repair of equipment.

Finger cuff automated blood pressure devices and ambulatory blood pressure devices for diagnostic purposes are not a benefit of Texas Medicaid.

If the client is not eligible for home health services, blood pressure devices may be provided under CCP for clients who are 20 years of age and younger.

2.2.6.1 Prior Authorization

Procedure codes A4660 and A4670 do not require prior authorization if they are billed with one of the following diagnosis codes:

Diagnosis Codes									
4010	4011	4019	40200	40201	40210	40211	40290	40291	40300
40301	40310	40311	40390	40391	40400	40401	40402	40403	40410
40411	40412	40413	40490	40491	40492	40493	40501	40509	40511
40519	40591	40599	4150	41511	41512	41519	4160	4161	4162
4168	4169	4240	4241	4242	4243	42511	42518	4252	4253
4254	4260	42610	42611	42612	42613	4262	4263	4264	42650
42651	42652	42653	42654	4266	4267	42681	42682	42689	4269
4270	4271	4272	42731	42732	42781	4280	4281	42820	42821
42822	42823	42830	42831	42832	42833	42840	42841	42842	42843
4289	4580	4581	45829	4588	4589	5830	5831	5832	5834
5836	5837	58381	58389	5839	5845	5846	5847	5848	5849
5851	5852	5853	5854	5855	5856	5859	5880	58889	591
59371	59372	59373	7450	74510	74511	74512	74519	7452	7453
7454	7455	74560	74561	74569	7457				

Manual and automated blood pressure devices should last at least one year and may be considered for replacement after one year has passed. If it is medically necessary to replace nonfunctional and irreparable equipment before one year has passed, providers can submit prior authorization requests with documentation of medical necessity that explains the need for the replacement.

Prior authorization is required in the following situations:

- Another blood pressure device is medically necessary within the same year. Replacement of equipment within the same year as the purchase requires prior authorization. If equipment must be replaced before the end of the anticipated lifespan, the provider must submit a copy of the police or fire report, when appropriate, and the measures that will be taken to prevent reoccurrence.
- The diagnosis code is not in the table above. If the diagnosis code is not one of those listed in the table above, providers must submit a request for the prior authorization of the initial or replacement device and must include all of the documentation necessary to support the medical necessity of the blood pressure device.

2.2.7 Bone Growth Stimulators

Internal and external bone growth (osteogenic) stimulators are a benefit of Texas Medicaid. Bone growth stimulators are a benefit for skeletally-mature individuals only.

Electromagnetic bone growth stimulators promote healthy bone growth and repair by low intensity electrical stimulation. Electrical stimulation is provided by implanting low-voltage electrodes within the tissue surrounding the bone (internal) or by external placement of a device that transmits low-voltage currents through the soft tissue to the bone (external).

Ultrasonic bone growth stimulators promote healthy bone growth and repair through low-intensity, pulsed ultrasound waves.

***Note:** Bone growth stimulators that do not meet criteria for coverage through Title XIX Home Health Services may be considered through Comprehensive Care Program (CCP) for clients who are birth through 20 years of age.*

A noninvasive electrical bone growth stimulator (procedure codes E0747 and E0748) and noninvasive ultrasound bone growth stimulator (procedure code E0760) are benefits of Texas Medicaid for home health DME and medical supplier DME providers when provided in the home setting. An invasive electrical bone growth stimulator (procedure code E0749) is a benefit of Texas Medicaid for freestanding and hospital-based ambulatory surgical centers when provided in the outpatient setting.

Electrical and ultrasonic bone growth stimulator devices for the treatment of orthopedic and neurosurgical conditions are a benefit for Texas Medicaid clients when the client experiences nonunion of a fracture, requires an adjunct to spinal fusion surgery, or experiences congenital pseudarthrosis.

Nonunion is defined as a fractured bone that fails to heal completely. Diagnosis of nonunion is established when a minimum of six months has passed since the injury and the fracture site shows no progressive signs of healing for a minimum of three months and is not complicated by a synovial pseudoarthrosis. Serial radiographs must confirm that fracture healing has ceased for three months or longer before the client begins treatment with the bone growth stimulator.

2.2.7.1 Professional Services

Procedure codes 20974, 20975, and 20979 are a benefit of Texas Medicaid and limited to one per six months. During the six-month limitation period, a subsequent fracture that meets the above criteria for a bone growth stimulator may be reimbursed after the submission of an appeal with documentation of medical necessity that demonstrates the criteria have been met.

2.2.7.2 Prior Authorization Criteria and Documentation Requirements for Bone Growth Stimulators

Procedure codes E0747, E0748, E0749, and E0760 require prior authorization. Additional bone growth stimulators may be considered for prior authorization with documentation that supports treatment of a different fracture.

A completed Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form prescribing the DME or medical supplies must be signed and dated by the prescribing physician familiar with the client prior to requesting authorization. All signatures must be current, unaltered, original, and handwritten. Computerized or stamped signatures will not be accepted. The completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form must be maintained by the requesting provider and the prescribing physician. The original signature copy must be kept in the physician's medical record for the client.

To avoid unnecessary authorization denials, the physician must provide correct and complete information, including documentation for medical necessity of the equipment or supplies requested. The requesting provider may be asked for additional information to clarify or complete a request for the bone growth stimulator.

Documentation that supports medical necessity for a bone growth stimulator must be maintained by the ordering physician and requesting provider in the client's medical record and is subject to retrospective review.

2.2.7.2.1 Documentation for Noninvasive Electrical Bone Growth Stimulator

Documentation of one of the following is required for prior authorization of the external, electromagnetic bone stimulator (procedure code E0747):

- Nonunions, failed fusions, and congenital pseudarthrosis where there is no evidence of progression of healing for three or more months despite appropriate fracture care.
- Delayed unions of fractures of failed arthrodesis at high risk sites (e.g., open or segmental tibial fractures, carpal navicular fractures).

Documentation must also indicate all of the following:

- Serial radiographs have confirmed that no progressive signs of healing have occurred.
- The fractured gap is 1 cm or less.
- The individual can be adequately immobilized and is likely to comply with non-weight-bearing restrictions.

Documentation of one of the following is required for prior authorization of the external, electromagnetic bone stimulator for spinal application (procedure code E0748):

- One or more failed fusions.
- Grade II or worse spondylolisthesis.
- A multiple-level fusion with extensive bone grafting is required.
- Other risk factors for fusion failure are present, including gross obesity, degenerative osteoarthritis, severe spondylolisthesis, current smoking, previous fusion surgery, previous disc surgery, or gross instability.

2.2.7.2.2 Documentation for Invasive Electrical Bone Growth Stimulators

Documentation of one of the following is required for prior authorization of the surgically implanted bone growth stimulator (procedure code E0749):

- Nonunion of long bone fractures (i.e., clavicle, humerus, radius, ulna, femur, tibia, fibula, and metacarpal, metatarsal, carpal, and tarsal bones). Nonunion of long bone fractures is considered to exist only when serial radiographs have confirmed that fracture healing has ceased for three or more months prior to starting treatment with the bone growth stimulator. Serial radiographs must include a minimum of two sets of radiographs separated by a minimum of 90 days. Each set of radiographs must include multiple views of the fracture site.
- Failed fusion of a joint other than the spine when a minimum of three months has elapsed since the joint fusion was performed.
- Congenital pseudoarthrosis.
- An adjunct to spinal fusion surgery for patients at high risk for pseudoarthrosis due to previously failed spinal fusion at the same site.
- An adjunct to multiple-level fusion, which involves three or more vertebrae (e.g., L3-L5, L4-S1, etc).

2.2.7.2.3 Documentation for Ultrasound Bone Growth Stimulator

Documentation of the following is required for prior authorization of the external, low-intensity ultrasound bone growth stimulator device (procedure code E0760):

- Nonunion of a fracture, other than the skull or vertebrae, in a skeletally mature person, which is documented by a minimum of two sets of radiographs that were:
 - Obtained prior to starting treatment with the bone growth stimulator.
 - Separated by a minimum of 90 days.
 - Taken with multiple views of the fracture site.
 - Accompanied by a written interpretation by a physician who states that there has been no clinically significant evidence of fracture healing between the two set of radiographs.
- Evidence of all of the following:
 - The fracture is not tumor-related.
 - The fracture is not fresh (less than seven days), closed or grade I open, tibial diaphyseal fractures, or closed fractures of the distal radius (Colles fracture).

2.2.7.3 Claims Reimbursement for Professional Services

Professional claims that are submitted for bone growth stimulation (procedure codes 20974, 20975, and 20979) may be reimbursed if the claim includes documentation of one of the following:

- Documentation of medical necessity as outlined above in subsection 2.2.7.2, “Prior Authorization Criteria and Documentation Requirements for Bone Growth Stimulators”
- The corresponding bone growth stimulator device was submitted within 95 days of the date the bone growth stimulation procedure was performed.

The appropriate evaluation and management (E/M) procedure code must be billed for monitoring the effectiveness of bone growth stimulation treatment.

2.2.8 Breast Pumps

A manual or non hospital-grade electric breast pump may be considered for purchase only with the appropriate documentation supporting medical necessity. The purchase of a breast pump is limited to one every three years. Providers must use procedure code E0602 or E0603 when billing for the purchase

of a manual or non hospital-grade electric breast pump. A hospital-grade breast pump (procedure code E0604) may be considered for rental, not purchase. Rental of a hospital-grade breast pump is not time-limited. If more than one type of breast pump is billed on the same day by the same provider, only one will be reimbursed.

The following procedure codes for replacement parts are benefits of Texas Medicaid: A4281, A4282, A4283, A4284, A4285, and A4286.

Breast pumps are also available through the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC).

2.2.8.1 Prior Authorization

Electric breast pumps, including non-hospital-grade and hospital grade, and replacement parts require prior authorization. Manual breast pumps do not require prior authorization. The replacement parts may be reimbursed if the client already owns a breast pump device (procedure code E0602 or E0603). The prior authorization request must include documentation of a client-owned device. Additional documentation such as the purchase date, serial number, and purchasing entity of the device may be required. Replacement of the breast pump will be considered when loss or irreparable damage has occurred, with a copy of the police or fire report when appropriate, and with the measures to be taken to prevent reoccurrence. Replacement will not be authorized in situations where the equipment has been abused or neglected by the client, the client's family, or the caregiver.

2.2.9 Cochlear Implants

The following cochlear implant procedure codes may be reimbursed in the home setting to home health DME and medical supplier (DME) providers: L8499, L8615, L8616, L8617, L8618, L8619, L8623, and L8624.

Refer to: Subsection 9.2.23, "Cochlear Implants" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information about cochlear implant services.

2.2.10 Continuous Passive Motion (CPM) Device

A CPM device is reimbursed on a daily basis and is limited to once per day. Reimbursement includes delivery, set-up and all supplies. Providers must use procedure code E0935 when billing for a CPM machine.

Note: THSteps-eligible clients who qualify for medically necessary services beyond the limits of this Home Health Services benefit may be considered under CCP.

2.2.10.1 Prior Authorization

A CPM device may be considered for prior authorization through Home Health Services. Reimbursement for a CPM device is considered after joint surgery, such as knee replacement, when prescribed by a physician and submitted with clinical documentation of medical necessity and appropriateness.

2.2.11 Diabetic Equipment and Supplies

Diabetic equipment and supplies are a benefit through Title XIX Home Health Services and do not require prior authorization unless otherwise specified.

Diabetic equipment and supplies may be obtained through one of the following methods:

- A Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form prescribing the DME or medical supplies. The Title XIX Form must be signed and dated by the prescribing physician who is familiar with the client prior to supplying any medical equipment or supplies. All signatures and dates must be current, unaltered, original, and handwritten. Computerized or stamped signatures and dates will not be accepted.

- A verbal or a detailed written order provided by a physician, physician assistant (PA), nurse practitioner (NP), clinical nurse specialist (CNS), or a certified nurse midwife (CNM).

2.2.11.1 Obtaining Equipment and Supplies Through a Title XIX Form

The completed Title XIX Form must be maintained by the dispensing provider and the prescribing physician in the client's medical record. The physician must maintain the original signed and dated copy of the Title XIX Form. The completed Title XIX Form is valid for a period up to six months from the physician's signature date.

2.2.11.2 Obtaining Equipment and Supplies Through a Verbal or Detailed Written Order

If the dispensing provider does not have a detailed written order then a verbal order is required to be on file until the written order is received from the prescribing provider and before providing diabetic equipment and supplies. The prescribing provider's order may be a written, fax, electronic, or verbal order and must include:

- A description of the item(s).
- The client's name.
- The name of the physician or authorized prescribing provider.
- The date of the order.

A detailed written order must be received by the DME supplier within 90 days from the date of the prescribing provider's signature. The detailed written order for diabetic equipment and supplies is valid for six months from the date of the order or the date of the prescribing provider's signature, whichever is earlier, for initial orders, and from the start date of renewal orders. In the absence of a start date, then the authorized prescribing signature date will be the beginning date of service.

A completed, detailed written order must be signed and dated by the authorized prescribing provider. The prescribing provider is required to retain a copy of the signed and dated detailed written order in the client's medical record. The DME provider must retain the original, faxed, photocopied, or electronic, signed and dated detailed written order in the client's medical record.

A completed detailed written order must contain all the following components:

- The client's name
- The date of the verbal order if different from the date the authorized prescribing provider signed the written order
- Description of item(s) to be provided
- Quantity to dispense (quantity required per day or month)
- Diagnosis code or description supporting the medical necessity

Before submitting a claim to Texas Medicaid, DME providers must have on file a detailed written order with the required information. No other documentation is required.

Prior Authorization

Prior authorization, when necessary, may be considered with documentation of medical necessity, which must include one of the following:

- A completed Title XIX Form that has been signed and dated by the physician who is familiar with the client
- Or all the following:
 - A completed and signed detailed written order.

- A Title XIX Form with section A completed.

2.2.11.3 Glucose Testing Equipment and Other Supplies

The prescribing provider must indicate on a completed, signed and dated Title XIX Form, or a signed and dated detailed written order how many times a day the client is required to test blood glucose or ketone levels when applicable (not all supplies are related to testing glucose or urine, e.g., batteries).

Glucose tablets or gel (procedure code A9150) may be considered with prior authorization when provided to a client with a diagnosis from the diagnosis code table below. Procedure code A9150 is limited to one per six months.

The procedure codes for the diabetic supplies listed in the following table do not require prior authorization, up to the quantities listed in the table, when provided to a client with a diagnosis from the diagnosis code table below. These limitations are not dependent on the client's use of insulin:

Procedure Code	Limitation
A4233	1 per 6 months
A4234	1 per 6 months
A4235	1 per 6 months
A4236	1 per 6 months
A4252	10 strips per month
A4256	2 per year
A4258	2 per year
A9275	2 per month* *Combined total with code A4253

Insulin-Dependent Clients

The following procedure codes for diabetic supplies do not require prior authorization up to the quantities listed when the supplies are provided to an insulin-dependent client with a valid diagnosis. If the client is insulin-dependent, providers must submit claims for these procedure codes with modifier U9:

Procedure Code	Limitation
A4253*	2 boxes per month
A4259	1 box per month
A9275*	2 per month
*A client may receive a combined total of two per calendar month of procedure codes A4253 and A9275, either two or one procedure code or one of each procedure code	

Non-Insulin-Dependent Clients

The following procedure codes for diabetic supplies do not require prior authorization up to the quantities listed when they are provided to a non-insulin-dependent client with a valid diagnosis. If the client is not insulin-dependent, providers must submit claims for these procedure codes with no modifier:

Procedure Code	Limitation
A4253*	1 box per month
A4259	1 box every 2 months
A9275*	1 per month
*A client may receive only one per calendar month of either procedure code A4253 or A9275.	

The following diagnosis codes apply to the tables listed above.

Diagnosis Codes									
24900	24901	24910	24911	24920	24921	24930	24931	24940	24941
24950	24951	24960	24961	24970	24971	24980	24981	24990	24991
25000	25001	25002	25003	25010	25011	25012	25013	25020	25021
25022	25023	25030	25031	25032	25033	25040	25041	25042	25043
25050	25051	25052	25053	25060	25061	25062	25063	25070	25071
25072	25073	25080	25081	25082	25083	25090	25091	25092	25093
2511	2512	2711	2777	27785	5642	64800	64801	64802	64803
64804	64880	64881	64882	64883	64884	7751	79029	7915	

Note: THSteps-eligible clients who qualify for medically necessary services beyond the limits of this home health benefit will receive those services through CCP.

Alcohol wipes (procedure code A4245) and urine test or reagent strips or tablets (procedure code A4250) are a benefit of Texas Medicaid when they are necessary for the treatment of some diabetic conditions or other conditions and therefore are not limited to the diagnoses listed in the diagnosis code table above.

Procedure code A4245 is limited to four boxes per month and procedure code A4250 is limited to one box per six months. Prior authorization is not required for these procedure codes up to the quantities listed.

The quantity of glucose testing supplies billed for a one-month supply should relate to the number of tests ordered per day by the prescribing provider.

Glucose testing supplies may be reimbursed for the quantities prescribed or the quantity prior authorized.

Blood glucose test or reagent strips (procedure code A4253) and home glucose disposable monitors with test strips (procedure code A9275) are limited to a combined total of two per month.

2.2.11.3.1 Prior Authorization

Glucose tablets or gel (procedure code A9150) requires prior authorization with documentation supporting medical necessity.

Glucose testing supplies for quantities beyond the limits listed in the procedure code table above or for diagnoses other than those listed in the diagnosis code table above in subsection 2.2.11.3, "Glucose Testing Equipment and Other Supplies" in this handbook may be considered for prior authorization with documentation of medical necessity. Quantities will be prior authorized based on the documentation of medical necessity related to the number of tests ordered per day by the physician.

2.2.11.4 Blood Glucose Monitors

Blood glucose monitors with integrated voice synthesizers (procedure code E2100) and blood glucose monitors with integrated lancing blood sample (procedure code E2101) may be considered for prior authorization with documentation of medical necessity. Glucose monitors that have been purchased are anticipated to last a minimum of three years and may be considered for replacement when three years have passed or the equipment is no longer repairable.

Standard home glucose monitors (procedure code E0607) are not a benefit of Texas Medicaid.

Invasive continuous glucose monitoring (CGM) is used for diagnostic purposes to assist the clinician in establishing or modifying the client's treatment plan. A CGM device is worn up to 72 hours for the diagnostic purpose of collecting continuous blood sugar readings. These are later analyzed by the clinician.

Refer to: Subsection 9.2.24, "Continuous Glucose Monitoring (CGM)" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (Vol. 2, Provider Handbooks) for additional information.

2.2.11.4.1 Prior Authorization

Blood glucose monitors with special features (procedure code E2100 or E2101) may be considered for prior authorization with documentation supporting medical necessity for the special feature requested.

Purchase of a blood glucose monitor with integrated voice synthesizer (procedure code E2100) may be considered for prior authorization with documentation that includes a diagnosis of diabetes and significant visual impairment.

Purchase of a blood glucose monitor with integrated lancing and blood sample (procedure code E2101) may be considered for prior authorization with documentation that includes a diagnosis of diabetes and significant manual dexterity impairment related but not limited to neuropathy, seizure activity, cerebral palsy, or Parkinson's disease.

The invasive CGM device will not be prior authorized as it is considered part of the physician interpretation and report for CGM.

2.2.11.5 External Insulin Pump and Supplies

An external insulin infusion pump is a programmable, battery-powered mechanical syringe or reservoir device controlled by a microcomputer to provide a basal continuous subcutaneous insulin infusion (CSII) and release a "bolus" dose at meals and at programmed intervals. The pump is connected to an infusion set with an attached small needle or cannula that is inserted into the subcutaneous tissue. The purpose of the insulin pump is to provide an accurate, continuous, controlled delivery of insulin which can be regulated by the user to achieve intensive glucose control and prevent the metabolic complications of hypoglycemia, hyperglycemia and diabetic ketoacidosis. The typical external insulin pump capacity is two to three days of insulin.

Note: *External insulin pumps that do not require tubing may be considered for clients who are birth through 20 years of age through CCP.*

An external insulin pump must be ordered by, and the client's follow-up care must be managed by, a prescribing provider with experience managing clients with insulin infusion pumps and who is knowledgeable in the use of insulin infusion pumps.

The external insulin pump (procedure code E0784) may be considered for prior authorization with documentation of medical necessity. Procedure code E0784 is limited to one purchase every three years, and one rental per month. External insulin pumps that have been purchased are anticipated to last a minimum of three years and may be considered for replacement when three years have passed or the equipment is no longer repairable.

The following procedure codes for external insulin pump supplies are a benefit through Title XIX Home Health Services and do not require prior authorization up the maximum quantities allowed. Additional quantities may be considered with documentation of medical necessity and prior authorization.

Procedure Code	Limitation
A4230	15 per month
A4231	15 per month
A4232	10 per month

Procedure Code	Limitation
A4601	1 per 6 months
A4602	1 per 6 months
A6257	15 per month
A6258	15 per month
A6259	15 per month
K0601	4 per 2 months
K0602	4 per 2 months
K0603	4 per 2 months
K0604	1 per 6 months
K0605	1 per 6 months

Providers must bill replacement batteries (procedure codes K0601 through K0605) with modifier U1.

When there is not an appropriate procedure code for supplies providers may request prior authorization using procedure code A9900.

The external insulin pump supplies (including batteries) are not included in the external insulin pump rental. Routine maintenance of rental equipment is the provider's responsibility.

Infusion sets for the external insulin pump (procedure codes A4230 or A4231) are limited to clients with a previously billed external insulin pump device or supply. Infusion sets for clients who did not receive the external insulin pump through Texas Medicaid are considered for reimbursement on appeal with a physician's statement documenting medical necessity.

An internal insulin pump will not be prior authorized as it is considered part of the surgery to place the pump.

2.2.11.5.1 Prior Authorization

Prior authorization is required for an external insulin pump (procedure code E0784) with carrying cases.

Rental of External Insulin Pump

An external insulin pump may be considered for prior authorization of rental with submission of clinical documentation indicating one of the following:

- A client who has a diagnosis of type 1 or 2 diabetes must meet at least two of the following criteria while on multiple daily injections of insulin:
 - Elevated glycosylated hemoglobin level (HbA1c) > 7.0 percent
 - History of dawn phenomenon with fasting blood sugars frequently exceeding 200 mg/dl
 - History of severe glycemic excursions with wide fluctuations in blood glucose
 - History of recurring hypoglycemia (less than 60 mg/dL) with or without hypoglycemic unawareness
 - Anticipation of pregnancy within three months
- A client with a diagnosis of gestational diabetes must meet at least one of the following criteria:
 - Erratic blood sugars in spite of maximal compliance and split dosing
 - Other evidence that adequate control is not being achieved by current methods

In addition to the clinical documentation the provider must submit the External Insulin Pump form indicating:

- The client or caregiver possess the following competencies:
 - The cognitive and physical abilities to use the recommended insulin pump treatment regimen
 - An understanding of cause and effect
 - The willingness to support the use of the external insulin pump
- The prescribing provider must attest that:
 - A training/education plan will be completed prior to initiation of pump therapy.
 - The client or caregiver will be given face-to-face education and instruction and will be able to demonstrate proficiency in integrating insulin pump therapy with their current treatment regimen for ambient glucose control.

Purchase of External Insulin Pump

An external insulin pump may be considered for prior authorization of purchase after it has been rented for a three-month trial and all of the following documentation is provided:

- The training/education plan has been completed
- The pump is the appropriate equipment for the specific client
- The client is compliant with the use of the pump

2.2.11.6 Insulin and Insulin Syringes

Insulin and insulin syringes (0.5 and 1.0 cc sizes only) that are prescribed to fee-for-service clients are reimbursed through the Medicaid Vendor Drug Program and are not covered under Title XIX Home Health Services. The Medicaid Vendor Drug Program (VDP) only enrolls pharmacies.

Refer to: “Appendix B: Vendor Drug Program” (*Vol. 1, General Information*) for more information about VDP.

2.2.12 Hospital Beds and Equipment

A hospital bed and related equipment are considered for reimbursement for the diagnosis or treatment of illness or injury or to improve the functioning of a malformed body member. A hospital bed is not one that is typically sold as home furniture.

The following items are a benefit of Home Health Services with prior authorization:

- Hospital bed
- Air-fluidized bed
- Pressure pads or a nonpowered pressure-reducing mattress overlay
- Nonpowered pressure-reducing mattress
- Powered pressure-reducing mattress overlay system
- Powered pressure-reducing mattress
- Advanced nonpowered pressure-reducing mattress overlay
- Powered pressure-reducing mattress overlay
- Advanced nonpowered pressure-reducing mattress
- Sheepskin and lamb’s wool pads

- Decubitus care accessories

Note: For clients who are 20 years of age and younger and do not meet criteria through Title XIX Home Health Services, hospital beds and equipment may be considered through CCP.

Side rails or mattresses may be considered for replacement only and may be considered if it is a client-owned hospital bed and the client's condition requires a replacement of an innerspring mattress or side rails.

2.2.12.1 Hospital Beds

A hospital bed is defined as a medical device with all of the following features:

- An articulating frame that allows adjustment of the head and foot of the bed
- A headboard
- A foot board
- A mattress
- Side rails of any type (A side rail is defined as a hinged or removable rail, board, or panel of any height.)

Note: Without all the components listed above, Texas Medicaid will not consider a request for any hospital bed.

2.2.12.2 Prior Authorization

Hospital beds may be considered for prior authorization for clients who cannot safely utilize a regular bed.

Fixed-Height Hospital Bed

A fixed-height bed (procedure code E0250), which allows for manual adjustment to the head and leg elevation but not height, may be considered for prior authorization if at least one of the following criteria exists:

- The client's medical condition requires positioning of the body in ways that are not feasible in an ordinary bed.
- The client's medical condition requires special positioning to alleviate pain.
- It is necessary to elevate the head of the bed 30 or more degrees most of the time due to, but not limited to, congestive heart failure, chronic pulmonary disease, or problems with aspiration, and alternative measures such as wedges or pillows, have been attempted but have failed to manage the client's medical condition.

Note: Texas Medicaid defines a failed measure as having no clinically significant improvement after being introduced.

- The client requires traction equipment that can only be attached to a hospital bed.

Variable-Height Hospital Bed

A variable-height hospital bed (procedure E0255), which allows manual adjustments to height as well as to head and leg elevations, may be considered for prior authorization if the client meets the criteria for a fixed -height hospital bed and requires a bed height that is different from a fixed-height hospital bed to permit transfers in and out of the bed to a chair, wheelchair, or to a standing position. Medical conditions that require a variable-height hospital bed include, but are not limited to, the following:

- Severe arthritis and other injuries to lower extremities that require the variable height feature to assist in ambulation by enabling the client to place his or her feet on the floor while sitting on the edge of the bed.

- Severe cardiac conditions, where the client is able to leave the bed, but must avoid the strain of “jumping” up and down.
- Spinal cord injuries (including quadriplegia and paraplegia), multiple limb amputations, and stroke, where the client is able to transfer from a bed to a wheelchair with or without help.
- Other severely debilitating diseases and conditions if the client requires a bed height different than a fixed-height hospital bed to permit transfers to a chair, wheelchair, or to a standing position.

Semi-Electric Hospital Bed

A semi-electric hospital bed (procedure code E0260), which allows manual adjustments to height and electric adjustments to head and leg elevation, may be considered for prior authorization if the client meets the criteria for a fixed-height hospital bed and has a condition that requires frequent changes in body position or might require an immediate change in body position to avert a life-threatening situation.

Fully-Electric Hospital Bed

A fully-electric bed (procedure code E06265), which allows electric adjustments to height and head and leg elevation, may be considered for prior authorization when all of the following criteria are met:

- The client has paraplegia or hemiplegia.
- The fully-electric hospital bed will allow the client to have functional independence with self-care.

Documentation must include an attestation statement from the client’s physician or physical or occupational therapist that verifies a determination has been made that the fully-electric hospital bed will allow the client to independently meet their daily self-care needs.

The following hospital beds may be considered for prior authorization if the client meets the criteria for a hospital bed and the weight requirements for a bariatric bed as listed below:

- Heavy-duty, extra-wide hospital bed (procedure code E0303) capable of supporting a client who weighs more than 350 pounds, but no more than 600 pounds
- Extra heavy-duty, extra-wide hospital bed (procedure code E0304) capable of supporting a client who weighs more than 600 pounds

2.2.12.3 Documentation Requirements

To request prior authorization for a hospital bed, the following documentation must be submitted:

- Accurate diagnostic information pertaining to the underlying medical diagnoses or conditions (e.g., gastrostomy feeding, suctioning, ventilator dependent, other respiratory equipment or ventilation assistance devices) to include the client’s overall health status
- Client height and weight
- Client functional mobility status
- Client use of any pressure-reducing support surfaces, if applicable

2.2.12.4 Mattresses and Support Surfaces

A pressure-reducing support surface includes three separate groups of mattress or mattress-like equipment designed to assist in the healing of wounds. These devices are used in conjunction with conventional wound care therapy to prevent the occurrence of said wounds in susceptible clients. Pressure-reducing support surfaces are designed to prevent skin breakdown or to promote the healing of pressure ulcers by reducing or eliminating tissue interface pressure. Most of these devices reduce interface pressure by conforming to the contours of the body so that pressure is distributed over a larger surface area rather than concentrated on a more circumscribed location.

For all types of pressure-reducing support surfaces, the support surface provided for the client should be one in which the client does not “bottom out.” The Centers for Medicare & Medicaid Services (CMS) define “bottoming out” as: when an outstretched hand, palm up, between the undersurface of the overlay or mattress and in an area under the bony prominence can readily palpate the bony prominence (coccyx or lateral trochanter). This “bottoming out” criterion should be tested with the client in the supine position with head flat, in the supine position with head slightly elevated (no more than 30 degrees), and in the side-lying position.

Pressure-reducing support surfaces containing multiple components are categorized according to the clinically predominant component (usually the top-most layer of a multi-layer product) and the presence and stage of pressure ulcers.

The staging of pressure ulcers is as follows:

Stage I: Observable pressure related alteration of intact skin whose indicators are as follows:

- Compared to the adjacent or opposite area on the body may include changes in one or more of the following: skin temperature (warmth or coolness), tissue consistency (firm or boggy feel), or sensation (pain, itching).
- The ulcer appears as a defined area of persistent redness in lightly pigmented skin, whereas in darker skin tones, the ulcer may appear with persistent red, blue, or purple hues.

Stage II: Partial thickness skin loss involving epidermis, dermis, or both. The ulcer is superficial and presents clinically as an abrasion, blister, or shallow crater.

Stage III: Full thickness skin loss involving damage to, or necrosis of, subcutaneous tissue that may extend down to, but not through, underlying fascia. The ulcer presents clinically as a deep crater with or without undermining of adjacent tissue.

Stage IV: Full thickness skin loss with extensive destruction, tissue necrosis, or damage to muscle, bone, or supporting structures (e.g., tendon, joint capsule). Undermining and sinus tracts also may be associated with Stage IV pressure ulcers.

2.2.12.4.1 Documentation Requirements

A support surface that does not meet the characteristics specified in the criteria for grouping levels may be denied and considered to be not medically necessary.

To request prior authorization for a pressure-reducing support surface, the following documentation must be provided:

- Client’s overall health status and all other medical diagnoses or conditions (e.g., history of decubitus)
- Documentation of the client’s limited mobility or confinement to a bed
- History of previous use and results of pressure-reducing support surfaces, (e.g., wound improvement, stasis, or degradation)
- Current wound therapy, if any

2.2.12.4.2 Group 1 Support Surfaces

A group 1 Support Surface may be considered for prior authorization with documentation of medical necessity if the client is completely immobile without assistance, or the client has limited mobility or existing pressure ulcer on the pelvis or trunk and at least one of the following conditions:

- Impaired nutritional status
- Fecal or urinary incontinence
- Altered sensory perception

- Compromised circulatory status

All of the support surfaces described below are considered a benefit of the Home Health Services Program when medical necessity criteria for Group 1 support surfaces are met.

Pressure pads or a nonpowered pressure-reducing mattress overlay for mattresses with the following features may be considered for reimbursement with documentation of medical necessity:

- A gel or gel-like layer with a height of two inches or greater
- An air mattress overlay with interconnected air cells that are inflated with an air pump and a cell height of three inches or greater
- A water mattress overlay with a filled height of three inches or greater
- A foam mattress overlay with all the following features:
 - Base thickness of two inches or greater and peak height of three inches or greater if it is a convoluted overlay (e.g., eggcrate) or an overall height of at least three inches if it is a nonconvoluted overlay
 - Foam with a density and other qualities that provide adequate pressure reduction
 - Durable, waterproof cover

Nonpowered pressure-reducing mattresses, with the following features, may be considered for reimbursement with documentation supporting medical necessity:

- A foam mattress with all the following features may be considered with documentation supporting medical necessity. Documentation must include all of the following features:
 - A foam height of five inches or greater
 - Foam with a density and other qualities that provide adequate pressure reduction
 - Durable, waterproof cover
 - Can be placed directly on a hospital bed frame
- An air, water, or gel mattress with all the following features may be considered for reimbursement:
 - A height of five inches or greater
 - Durable, waterproof cover

A powered pressure reducing mattress overlay system, with all the following features, may be considered for reimbursement when documentation supports medical necessity:

- The system includes an air pump or blower which provides either sequential inflation and deflation of air cells, or a low interface pressure throughout the overlay.
- Inflated cell height of the air cells through which air is being circulated is 2.5 inches or greater.
- Height of the air chambers, proximity of the air chambers to one another, frequency of air cycling (for alternating pressure overlays), and air pressure provide adequate client lift, reduces pressure, and prevents bottoming out.

2.2.12.4.3 Group 2 Support Surfaces

A Group 2 support surface may be considered for prior authorization with documentation of medical necessity if the client has multiple stage II ulcers on the trunk or pelvis and has been on a comprehensive ulcer treatment program for at least the past month which has included the use of a Group 1 support surface.

The client must also have at least one of the following:

- The ulcers have remained the same or worsened over the past month.
- There are large or multiple stage III or IV pressure ulcers on the trunk or pelvis.
- Received a myocutaneous flap or skin graft for a pressure ulcer on the trunk or pelvis within the last 60 days, and have been prescribed or placed on a Group 2 or 3 support surface immediately before discharge (within the last 30 days) from the hospital or a nursing facility

All of the support surfaces described below are considered a benefit of the Home Health Services Program when medical necessity criteria for Group 2 support surfaces are met.

The powered pressure reducing mattress (alternating pressure low air loss, or powered flotation without air loss) device with all the following features may be considered for reimbursement when documentation supports medical necessity:

- The system includes an air pump or blower which provides either sequential inflation and deflation of the air cells or a low interface pressure throughout the mattress.
- Inflated cell height of the air cells through which air is being circulated is five inches or greater.
- Height of the air chambers, proximity of the air chambers to one another, frequency of air cycling (for alternating pressure mattress), and air pressure to provide adequate client lift, reduce pressure, and prevent bottoming out.
- A surface designed to reduce friction and shear.

A semi-electric hospital bed with fully integrated powered pressure-reducing mattress that has all of the features described above may be considered for reimbursement when documentation supports medical necessity.

The advanced nonpowered pressure-reducing mattress overlay device with all the following features may be considered for reimbursement when documentation supports medical necessity:

- Height and design of individual cells which provide significantly more pressure reduction than Group 1 overlay and prevent bottoming out
- Total height of 3 inches or greater
- A surface designed to reduce friction and shear
- Manufacturer product information that substantiates the product is effective for the treatment of conditions described by the coverage criteria for Group 2 support surfaces

The powered pressure-reducing mattress overlay device with all the following features may be considered for reimbursement when documentation supports medical necessity:

- The system includes an air pump or blower that provides either sequential inflation and deflation of the air cells or a low interface pressure throughout the overlay.
- Inflated cell height of the air cells through which air is being circulated is three and a half inches or greater.
- Height of the air chambers, proximity of the air chambers to one another, frequency of air cycling (for alternating pressure overlays), and air pressure to provide adequate client lift, reduce pressure and prevent bottoming out.

The advanced nonpowered pressure-reducing mattress device with all the following features may be considered for reimbursement when documentation supports medical necessity:

- Height and design of individual cells designed to provide significantly more pressure than a Group 1 mattress and prevent bottoming out

- Total height of 5 inches or greater
- A surface designed to reduce friction and shear
- Documented evidence substantiates that the product is effective for the treatment of conditions described by the coverage criteria for Group 2 support surfaces

Sheepskin and lambs wool pads are considered a benefit of the Home Health Services Program under the same conditions as alternating pressure pads and mattresses (Group 2 pressure-reducing support surfaces) when prior authorized.

2.2.12.4.4 Group 3 Support Surfaces

A Group 3 support surface may be considered for prior authorization with documentation of medical necessity when all the following criteria are met:

- There is a presence of a stage III or IV ulcer.
- Severely limited mobility rendering the client bed or chair bound.
- Without an air-fluidized bed, the client would be institutionalized.
- The client has been placed on a Group 2 support surface for at least a month before ordering the air-fluidized bed with the ulcers not improving or worsening.
- There has been at least weekly assessment of the wound by the physician, a nurse or other licensed health-care professional and the treating physician has done a comprehensive evaluation of the client's condition within the week before ordering the air-fluidized bed.
- A trained adult caregiver is available to assist the client with activities of daily living, maintaining fluid balance, supplying dietary needs, aiding in repositioning and skin care, administering prescribed treatments, recognizing and managing altered mental status, and managing the air-fluidized bed system and its potential problems, such as leakage.
- The physician continues to re-evaluate and direct the home treatment regimen monthly.
- All other alternative equipment has been considered and ruled out.

The existence of any one of the following conditions may result in noncoverage of the air-fluidized bed:

- Coexisting pulmonary disease (the lack of firm back support can render coughing ineffective and dry air inhalation thickens pulmonary secretions).
- Wounds requiring moist wound dressings that are not protected with an impervious covering such as plastic wrap or other occlusive material (if wet-to-dry dressings are being utilized, dressing changes must be frequent enough to maintain their effectiveness).
- For clients who are 21 years of age and older, the caregiver is unwilling or unable to provide the type of care required by the client who uses an air-fluidized bed.
- The home's structural support or electrical system cannot safely accommodate the air-fluidized bed.

Initial prior authorization for a Group 3 pressure-reducing support surface will be for no more than 30 days. Prior authorized extensions may be considered for reimbursement in increments of 30-day periods, up to a maximum of four months, when documentation supports continued significant improvement in wound healing. Coverage beyond four months will be on a case-by-case basis after review by the medical director or designee.

Air-fluidized beds may be considered for reimbursement when the medical necessity criteria for Group 3 support surfaces are met.

2.2.12.5 Equipment and Other Accessories

The following equipment or accessories may be considered with documentation of medical necessity:

- Positioning devices
- Bed cradle (keeps bed covers from touching affected skin)
- Trapeze bars

2.2.12.5.1 Accessories

A mattress of any size with innerspring may be considered for prior authorization with procedure code E0271.

Replacement rails and hospital bed frame padding or covers may be considered for prior authorization as a hospital bed accessory (procedure code E0315) with documentation that the padding, covers or rails are required to prevent injury (for example, related to seizure activity) or to prevent entrapment.

2.2.12.5.2 Prior Authorization

Heel or elbow protector (procedure code E0191) does not require prior authorization. Prior authorization is required for all other hospital beds, equipment, and services provided through Texas Medicaid Title XIX Home Health Services. Prior authorization also includes any accessories, modifications, adjustments, and repairs of the equipment. Positioning cushions or pillows (procedure code E0190) may be considered with documentation of medical necessity that the item will provide pressure relief and positioning in the treatment of decubiti, burns, or musculoskeletal injuries. Documentation must include a listing of other devices that have been used and why the devices proved ineffective.

A trapeze bar attached to a bed (procedure code E0910 or E0911) may be considered if the client requires this device to sit up, to change body position, to get in or out of bed, or for other medical reasons with documentation of medical necessity.

“Free-standing” trapeze equipment (procedure code E0940 or E0912) may be considered if the client does not have an eligible hospital bed, but the client needs this device to sit up, to change body position, to get in or out of bed, or for other medical reasons with documentation of medical necessity.

An over-bed table (procedure code E0315) may be considered if the client is bed-bound and needs the over-bed table for treatments.

2.2.12.6 Decubitus Care Accessories

For prior authorization of decubitus care accessories, the following documentation must be provided:

- Wound measurements including location, length, width, and depth
- Any undermining or tunneling
- Odor, if applicable

2.2.12.7 Replacement

Beds rails and frames that have been purchased are anticipated to last a minimum of five years.

2.2.12.7.1 Prior Authorization

Prior authorization for replacement may be considered within five years of purchase when one of the following occurs:

- There has been a significant change in the client’s condition, such that the current equipment no longer meets the client’s needs.
- The equipment is no longer functional and cannot be repaired or it is not cost effective to repair.

Replacement of equipment may be considered when loss or irreparable damage has occurred. A copy of the police or fire report, when appropriate, and the measures to be taken to prevent reoccurrence must be submitted.

In situations where the equipment has been abused or neglected by the client, the client's family, or the caregiver, a referral to the Department of State Health Services (DSHS) Health Screening and Case Management unit will be made by the Home Health Services prior authorization unit for clients who are 20 years of age and younger. Providers will be notified that the state will be monitoring this client's services to evaluate the safety of the environment for both the client and equipment.

2.2.12.8 Non-covered Items

A safety enclosure (procedure code E0316) used to prevent a client from leaving the bed is not a benefit of Home Health Services. A safety enclosure may be considered through CCP.

Traction equipment (procedure codes E0890, E0947, and E0948) is not a benefit of Home Health Services.

The following types of beds will not be considered for prior authorization, because they are not considered medically necessary or are inappropriate for use in the home setting:

- Institutional type beds (procedure code E0270)
- An ordinary or standard bed typically sold as furniture (may consist of a frame, box spring, and mattress, and is of fixed height with no head or leg elevation adjustments). These types of beds are not primarily medical in nature, not primarily used in the treatment of disease or injury, and are normally of use in the absence of illness or injury. They are not considered durable medical equipment (DME) by Texas Medicaid.
- All non-hospital adjustable beds available to the general public as furniture. These types of beds are not primarily medical in nature, not primarily used in the treatment of disease or injury, and are normally of use in the absence of illness or injury. They are a comfort and convenience item and are not considered DME by Texas Medicaid.
- Hospital beds without rails. Texas Medicaid considers side rails an integral part of medically necessary bed.
- Beds with rails of any height that do not allow head and foot elevation (e.g., platform beds with rails), and are primarily used to prevent clients from leaving the bed. This types of beds are not primarily medical in nature.

2.2.12.9 Hospital Beds and Equipment Procedure Code Table

Procedure Code	Maximum Limitation
E0184	1 purchase every 5 years; 1-month rental
E0185	1 purchase every 5 years; 1-month rental
E0186	1 purchase every 5 years; 1-month rental
E0187	1 purchase every 5 years; 1-month rental
E0188	1 every year
E0189	1 every year
E0193	1 per month
E0194	1 per month
E0196	1 per month
E0197	1 per month
E0198	1 purchase every 5 years; 1-month rental

Procedure Code	Maximum Limitation
E0199	1 every 5 years
E0250	1 purchase every 5 years; 1-month rental
E0255	1 purchase every 5 years; 1-month rental
E0260	1 purchase every 5 years; 1-month rental
E0265	1 purchase every 5 years; 1-month rental
E0271	1 every 5 years
E0277	1 per month
E0280	1 purchase every 5 years; 1-month rental
E0303	1 purchase every 5 years; 1-month rental
E0304	1 purchase every 5 years; 1-month rental
E0305	1 every 5 years
E0310	1 every 5 years
E0315	1 every 5 years
E0371	1 purchase every 5 years; 1-month rental
E0372	1 purchase every 5 years; 1-month rental
E0373	1 purchase every 5 years; 1-month rental
E0910	1 purchase every 5 years; 1-month rental
E0911	1 purchase every 5 years; 1-month rental
E0912	1 purchase every 5 years; 1-month rental
E0940	1 purchase every 5 years; 1-month rental

2.2.13 Incontinence Supplies

Incontinence supplies billed for a one-month period must be based on the frequency or quantity ordered by the physician on the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form.

Note: *THSteps-eligible clients who qualify for medically necessary services beyond the limits of this Home Health benefit will receive those services through CCP.*

Refer to: Subsection 2.2.1.1, “Client Eligibility” in this handbook.

2.2.13.1 Skin Sealants, Protectants, Moisturizers, and Ointments for Incontinence-Associated Dermatitis

Incontinence-associated dermatitis is classified by category:

- Category 1—Small area of skin breakdown (<20 cm²) with mild redness (blotchy and non-uniform) and mild erosion involving the epidermis only.
- Category 2—Moderate area of skin breakdown (20-50 cm²) with moderate redness (severe in spots, but not uniform in appearance) and moderate erosion involving epidermis and dermis with no or little exudate.
- Category 3—Large area of skin breakdown (>50 cm²) with severe redness (uniformly severe in appearance) and severe erosion of epidermis with moderate involvement of the dermis and no or small volume of exudate.
- Category 4—Large area of skin breakdown (>50 cm²) with severe redness (uniformly severe in appearance) and extreme erosion of epidermis and dermis with moderate volume of persistent exudate.

Skin sealants, protectants, moisturizers, and ointments (procedure code A6250) may be considered for clients who are 4 years of age or older and have documented incontinence-associated dermatitis.

For clients who have Category 1 or Category 2 incontinence-associated dermatitis, prior authorization is not required for a maximum quantity of 2 containers (no less than 4 ounces per container) per month and 12 containers per year of skin sealants, protectants, moisturizers, and ointments. Providers must use procedure code A6250 with modifier UA to bill for these products.

For clients who have Category 3 or Category 4 incontinence-associated dermatitis, prior authorization and documentation of medical necessity is required for skin sealants, protectants, moisturizers, and ointments that are not used for Category 1 or Category 2 incontinence-associated dermatitis. Providers must use procedure code A6250 without a modifier to bill for these products.

Providers must use procedure code A6250 instead of procedure code A5120 when billing for skin sealants, protectants, moisturizers, and ointments.

Note: Skin sealants, protectants, moisturizers, ointments for diagnoses other than incontinence related dermatitis (i.e., wounds, decubitus ulcers, periwound skin complications, peristomal skin complications) may be considered for reimbursement with prior authorization.

2.2.13.2 Diapers, Briefs, Pull-ons, and Liners

Diapers and briefs are defined as incontinence items attached with tabs. Pull-ons are defined as incontinence items that do not attach with tabs and are slip-on items, such as “pull-ups.” Liners are intended to be worn inside diapers, briefs, and pull-ons to increase absorbency. Reusable diapers or briefs are not a benefit of Home Health Services.

For clients who are 4 years of age and older and have a medical condition that results in chronic incontinence, up to a maximum total combination of 240 per month of diapers, briefs, or liners may be considered without prior authorization. Quantities in excess of 240 per month may be considered with documentation of medical necessity and prior authorization.

Note: Gloves used to change diapers and briefs are not considered medically necessary unless the client has skin breakdown or a documented disease that may be transmitted through the urine or stool.

2.2.13.3 Diaper Wipes

For clients who are 4 years of age and older and are receiving diapers/briefs/pull-ons, up to 2 boxes of diaper wipes do not require prior authorization. Exceptions will not be considered through Title XIX Home Health Services. Quantities in excess of 2 boxes per month may be considered through CCP for clients who are 20 years of age and younger with documentation of medical necessity and prior authorization.

Providers must use procedure code A4335 with modifier U9 instead of procedure code A5120 when billing for diaper wipes.

If there is not an appropriate procedure code for supplies, providers may request prior authorization using procedure code A4335.

2.2.13.4 Underpads

For clients who are 4 years of age and older and are receiving diapers/briefs/pull-ons/liners/urine collection devices/bowel management supplies, up to a maximum of 120 underpads per month may be considered without prior authorization. Quantities in excess of 120 per month may be considered with documentation of medical necessity and prior authorization.

Reusable underpads are not a benefit of Home Health Services.

Note: *The Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form for the supplies listed above must reflect no more than a one-month's supply of the incontinence product. The Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form must not reflect more than the maximum allowed quantity per month without requesting prior authorization.*

2.2.13.5 Ostomy Supplies

The physician must specify the type of ostomy device or system to be used and how often it is to be changed on the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form. The quantity of ostomy supplies billed for a one-month period must relate to the number of changes per month based on the frequency ordered by the physician.

Ostomy supplies may be considered for reimbursement without prior authorization.

2.2.13.6 Indwelling or Intermittent Urine Collection Devices

The home setting is considered a clean environment, not a sterile one. Sterile incontinence supplies, (including the supplies in procedure codes A4311, A4312, A4313, A4314, A4315, A4316, and A4353) are a benefit in the home setting when requested for the following:

- Indwelling urinary catheters
- Intermittent catheters for clients who:
 - Are immunosuppressed
 - Have radiologically documented vesico-ureteral reflux
 - Are pregnant and have a neurogenic bladder due to spinal cord injury
 - Have a history of distinct, recurrent urinary tract infections, defined as a minimum of two within the prior 12-month period, while on a program of clean intermittent catheterization

Nonsterile or sterile gloves for use by a health-care provider in the home setting, such as a registered nurse (RN), licensed vocational nurse (LVN), or attendant, are not a benefit of Home Health Services.

2.2.13.6.1 Indwelling Catheters and Related Insertion Supplies

Indwelling catheters and related supplies may be considered without prior authorization up to a maximum of 2 per month for clients who have a medical condition that results in an impairment of urination. Quantities in excess of 2 per month may be considered with documentation of medical necessity and prior authorization.

2.2.13.6.2 Intermittent Catheters and Related Insertion Supplies

Intermittent catheters and related supplies, up to a maximum of 150 per month, may be considered without prior authorization for clients who have a medical condition that results in an impairment of urination. Quantities in excess of 150 per month may be considered with documentation of medical necessity and prior authorization.

Procedure code A4351 denotes catheters used for intermittent catheterizations. Procedure code A4351 must be accompanied with modifier SC when a hydrophilic catheter is used.

A completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form may be valid for up to 12 months for intermittent catheters and related insertion supplies for quantities within the stated benefit limits for clients who have one of the following chronic conditions:

Diagnosis Codes									
340	34400	34403	34404	3441	34461	59653	59654	74100	74190

Diagnosis Codes			
74193	7535	75617	75671

For clients who have a diagnoses other than those listed in the above table, the completed Title XIX Form may be valid for up to six months for intermittent catheters and related insertion supplies for quantities within the stated benefit limits.

Note: Diagnosis codes 78820 and 78830 are not specific enough to extend the validity of the Title XIX Form from 6 to 12 months.

For quantities greater than the stated benefit limits, prior authorization will be required and may be granted for up to six months regardless of diagnosis.

Nonsterile gloves are a benefit with prior authorization when a family member or friend is performing the catheterization.

Providers must use procedure codes A4351 or A4352 when billing for intermittent catheters. Providers must use procedure code A4353 when billing for intermittent catheters with insertion supplies. For hydrophilic catheters, procedure code A4351 must be accompanied with modifier SC.

2.2.13.6.3 External Urinary Collection Devices

For clients who are 4 years of age and older and have a medical condition that results in a permanent impairment of urination, external urinary collection devices, including, but not limited to, male external catheters, female collection devices, and related supplies may be considered without prior authorization. Male external catheters are limited to 31 per month. Female collection devices are limited to 4 per month. Male external catheters in excess of 31 per month and female collection devices in excess of 4 per month may be considered with documentation of medical necessity and prior authorization.

2.2.13.6.4 Urinals and Bed Pans

Urinals and bed pans may be considered without prior authorization for clients who have a medical condition that results in an inability to ambulate to the bathroom safely (with or without mobility aids) up to a limit of 2 per year. Quantities in excess of 2 per year may be considered with documentation of medical necessity and prior authorization.

Urinals and bed pans are purchase only.

2.2.13.7 Prior Authorization

Prior authorization is required for incontinence supplies if amounts greater than the maximum limits are medically necessary.

2.2.13.8 Documentation Requirements

To request prior authorization for incontinence supplies and equipment, the following documentation must be provided:

- Diagnostic information pertaining to the underlying diagnosis or condition, the diagnosis causing incontinence, and any other medical diagnoses or conditions, including the client's overall health status
- Weight and height or waist size, when applicable
- Number of times per day the physician has ordered the supply be used
- Quantity of disposable supplies requested per month by the physician

Additional information may be requested to clarify or complete a request for the supplies.

2.2.13.9 Incontinence Procedure Codes with Limitations

Any service or combination of services, except diaper wipes, requires prior authorization if the maximum limitation is exceeded. Requests for prior authorization of diaper wipes that exceed more than two boxes per month will not be considered through Home Health Services.

Procedure Code	Maximum Limitation
A4310	2 per month

E0326	2 per year

Note: Providers must include modifier U1 with procedure code T4528 when submitting claims for bariatric adult size products.

Refer to: Subsection 2.2.13.2, “Diapers, Briefs, Pull-ons, and Liners” in this handbook for an explanation of the item limitations identified with an asterisk (*).

The following procedure codes always require prior authorization even if the maximum benefit limitation allowed has not been exceeded:

Procedure Code	Maximum Limitation
A4927	1 per month
A6250	2 per month

2.2.14 Intravenous (IV) Therapy Equipment and Supplies

The following equipment and supplies are used in the delivery of IV therapy and are a benefit of Home Health Services. Additional supply procedure codes may be considered with documentation of medical necessity:

Procedure Code									
A4206	A4207	A4208	A4209	A4212	A4222	A4245	A4247	A4248	A4300
A4305	A4306	A4450	A4452	A4602	A4930	A6206	A6207	A6257	A6258
A6402	A9900	E0776	E0779	E0780	E0781	E0791	K0455	K0552	K0601
K0602	K0603	K0604	K0605	S1015					

Types of IV access devices include but are not limited to:

- Peripheral IV lines.
- Central IV lines, including but not limited to, peripherally-inserted central catheters, subclavian catheters, and vena cava catheters.
- Central venous lines, including but not limited to, tunneled and peripherally inserted central venous catheters.
- Implantable ports, including but not limited to, access devices with subcutaneous ports.

Stopcocks increase the risk of infection and should not be routinely used for infusion administration. Routine use of in-line filters is not recommended for infection control.

Note: Nonsterile or sterile gloves for use by a health-care provider in the home setting, such as an RN, LVN, or attendant, are not a benefit of Home Health Services.

Stationary infusion pumps may be a benefit when the infusion rate must be more consistent and cannot be obtained with gravity drainage. Ambulatory infusion pumps may be a benefit when the length of infusion is greater than two hours, the client must be involved in activities away from home, and when the infusion rate must be more consistent and cannot be obtained with gravity drainage. Elastomeric infusion pumps may be a benefit for short-term use when the caregiver cannot administer the infusion by pump. Dial flow regulators are a benefit and are incorporated into IV extension sets or IV tubing. Elastomeric devices may be reimbursed using procedure codes A4305 and A 4306.

Rental of an infusion pump may be prior authorized on a monthly basis for a maximum of four months per lifetime. Purchase of an infusion pump (ambulatory or stationary) may be prior authorized with documentation of medical necessity that supports repeated IV administration for a chronic condition.

For clients who require cardiovascular medications, infusion pumps will be rented, but not purchased.

Repairs to client-owned equipment may be prior authorized as needed with documentation of medical necessity. Technician fees are considered part of the cost of the repair. Providers are responsible for maintaining documentation in the client's medical record that specifies the repairs and supports medical necessity. All repairs and replacement parts within the first six months after delivery are considered part of the purchase price. Batteries for client-owned equipment require prior authorization. Additional documentation, such as the purchase date, serial number, and manufacturer's information, may be required.

IV therapy, supplies, and equipment are not considered a benefit when the infusion or medication being administered:

- Is not considered medically necessary to the treatment of the client's illness.
- Exceeds the frequency or duration ordered by the physician.
- Is a chemotherapeutic agent.
- Is not FDA-approved, unless the physician documents why the off-label use is medically appropriate and not likely to result in an adverse reaction. In order to consider coverage of an off-label (non-FDA approved) use of a drug, documentation must include why a drug usually indicated for the specific diagnosis or condition has not been effective for the client.

Routine maintenance of rental equipment is included in the rental price.

Repairs or replacement parts may be reimbursed with documentation of a client-owned device.

Replacement batteries (procedure codes K0601, K0602, K0603, K0604, and K0605) for client-owned pumps are limited to one battery per 180 days.

2.2.14.1 Prior Authorization

Additional replacement batteries for client-owned pumps (procedure codes K0601, K0602, K0603, K0604, and K0605) beyond the limit of 1 per 180 days may be considered for prior authorization with documentation of medical necessity.

All IV equipment and supplies, with the exception of implantable access catheter (A4300) require prior authorization. Prior authorization of IV equipment and supplies may be considered when administration of the drug in the home is medically necessary and is appropriate in the home setting. IV equipment may be prior authorized for rental or purchase depending on the clinician's predicted length of treatment.

The following standards are used when considering prior authorization of IV supplies:

- The aseptic technique is acceptable for IV catheter insertion and site care; the sterile technique is not required:
 - Nonsterile gloves are acceptable for the insertion of a peripheral IV catheter and for changing any IV site dressing.
 - The sterile technique may be medically necessary. Examples of medical necessity include, but are not limited to, a client who is immuno-compromised.
- A peripheral IV site is rotated no more frequently than every 72 hours, but it is rotated at least weekly.
- The IV administration set (with or without dial flow regulator), extension set (with or without dial flow regulator), and any add-on devices are changed every 72 hours.
- One IV access catheter is used per insertion.
- Saline or heparin-locked catheters:
 - Use one syringe to flush the catheter before administration of an intermittent infusion to assess.

- Use two syringes to flush the catheter after the intermittent infusion—one to clear the medication and one to infuse the anticoagulant or other medication used to maintain IV patency between doses, including, but not limited to, heparin.
- An injection port is cleaned before administering an intermittent infusion and capped after the infusion.
- IV catheter site care:
 - Disinfect the site with an appropriate antiseptic (including but not limited to 2 percent chlorhexidine-based preparation, tincture of iodine, or 70 percent alcohol).
 - Cover with sterile gauze, transparent dressing, or semi-permeable dressing.
 - Replace the dressing if it becomes damp, loosened, or visibly soiled.

Elastomeric devices and dial flow regulators are specialized infusion devices that may be considered for prior authorization when the device:

- Will be used for short-term medication administration (less than two weeks duration).
- Is expected to increase client compliance.
- Will better facilitate drug administration.
- Costs less than the cost of pump rental or tubing.
- The caregiver can not administer the infusion by pump.

The following criteria must be met for prior authorization of a stationary infusion pump:

- An infusion pump is required to safely administer the drug.
- The standard method of administration of the drug is through prolonged infusion or intermittent infusion, and the infusion rate must be more consistent than can be obtained with gravity drainage.
- The drug being administered requires IV infusion (i.e., the drug cannot be administered orally, intramuscularly, or by push technique).

The following criteria must be met for prior authorization of an ambulatory infusion pump:

- An infusion pump is required to safely administer the drug.
- The standard method of administration of the drug is through prolonged infusion or intermittent infusion and the infusion rate must be more consistent than can be obtained with gravity drainage.
- The drug being administered requires IV infusion (i.e., the drug cannot be administered orally, intramuscularly, or by push technique).
- The infusion administration is more than two hours and the client is involved in activities away from home, including but not limited to, physician visits.

2.2.14.2 Documentation Requirements

To request prior authorization for IV supplies and equipment, the following documentation must be provided:

- Diagnostic information pertaining to the underlying diagnosis or condition
- A physician's order and documentation supporting medical necessity
- The medication and dose being administered, the duration of drug therapy, and the frequency of administration

If additional supplies are needed beyond the standards listed, prior authorization may be considered with documentation supporting medical necessity.

For additional IV access catheters, supporting documentation must have evidence that includes, but is not limited to, the following:

- Dehydration
- Vein scarring
- Fragile veins, including but not limited to, clients who are infants or elderly

For more frequent IV site changes, supporting documentation must have evidence that includes, but is not limited to, the following:

- Phlebitis
- Infiltration
- Extravasation

For more frequent IV tubing or add-on changes, supporting documentation must have evidence that includes, but is not limited to, the following:

- Phlebitis
- IV catheter-related infection
- The administered infusion requires more frequent tubing changes

2.2.15 Mobility Aids

Mobility aids and related supplies, including, but not limited to canes, crutches, walkers, wheelchairs, and ramps are a benefit through Title XIX Home Health Services to assist clients to move about in their environment.

***Note:** A mobility aid for a client who is birth through 20 years of age is medically necessary when it is required to correct or ameliorate a disability or physical illness or condition.*

2.2.15.1 Canes, Crutches, and Walkers

Canes, crutches, and walkers are a benefit through Title XIX Home Health Services when medically necessary to assist clients to move about in their environment. Walkers require prior authorization. Prior authorization is not required for canes, crutches, or walker accessories.. Documentation of medical necessity must be provided by a physician familiar with the client and must include information on the client's impaired mobility.

2.2.15.2 Wheelchairs

A wheelchair is a non-customized chair mounted on four wheels that incorporates a non-adjustable frame, a sling or solid back and seat, and arm rests. Optional items included in this definition include, but are not limited, to the following:

- Handles at the back
- Foot rest
- Seat belt or safety restraint

A wheelchair includes all of the following:

- Standard (manual) wheelchairs
- Standard hemi (manual) wheelchairs
- Standard reclining (manual) wheelchairs
- Lightweight (manual) wheelchairs
- High strength lightweight (manual) wheelchairs

2.2.15.2.1 Prior Authorization

A wheelchair may be prior authorized for short-term rental or for purchase with documentation supporting medical necessity and an assessment of the accessibility of the client's residence to ensure that the wheelchair is usable in the home (i.e., doors and halls wide enough, no obstructions). The wheelchair must be able to accommodate a 20 percent change in the client's height or weight.

2.2.15.2.2 Documentation Requirements

Documentation by a physician familiar with the client must include information on the client's impaired mobility and physical requirements. In addition, the following information must be submitted with documentation of medical necessity:

- Why the client is unable to ambulate a minimum of 10 feet due to their condition (including, but not limited to, AIDS, sickle cell anemia, fractures, a chronic diagnosis, or chemotherapy)
- If the client is able to ambulate further than 10 feet, why a wheelchair is required to meet the client's needs

2.2.15.3 Manual Wheelchairs-Standard, Standard Hemi, and Standard Reclining

A standard manual wheelchair is defined as a manual wheelchair that:

- Weighs more than 36 pounds.
- Does not have features to appropriately accept specialized seating or positioning.
- Has a weight capacity of 250 pounds or less.
- Has a seat depth of between 15 and 19 inches.
- Has a seat width of between 15 and 19 inches.
- Has a seat height of 19 inches or greater.
- Is fixed height only, fixed, swing away, or detachable armrest.
- Is fixed, swing away, or detachable footrest.

A standard hemi (low seat) wheelchair is defined as a manual wheelchair that:

- Has the same features as a standard manual wheelchair.
- Has a seat to floor height of less than 19 inches.

A standard reclining wheelchair is defined as a manual wheelchair that:

- Has the same features as a standard or standard hemi manual wheelchair.
- Has the ability to allow the back of the wheelchair to move independently of the seat to provide a change in orientation by opening the seat-to-back angle and, in combination with leg rests, open the knee angle.

2.2.15.3.1 Prior Authorization

A standard manual wheelchair may be considered for prior authorization for short-term rental or purchase when all the following criteria are met:

- The client has impaired mobility and is unable to ambulate more than 10 feet.
- The client does not require specialty seating components.
- The client is not expected to need powered mobility within the next 5-year period.

A standard hemi wheelchair may be considered for prior authorization for short-term rental or purchase when the client meets criteria for a standard manual wheelchair and the following criteria is met:

- The client requires a low seat-to-floor height.

- The client must use their feet to propel the wheelchair.

A standard reclining wheelchair may be considered for prior authorization for short-term rental or purchase when the client meets criteria for a standard manual wheelchair and one or more of the following criteria are met:

- The client develops fatigue with longer periods of sitting upright.
- The client is at increased risk of pressure sores with prolonged upright position.
- The client requires assistance with respirations in a reclining position.
- The client needs to perform mobility related activities of daily living (MRADLs) in a reclining position.
- The client needs to improve venous return from lower extremity in a reclining position.
- The client has severe spasticity.
- The client has excess extensor tone of the trunk muscles.
- The client has quadriplegia.
- The client has a fixed hip angle.
- The client must rest in a reclining position two or more times per day.
- The client has the inability or has great difficulty transferring from wheelchair to bed.
- The client has trunk or lower extremity casts or braces that require the reclining feature for positioning.

2.2.15.4 Manual Wheelchairs-Lightweight and High-Strength Lightweight

A lightweight manual wheelchair is defined as a manual wheelchair that:

- Has the same features as a standard or hemi manual wheelchair.
- Weighs 34 to 36 pounds.
- Has available arm styles that are height adjustable.

A high-strength lightweight wheelchair is defined as a manual wheelchair that:

- Has the same features as a lightweight manual wheelchair.
- Weighs 30 to 34 pounds.
- Has a lifetime warranty on side frames and cross braces.

2.2.15.4.1 Prior Authorization

A lightweight manual wheelchair may be considered for prior authorization for rental or purchase when all the following criteria are met:

- The client is unable to propel a standard manual wheelchair at home.
- The client is capable of independently propelling a lightweight wheelchair to meet their MRADLs at home.

A high-strength lightweight wheelchair may be considered for prior authorization for rental or purchase when the client meets all of the criteria for a lightweight manual wheelchair and meets one or more of the following criteria:

- The high-strength lightweight wheelchair will allow the client to self-propel while engaging in frequently performed activities that cannot otherwise be completed in a standard or lightweight wheelchair.

- The client requires frame dimensions (seat width, depth, or height) that cannot be accommodated in a standard, lightweight, or hemi wheelchair and the wheelchair is used at least 2 hours a day.

2.2.15.5 Manual Wheelchairs-Heavy-Duty and Extra Heavy Duty

A heavy duty wheelchair is defined as a manual wheelchair that:

- Meets the standard manual wheelchair definition.
- Has a weight capacity greater than 250 pounds.

An extra heavy duty wheelchair is defined as a manual wheelchair that:

- Meets the standard manual wheelchair definition.
- Has a weight capacity greater than 300 pounds.

2.2.15.5.1 Prior Authorization

A heavy-duty wheelchair may be considered for prior authorization for short-term rental or purchase when the client has severe spasticity or all the following criteria are met:

- The client meets criteria for a standard manual wheelchair.
- The client weighs between 250 and 300 pounds.

An extra heavy duty wheelchair may be considered for prior authorization for short-term rental or purchase when all the following criteria are met:

- The client meets criteria for a standard manual wheelchair.
- The client weighs more than 300 pounds.

2.2.15.6 Wheeled Mobility Systems

A wheeled mobility system is a manual or power wheelchair, or scooter that is a customized power or manual mobility device, or a feature or component of the mobility device, including but not limited to, the following:

- Seated positioning components
- Powered or manual seating options
- Specialty driving controls for powered chairs
- Adjustable frame
- Other complex or specialized components

A wheeled mobility system includes all of the following:

- Tilt-in-space (manual) wheelchairs
- Pediatric size (manual) wheelchairs and strollers
- Custom ultra lightweight (manual) wheelchairs
- All power wheelchairs
- All scooters

2.2.15.6.1 Definitions and Responsibilities

The following definitions and responsibilities apply to the provision of wheeled mobility systems.

Adjustments—The adjustment of a component or feature of a wheeled mobility system.

Adjustments require labor only and do not include the addition, modification, or replacement of components or supplies needed to complete the adjustment.

Texas Medicaid will consider adjustments only to client-owned equipment that is considered a benefit of Texas Medicaid.

Major Modification—The addition of a custom or specialized feature or component of a wheeled mobility system that did not previously exist on the system due to changes in the client’s needs, including, but not limited to, the items listed in this paragraph. This definition also includes the modification of a custom or specialized feature or component due to a change in the client’s needs, including, but not limited to, the following:

- Seated positioning components, including, but not limited to, specialized seating or positioning components
- Powered or manual seating options, including, but not limited to, power tilt or recline seating systems and seat elevation systems
- Specialty driving controls, including, but not limited to, non-standard alternative power drive control systems
- Adjustable frame, including, but not limited to, non-standard seat frame dimensions
- Other complex or specialized components, including, but not limited to, power elevating leg rests and specialized electronic interfaces

The replacement of a previously existing custom or specialized feature or component with an identical or comparable component is considered a repair and not a major modification.

Texas Medicaid will consider major modifications only to client-owned equipment that is considered a benefit of Texas Medicaid.

Minor Modification—The addition or modification of non-custom or non-specialized features or components due to changes in the client’s needs, including but not limited to, the following:

- Armpads/armrests
- Legrests/Leg extensions
- Modification of seating and positioning components to accommodate for a change in the client’s size.

The replacement of a previously existing non-custom or non-specialized feature or component with an identical or comparable component is considered a repair and not a minor modification.

Texas Medicaid will consider minor modifications only to client-owned equipment that is considered a benefit of Texas Medicaid.

Mobility Related Activity to Daily Living (MRADL)—An activity of daily living requiring the use of mobility aids (i.e., toileting, feeding, dressing, grooming, and bathing).

Occupational Therapist—A person who is currently licensed by the Executive Council of Physical Therapy & Occupational Therapy Examiners to practice occupational therapy.

Physical Therapist—A person who is currently licensed by the Executive Council of Physical Therapy & Occupational Therapy Examiners to practice physical therapy.

Note: *A physical or occupational therapist is responsible for completing the seating assessment of a client required for obtaining a wheeled mobility system.*

Qualified Rehabilitation Professional (QRP)—A person who meets one or more of the following criteria:

- Holds a certification as an Assistive Technology Professional (ATP) or a Rehabilitation Engineering Technologist (RET) issued by, and in good standing with, the Rehabilitation Engineering and Assistive Technology Society of North America (RESNA).

- Holds a certification as a Seating and Mobility Specialist (SMS) issued by, and in good standing with, RESNA.
- Holds a certification as a Certified Rehabilitation Technology Supplier (CRTS) issued by, and in good standing with, the National Registry of Rehabilitation Technology Suppliers (NRRTS).

The QRP is responsible for:

- Being present at and involved in the seating assessment of the client for the rental or purchase of a wheeled mobility system.
- Being present at the time of delivery of the wheeled mobility system to direct the fitting of the system to ensure that the system functions correctly relative to the client.

Repairs—The replacement of a component or feature of a wheeled mobility system that is no longer functioning as designed, with an identical or comparable component that does not change the size or function of the system.

Texas Medicaid will consider repairs only to client-owned equipment that is considered a benefit of Texas Medicaid.

Additional Benefit Information

The initial purchase of all manual wheelchairs and wheeled mobility systems must include the wheelchair base or frame, and the following standard components, which will not be prior authorized separately:

- Complete set of standard propulsion and caster wheels, including all of the following:
 - Propulsion or caster tires of any size, made of solid rubber or plastic
 - Standard hand rims
 - Complete wheel lock assembly
 - Bearings
- Standard footrest assembly (fixed, detachable, or swing away), including standard footplates, calf rests/pads, and ratchet assembly
- Standard armrests (fixed non-adjustable or detachable non-adjustable), including standard foam or plastic arm pads
- Standard seat and back upholstery

Medically necessary non-standard components may be considered for prior authorization with documentation of medical necessity for the requested component. Such components include, but are not limited to, the following:

- Flat-free inserts
- Foam filled propulsion or caster tires
- Pneumatic propulsion or caster tires
- Non-standard hand rims (including ergonomic and contoured)
- Non-standard length footrests
- Custom footrests
- Elevating footrests
- Angle adjustable footplates
- Adjustable height fixed armrests

- Adjustable height detachable armrests
- Custom size arm pads
- Gel arm pads
- Arm troughs
- Elevating leg rests

Claims for wheelchairs, components, and accessories must be submitted using the most appropriate procedure code that describes the item.

2.2.15.6.2 Prior Authorization

A wheeled mobility system may be prior authorized for short-term rental or for purchase with documentation supporting medical necessity and an assessment of the accessibility of the client's residence to ensure that the wheelchair is usable in the home (i.e., doors and halls wide enough, no obstructions). The wheelchair must be able to accommodate a 20 percent change in the client's height or weight.

2.2.15.6.3 Documentation Requirements

Documentation by a physician familiar with the client must include information on the client's impaired mobility and physical requirements. In addition, the following information must be submitted with documentation of medical necessity:

- Why the client is unable to ambulate a minimum of 10 feet due to their condition (including, but not limited to, AIDS, sickle cell anemia, fractures, a chronic diagnosis, or chemotherapy), or
- If the client is able to ambulate further than 10 feet, why a wheelchair is required to meet the client's needs.
- A completed Wheelchair/Scooter/Stroller Seating Assessment Form with seating measurements that includes documentation supporting medical necessity
- An itemized component list for custom manual or power wheeled mobility systems.

When medically necessary, prior authorization may also be considered for the rental or purchase of an alternative wheelchair on a case-by-case basis, as follows:

- A manual wheelchair will be considered for a client who owns or is requesting a power wheeled mobility system with no custom features.
- A manual wheelchair or a manual wheeled mobility system will be considered for a client who owns or is requesting a power wheeled mobility system with custom features.

2.2.15.7 Manual Wheeled Mobility System - Tilt-in-Space

A tilt-in-space manual wheeled mobility system is defined as a manual wheelchair that meets the following requirements:

- Has the ability to tilt the frame of the wheelchair greater than or equal to 45 degrees from horizontal while maintaining a constant back to seat angle to provide a change of orientation and redistribute pressure from one area (such as the buttocks and the thighs) to another area (such as the trunk and the head)
- Adult size has a weight capacity of at least 250 pounds
- Pediatric size has a seat width or depth of less than 15 inches

2.2.15.7.1 Prior Authorization

A tilt-in-space wheeled mobility system may be considered for prior authorization for short-term rental or purchase when all the following criteria are met:

- The client meets criteria for a standard manual wheelchair.
- The client has a condition that meets criteria for a tilt-in-space feature, including but not limited to:
 - Severe spasticity
 - Hemodynamic problems
 - Quadriplegia
 - Excess extensor tone
 - Range of motion limitations prohibit a reclining system, such as hip flexors, hamstrings, or even heterotopic ossification
 - The need to rest in a recumbent position two or more times per day and the client has an inability to transfer between bed and wheelchair without assistance
 - Documented weak upper extremity strength or a disease that will lead to weak upper extremities
 - At risk for skin break down because of inability to reposition body in a chair to relieve pressure areas

2.2.15.8 Manual Wheeled Mobility System- Pediatric Size

A pediatric sized wheeled mobility system is defined as a manual standard/custom wheelchair (including those optimally configured for propulsion or custom seating) that has a seat width or depth of less than 15 inches.

2.2.15.9 Manual Wheeled Mobility System -Custom (Includes Custom Ultra-Lightweight)

Custom manual wheeled mobility systems may be considered for a client who meets criteria for a manual wheelchair, has a condition that requires specialized seating, and cannot safely utilize a standard manual wheelchair.

A custom ultra lightweight wheeled mobility system is defined as an optimally configured wheelchair for independent propulsion which cannot be achieved in a standard, lightweight, or high-strength lightweight wheelchair that:

- Meets the high-strength lightweight definition and weighs less than 30 pounds.
- Has one or more of the following features to appropriately accept specialized seating or positioning:
 - Adjustable seat-to-back angle
 - Adjustable seat depth
 - Independently adjustable front and rear seat-to-floor dimensions
 - Adjustable caster stem hardware
 - Adjustable rear axle
 - Adjustable wheel camber
 - Adjustable center of gravity
- Has a lifetime warranty on side frames and cross braces

2.2.15.9.1 Prior Authorization

A custom ultra-lightweight wheeled mobility system may be considered for prior authorization for rental or purchase when the client meets all the criteria for a lightweight manual wheelchair and one or more of the following criteria:

- The client is able to self-propel, will have independent mobility with the use of an optimally configured chair, and meets all of the following criteria:
 - The client uses the wheelchair for a significant portion of their day to complete MRADLs.
 - The client uses the wheelchair in the community to complete MRADLs.
 - Powered mobility is not anticipated within the next 5-year period.
- The client is able to self-propel, will have independent mobility with the use of an optimally configured chair, has a medical condition that cannot be accommodated by the seating available on a standard, lightweight, or high-strength lightweight wheelchair and one or more of the following features needed by the client to ensure optimal independence with MRADLs:
 - Adjustable seat to back angle.
 - Adjustable seat depth.
 - Independently adjustable front and rear seat-to-floor dimensions.
 - Adjustable caster stem hardware.
 - Adjustable rear axle (adjustable center of gravity).
 - Powered mobility is not anticipated within the next 5-year period.
- The client meets all of the following criteria:
 - The client is unable to self-propel.
 - The client has a documented condition that requires custom seating, including, but not limited to:
 - Poor trunk control.
 - Contractures of elbow or shoulders.
 - Muscle spasticity.
 - Tone imbalance through shoulders or back.
 - Kyphosis or Lordosis.
 - Lack of flexibility in pelvis or spine.
 - The client requires custom seating that cannot be accommodated on a standard, lightweight, or hemi-wheelchair.

Prior authorization for labor to create a custom molded seating system is limited to a maximum of 15 hours.

2.2.15.10 Seating Assessment for Manual and Power Custom Wheelchairs

A seating assessment is required for:

- The rental or purchase of any device meeting the definition of a wheeled mobility system as defined under subsection 2.2.15.6, “Wheeled Mobility Systems” in this handbook.
- The purchase of any device meeting the definition of a wheelchair as defined under subsection 2.2.15.2, “Wheelchairs” in this handbook for a client with a congenital or neurological condition, myopathy, or skeletal deformity, which requires the use of a wheelchair.

A seating assessment with measurements, including specifications for exact mobility/seating equipment and all necessary accessories, must be completed by a physician, licensed occupational therapist, or licensed physical therapist.

A QRP directly employed or contracted by the DME provider must be present at and participate in all seating assessments, including those provided by a physician.

Upon completion of the seating assessment, the QRP must attest to his or her participation in the assessment by signing the Wheelchair/Scooter/Stroller Seating Assessment Form. This form must be submitted with all requests for wheeled mobility systems.

When the practitioner completing the seating assessment is an occupational or physical therapist, the occupational or physical therapist may perform the seating assessment as the therapist, or as the QRP, but may not perform in both roles at the same time. If the occupational or physical therapist is attending the seating assessment as the QRP, the occupational or physical therapist must meet the credentialing requirements and be enrolled in Texas Medicaid as a QRP.

If the practitioner completing the seating assessment is a physician, the seating assessment is considered part of the evaluation and management service provided.

***Note:** If a client who is birth through 20 years of age requires seating support and meets the criteria for a seating system, a stroller may be considered through CCP, or a wheelchair may be considered through Texas Medicaid Title XIX Home Health Services.*

2.2.15.10.1 Prior Authorization

A seating assessment performed by an occupational therapist, physical therapist, or a physician, with the participation of a QRP, does not require prior authorization. A seating assessment performed by a physician is considered part of the physician evaluation and management service.

The QRP's participation in the seating assessment requires authorization before the service can be reimbursed. Authorization must be requested at the same time and on the same prior authorization request form as the prior authorization request for the QRP fitting and the wheeled mobility system or major modification to the wheeled mobility system.

Prior authorization requests for the QRP's participation in the seating assessment will be returned to the provider if the seating assessment is requested separately from the prior authorization for the QRP fitting and the wheeled mobility system or major modification to the wheeled mobility system.

The QRP participating in the seating assessment must be directly employed by or contracted with the DME provider requesting the wheeled mobility system or major modification to a wheeled mobility system.

An authorization for the QRP's participation in the seating assessment for a wheeled mobility system or major modification to a wheeled mobility system may be issued to the QRP in 15-minute increments, for a time period of up to one hour (4 units).

If the seating assessment is completed by a physician, reimbursement is considered part of the physician office visit and will not be reimbursed separately.

The practitioner (occupational therapist or physical therapist) completing the assessment must submit procedure code 97001 or 97003 with modifier U1, in order to bill for the seating assessment.

Services for the QRP's participation in the seating assessment must be submitted for reimbursement by the DME provider billing for the wheeled mobility system using procedure code 97542 with modifier U1. The DME provider must include the QRP specialty as the performing provider on the claim for all components of the wheeled mobility system, including the QRP's participation in the seating assessment.

Seating assessment services performed by a QRP is limited to four units (one hour).

2.2.15.10.2 Documentation Requirements

The seating assessment must:

- Explain how the client or family will be trained in the use of the equipment.
- Anticipate changes in the client's needs and include anticipated modifications or accessory needs, as well as the growth potential of the wheelchair. A wheelchair must have growth potential that will accommodate a 20 percent change in the client's height and/or weight.
- Include significant medical information pertinent to the client's mobility and how the requested equipment will accommodate these needs, including intellectual, postural, physical, sensory (visual and auditory), and physical status.
- Address trunk and head control, balance, arm and hand function, existence and severity of orthopedic deformities, as well as any recent changes in the client's physical and/or functional status, and any expected or potential surgeries that will improve or further limit mobility.
- Include information on the client's current mobility/seating equipment, how long the client has been in the current equipment and why it no longer meets the client's needs.
- Include the client's height, weight, and a description of where the equipment is to be used.
- Include seating measurements.
- Include the accessibility of client's residence.
- Include manufacturer's information, including the description of the specific base, any attached seating system components, and any attached accessories, as well as the manufacturer's retail pricing information and itemized pricing for manually priced components.
- Include documentation supporting medical necessity for all accessories.
- Be documented on the Wheelchair/Scooter/Stroller Seating Assessment Form, which must be signed and dated by the qualified practitioner completing the assessment (occupational therapist, physical therapist, or physician), and the QRP who was present and participated in the assessment. All signatures and dates must be current, unaltered, original, and handwritten. Computerized or stamped signatures and dates will not be accepted.
- Be submitted with the prior authorization request for the wheeled mobility system. The Form must be completed, signed and dated as outlined above.

2.2.15.11 Fitting of Custom Wheeled Mobility Systems

The fitting of a wheeled mobility system is defined as the time the QRP spends with the client fitting the various systems and components of the system to the client. It may also include time spent training the client or caregiver in the use of the wheeled mobility system. Time spent setting up the system, or travel time without the client present, is not included.

A fitting is required for any device meeting the definition of a wheeled mobility system as defined under subsection 2.2.15.6, "Wheeled Mobility Systems" in this handbook.

The fitting of a wheeled mobility system must be:

- Performed by the same QRP that was present for, and participated in, the seating assessment of the client.
- Completed prior to submitting a claim for reimbursement of a wheeled mobility system.

The QRP performing the fitting will:

- Verify the wheeled mobility system has been properly fitted to the client.
- Verify that the wheeled mobility system will meet the client's functional needs for seating, positioning, and mobility.

- Verify that the client, parent, guardian of the client, and/or caregiver of the client has received training and instruction regarding the wheeled mobility system's proper use and maintenance.

The QRP must complete and sign the DME Certification and Receipt form after the wheeled mobility system has been delivered and fitted to the client. Completion of this form by the QRP signifies that all components of the fitting as outlined above have been satisfied. The form must be completed prior to submission of a claim for a wheeled mobility system, and submitted to HHSC's designee according to instructions on the form to allow for proper claims processing.

Services for fitting of a wheeled mobility system by the QRP must be submitted for reimbursement by the DME provider of the wheeled mobility system using procedure code 97542 with modifier U2. The DME provider must list the QRP who participated in the seating assessment as the performing provider on the claim for all components of the wheeled mobility system, including the fitting performed by the QRP.

All adjustments and modifications to the wheeled mobility system, as well as the associated services by the QRP for the seating assessment and fitting, within the first six months after delivery are considered part of the purchase price and will not be separately reimbursed.

Procedure code 97542 with modifier U2 must be billed on the same claim as the procedure code(s) for the wheeled mobility system in order for both services to be reimbursed.

2.2.15.11.1 Prior Authorization

Prior authorization is required for the QRP performing the fitting of a wheeled mobility system, and must be included with the request for the wheeled mobility system.

The QRP must be directly employed by or contracted with the DME company providing the system, and must be the same QRP who was present at and participated in the client's seating assessment.

A prior authorization may be issued to the QRP in 15-minute increments, for a time period of up to two hours (8 units), for the fitting of any manual or power wheeled mobility system. Up to one additional hour (4 units) may be authorized to the QRP with documentation of medical necessity demonstrating that fitting of three or more major systems is required, or that additional client training is required for such systems. Major systems can include, but are not limited to, the following:

- Complete complex seating system (planar system with trunk supports and hip supports or abductor or custom contoured seating system such as a molded system) Off-the-shelf seat and back cushions do not constitute a complex seating system.
- Alternative drive controls (such as a head array, mini-proportional system, etc.).
- Additional specialty control features (such as infrared access).
- Power positioning features (such as power tilt, power recline).
- Specific purpose specialty features (such as power seat elevation systems, power elevating leg rests).

2.2.15.11.2 Documentation Requirements

When the QRP that participated in the assessment of the client is not available to conduct the fitting of the wheeled mobility system, the DME provider must update the prior authorization for the wheeled mobility system and fitting by submitting all of the following information:

- A letter written on the DME provider's letterhead, signed and dated by a representative of the DME provider other than the new QRP.
- Documentation explaining why the original QRP could not conduct the fitting. Examples may include, but are not limited to, documentation that the QRP:
 - Is no longer associated with the DME provider requesting the wheeled mobility system.

- Is on an extended leave from the DME provider requesting the wheeled mobility system.

Note: For purposes of this policy, an extended leave is any leave of more than 30 consecutive calendar days.

- The name, TPI, and NPI of the original QRP who performed the initial assessment, and the date the assessment was completed.
- The name, TPI, and NPI of the QRP who will be performing the fitting.
- A copy of the original, physician-signed Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form.

A copy of this documentation must be maintained by the provider in the client's medical record and be available upon request by HHSC or its designee.

2.2.15.12 Power Wheeled Mobility Systems- Group 1 through Group 5

A power wheeled mobility system or powered mobility device (PMD) is a professionally manufactured device that provides motorized wheeled mobility and body support specifically for individuals with impaired mobility. PMDs are four- or six-wheeled motorized vehicles whose steering is operated by an electronic device or joystick to control direction, turning, and alternative electronic functions, such as seat controls.

Each PMD must include all of the following basic components that may not be billed separately:

- Lap belt or safety belt (This does not include multiple-attachment-point positioning belts or padded belts.)
- Battery charger, single mode
- Batteries (initial)
- Complete set of tires and casters, any type
- Leg rests
- Foot rests or foot platform
- Arm rests
- Any weight-specific components (braces, bars, upholstery, brackets, motors, gears, etc.) as required by client weight capacity
- Controller and input device

The following definitions apply to PMDs:

- No-Power Option - A category of PMDs that cannot accommodate a power tilt, recline, or seat elevation system. A PMD that can accept only power-elevating leg rests is considered to be a no-power option chair.
- Single-Power Option - A category of PMDs that can accept and operate a power tilt, power recline, or a power seat elevation system, but not a combination power tilt and recline seating system. A single-power option PMD might be able to accommodate power elevating leg rests, or seat elevator, in combination with a power tilt or power recline. A PMD does not have to be able to accommodate all features to meet this definition.
- Multiple-Power Option - A category of PMDs that can accept and operate a combination power tilt and recline seating system. A multiple-power option PMD might also be able to accommodate power elevating leg rests, or a power seat elevator. A PMD does not have to accommodate all features to qualify to meet this definition.

2.2.15.12.1 Prior Authorization

Prior authorization for a power wheeled mobility system/PMD requires the following documentation in addition to all documentation required for a custom manual wheelchair:

- The client's physical and mental ability to receive and follow instructions related to responsibilities of using equipment. The client must be able to operate a PMD independently. The therapist must provide written documentation that the client is physically and cognitively capable of managing a PMD.
- How the PMD will be operated (i.e., joystick, head pointer, puff-and-go).
- The capability of the client to understand how the PMD operates.
- The capability of the caregiver or client to care for the PMD and accessories.

2.2.15.12.2 Group 1 PMDs

All Group 1 PMDs must have all the specified basic components and meet all the following requirements:

- Standard integrated or remote proportional joystick
- Nonexpandable controller
- Incapable of upgrade to expandable controller
- Incapable of upgrade to alternative control devices
- May have cross brace construction
- Accommodates nonpowered options and seating systems (e.g., recline-only backs, manually elevating leg rests [except captains' chairs])
- Length - less than or equal to 40 inches
- Width - less than or equal to 24 inches
- Minimum top end speed - 3 mph
- Minimum range - 5 miles
- Minimum obstacle climb - 20 mm
- Dynamic stability incline - 6 degrees

Prior Authorization Requirements

A Group 1 PMD may be considered for prior authorization for rental or purchase when all the following criteria are met:

- The client will use the PMD for less than 2 hours per day.
- The client will use the PMD indoors on smooth, hard surfaces.
- The client will not encounter obstacles in excess of 0.75 inch.

2.2.15.12.3 Group 2 PMDs

All Group 2 PMDs must have all the specified basic components and meet all the following requirements:

- Standard integrated or remote proportional joystick
- May have cross brace construction
- Accommodates seating and positioning items (e.g., seat and back cushions, headrests, lateral trunk supports, lateral hip supports, medical thigh supports [except captains' chairs])

- Length - less than or equal to 48 inches
- Width - less than or equal to 34 inches
- Minimum top end speed - 3 mph
- Minimum range - 7 miles
- Minimum obstacle climb - 40 mm
- Dynamic stability incline - 6 degrees

Prior Authorization Requirements

A Group 2 PMD may be considered for prior authorization for rental or purchase when the following criteria are met:

- The client will use the PMD for 2 or more hours per day.
- The client will not routinely use the PMD for MRADLs outside the home.
- The client will not encounter obstacles in excess of 1.5 inches.

2.2.15.12.4 Group 3 PMDs

All Group 3 PMDs must have all the specified basic components and meet all the following requirements:

- Standard integrated or remote proportional joystick
- Nonexpandable controller
- Capable of upgrade to expandable controller
- Capable of upgrade to alternative control devices
- May not have cross brace construction
- Accommodates seating and positioning items (e.g., seat and back cushions, headrests, lateral trunk supports, lateral hip supports, medial thigh supports [except captains' chairs])
- Drive wheel suspension to reduce vibration
- Length - less than or equal to 48 inches
- Width - less than or equal to 34 inches
- Minimum top end speed - 4.5 mph
- Minimum range - 12 miles
- Minimum obstacle climb - 60 mm
- Dynamic stability incline - 7.5 degrees

Prior Authorization Requirements

A Group 3 PMD may be considered for prior authorization for rental or purchase when the following criteria are met:

- The client's mobility limitation is due to a neurological condition, myopathy, or congenital skeletal deformity.
- The client may routinely use the PMD for MRADLs outside of the home.
- The client will use the PMD primarily on smooth or paved surfaces.
- The client will not encounter obstacles in excess of 2.5 inches.

2.2.15.12.5 Group 4 PMDs

All Group 4 PMDs must have all the specified basic components and meet all the following requirements:

- Standard integrated or remote proportional joystick
- Nonexpandable controller
- Capable of upgrade to expandable controller
- Capable of upgrade to alternative control devices
- May not have cross brace construction
- Accommodates seating and positioning items (e.g., seat and back cushions, headrests, lateral trunk supports, lateral hip supports, medial thigh supports [except captains' chairs])
- Drive wheel suspension to reduce vibration
- Length - less than or equal to 48 inches
- Width - less than or equal to 34 inches
- Minimum top end speed - 6 mph
- Minimum range - 16 miles
- Minimum obstacle climb - 75 mm
- Dynamic stability incline - 9 degrees

Prior Authorization Requirements

A Group 4 PMD may be considered for prior authorization for rental or purchase when all the following criteria are met:

- In addition to using the PMD in the home, the client will routinely use the PMD for MRADLs outside the home.
- The client will routinely use the PMD on rough, unpaved or uneven surfaces.
- The client will encounter obstacles in excess of 2.25 inches.
- The client has a documented medical need for a feature that is not available on a lower level PMD.

Documentation Requirements

The submitted documentation for a Group 4 PMD must include a completed assessment that is signed and dated by a physician or a licensed occupational or physical therapist and includes the following:

- A description of the environment where the PMD will be used in the routine performance of MRADLs.
- A listing of the MRADLs that would be possible with the use of a Group 4 PMD that would not be possible without the Group 4 PMD.
- The distance the client is expected to routinely travel on a daily basis with the Group 4 PMD.

***Note:** The enhanced features found on a Group 4 PMD must be medically necessary to meet the client's routine MRADL and will not be approved for leisure or recreational activities.*

In addition to meeting criteria for Group 2 through Group 4 PMDs, the submitted documentation of medical necessity must demonstrate that the client requires the requested power option (e.g., the need for a power recline or tilt in space, or a combination power tilt and power recline), the no-power option, single-power option, or multiple-power option as defined in subsection 2.2.15.12, "Power Wheeled Mobility Systems- Group 1 through Group 5" in this handbook.

2.2.15.12.6 Additional Requirements - Group 2 through Group 4 No-Power Option

Group 2 through Group 4 no-power option PMDs must have all the specified basic components and meet all the following requirements:

- Nonexpandable controller
- Incapable of upgrade to expandable controller
- Incapable of upgrade to alternative control devices
- Meets the definition of no-power option
- Accommodates nonpowered options and seating systems (e.g., recline-only backs, manually elevating leg rests [except captains' chairs])

2.2.15.12.7 Group 2 through Group 4 Single-Power Option

Group 2 through Group 4 single-power option PMDs must have all the specified basic components and meet all the following requirements:

- Nonexpandable controller
- Capable of upgrade to expandable controller
- Capable of upgrade to alternative control devices
- Meets the definition of single-power option

2.2.15.12.8 Group 2 through Group 4 Multiple-Power Option

Group 2 through Group 4 multiple-power option PMDs must have all the specified basic components and meet all the following requirements:

- Nonexpandable controller
- Capable of upgrade to expandable controller
- Meets the definition of multiple-power option
- Accommodates a ventilator

2.2.15.12.9 Group 5 PMDs

All Group 5 PMDs must have all the specified basic components and meet all the following requirements:

- Standard integrated or remote joystick
- Nonexpandable controller
- Capable of upgrade to expandable controller
- Seat width - minimum of 5 one-inch options
- Seat depth - minimum of 3 one-inch options
- Seat height - adjustment requirements = 3 inches
- Back height - adjustment requirements minimum of 3 options
- Seat-to-back angle range of adjustment - minimum of 12 degrees
- Accommodates nonpowered options and seating systems
- Accommodates seating and positioning items (e.g., seat and back cushions, headrests, lateral trunk supports, lateral hip supports, medial thigh supports)
- Adjustability for growth (minimum of 3 inches for width, depth, and back height adjustment)

- Special developmental capability (i.e., seat to floor, standing, etc.)
- Drive wheel suspension to reduce vibration
- Length - less than or equal to 48 inches
- Width - less than or equal to 34 inches
- Minimum top end speed - 4 mph
- Minimum range - 12 miles
- Minimum obstacle climb - 60 mm
- Dynamic stability incline - 9 degrees
- Passed crash test

Prior Authorization Requirements

A Group 5 pediatric PMD may be considered for prior authorization for rental or purchase when all the following criteria are met:

- The client weighs less than 125 pounds.
- The client is expected to grow in height.
- The client may require growth of up to 5 inches in width.
- The client may require a change in seat to floor height up to 3 inches.
- The client may require a seat to back angle range of adjustment in excess of 12 degrees.
- The client requires special developmental capability (i.e., seat to floor, standing, etc.).

2.2.15.12.10 Group 5 Single-PMDs

A group 5 single-power option PMD must have all the specified basic components and have the capability to accept and operate a power tilt or recline or seat elevation system, but not a combination power tilt and recline seating system, and may be able to accommodate power elevating leg rests, or seat elevator, in combination with a power tilt or power recline.

Prior Authorization Requirements

A Group 5 pediatric PMD with single power option may be considered for prior authorization for rental or purchase when all the following criteria are met:

- The client meets criteria for a Group 5 PMD.
- The client requires a drive control interface other than a hand or chin-operated standard proportional joystick (examples include but are not limited to head control, sip and puff, or switch control).

2.2.15.12.11 Group 5 Multiple-PMDs

Group 5 multiple-power option PMD must have all the specified basic components and meet all the following requirements:

- Has the capability to accept and operate a combination power tilt and recline seating system, and may also be able to accommodate power elevating leg rests, or a power seat elevator.
- Accommodates a ventilator.

Prior Authorization Requirements

A Group 5 pediatric PMD with multiple power option may be considered for prior authorization for rental or purchase when the following criteria are met:

- The client meets criteria for a Group 5 PMD.

- The client requires a drive control interface other than a hand or chin-operated standard proportional joystick (examples include but are not limited to head control, sip and puff, switch control).
- The client has a documented medical need for a power tilt and recline seating system and the system is being used on the wheelchair or the client uses a ventilator which is mounted on the wheelchair.

2.2.15.13 Wheelchair Ramp-Portable and Threshold

Portable and threshold ramps are a benefit of Texas Medicaid.

A portable ramp is defined as a unit that is able to be carried as needed to access a home, weighs no more than 90 pounds, or measures no more than 10 feet in length. A threshold ramp is defined as a unit that provides access over elevated thresholds.

One portable ramp and one threshold ramp for wheelchair access may be considered for prior authorization when documentation supports medical necessity. The following documentation supporting medical necessity is required:

- The date of purchase and serial number of the client's wheelchair or documentation of a wheelchair request being reviewed for purchase
- Diagnosis with duration of expected need
- A diagram of the house showing the access points with the ground-to-floor elevation and any obstacles

Ramps may be considered for rental for short term disabilities and for purchase for long term disabilities. Mobility aid lifts for vehicles and vehicle modifications are not a benefit of Texas Medicaid.

2.2.15.14 Power Elevating Leg Lifts

A power elevation feature involves a dedicated motor and related electronics with or without variable speed programmability, which allows the leg rest to be raised and lowered independently of the recline and/or tilt of the seating system. It includes a switch control which may or may not be integrated with the power tilt and/or recline control(s).

2.2.15.14.1 Prior Authorization

Power elevating leg lifts may be prior authorized for clients who have compromised upper extremity function that limits the client's ability to use manual elevating leg rests. The client must meet criteria for a PMD with a reclining back and at least one of the following:

- The client has a musculoskeletal condition such as flexion contractures of the knees and legs, or the placement of a brace that prevents 90-degree flexion at the knee.
- The client has significant edema of the lower extremities that requires elevating the client's legs.
- The client experiences hypotensive episodes that require frequent positioning changes.
- The client needs power tilt-and-recline and is required to maintain anatomically correct positioning and reduce exposure to skin shear.

2.2.15.14.2 Documentation Requirements

The submitted documentation must include an assessment completed, signed, and dated by a physician or a licensed occupational or physical therapist that includes the following:

- A description of the client's current level of function without the device
- Documentation that identifies how the power elevating leg lifts will improve the client's function
- A list of MRADLs the client will be able to perform with the power elevating leg lifts that the client is unable to perform without the power elevating leg lifts and how the device will increase independence

- The duration of time the client is alone during the day without assistance
- The client's goals for use of the power elevating leg lifts

2.2.15.15 Power Seat Elevation System

A power seat elevation system is used to raise and lower the client in their seated position without changing the seat angles to provide varying amounts of added vertical access.

The use of a power seat elevation system will:

- Facilitate independent transfers, particularly uphill transfers, to and from the wheelchair, and
- Augment the client's reach to facilitate independent performance of MRADLs in the home.

2.2.15.15.1 Prior Authorization

A power seat elevation system may be prior authorized to promote independence in a client who meets all of the following criteria:

- The client does not have the ability to stand or pivot transfer independently.
- The client requires assistance only with transfers across unequal seat heights, and as a result of having the power seat elevation system, the client will be able to transfer across unequal seat heights unassisted.
- The client has limited reach and range of motion in the shoulder or hand that prohibits independent performance of MRADLs (such as, dressing, feeding, grooming, hygiene, meal preparation, and toileting).

2.2.15.15.2 Documentation Requirements

The submitted documentation must include an assessment completed, signed, and dated by a physician or a licensed occupational or physical therapist that includes the following:

- A description of the client's current level of function without the device
- Documentation that identifies how the power seat elevation system will improve the client's function
- A list of MRADLs the client will be able to perform with the power seat elevation system that the client is unable to perform without the power seat elevation system and how the device will increase independence
- The duration of time the client is alone during the day without assistance
- The client's goals for use of the power seat elevation system

***Note:** A power seat elevation system option will not be authorized for the convenience of a caregiver, or if the device will not allow the client to become independent with MRADLs and transfers.*

2.2.15.16 Seat Lift Mechanisms

A medically necessary seat lift mechanism is one that operates smoothly, can be controlled by the client, and effectively assists the client in standing up and sitting down without other assistance.

The payment for a recliner or chair with the incorporated seat lift mechanism is limited to the amount of the seat lift mechanism.

2.2.15.16.1 Prior Authorization

A seat lift mechanism may be prior authorized for clients who meet all the following criteria:

- The client must have severe arthritis of the hip or knee or have a severe neuromuscular disease.
- The seat lift mechanism must be a part of the physician's course of treatment and be prescribed to correct or ameliorate the client's condition.

- Once standing, the client must have the ability to ambulate.
- The client must be completely incapable of standing up from a regular armchair or any chair in their home.

Note: *The fact that a client has difficulty or is even incapable of getting up from a chair, particularly a low chair, is not sufficient justification for a seat lift mechanism. Almost all clients who are capable of ambulating can get out of an ordinary chair if the seat height is appropriate and the chair has arms.*

Seat lift mechanisms are limited to those types that operate smoothly, can be controlled by the client, and can effectively assist a client in standing up and sitting down without other assistance. A seat lift operated by a spring release mechanism with a sudden, catapult-like motion and jolts the client from a seated to a standing position is not a benefit of Texas Medicaid.

2.2.15.16.2 Documentation Requirements

The submitted documentation must include an assessment completed, signed, and dated by a physician or a licensed occupational or physical therapist that includes the following:

- A description of the client's current level of function without the device
- Documentation that identifies how the seat lift mechanism will improve the client's function
- A list of MRADLs the client will be able to perform with the seat lift mechanism that the client is unable to perform without the seat lift mechanism and how the device will increase independence
- The duration of time the client is alone during the day without assistance
- The client's goals for use of the seat lift mechanism

Supporting documentation must be kept in the client's record that shows that all appropriate therapeutic modalities (such as medication, physical therapy) have been tried and that they failed to enable the client to transfer from a chair to a standing position.

2.2.15.17 Batteries and Battery Charger

A battery charger and initial batteries are included as part of the purchase of a PMD. Replacement batteries or a replacement battery charger may be considered for reimbursement if they are no longer under warranty.

A maximum of one hour of labor may be considered to install new batteries. Labor is not reimbursed with the purchase of a new PMD or with replacement battery chargers.

2.2.15.17.1 Prior Authorization

Batteries and battery chargers will not be prior authorized for replacement within six months of delivery. Batteries and battery chargers within the first six months after delivery are considered part of the purchase price.

A maximum of one hour of labor may be prior authorized to install new batteries. Labor will not be prior authorized for a new power wheelchair or for replacement battery chargers.

2.2.15.17.2 Documentation Requirements

To request prior authorization for replacement batteries or a replacement battery charger, the provider must document the date of purchase and serial number of the currently owned wheelchair as well as the reason for the replacement batteries or battery charger.

Documentation required supporting the need to replace the batteries or battery charger must include:

- Why the batteries are no longer meeting the client's needs, or
- Why the battery charger is no longer meeting the client's needs

2.2.15.18 Power Wheeled Mobility Systems- Scooter

A scooter is a professionally manufactured three- or four-wheeled motorized base operated by a tiller with a professionally manufactured basic seating system for clients who have little or no positioning needs.

A scooter must meet all the following requirements:

- Length- less than or equal to 48 inches
- Width- less than or equal to 28 inches
- Minimum top end speed- 3 mph
- Minimum range- 5 miles
- Minimum obstacle climb- 20 mm
- Radius pivot turn of less than or equal to 54 inches
- Dynamic stability incline- 6 degrees

Custom seating for scooters is not a benefit of Texas Medicaid Title XIX Home Health Services. Repairs to scooters will be considered only for a scooter purchased by the Texas Medicaid.

2.2.15.18.1 Prior Authorization

A scooter may be prior authorized for ambulatory-impaired clients with good head, trunk, and arm/hand control, without a diagnosis of progressive illness (including, but not limited to, progressive neuromuscular diseases such as amyotrophic lateral sclerosis [ALS]).

To request prior authorization for a scooter, the client must not own, or be expected to require, a power wheelchair within five years of the purchase of a scooter.

A scooter may be prior authorized for a short-term rental or an initial three-month trial rental period based on documentation supporting the medical necessity and appropriateness of the device.

Assessment of the accessibility of the client's residence must be completed and included in the prior authorization documentation to ensure that the scooter is usable in the home (i.e., doors and halls wide enough, no obstructions).

A scooter must be able to accommodate a 20 percent change in the client's height and/or weight.

2.2.15.18.2 Documentation Requirements

Prior authorization for a scooter requires all the documentation required for a standard power wheelchair and meets all the following criteria:

- The client's physical and cognitive ability to receive and follow instructions related to the responsibilities of using the equipment.
- The ability of the client to physically and cognitively operate the scooter independently.
- The capability of the client to care for the scooter and understand how it operates.

2.2.15.19 Client Lift

A lift is a portable transfer system used to move a nonambulatory client over a short distance from bed to chair and chair to bed.

A client lift for the convenience of a caregiver is not a benefit of Texas Medicaid.

A hydraulic lift is for a client who is unable to assist in their own transfers and is operated by the weight or pressure of a liquid.

An electric lift is operated by electricity and may be considered when a hydraulic lift will not meet the client's needs.

Note: Portable lifts that can be used outside the home setting, hydraulic or electric, are not a benefit through Title XIX Home Health Services. For clients who are birth through 20 years of age, portable lifts that can be used outside the home setting may be considered through CCP.

2.2.15.19.1 Prior Authorization

A client lift will not be prior authorized for the convenience of a caregiver.

A client limit must be able to accommodate a 20 percent change in the client's height and/or weight.

2.2.15.20 Electric Lift

Prior authorization for an electric lift may be considered when the client meets criteria for a hydraulic lift and additional documentation explains why a hydraulic lift will not meet the client's needs.

Note: Portable lifts that can be used outside the home setting, hydraulic or electric, are not a benefit through Title XIX Home Health Services. For clients who are birth through 20 years of age, portable lifts that can be used outside the home setting may be considered through CCP.

2.2.15.21 Hydraulic Lift

Hydraulic lifts require prior authorization.

2.2.15.21.1 Documentation Requirements

Prior authorization for a hydraulic lift may be considered with the following documentation:

- The inability of the client to assist in their own transfers
- The weight of the client and the weight capacity of the requested lift
- The availability of a caregiver to operate the lift
- Training by the provider to the client and the caregiver on the safe use of the lift

2.2.15.22 Standers

A stander is a device used by a client with neuromuscular conditions who is unable to stand alone. Standers and standing programs can improve digestion, increase muscle strength, decrease contractures, increase bone density, and minimize decalcification (this list is not all inclusive).

2.2.15.22.1 Prior Authorization

Standers, including all accessories, require prior authorization. Standers and gait trainers will not be prior authorized for a client within one year of each other.

2.2.15.22.2 Documentation Requirements

Prior authorization may be considered for the standers with the following documentation:

- Diagnoses relevant to the requested equipment, including functioning level and ambulatory status
- Anticipated benefits of the equipment
- Frequency and duration of the client's standing program
- Anticipated length of time the client will require this equipment
- Client's height, weight, and age
- Anticipated changes in the client's needs, anticipated modifications, or accessory needs, as well as the growth potential of the stander

2.2.15.23 Gait Trainers

Gait trainers are devices with wheels used to train clients with ambulatory potential. They provide the same benefits as the stander, in addition to assisting with gait training.

2.2.15.23.1 Prior Authorization

Prior authorization for a gait trainer may be considered with documentation supporting medical necessity and an assessment of the accessibility of the client's residence to ensure that the gait trainer is usable in the home (i.e., doors and halls are wide enough and have no obstructions), when a physician familiar with the client documents that the client has ambulatory potential and will benefit from a gait training program, and when the client meets the criteria for a stander.

2.2.15.24 Accessories, Modifications, Adjustments and Repairs

Accessories, modifications, adjustments, and repairs are benefits of Texas Medicaid as outlined below.

- All modifications, adjustments, and repairs to standard mobility aid equipment within the first six months after delivery are considered part of the purchase price.
- All modifications and adjustments to a wheeled mobility system, as well as the associated services by the QRP for the seating assessment and fitting, within the first six months after delivery are considered part of the purchase price.

Mobility aids that have been purchased are anticipated to last a minimum of five years.

A major modification to a wheeled mobility system requires the completion of a new seating assessment by a qualified practitioner (physician, occupational therapist, or physical therapist), with the participation of a QRP.

Prior authorization for equipment replacement is considered within five years of equipment purchase when one of the following occurs:

- There has been a significant change in the client's condition such that the current equipment no longer meets the client's needs.
- The equipment is no longer functional and either cannot be repaired or it is not cost-effective to repair.

A wheeled mobility system that has been fitted and delivered to the client's home by a QRP and then found to be inappropriate for the client's condition will not be eligible for an upgrade, replacement, or major modification within the first six months following purchase unless there has been a significant change in the client's condition. The significant change in the client's condition must be documented by a physician familiar with the client.

2.2.15.24.1 Prior Authorization

Modifications

Modifications to custom equipment after the first six months from fitting and delivery may be considered for prior authorization if a change occurs in the client's needs, capabilities or physical/mental capability, that cannot be anticipated.

Documentation supporting the medical necessity of the requested modification must include the following:

- Description of the change in the client's condition that requires accommodation by different seating, drive controls, electronics, or other mobility base components.
- All projected changes in the client's mobility needs.
- The date of purchase, the serial number of the current equipment, and the cost of purchasing new equipment versus modifying current equipment.

Major modifications to a wheeled mobility system also require that a new seating assessment be completed and submitted with the prior authorization request. A request for authorization of the QRP's participation in the seating assessment for the major modification must be included with the prior authorization request for the major modification.

Minor modifications to a wheeled mobility system do not require the completion of a new seating assessment.

Requests for equipment submitted as a minor modification to a wheeled mobility system must be submitted with modifier RB.

Adjustments

Adjustments within the first six months after delivery, including adjustments to a wheeled mobility system within the first six months after fitting and delivery by a QRP will not be prior authorized.

A seating or positioning component alteration that does not require replacement components to accommodate a change in the client's size (height or weight) is considered an adjustment and not a major modification.

A maximum of one hour of labor for adjustments may be prior authorized as needed after the first six months from delivery.

Documentation must include the date of purchase, the serial number of the current equipment, and the reason for adjustments.

Repairs

Repairs to client-owned equipment may be considered for prior authorization as needed with documentation of medical necessity. Technician fees are considered part of the cost of the repair.

HHSC or its designee reserves the right to request additional documentation about the need for repairs when there is evidence of abuse or neglect to equipment by the client, client's family, or caregiver. Requests for repairs when there is documented proof of abuse or neglect will not be authorized.

Requests for equipment submitted as a repair to a wheeled mobility system must be submitted with modifier RB.

Providers are responsible for maintaining documentation in the client's medical record specifying the repairs and supporting medical necessity.

Documentation must include the date of purchase and serial number of the current equipment, the cause of the damage or need for repairs, the steps the client or caregiver will take to prevent further damage if repairs are due to an accident, and when requested, the cost of purchasing new equipment as opposed to repairing current equipment.

2.2.15.25 Replacement

Replacement of equipment is also considered when loss or irreparable damage has occurred. The following must be submitted with the prior authorization request:

- A copy of the police or fire report, when appropriate.
- A statement about the measures to be taken in order to prevent reoccurrence.
- Replacement equipment for clients who are birth through 20 years of age and do not meet the criteria in this handbook may be considered for prior authorization through CCP.

2.2.15.26 Procedure Codes and Limitations for Mobility Aids

Procedure Code	Maximum Limit
Canes

The following mobility aids are not a benefit of Home Health Services:

- Feeder seats, floor sitters, corner chairs, and travel chairs are not considered medically necessary devices
- Items including but not limited to tire pumps, a color for a wheelchair, gloves, back packs, and flags are not considered medically necessary
- Mobile standers, power standing system on a wheeled mobility device
- Vehicle lifts and modifications
- Permanent ramps, vehicle ramps, and home modifications
- Stairwell lifts of any type
- Elevators or platform lifts of any type
- Patient lifts requiring attachment to walls, ceilings, or floors
- Chairs with incorporated seat lifts
- An attendant control, for safety, all power chairs are to include a stop switch
- Powered mobility device for use only outside the home

Texas Medicaid does not reimburse separately for associated DME charges, including battery disposal fees or state taxes. Reimbursement for associated charges is included in the reimbursement for the specific piece of equipment. White canes for the blind are considered self help adaptive aids and are not a benefit of Home Health Services.

Note: THSteps-eligible clients who have a medical need for services beyond the limits of this Home Health Services benefit may be considered under CCP.

Refer to: Subsection 2.2.1.1, “Client Eligibility” in this handbook.

2.2.16 Nutritional (Enteral) Products, Supplies, and Equipment

Enteral nutritional products are those food products that are included in an enteral treatment protocol. They serve as a therapeutic agent for health maintenance and are required to treat an identified medical condition. Nutritional products, supplies, and equipment may be a benefit when provided in the home under Home Health Services.

2.2.16.1 Enteral Nutritional Products, Feeding Pumps, and Feeding Supplies

Enteral nutritional products and related feeding supplies and equipment are a benefit through Home Health Services for clients who are 21 years of age and older and require tube feeding as their primary source of nutrition. The enteral product, supply, or equipment must be part of the medical POC outlined and maintained by the treating physician.

Enteral nutritional products may be reimbursed with the following procedure codes:

Procedure Codes								
B4100	B4104	B4149	B4150	B4152	B4153	B4154	B4155	B4157

Enteral nutritional supplies and equipment may be reimbursed with the following procedure codes and limitations:

Procedure Codes	Limitations
A4322	4 per month
A5200	2 per month
B4034	Up to 31 per month
B4035	Up to 31 per month
B4036	Up to 31 per month
B4081	As needed
B4082	As needed
B4083	As needed
B4087	2 per rolling year
B4088	2 per rolling year
B9000	1 purchase every 5 years; 1-month rental
B9002	1 purchase every 5 years; 1-month rental
B9998*	As needed*
B9998 with modifier U1	4 per month
B9998 with modifier U2	2 per rolling year
B9998 with modifier U3	4 per month
B9998 with modifier U5	4 per month
T1999*	As needed* If procedure code T1999 is used for a needleless syringe, the allowed amount is 8 per month.
* Appropriate limitations for miscellaneous procedure codes B9998 and T1999 are determined on a case-by-case basis through prior authorization. Specific items may be requested using procedure code B9998 using the modifiers outlined in the table above.	

A backpack or carrying case for a portable enteral nutrition infusion pump may be a benefit of Home Health Services, when medically necessary and prior authorized, using procedure code B9998.

2.2.16.2 Prior Authorization Requirements

Prior authorization is required for most enteral products, supplies, and equipment provided through Home Health Services. Requests are reviewed for medically necessary amounts based on caloric needs as indicated by the client's physician.

Enteral nutrition and related supplies and equipment may be considered for prior authorization for clients who are 21 years of age and older when all or part of the client's nutritional intake is received through a feeding tube, and the enteral formula is:

- The client's sole source of nutrition
- The client's primary source of nutrition
 - An enteral tube feeding is considered the primary source of nutrition when it comprises more than 70 percent of the caloric intake needed to maintain the client's weight.

- The percent of calories provided by an enteral formula may be calculated by dividing the client’s daily calories supplied by the enteral formula by the daily caloric intake ordered by the physician to maintain the client’s weight. The result is multiplied by 100 to determine the percentage of calories provided by the enteral formula.

Related supplies and equipment may be considered for prior authorization when criteria for nutritional products are met, and medical necessity is included for each item requested.

Renewal of the prior authorization will be considered based on medical necessity.

Prior authorization may be given for up to 6 months. Prior authorization may be recertified with documentation supporting ongoing medical necessity for the nutritional products requested.

2.2.16.2.1 Enteral Formulas

Enteral formulas require prior authorization. Requests for prior authorization must include the necessary product information.

Enteral formulas consisting of semi-synthetic intact protein or protein isolates (procedure codes B4150 and B4152) are appropriate for the majority of clients requiring enteral nutrition.

Special enteral formulas or additives (procedure code B4104) may be considered for prior authorization with supporting documentation submitted by the client’s physician indicating the client’s medical needs for these special enteral formulas. Special enteral formula may be reimbursed with the following procedure codes:

Procedure Codes						
B4149	B4153	B4154	B4155	B4157	B4161	B4162

Pediatric nutritional products (procedure codes B4103, B4158, B4159, B4160, B4161, and B4162) are restricted to clients who are 20 years of age and younger.

Food thickener may be considered for clients with a swallowing disorder.

2.2.16.2.2 Nasogastric, Gastrostomy, or Jejunostomy Feeding Tubes

Feeding tubes require prior authorization.

Additional feeding tubes may be prior authorized if documentation submitted supports medical necessity, such as infection at gastrostomy site, leakage, or occlusion.

2.2.16.2.3 Enteral Feeding Pumps

Enteral feeding pumps, with and without alarms, require prior authorization.

Enteral feeding pumps may be considered for prior authorization for lease or purchase with documentation of medical necessity indicating that the client meets the following criteria:

- Gravity or syringe feedings are not medically indicated
- The client requires an administration rate of less than 100 ml/hr
- The client requires night-time feedings
- The client has one of the following medical conditions (this list is not all-inclusive):
 - Reflux or aspiration
 - Severe diarrhea
 - Dumping syndrome
 - Blood glucose fluctuations
 - Circulatory overload

2.2.16.2.4 Enteral Supplies

Enteral supplies require prior authorization, with the exception of irrigation syringes (procedure code A4322) and percutaneous catheter or tube anchoring devices (procedure code A4520) within the allowable limits.

Procedure code B4034 will not be prior authorized for use in place of procedure code A4322 for irrigation syringes when they are not part of a bolus administration kit.

Gravity bags and pump nutritional containers are included in the feeding supply kits and will not be prior authorized separately.

Specific items may be considered for prior authorization using miscellaneous procedure code B9998 and modifiers U1, U2, U3, or U5.

Requests for a backpack or carrying case for a portable enteral feeding pump may be considered for prior authorization for purchase only, under miscellaneous code B9998, for clients who meet all of the following medical necessity criteria:

- The client requires enteral feedings lasting greater than eight hours continuously, or feeding intervals exceed the time that the client must be away from home to:
 - Attend school or work.
 - Participate in extensive, physician-ordered outpatient therapies.
 - Attend frequent, multiple medical appointments.
- The client is ambulatory, or uses a wheelchair which will not support the use of a portable pump by other means, such as an IV pole.
- The portable enteral feeding pump is client owned.

2.2.16.3 Documentation Requirements

To request prior authorization for nutritional formula, supplies, or equipment, the following documentation must be provided:

- Accurate diagnostic information pertaining to the underlying diagnosis or condition as well as any other medical diagnoses or conditions, to include the client's overall health status
- Diagnosis or condition (including the appropriate *International Classification of Diseases*, Ninth Revision, Clinical Modification [ICD-9-CM] code)
- A statement from the ordering physician noting that enteral nutritional products for tube feedings are the client's sole or primary source of nutrition
- The goals and timelines on the medical POC
- Total caloric intake prescribed by the physician
- Acknowledgement that the client has a feeding tube in place

2.2.17 Phototherapy Devices

Phototherapy devices are not a benefit of Title XIX Home Health Services. Phototherapy devices are a benefit of Texas Medicaid through CCP for clients who are birth through 20 years of age.

Refer to: Subsection 2.6.13, "Phototherapy Devices" in the *Children's Services Handbook (Vol. 2, Provider Handbooks)* for more information on phototherapy devices.

2.2.18 Prothrombin Time/International Normalized Ratio (PT/INR) Home Testing Monitor

PT/INR home testing monitors are a benefit of Title XIX Home Health Services for clients who require chronic oral anticoagulation due to one of the following:

- Mechanical heart valve
- Chronic atrial fibrillation
- Venous thromboembolism (including both deep vein thrombosis [DVT] and pulmonary embolism)
- Ventricular assist device (VAD) awaiting a heart transplant

The PT/INR home testing monitor is a portable, battery-operated instrument for the quantitative determination of PT/INR from whole blood obtained by finger-stick. This product is designed to aid in the management of high-risk clients who take oral anticoagulants.

Note: For clients who are 20 years of age and younger and do not meet criteria for coverage through Title XIX Home Health Services, home PT/INR monitors and related testing supplies may be considered through CCP.

The following procedure codes are included in this benefit:

- Procedure code E1399 may be reimbursed for the rental or purchase of the monitor.
- Procedure code A9900 may be reimbursed for the related testing supplies.

Procedure codes E1399 and A9900 may be reimbursed to home health DME and DME medical supplier providers for services rendered in the home setting.

2.2.18.1 Prior Authorization

Prior authorization is required for the home PT/INR monitors and related testing supplies.

Prior authorization requests must be submitted within three business days of the date of service and must include documentation of medical necessity and a completed Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form.

The completed Title XIX Form must be maintained by the requesting provider and the prescribing provider. The original signature copy must be kept in the provider's medical record for the client.

To avoid unnecessary denials, the prescribing provider must provide correct and complete information, including documentation for medical necessity of the equipment and/or supplies requested. The prescribing provider must maintain documentation of medical necessity in the client's medical record. The requesting provider may be asked for additional information to clarify or complete a request for the PT/INR monitor.

Prior authorization for the rental or purchase of a home PT/INR monitor and related testing supplies will be considered for clients who meet all the following criteria:

- The client is on anticoagulation therapy and has a current prescription for Warfarin or other oral anticoagulant.
- The client has been on anticoagulation therapy for at least three months prior to the request for the home PT/INR monitor.
- The client is required to self-test at least every two weeks.

Additionally, the client must have at least one of the following conditions documented in the request for prior authorization:

- Fluctuations of INR or PT/PTT levels with titration greater than once per week in anticoagulation dosing with copies of laboratory reports and resultant medication changes.

- A medical condition that limits physical movement, places the client under medical restrictions for isolation, or requires non-emergency ambulance transport for the purpose of obtaining laboratory specimens.
- Limited venous access that compromises the ability to obtain laboratory specimens for the adequate monitoring of anticoagulation therapy.

The prior authorization request will be evaluated upon receipt to determine whether the equipment will be rented, purchased, repaired, or modified based on the client’s needs, duration of use, and age of equipment.

Note: Skilled nursing (SN) visits will not be approved for the sole purpose of instructing the client on the use of the PT/INR home testing monitor. Any necessary instruction must be performed as part of the office visit with the prescribing physician.

2.2.19 Respiratory Equipment and Supplies

Respiratory equipment and supplies may be provided in the home under Home Health Services. Rental of equipment includes all necessary supplies, adjustments, repairs, and replacement parts.

Note: Respiratory equipment and related supplies that are not considered a benefit under Home Health Services may be considered for reimbursement through CCP for clients who are 20 years of age and younger, who are CCP eligible (e.g., clients who are residing in residential treatment centers).

2.2.19.1 Prior Authorization

Most respiratory equipment and supplies, with the exception of the codes noted below, require prior authorization.

The following procedure codes do not require prior authorization:

Procedure Codes									
A4481	A4615	A4616	A4617	A4619	A4620	A4623	A7003	A7004	A7005
A7006	A7007	A7009	A7010	A7011	A7012	A7015	A7016	A7017	A7018

Prior authorization is required for rental or purchase of respiratory equipment and supplies not listed above provided through the Texas Medicaid Title XIX Home Health Services. To complete the prior authorization process, the provider should fax the completed Title XIX Form to the Home Health Unit.

- A completed Title XIX Home Health Durable Medical Equipment (DME)/Medical Supplies Physician Order Form prescribing the DME or medical supplies must be signed and dated by the prescribing physician familiar with the client prior to requesting authorization. All signatures must be current, unaltered, original, and handwritten. Computerized or stamped signatures will not be accepted. The completed Title XIX Form must be maintained by the requesting provider and the prescribing physician. The original signature copy must be kept in the physician’s medical record for the client.
- In addition to the Texas Medicaid Title XIX Home Health Durable Medical Equipment (DME)/Medical Supplies Physician Order Form, all other required forms must be signed and dated by the prescribing physician who is familiar with the client before requesting authorization. All signatures must be current, unaltered, original, and handwritten. Computerized or stamped signatures will not be accepted.

Requests for prior authorization or recertification must include documentation by the physician who is familiar with the client that the client is compliant with the use of the equipment and that the treatment is effective.

To avoid unnecessary denials, when requesting prior authorization for respiratory equipment and supplies, the physician must provide correct and complete information, supporting the medical necessity of the equipment or supplies requested, including:

- Diagnosis or condition causing impairment of respiratory function.
- Accurate diagnostic information pertaining to any other medical diagnoses or conditions, to include the clients’s overall health status.

The provider may be asked to provide additional information to clarify or complete a request for respiratory supplies or accessories.

The following includes, but is not limited to, respiratory equipment that require prior authorization:

- IPPB device
- Electrical percussor
- HFCWCS
- Cough stimulating device
- CPAP system
- Bi-level positive airway pressure system without backup (such as BiPAP S)
- Bi-level positive airway pressure system with backup (such as BIPAP ST)
- All home ventilation and humidification equipment
- Home oxygen systems
- Controlled dose inhalation drug delivery system
- Aerosols, humidifiers, and nebulizers to add moisture to air or oxygen

2.2.19.2 Nebulizers

Nebulizers may be reimbursed for purchase only, and that purchase is limited to 1 every 5 years. Providers must use procedure code E0570 when billing for the purchase of the nebulizer.

For fee-for-service, medications that are used with the nebulizer will not be reimbursed to a DME company. These medications may be considered under the Vendor Drug Program.

Refer to: “Appendix B: Vendor Drug Program” (*Vol. 1, General Information*) for more information about VDP.

2.2.19.2.1 Prior Authorization

Nebulizers do not require prior authorization for the diagnoses listed below. Other diagnoses require prior authorization and may be considered based on review of documentation by HHSC or its designee.

Diagnosis Codes									
1363	27700	27701	27702	27703	27709	46611	46619	4801	4803
48242	486	48801	48802	48811	48812	48881	48882	4910	4911
49120	49121	49122	4918	4919	4920	4928	49300	49301	49302
49310	49311	49312	49320	49321	49322	49381	49382	49390	49391
49392	4940	4941	4950	4951	4952	4953	4954	4955	4956
4957	4958	4959	496	5070	5071	5078	5533	7707	

The following nebulizer supplies may be billed with the diagnosis codes listed above:

Procedure Codes									
A4617	A7003	A7004	A7005	A7006	A7007	A7011	A7013	A7015	A7018

Ultrasonic nebulizers do not require prior authorization for diagnoses codes listed with documentation for failure of standard therapy. Providers must use procedure code E0574 or E0575 when billing for the purchase of the ultrasonic nebulizer. The ultrasonic nebulizer may be reimbursed only for diagnosis codes 1363, 27700, 27701, 27702, 27703, and 27709. The ultrasonic nebulizer requires prior authorization for all other diagnoses.

Providers must use procedure code A7009, A7014, or A7016 when billing supplies with an ultrasonic nebulizer.

Procedure codes E0463 and E0464 are used for pressure support ventilators with or without an invasive interface. Providers must include documentation by the physician who is familiar with the client that the client is compliant with the use of the equipment and that the treatment is effective.

2.2.19.3 Vaporizers

Vaporizers may be reimbursed for purchase only, and that purchase is limited to 1 every 5 years.

Providers must use procedure code E0605 when billing for vaporizers. Vaporizer use is associated with a risk of bronchospasm, infection, edema of the airway, and client, caregiver, parent or guardian exposure to airborne microorganisms.

2.2.19.3.1 Prior Authorization

Vaporizers require prior authorization for limited indications that includes one of the following:

- Laryngotracheobronchitis
- Subglottic edema
- Post-extubation edema
- Postoperative management of the upper airway
- The need for sputum specimens or mobilization of secretions
- The presence of a bypass upper airway

Prior authorization for use beyond the clinical indications listed above is only considered with clinical documentation that demonstrates that the benefit of the use of the device outweighs the noted risks.

2.2.19.4 Humidification Units

Humidification units for nonmechanically ventilated clients may be purchased when a purchase is determined to be more cost effective than leasing the device with supplies. Providers must use procedure code E1399 when billing for the purchase of humidification units for nonmechanically ventilated clients. Procedure code E1399 will be reimbursed with a maximum fee of \$1,230.00 or MSRP less 18 percent, which ever is the lesser cost. Supplies to be used with client owned humidification units may be considered for purchase and must be billed with the appropriate HCPCS code for each item requested. Documentation of medical necessity must be included with submission of the request.

2.2.19.5 Secretion Clearance Devices

Secretion clearance devices and incentive spirometers do not require authorization.

2.2.19.5.1 Intermittent Positive-Pressure Breathing (IPPB) Devices

Purchase of the IPPB device (procedure code E0500) is not a benefit.

Rental of an IPPB device (procedure code E0500) requires prior authorization. Prior authorization may be granted when the request is submitted with documentation that indicates an ineffective response with other modalities such as treatment with a cough assist device for four months or longer. Rental of the IPPB device includes all supplies, such as humidification and tubing.

Purchase of the IPPB device will not be reimbursed.

In accordance with the American Association for Respiratory Care recommendations, IPPB may be considered when one of the following is documented:

- Presence of clinically significant atelectasis.
- Reduced pulmonary function as evidenced by reductions in timed volumes, and vital capacity.
- Neuromuscular disorders or kyphoscoliosis with associated decreases in lung volumes and capacities.
- Fatigue or muscle weakness with impending respiratory failure.
- Presence of acute severe bronchospasm or exacerbated COPD that fails to respond to other therapy patients who are at risk for the development of atelectasis and are unable or unwilling to deep breathe without assistance.

The IPPB device may be prior authorized for rental with the following diagnoses:

Diagnosis Codes									
27700	27701	27702	27703	27709	33510	33511	33519	3591	35921
35922	35923	35924	35929	496	514	515	5162	51630	51631
51632	51633	51634	51635	51636	51637	51662	51669	51851	51852
51853									

2.2.19.5.2 Mucous Clearance Valve

Providers must use procedure code S8185 when billing for the purchase of a mucous clearance valve. Purchase of the mucous clearance valve requires prior authorization.

Rental of the mucous clearance valve is not a benefit.

The mucous clearance valve may be prior authorized for the following diagnoses:

Diagnosis Codes									
27700	27701	27702	27703	27709	490	4910	4911	49120	49121
4918	4919	4920	4928	49300	49301	49302	49310	49311	49312
49320	49321	49322	49381	49382	49390	49391	49392	4940	4941
4950	4951	4952	4953	4954	4955	4956	4957	4958	4959
496									

Other diagnoses may be considered based on review of documentation by HHSC or its designee. Hypertonic saline 7 percent for inhalation therapy is a benefit of Texas Medicaid for clients with a diagnosis of cystic fibrosis. Hypertonic saline 7 percent for inhalation therapy may be billed using procedure code T1999 and requires prior authorization. To request prior authorization, providers must submit either the MSRP, the provider's invoice cost, or the AWP. Providers may be reimbursed 82 percent of the MSRP or 85 percent of the AWP per ampoule or the provider's invoice cost if the MSRP is not available.

2.2.19.6 Electrical Percussor

The electrical percussor device requires prior authorization. The electrical percussor may be prior authorized for rental or purchase depending on the physician's predicted length of treatment.

In addition to the completed Title XIX order form, a description of all previous courses of therapy and why they did not adequately assist the client in airway mucus clearance is required to obtain authorization for an electrical percussor.

2.2.19.7 Chest Physiotherapy Devices

Either a cough-stimulating device (cofflator) or the High-Frequency Chest Wall Compression System (HFCWCS) generator with vest may be prior authorized. These systems are not prior authorized simultaneously.

Chest physiotherapy to promote bronchial drainage that is performed by a therapist or any other healthcare professional, including a private duty nurse, will not be prior authorized during the period of time that the HFCWCS or cough-stimulating device is prior authorized.

Intrapulmonary percussive ventilation (IPV) is not a benefit of Texas Medicaid.

2.2.19.7.1 HFCWCS

A HFCWCS may be reimbursed only when it is demonstrated that other mechanical devices or chest physiotherapy by a client, parent, guardian, or caregiver have been ineffective.

Rental cost of the HFCWCS applies toward the purchase price. A HFCWCS generator purchase and vest purchase may be reimbursed only once per lifetime, due to the lifetime warranty provided by the manufacturer. Requests for a vest replacement due to growth may be considered with appropriate documentation.

Prior authorization for the rental or purchase of equipment in this section requires a Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form and the Medicaid Certificate of Medical Necessity for Chest Physiotherapy Device Initial Request or Extended Request form. These signed and dated forms must be maintained by the provider and prescribing physician in the client’s medical record.

Providers must use procedure code E0483 when billing for HFCWCS for either a rental or purchase.

The HFCWCS device may be prior authorized for the following diagnoses.

Diagnosis Codes							
27700	27701	27702	27703	27709	3337	33510	33511
33519	3430	3431	3432	3433	3434	3438	3439
34489	3591	515					

Other diagnoses may be considered base on review of documentation by HHSC or its designee.

Rental of the HFCWCS

The HFCWCS requires prior authorization. An initial three-month rental may be authorized for the HFCWC. If the HFCWC is documented to be effective, at the end of the initial three-month rental, purchase of the system may be prior authorized. If at the end of the initial three-month rental a determination of purchase cannot be made, an additional three month rental may be given.

To obtain prior authorization for the initial three-month rental of a HFCWCS generator and vest, all of the following information must be provided:

- A description of all previous therapy courses that have been tried and why these treatments did not adequately assist the client in airway mucus clearance. This must include the information that the client has used a cough assist device for a minimum of four months before the request and that this therapy has been ineffective.

- A physician's statement of a trial of the HFCWCS in a clinic, hospital, or the home setting documenting the effectiveness and tolerance of the system, including a statement that the client has not exacerbated any gastrointestinal manifestations, nor caused aspiration and exacerbation of pulmonary manifestations, nor an exacerbation of seizure activity secondary to the use of the system.
- Diagnosis and background history including complications, medications used, history of any IV antibiotic therapy with dosage, frequency and duration, history of recent hospitalizations or history of school, work, or extracurricular activity absences due to diagnosis-related complications.
- Any recent illnesses or hospitalizations due to respiratory problems or complications.
- Medical diagnosis or other limitations preventing the client or caregiver from doing chest physiotherapy.

Prior authorization for an extension of another three months rental may be considered with the above documentation.

Purchase of the HFCWCS Generator

Requests for prior authorization of the purchase of a HFCWCS generator may be considered based on the outcome of a six-month rental period and the following required documentation. Documentation of vest tolerance and positive outcomes/results of therapy, including:

- Physician's description or assessment of the effectiveness such as decreased medication use, shorter hospital length of stay, decreased hospitalizations, and fewer school, work, or extracurricular activity absences due to diagnosis related complications.
- The frequency and compliance graphs for the six-month period showing use of the system at least 50 percent of the maximum time prescribed by the physician for each day.
- Respiratory status, including any recent hospitalization.
- A statement that the client has not exacerbated any gastrointestinal manifestations, nor caused aspiration and exacerbation of pulmonary manifestations, nor an exacerbation of seizure activity secondary to the use of the system.

2.2.19.8 Cough-Stimulating Device (Cofflator)

The cough stimulating device requires prior authorization. Prior authorization may be given for monthly rental only. Purchase of the cough stimulating device is not a benefit and will not be considered for prior authorization.

The completed Title XIX Form and the Medicaid Certificate of Medical Necessity for Chest Physiotherapy Devices Initial or Extended form must be maintained by the provider in the client's medical record.

The cough stimulating device (procedure code E0482) may be prior authorized for those clients who have chronic pulmonary disease or neuromuscular disorders that affect the respiratory musculature.

The cofflator may be approved initially for a three-month rental period based on the following required documentation:

- Diagnosis and background history including recent illnesses, complications, medications used, history of recent hospitalizations, results of pulmonary function studies if applicable, or history of school, work, or extracurricular activity absences due to diagnosis related complications.
- Medical reasons why the client, parent, or guardian/caregiver cannot do chest physiotherapy.

Requests for prior authorization of an extension must include documentation by the physician familiar with the client that the client is compliant with the use of the equipment and that the treatment is effective.

2.2.19.8.1 Tracheostomy Tubes

A tracheostomy tube may be reimbursed for purchase only and is limited to one per month. Add modifier TF when billing a tracheostomy with specialized functions. Add modifier TG when billing a custom-made tracheostomy. The MSRP information and a physician statement addressing the reason the client cannot use a standard tracheostomy tube are required when requesting prior authorization. Disposable tracheostomy inner cannulas are considered a convenience item and are not a benefit.

Prior authorization requests for tracheostomy tubes must provide sufficient information to support the determination of medical necessity for the requested item. Prior authorization for a tracheostomy tube will be considered with procedure codes A7520, A7521, or A7522. Providers must use procedure code A4623 when requesting prior authorization for the tracheostomy tube inner cannula. An inner cannula is limited to one per month and will not be prior authorized when a custom manufactured tracheostomy tube (procedure code A7520-TG or A7521-TG) is requested.

2.2.19.9 Positive Airway Pressure System Devices

In addition to the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form, a Medicaid Certificate of Medical Necessity for CPAP/BiPAP or Oxygen Therapy Form must be signed and dated by the physician familiar with the client and submitted by the provider for all positive pressure system devices. The original signed copy must be kept in the medical record.

2.2.19.9.1 Heated and Non-heated Humidification For Use With Positive Airway Pressure System

Humidification devices require prior authorization. Documentation of medical necessity including the diagnosis and expected outcome must be submitted with the request for prior authorization.

2.2.19.9.2 Continuous Positive Airway Pressure (CPAP) System

Purchase is limited to a maximum of once every five years with medical necessity. Reimbursement for rental is limited to once per month and includes all supplies and accessories.

Headgear, tubing, and filters are considered part of the rental and will not be reimbursed separately.

Providers must use procedure code E0601 when requesting prior authorization for the rental or purchase of the CPAP system.

Adult CPAP (19 years of age and older)

CPAP may be approved initially for three months for adults if one of the following conditions are met:

- A Sleep Study Respiratory Disturbance Index (RDI) or Apnea/Hypopnea Index (AHI) greater than or equal to 15 per hour
- A Sleep Study RDI or AHI greater than 5 per hour and at least one of the following:
 - Excessive daytime sleepiness (documented by either Epworth greater than 10 or multiple sleep latency test (MSLT) less than 6
 - Documented symptoms of impaired cognition, mood disorders, or insomnia
 - Documented hypertension (systolic blood pressure greater than 140 mm Hg or diastolic blood pressure greater than 90 mm Hg)
 - Documented ischemic heart disease
 - Documented history of stroke
 - Greater than 20 episodes of oxygen desaturation less than 85 percent during a full night sleep study
 - Any one episode of oxygen desaturation less than 70 percent

Pediatric CPAP Criteria

One of the following AHI or oxygen saturation levels may be used for clients who are 18 years of age and younger:

- Polysomnography documentation AHI greater than 1
- An oxygen saturation less than 92 percent, taken upon exertion breathing room air

2.2.19.9.3 Prior Authorization

The CPAP system requires prior authorization and may be prior authorized for rental or purchase depending on the physician's predicted length of treatment. Headgear, tubing, and filters used with patient owned positive airway pressure devices require prior authorization. Humidifiers may be prior authorized when used with a CPAP with documentation of medical necessity. Clients who have a current prior authorization for a CPAP/BiPAP S may continue to rent these items until the prior authorization period expires. After the current prior authorization period expires, then the criteria in the following paragraph applies to any further prior authorizations of CPAP/BiPAP. Providers must supply a new CPAP/BiPAP to clients at the beginning of the new prior authorization period.

The CPAP system may be approved initially for a three-month rental period based on documentation supporting the medical necessity and appropriateness of the device.

CPAP Prior Authorization Renewal

Prior authorization for purchase after the initial three-month rental period may be granted if the client is continuing to use the equipment at a minimum of four hours per night and symptoms are improved as documented by a physician familiar with the client. This documentation of compliance and effectiveness must be provided with a new completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form and a Medicaid Certificate of Medical Necessity for CPAP/BiPAP or Oxygen Therapy form. Rental of a CPAP/BiPAP system includes all supplies. CPAP/BiPAP S may be rented up to a maximum of 13 months. The equipment is considered purchased after 13 months rental.

2.2.19.9.4 Bi-level Positive Airway Pressure System (BiPAP S) Without Backup

Purchase is limited to a maximum of once every five years with medical necessity. Reimbursement for rental is limited to once per month and includes all supplies.

Providers must use procedure code E0470 when requesting prior authorization for the rental or purchase of the BiPAP S.

The BiPAP S may be approved initially for a three-month rental period based on documentation supporting the medical necessity and appropriateness of the device.

The BiPAP S may be approved initially for three months if the following conditions are met:

- The client has demonstrated the inability to tolerate the CPAP system.
- The duration of symptoms is at least six months.
- The Sleep Study RDI or AHI is greater than 15 per hour.
- The Sleep Study RDI or AHI greater than 10 per hour with the lowest oxygen saturation during study is less than 80 percent.
- Oxygen saturation is equal to or less than 92 percent for clients who are 20 years of age and younger.

Rental of CPAP/BiPAP S includes all supplies. CPAP/BiPAP S may be rented up to a maximum of 13 months. The equipment is considered purchased after 13 months rental.

Prior Authorization

The BiPAP S requires prior authorization and may be reimbursed for rental or purchase depending on the physician's predicted length of treatment. The BiPAP S will not be prior authorized once a CPAP is purchased. Clients who have a current prior authorization for a CPAP/BiPAP S may continue to rent these items until the prior authorization period expires. After the current prior authorization period expires, then the criteria in the following paragraph applies to any further prior authorizations of CPAP/BiPAP. Providers must supply a new CPAP/BiPAP to clients at the time of purchase, if the item is purchased after a rental period.

Prior authorization for purchase after the initial three-month rental period may be granted if the client is continuing to use the equipment at a minimum of four hours per night and symptoms are improved as documented by a physician familiar with the client. This documentation of compliance and effectiveness must be provided with a new completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form and a Medicaid Certificate of Medical Necessity for CPAP/BiPAP or Oxygen Therapy form.

2.2.19.9.5 Bi-level Positive Airway Pressure System With Backup (BiPAP ST)

Purchase of a BiPAP ST is not a benefit. The BiPAP ST may be approved initially for a three-month rental period based on documentation supporting the medical necessity and appropriateness of the device. Providers must use either procedure code E0471 or E0472 when requesting prior authorization for the rental of the BiPAP ST.

BiPAP ST may be approved initially for three months if the following conditions are met:

- A diagnosis of central sleep apnea or a neuromuscular disease producing respiratory insufficiency, *and*
- Sleep study records central apnea greater than 5 RDI or AHI per hour, *or*
- For clients who are 18 years of age and younger with:
 - Central apneas greater than 20 seconds regardless of bradycardia
 - Desaturation or central apneas of less than 20 seconds with desaturation greater than 4 percent
 - Bradycardia
- The client has an arterial PO₂ at or below 56 mm Hg, or an arterial oxygen saturation at or below 89 percent by transcutaneous oximetry associated with a diagnosis of neuromuscular respiratory insufficiency or failure (not COPD).

2.2.19.9.6 Prior Authorization

The rental of a BiPAP ST requires prior authorization and may be reimbursed only once per month.

Continued prior authorization for rental after the initial three-month rental period may be granted if the client is continuing to use the equipment at a minimum four hours per night and has a transcutaneous saturation greater than 88 percent while using the equipment as documented by a physician familiar with the client or 92 percent or less for clients who are 20 years of age and younger. This documentation of compliance and effectiveness must be provided with the above documentation plus a new completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form and a Medicaid Certificate of Medical Necessity for CPAP/BiPAP or Oxygen Therapy form.

2.2.19.10 Home Mechanical Ventilation Equipment

Continuous use ventilators are used for 12 or more hours per day. Intermittent use ventilators are used for less than 12 hours per day. Mechanical ventilation is either provided by positive pressure ventilation (volume ventilator) or negative pressure ventilation (iron lung).

Prior Authorization

All ventilators require prior authorization. The completed, signed, and dated Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form must specify all ventilator settings and must be maintained by the DME provider and the prescribing physician in the client's medical record.

Volume Ventilators

A volume ventilator may be operated in any of the following:

Ventilation Modes

- Control
- Assist control
- Synchronized intermittent mandatory ventilation (SIMV)
- CPAP

Breath Types

- Spontaneous (client triggered and cycled)
- Ventilator assisted (client or machine triggered or cycled) (e.g., pressure support or pressure-assisted)
- Mandatory (machine triggered or machine cycled)

The monthly ventilator rental includes all ventilator supplies, such as (but not limited to):

- Internal filters
- External filters
- Ventilator circuits with an exhalation valve
- High and low pressure alarms
- All humidification systems including supplies and solutions (i.e., sterile or distilled water)
- Compressors and supplies
- Tracheostomy filters/heat moisture exchangers
- Humidifiers

Note: *Oxygen rental is not considered a ventilator supply and may be considered for separate prior authorization.*

Procedure code E0450 is used when requesting prior authorization for the rental of a volume ventilator. Prior authorization may be granted for clients who have a tracheostomy. For all ventilator procedure codes, providers must include documentation by the physician who is familiar with the client, which states that the client is compliant with the use of the equipment and that the treatment is effective.

Refer to: Subsection 2.2.19.13, "Procedure Codes and Limitations for Respiratory Equipment and Supplies" in this handbook for additional information about ventilator procedure codes.

2.2.19.10.1 Negative Pressure Ventilators

The ventilator rental includes all component parts (pillow, mattress, gaskets, etc.).

Providers must use procedure code E0460 when requesting prior authorization for the rental of a negative pressure ventilator.

Application devices may be purchased following the initial three-month rental period depending on the physician's predicted length of treatment and the client's compliance.

The purchase of a chest shell (cuirass) and chest wrap is limited to a maximum of 1 every 5 years. Reimbursement for rental is limited to once per month for a total of 4 months.

Prior Authorization

Negative pressure ventilators may be prior authorized for rental only for individuals who have the ability to speak, eat, drink, and do not have a tracheostomy. One of the following devices may be prior authorized with a portable negative pressure ventilator using procedure codes E0457 and E0459. These devices may be reimbursed for an initial three-month rental period. Application devices may be prior authorized for rental of an initial period of three months.

2.2.19.10.2 Ventilator Service Agreement

A ventilator service agreement may be reimbursed only once per month. Providers must use procedure code A9900 when requesting the ventilator service agreement. The ventilator service agreement contract may be considered for renewal every six months.

The provider must agree to include all of the following components in the ventilator service agreement:

- Ensure that all routine service procedures as outlined by the ventilator manufacturer are followed
- Provide all internal filters, external filters, and tracheostomy filters
- Provide all ventilator circuits (with the exhalation valve) as a part of the ventilator service agreement
- Provide a respiratory therapist and back-up ventilator on a 24-hour call basis
- Provide monthly home visits by a certified respiratory therapist to verify proper functioning of the ventilator system and the client's status (and maintain documentation of monthly visits)
- Provide a substitute ventilator while the manufacturer's recommended preventive maintenance is being performed on the client-owned ventilator

Prior Authorization

A ventilator service agreement may be prior authorized for a client who owns their own ventilator, when documentation supports medical necessity/appropriateness for continued ventilator usage. A ventilator service agreement requires prior authorization, which must include submission of a completed Title XIX form and the ventilator service agreement. The completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form must include all ventilator settings.

The completed, signed, and dated Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form and the Ventilator Service Agreement form must be maintained by the provider and the prescribing physician in the client's medical record. The client-owned ventilator must be functional at the time of the request for prior authorization and documentation must include the make, model number, serial number, and the date of ventilator purchase and all ventilator settings. Requests for a continued six-month prior authorization of a ventilator service agreement must include the above documentation and the following:

- The recommended preventive maintenance schedule for the ventilator make and model
- Documentation of the monthly ventilator and client assessments
- Documentation of all service performed during the previous service agreement

2.2.19.11 Oxygen Therapy

Oxygen therapy home delivery systems may be reimbursed for rental only once per month.

Moisture exchangers for use with non-mechanically ventilated clients may be considered for reimbursement when billed with procedure code A9900.

Rental of oxygen equipment includes all supplies and refills.

One of the following clinical indications must be present when requesting approval for in-home oxygen therapy:

- Bronchopulmonary dysplasia and other respiratory diagnoses due to prematurity.
- Respiratory failure or insufficiency.
- Musculoskeletal weakness, such as that caused by Duchenne's or spinal muscle atrophy.
- Diagnosis of cluster headaches.
- Hypoxemia-related symptoms and findings that might be expected to improve with oxygen therapy (examples of these symptoms and findings are pulmonary hypertension, recurring congestive heart failure due to chronic cor pulmonale, erythrocytosis, impairment of the cognitive process, nocturnal restlessness, and morning headache).
- Severe lung disease, such as COPD, diffuse interstitial lung disease, whether known or unknown etiology such as cystic fibrosis, bronchiectasis or widespread pulmonary neoplasm.

2.2.19.11.1 Oxygen Therapy Home Delivery System

Providers must use procedure code E1390 when billing for the rental of an oxygen concentrator system. The reimbursement payment for the rental of the oxygen concentrator system includes, but is not limited to, cannula or mask, tubing, and humidification. These items will not be reimbursed separately.

If other types of oxygen therapy home delivery systems are required, documentation of medical necessity exception must be provided.

Other types of delivery systems include:

- Compressed gas cylinder systems (nonportable tanks) (procedure code E0424)
- Liquid oxygen reservoir systems (procedure code E0439)
 - Note: The reimbursement for compressed gas cylinder and liquid oxygen reservoir systems includes all of the supplies that are noted in the procedure code description.*
- Portable oxygen systems—Portable oxygen therapy may be prior authorized if the medical necessity conditions are met and the medical documentation indicates that the client requires the use of oxygen in the home and would benefit from the use of a portable oxygen system when traveling outside the home environment.
 - Portable oxygen systems are not considered a benefit of the Home Health Services Program for clients who qualify for oxygen solely based on blood gas studies obtained during sleep.
 - Providers must use procedure codes E0431, E0434, and K0738 when billing for the portable oxygen systems. When procedure code K0738 is billed for the same dates of service as procedure code E0431, procedure code E0431 will be denied.

Rental of the portable oxygen system includes all supplies and refills. Refills for a client-owned system must be obtained from a DSHS-licensed vendor.

2.2.19.11.2 Prior Authorization

All oxygen therapy, supplies, and related equipment requires prior authorization. Humidifiers may not be prior authorized separately for rental for use with oxygen equipment. Multiple oxygen delivery systems (e.g., liquid or gas) will not be prior authorized concurrently. Supplies and refills may be prior authorized for those clients who own their own oxygen systems.

Note: *In addition to the completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form, a Medicaid Certificate of Medical Necessity for CPAP/BiPAP or Oxygen Therapy form must be completed, signed, and dated by the physician familiar with the client and submitted by the provider.*

2.2.19.11.3 Initial Oxygen Therapy Medical Necessity Certification

Prior authorization of home oxygen therapy for the initial period of three months will be granted if the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form and the Medicaid Certificate of Medical Necessity for CPAP or BiPAP or Oxygen Therapy form is completed and all of the following conditions are met:

- Symptoms have a duration of at least three months (or less with special circumstances).
- For clients who are 20 years of age and younger, one of the following parameters must be used:
 - An oxygen saturation of 89 to 92 percent, taken at rest, breathing room air.
 - An oxygen saturation less than 92 percent with documentation of medical necessity provided by a physician familiar with the client.
- An arterial PO₂ at or below 56 mm Hg or an arterial oxygen saturation at or below 89 percent, taken at rest, breathing room air, or during sleep and associated with signs or symptoms reasonably attributed to hypoxemia.
- Hypoxemia associated with obstructive sleep apnea must be unresponsive to CPAP or BiPAP S therapy before oxygen therapy can be approved. In these cases, coverage is provided only for use of oxygen during sleep, and then only one type of delivery system will be considered a benefit under the Home Health Services Program.
- Portable oxygen systems are considered a benefit of the Home Health Services Program when the medical documentation indicates that the client requires the use of oxygen in the home and would benefit from the use of a portable oxygen system when traveling outside the home environment. Portable oxygen systems are not considered a benefit of the Home Health Services Program when traveling outside the home environment for clients who qualify for oxygen usage based solely on oxygen saturation levels during sleep.
- A client who demonstrates an arterial PO₂ at or above 56 mm Hg, or an arterial oxygen saturation at or above 89 percent, during the day while at rest and who subsequently experiences a decreased arterial PO₂ of 55 mm Hg or below, or decreased arterial oxygen saturation of 88 percent or below during exercise. In this case supplemental oxygen can be provided if there is evidence that the use of oxygen improves the hypoxemia that was demonstrated during exercise when the client was breathing room air.

In-home oxygen therapy can be approved for cluster headaches with the documentation of both the following clinical indications:

- Neurological evaluation with diagnosis
- Documented failed medication therapy

Note: *Lab values are not indicated with this diagnosis*

2.2.19.11.4 Oxygen Therapy Recertification

Prior authorization of oxygen therapy after an initial three-month rental period may be granted with the submission of a new completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form and a new Medicaid Certificate of Medical Necessity for CPAP/BiPAP or Oxygen Therapy form and the following:

- Documentation of continued need
- Documentation of client compliance by the physician familiar with the client

Note: *The initial Medicaid Certificate of Medical Necessity for CPAP/BiPAP or Oxygen Therapy Form cannot be used for recertification purposes.*

2.2.19.12 Pulse Oximetry

Pulse oximeters are not a benefit of Title XIX Home Health Services. Pulse oximeters are a benefit of Texas Medicaid through CCP for clients who are birth through 20 years of age.

Refer to: Subsection 2.6.6, “Pulse Oximeter” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for more information on pulse oximeters.

2.2.19.12.1 Prior Authorization

Pulse oximeter sensor probes (procedure code A4606) for client owned equipment are limited to four per month without prior authorization. If additional sensor probes are needed, prior authorization must be requested through Home Health Services with documentation supporting medical necessity.

2.2.19.13 Procedure Codes and Limitations for Respiratory Equipment and Supplies

Procedure Code	Limitations
Nebulizers	
A4617	2 per month
A7003	2 per month
A7004	2 per month
A7005	1 per 6 months
A7006	1 per month
A7007	2 per month
A7010	1 unit (100 ft) per 2 months
A7011	1 per year
A7012	2 per month
A7013	2 per month
A7015	1 per month
A7017	1 every 3 years
A7018	4 per month
E0570	Every 5 years
E0585	Every 3 years
S8101	1 per 180 days
Ultrasonic Nebulizers	
A7009	4 per month
A7014	1 every 3 months
A7016	2 per year

Procedure Code	Limitations
E0574	Every 2 years
E0575	Every 5 years
Vaporizers	
E0605	Every 5 years
Nonelectric Spirometer	
A9284	1 per 6 months
Intermittent Positive-Pressure Breathing (IPPB) Device	
E0500	4 months per life
Mucous Clearance Valve (i.e., Flutter)	
S8185	Every 5 years
Chest Physiotherapy Devices	
A7026	1 per 6 months
E0480	1 purchase every 5 years; 1-month rental
E0482	1 per month
E0483	1 purchase per lifetime; 1-month rental
CPAP/BiPAP	
A7027	1 per 3 months
A7028	1 per month
A7029	2 per month
A7030	1 per 3 months
A7031	1 per month
A7032	2 per month
A7033	2 per month
A7034	4 per year
A7035	Every 6 months
A7037	1 per month
A7038	2 per month
A7039	1 per 6 months
E0470	1 purchase every 5 years; 1-month rental
E0471	1 purchase every 5 years; 1-month rental
E0472	1 purchase every 5 years; 1-month rental
E0561	1 purchase every 5 years; 1-month rental
E0562	1 purchase every 5 years; 1-month rental
E0601	1 purchase every 5 years; rental allowed 4 per lifetime
Home Mechanical Ventilator Equipment	
A4481	31 per month
A4483	31 per month
A4611	Every 5 years
A4612	Every 5 years
A4613	Every 5 years

Procedure Code	Limitations
A4614	1 per 6 months
A4623	1 per month
A4629	31 per month
A7520	1 per month
A7521	1 per month
A7522	4 per year
E0450	4 per lifetime
E0457	1 purchase every 5 years; 1-month rental
E0459	1 purchase every 5 years; 1-month rental
E0460	4 per lifetime
E0463	1 per month
E0464	1 per month
E0580	1 per 3 years
S8189	Limited per policy
Ventilator Maintenance Agreement	
A9900	1 per month
Oxygen Therapy	
A4615	2 per month
A4616	4 per year
A4618	4 per month
A4619	2 per month
A4620	2 per month
E0424	4 per lifetime
E0431	4 per lifetime
E0433	1 per month
E0434	4 per lifetime
E0439	4 per lifetime
E0441	4 per lifetime
E0442	4 per lifetime
E0443	1 per month
E0444	1 per month
E0565	1 purchase every 5 years; rental allowed 4 per lifetime
E1353	1 per year
E1355	1 purchase every 3 years; 1-month rental
E1372	1 every 3 years
K0730	1 every 5 years
Suction Pumps	
A4605	10 per month
A4624	90 per month
A4628	2 per month

Procedure Code	Limitations
A7000	4 per month
A7002	8 per month
E0600	Every 5 years
Miscellaneous	
A4606	4 per month
A4627	Every 6 months
E1399	Limited by policy
S8999	1 per year

2.2.20 Special Needs Car Seats and Travel Restraints

Special needs car seats and travel restraints are not services available under Home Health Services.

Refer to: Subsection 2.6.14, “Special Needs Car Seats and Travel Restraints” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for details about coverage through CCP.

2.2.21 Subcutaneous Injection Ports

A subcutaneous injection port is a sterile medication delivery device through which physician-prescribed medications can be injected directly into the subcutaneous tissue using a standard syringe and needle, an injection pen, or other manual injection device. The device can be used for multiple subcutaneous injections for a period of up to 72 hours, thereby avoiding repeated needle punctures of the skin. The device cannot be used with an injection pump.

A subcutaneous injection port, such as the *I-Port* or *Insuflon*, is a benefit of Texas Medicaid as a Title XIX Home Health service with prior authorization. Claims for a subcutaneous injection port must be submitted with procedure code A4211 and modifier U4.

Texas Medicaid may reimburse the device for clients who require multiple daily injections of a physician-prescribed medication and who meet the medical necessity criteria.

The subcutaneous injection port is not a benefit of Texas Medicaid as an item of convenience or for clients who are already receiving the medication through an ambulatory infusion pump. The device is considered an item of convenience if the client does not meet the criteria for medical necessity.

2.2.21.1 Prior Authorization

Prior authorization is required for a subcutaneous injection port. Initial prior authorizations will be issued for a trial period of up to 3 months. Prior authorizations that are issued after the successful completion of the initial trial period may be issued for a period of up to 6 months. Prior authorizations for subcutaneous injection ports are limited to a quantity of 10 individual ports per month. Additional ports will be considered for prior authorization with documentation of medical necessity.

2.2.21.2 Documentation Requirements

The initial request for prior authorization must include documentation that indicates the client meets the following criteria for medical necessity:

- The client has a medical condition that requires multiple (i.e., 2 or more) subcutaneous, self-administered injections on a daily basis and has a current prescription for the injectable medication. Documentation must indicate the specific medical condition that is being treated, the name of the injectable medication, and the dosage and frequency of the injections.

Note: “Self-administered” includes those injections administered by the client through a subcutaneous injection or by the caregiver to the client through a subcutaneous injection.

- The client or the caregiver has been unsuccessful with the self-administration of injections using a standard needle and syringe because the client demonstrates trypanophobia (i.e., severe needle phobia), as evidenced by documented physical or psychological symptoms. Documented symptoms may include, but are not limited to, the following:

Condition	Possible Exhibited Symptoms
Vaso-vagal trypanophobia	Physical symptoms such as changes in blood pressure, syncope, sweating, nausea, pallor, and tinnitus
Associate trypanophobia	Psychological symptoms such as extreme anxiety, insomnia, and panic attacks
Resistive trypanophobia	Signs and symptoms such as combativeness, elevated heart rate, high blood pressure, and violent resistance to procedures involving needles or injections

The prescribing physician must include with the prior authorization request a written statement of medical necessity that identifies the client as an appropriate candidate for the subcutaneous injection port device. The physician's statement or medical record documentation that is submitted with the prior authorization request must indicate the following:

- The client or caregiver has received instruction during an office visit on the proper placement and use of the device, with successful return demonstration. (Prior authorization requests for skilled nursing visits for the sole purpose of client instruction on the use of the subcutaneous injection port device will not be approved. Necessary instruction must be performed as part of the office visit with the prescribing physician.)
- The client has no known allergies or sensitivities to adhesives, silicone, or similar materials.
- The client has no skin infection at potential injection sites.
- The client's most recent lab results related to the medical condition requiring treatment with daily subcutaneous injections must also be submitted with the prior authorization request. Lab results may include, but are not limited to, hemoglobin A1c (HbA1c) levels for clients with insulin dependent diabetes mellitus (IDDM) and partial thromboplastin time (PTT) for clients who are receiving anticoagulant therapy.

Requests for the renewal of the prior authorization after the initial trial period has ended must include documentation of the following:

- Ongoing signs and symptoms associated with the client's trypanophobia.
- Improved compliance with the physician-prescribed injection regimen.
- Successful use of the device with no persistent pattern of the client's dislodging the device during the initial trial period.
- Results of relevant lab tests performed upon completion of the initial trial period, including, but not limited to, HbA1c levels for clients with IDDM and PTT for clients who are receiving anticoagulant therapy.

Note: For clients with IDDM, if the HbA1c level has not declined with use of the subcutaneous injection port, additional documentation must be submitted by the physician who documents the clinical determination about the lack of significant improvement in the HbA1c level. The renewal of the prior authorization will not be approved without this information.

2.2.22 Total Parenteral Nutrition (TPN) Solutions

In-home TPN is a benefit for eligible clients who require long-term nutritional support. "Long-term nutritional support" refers to treatment lasting 30 days or longer.

Conditions that may require TPN include, but are not limited to the following:

- Bowel disease or disorder
- Cancer
- AIDS
- Coma
- Burns
- Peritonitis

Note: Conditions or a duration of need not listed above may be considered by HHSC or its designee with documentation of medical necessity.

TPN services are not a benefit when oral or enteral intake will maintain adequate nutrition.

Parenteral nutrition solution services may be reimbursed using the following procedure codes:

Procedure Codes									
B4164	B4168	B4172	B4176	B4178	B4180	B4185	B4189	B4193	B4197
B4199	B4216	B5000	B5100	B5200					

Parenteral nutrition supplies may be reimbursed using the following procedure codes: B4220, B4222, B4224, and B9999.

Parenteral nutrition infusion pumps may be reimbursed using procedure codes B9004 and B9006.

A backpack or carrying case for a portable parenteral nutrition infusion pump may be a benefit of Home Health Services, when medically necessary and prior authorized, using procedure code B9999.

In-home TPN for clients who are 20 years of age and younger that do not meet the criteria through Title XIX Home Health Services may be considered through CCP. No more than a one-week supply of solutions and additives may be reimbursed if the solutions and additives are shipped and not used because of the client’s loss of eligibility, change in treatment, or inpatient hospitalization. Any days that the client is an inpatient in a hospital or other medical facility or institution must be excluded from the daily billing. Payment for partial months will be prorated based upon the actual days of administration.

The administration of intravenous fluids and electrolytes cannot be billed as in-home TPN.

Claims for TPN must contain the 9-character prior authorization number in Block 23. Providers must consult with their vendor for the location of this field in the electronic claims format. The prescribing physician name and provider identifier must be in Block 17 and 17a or in the appropriate field of the provider’s electronic software.

2.2.22.1 Prior Authorization

TPN solutions, lipids, supply kits, and infusion pumps must be prior authorized.

2.2.22.2 Documentation Requirements

Requests for prior authorization must include the following information:

- Medical condition necessitating the need for TPN and long-term nutritional support.
- Documentation of any trials with oral or enteral feedings.
- Percent of daily nutritional needs from TPN.
- A copy of the TPN formula or prescription, including amino acids and lipids, signed and dated by the physician.

- A copy of the most recent laboratory results (to include potassium, calcium, liver function studies and albumin).

The requesting provider may be asked for additional information to clarify or complete a request for TPN services.

Prior authorization requests for a portable parenteral nutrition infusion pump (procedure code B9004) must also include documentation of medical necessity demonstrating that:

- The client requires continuous feedings
- Feeding intervals exceed the time that the client must be away from home to:
 - Attend school or work.
 - Participate in extensive, physician-ordered outpatient therapies.
 - Attend frequent, multiple medical appointments.

Prior authorization for parenteral nutrition infusion pumps will be limited to one portable pump (procedure code B9004) or one stationary pump (procedure code B9006) at any one time, unless medical necessity for two infusion pumps is established. Supporting documentation for the additional pump must be included with the prior authorization request.

Prior authorization requests for miscellaneous procedure code B9999 must include the following:

- A detailed description of the requested item or supply.
- Documentation supporting the medical necessity for the requested item or supply.

Requests for a carrying case or backpack for the portable infusion pump will be considered for prior authorization under miscellaneous code B9999, for clients who meet the medical necessity criteria for the portable pump as outlined above. The following additional criteria apply:

- The client is ambulatory, or uses a wheelchair which will not support the use of a portable pump by other means, such as an intravenous (IV) pole.
- The portable enteral feeding pump is client-owned.

Renewal of the prior authorization will be considered based on medical necessity.

Refer to: [Home Health Services \(Title XIX\) DME/Medical Supplies Physician Order Form](#) on the TMHP website at www.tmhp.com.

2.2.23 Wound Care Supplies or Systems

Wound care supplies and wound care systems are a benefit through Home Health Services when provided to clients in the home setting. Wound care supplies and wound care systems are designed to assist in the healing of wounds in conjunction with an individualized wound care therapy regimen prescribed by a physician.

Wounds are recognized as acute or chronic:

- Acute wounds are defined as wounds taking less than up to 30 days for complete healing.
- Chronic wounds are defined as wounds taking more than 30 days for complete healing.

Skin ulcers represent the majority of chronic wounds. Skin ulcers include but are not limited to:

- Venous ulcers—also known as venous insufficiency ulcers, stasis ulcers, or varicose veins, and are due to sustained venous hypertension, which results from chronic venous insufficiency or an impaired muscle pump.

- Arterial insufficiency ulcers—ulcers caused by insufficient arterial flow resulting in ischemia and eventual necrosis. Atherosclerosis is the most common cause of arterial ulcers. Other arterial vascular diseases include vasospastic disease and vasculitis. Arterial ulcers are frequently found at the most distal point of arterial perfusion. No drainage is apparent unless the ulcer is infected.
- Pressure ulcers—any skin wound caused by unrelieved pressure resulting in damage to various sections of the skin structure that worsen over time.
- Diabetic ulcers—skin lesions associated with clients with Type 1 and Type 2 diabetes mellitus. The majority of all amputations in diabetic clients are preceded by an infected ulcer.

Wound care includes:

- Optimization of nutritional status
- Debridement by any means to remove devitalized tissue
- Maintenance of a clean, moist bed of granulation tissue
- Any necessary treatment to resolve any infection that may be present

Based on the specific type of wound, wound care may include:

- Use of a compression system for clients with a venous ulcer
- Establishment of adequate circulation for a client with an arterial ulcer
- Frequent repositioning of a client with a pressure ulcer
- Off-loading pressure and good glucose control for a client with a diabetic ulcer

Measurable signs of improved healing include:

- A decrease in wound size, either in surface area or volume
- A decrease in amount of exudate
- A decrease in amount of necrotic tissue

First line wound care therapy may include the following:

- Cleansing, antibiotics, and pressure off-loading
- Debridement
- Dressings
- Compression

Second line wound care therapy may include:

- Negative pressure wound therapy (NPWT)
- Irrigation, including pulsatile jet irrigation

2.2.23.1 Wound Care Supplies

Medically necessary wound care supplies are designed to assist in wound healing, and include, but are not limited to dressings, cleansers, enzymatic debriders, and fillers.

Wound dressings include:

- Absorptive dressings
- Alginates
- Antimicrobials
- Collagen dressings

- Compression dressings and wraps
- Composite dressings
- Contact layers
- Foam dressings
- Hydrocolloid dressings
- Hydrofiber dressings
- Hydrogel dressings, including sheets and impregnated gauze
- Odor absorbing dressings
- Transparent films

2.2.23.2 Wound Care System

A medically necessary wound care system includes a medical device and its component supplies, and is designed to assist in healing of wounds unresponsive to conventional wound care therapy.

A wound care system may be considered for reimbursement for clients with a Stage III or IV chronic, non-healing wound (such as a pressure, arterial or venous stasis, diabetic ulcer), post-surgical wound dehiscence, non-adhering skin grafts, or surgical flaps required for covering such wounds.

Types of wound care systems include the following:

- NPWT system
- Pulsatile jet irrigation wound care system

2.2.23.2.1 NPWT System

NPWT systems and associated supplies (procedure codes E2402 and A6550) are benefits of Home Health Services.

An NPWT system provides and maintains a moist wound environment, and protects the wound during the healing process by sealing it with an adhesive drape and applying continuous or intermittent suction.

An NPWT system consists of a cell foam dressing that is placed in the wound bed, a suction catheter tip, an adhesive drape to cover the wound, suction tubing, and a computerized vacuum pump. An NPWT system uses continuous or intermittent sub-atmospheric pressure to evacuate the excess interstitial fluid and remove growth factor inhibitors. The removal of inhibitors allows the growth factor to stimulate cell proliferation and migration. Removal of excess fluid also helps decrease periwound induration.

Dressing changes associated with an NPWT system are performed every one to three days depending on the amount of exudate produced by the wound. The computerized vacuum pump is rented on a monthly basis. A licensed health-care provider with appropriate training is required to perform an NPWT system dressing change.

2.2.23.2.2 Pulsatile Jet Irrigation Wound Care System

Pulsatile jet irrigation wound care systems (procedure code E1399) are a benefit of Home Health Services for rental only.

A pulsatile jet irrigation wound care system uses antibiotics or water under pressure to irrigate the wound and uses suction to remove the irrigation fluid and debris.

A pulsatile jet irrigation wound care system consists of a pistol-style hand piece with a trigger to control the pulsatile jet. A suction pump is used to remove the fluid. The wound is then dressed using standard wound care supplies.

Dressing changes associated with a pulsatile jet irrigation wound care system are performed every one to three days depending on the amount of exudate produced by the wound. A licensed health-care provider with appropriate training is required to perform a pulsatile jet irrigation wound care system dressing change.

2.2.23.3 Noncovered Services

The following services are not a benefit of Texas Medicaid:

- Wound care supplies for use in the office or outpatient setting. Supplies provided in an outpatient setting, such as a wound care clinic, are part of the facility fee and are not separately reimbursed.
- Equipment and supplies for stand-by use.
- Portable hyperbaric oxygen chambers (procedure code A4575) that are placed directly over the wound and provide higher concentrations of oxygen to the damaged tissue.
- Metabolically active skin equivalents or skin equivalents used in wound care, in the home setting.
- Non-contact normothermic wound therapy (NNWT) systems and associated supplies (procedure codes A6000, E0231, and E0232).
- Non-sterile gloves (procedure code A4927), when the gloves are for use by a health care provider, such as a RN, LVN, or attendant, in the home setting.
- Rental or purchase of an electrical stimulation or electromagnetic wound treatment device (procedure code E0769), for use by the client or caregiver in the home setting.

2.2.23.4 Prior Authorization

Prior authorization is required for all wound care supplies and wound care systems addressed below with the exception of procedure code A4455.

Note: *THSteps-eligible clients who qualify for medically necessary services beyond the limits of this home health benefit will receive those services through CCP.*

The requesting provider may be asked for additional information to clarify or complete a prior authorization request for the wound care supplies or wound care system.

Retrospective review may be performed to ensure documentation supports the medical necessity of the requested wound care supplies or system.

Recertification will be considered based on medical necessity, with a new prior authorization request.

Providers should only bill for a one month supply at a time, even though prior authorization may be granted for up to six months.

2.2.23.4.1 Wound Care Supplies

Nonsterile/clean wound care supplies may be considered for prior authorization for use in the home setting when documentation supports medical necessity.

Note: *The home setting is considered a clean environment, not a sterile environment.*

Sterile wound care supplies, other than those required with a wound care system, may be considered for prior authorization for use in the home setting when documentation supports medical necessity and justifies that nonsterile/clean wound care supplies will not meet the client's needs.

Note: *Established tracheostomies or gastrostomies/buttons are not considered wounds, therefore dressing supplies will not be considered for prior authorization. Dressing supplies for tracheostomies or gastrostomies may be considered for prior authorization with documentation of medical necessity.*

Nonsterile gloves may be considered for prior authorization when a family member or friend is performing the medical wound care.

2.2.23.4.2 Wound Care System

Prior authorization for a wound care system may be considered for reimbursement for an initial 30-day period.

Medically necessary prior authorized recertifications may be considered for additional 30-day periods at a time, up to a maximum of four, when documentation supports continued significant improvement in wound healing. Wound care systems may be considered for reimbursement beyond four months of treatment on a case-by-case basis after review of the medical necessity documentation by the medical director or designee.

Wound care system supplies are limited to a maximum of:

- 15 dressing kits or supplies per wound per month unless documentation supports that the wound size requires more than one dressing kit for each dressing change, or if the physician has ordered more frequent dressing changes.
- 10 disposable canisters (procedure code A7000) per month, unless documentation provided indicates medical necessity for additional canisters.

***Note:** When documentation supports evidence of high-volume drainage, defined as greater than 90 milliliters (ml) per day, a stationary pump with the largest capacity canister must be used. Extra canisters related to the equipment failure are not considered medically necessary.*

Wound care systems and related supplies will not be prior authorized nor considered for reimbursement when:

- The client has one of the following contraindications:
 - A fistula to the body
 - Wound ischemia
 - Gangrene
 - Skin cancer in the wound margins
 - Presence of necrotic tissue, including bone (this does not apply to the pulsatile jet irrigation wound care system)
 - Osteomyelitis (unless it is being treated; the treatment must be identified)
- In the judgment of the treating physician, adequate wound healing has occurred and the wound care system is no longer required.
- No measurable wound healing has occurred over the previous 30-day period.
- A wound care system was used for four months or more in the inpatient setting prior to discharge, except when documentation supports continued significant improvement in wound healing.
- The wound care equipment and supplies are no longer being used by the client.

2.2.23.5 Documentation Requirements

2.2.23.5.1 Wound Care Supplies

To request prior authorization for wound care supplies, the following documentation must be provided with the completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form:

- Accurate diagnostic information pertaining to the underlying diagnosis/condition as well as any other medical diagnoses/conditions, to include the client's overall health status
- Appropriate medical history related to the current wound including:
 - Wound measurements to include length, width and depth, any tunneling or undermining

- Wound color, drainage (type and amount), and odor, if present
- The prescribed wound care regimen, to include frequency, duration and supplies needed
- Treatment for infection, if present
- All previous wound care therapy regimens, if appropriate
- The client’s use of a pressure reducing support surface, when appropriate
- Identification of the client or caregiver who will be instructed how to perform the wound care, and will be responsible for the wound care

2.2.23.5.2 Wound Care Systems

To request prior authorization for a wound care system, the documentation listed below must be provided on the Statement for Initial Wound Therapy System In-Home Use Form for an initial request or on the Statement for Recertification of Wound Therapy System In-Home Use Form for a recertification request, in addition to the Title XIX form.

The prescribing physician and provider must submit the appropriate initial or recertification form, which must also be maintained in the client’s medical record.

The following documentation must be submitted with the prior authorization request, and must be maintained in the client’s medical record:

- Accurate diagnostic information pertaining to the underlying diagnosis/condition and all other medical diagnoses/conditions, including the client’s overall health status.
- The client’s use of a pressure reducing support surface, when appropriate.
- Albumin level within the last 30 days (If the albumin level is below 3.0, documentation must show that a nutritional supplement has been prescribed, and that the client is compliant with its use.)
- Hemoglobin A1c obtained within last 30 days, if the client has a diagnosis of diabetes mellitus.
- Appropriate medical history related to the current wound, including:
 - Documentation that the wound is free of necrotic tissue and infection, or if infection is present, that it is being treated with antibiotics.
 - Wound measurements to include length, width, and depth, any tunneling or undermining.
 - Wound characteristics, including color, wound drainage (type and amount), and odor if present.
 - The prescribed wound care regimen, to include frequency, duration and supplies needed.
- Identification of the caregiver who agrees to be available to assist the client during this time and agreement of this person not to operate the negative pressure or the pulsatile jet irrigation system if used.
- Documentation that a licensed health-care provider who has received the appropriate training in the use of the wound care system is performing the wound care when a negative pressure or pulsatile jet irrigation wound care system is used. All requirements for skilled nursing care must be met.
- For recertification, documentation that the wound is improving.

2.2.24 Limitations and Exclusions

Payment cannot be made for any service, supply or equipment for which FFP is not available. For clients who are 20 years of age and younger and who are eligible to receive THSteps services, refer to subsection 2.1, “CCP Overview” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* to find which of these items are a benefit for CCP.

Home Health Services does not cover the following:

- Adaptive strollers, travel seats, push chairs, and car seats
- Administration of non-FDA-approved medications/treatments or the supplies and equipment used for administration
- Aids for daily living, such as toothpaste, spoons, forks, knives, and reachers

- Any services, equipment, or supplies furnished to a client who is a resident of a public institution or a client in a hospital, SN facility, or intermediate care facility
- Any services or supplies furnished to a client before the effective date of Medicaid eligibility as certified by HHSC or after the date of termination of Medicaid eligibility
- Any services or supplies furnished without prior approval by TMHP, except as listed
- Any supplies or equipment used in a physician's office, or inserted by a physician (e.g., low profile gastrostomy tube)
- Apnea monitors
- Blood products (the administration or the supplies and equipment used to administer blood products)
- Cardiac telemetry monitoring
- Chemotherapy administration or the supplies and equipment used to administer chemotherapy
- Diapers and wipes for clients who are 3 years of age and younger
- Dynamic orthotic cranioplasty (DOC)
- Environmental equipment, supplies, or services, such as room dehumidifiers, air conditioners, heater/air conditioner filters, space heaters, fans, water purification systems, vacuum cleaners, treatments for dust mites, rodents, and insects
- Home whirlpool baths, spas, home exercisers/gym equipment, hemodialysis equipment, safety wall rails, toys/therapy equipment
- IPV
- Nutritional counseling
- Orthotics, braces, prosthetics including but not limited to voice prosthetic, and artificial larynx
- Parapodiums
- Personal protective equipment (such as gloves, masks, gowns, and sharps containers) for use by a health-care provider, including but not limited to an RN, LVN, or attendant in the home setting
- Pneumocardiograms
- Seat lift chairs
- Shipping, freight, delivery travel time
- Structural changes to homes, domiciles, or other living arrangements
- Vehicle mechanical or structural modifications, such as wheelchair lifts

Refer to: Subsection 1.11, "Texas Medicaid Limitations and Exclusions" in Section 1, "Provider Enrollment and Responsibilities" (*Vol. 1, General Information*).

2.2.25 Procedure Codes That Do Not Require Prior Authorization

The procedure codes listed in the following table do not require prior authorization for clients who are receiving services under Home Health Services. Although prior authorization is not required, providers must retain a completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form for these clients. For medical supplies not requiring prior authorization, a completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form may be valid for a maximum of six months unless the physician indicates the duration of need is less. If the physician indicates the duration of need is less than

six months, then a new Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form is required at the end of the duration of need. It is expected that reasonable, medically necessary amounts will be provided.

The use of these services is subject to retrospective review. This is not an all inclusive list.

Procedure Codes									
Nebulizer Supplies/Equipment*									
E0570	E0575	E0580	S8101						
Incontinence Supplies**									
A4310	A4311	A4312	A4313	A4314	A4315	A4316	A4320	A4321	A4322
A4326	A4327	A4328	A4330	A4335	A4338	A4340	A4344	A4346	A4351
A4352	A4353	A4354	A4355	A4356	A4357	A4358	A4402	A4554	A5102

Inhaler Equipment									
A4614	A4627								
* Prior authorization is required for certain diagnoses and if limitations are exceeded. Refer to Subsection 2.2.19.2, "Nebulizers" in this handbook.									
** Prior authorization is required for some procedure codes if the maximum limitation is exceeded. Refer to Subsection 2.2.13.9, "Incontinence Procedure Codes with Limitations" in this handbook.									

2.3 Other or Special Provisions

2.3.1 Medicaid Relationship to Medicare

2.3.1.1 Possible Medicare Clients

It is the provider's responsibility to determine the type of coverage (Medicare, Medicaid, or private insurance) that the client is entitled to receive. Home health providers must follow these guidelines:

- Clients who are 64 years of age and younger without Medicare Part A or B:
 - If the agency erroneously submits an SOC notice to Medicare and does not contact TMHP for prior authorization, TMHP does not assume responsibility for any services provided before contacting TMHP. The SOC date is no more than three business days before the date the agency contacts TMHP. Visits made before this date are not considered a benefit of the Home Health Services Program.
- Clients who are 65 years of age and older without Medicare Part A or Part B and clients with Medicare Part A or B regardless of age:
 - In filing home health claims, home health providers may be required to obtain Medicare denials before TMHP can approve coverage. When TMHP receives a Medicare denial, the SOC is determined by the date the agency requested coverage from Medicare. If necessary, the 95-day claims filing deadline is waived for these claims, provided TMHP receives notice of the Medicare denial within 30 days of the date on the MRAN containing Medicare's final disposition.
 - If the agency receives the MRAN and continues to visit the client without contacting TMHP by telephone, mail, or fax within 30 days from the date on the MRAN, TMHP will provide coverage only for services provided from the initial date of contact with TMHP. The SOC date is determined accordingly. TMHP must have the MRAN before considering the request for prior authorization.

2.3.1.2 Benefits for Medicare and Medicaid Clients

For eligible Medicare/Medicaid clients, Medicare is the primary payer and providers must bill Medicare before submitting a claim to Medicaid. Medicaid pays the Medicare deductible on Part B claims for qualified home health clients.

Home health service prior authorizations may be given for HHA services, certain medical supplies, equipment, or appliances suitable for use in the home in one of the following instances:

- When an eligible Medicaid client (enrolled in Medicare) who does not qualify for home health services under Medicare because SN care, PT, or OT are not a part of the client's care.
- When the medical supplies, equipment, or appliances are denied by Medicare Part B and are a benefit of Home Health Services.

Federal and state laws require the use of Medicaid funds for the payment of most medical services only after all reasonable measures have been made to use a client's third party resources or other insurance.

Note: *If the client has Medicare Part B coverage, contact Medicare for prior authorization requirements and reimbursement. If the service is a Part B benefit, do not contact TMHP for prior authorization. Texas Medicaid will only pay the deductible and coinsurance according to current payment guidelines on the electronic crossover claim.*

TMHP will not prior authorize or reimburse the difference between the Medicare payment and the retail price for Medicare Part B eligible clients.

Refer to: Subsection 4.12, "Third Party Liability (TPL)" in Section 4, "Client Eligibility" (*Vol. 1, General Information*).

Section 2.7, "Medicare Crossover Claim Reimbursement" (*Vol. 1, General Information*).

2.3.1.3 Medicare and Medicaid Prior Authorization

Contact TMHP for prior authorization of Medicaid services (based on medical necessity and benefits of Home Health Services) within 30 days of the date on the MRAN.

Note: *For MQMB clients, do not submit prior authorization requests to TMHP if the Medicare denial reason states "not medically necessary." Medicaid only will consider prior authorization requests if the Medicare denial states "not a benefit" of Medicare.*

Qualified Medicare Beneficiaries (QMB) are not eligible for Medicaid benefits. Texas Medicaid is only responsible for premiums, coinsurance, or deductibles on these clients according to payment guidelines. Providers should not submit prior authorization requests to the TMHP Home Health Services Prior Authorization Department for these clients.

To ensure Medicare benefits are used first in accordance with Texas Medicaid regulations, the following procedures apply when requesting Medicaid prior authorization and payment of home health services for clients.

Contact TMHP for prior authorization of Medicaid services (based on medical necessity and benefits of Home Health Services) within 30 days of the date on the MRAN. Fax a copy of the original Medicare MRAN and the Medicare appeal review letter to the TMHP Home Health Services Prior Authorization Department for prior authorization.

Note: *Claims for STAR+PLUS MQMB clients (those with Medicare and Medicaid) must always be submitted to TMHP as noted on these pages. The STAR+PLUS health plan is not responsible for these services if Medicare denies the service as not a benefit.*

When the client is 65 years of age and older or appears otherwise eligible for Medicare such as blind and disabled, but has no Part A or Part B Medicare, the TMHP Home Health Services Prior Authorization Department uses regular prior authorization procedures. In this situation, the claim is held for a midyear

status determined by HHSC. The maximum length of time a claim may be held in a “pending status” for Medicare determination is 120 days. After the waiting period, the claim is paid or denied. If denied, the EOB code on the R&S report indicates that Medicare is to be billed.

Refer to: Subsection 3.2.3, “Home Health Skilled Nursing Services” in the *Nursing and Therapy Services Handbook (Vol. 2, Provider Handbooks)*.

2.4 Claims Filing and Reimbursement

2.4.1 Claims Information

Providers must use only type of bill (TOB) 321 in Form Locator (FL) 4 of the UB-04 CMS-1450. Other TOBs are invalid and result in claim denial.

Home Health services must be submitted to TMHP in an approved electronic format or on a CMS-1500 or a UB-04 CMS-1450 paper claim form. Submit home health DME and medical supplies to TMHP in an approved electronic format, or on a CMS-1500 or on a UB-04 CMS-1450 paper claim form. Providers may purchase UB-04 CMS-1450 and CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply them.

When completing a CMS-1500 or a UB-04 CMS 1450 paper claim form, providers must include all required information on the claim, as TMHP does not key information from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (*Vol. 1, General Information*) for information on electronic claims submissions.

Section 6: Claims Filing (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.6, “UB-04 CMS-1450 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (*Vol. 1, General Information*).

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (*Vol. 1, General Information*) for instructions on completing paper claims.

Outpatient claims must have the appropriate revenue code and, if appropriate, the corresponding HCPCS code or narrative description. The prior authorization number must appear on the UB-04 CMS-1450 claim in Block 63 and in Block 23 of the CMS-1500 claim. The certification dates or the revised request date on the POC must coincide with the DOS on the claim. Prior authorization does not waive the 95-day filing deadline requirement.

2.4.1.1 Benefit Code

Home health DME providers must use benefit code DM2 on all claims and authorization requests. All other providers must use benefit code CSN on all claims and authorization requests.

2.4.2 Reimbursement

DME and expendable medical supplies are reimbursed in accordance with 1 TAC §355.8021. Providers can refer to the [Online Fee Lookup \(OFL\)](#) or the applicable fee schedule on the TMHP website at www.tmhp.com. Providers may also request a hard copy of the fee schedule by contacting the TMHP Contact Center at 1-800-925-9126.

DME and expendable supplies, other than nutritional products, that have no established fee, are subject to manual pricing at the documented MSRP less 18 percent or the provider’s documented invoice cost.

Nutritional products that have no established fee are subject to manual pricing at the documented AWP less 10.5 percent or at the provider’s documented invoice cost.

For reimbursement, providers must note the following:

- Claims are approved or denied according to the eligibility, prior authorization status, and medical appropriateness.
- Claims must represent a numerical quantity of 1 month for supplies according to the billing requirements.
- DME/supplies *must* be provided by either a Medicaid enrolled home health agency's Medicaid/DME supply provider or an independently-enrolled Medicaid/DME supply provider. Both *must* enroll and bill using the provider identifier enrolled as a DME supplier. File these services on a CMS-1500 claim form.

Note: *Medical social services and speech-language pathology services are available to clients who are 20 years of age and younger and are not a benefit of Home Health Services. These services may be considered a benefit for clients who qualify for CCP.*

Texas Medicaid does not reimburse separately for associated DME charges, including but not limited to, battery disposal fees or state taxes. Reimbursement for any associated charges is included in the reimbursement for a specific piece of equipment.

Refer to: Subsection 2.2, "Fee-for-Service Reimbursement Methodology" in Section 2, "Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for more information about reimbursement.

Texas Medicaid implemented mandated rate reductions for certain services. The Online Fee Lookup (OFL) and static fee schedules include a column titled "Adjusted Fee" to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

2.4.3 Prohibition of Medicaid Payment to Home Health Agencies Based on Ownership

Medicaid denies home health services claims when TMHP records indicate that the physician ordering treatment has a significant ownership interest in, or a significant financial or contractual relationship with, the nongovernmental home health agency billing for the services. Federal regulation Title 42 CFR §424.22 (d) states that "a physician who has a significant financial or contractual relationship with, or a significant ownership in a nongovernmental home health agency may not certify or recertify the need for home health services care services and may not establish or review a plan of treatment."

A physician is considered to have a significant ownership interest in a home health agency if either of the following conditions apply:

- The physician has a direct or indirect ownership of five percent or more in the capital, stock, or profits of the home health agency.
- The physician has an ownership of five percent or more of any mortgage, deed of trust, or other obligation that is secured by the agency, if that interest equals five percent or more of the agency's assets.

A physician is considered to have a significant financial or contractual relationship with a home health agency if any of the following conditions apply:

- The physician receives any compensation as an officer or director of the home health agency.
- The physician has indirect business transactions, such as contracts, agreements, purchase orders, or leases to obtain services, supplies, equipment, space, and salaried employment with the home health agency.

- The physician has direct or indirect business transactions with the home health agency that, in any fiscal year, amount to more than \$25,000 or 5 percent of the agency's total operating expenses, whichever is less.

When providing CCP services and general home health services, the provider must file these on two separate UB-04 CMS-1450 paper claim forms with the appropriate prior authorization number, and must send them to the appropriate address.

Claims denied because of an ownership conflict will continue to be denied unless the home health agency submits documentation indicating that the ordering physician no longer has a significant ownership interest in, or a significant financial or contractual relationship with, the home health agency providing services. Documentation must be sent to TMHP Provider Enrollment at the address indicated in "Written Communication With TMHP" in "Appendix A: State, Federal, and TMHP Contact Information" (*Vol. 1, General Information*).

1 General Information

The information in this handbook is intended for family planning clinic providers and federally qualified health center (FQHC) providers who are contracted by the Department of State Health Services (DSHS) as Expanded Primary Health Care (EPHC) providers. The handbook provides information about Texas Medicaid's benefits, policies, and procedures that are applicable to EPHC providers.

Important: *All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver healthcare items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

Refer to: The *Children's Services Handbook (Vol. 2, Provider Handbooks)* for more information about providing services to Texas Medicaid and Texas Health Steps (THSteps) clients.
Section 1: Provider Enrollment and Responsibilities (*Vol. 1, General Information*).
Subsection "Medicaid Program Administration" in Preliminary Information (*Vol. 1, General Information*)

1.1 Expanded Primary Health Care (EPHC) Program Overview

DSHS awards contracts to agencies across Texas to provide services to low-income individuals who may not qualify for Texas Medicaid services. These awards are granted through a competitive procurement process.

1.2 EPHC Provider Enrollment

EPHC contractors are required to enroll as Texas Medicaid providers with TMHP. The EPHC contractor must complete the paper or electronic Texas Medicaid Provider Enrollment Application, including all required forms. Providers can access the online application or download all necessary paper forms from the TMHP website at www.tmhp.com.

The EPHC contractor must also enter into a written provider agreement with the Texas Health and Human Services Commission (HHSC), the single state Medicaid agency.

Refer to: The [EPHC](#) page of the DSHS website at for additional information.

Section 1: Provider Enrollment and Responsibilities for additional information.

1.3 Services, Benefits, Limitations, and Prior Authorization

EPHC priority services include:

- Diagnosis and treatment.
- Emergency medical services.
- Family planning services.
- Preventive health services.
- Health education.

- Laboratory, X-ray, nuclear medicine, or other appropriate diagnostic services.
- Medical nutrition therapy and counseling.

Prior authorization is not required for EPHC services except for family planning sterilization services as indicated in subsection 1.3.1, “Sterilization Services” in this handbook.

Note: EPHC providers can use the Online Fee Look-up (OFL) to determine the reimbursement amounts by procedure code.

1.3.1 Sterilization Services

1.3.1.1 Sterilization Consent

Providers are required to submit sterilization consent forms for EPHC sterilization services. The consent forms must be kept on file and used for sterilization services.

Note: Hysterectomy Acknowledgment forms are not sterilization consents.

Refer to: [Sterilization Consent Form \(English\)](#) on the TMHP website at www.tmhp.com.

[Sterilization Consent Form \(Spanish\)](#) on the TMHP website at www.tmhp.com.

[Sterilization Consent Form Instructions](#) on the TMHP website at www.tmhp.com.

1.4 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered.

EPHC services and family planning services are subject to retrospective review and recoupment if documentation does not support the services that are billed.

1.5 EPHC Claims Filing and Reimbursement

1.5.1 * Claims Information

Providers must use the 2017 Claim Form to submit EPHC Program claims to TMHP.

Note: To submit EPHC Program claims using TexMedConnect, providers must choose Family Planning Program “EPHC” on the electronic version of the 2017 claim form.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information about third-party electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for information about claims filing.

The following applies when filing claims:

- EPHC providers must submit all claims and Sterilization Consent Forms with benefit code FP3.
- When completing a 2017 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.
- EPHC services are not subject to global surgery guidelines (excluding procedure codes 55250, 58600, and 58565).
- All claims must be filed within the required filing deadlines.
- **Dates of service that span multiple contract periods must be submitted on separate claims for services performed within each contract period.**
- Denied claims may be appealed.

EPHC providers are required to adhere to the Centers for Medicare & Medicaid Services (CMS) National Correct Coding Initiative (NCCI) guidelines.

1.5.1.1 Filing Deadlines

EPHC claims must be filed within the filing deadlines outlined in subsection 6.1.4, “Claims Filing Deadlines” in “Section 1: Claims Filing” (*Vol. 1, General Information*).

Note: *As stated in the DSHS Expanded Primary Health Care Program (EPHC) Policy Manual, all claims and appeals must be submitted and processed within 60 days of the end of the contract period.*

1.5.1.2 Retroactive Medicaid Eligibility

EPHC claims for clients who receive retroactive Texas Medicaid eligibility will be reprocessed by Texas Medicaid. If the EPHC service is not a benefit of Texas Medicaid, the service will be denied.

Group providers can submit EPHC claims without a performing provider number; however, group providers must submit Texas Medicaid claims with a performing provider number. If a client receives retroactive Texas Medicaid eligibility and the claim is reprocessed by Texas Medicaid, the claim will be denied if the performing provider number is omitted from the claim. The provider can appeal the claim with the performing provider number for Texas Medicaid reimbursement.

1.5.2 Reimbursement

Reimbursement information for EPHC procedures is available in the TMHP Online Fee Lookup (OFL) on the TMHP website at www.tmhp.com. EPHC providers will receive funds based on the determined contract year with effective and terminate dates. Contract periods will always be for a full calendar month. The start date is the first day of the calendar month and the end date is the last day of the calendar month. Medicaid cutbacks will apply to the EPHC program.

1.5.2.1 Funds Gone

EPHC providers are contracted to provide services for a specific time period, either the state fiscal year or a contract period within the fiscal year. Providers receive a specific budget amount for their contract period. When their claims payments have reached their budget allowance, providers must continue to submit claims. The amount of funds that they would have received had the funds been available will be tracked as “funds gone.” Providers may receive additional funds for a contract period at a later time. Claims identified as “funds gone” may be reimbursed at that time. On the Remittance and Status (R&S) Report, “Claims Paid” is the dollar amount of claims paid during this financial transaction period. “Approved to Pay/Not Funds Gone” is the dollar amount that has been processed and approved to pay, but the payment has not been issued yet. “Funds Gone” is the dollar amount that has been submitted after the provider’s budget allowance has been reached. The amount in “Approved to Pay/Not Funds Gone” added to the amount in “Funds Gone” will equal the amount in the “Approved to Pay - New Claims” section.

1 General Information

The information in this handbook is intended for gynecological and reproductive health services providers, Texas Medicaid Title XIX family planning providers, and DSHS Family Planning Program providers. The handbook provides information about Texas Medicaid's benefits, policies, and procedures that are applicable to these service providers.

Important: *All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide healthcare services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver healthcare items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

Refer to: *The Children's Services Handbook (Vol. 2, Provider Handbooks) for more information about providing services to Texas Medicaid/Texas Health Steps (THSteps) clients.*

Section 1: Provider Enrollment and Responsibilities (Vol. 1, General Information)

“Medicaid Program Administration” in “Preliminary Information” (Vol. 1, General Information)

Department of State Health Services (DSHS) website at www.dshs.state.tx.us/famplan/ for information about family planning and the locations of clinics receiving family planning funding from DSHS.

This handbook contains information about Texas Medicaid fee-for-service benefits. For information about managed care benefits, providers can refer to the Medicaid Managed Care Handbook.

Managed care carve-out services are administered as fee-for-service benefits. A list of all carve-out services is available in the Texas Medicaid Managed Care Handbook.

Refer to: *Section 8, “Carve-Out Services” in the Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks).*

1.1 Family Planning Overview

TMHP processes family planning claims and encounters for two different funding sources:

- The DSHS Family Planning program funding for DSHS-contracted providers
- The Title XIX family planning funding for Texas Medicaid providers

DSHS awards contracts to agencies across Texas to provide services to low-income individuals who may not qualify for Texas Medicaid services. These awards are granted through a competitive procurement process. DSHS contracts with a variety of providers, including local health departments, universities, medical schools, private nonprofit agencies, FQHCs, RHCs, and hospital districts. All DSHS-contracted providers must first be enrolled in Title XIX Texas Medicaid.

Client eligibility requirements, reimbursement methodologies, client copayment guidelines, and covered services may differ for each funding source. Family planning funding cannot be used for elective abortion services.

- Title XIX funds are available for family planning services provided to Texas Medicaid clients. TMHP processes Title XIX claims and reimburses eligible services on a fee-for-service basis for family planning providers and a prospective payment system basis for FQHC and RHC providers.
- DSHS Family Planning Program contracts annually with family planning providers. TMHP processes claims and reimburses providers for services to eligible clients according to the individually granted funds.
- Funds are also available for limited family planning services provided to Texas Women's Health Program (TWHP) clients. TMHP processes TWHP claims and reimburses eligible services on a fee-for-service basis for family planning providers and a prospective payment system basis for FQHC and RHC providers.

1.1.1 Guidelines for Family Planning Providers

The following guidelines apply for all family planning services:

- Family planning services may be provided by a physician or under the direction of a physician, not necessarily personal supervision. A physician provides direction for family planning services through written standing delegation orders and medical protocols. The physician is not required to be on the premises for the provision of family planning services by a registered nurse (RN), physicians assistant (PA), nurse practitioner (NP), clinical nurse specialist (CNS), or certified nurse midwife (CNM).
- Services must be provided without regard to age, marital status, sex, race, ethnicity, parenthood, handicap, religion, national origin, or contraceptive preference.
- Texas Medicaid clients, including limited care clients, are allowed to choose any enrolled family planning service provider.
- Family planning clients must be allowed freedom of choice in the selection of contraceptive methods as medically appropriate.
- Family planning clients must be allowed the freedom to accept or reject services without coercion.
- Only family planning clients may consent to the provision of family planning services. Counseling should be offered to adolescents that encourages them to discuss their family planning needs with a parent, an adult family member, or other trusted adult.
- Sterilization services cannot be provided to any person who is 20 years of age or younger. For more information, DSHS-contracted providers may refer to the DSHS website at www.dshs.state.tx.us/famplan/rules.shtm.

1.2 Payment Window Reimbursement Guidelines for Services Preceding an Inpatient Admission

According to the three-day and one-day payment window reimbursement guidelines, most professional and outpatient diagnostic and nondiagnostic services that are rendered within the designated timeframe of an inpatient hospital stay and are related to the inpatient hospital admission will not be reimbursed separately from the inpatient hospital stay if the services are rendered by the hospital or an entity that is wholly owned or operated by the hospital.

These reimbursement guidelines do not apply in the following circumstances:

- The professional services are rendered in the inpatient hospital setting.
- The hospital and the physician office or other entity are both owned by a third party, such as a health system.
- The hospital is not the sole or 100-percent owner of the entity.

Refer to: Subsection 3.7.3.8, “Payment Window Reimbursement Guidelines” of the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for additional information about the payment window reimbursement guidelines.

2 Medicaid Title XIX family planning services

2.1 Title XIX Provider Enrollment

Physician, FQHC, and RHC providers may provide Title XIX family planning services for Texas Medicaid clients under the provider’s Texas Medicaid provider number. No additional enrollment is required to provide Title XIX family planning services.

Refer to: Subsection 7.1, “Provider Enrollment” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for information about physician provider enrollment.

Section 4.1, “Enrollment” in the *Clinics and Other Outpatient Facility Services Handbook (Vol. 2, Provider Handbooks)* for information about FQHC provider enrollment.

Section 7.1, “Enrollment” in the *Clinics and Other Outpatient Facility Services Handbook (Vol. 2, Provider Handbooks)* for information about RHC provider enrollment.

Family planning agencies must apply for enrollment with TMHP to receive an agency provider identifier. To be enrolled in Texas Medicaid, family planning agencies must meet the following requirements:

- Complete an agency enrollment application.
- Ensure that all services are furnished by, prescribed by, or provided under the direction of a licensed physician in accordance with the Texas Medical Board or Texas BON.
- Have a medical director who is a physician currently licensed to practice medicine in Texas, and submit a current copy of the medical director’s physician license.
- Have an established record of performance in the provision of both medical and educational counseling of family planning services as verified through client records, established clinic hours, and clinic site locations.
- Provide family planning services in accordance with DSHS standards of client care for family planning agencies.
- Be approved for family planning services by the DSHS Family Planning Program.

Note: *An RHC can also apply for enrollment as a family planning agency.*

The effective date for participation is the date an approved provider agreement with Medicaid is established and the provider is assigned a Medicaid provider identifier.

Providers cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

Refer to: Section 1: Provider Enrollment and Responsibilities (*Vol. 1, General Information*) for more information about enrollment procedures.

Subsection 6.3.6, “Benefit Code” in Section 6, “Claims Filing” (*Vol. 1, General Information*) for more information about benefit codes.

2.2 Services, Benefits, Limitations, and Prior Authorization

This section includes information on family planning services funded through Title XIX Medicaid.

Family planning services are preventive health, medical, counseling, and educational services that assist individuals in managing their fertility and achieving optimal reproductive and general health. Title XIX services include:

- Family planning annual exams
- Other family planning office or outpatient visits
- Laboratory services
- Radiology services
- Contraceptive devices and related procedures
- Drugs and supplies
- Medical counseling and education
- Sterilization and sterilization-related procedures (i.e., tubal implants, tubal ligation, vasectomy, and anesthesia for sterilization)

Providers must use one of the following diagnosis codes in conjunction with all family planning procedures and services:

Diagnosis Codes									
V2501	V2502	V2504	V2509	V2511	V2512	V2513	V252	V2540	V2541
V2542	V2543	V2549	V255	V258	V259	V2651	V2652		

One of the diagnosis codes in this table must be included in Block 24 E of the CMS-1500 claim form referencing the appropriate procedure code. The choice of diagnosis code must be based on the type of family planning service performed.

Note: Title XIX family planning services are exempt from the limited program and rules.

2.2.1 Family Planning Annual Exams

An annual family planning exam consists of a comprehensive health history and physical examination, which includes the following:

- Medical laboratory evaluations as indicated
- An assessment of the client's problems and needs
- The implementation of an appropriate contraceptive management plan

Family planning providers must bill the most appropriate evaluation and management (E/M) visit procedure code for the complexity of the annual family planning examination provided. To bill an annual family planning examination, one of the following procedure codes must be billed with modifier FP and a family planning diagnosis code:

Procedure Codes									
99201	99202	99203	99204	99205	99211	99212	99213	99214	99215

Important: Only the annual family planning examination requires modifier FP. All other family planning office visits do not. One annual family planning examination is allowed per year. Claims filed incorrectly may be denied.

The following table summarizes the uses for the E/M procedure codes and the corresponding billing requirements for the annual examination:

Billing Criteria	Frequency
<i>New patient:</i> Most appropriate E/M procedure code with modifier FP and a family planning diagnosis code	One new patient E/M code every 3 years following the last E/M visit provided the client by that provider or a provider of the same specialty in the same group
<i>Established patient:</i> Most appropriate E/M procedure code with modifier FP and a family planning diagnosis code	Once a year*
* The established patient procedure code will be denied if a new patient procedure code has been billed in the same year.	

An annual family planning examination (billed with modifier FP) will not be reimbursed when submitted with the same date of service as a surgical procedure or an additional E/M visit.

If another condition requiring an E/M office visit beyond the required components for the annual examination is discovered, the provider may submit a claim for the additional visit using modifier 25 to indicate that the client's condition required a significant, separately identifiable E/M service. Documentation supporting the provision of a significant, separately identifiable E/M service must be maintained in the client's medical record and made available to Texas Medicaid upon request.

2.2.1.1 FQHC Reimbursement for Family Planning Annual Exams

To receive their encounter rate for the annual family planning examination, FQHCs must use the most appropriate E/M procedure code for the complexity of service provided as indicated in the previous table in subsection 2.2.1, "Family Planning Annual Exams" in this handbook.

The annual exam is allowed once per fiscal year, per client, per provider. Two additional family planning office or outpatient visits may be reimbursed to the FQHC within the same year for the same client.

A new patient visit for the annual exam may be reimbursed once every three years following the last E/M visit provided to the client by that provider or a provider of the same specialty in the same group. The annual examination must be billed as an established patient visit if E/M services have been provided to the client within the last three years.

Reimbursement for services payable to an FQHC is based on an all-inclusive rate per visit.

2.2.2 Other Family Planning Office or Outpatient Visits

Other family planning E/M visits are allowed for routine contraceptive surveillance, family planning counseling and education, contraceptive problems, suspicion of pregnancy, genitourinary infections, and evaluation of other reproductive system symptoms.

During any visit for a medical problem or follow-up visit, the following must occur:

- An update of the client's relevant history
- Physical exam, if indicated
- Laboratory tests, if indicated
- Treatment or referral, if indicated
- Education and counseling, or referral, if indicated
- Scheduling of office or clinic visit, if indicated

Title XIX family planning providers must use one of the following procedure codes based on the complexity of the visit with a family planning diagnosis for other family planning office or outpatient visits:

Procedure Codes									
99201	99202	99203	99204	99205	99211	99212	99213	99214	99215

Important: Family planning E/M office and outpatient visits should not be billed with modifier FP. Claims filed incorrectly may be denied.

The following table summarizes the uses for the E/M procedure codes and the corresponding billing requirements for each type of visit:

Billing Criteria	Frequency
<i>New patient:</i> Most appropriate E/M procedure code with a family planning diagnosis code	One new patient E/M code every 3 years following the last E/M visit provided the client by that provider or a provider of the same specialty in the same group
<i>Established patient:</i> Most appropriate E/M procedure code with a family planning diagnosis code	As needed*
* The established patient procedure code will be denied if a new patient procedure code has been billed in the same year.	

Refer to: Subsection 2.2, “Services, Benefits, Limitations, and Prior Authorization” in this handbook for the list of family planning diagnosis codes.

A general family planning office or outpatient visit (billed without modifier FP) will not be reimbursed when submitted with the same date of service as a surgical procedure or an additional E/M visit. If another condition requiring an E/M office visit beyond the required components for an office visit, family planning visit, or surgical procedure is discovered, the provider may submit a claim for the additional visit using modifier 25 to indicate that the client’s condition required a significant, separately identifiable E/M service. Documentation supporting the provision of a significant, separately identifiable E/M service must be maintained in the client’s medical record and made available to Texas Medicaid upon request.

2.2.2.1 FQHC Reimbursement for Other Family Planning Office or Outpatient Visits

FQHCs may be reimbursed for three family planning encounters per year, per client, regardless of the reason for the encounter. The three encounters may include any combination of general family planning, annual family planning exams, or services (procedure code J7300, J7301, J7302, or J7307).

A family planning diagnosis code must be billed along with the most appropriate informational procedure codes for the services that were rendered. Reimbursement for services payable to an FQHC is based on an all-inclusive rate per visit.

Refer to: Section 4, “Federally Qualified Health Center (FQHC)” in the *Clinics and Other Outpatient Facility Services Handbook, (Vol. 2, Provider Handbooks)* for more information about FQHC services.

2.2.3 Laboratory Procedures

All family planning laboratory services must be billed with a family planning diagnosis code.

2.2.3.1 Clinical Laboratory Improvement Amendments (CLIA) Requirement

All providers of laboratory services must comply with the rules and regulations of the CLIA. Providers who are not in compliance with CLIA will not be reimbursed for laboratory services. Only the office or lab that holds the appropriate CLIA certificate and that actually performs the laboratory test procedure may be reimbursed for the procedure.

Refer to: Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*

2.2.3.2 Medical Record Documentation

Medicaid family planning service providers must document in the client’s medical record the medical necessity of all ordered laboratory services. The medical record documentation must also reference an appropriate diagnosis.

2.2.3.3 Lab Specimen Handling and Testing

Any test specimen sent to a laboratory may be reimbursed to the laboratory that performs the test and not to the referring family planning provider.

If the provider that obtains the specimen does not perform the laboratory procedure, the provider that obtains the specimen may be reimbursed one lab handling fee per day, per client, using procedure code 99000 and a family planning diagnosis code for the handling or conveyance of the specimen from the provider’s office to a laboratory. More than one lab handling fee may be reimbursed per day if multiple specimens are obtained and sent to different laboratories.

Handling fees are not paid for Pap smears or cultures. The appropriate procedure code may be reimbursed for Pap smear interpretations when billed with modifier SU indicating that the screening and interpretation were actually performed in the office.

2.2.3.4 Providing Information to the Reference Laboratory

When sending any specimen, including Pap smears, to the reference laboratory, the family planning provider must provide the reference laboratory with the client’s name, address, Texas Medicaid number, and a family planning diagnosis so the laboratory may bill Texas Medicaid for its family planning lab services.

2.2.4 Radiology Services

Procedure codes 74000, 74010, and 76830 may be reimbursed for services performed for the purpose of localization of an intrauterine device (IUD).

2.2.5 Contraceptive Devices and Related Procedures

2.2.5.1 External Contraceptives

Procedure codes A4261 (cervical cap) and A4266 (diaphragm) may be reimbursed separately from the fitting and instruction (procedure code 57170).

Procedure codes A4261 and A4266 may be reimbursed when they are billed with one of the following diagnosis codes:

Diagnosis Codes									
V2501	V2502	V2503	V2509	V2512	V252	V2540	V2541	V2542	V2543
V2549	V255	V258	V259	V615					

2.2.5.2 Intrauterine Device

2.2.5.2.1 Insertion of the IUD

The IUD and the insertion of the IUD may be reimbursed using procedure code J7300, J7301, J7302, and 58300.

When a vaginal, cervical, or uterine surgery procedure code is submitted with the same date of service as the IUD insertion procedure code, the following reimbursement may apply:

- The other vaginal, cervical, or uterine surgical procedure may be reimbursed at full allowance, and
- The IUD insertion will be reimbursed at half the allowed amount.

Procedure code J7302 may be reimbursed when it is billed with one of the following diagnosis codes:

Diagnosis Codes										
V2502	V2503	V2509	V2511	V2513	V2540	V2542	V2549	V258	V259	V615

2.2.5.2.2 Removal of the IUD

Procedure code 58301 may be reimbursed when an IUD is extracted from the uterine cavity. An office visit will not be reimbursed when billed on the same date of service as procedure code 58301.

When a vaginal, cervical, or uterine surgery procedure code is submitted with the same date of service as the IUD removal procedure code or the IUD replacement procedure code, the following reimbursement may apply:

- The other vaginal, cervical, or uterine surgical procedure may be reimbursed at full allowance.
- The removal or the replacement of the IUD will be denied.

2.2.5.3 Contraceptive Capsules

The contraceptive capsule and the implantation of the contraceptive capsule may be reimbursed using procedure code J7307 and may be reimbursed once every three rolling years.

Procedure code 11981 may be reimbursed for the insertion of the implant device when it is billed with a family planning diagnosis code.

Procedure code 11983 may be reimbursed for the removal with reinsertion of the implant device when it is billed with a family planning diagnosis code. Progesterone-containing subdermal contraceptive capsules (Norplant) were previously used for birth control. Although subdermal contraceptive capsules are no longer approved by the Food and Drug Administration (FDA), the removal of the implanted contraceptive capsule may be considered for reimbursement with procedure code 11976 or 11982.

2.2.6 Drugs and Supplies

The following procedure codes may be reimbursed for drugs and supplies:

Procedure Codes								
A4267	A4268	A4269	J1050	J3490*	J7303	J7304	S4993	96372
* Procedure code J3490 may be reimbursed when a prescription medication to treat a genital infection is provided to the client.								

Procedure code J1050 with modifier U1 may be reimbursed for services rendered to female clients as medically appropriate for the purpose of contraception. A quantity of 1 must be billed.

Procedure code J1050 (no modifier) may be reimbursed for services rendered to male and female clients of any age for other indications as appropriate. Providers must bill the appropriate quantity based on the amount used in milligrams (mg).

For Texas Medicaid Title XIX services, procedure code J1050 is not diagnosis-restricted. For Title XIX family planning services, procedure code J1050 must be billed with a valid family planning diagnosis code.

Procedure codes A4268, A4269, and S4993 may be reimbursed when they are billed with one of the following diagnosis codes:

Diagnosis Codes									
V2501	V2502	V2503	V2509	V2512	V252	V2540	V2541	V2542	V2543
V2549	V255	V258	V259	V615					

Procedure code A9150 is not reimbursed through Title XIX Medicaid for the medication to treat a monilia infection. The drug is available through the Medicaid Vendor Drug Program with a prescription.

Refer to: “Appendix B: Vendor Drug Program” (*Vol. 1, General Information*) for information about outpatient prescription drugs and the Medicaid Vendor Drug Program.

2.2.6.1 Prescriptions and Dispensing Medication

Family planning agencies may do one or both of the following:

- Dispense family planning drugs and supplies directly to the client and bill accordingly.
- Write a prescription for the client to take to a pharmacy.

Family planning drugs and supplies that are dispensed directly to the client must be billed to TMHP for Texas Medicaid fee-for-service clients. Only family planning agencies may be reimbursed for dispensing family planning drugs and supplies. Family planning agencies may be reimbursed for dispensing up to a 1-year supply of contraceptives in a 12-month period using procedure code J7303, J7304, or S4993. The appropriate family planning diagnosis code must be included on the claim.

Refer to: Subsection 2.2, “Services, Benefits, Limitations, and Prior Authorization” in this chapter.

Title XIX clients may have prescriptions filled at the clinic pharmacy or at another pharmacy. Pharmacies under the Vendor Drug Program are allowed to fill all prescriptions as prescribed. Family planning drugs and supplies are exempt from the three prescriptions-per-month rule for up to a six-month supply.

2.2.6.2 Long-Acting Reversible Contraception Products

Certain long-acting reversible contraception (LARC) products are available as a pharmacy benefit of Family Planning and are available through a limited number of specialty pharmacies that work with LARC manufacturers. Providers can refer to the Texas Medicaid/CHIP Vendor Drug Program website at www.txvendordrug.com/formulary/larc.shtml for additional information, including a list of covered products and participating specialty pharmacies.

2.2.6.3 Injection Administration

Injection administration billed by a provider is reimbursed separately from the medication. If billed without procedure code J1050 and modifier U1, procedure code 96372 must be billed with a family planning diagnosis and a description of the medication in the Remarks field of the claim. Injection administration is not payable to outpatient hospitals.

Refer to: Subsection 2.2, “Services, Benefits, Limitations, and Prior Authorization” in this handbook for a list of family planning diagnosis codes.

2.2.7 Medical Counseling and Education

Procedure code H1010 for the instruction in natural family planning methods may be reimbursed once per day, per person or per couple, when billed by any provider with one of the following diagnosis codes:

Diagnosis Codes									
V2501	V2502	V2504	V2509	V2510	V2511	V2512	V2513	V252	V2540
V2541	V2542	V2543	V2549	V255	V258	V259	V2651	V2652	

Procedure code H1010 is intended to instruct a couple or an individual in methods of natural family planning. Two sessions (one per client) may be billed for separate, individual sessions, or one session may be billed for counseling and education if provided in a joint session. Each session may be billed separately or the two sessions may be billed together with a total charge for both sessions.

2.2.8 Sterilization and Sterilization-Related Procedures

For a complete list of Title XIX sterilization procedures, providers can refer to the Texas Medicaid fee schedules located on the TMHP website at <http://public.tmhp.com/FeeSchedules/Default.aspx>.

2.2.8.1 Sterilization Consent

Per federal regulation 42 CFR 50, Subpart B, all sterilization procedures require an approved Sterilization Consent Form.

Note: *The Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form is not sterilization consent.*

Refer to: [Sterilization Consent Form \(English\)](#) on the TMHP website at www.tmhp.com.

[Sterilization Consent Form \(Spanish\)](#) on the TMHP website at www.tmhp.com.

[Sterilization Consent Form Instructions](#) on the TMHP website at www.tmhp.com.

2.2.8.2 Anesthesia for Sterilization

Procedure codes 00840, 00851, and 00940 may be reimbursed for anesthesia for sterilization services in accordance with standard anesthesia billing requirements. Providers must include a valid family planning diagnosis code on the claim.

Refer to: Subsection 6.2.5.2, “Anesthesia” in Section 6, “Claims Filing” (*Vol. 1, General Information*) for more information about anesthesia modifiers.

2.2.8.3 Occlusive Sterilization Device

Procedure code A4264 may be reimbursed for the occlusive sterilization system (micro-insert), and may be reimbursed separately from the surgery (procedure code 58565) to place the device.

Providers must bill procedure code A4264 on the same date of service by the same provider as the occlusive sterilization system (micro-insert).

Procedure code 58565 is considered bilateral and is limited to once per lifetime, any provider.

2.2.8.4 Tubal Ligation

Procedure code 58600, 58615, 58670, or 58671 may be reimbursed for tubal ligations.

2.2.8.5 Vasectomy

Procedure code 55250 may be reimbursed for any sterilization procedure that is performed on a male by a family planning agency. This procedure code may be reimbursed as a global fee to include preoperative, intra-operative, and postoperative services by all parties involved. Vasectomies are considered to

be permanent, once-per-lifetime procedures. If a vasectomy has previously been reimbursed for the client, providers may appeal with documentation that supports the medical necessity for the repeat sterilization.

2.2.8.6 Facility Fees for Sterilization

Hospital-based and freestanding ambulatory surgical centers (HASCs/ASCs) may be reimbursed for procedure code 55250, 58565, 58600, 58615, 58670, or 58671. An appropriate family planning diagnosis code must be billed when reporting facility fees for procedure codes 58565 or 58670.

Refer to: [Ambulatory Surgical Center](#) on the TMHP website at www.tmhp.com for a claim form example.

2.2.9 Prior Authorization

Prior authorization is not required for family planning services, including sterilization and sterilization-related procedures.

2.2.10 Non-covered Services

2.2.10.1 Family Planning Services for Undocumented Aliens

Undocumented aliens are identified on the client eligibility card as having limited Medicaid eligibility by the classification of Type Program (TP) 30, 31, 34, and 35. Under Texas Medicaid, these clients are only eligible for emergency services, including emergency labor and delivery. Texas Medicaid emergency-only services do not cover Title XIX family planning services.

2.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including gynecological and reproductive health services, and family planning services.

Gynecological and reproductive health services, and family planning services are subject to retrospective review and recoupment if documentation does not support the service billed.

2.4 Claims Filing and Reimbursement

2.4.1 Claims Information

Providers may use the following claim forms to submit claims to TMHP:

Providers	Forms
Medicaid Fee-For-Service Claims Submitted to TMHP	
All family planning services provided by physicians, PAs, NPs, CNSs, CNMs, and family planning agencies who also contract with DSHS	2017 claim form or approved electronic format
Medicaid family planning providers who do not contract with DSHS	2017 claim form, CMS-1500 claim form, or approved electronic format of either form
Hospitals	UB-04 CMS-1450 claim form or approved electronic format
FQHCs not contracted with DSHS	UB-04 CMS-1450, 2017 claim form, or approved electronic format of either form
FQHC also contracts with DSHS	2017 claim form or approved electronic format

The following applies when filing claims:

- All claims and Sterilization Consent Forms submitted by family planning agencies must be submitted with benefit code FP3.

- Family planning services billed by RHCs must include modifier AJ, AM, SA, or U7. These services must be billed using the appropriate national place of service (72) for an RHC setting.
- When completing a 2017, CMS-1500, or UB-04 CMS-1450 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.
- All claims must be filed within approved filing deadlines.
- Denied claims may be appealed.

Providers may copy [2017 Claim Form](#) on the TMHP website at www.tmhp.com.

Providers may purchase CMS-1500 and UB-04 CMS-1450 claim forms from the vendor of their choice. TMHP does not supply the forms.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (*Vol. 1, General Information*) for information on electronic claims submissions.

Section 6: Claims Filing (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.9, “Family Planning Claim Form (Paper Billing)” in Section 6, “Claims Filing” (*Vol. 1, General Information*).

Subsection 6.9.1, “2017 Claim Form” in Section 6, “Claims Filing” (*Vol. 1, General Information*).

Subsection 6.5.4, “CMS-1500 Instruction Table” in Section 6, “Claims Filing” (*Vol. 1, General Information*).

Subsection 6.6.3, “UB-04 CMS-1450 Instruction Table” in Section 6, “Claims Filing” (*Vol. 1, General Information*).

Subsection 6.1.4, “Claims Filing Deadlines” in Section 6, “Claims Filing” (*Vol. 1, General Information*) for information about filing deadlines.

Section 7: Appeals (*Vol. 1, General Information*) for information about appealing claims.

Blocks that are not referenced are not required for processing by TMHP and may be left blank.

RHCs must use their National Provider Identifier (NPI), the appropriate benefit code as applicable, and the appropriate modifier and place of service as outlined in this section.

2.4.1.1 Family Planning and Third Party Liability

Federal and state regulations mandate that family planning client information be kept confidential. Because seeking information from third party insurance may jeopardize the client’s confidentiality, prior insurance billing is not a requirement for billing family planning for any title program.

2.4.2 Billing Procedures for Non-Family-Planning Services Provided During a Family Planning Visit (Title XIX Only)

When a non-family-planning service is provided during a family planning visit or the client is offered family planning services during a medical visit, the following billing process must be used:

- A family planning clinic must bill for non-family-planning services using the performing provider’s identifier. The clinic provider identifier is used to bill family planning services only.
- The performing provider must bill both family planning services and non-family-planning services, using the correct provider identifier.
- The FQHC must bill both family planning services and non-family-planning services, using the correct provider identifier.

- An RHC may bill a rural health encounter for a non-family-planning medical condition or use the physician's or NP's provider identifier to bill for family planning services. If the RHC also is enrolled as a family planning agency, the family planning services may be billed using the agency's family planning provider identifier and the appropriate national place of service (72) for an RHC setting.

2.4.3 National Drug Code

Refer to: Subsection 6.3.4, “National Drug Code (NDC)” in Section 6, “Claims Filing” (*Vol. 1, General Information*).

2.4.4 National Correct Coding Initiative (NCCI) and Medically Unlikely Edit (MUE) Guidelines

The Healthcare Common Procedure Coding System (HCPCS) and Current Procedural Terminology (CPT) codes included in the *Texas Medicaid Provider Procedures Manual* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals and bulletins. Providers should refer to the [Centers for Medicare & Medicaid Services \(CMS\) NCCI web page](#) for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

3 Texas Women's Health Program

3.1 Texas Women's Health Program (TWHP) TWHP Overview

The goal of TWHP is to expand access to family planning services to reduce unintended pregnancies in the eligible population.

TWHP is established to achieve the following objectives:

- Implement the state policy to favor childbirth and family planning services that do not include elective abortions or the promotion of elective abortions.
- Ensure the efficient and effective use of state funds in support of these objectives and to avoid the direct or indirect use of state funds to promote or support elective abortions.
- Reduce the overall cost of publicly-funded healthcare (including federally-funded healthcare) by providing low-income Texans access to safe, effective services that are consistent with these objectives.
- Enforce Human Resources Code, §32.024(c-1) and any other state law that regulates delivery of non-federally funded family planning services.

Refer to: Subsection 1.1, “Family Planning Overview” in this handbook for an overview of family planning funding sources.

The TMHP TWHP web page at www.tmhp.com/Pages/TWHP/TWHP_Home.aspx, for more information about provider certification.

3.1.1 Guidelines for TWHP Providers

TWHP provides an annual family planning exam, family planning services, contraception, and treatment for certain sexually transmitted infections (STIs) for women who meet the following qualifications:

- Must be 18 through 44 years of age
- Must be a United States citizen or eligible immigrant
- Must be a resident of Texas

- Does not currently receive full Medicaid benefits including Medicaid for pregnant women, Children’s Health Insurance Program (CHIP), or Medicare Part A or B.
- Does not have other insurance that covers family planning services, or has insurance that covers family planning services, but filing a claim on the health insurance would cause physical, emotional, or other harm from a spouse, parent, or other person
- Has a household income at or below 185 percent of the federal poverty level
- Is not pregnant
- Is not sterile, infertile, or unable to get pregnant because of medical reasons

Note: *Women who have received a sterilization procedure, but have not been confirmed to be sterile, may be eligible for sterilization follow-up services.*

TWHP services are provided by a physician or under physician direction, not necessarily personal supervision. A physician provides direction for family planning services through written standing delegation orders and medical protocols. The physician is not required to be on the premises for the provision of family planning services by an RN, PA, NP, or CNS. TWHP participants may receive services from any provider that participates in TWHP.

TWHP clients must be allowed freedom of choice in the selection of contraceptive methods as medically appropriate. They must also be allowed the freedom to accept or reject services without coercion. All TWHP-covered methods of contraception must be made available to the client, either directly or by referral to another provider of contraceptive services. Services must be provided without regard to age, marital status, sex, race, ethnicity, parenthood, handicap, religion, national origin, or contraceptive preference. Only TWHP clients, not their parents, spouses, or any other individuals may consent to the provision of family planning services.

Providers may use the client’s Your Texas Benefits Card to verify the client’s TWHP eligibility on the HHSC website at www.yourtexasbenefitscard.com.

Client eligibility may also be verified using the following sources:

- The TMHP website at www.tmhp.com
- The Automated Inquiry System (AIS)
- TexMedConnect

Refer to: Subsection 4.5.3, “Client Eligibility Verification” in Section 4, “Client Eligibility” (Vol. 1, *General Information*).

TWHP clients will have the following identifiers on the feedback received from the stated source:

- Medicaid Coverage: W - MA - TWHP
- Program Type: 68 - MEDICAL ASSISTANCE - WOMEN’S HEALTH PR
- Program: 100 - MEDICAID
- Benefit Plan: 100 - Traditional Medicaid

A TWHP client can be disenrolled from the program before the 12-month term ends only in the following cases:

- The client dies
- The client voluntarily withdraws from TWHP
- The client no longer satisfies the TWHP eligibility criteria
- The client becomes eligible for full Medicaid, the Children’s Health Insurance Program (CHIP), or another publicly-funded health coverage program that is more comprehensive than TWHP

- HHSC discovers the client gave fraudulent information on the application
- The client moves out of Texas

If it is discovered during the visit that the client has received a surgical or nonsurgical sterilization procedure before enrolling with TWHP, but the client did not indicate that information on the TWHP application (e.g., because she filled out the TWHP application incorrectly, she misunderstood the question), the provider should:

- Inform the client that she is no longer eligible to receive TWHP services and that she is responsible for all of the fees for services rendered.
- Encourage the client to call 1-866-993-9972 to voluntarily withdraw from TWHP.

If a provider suspects that a TWHP client has committed fraud on the application, the provider should report the client to the HHSC Office of Inspector General (OIG) at 1-800-436-6184.

3.1.2 Referrals

If a provider identifies a health problem such as diabetes or high blood pressure, the provider must refer the TWHP client to another doctor or clinic that can treat her. As mandated by Texas Human Resources Code, Section 32.024(c-1), TWHP does not reimburse for office visits where TWHP clients are referred for elective abortions.

HHSC prefers that clients be referred to local indigent care services. However, the toll-free Information and Referral hotline 2-1-1, can assist clients and providers with locating low-cost health services for clients in need.

3.1.2.1 Referrals for Breast and Cervical Cancer Screening, Diagnostics, and Treatment

The Breast and Cervical Cancer Services program (BCCS) offers breast and cervical cancer screening and diagnostic services, and cervical dysplasia treatment throughout Texas at no or low-cost to eligible women.

3.1.2.2 Referrals for Clients Diagnosed with Breast or Cervical Cancer

Medicaid for Breast and Cervical Cancer (MBCC) provides access to cancer treatment through full Medicaid benefits for qualified women diagnosed with breast or cervical cancer. Health facilities that contract with BCCS are responsible for assisting women with the MBCC application.

To find a BCCS provider, call 2-1-1. For questions about the BCCS program, contact the state office at (512)-458-7796, or visit www.dshs.state.tx.us/bcccs/.

3.1.3 Abortions

Elective and non-elective abortions are not benefits of TWHP.

Texas Human Resources Code, Section 32.024(c-1) and Title 25 Texas Administrative Code, §39.38 prohibit the participation of a provider that performs or promotes elective abortion or affiliates with an entity that performs or promotes elective abortions.

A provider that performs elective abortions (through either surgical or medical methods) or that is affiliated with an entity that performs or promotes elective abortions for any patient is ineligible to serve TWHP clients and cannot be reimbursed for any services rendered to a TWHP client. This prohibition only applies to providers delivering services to TWHP clients. The prohibition does not impact services delivered to Medicaid clients who are not enrolled in TWHP.

“Elective abortion” means the intentional termination of a pregnancy by an attending physician who knows that the female is pregnant, using any means that is reasonably likely to cause the death of the fetus. The term does not include the use of any such means: (A) to terminate a pregnancy that resulted from an act of rape or incest; (B) in a case in which a woman suffers from a physical disorder, physical

disability, or physical illness, including a life-endangering physical condition caused by or arising from the pregnancy, that would, as certified by a physician, place the woman in danger of death or risk of substantial impairment of a major bodily function unless an abortion is performed; or (C) in a case in which a fetus has a severe fetal abnormality, meaning a life-threatening physical condition that, in reasonable medical judgment, regardless of the provision of life-saving treatment, is incompatible with life outside the womb.

Certain providers that want to participate in TWHP must certify that they do not perform or promote elective abortions and do not affiliate with any entity that does, as directed by HHSC.

Refer to: Subsection 3.2, “TWHP Provider Enrollment” in this handbook for more information about certification regarding elective abortions.

3.2 TWHP Provider Enrollment

Certain providers who deliver family planning services, have completed the Medicaid-enrollment process through TMHP, and have certified that they do not perform elective abortions or affiliate with providers that perform elective abortion are eligible to participate.

Refer to: Section 1: Provider Enrollment and Responsibilities (Vol. 1, General Information) for more information about enrollment procedures.
Subsection 2.1, “Title XIX Provider Enrollment” in this handbook.

Certain providers that want to participate in TWHP must certify that they do not perform or promote elective abortions and do not affiliate with any entity that does, as directed by HHSC. Providers may complete the Texas Women’s Health Program (TWHP) Provider Certification Form and disclose the required information as part of the Medicaid enrollment process, or at any time after completing the Medicaid enrollment process. New providers may use the TMHP website to submit the Texas Women’s Health Program (TWHP) Provider Certification Form through the Provider Enrollment Portal (PEP). Medicaid-only providers may use the TMHP website to submit the Texas Women’s Health Program (TWHP) Provider Certification Form through the Provider Information Management System (PIMS).

The following provider types are required to certify:

- Physician or physician group with a general surgery, family practice/general practice, gynecology, OB/GYN, internal medicine, or pediatric specialty, or a multispecialty clinic/group practice
- Federally Qualified Health Center (FQHC)
- Physician Assistant
- Nurse practitioner/clinical nurse specialist
- Certified nurse midwife/registered nurse/licensed midwife
- Maternity Services Clinic
- Family Planning Agency
- Rural Health Clinic - Freestanding/Independent
- Rural Health Clinic - Hospital Based
- Ambulatory Surgical Center - Freestanding/Independent

Information that providers submit through PIMS can be searched by clients who use the Find a Doctor Today feature on the TWHP website at www.texaswomenshealth.org.

3.3 Services, Benefits, Limitations, and Prior Authorization

This section includes information on family planning services funded through TWHP. TWHP benefits include:

- Annual family planning exam and Pap test
- Other family planning office or outpatient visits
- Laboratory procedures
- Radiology services
- Contraceptive methods and follow-up visits related to the client’s chosen contraceptive method
- Counseling for specific methods and use of contraception (as part of evaluation and management services), including natural family planning and excluding emergency contraception
- Drugs and supplies
- Medical counseling and education
- Female sterilization and sterilization-related procedures and follow-up visits, including procedures to confirm sterilization
- Pregnancy tests and STI screenings during a family planning exam
- Treatments for certain sexually transmitted infections (STIs)

For TWHP family planning claims to process correctly, providers must use one of the following diagnosis codes in conjunction with all TWHP family planning procedures and services:

Diagnosis Codes									
V2501	V2502	V2504	V2509	V2511	V2512	V2513	V252	V2540	V2541
V2542	V2543	V2549	V255	V258	V259	V2651			

The choice of diagnosis code must be based on the type of family planning service performed.

3.3.1 Family Planning Annual Exams

Family planning providers must bill the most appropriate E/M visit procedure code for the complexity of the annual family planning examination provided. To bill an annual family planning examination, one of the following procedure codes must be billed with modifier FP and a TWHP diagnosis code:

Procedure Codes									
99201	99202	99203	99204	99205	99211	99212	99213	99214	99215
99243									

Important: Only the annual family planning examination requires modifier FP. All other family planning office visits do not. One annual family planning examination is allowed per year. Claims filed incorrectly may be denied.

The following table summarizes the uses for the E/M procedure codes and the corresponding billing requirements for the annual examination:

Billing Criteria	Frequency
New patient: Most appropriate E/M procedure code with modifier FP and a TWHP diagnosis code	One new patient E/M code every 3 years following the last E/M visit provided the client by that provider or a provider of the same specialty in the same group

Billing Criteria	Frequency
<i>Established patient:</i> Most appropriate E/M procedure code with modifier FP and a TWHP diagnosis code	Once a year*

Refer to: Subsection 3.3, “Services, Benefits, Limitations, and Prior Authorization” in this handbook for the list of TWHP diagnosis codes.

Note: TWHP does not reimburse for follow-up visits after an abnormal Pap test.

3.3.1.1 FQHC Reimbursement for Family Planning Annual Exams

To receive their encounter rate for the annual family planning examination for TWHP clients, FQHCs must use the most appropriate E/M procedure code for the complexity of service provided as indicated in the previous tables in subsection 3.3.1, “Family Planning Annual Exams” in this handbook.

The annual exam is allowed once per fiscal year, per client, per provider. Other family planning office or outpatient visits may be billed within the same year.

A new patient visit for the annual exam may be reimbursed once every three years following the last E/M visit provided to the client by that provider or a provider of the same specialty in the same group. The annual examination must be billed as an established patient visit if E/M services have been provided to the client within the last three years.

Reimbursement for services payable to an FQHC is based on an all-inclusive rate per visit.

3.3.2 Other Family Planning Office or Outpatient Visits

TWHP only covers office or other outpatient family planning visits if the primary purpose of the visit is related to contraceptive management, as indicated by the allowable diagnosis codes previously listed. TWHP does not cover office or other outpatient family planning visits when the primary purpose of the visit is not related to contraceptive management, such as visits for the purpose of pregnancy testing only, STI testing, or a repeat Pap test after an abnormal result.

A provider is allowed to bill clients for services that are not a benefit of TWHP.

Refer to: Subsection 1.6.9.1, “Client Acknowledgment Statement” in Section 1, “Provider Enrollment and Responsibilities” (*Vol. 1. General Information*) for the requirements for billing clients.

For office or other outpatient family planning E/M visits, providers must bill one of the following procedure codes based on the complexity of the visit with a TWHP family planning diagnosis code:

Procedure Codes									
99201	99202	99203	99204	99205	99211	99212	99213	99214	99215
99253									

Important: Family planning E/M office and outpatient visits should not be billed with modifier FP. Claims filed incorrectly may be denied.

The following table summarizes the uses for the E/M procedure codes and the corresponding billing requirements for each type of visit:

Billing Criteria	Frequency
<i>New patient:</i> Most appropriate E/M procedure code with a TWHP diagnosis code	One new patient E/M code every 3 years following the last E/M visit provided the client by that provider or a provider of the same specialty in the same group

Billing Criteria	Frequency
<i>Established patient:</i> Most appropriate E/M procedure code with a TWHP diagnosis code	As needed*
* The established patient procedure code will be denied if a new patient procedure code has been billed in the same year.	

Refer to: Subsection 3.3, “Services, Benefits, Limitations, and Prior Authorization” in this handbook for the list of TWHP diagnosis codes.

Family planning services provided during a TWHP visit in which only family planning services were provided must be submitted with these procedure codes and the most appropriate informational procedure codes for services that were rendered.

The procedure codes in the previous table are allowed for routine contraceptive surveillance, family planning counseling and education, and contraceptive problems. Depending on the extent of the services provided during the office visit, providers may bill for the maximum allowable fees.

During any visit for a medical problem or follow-up visit the following must occur:

- An update of the client’s relevant history
- Physical exam, if indicated
- Laboratory tests, if indicated
- Treatment or referral, if indicated
- Education and counseling, or referral, if indicated
- Scheduling of office or clinic visit, if indicated

3.3.2.1 FQHC Reimbursement for Other Family Planning Office or Outpatient Visits

FQHCs may be reimbursed for three family planning encounters per client, per year regardless of the reason for the encounter. The three encounters may include any combination of general family planning encounters, an annual family planning examination, or procedure code J7300, J7302, or J7307.

A TWHP diagnosis code must be billed along with the most appropriate informational procedure codes for the services that were rendered. Reimbursement for services payable to an FQHC is based on an all-inclusive rate per visit.

Refer to: Section 4, “Federally Qualified Health Center (FQHC)” in the *Clinics and Other Outpatient Facility Services Handbook, (Volume 2, Provider Handbooks)* for more information about FQHC services.

3.3.3 Laboratory Procedures

If the provider who obtains the specimen does not perform the laboratory procedure, the provider who obtains the specimen may be reimbursed one lab handling fee per day, per client. The fee for the handling or conveyance of the specimen for transfer from the provider’s office to a laboratory may be reimbursed using procedure code 99000 and a family planning diagnosis code. More than one lab handling fee may be reimbursed per day if multiple specimens are obtained and sent to different laboratories.

Handling fees are not paid for Pap smears or cultures. When billing for Pap smear interpretations, the claim must indicate that the screening and interpretation were actually performed in the office by using the modifier SU, procedure performed in physician’s office.

Providers must forward the client’s name, address, member ID, and a family planning diagnosis with any specimen, including Pap smears, to the reference laboratory so the laboratory may bill TWHP for its family planning lab services.

When family planning test specimens, such as Pap smears, are collected, providers must direct the laboratory to indicate that the claim for the test is to be billed as a family planning service (i.e., procedure must be billed with a TWHP qualifying diagnosis code).

Refer to: Subsection 2.2.3, “Laboratory Procedures” in this handbook for more information about family planning laboratory services.

Subsection 3.3, “Services, Benefits, Limitations, and Prior Authorization” in this handbook for the list of TWHP diagnosis codes.

Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

TWHP laboratory services may be submitted using the following procedure codes:

Procedure Codes									
80061	81000	81001	81002	81003	81015	81025	82947	82948	84443
84702	84703	85013	85014	85018	85025	85027	86318	86580	86592
86689	86695	86696	86701	86703	86762	86803	86900	86901	87070
87086	87088	87102	87110	87205	87210	87220	87252	87340	87389
87480	87490	87491	87510	87590	87591	87623	87624	87625	87660
87797	87800	87801	87810	87850	88142	88150	88164	88175	99000
99001									

Appropriate documentation must be kept in the client’s record.

Claims may be subject to retrospective review if they are submitted with diagnosis codes that do not support medical necessity.

If more than one of procedure codes 87480, 87510, 87660, or 87800 is submitted by the same provider for the same client with the same date of service, all of the procedure codes will be denied.

TWHP follows the Medicare categorization of tests for CLIA certificate holders.

Refer to: The CMS website at www.cms.gov/CLIA/10_Categorization_of_Tests.asp for information about procedure code and modifier QW requirements.

3.3.4 Radiology

The following procedure codes may be reimbursed for radiology services:

Procedure Codes							
74000	74010	74740	76830	76856	76857	76881	76882

3.3.5 Contraceptive Devices and Related Procedures

The following procedure codes may be reimbursed for contraceptive devices and related procedures:

Procedure Codes									
11976	11981	57170	58300	58301	96372	A4261	A4266	J7300	J7301
J7302									

Procedure code 11976 may be reimbursed when it is billed with diagnosis code V2543.

Procedure code 11981 may be reimbursed when it is submitted with the most appropriate family planning diagnosis code.

Procedure codes A4261 and A4266 may be reimbursed when they are billed with one of the following diagnosis codes:

Diagnosis Codes									
V2501	V2502	V2509	V2512	V252	V2540	V2541	V2542	V2543	V2549
V255	V258	V259	V615						

Procedure code J7302 may be reimbursed when it is billed with one of the following diagnosis codes:

Diagnosis Codes									
V2502	V2509	V2511	V2513	V2540	V2542	V2549	V258	V259	V615

An E/M procedure code will not be reimbursed when it is billed with the same date of service as procedure code 58301, unless the E/M visit is a significant, separately identifiable service from the removal of the IUD. If the E/M visit occurs on the same date of service as the removal of the IUD, modifier 25 may be used to indicate that the E/M visit was a significant, separately identifiable service from the procedure, and documentation must be included in the client's medical record that indicates either the key components (history, physical examination, and medical decision making) or time spent counseling.

Note: TWHP does not reimburse for counseling for, or provision of, emergency contraception.

3.3.6 Drugs and Supplies

Procedure codes A4267, A4268, A4269, J1050 and modifier U1, J7303, J7304, J7307, and S4993 may be reimbursed for drugs and supplies.

Refer to: Subsection 3.3, "Services, Benefits, Limitations, and Prior Authorization" in this handbook for a list of TWHP family planning diagnosis codes.

Procedure code J1050 with modifier U1 may be reimbursed for services rendered to female clients as medically appropriate for the purpose of contraception. A quantity of 1 must be billed.

For TWHP services, procedure code J1050 is not diagnosis restricted.

Procedure codes A4268, A4269, and S4993 may be reimbursed when they are billed with one of the following diagnosis codes:

Diagnosis Codes									
V2501	V2502	V2509	V2512	V252	V2540	V2541	V2542	V2543	V2549
V255	V258	V259							

Note: TWHP does not reimburse providers for counseling about emergency contraception or the provision of emergency contraception.

3.3.6.1 Prescriptions and Dispensing Medication

Family planning drugs and supplies that are dispensed directly to the client must be billed to TMHP. Family planning clinics may be reimbursed for dispensing up to a one year supply of contraceptives in a 12-month period using procedure code J7303, J7304, or S4993. The appropriate family planning diagnosis code must be included on the claim.

Pharmacies under the Vendor Drug Program are allowed to fill all prescriptions as prescribed. Family planning drugs and supplies are exempt from the three prescriptions-per-month rule for up to a six-month supply.

Refer to: "Appendix B: Vendor Drug Program" (Vol. 1, General Information) for information about outpatient prescription drugs and the Vendor Drug Program.

3.3.6.1.1 Long-Acting Reversible Contraception Products

Certain long-acting reversible contraception (LARC) products are available as a pharmacy benefit of TWHP and are available through a limited number of specialty pharmacies that work with LARC manufacturers. Providers can refer to the Texas Medicaid/CHIP Vendor Drug Program website at www.txvendordrug.com/formulary/larc.shtml for additional information, including a list of covered products and participating specialty pharmacies.

3.3.6.2 Injection Administration

Injection administration may be reimbursed separately from the medication. Administration procedure code 96372 must be billed with a family planning diagnosis code and the National Drug Code (NDC) of the medication that was administered.

Claims for procedure code 96372 may not be submitted by outpatient hospitals.

3.3.7 Instruction in Natural Family Planning Methods

Procedure code H1010 is a benefit of TWHP and is limited to one service per day when billed by any provider with one of the following diagnosis codes:

Diagnosis Codes									
V2501	V2502	V2504	V2509	V2510	V2511	V2512	V2513	V252	V2540
V2541	V2542	V2543	V2549	V255	V258	V259	V2651	V2652	

Procedure code H1010 is intended to instruct a couple or an individual in methods of natural family planning and may consist of two sessions. Each session may be billed separately or the two sessions may be billed together with a total charge for both sessions.

3.3.8 Sterilization and Sterilization-Related Procedures

Sterilizations are considered to be permanent, once per lifetime procedures. Denied claims may be appealed with documentation that supports the medical necessity for a repeat sterilization.

The sterilization services that are available to TWHP clients include surgical or nonsurgical sterilization, follow-up office visits related to confirming the sterilization, and any necessary short-term contraception. No other services are covered for TWHP clients who have been sterilized.

TWHP covers sterilization as a form of birth control. To be eligible for a sterilization procedure through TWHP, the client must be 21 years of age or older and must complete and sign a Sterilization Consent Form within at least 30 days of the date of the surgery but no more than 180 days. In the case of an emergency, there must be at least 72 hours between the date on which the consent form is signed and the date of the surgery. Operative reports that detail the need for emergency surgery are required.

TWHP may reimburse providers for a follow-up visit that includes a hysterosalpingogram to ensure tubal occlusion, which is recommended three months after a hysteroscopic sterilization procedure. TWHP may also reimburse providers for short-term contraceptives dispensed following the insertion of an occlusive sterilization system.

3.3.8.1 Sterilization Consent

Per federal regulation 42 Code of Federal Regulations (CFR) 50, Subpart B, all sterilization procedures require an approved Sterilization Consent Form.

Note: *The Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form is not sterilization consent.*

Refer to: [Sterilization Consent Form \(English\)](#) on the TMHP website at www.tmhp.com.

[Sterilization Consent Form \(Spanish\)](#) on the TMHP website at www.tmhp.com.

[Sterilization Consent Form Instructions](#) on the TMHP website at www.tmhp.com.

3.3.8.2 Tubal Ligation

Procedure code 58600, 58611, 58615, 58670, or 58671 may be reimbursed for tubal ligations.

3.3.8.3 Anesthesia for Sterilization

Procedure code 00851 must be used when reporting anesthesia services for a tubal ligation sterilization procedure.

3.3.8.4 Facility Fees for Sterilization

Hospital-based and freestanding ASCs may be reimbursed for procedure code 58565, 58600, 58615, 58670, 58671, or A4264. An appropriate TWHP diagnosis code must be billed when reporting facility fees related to tubal ligation.

Refer to: Section 5, “Ambulatory Surgical Center and Hospital Ambulatory Surgical Center” in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for more information about ASC billing procedures.

3.3.8.5 Hysteroscopic Sterilization

Providers must use procedure code 58340 or procedure code 58565 with diagnosis code V252 to submit claims for the fallopian tube occlusion sterilization. Procedure code 58565 is considered bilateral.

The occlusive sterilization system (micro-insert) is a benefit when billed with procedure code A4264. Procedure code A4264 may be reimbursed for females 10 years through 55 years of age.

3.3.8.6 TWHP Services After Sterilization

A hysterosalpingogram is recommended three months after a hysteroscopic sterilization procedure to ensure tubal occlusion. Procedure code 74740 and 58340 are considered for reimbursement in this circumstance when billed with diagnosis code V252.

FQHC and professionals who render family planning services in the RHC setting may bill procedure codes 99201 and 99211 with an appropriate TWHP diagnosis code to receive their encounter reimbursement for follow-up services to confirm the sterilization of TWHP clients. FQHC providers may be reimbursed up to three family planning encounters per calendar year, per client. Professionals who render family planning services in the RHC setting may be reimbursed one encounter rate per calendar year, per TWHP client for family planning visits provided through TWHP.

3.3.8.6.1 Clients Who Have Received Sterilization Services

After the sterilization and all related services have been completed, the client is no longer eligible for TWHP services. Clients who have been sterilized cannot enroll in TWHP unless they are seeking to have the sterilization confirmed. After sterilization has been confirmed, a client is not eligible for TWHP coverage.

After an occlusive sterilization procedure, if the client’s 12-month TWHP coverage lapses before the sterilization is confirmed, the client may reapply for coverage in order to access short-term contraceptives and the hysterosalpingography necessary to confirm that the fallopian tubes are blocked. If it has not been confirmed that the occlusive sterilization system is blocking the fallopian tubes, the client is not considered to have been sterilized.

Providers must inform TWHP clients who seek sterilization that, after the sterilization procedure, TWHP covers only the follow-up visit to confirm the sterilization and the short-term contraceptives that are dispensed for the 12-week period following the insertion of an occlusive sterilization system.

3.3.9 Treatment for Sexually Transmitted Infections (STIs)

TWHP reimbursement for treatment of STIs is available only if the condition was discovered during a visit where the primary purpose was the client’s family planning needs, i.e., contraception or contraceptive counseling.

TWHP covers treatment for the following conditions:

- Gardnerella
- Trichomoniasis
- Candida
- Chlamydia
- Gonorrhea
- Herpes

Reimbursement for the treatment of STIs is available through the Texas Vendor Drug Program (VDP). Clients can access their prescribed drugs through pharmacies that are enrolled in the VDP.

Refer to: The Texas VDP website at www.txvendordrug.com/formulary/TWH-search.asp for more information.

Note: TWHP does not reimburse for the treatment of any non-STD conditions that are diagnosed during a TWHP visit.

3.3.9.1 Gonorrhea Treatment

Procedure code J0696 may be reimbursed for gonorrhea treatment services rendered to TWHP clients. Procedure code J0696 may be reimbursed when it is submitted with diagnosis code 0980, 0986, or 0987 as the referenced diagnosis code.

Note: Other TWHP services will not be reimbursed if they are submitted with diagnosis codes 0980, 0986, or 0987 as referenced diagnoses.

3.3.10 Prior Authorization

Prior authorization is not required for TWHP services.

3.4 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including TWHP services.

TWHP services are subject to retrospective review and recoupment if documentation does not support the service billed.

3.5 TWHP Claims Filing and Reimbursement

3.5.1 Claims Information

Providers must use the appropriate claim form to submit TWHP claims to TMHP.

Refer to: Subsection 2.4, “Claims Filing and Reimbursement” in this handbook for more information about filing family planning claims.

3.5.1.1 TWHP and Third Party Liability

Federal and state regulations mandate that family planning client information be kept confidential. Because seeking information from third party insurance may jeopardize the client’s confidentiality, third party billing for TWHP is not allowed.

3.5.2 Reimbursement

Services provided under TWHP are reimbursed according to Medicaid rules at standard Medicaid rates.

3.5.3 National Drug Code

Refer to: Subsection 6.3.4, “National Drug Code (NDC)” in Section 6, “Claims Filing” (*Vol. 1, General Information*).

3.5.4 NCCI and MUE Guidelines

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manual. Providers should refer to the [CMS NCCI web page](#) for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

4 Department of State Health Services (DSHS) Family Planning Program Services

4.1 Provider Enrollment for DSHS Family Planning Program Contractors

Agencies that submit claims for DSHS Family Planning Program Services must have a contract with DSHS. The DSHS Community Health Services Section determines client eligibility and services policy. Refer to the DSHS Family Planning Policy Manual for specific eligibility and policy information at www.dshs.state.tx.us/famplan.

Refer to: Section 1: Provider Enrollment and Responsibilities (*Vol. 1, General Information*) for more information about enrollment procedures.

Subsection 2.1, “Title XIX Provider Enrollment” in this handbook.

Subsection 1.1, “Family Planning Overview” in this handbook for more information about family planning funding sources, guidelines for family planning providers, and family planning services for undocumented aliens and legalized aliens.

4.2 Services, Benefits, Limitations, and Prior Authorization

This section contains information about family planning services funded through the DSHS Family Planning Program funding source including:

- Family planning annual exams
- Other family planning office or outpatient visits
- Laboratory procedures
- Radiology services
- Contraceptive devices and related procedures
- Drugs and supplies
- Medical counseling and education
- Sterilization and sterilization-related procedures (i.e., tubal ligation, vasectomy, and anesthesia for sterilization)

Providers are encouraged to include one of the following family planning diagnosis codes on the claim in conjunction with all family planning procedures and services:

Diagnosis Codes									
V2501	V2502	V2504	V2509	V2511	V2512	V2513	V252	V2540	V2541
V2542	V2543	V2549	V255	V258	V259	V2651	V2652		

One of the diagnosis codes in this table may be included in Block 24 E of the CMS-1500 claim form referencing the appropriate procedure code. The choice of diagnosis code must be based on the type of family planning service performed.

4.2.1 Family Planning Annual Exams

An annual family planning exam consists of a comprehensive health history and physical examination, including medical laboratory evaluations as indicated, an assessment of the client's problems and needs, and the implementation of an appropriate contraceptive management plan.

DSHS family planning providers must bill the most appropriate E/M visit procedure code for the complexity of the annual family planning examination provided. To bill an annual family planning examination, one of the following procedure codes must be billed with modifier FP:

Procedure Codes							
99201	99202	99203	99204	99211	99212	99213	99214

Refer to: The DSHS Family Planning Policy and Procedure Manual on the DSHS website at www.dshs.state.tx.us/famplan/pol_man.shtm for reimbursement rates.

The following table summarizes the uses for the E/M procedure codes and the corresponding billing requirements for the annual examination:

Billing Criteria	Frequency
<i>New patient:</i> Appropriate E/M procedure code with modifier FP	One new patient E/M code every three years following the last E/M visit provided to the client by that provider or a provider of the same specialty in the same group
<i>Established patient:</i> Appropriate E/M procedure code with modifier FP	Once per state fiscal year*
* The established patient procedure code will be denied if a new patient procedure code has been billed for the annual examination in the same year.	

For appropriate claims processing, providers are encouraged to use a family planning diagnosis code to bill the annual family planning exam.

Refer to: Subsection 4.2, "Services, Benefits, Limitations, and Prior Authorization" in this handbook for the list of family planning diagnosis codes.

An annual family planning examination (billed with modifier FP) will not be reimbursed when submitted with the same date of service as an additional E/M visit. If another condition requiring an E/M office visit beyond the required components for an office visit, family planning visit, or surgical procedure is discovered, the provider may submit a claim for the additional visit using Modifier 25 to indicate that the client's condition required a significant, separately identifiable E/M service. Documentation supporting the provision of a significant, separately identifiable E/M service must be maintained in the client's medical record and made available to Texas Medicaid upon request.

4.2.1.1 FQHC Reimbursement for Family Planning Annual Exams

To receive the encounter rate for the annual family planning examination, FQHCs must use the most appropriate E/M procedure code for the complexity of service provided as indicated in the previous table in subsection 4.2.1, “Family Planning Annual Exams” in this handbook and must use modifier FP.

The annual exam is allowed once per fiscal year, per client, per provider. Other family planning office or outpatient visits may be billed within the same year.

A new patient visit for the annual exam may be reimbursed once every three years following the last E/M visit provided to the client by that provider or a provider of the same specialty in the same group. The annual examination must be billed as an established patient visit if E/M services have been provided to the client within the last three years.

Reimbursement for services payable to an FQHC is based on an all-inclusive rate per visit.

4.2.2 Family Planning Office or Outpatient Visits

Other family planning E/M visits are allowed for routine contraceptive surveillance, family planning counseling and education, contraceptive problems, suspicion of pregnancy, genitourinary infections, and evaluation of other reproductive system symptoms.

During any visit for a medical problem or follow-up visit, the following must occur:

- An update of the client’s relevant history
- Physical exam, if indicated
- Laboratory tests, if indicated
- Treatment or referral, if indicated
- Education and counseling, or referral, if indicated
- Scheduling of office or clinic visit, if indicated

For general family planning visits, DSHS Family Planning Program Providers must bill one of the following, most appropriate E/M procedure code:

Procedure Codes							
99201	99202	99203	99204	99211	99212	99213	99214

The following table summarizes the uses for the E/M procedure codes and the corresponding billing requirements for general family planning office or outpatient visits:

Billing Criteria	Frequency
<i>New patient:</i> Appropriate E/M procedure code	One new patient E/M code every three years following the last E/M visit provided to the client by that provider or a provider of the same specialty in the same group
<i>Established patient:</i> Appropriate E/M procedure code	As needed*
* The established patient procedure code will be denied if a new patient procedure code has been billed for the annual examination in the same year.	

For appropriate claims processing, providers are encouraged to use a family planning diagnosis code to bill the annual family planning exam.

Refer to: Subsection 4.2, “Services, Benefits, Limitations, and Prior Authorization” in this handbook for the list of family planning diagnosis codes.

4.2.2.1 FQHC Reimbursement for Family Planning Office or Outpatient Visits

To receive the encounter rate for a general family planning visit, FQHCs must use the most appropriate E/M procedure code for the complexity of service provided as indicated previously in the tables in subsection 3.5.3, “National Drug Code” in this handbook.

FQHCs may be reimbursed for three family planning encounters per client, per year regardless of the reason for the encounter. The three encounters may include any combination of general family planning encounters, an annual family planning examination, or procedure code J7300, J7301, J7302, J7303, 17304, J7307, or S4993.

The new patient procedure codes will be limited to one new patient E/M procedure code three years following the last E/M visit provided to the client by that provider or a provider of the same specialty in the same group. The annual examination must be billed as an established patient visit if E/M services have been provided to the client within the last three years.

Reimbursement for services payable to an FQHC is based on an all-inclusive rate per visit.

A general family planning office or outpatient visit (billed without modifier FP) will not be reimbursed when submitted with the same date of service as an additional E/M visit. If another condition requiring an E/M office visit beyond the required components for an office visit, family planning visit, or surgical procedure is discovered, the provider may submit a claim for the additional visit using Modifier 25 to indicate that the client’s condition required a significant, separately identifiable E/M service. Documentation supporting the provision of a significant, separately identifiable E/M service must be maintained in the client’s medical record and made available to Texas Medicaid upon request.

Refer to: Section 4, “Federally Qualified Health Center (FQHC)” in the *Clinics and Other Outpatient Facility Services Handbook*, (Volume 2, Provider Handbooks) for more information about FQHC services.

4.2.3 Laboratory Procedures

4.2.3.1 * DSHS Family Planning Program

The following procedure codes may be reimbursed for DSHS Family Planning Program family planning laboratory services:

Procedure Codes									
80061	81000	81001	81002	81003	81015	81025	82947	82948	84443
84702	84703	85013	85014	85018	85025	85027	86580	86592	86689
86695	86696	86701	86702	86703	86762	86803	86900	86901	87070
87086	87088	87102	87110	87205	87210	87220	87252	87340	87389
87480	87490	87491	87510	87535	87590	87591	87624	87625	87660
87800	87810	87850	88142	88150	88164	88175	99000		

Appropriate documentation must be maintained in the client’s record.

Refer to: Subsection 3.3.3, “Laboratory Procedures” in this handbook for more information about family planning laboratory services requirements.

Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in the *Radiology and Laboratory Services Handbook* (Vol. 2, Provider Handbooks).

Texas Medicaid follows the Medicare categorization of tests for CLIA certificate holders.

Refer to: The CMS website at www.cms.gov/CLIA/10_Categorization_of_Test.asp for information about procedure code and modifier QW requirements.

4.2.4 * Immunization Administration

Procedure codes 90460 and 90471 may be reimbursed when billed for vaccine administration.

Procedure code 90460 will be denied if billed on the same date of service as procedure codes 90630, 90632, or 90636.

4.2.4.1 * Human Papilloma Virus (HPV) Vaccine

Procedure codes 90649 and 90650 may be reimbursed for the Human papilloma virus (HPV) vaccine.

4.2.5 Radiology

The following radiology services may be reimbursed for services performed for the purpose of localization of an IUD:

Procedure Code							
73060	74000	74010	76830	76856	76857	76881	76882

Procedure codes 76881 and 76882:

- Must be submitted with the most appropriate family planning diagnosis code
- Will be denied if they are submitted with the same date of service as procedure codes 55250 or 58600

4.2.6 Contraceptive Devices and Related Procedures

4.2.6.1 External Contraceptives

The following procedure codes may be reimbursed separately from the fitting and instruction (procedure code 57170):

Procedure Code		
57170	A4261 (cervical cap)	A4266 (diaphragm)

4.2.6.2 IUD

IUD services may be reimbursed using the following:

Procedure Code				
58300	58301	J7300	J7301	J7302

4.2.6.2.1 Insertion of an IUD

The IUD and the insertion of the IUD may be reimbursed using procedure code J7300, J7301, J7302, and 58300.

The following reimbursement may apply:

- Procedure code J7300, J7301, or J7302 may be reimbursed at full allowance.
- Procedure code 58300 may be reimbursed at full allowance.

When a vaginal, cervical, or uterine surgery (e.g., cervical cauterization) is billed for the same date of service as the insertion of the IUD, the following reimbursement will apply:

- The other vaginal, cervical, or uterine surgical procedure may be reimbursed at full allowance.
- Procedure code 58300 (IUD insertion) may be reimbursed at half the allowed amount.

4.2.6.2.2 Removal of the IUD

Procedure code 58301 may be reimbursed when an IUD is extracted from the uterine cavity.

When a vaginal, cervical, or uterine surgery procedure code is submitted with the same date of service as the IUD removal procedure code or the IUD replacement procedure code, the following reimbursement may apply:

- The other vaginal, cervical, or uterine surgical procedure may be reimbursed at full allowance.
- The removal or the replacement of the IUD will be denied.

4.2.6.3 Contraceptive Capsules

The contraceptive capsule and the implantation of the contraceptive capsule may be reimbursed using procedure code J7307 and procedure code 11981 (implantation). Procedure code 11981 may be reimbursed when billed with an appropriate family planning diagnosis code.

Progesterone-containing subdermal contraceptive capsules (Norplant) were previously used for birth control. Although subdermal contraceptive capsules are no longer approved by the FDA, the removal of the implanted contraceptive capsule (diagnosis code V2543) may be considered for reimbursement with procedure code 11976 (removal).

4.2.6.4 Medroxyprogesterone Acetate/Estradiol Cypionate

Medroxyprogesterone acetate/estradiol cypionate has been approved by the FDA as a method of contraception. Intramuscular injections of medroxyprogesterone acetate/estradiol cypionate given at 28- to 30-day intervals has been proven to be a short-term method to prevent pregnancy and will be limited to no more frequently than every 28 days.

4.2.7 Drugs and Supplies

The following drug and supply procedure codes may be reimbursed as:

Procedure Code								
A4267	A4268	A4269	A9150	J1050/U1	J3490	J7303	J7304	S4993

Procedure code J1050 with modifier U1 may be reimbursed for services rendered to female clients as medically appropriate for the purpose of contraception. A quantity of 1 must be billed.

For Title XIX family planning services, procedure code J1050 must be billed with a valid family planning diagnosis code.

Procedure code J3490 may be reimbursed when a prescription medication to treat a genital infection is provided to the client. Procedure code A9150 may be reimbursed when a nonprescription medication to treat a monilia infection is provided to the client.

4.2.7.1 Prescriptions and Dispensing Medication

Family planning agencies may do one or both of the following:

- Dispense family planning drugs and supplies directly to the client and bill TMHP.
- Write a prescription for the client to take to a pharmacy.

Family planning drugs and supplies that are dispensed directly to the client must be billed to TMHP. Only family planning agencies may be reimbursed for dispensing family planning drugs and supplies. Family planning agencies may be reimbursed for dispensing up to a one-year supply of contraceptives in a 12-month period using procedure code J7303, J7304, or S4993.

DSHS Family Planning Program clients may have their prescriptions filled at the clinic pharmacy.

DSHS Family Planning Providers can refer to the *DSHS Family Planning Policy and Procedure Manual* for additional guidance on dispensing medication.

Note: *Pharmacies under the Medicaid Vendor Drug Program are allowed to fill all prescriptions as prescribed. Family planning drugs and supplies are exempt from the three-prescriptions-per-month rule for up to a six-month supply.*

Refer to: “Appendix B: Vendor Drug Program” (*Vol. 1, General Information*) for information about outpatient prescription drugs and the Medicaid Vendor Drug Program.

4.2.7.2 Oral Medication Reimbursement

Procedure code S5000 is a benefit of the DSHS Family Planning Program for oral medication reimbursement.

Note: *This benefit is for the DSHS Family Planning Program only. This benefit does not apply for Title XIX family planning or TWHP.*

4.2.8 Family Planning Education

Medical counseling and education may be reimbursed using procedure code H1010.

4.2.8.1 Medical Nutrition Therapy

For clients requiring intensive nutritional guidance, medical nutritional therapy can be provided as an allowable and billable service using procedure code 97802. Medical nutritional therapy, however, must be provided by a registered dietician in order to be reimbursed. Procedure code 97802 may only be billed up to four times per state fiscal year for the same client by the same provider.

4.2.8.2 Instruction in Natural Family Planning Methods

Counseling with the intent to instruct a couple or an individual in methods of natural family planning may be reimbursed twice a year using procedure code H1010.

4.2.9 Sterilization and Sterilization-Related Procedures

4.2.9.1 Sterilization Consent

Per federal regulation 42 CFR 50, Subpart B, all sterilization procedures require an approved Sterilization Consent Form.

Note: *The Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form is not sterilization consent.*

Refer to: [Sterilization Consent Form \(English\)](http://www.tmhp.com) on the TMHP website at www.tmhp.com.

[Sterilization Consent Form \(Spanish\)](http://www.tmhp.com) on the TMHP website at www.tmhp.com.

[Sterilization Consent Form Instructions](http://www.tmhp.com) on the TMHP website at www.tmhp.com.

4.2.9.2 Incomplete Sterilizations

Sterilizations are considered to be permanent, once per lifetime procedures. If the claim is denied indicating a sterilization procedure has already been reimbursed for the client, the provider may appeal with documentation that supports the medical necessity for the repeat sterilization.

4.2.9.3 Tubal Ligation and Hysteroscopic Occlusion

Procedure codes 58600 and 58565 may be reimbursed for sterilization procedures performed on a female client. Reimbursement for procedure codes 58600 and 58565 include all preoperative, intraoperative, and postoperative services by all parties involved (i.e., physician, anesthesiologist, facility, laboratory, and so on).

4.2.9.4 Vasectomy

Procedure code 55250 may be reimbursed for any sterilization procedure performed on a male. Reimbursement for procedure code 55250 includes preoperative, intra-operative, and postoperative services by all parties involved (i.e., physician, anesthesiologist, facility, laboratory, and so on).

Vasectomies are considered to be permanent, once-per-lifetime procedures. If the claim is denied indicating a vasectomy procedure has already been reimbursed for the client, the provider may appeal with documentation that supports the medical necessity for the repeat sterilization.

4.2.10 Prior Authorization

Prior authorization is not required for sterilization and sterilization-related procedures.

4.2.11 Reimbursement for TWHP Wrap-Around Services

FQHC providers and family planning clinic providers contracted through DSHS may receive DSHS Family Planning Program reimbursement for TWHP wrap-around services during a visit. To receive reimbursement, the primary purpose of the visit must not be related to contraception or be reimbursed by TWHP.

FQHC providers and family planning clinic providers may receive reimbursement for the following services that are rendered to TWHP clients when the primary diagnosis is not related to contraception:

- Follow-up Pap tests - To receive reimbursement, DSHS contractors must file a separate claim with diagnosis code 6229. DSHS contractors may be reimbursed for the Pap test, an appropriate counseling code, and the appropriate visit code.
- Follow-up visits for sexually transmitted disease/sexually transmitted infection (STD/STI) testing - To receive reimbursement for a visit that is strictly for the purposes of STD/STI testing for a TWHP client, DSHS contractors must file a separate claim with a diagnosis code of V016. DSHS contractors may be reimbursed for STD/STI tests and STD/STI related services.
- Pregnancy test-only visits - To receive reimbursement for a visit that is for a pregnancy test only, DSHS contractors must file a separate claim with diagnosis code V7240.

Claims that are submitted by FQHC providers for wrap-around services, but are considered part of a TWHP encounter, will be subject to retrospective review, as these claims are not eligible for reimbursement. Any wrap-around services that are determined to have been paid in error may be recouped.

4.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including gynecological and reproductive health services and family planning services.

Gynecological and reproductive health services and family planning services are subject to retrospective review and recoument if documentation does not support the service billed.

4.4 Claims Filing and Reimbursement

4.4.1 * Claims Information

Providers must use the appropriate claim form to submit DSHS Family Planning Program claims to TMHP. **Claims for dates of service that span multiple contract periods must be submitted on separate claims for services performed within each contract period.**

Note: *To submit DSHS Family Planning Program claims using TexMedConnect, providers must choose Family Planning Program “Title X-DFPP” on the electronic version of the 2017 claim form.*

Refer to: Subsection 2.4, “Claims Filing and Reimbursement” in this handbook for more information about filing family planning claims.

4.4.1.1 Filing Deadlines

The following table summarizes the filing deadlines for DSHS Family Planning Program claims:

Deadline	Appeals
95 days from the date of service on the claim or date of any third party insurance explanation of benefits (EOB)	120 days from the date of the Remittance and Status (R&S) Report on which the claim reached a finalized status
If the filing deadline falls on a weekend or TMHP-recognized holiday, the filing deadline is extended until the next business day.	

Note: As stated in the DSHS Family Planning Policy and Procedure Manual, all claims and appeals must be submitted and processed within 60 days after the end of the contract period.

4.4.1.2 Third Party Liability

Federal and state regulations mandate that family planning client information be kept confidential. Because seeking information from third party insurance may jeopardize the client’s confidentiality, prior insurance billing is not a requirement for billing family planning for any title program.

4.4.2 Reimbursement

Reimbursement for family planning procedures is available in the TMHP Online Fee Lookup (OFL) on the TMHP website at www.tmhp.com and on the DSHS website at www.dshs.state.tx.us/famplan.

4.4.2.1 Funds Gone

DSHS family planning providers are contracted to provide services for a specific time period, either the state fiscal year or a contract period within the fiscal year. The providers receive a specific budget amount for their contract period. When their claims payments have reached their budget allowance, providers must continue to submit claims. The amount of funds that they would have received had the funds been available will be tracked as “funds gone.”

Providers may receive additional funds for a contract period at a later time. Claims identified as “funds gone” may be reimbursed at that time.

On the R&S Report, “Claims Paid” is the dollar amount of claims paid during this financial transaction period. “Approved to Pay/Not Funds Gone” is the dollar amount that has been processed and approved to pay, but the payment has not been issued yet. “Funds Gone” is the dollar amount that has been submitted after the provider’s budget allowance has been reached. The amount in “Approved to Pay/Not Funds Gone” added to the amount in “Funds Gone” will equal the amount in the “Approved to Pay - New Claims” section.

4.4.3 NCCI and MUE Guidelines

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manual. Providers should refer to the [CMS NCCI web page](#) for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

4.4.4 National Drug Code

Refer to: Subsection 6.3.4, “National Drug Code (NDC)” in Section 6, “Claims Filing” (*Vol. 1, General Information*).

5 Gynecological Health Services

5.1 Services, Benefits, Limitations, and Prior Authorization

Gynecological examinations, surgical procedures, and treatments are benefits of Texas Medicaid.

The following gynecological procedures and services may be benefits of Texas Medicaid:

- Gynecological and family planning examinations
- Contraceptives
- Diagnostic tests
- Surgical procedures
- Gynecological treatments

Refer to: Section 2, “Medicaid Title XIX family planning services” in this handbook for information about contraception, sterilizations, and family planning annual examinations.

5.2 Surgical and Laparoscopic Treatment of Ectopic Pregnancy

Surgical and laparoscopic treatment of ectopic pregnancy (procedure codes 59120, 59121, 59130, 59135, 59136, 59140, 59150, and 59151) is a benefit of Texas Medicaid.

5.3 Laparoscopic Procedures

Laparoscopic procedures (procedure codes 58545, 58546, and 58578) are a benefit of Texas Medicaid.

5.4 Endometrial Cryoablation

Endometrial cryoablation (procedure codes 58353 and 58356) is a benefit of Texas Medicaid.

5.5 Uterine Suspension

Uterine suspension (procedure codes 58400 and 58410) is a benefit of Texas Medicaid.

5.6 Vulvectomy

Vulvectomy (procedure code 55620) is a benefit of Texas Medicaid.

5.6.1 Prior Authorization for Vulvectomy

Prior Authorization is required for vulvectomy.

The prior authorization request must include documentation of one of the following conditions:

- Vulvar intraepithelial neoplasia (VIN)
- Labial enlargement that results in abrasion, irritation, or intractable skin infection

Note: A vulvectomy will not be considered for cosmetic reasons.

5.7 Salpingostomy

Salpingostomy (procedure codes 58673 and 58770) is a benefit of Texas Medicaid.

5.7.1 Prior Authorization for Salpingostomy

Prior authorization is required for salpingostomy.

The prior authorization request must include documentation of one or more of the following conditions:

- Ectopic pregnancy
- Hydrosalpinx unrelated to infertility
- Salpingitis unrelated to infertility
- Torsion of the fallopian tube
- Abscess of the fallopian tube
- Peritubal adhesions unrelated to infertility
- Cyst or tumor of the fallopian tube unrelated to infertility
- Hematosalpinx

5.8 Ovarian Wedge Resection

Ovarian wedge resection (procedure code 58920) is a benefit of Texas Medicaid.

5.8.1 Prior Authorization for Ovarian Wedge Resection

Prior Authorization is required for ovarian wedge resection.

The prior authorization request must include documentation of polycystic ovarian syndrome (PCOS).

Note: Ovarian wedge resection will not be considered to improve chances of conceiving if the PCOS lead to infertility.

5.9 Assays for the Diagnosis of Vaginitis

Vaginitis assay procedure codes 87480, 87510, 87660, 87661, 87797, and 87800 are benefits of Texas Medicaid.

If more than one of procedure code 87480, 87510, 87660, 87661, or 87800 is submitted by the same provider for the same client with the same date of service, all of the procedure codes are denied. Only one procedure code (87480, 87510, 87660, 87661, or 87800) may be submitted for reimbursement, and providers must submit the most appropriate procedure code for the test provided:

- *Single organism test.* A single test must be submitted for reimbursement using the appropriate procedure code (87480, 87510, 87660, or 87661) that describes the organism being isolated.
- *Multiple organism test.* When testing for multiple vaginal pathogens, providers must submit procedure code 87800 for reimbursement. Procedure code 87800 is inclusive of procedure codes 87480, 87510, 87660, and 87661 and is the most appropriate code to request reimbursement for multiple tests.

If the claim is denied because more than one procedure code was submitted with the same date of service, the provider must appeal the denied claim with a statement indicating which procedure code is most appropriate and should be considered for reimbursement. Procedure codes 87800, 87480, 87510, 87660, and 87661 should not be submitted for reimbursement by the same provider with the same date of service for the same client on the same claim form or on separate claim forms.

Providers are reminded to code to the highest level of specificity with a diagnosis to support medical necessity when submitting procedure code 87797.

Claims may be subject to retrospective review if they are submitted with diagnosis codes that do not support medical necessity.

If a positive test result was not treated, documentation must be present indicating why treatment was not rendered.

5.10 Hysteroscopy

Hysteroscopy (procedure codes 58555, 58558, 58559, 58560, 58561, 58562, 58563, and 58579) is a benefit of Texas Medicaid. Diagnostic hysteroscopy (procedure code 58555) is a benefit of Texas Medicaid when submitted with one of the following diagnosis codes:

Diagnosis Codes									
2180	6210	62130	6215	6262	6264	6266	6268	6270	6271
7522	7523								

5.11 Abortions

According to a revision of the Hyde Amendment, under Public Law 103–112, HHSC implemented the federal directive pertaining to Medicaid reimbursement for abortions. Federal funding is available for a non-elective abortion to save the life of the mother and to terminate pregnancies resulting from rape or incest. Reimbursement is based on the physician’s certification that the abortion was performed to save the mother’s life, to terminate a pregnancy resulting from rape, or to terminate a pregnancy resulting from incest.

The following procedure codes may be used to submit claims for non-elective abortion procedures:

Procedure Codes								
59830	59840	59841	59850	59851	59852	59855	59856	59857

In accordance with federal law, providers are required to use specific language regarding the reason the mother’s condition is life-threatening. An abortion for a life-threatening condition *must* be due to a physical disorder, injury, or illness, including a life-endangering physical condition caused by or arising from the pregnancy itself that would place the woman in danger of death unless an abortion was performed.

Reimbursement of an abortion is based on the physician’s certification that the abortion was performed to save the life of the mother, to terminate pregnancy resulting from rape, or to terminate pregnancy resulting from incest.

One of the following statements signed by the physician is mandatory for any abortion performed. Substitute wording will not be accepted. One of these statements must accompany any claim for an abortion to be considered for reimbursement:

- “I, (physician’s name), certify that on the basis of my professional judgment, an abortion procedure is necessary because (client’s full name, Medicaid number, and complete address) suffers from a physical disorder, injury, or illness, including a life-endangering physical condition caused by or arising from the pregnancy itself, that would place her in danger of death unless an abortion is performed.” (A signature is required.)
- “I, (physician’s name), certify that on the basis of my professional judgment, an abortion procedure for (client’s full name, Medicaid number, and complete address) is necessary to terminate a pregnancy that was the result of rape. I have counseled the client concerning the availability of health and social support services and the importance of reporting the rape to the appropriate law enforcement authorities.” (A signature is required.)
- “I, (physician’s name), certify that on the basis of my professional judgment, an abortion procedure for (client’s full name, Medicaid number, and complete address) is necessary to terminate a pregnancy that was the result of incest. I have counseled the client concerning the availability of health and social support services and the importance of reporting the incest to the appropriate law enforcement authorities.” (A signature is required.)

Refer to: [Abortion Certification Statements Form](#) on the TMHP website at www.tmhp.com.

A stamped or typed physician signature is not acceptable on the original certification statement. The physician’s signature must be an original signature. A copy of the signed certification statement must be submitted with each claim for reimbursement. Faxes and electronic billing are not acceptable or available at this time. The physician must maintain the original certification statement in the client’s files.

Abortion services must be billed with modifier G7.

Performing physicians, facilities, anesthesiologists, and certified respiratory nurse anesthetist (CRNA) providers must submit modifier G7 with the appropriate procedure code when requesting reimbursement for abortion procedures that are within the scope of the rules and regulations of Texas Medicaid. Modifier G7 must be entered next to the procedure code that identifies the abortion services.

Important: *To bill a Texas Medicaid client for a service that TMHP denies as not medically necessary, the billing provider must ensure that the client or client’s guardian has signed an acknowledgment statement obtained by the physician who has contact with the client.*

5.11.1 Services Related to Abortion Procedures

An anesthesia service that is provided for an abortion procedure may be reimbursed if the abortion procedure meets medical necessity and complies with the Texas Medicaid guidelines in the section above.

All other services that are related to an abortion procedure are also subject to medical necessity review. Services that are related to a non-covered abortion procedure are denied or recouped.

5.12 Examination Under Anesthesia

Pelvic examination under anesthesia (procedure code 57410) is considered part of another gynecological surgery performed the same day.

If the examination is performed as an independent procedure or at the time of a nongynecological surgery, the procedure may be reimbursed.

5.13 Laminaria Insertion

Insertion of a laminaria or dilateria (procedure code 59200) is a benefit of Texas Medicaid.

5.14 Hysterectomy Services

Texas Medicaid reimburses hysterectomies when they are medically necessary. Texas Medicaid does not reimburse hysterectomies performed for the sole purpose of sterilization.

Providers can use any of the following procedure codes to submit claims for hysterectomy procedures:

Procedure Codes									
51925	58150	58152	58180	58200	58210	58240	58260	58262	58263
58267	58270	58275	58280	58285	58290	58291	58292	58293	58294
58541	58542	58543	58544	58548	58550	58552	58553	58554	58570
58571	58572	58573	59135	59525					

Providers can refer to the Texas Medicaid fee schedules on the TMHP website at www.tmhp.com for components and fees that may be reimbursed.

5.14.1 Hysterectomy Acknowledgment

Hysterectomy services are considered for reimbursement when a signed Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form is faxed to TMHP, the claim is filed with a signed Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form, or documentation supporting that the Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form could not be obtained or was not necessary.

All Texas Medicaid clients (including those in a STAR or STAR+PLUS Program health plan) receiving hysterectomy services must sign a Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form. The acknowledgment must be submitted to TMHP with the claim or to the client's health plan.

The Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form must be signed and dated by the client. The statement must indicate that the client was informed both orally and in writing before the surgery that the hysterectomy would leave her permanently incapable of bearing children.

Note: A client representative's signature will be required for mentally incompetent clients.

The client's eligibility file is updated upon receipt of the signed Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form. Claims for services related to the hysterectomy cannot be reimbursed unless the signed Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form is on file; therefore to avoid claim denials, each individual provider involved in the hysterectomy procedure is encouraged to submit a copy of the valid Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form rather than relying on another provider to do so.

The provider is responsible for maintaining the original, signed copy of the Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form in the client's medical record when a claim is submitted for consideration of payment. These records are subject to retrospective review.

When a hysterectomy, whether abdominal or vaginal, is performed without a client's acknowledgement form:

- The hysterectomy procedure code is denied.
- The other surgical procedures are evaluated for their clinical relevance.
- Multiple procedures are processed according to the multiple surgery guidelines.

A Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form is not required if the performing physician certifies that at least one of the following circumstances existed before the surgery:

- The patient was already sterile before the hysterectomy, and the cause of the sterility is stated (e.g., congenital disorder, sterilized previously, or postmenopausal). Providers must use a post menopause or sterilization diagnosis code on the claim form. If the provider submits a claim and does not attach the acknowledgment, the provider must maintain the signed statement in the client's records, and the physician's signature will not be required on the claim form. These records are subject to retrospective review.
- The patient requires a hysterectomy on an emergency basis because of a life-threatening situation. The physician must state the nature of the emergency and certify that it was determined that prior acknowledgment was not possible. Because the acknowledgment may be signed the day of or an hour before surgery, an emergency situation requires that the patient be unconscious or under sedation and unable to sign the acknowledgment.

Although the Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form is not required if the criteria previously listed are met, the performing physician must certify that one or more of the circumstances existed prior to the surgery. This certification may be submitted before the claim is submitted or attached to the claim and signed by the performing provider.

Refer to: Title 42 of CFR 441.255 and 25 TAC Part 1, Chapter 29, Subchapter F, section 25.501 for more information.

Refer to: [Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information](#) on the TMHP website at www.tmhp.com.

For clients with retroactive Medicaid coverage, one of the following must be submitted with the Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form:

- A copy of the client’s Your Texas Benefits Medicaid Card, which covers the date of the hysterectomy.
- A copy of the retroactive approval notice for Medicaid coverage.

Faxing Forms

All Medicaid providers may fax the Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form to 1-512-514-4218. The form must include the client’s Texas Medicaid number. All consent forms should be faxed with a cover sheet that identifies the provider and includes the telephone number and address. If the fax is incomplete or the consent form is invalid, the form is returned by mail or fax for correction. Completed consent forms that are faxed for adjustments or appeals are validated in the TMHP system. However, claims associated with the consent forms must be appealed through the mail to Appeals/Adjustments at the following address:

Texas Medicaid & Healthcare Partnership
 Attn: Appeals/Adjustments
 PO Box 200645
 Austin, TX 78720-0645

5.15 Pap Smear (Cytopathology Studies)

Pap smears are benefits of Texas Medicaid for early detection of cancer. Family planning clients are eligible for annual Pap smears. Procurement and handling of the Pap smear are considered part of the E/M of the client and are not reimbursed separately.

The following procedure codes are reimbursed only to pathologists and CLIA-certified laboratories (whose directors providing technical supervision of cytopathology services are pathologists):

Procedure Codes									
88142	88143	88147	88148	88150	88152	88153	88154	88155	88164
88165	88166	88167	88174	88175					

These procedure codes must be billed with the place of service where the Pap smear is interpreted.

Procedure code 88141 is reimbursed in addition to and when billed with the cytopathology procedure codes in the table above.

Procedure code 88155 will only be reimbursed when billed in conjunction with one of the following procedure codes on the same date of service by the same provider:

Procedure Codes									
88142	88143	88147	88148	88150	88152	88153	88154	88164	88165
88166	88167	88174	88175						

Note: *Pap smear procedures will not be reimbursed separately to either the physician or a laboratory when billed on the same day as a THSteps medical check-up visit.*

5.16 Surgery for Masculinized Females

Masculinized females possess ovaries and are female by genetic sex but the external genitalia are not those of a normal female. Surgical correction of abnormalities of the external genitalia is the only indicated treatment for this disorder. Procedure codes 56805 and 57335 may be considered for reimbursement for female clients who are 20 years of age and younger when submitted for reimbursement with diagnosis code 2552, 25541, 25542, 25950, 25951, 25952, or 7527.

5.17 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including gynecological services.

Gynecological health services are subject to retrospective review and recoupment if documentation does not support the service billed.

5.18 Claims Filing and Reimbursement

Gynecological services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms. When completing a CMS-1500 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Super-bills, or itemized statements, are not accepted as claim supplements.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (*Vol. 1, General Information*) for information on electronic claims submissions.

Subsection 6.1, “Claims Information” in Section 6, “Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (*Vol. 1, General Information*).

Texas Medicaid rates for physicians and other practitioners are calculated in accordance with TAC §355.8085. Providers can refer to the [Online Fee Lookup \(OFL\)](#) or the applicable fee schedule on the TMHP website at www.tmhp.com.

Refer to: Subsection 2.2.1.1, “Non-emergent and Non-urgent Evaluation and Management (E/M) Emergency Department Visits” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*).

Section 104 of the *Tax Equity and Fiscal Responsibility Act* (TEFRA) of 1982 requires that Medicare and Medicaid limit reimbursement for those physician services furnished in outpatient hospital settings (e.g., clinics and emergency situations) that are ordinarily furnished in physician offices.

5.18.1 NCCI and MUE Guidelines

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manual. Providers should refer to the [CMS NCCI web page](#) for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

5.19 National Drug Code

Refer to: Subsection 6.3.4, “National Drug Code (NDC)” in Section 6, “Claims Filing” (*Vol. 1, General Information*).

1 General Information

The information in this handbook is intended for Texas Medicaid hospital (medical and surgical acute care facility) providers and covers services that take place only in an inpatient or outpatient hospital setting. The handbook provides information about Texas Medicaid's benefits, policies, and procedures applicable to acute care hospitals, including military hospitals.

Important: *All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

Refer to: *Clinics and Other Outpatient Facility Services Handbook (Vol. 2, Provider Handbooks), for information about services offered in settings such as rural health clinics (RHCs), Federally Qualified Health Centers (FQHCs), dialysis centers, and other similar facilities.*

1.1 National Drug Codes (NDC)

Refer to: *Subsection 6.3.4, "National Drug Code (NDC)," in Section 6, "Claims Filing" (Vol. 1, General Information).*

1.2 Medicaid Managed Care Services

This handbook contains information about Texas Medicaid fee-for-service benefits. For information about managed care benefits, refer to the *Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks)*.

Managed care carve-out services are administered as fee-for-service benefits. A list of all carve-out services is available in Section 8, "Carve-Out Services" in the *Medicaid Managed Care Handbook, (Vol. 2, Provider Handbooks)*.

2 Enrollment

To be eligible to participate in Texas Medicaid, a hospital must be certified by Medicare, have a valid provider agreement with the Health and Human Services Commission (HHSC), and have completed the Texas Medicaid & Healthcare Partnership (TMHP) enrollment process.

2.1 Hospital Eligibility Through Change of Ownership

Under procedures set forth by the Centers for Medicare & Medicaid Services (CMS) and the U.S. Department of Health and Human Services (HHS), a change in ownership of a hospital does not terminate Medicare eligibility; therefore, Medicaid participation may be continued subject to the following requirements:

- The provider must obtain recertification as a Title XVIII (Medicare) hospital.
- The hospital under new ownership must submit a new signed and dated HHSC Medicaid Provider Agreement between the hospital and HHSC.

Providers can download the HHSC Medicaid Provider Agreement from the TMHP website at www.tmhp.com.

Refer to: Subsection 1.4, “Provider Reenrollment,” in Section 1, “Provider Enrollment and Responsibilities” (*Vol. 1, General Information*).

2.1.1 Hospital-based Ambulatory Surgical Center (HASC) Enrollment

All hospitals enrolling in Texas Medicaid (except psychiatric and rehabilitation hospitals) are issued an HASC provider number at the time of enrollment.

2.2 Hospital-based Rural Health Clinic Enrollment

To enroll in Texas Medicaid and qualify for participation as a Title XIX RHC, RHCs must be enrolled in Medicare. A nine-digit provider identifier is issued to the RHC after a certification letter from Medicare is received, stating that the clinic qualifies for Medicaid participation. An RHC can also apply for enrollment as a family planning agency.

All providers of laboratory services must comply with the rules and regulations of the Clinical Laboratory Improvement Amendments (CLIA). Providers who do not comply with CLIA are not reimbursed for laboratory services.

Refer to: Subsection 8.2, “Services, Benefits, Limitations, and Prior Authorization,” in the *Clinics and Other Outpatient Facility Services Handbook (Vol. 2, Provider Handbooks)* for RHC benefit and limitation information.

Subsection 1.1, “Provider Enrollment and Reenrollment,” in Section 1, “Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for more information about enrollment procedures, including information on Changes of Ownership.

Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA),” in *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

3 Inpatient Hospital (Medical/Surgical Acute Care Inpatient Facility)

This section contains benefit, limitation, authorization, and claims filing information for inpatient hospital facility accommodation and ancillary services.

Refer to: Section 6: Claims Filing and Section 7: Appeals (*Vol. 1, General Information*) for more comprehensive information about claims filing and appeals.

Hospital providers are encouraged to review the other handbooks for applicable information, prior authorization requirements, and for specific requirements for special programs.

3.1 General Information

Inpatient hospital services include medically necessary items and services ordinarily furnished by a Texas Medicaid hospital or by an approved out-of-state hospital under the direction of a physician for the care and treatment of patients. Services must be medically necessary and are subject to Texas Medicaid’s utilization review requirements. Claims submitted to TMHP must comply with the applicable Texas Medicaid policies and procedures.

3.1.1 Reimbursement Limitations

For clients who are 21 years of age and older, Texas Medicaid reimbursement for acute care inpatient hospital services is limited to \$200,000 per client, per benefit year (November 1 through October 31). Claims are reviewed retrospectively, and payments that exceed \$200,000 are recouped.

This \$200,000 limitation does not apply to the following:

- Services related to certain organ transplants.
- Services rendered to Texas Health Steps (THSteps) clients when provided through the Comprehensive Care Program (CCP).

For clients who are 20 years of age and younger, dollar limitations do not apply.

3.1.2 Spell of Illness

Reimbursement to hospitals for inpatient services is limited to the Medicaid spell of illness. The spell of illness is defined as 30 days of inpatient hospital care, which may accrue intermittently or consecutively.

After 30 days of inpatient care is provided, reimbursement for additional inpatient care is not considered until the client has been out of an acute care facility for 60 consecutive days.

Exceptions to the spell of illness are as follows:

- A prior-approved solid organ transplant. The 30-day spell of illness for transplants begins on the date of the transplant, allowing additional time for the inpatient stay.
- THSteps-eligible clients who are 20 years of age and younger when a medically necessary condition exists.

Texas Medicaid will conduct a quarterly utilization review of inpatient claims to determine whether the claims were paid outside of the spell-of-illness limitation.

The first of these utilization reviews were for claims with dates of service from April 27, 2010, through January 6, 2012.

3.1.3 Take-Home Drugs, Self-Administered Drug, or Personal Comfort Items

Take-home drugs and comfort items that are provided by the hospital during an inpatient hospital stay are included in the hospital reimbursement and are not reimbursed separately.

Take-home drugs and supplies may be a benefit through the Vendor Drug Program (VDP) when supplied by prescription.

Self-administered drugs are defined as drugs that the client administers themselves at home and may include, but are not limited to, prescription drugs, vitamins, and supplements. Self-administered drugs provided by the hospital during an inpatient hospital stay are included in the hospital reimbursement and are not reimbursed separately.

The client cannot be billed for take home drugs, comfort supplies or self-administered drugs that are provided by the hospital during an inpatient hospital stay.

3.1.4 Services Included in the Inpatient Stay

The following services are included in the inpatient stay and are not separately reimbursed:

- *Whole blood and packed red blood cells.* Inpatient services include whole blood and packed red blood cells that are reasonable and necessary for treatment of illness or injury. Whole blood and packed red blood cells that are available without cost are not reimbursed by Texas Medicaid. Blood storage is not a benefit of Texas Medicaid.

- *Laboratory, radiology, and pathology services.* Inpatient services include all medically necessary services and supplies ordered by a physician to include laboratory, radiology, and pathology services.

Note: *Ultrasound interpretations in the inpatient hospital setting will be denied if they are billed by the attending physician. Services that are billed by the attending physician are included in the facility fee and are not reimbursed separately.*

Note: *All providers of laboratory services must comply with the rules and regulations of the Clinical Laboratory Improvement Amendments (CLIA). Providers not complying with CLIA will not be reimbursed for laboratory services.*

Refer to: Subsection 1.1, “Provider Enrollment and Reenrollment,” in Section 1, “Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for more information about enrollment procedures.

Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA),” in *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)* for more information about CLIA.

The Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks).

3.2 Services, Benefits, Limitations, and Prior Authorization - Acute Care

Inpatient hospital services include the following:

- Bed and board
- Whole blood and packed red blood cells
- All medically necessary services ordered by a physician to include laboratory, radiology, and pathology
- All medically necessary supplies ordered by a physician
- Medically necessary emergency and non-emergency ambulance transports during the inpatient stay
- Maternity care
- Newborn care
- Inpatient surgery and rehabilitation
- Organ and tissue transplant services
- Colorectal cancer screening services

3.2.1 Bed and Board

Inpatient bed and board include semiprivate accommodations or accommodations in an intensive care or coronary care unit. The accommodations include:

- Meals
- Special diets
- General nursing services

Private accommodations including meals, special diets, and general nursing services may be reimbursed up to the hospital’s charge for its most prevalent semiprivate accommodations. Bed and board in private accommodations may be reimbursed in full if required for medical reasons as certified by the physician. The hospital must document the medical necessity for a private room (i.e., the existence of a critical or

contagious illness, a condition that could result in disturbance to other patients). The medical necessity for the private accommodations must be included in Block 80 of the UB-04 CMS-1450 paper claim form or added as an attachment to the claim submission.

3.2.2 Hysterectomy Services

Hysterectomy services are considered for reimbursement when the claim is filed with a signed Hysterectomy Acknowledgment Form or submitted documentation indicates that the Hysterectomy Acknowledgment Form could not be obtained.

Claims for services related to the hysterectomy cannot be reimbursed unless the signed Hysterectomy Acknowledgment Form is on file; consequently, to avoid claim denials, each individual provider is encouraged to submit a copy of the valid Hysterectomy Acknowledgment Form and not rely on another provider to do so.

Refer to: Subsection 5.14.1, “Hysterectomy Acknowledgment,” in *Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks)* for additional information.

[Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information](http://www.tmhp.com) on the TMHP website at www.tmhp.com.

3.2.3 Maternity Care

Inpatient maternity care includes usual and customary care for all female clients.

3.2.3.1 Emergency Coverage

For women with a family income at or below 185 percent of the Federal Poverty Level (FPL), hospital facility charges are paid through Emergency Medicaid. A client must be determined eligible for Emergency Medicaid by HHSC for a claim to be paid to a Medicaid provider. Claims are sent to Texas Medicaid & Healthcare Partnership (TMHP) for processing.

3.2.3.2 Mother and Newborn Hospital Stay

Circumstances that require the mother and newborn to remain in the hospital longer than two days for a routine vaginal delivery or four days for a cesarean section must be documented in the clients’ medical records.

Continuation of hospitalization is a benefit for the infant when the mother is required to remain hospitalized for medical reasons. The reason for the continuation of hospitalization must be documented in the client’s medical record.

3.2.3.3 Children’s Health Insurance Program (CHIP) Perinatal Coverage

For clients who are eligible for CHIP perinatal services as determined by HHSC, CHIP perinatal services include newborn services and inpatient hospital charges related to the delivery of the newborn. Preterm or false labor that does not result in a birth are not CHIP perinatal services.

Inpatient services limited to labor with delivery for women with income between 186 and 200 percent of FPL will be covered under CHIP perinatal. Newborn services will also be covered under CHIP perinatal.

For CHIP perinatal newborns with a family income at or below 185 percent of the federal poverty level, TMHP will process newborn transfer hospital claims even if the claim from the initial hospital stay has not been received. The hospital transfer must have occurred within 24 hours of the discharge date from the initial delivery hospital stay.

Transfer claims must be filed to TMHP using the admission type 1, 2, 3, or 5 in block 14; source of admission code 4 or 6 in block 15; and the actual date and time the client was admitted in block 12 of the UB-04 CMS-1450 paper claim form.

Refer to: Subsection 6.19.1, “CHIP Perinatal Newborn Transfer Hospital Claims,” in Section 6, “Claims Filing” (*Vol. 1, General Information*).

3.2.4 Newborn Care

Newborn care includes routine newborn care, routine screenings, and specialized nursery care for newborns with specific problems.

Hospital providers must provide all state-mandated newborn screenings and vaccinations.

Refer to: Subsection 5.3.11.2.3, “Hearing Screening,” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)*.

Subsection 5.3.9, “Newborn Examination,” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)*.

3.2.4.1 * Newborn Eligibility

A child is deemed eligible for Texas Medicaid through 12 months of age if the mother is receiving Medicaid at the time of the child’s birth, the child continues to live with the mother, and the mother continues to be eligible for Medicaid or would be eligible for Medicaid if she were pregnant. Therefore, it is not acceptable for a hospital to require a deposit for newborn care from a Medicaid client. The child’s eligibility ends if the mother relinquishes her parental rights or if it is determined that the child is no longer part of the mother’s household.

Hospitals must complete [Hospital Report \(Newborn Child or Children\) \(Form 7484\)](#) on the TMHP website at www.tmhp.com to provide information about each child born to a mother who is eligible for Medicaid. If the newborn’s name is known, the name must be on the form.

Important: *If the newborn’s name is not known, the name may be left blank. The use of “Baby Boy” or “Baby Girl” delays the assignment of a number.*

The form must be completed by the hospital no later than five days after the child’s birth and sent to HHSC at the address identified on the form. The form should not be completed for stillbirths. Hospitals should duplicate the form as needed, because they are not supplied by HHSC, the Department of Aging and Disability Services (DADS), or TMHP.

Hospitals that submit the birth certificate information using the Department of State Health Services (DSHS), Vital Statistics Unit (VSU) Texas Electronic Registrar for Birth software and the HHSC Form 7484, receive a rapid and efficient assignment of a newborn Medicaid identification number. This process expedites reimbursement to hospitals and other providers involved in newborn care including pharmacies that provide outpatient prescription benefits for medically-needy newborns.

For additional information about obtaining a newborn Medicaid identification number, providers may call 1-888-963-7111, Ext. 7368 or 1-512-458-7368.

After receiving a completed form, HHSC verifies the mother’s eligibility. Within 10 days of receiving the completed form, HHSC sends notices to the hospital, mother, caseworker, and attending physician, if identified. The notice includes the child’s Medicaid client number and the effective date of coverage. After the child has been added to the eligibility file, HHSC issues a Medicaid Identification (Form H3087).

Claims submitted for services provided to a newborn child who is eligible for Medicaid must be filed using the newborn child’s Medicaid client number.

Newborns who are from families with an income at or below 185 percent of the FPL and who receive CHIP perinatal benefits are assigned a client number for Texas Medicaid. This number is only assigned for reimbursement of the newborn’s hospital facility charges (on a UB-04 CMS-1450 paper claim form) for the initial hospital stay after delivery. Claims for the newborn’s hospital facility charges should be sent to TMHP.

3.2.5 Organ and Tissue Transplant Services

3.2.5.1 Transplant Facilities

A facility that renders organ transplants must be a designated children's hospital or a facility in continuous compliance with the criteria set forth by the following:

- Organ Procurement and Transportation Network (OPTN)
- United Network for Organ Sharing (UNOS)
- National Marrow Donor Program (NMDP)

Facilities whose status of "good standing" has been suspended for any reason by the national credentialing bodies will not be reimbursed by Texas Medicaid for transplant services until the status of "good standing" is restored.

If a Medicaid client receives a transplant in an in-state or out-of-state facility that is not approved by Texas Medicaid, the client must be discharged from the facility to be considered to receive other medical and hospital benefits under Texas Medicaid. Coverage for other services needed as a result of complications of the transplant may be considered when medically necessary, reasonable, and federally allowable.

Texas Medicaid will not pay for routine post-transplant services for transplant patients in facilities that are not approved by Texas Medicaid.

3.2.5.1.1 Out-of-state Transplant Facilities

Out-of-state facilities may be reimbursed for transplants rendered to Texas Medicaid clients under certain conditions. In order for Texas Medicaid to reimburse for an out-of-state transplant, the out-of-state facility and professional providers must enroll as Texas Medicaid providers. The out-of-state transplant facilities must submit proof of transplant facility UNOS or NMDP certification as required by the Texas HHSC.

Physicians who are licensed by the state of Texas may request prior authorization for transplant services to be performed at out-of-state facilities when all of the following criteria are met:

- The required organ transplant is not available in Texas
- The facility is nationally recognized as a Center of Excellence
- The services are medically necessary, reasonable, and federally allowable
- The client is enrolled in Texas Medicaid

The pretransplant evaluation must be performed by a Texas facility. If it is medically necessary that the pretransplant evaluation be performed at the out-of-state facility as well, the prior authorization request for the out-of-state pretransplant evaluation must be submitted with a copy of the evaluation that was performed by the Texas facility. The documentation must support the need for an out-of-state pretransplant evaluation.

Important: *Texas Medicaid does not cover transplant services provided out-of-state that are available in Texas.*

3.2.5.2 Transplant Benefits and Limitations

If a transplant has been authorized as medically necessary by HHSC or its designee because of an emergent, life-threatening situation, a maximum of 30 days of inpatient hospital services during Title XIX spell of illness may be a benefit, beginning with the actual first day of the transplant. This benefit is in addition to covered inpatient hospital days provided before the actual first day of the transplant. This 30-day period is considered a separate inpatient hospital admission for reimbursement purposes, but is included under one hospital stay.

Refer to: Subsection 3.1.2, “Spell of Illness,” in this handbook for additional information about the 30-day spell of illness period.

Reimbursement for transplant is limited to an initial transplant as a lifetime benefit and one subsequent re-transplant because of rejection. Expenses incurred by a living donor will not be reimbursed.

All transplants require prior authorization. If a solid organ transplant is not prior authorized, services that are directly related to the transplant within the three-day pre-operative and six-week postoperative period will be denied, regardless of who provides the services. Services unrelated to the transplant surgery will be paid separately.

If the organ is rejected, the re-transplant requires its own prior authorization. If the re-transplant is not prior authorized, services that are directly related to the re-transplant within the three-day pre-operative and six-week postoperative period will be denied, regardless of who provides the services. Services unrelated to the re-transplant surgery will be paid separately.

Note: *The re-transplant is not included in the prior authorization for the initial transplant. The subsequent re-transplant must be prior authorized separately.*

Refer to: Subsection 9.2.49, “Organ/Tissue Transplants,” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

3.2.5.3 Prior Authorization for Organ and Transplant Services

All solid organ transplant services provided by facilities and professionals must be prior authorized. If a solid organ transplant is not prior authorized, services directly related to the transplant within the three day pre-operative and six-week postoperative period also will be denied, regardless of who provides the service, (e.g., laboratory services, status-post visits, and radiology services). Services unrelated to the transplant surgery will be paid separately.

A transplant request signed by a physician associated with transplant facilities is considered for prior authorization after the client has been evaluated and meets the guidelines of the institution’s transplant protocol.

Refer to: Subsection 9.2.49, “Organ/Tissue Transplants,” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

3.2.5.4 Transplants for Medicare-Eligible Clients

Transplants are also a benefit under the Medicare program; therefore, for clients eligible for Medicare and Medicaid, Texas Medicaid will pay only the deductible or coinsurance portion as applicable according to current payment guidelines. Prior authorization must be obtained for Medicaid-only clients; authorization will not be given for Medicare/Medicaid-eligible clients. Texas Medicaid will not pay for a transplant service denied by Medicare for a Medicare-eligible client.

3.2.5.5 Experimental or Investigational Services

Benefits are not available for any experimental or investigational services (including xenotransplantation and artificial/bioartificial liver transplants), supplies, or procedures.

3.2.5.6 Reimbursement for Transplant Services

The hospital diagnosis related group (DRG) payment for the transplant includes procurement of the organ and services associated with the organ procurement. The Omnibus Budget Reconciliation Act of 1986 (OBRA 86) Public Law 99-509 added Section 1138 of the Social Security Act, which defines conditions of participation for institutions in the organ procurement program. Organ procurement costs are not reimbursed to a hospital that fails to meet the conditions of participation. The specific guidelines may be found in the appropriate areas of the Code of Federal Regulations (CFR) Title 42, Parts 405, 413, 441, 482, and 485. Documentation of organ procurement must be maintained in the hospital’s medical record.

Refer to: Subsection 2.2, “Fee-for-Service Reimbursement Methodology,” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

3.2.5.7 Nonsolid Organ Transplants

Under current Texas Medicaid policy, procedures are considered to be medically necessary and reasonable based on safety and efficacy, as demonstrated by scientific evidence and controlled by clinical studies.

Nonsolid organ transplants that are benefits of Texas Medicaid include:

- Allogeneic and autologous stem cell transplantation
- Allogeneic and autologous bone marrow transplantation
- Autologous islet cell transplantation

All nonsolid organ transplants require prior authorization and must be performed in a Texas facility that is a designated Children’s Hospital or a facility in compliance with the criteria set forth by the Organ Procurement and Transportation Network (OPTN), the United Network for Organ Sharing (UNOS), or the National Marrow Donor Program (NMDP).

Experimental or investigational services, supplies, or procedures are not a benefit of Texas Medicaid.

3.2.5.7.1 Inpatient Hospitalization

For a nonsolid organ transplant that has been prior authorized for clients who are 21 years of age and older, a maximum of 30 days of inpatient hospital services during a Title XIX spell of illness is covered beginning with the actual first day of the transplant. This coverage is in addition to covered inpatient hospital days provided before the actual first day of the transplant. This 30-day period is considered a separate inpatient hospital admission for reimbursement purposes but is included under one DRG payment.

Autologous harvesting of stem cells (single or multiple sessions) are reimbursed to the facility when prior authorized by HHSC or its designee and performed in the outpatient facility setting. Harvesting of stem cells performed in a hospital inpatient setting is included in the DRG and is not reimbursed separately.

Refer to: Subsection 9.2.49.9, “Nonsolid Organ Transplants,” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*

3.3 Services, Benefits, Limitations, and Prior Authorization - Inpatient Rehabilitation Services

Inpatient rehabilitation services are a benefit of Texas Medicaid when provided as part of a general acute care inpatient admission, or with prior authorization for clients who are 20 years of age and younger in a freestanding rehabilitation facility.

Inpatient rehabilitation services in an acute care setting are included in the hospital DRG payment. All rehabilitation services are subject to Medicaid benefit limitations including the spell of illness. Exceptions to those limitations may be offered under CCP.

Refer to: Section 4, “Therapists, Independent Practitioners, and Physicians” in the *Nursing and Therapy Services Handbook (Vol. 2, Provider Handbooks)*.

Subsection 2.16, “Inpatient Rehabilitation Facility (Freestanding) (CCP),” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)*.

3.4 Services, Benefits, Limitations, and Prior Authorization - Inpatient Psychiatric Services

3.4.1 Enrollment

Acute care hospitals and state psychiatric facilities must be certified by Medicare, have a valid provider agreement with the HHSC, and have completed the TMHP enrollment process.

Refer to: Subsection 5.1, “Enrollment,” for more information about acute care hospital enrollment.

Freestanding psychiatric facilities must be licensed by DSHS or by the appropriate state board where services are rendered. The provider must be approved by The Joint Commission (TJC).

Providers cannot be enrolled if their licenses are due to expire within 30 days.

To be eligible to participate in the Comprehensive Care Inpatient Psychiatric (CCIP) Program to render services to Texas Health Steps (THSteps) clients, a freestanding or state psychiatric facility must be accredited by TJC, have a valid provider agreement with HHSC, and have completed the TMHP enrollment process. Facilities certified by Medicare must also meet TJC accreditation requirements.

Note: Acute care hospitals cannot enroll as CCIP facilities.

3.4.2 General Information

Inpatient admissions to acute care hospitals, freestanding psychiatric facilities, and state psychiatric facilities for psychiatric conditions may be a benefit of Texas Medicaid as outlined in the following table:

Hospital Type	CCIP Clients 0-20 Years of Age	Medicaid Clients of Any Age
Acute care hospital	No	Yes
Freestanding psychiatric facility (IMD)	Yes	Yes (clients 65 years of age and older) No (clients 21 through 64 years of age)
State psychiatric facility (IMD)	Yes	Yes (clients 65 years of age and older) No (clients 21 through 64 years of age)

(IMD) Institution for Mental Diseases.

When a client requires admission, or once the client becomes Medicaid eligible while in the facility, a certification of need must be completed and placed in the client’s record within 14 days of the admission.

Inpatient psychiatric treatment is a benefit of Texas Medicaid if all of the following are met:

- The client has a psychiatric condition that requires inpatient treatment.
- The inpatient treatment is directed by a psychiatrist.
- The inpatient treatment is provided in a nationally accredited facility or hospital.
- The provider is enrolled in Texas Medicaid.

Client services must be provided in the most appropriate setting and in a timely manner to meet the mental health needs of the client.

Inpatient admissions to acute care hospitals, freestanding, and state psychiatric facilities are subject to the Texas Medicaid retrospective utilization review (UR) requirements. The UR requirements are applicable, regardless of the hospital’s designation as a psychiatric unit versus a medical or surgical unit.

3.4.2.1 Professional Services Rendered in the Inpatient Setting

Services rendered in the inpatient hospital setting may be reimbursed to the professional that provides the service.

Refer to: Subsection 6.16, “Psychiatric Services for Hospitals,” in the *Behavioral Health, Rehabilitation, and Case Management Services Handbook (Vol. 2, Provider Handbooks)* for benefit and limitation information about services that are rendered by psychiatrists, psychologists, LPAs, APNs, and PAs in the inpatient setting.

3.4.2.2 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including all hospital services. Hospital services are subject to retrospective review and recoupment if documentation does not support the service that was submitted for reimbursement.

Documentation of medical necessity for inpatient psychiatric care must specifically address the following issues:

- Why the ambulatory care resources in the community cannot meet the treatment needs of the client.
- Why inpatient psychiatric treatment under the care of a psychiatrist is required to treat the acute episode of the client.
- How the services can reasonably be expected to improve the condition or prevent further regression of the client’s condition in a proximate time period.

Supporting documentation (certification of need) must be documented in the individual client’s record. This documentation must be maintained by each facility as applicable to state and federal guidelines and be readily available for review whenever requested by the HHSC or its designee.

Psychological or neuropsychological testing, when performed in an acute care hospital or in a freestanding or state psychiatric facility does not require prior authorization; however, these facilities must maintain documentation that supports medical necessity for the testing and the testing results of any psychological or neuropsychological testing services performed while the client is an inpatient.

3.4.2.3 Noncovered Services

Inpatient admissions including, but not limited to, the following are not benefits of Texas Medicaid without an accompanying medical complication or condition:

- Single diagnosis of chemical dependency or abuse (such as alcohol, opioids, barbiturates, and amphetamines).
- Chronic diagnoses (such as mental retardation, organic brain syndrome, or chemical dependency or abuse).

3.4.2.4 CLIA Certification for Laboratory Services

All providers of laboratory services must comply with the rules and regulations of the Clinical Laboratory Improvement Amendments of 1988 (CLIA). Providers that do not comply with CLIA are not reimbursed for laboratory services.

Texas Medicaid follows the Medicare categorization of tests for CLIA certificate-holders.

Refer to: The CMS website at www.cms.gov/CLIA/10_Categorization_of_Tests.asp for information about procedure code and modifier QW requirements.

3.4.3 Acute Care Hospital Psychiatric Services

Acute care hospital psychiatric services are those services that are rendered to Texas Medicaid clients of any age who are admitted as an inpatient to an acute care hospital for treatment of a psychiatric condition.

Admissions to acute care hospitals must be medically necessary.

Refer to: Subsection 3.2, “Services, Benefits, Limitations, and Prior Authorization - Acute Care,” in this handbook for additional information about acute care benefits and limitations.

3.4.3.1 Prior Authorization Requirements

Prior authorization is not required for fee-for-service clients admitted to psychiatric units in acute care hospitals.

3.4.4 Freestanding and State Psychiatric Facilities

Psychiatric facility services are those services that are rendered in an Institutions for Mental Diseases (IMD). Freestanding and state psychiatric facilities are enrolled in Texas Medicaid as IMDs. According to TAC Rule §419.453 and based on 42 CFR §435.1009, an IMD is a hospital, nursing facility, or other institution of more than 16 beds that is primarily engaged in providing diagnosis, treatment, or care of individuals with mental illness, including medical attention, nursing care, and related services.

3.4.4.1 CCIP Services

Inpatient psychiatric treatment in a nationally accredited freestanding psychiatric facility or a nationally-accredited state psychiatric hospital is a benefit of Texas Medicaid for clients who are 20 years of age and younger, and who are eligible for THSteps benefits at the time of the service request and service delivery.

Admissions to freestanding and state psychiatric facilities must be medically necessary, unless they are court-ordered services for mental health commitments or they are a condition of probation.

Revenue code 124 must be used for inpatient psychiatric services that are rendered to children and adolescents in freestanding and state psychiatric facilities.

Note: *Outpatient services for hospital-based psychiatric day treatment programs or psychiatric facilities are not a benefit of Texas Medicaid.*

3.4.4.1.1 Prior Authorization Requirements for Children and Adolescents

Prior authorization is required under CCIP for admission to freestanding psychiatric facilities or state psychiatric hospitals for clients who are birth through 20 years of age.

A toll-free telephone and fax line are available to complete the authorization process. Contact the TMHP CCIP Unit at 1-800-213-8877 or fax to 1-512-514-4211.

Authorization procedures and approved providers may be different for managed care clients. Contact the client’s specific health care plan for details.

To facilitate a determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including accurate documentation of medical necessity for the services requested.

Initial admissions may be prior authorized for a maximum of five days based on Medicaid eligibility and documentation of medical necessity.

The prior authorization requests will be reviewed as follows:

- All psychiatric admission requests for clients who are 11 years of age and younger will be reviewed by a psychiatrist.
- Psychiatric admission requests for clients who are 12 through 20 years of age will be reviewed by a mental health professional. Any requests for psychiatric admissions that do not meet the criteria for admission will be referred to a psychiatrist for final determination.

- A completed Psychiatric Inpatient Initial Admission Request Form or Psychiatric Inpatient Extended Stay Request Form prescribing the inpatient psychiatric services must be signed and dated by the admitting physician familiar with the client prior to requesting authorization. All signatures must be current, unaltered, original, and handwritten. Computerized or stamped signatures will not be accepted. The completed Psychiatric Inpatient Initial Admission Request Form or Psychiatric Inpatient Extended Stay Request Form must be maintained by the requesting provider and the prescribing physician. The original signature copy must be kept in the hospital's medical record for the client.
- For initial inpatient admissions to freestanding and state psychiatric facilities, the completed Psychiatric Inpatient Initial Admission Request Form must be faxed no later than the date of the client's admission unless the admission is after 5 p.m., on a holiday or a weekend. When the admission occurs after 5 p.m., on a holiday or a weekend, the CCIP unit must receive the faxed request on the next business day following admission. If the admission occurs after 2 p.m., the provider must contact the CCIP unit by telephone and fax the Psychiatric Inpatient Initial Admission Request Form to the CCIP unit on the following business day.
- To complete the prior authorization process, the provider must fax the completed Psychiatric Inpatient Admission Form to the TMHP CCIP prior authorization unit.
- Providers must submit a Psychiatric Inpatient Extended Stay Request Form to the TMHP CCIP unit requesting prior authorization for a continuation of stay. Requests for a continuation of stay must be received on or before the last day authorized or denied. The CCIP unit will notify the provider of the decision in writing by fax. If the date of the CCIP unit determination letter is on or after the last day authorized or denied, the request for continuation of stay is due by 5 p.m. of the next business day.
- The Psychiatric Inpatient Extended Stay Request Form must reflect the need for continued stay in relation to the original need for admission. Any change in the client's diagnosis must be noted on the request. Additional documentation or information supporting the need for continued stay may be attached to the form. Up to seven days may be authorized for an extension request.

Medicaid Clinical Criteria for the Initial Inpatient Psychiatric Stay

The client must have a valid AXIS I, diagnosis as listed in the current version of the DSM as the principal admitting diagnosis and one of the following:

- Outpatient therapy or partial hospitalization has been attempted and failed
- A psychiatrist has documented reasons why an inpatient level of care is required.
- The client's Axis II diagnosis must also be included on the request for inpatient psychiatric treatment.
- The client must meet at least one of the following criteria:
 - The client is presently a danger to self, demonstrated by at least one of the following:
 - Recent suicide attempt or active suicidal threats with a deadly plan, and there is an absence of appropriate supervision or structure to prevent suicide.
 - Recent self-mutilative behavior or active threats of same with likelihood of acting on the threat, and there is an absence of appropriate supervision or structure to prevent self-mutilation (i.e., intentionally cutting/burning self).
 - Active hallucinations or delusions directing or likely to lead to serious self-harm or debilitating psychomotor agitation or retardation resulting in a significant inability to care for self.
- Significant inability to comply with prescribed medical health regimens due to concurrent Axis I psychiatric illness and such failure to comply is potentially hazardous to the life of the client. The medical (AXIS III) diagnosis must be treatable in a psychiatric setting.

- The client is a danger to others. This behavior must be attributable to the client's specific AXIS I diagnosis as listed in the current version of the DSM, and can be adequately treated only in a hospital setting.

This danger is demonstrated by one of the following:

- Recent life-threatening action or active homicidal threats of same with a deadly plan, availability of means to accomplish the plan, and with likelihood of acting on the threat.
- Recent serious assaultive or sadistic behavior or active threats of same with likelihood of acting on the threat, and there is an absence of appropriate supervision or structure to prevent assaultive behavior.
- Active hallucinations or delusions directing or likely to lead to serious harm of others.
- The client exhibits acute onset of psychosis or severe thought disorganization, or there is significant clinical deterioration in the condition of someone with a chronic psychosis, rendering the client unmanageable and unable to cooperate in treatment, and the client is in need of assessment and treatment in a safe and therapeutic setting.
- The client has a severe eating or substance abuse disorder that requires 24-hour-a-day medical observation, supervision, and intervention.
- The client exhibits severe disorientation to person, place, or time.
- The client's evaluation and treatment cannot be carried out safely or effectively in other settings due to severely disruptive behaviors and other behaviors, which may also include physical, psychological, or sexual abuse.
- The client requires medication therapy or complex diagnostic evaluation where the client's level of functioning precludes cooperation with the treatment regimen.
- The client is involved in the legal system, manifests psychiatric symptoms, and is ordered by a court to undergo a comprehensive assessment in a hospital setting to clarify diagnosis and treatment needs.
- The proposed treatment or therapy requires 24-hour-a-day medical observation, supervision, and intervention and must include all of the following:
 - Active supervision by a psychiatrist with the appropriate credentials as determined by the Texas Medical Board (TMB) and with documented specialized training, supervised experience, and demonstrated competence in the care and treatment of children and adolescents. Treatment/therapy plans must be guided by the standards of treatment specified by the Texas Society of Child and Adolescent Psychiatry.
 - Implementation of an individualized treatment plan.
 - Provision of services that can reasonably be expected to improve the client's condition or prevent further regression so that a lesser level of care can be implemented.
 - Proper treatment of the client's psychiatric condition requires services on an inpatient basis under the direction of a psychiatrist and is being provided in the least restrictive environment available, and ambulatory care resources available in the community do not meet the client's needs.

Medicaid Clinical Criteria for Continued Stays

Continued stays are considered for THSteps clients in freestanding and state psychiatric hospitals when the client meets at least one of the criteria from above and have a treatment or therapy regimen, which must include all of the following:

- Active supervision by a psychiatrist with the appropriate credentials as determined by the Texas Medical Board (TMB) and with documented specialized training, supervised experience, and demonstrated competence in the care and treatment of children and adolescents. Treatment/therapy plans must be guided by the standards of treatment specified by the Texas Society of Child and Adolescent Psychiatry.
- Treatment/therapy requires an inpatient level of care.
- Initial discharge plans have been formulated and actions have been taken toward implementation, including documented contact with a local mental health provider.

Continued stays are considered for children and adolescents whose discharge plan does not include returning to their natural home. If the party responsible for placement has provided the provider with three documented placement options for which the child meets admission criteria, but cannot accept the child, up to five days may be authorized, per request, to allow alternative placement to be located. Up to three 5-day extensions may be authorized.

Court-Ordered Services

A request for prior authorization of court-ordered services must be submitted no later than seven calendar days after the date on which the services began.

Court-ordered services are not subject to the five-day admission limitation or the seven-day continued stay limitation. Court-ordered services include:

- Mental health commitments
- Condition of probation (COP)

For court-ordered admissions, a copy of the doctor's certificate and all court-ordered commitment papers signed by the judge must be submitted with the psychiatric hospital inpatient form.

Prior Authorization Appeals

All prior authorization requests not submitted or received by the TMHP CCIP unit in accordance with established policies are denied through the submission date, and claim payment is not made for the dates of service denied.

All denials may be appealed. The TMHP CCIP unit must receive these appeals within 15 days of the TMHP CCIP unit denial notice.

Appeals of a denial for an initial admission and/or a continued stay, must be accompanied by the documentation supporting medical necessity that the provider believes warrants reconsideration.

Appeals of a denial for late submission of information, must be accompanied by documentation that the provider believes supports the compliance with HHSC claims submission guidelines.

Appeals are reviewed first by an experienced psychiatric licensed clinical social worker (LCSW) or a registered nurse (RN) to determine if the required criteria is documented and then forwarded to a psychiatrist for final determination. The TMHP CCIP unit will notify the provider of all denial determinations in writing by fax.

3.4.4.2 Psychiatric Services for Clients 65 Years of Age and Older

IMD services for clients who are 65 years of age and older must be medically necessary and do not require prior authorization.

3.4.4.3 Reimbursement for Services Rendered in an IMD

The following services will not be reimbursed during an inpatient stay when they are rendered to clients who are admitted as inpatients to an IMD:

- Ambulance
- Case management
- Acute care hospital
- Mental health rehabilitation
- School Health and Related Services (SHARS)

IMD providers may be reimbursed only for services that are rendered to clients who are 20 years of age and younger or 65 years of age and older. IMD services and services rendered at an IMD to clients who are 21 years of age through 64 years of age are not eligible for reimbursement.

Services that are rendered in an IMD facility must be identified in the client's plan of care. Services that are not included in the client's plan of care are subject to recoupment.

If the client has not been discharged from the IMD, the IMD provider is responsible for acute care services that are rendered to the client in an acute care facility, and claims that are submitted for these services will be denied as a duplicate service that has been paid to another provider.

Services that are rendered on the date of admission to the IMD and the date of discharge from the IMD may be reimbursed.

Important: *Claims for professional services rendered during an inpatient stay in an Institution for Mental Disease (IMD) must include the IMD facility's ten-digit National Provider Identifier (NPI). Claims that do not include the IMD Facility's NPI will be denied.*

3.4.4.3.1 Medicare Coinsurance and Deductible Reimbursement

Freestanding psychiatric hospitals that are enrolled in Medicare may also receive Medicaid payment for the Medicare coinsurance or deductible according to current Medicaid guidelines.

Exception: IMD services for clients who are 21 through 64 years of age are not benefits of Texas Medicaid. Medicaid will not reimburse coinsurance and deductible payments for psychiatric services that are rendered to these clients in an IMD.

Refer to: Subsection 2.7, "Medicare Crossover Claim Reimbursement," (*Vol. 1, General Information*) for additional information about Medicaid guidelines for Medicare coinsurance and deductible payments.

3.4.4.4 Providing IMD Client Information to TMHP

IMD providers are requested to inform TMHP of the Medicaid clients who are residing in their facilities before submitting inpatient claims for those clients.

IMD providers can use the TMHP secure web page to enter client information and the admission and discharge dates by going to My Account and choosing the Manage IMD Clients Segment link in the Acute Care Online Portal field.

IMD providers can search for Medicaid client records that are associated with their provider identifiers.

Providers will be asked to submit the client's identification number and admission date. After the client is discharged, providers will be requested to enter the discharge date on the same Manage IMD Clients Segment screen.

Providers will not be able to change previously reported client information except for the To Date of Service information.

Providers that submit inaccurate information can call the Electronic Data Interchange (EDI) Help Desk at 1-888-863-3638 to have that client segment inactivated if the request is made within 24 hours of submission. After the erroneous client segment has been inactivated by TMHP, providers may submit a new client segment to replace it. After 24 hours have elapsed, providers must contact HHSC to request a correction to the information. This change must include the appropriate documentation of the client's patient control number (PCN) and the admission and discharge dates.

The change request and appropriate documentation must be submitted in writing to the following address:

Texas Health and Human Services Commission
Mail Code 91X PO Box 204077
Austin, Texas 78720-4077

3.4.5 Medicaid Clinical Criteria for Inpatient Psychiatric Care for Clients

The client must have a valid AXIS I, DSM-IV-TR diagnosis as the principle admitting diagnosis and outpatient therapy or partial hospitalization has been attempted and failed, or a psychiatrist has documented reasons why an inpatient level of care is required. The client's Axis II diagnosis must also be included on the request for inpatient psychiatric treatment.

The client must meet at least one of the following criteria:

- The client is presently a danger to self, demonstrated by at least one of the following:
 - Recent suicide attempt or active suicidal threats with a deadly plan and an absence of appropriate supervision or structure to prevent suicide.
 - Recent self-mutilative behavior or active threats of same with likelihood of acting on the threat and an absence of appropriate supervision or structure to prevent self-mutilation (i.e., intentionally cutting or burning self).
 - Active hallucinations or delusions directing or likely to lead to serious self-harm or debilitating psychomotor agitation or intellectual disability resulting in a significant inability to care for self.
 - Significant inability to comply with prescribed medical health regimens due to concurrent Axis I psychiatric illness and such failure to comply is potentially hazardous to the life of the client. The medical (AXIS III) diagnosis must be treatable in a psychiatric setting.
- The client is a danger to others. This behavior should be attributable to the client's specific AXIS I or DSM-IV-TR diagnosis and can be adequately treated only in a hospital setting. This danger is demonstrated by one of the following:
 - Recent life-threatening action or active homicidal threats of same with a deadly plan and availability of means to accomplish the plan with likelihood of acting on the threat.
 - Recent serious assaultive or sadistic behavior or active threats of same with likelihood of acting on the threat and an absence of appropriate supervision or structure to prevent assaultive behavior.
 - Active hallucinations or delusions directing or likely to lead to serious harm of others.
- The client exhibits acute onset of psychosis or severe thought disorganization, or there is significant clinical deterioration in the condition of someone with a chronic psychosis, rendering the client unmanageable and unable to cooperate in treatment, and the client is in need of assessment and treatment in a safe and therapeutic setting.
- The client has a severe eating or substance abuse disorder which requires 24-hour-a-day medical observation, supervision, and intervention.
- The client exhibits severe disorientation to person, place, or time.

- The client's evaluation and treatment cannot be carried out safely or effectively in other settings due to severely disruptive behaviors and other behaviors which may also include physical, psychological, or sexual abuse.
- The client requires medication therapy or complex diagnostic evaluation where the client's level of functioning precludes cooperation with the treatment regimen.
- The client is involved in the legal system, manifests psychiatric symptoms, and is ordered by court to undergo a comprehensive assessment in a hospital setting to clarify the diagnosis and treatment needs.

The proposed treatment or therapy requires 24-hour-a-day medical observation, supervision, and intervention and must include all of the following:

- Active supervision by a psychiatrist with the appropriate credentials as determined by the Texas Medical Board (TMB) and with documented specialized training, supervised experience, and demonstrated competence in the care and treatment of children and adolescents. Treatment or therapy plans must be guided by the standards of treatment specified by the Texas Society of Child and Adolescent Psychiatry.
- Implementation of an individualized treatment plan.
- Provision of services which can reasonably be expected to improve the client's condition or prevent further regression so that a lesser level of care can be implemented.

Proper treatment of the client's psychiatric condition requires services on an inpatient basis under the direction of a psychiatrist and is being provided in the least restrictive environment available, and ambulatory care resources available in the community do not meet the client's needs.

3.4.6 Continued Stays

Continued stays are considered when the client meets at least one of the criteria from above and has a treatment or therapy regimen that includes all of the following:

- Active supervision by a psychiatrist with the appropriate credentials as determined by the TMB and with documented specialized training, supervised experience, and demonstrated competence in the care and treatment of children and adolescents. Treatment or therapy plans must be guided by the standards of treatment specified by the Texas Society of Child and Adolescent Psychiatry.
- Treatment or therapy requires an inpatient level of care.
- Initial discharge plans have been formulated and actions have been taken toward implementation, including documented contact with a local mental health provider.

Continued stays are considered for children and adolescents whose discharge plan does not include returning to their natural home. If the party responsible for placement has provided the provider with three documented placement options for which the child meets admission criteria, but which cannot accept the child, up to five days may be authorized, per request, to allow alternative placement to be located. Up to three five-day extensions may be authorized.

3.4.7 Court-Ordered Services

A request for prior authorization of court-ordered services must be submitted no later than seven calendar days after the date on which the services began.

Court-ordered services are not subject to the 12-hour system limitation per provider, per day when billed with modifier H9.

Court-ordered services are not subject to the five day admission limitation or the seven day continued stay limitation. Court-ordered services include:

- Mental health commitments

- Condition of probation (COP)

For court-ordered admissions, a copy of the doctor's certificate and all court-ordered commitment papers signed by the judge must be submitted with the psychiatric hospital inpatient form.

Specific court-ordered services for evaluations, psychological or neuropsychological testing, or treatment may be prior authorized as mandated by the court. A copy of the court document signed by the judge must accompany prior authorization requests. If the requested services differ from the court order, the additional services will be reviewed for medical necessity. Requested services beyond those court-ordered are subject to medical necessity review.

3.4.8 Denials

All prior authorization requests not submitted or received by the TMHP CCIP Unit in accordance with established policies are denied through the submission date, and claim payment is not made for the dates of service denied.

All denials may be appealed. The TMHP CCIP Unit must receive these appeals within 15 days of the TMHP CCIP Unit denial notice.

- Appeals of a denial for an initial admission or a continued stay must be accompanied by the documentation supporting medical necessity that the provider believes warrants reconsideration.
- Appeals of a denial for late submission of information must be accompanied by documentation which the provider believes supports the compliance with HHSC claims submission guidelines.
- Appeals are reviewed first by an experienced psychiatric LCSW (Licensed Clinical Social Worker) or an RN to determine if the required criteria is documented and then forwarded to a psychiatrist for final determination. The TMHP CCIP Unit will notify the provider of all denial determinations in writing by fax.

3.5 Inpatient Utilization Review

UR activities of all Medicaid services provided by hospitals reimbursed under the DRG prospective payment system or the Tax Equity and Fiscal Responsibility Act (TEFRA) of 1982 are required by Title XIX of the Social Security Act, Sections 1902 and 1903. The review activities are accomplished through a series of monitoring systems developed to ensure services are appropriate to need of optimum quality and quantity, and rendered in the most cost-effective mode. Clients and providers are subject to UR monitoring. The monitoring focuses on the appropriate screening activities, medical necessity of all services, and quality of care as reflected by the choice of services provided, type of provider involved, and settings in which the care was delivered. This monitoring ensures the efficient and cost-effective administration of Texas Medicaid.

The HHSC Office of Inspector General (OIG) UR Unit is responsible for retrospective review of inpatient DRG and TEFRA admissions. These reviews are accomplished through onsite visits, electronic access, or mail-in.

3.6 Utilization Review Process

The inpatient UR process for admissions reimbursed under the DRG prospective payment system consists of sampling medical records of paid Medicaid claims. The review process consists of three major components:

- *Admission review.* Determination of the medical necessity of the admission. For purposes of the Texas Medical Review Program (TMRP), TEFRA, and facility-specific per diem methodology reviews, medical necessity means the client has a condition requiring treatment that can be safely provided only in the inpatient setting.

- *Quality review.* Assessment of the quality of care provided to determine if it meets generally accepted standards of medical and hospital care practices or puts the client at risk of unnecessary injury or death. Quality of care review includes the use of discharge screens and generic quality screens.
- *DRG validation.* Determination that the critical elements necessary to assign a DRG are present in the medical record and the diagnosis and procedures are sequenced correctly. The critical elements are age, sex, admission date, discharge date, patient discharge status, principal diagnosis, secondary diagnoses (complications or comorbidities), and principal and secondary procedures.

The HHSC OIG UR Unit staff reviews the complete medical record to make decisions about the medical necessity of the admission, validity of the DRG, including the present on admission (POA) indicator, and quality of care. The medical record must reflect that any services reimbursed by Texas Medicaid were ordered by a physician or non-physician provider.

When an admission denial or a denial of continued stay is issued, or when a technical denial becomes final, all money is recouped from the hospital for the admission or days of stay that are denied. When a DRG is reassigned as a result of UR, the payment to the hospital is adjusted.

Refer to: Subsection 3.6.7, “Technical Denials (DRG Prospective Payment).”

If an inpatient admission is denied, but a physician’s order is present documenting the client originally was placed in observation, the UR unit may authorize the resubmission of services rendered during the first 48 hours on an outpatient claim.

Compliance with the DRG prospective payment system and aspects of the review as stated above are evaluated quarterly. Identified problems may result in an educational visit or action, such as recoupment or referral to the HHSC OIG Medicaid Program Integrity (MPI) or Sanctions Unit.

3.6.1 Admission Review

All services, supplies, or items submitted as certified on claim submission, must be medically necessary for the client’s diagnosis or treatment. Review personnel assess the medical necessity of an admission by comparing documentation present in the medical record using recognized evidence-based guidelines for inpatient screening criteria. The evidence-based guidelines are Milliman Care Guidelines, which replace the physician developed and physician-approved Medicaid hospital screening criteria addressed through a rule revision effective August 1, 2006. Non-physician reviewers use the criteria as guidelines for the initial approval or for the referral of inpatient reviews for medical necessity decisions. Cases that do not meet initial approval are referred to a physician consultant to determine the medical necessity of the inpatient admission. If the criteria are met but the medical necessity of the admission is still questionable, the case is referred to a physician consultant for a determination. If a physician consultant determines the admission is not medically necessary, a denial is issued.

Review personnel assess the medical necessity of admissions prior to September 1, 2006, by comparing documentation present in the medical record with elements in the TMRP Hospitalization Screening Criteria.

3.6.2 Readmission Review

If a hospital admission or readmission occurs within 30 days of a discharge from the same or a different hospital for the same or closely related diagnosis, or for a condition identified during the previous admission, it may be reviewed for medical necessity, quality, and DRG validation including POA indicators.

Transfers from one facility to another and readmissions are also subject to review.

3.6.3 Hospital-Based Ambulatory (HASC) Surgical Procedures

Inpatient admissions for surgical procedures listed as ambulatory surgical codes in the current fee schedule are denied if documentation does not support the need for the inpatient admission.

3.6.4 Quality Review

Each Medicaid case is evaluated for quality of client care, adequacy of discharge planning, and medical stability of the client at discharge. Quality of care review includes the use of discharge screens and generic quality screens. Potential quality of care issues are identified by the physician. HHSC contracts with physician consultants to review medical records for quality of care. Physician consultants, of the specialty related to the care rendered, may make clinical recommendations or determine corrective actions when deemed appropriate. Child and adolescent psychiatrists may make recommendations based on review of inpatient psychiatric services provided to Medicaid clients younger than 21 years of age. Failure to verify completion of any corrective action recommendation within the specified time frame may result in referral of the case to the HHSC OIG MPI or Sanctions Unit.

3.6.5 Diagnosis-Related Group Validation

Each medical record is reviewed to validate the elements critical to the DRG assignment. These elements are the client's age, sex, admission date, patient discharge date, patient discharge status, principal diagnosis, secondary diagnoses (complications or co-morbidities), POA indicators, and principal and secondary procedures. Documentation of these critical DRG elements in the medical record is evaluated for the correlation to the information provided on the claim form.

The principal diagnosis is the diagnosis (condition) established after study to be chiefly responsible for causing the admission of the client to the hospital for care. The condition must be treated or evaluated during this admission to the hospital.

The secondary diagnoses are conditions that affect client care in terms of requiring clinical evaluation, therapeutic treatment, diagnostic procedures, extended length of hospital stay, increased nursing care and monitoring, or have clinically significant implications for future health-care needs.

The coding of diagnoses that have clinically significant implications for future health-care needs applies only to newborns and must be identified by the physician. Normal newborn conditions or routine procedures are not to be considered as complications or co-morbidities for DRG assignment.

Refer to: Subsection 1.11, "Texas Medicaid Limitations and Exclusions," in Section 1, "Provider Enrollment and Responsibilities" (*Vol. 1, General Information*).

The POA review will validate the POA indicator assigned to the principal and secondary diagnoses codes reported on claim forms. If it is determined that the principal and/or secondary diagnoses were not present at the time the order for inpatient admission occurs, the Commission will revise the POA indicator for the diagnosis code. Conditions that develop during an outpatient encounter, including emergency department, observation, or outpatient surgery are considered POA.

If the principal diagnosis, secondary diagnoses (complications or co-morbidities), or procedures are not substantiated in the medical record; sequenced correctly; have an incorrect POA indicator; or have been omitted, codes may be deleted, changed, or added. All diagnosis or procedure coding changes potentially resulting in a DRG change are referred to a physician consultant. When it is determined that the diagnoses and procedures are substantiated and sequenced correctly, the information will be entered into the applicable version of the Grouper software for a DRG determination. The CMS-approved DRG software considers each diagnosis and procedure and the combination of all codes and elements to make a determination of the final DRG assignment. When the DRG is reassigned, the payment to the provider is adjusted.

3.6.6 Recommendations to Enhance Compliance with Texas Medicaid Fee-for-Service Hospital Claims Submission

The following information highlights an area for physician and hospital providers where collaboration in client care delivery exists but can improve. Texas Medicaid, through its hospital UR activities, has identified this area for both compliance with provider responsibilities and the reduction of the submission of inappropriate inpatient hospital claims.

To enhance compliance with Texas Medicaid fee-for-service hospital claims submission and decrease the submission of inappropriate inpatient hospital claims, providers should adhere to the following:

- For admissions on or after September 1, 2006, physicians and hospital staff should become familiar with the Milliman Care Guidelines for medical necessity for inpatient admission.
- The hospital may admit clients in observation status if the physician has the reasonable expectation that the client will be discharged within 48 hours. If an inpatient claim was denied per retrospective UR, the hospital may resubmit the claim for the first 48 hours as an outpatient claim if the client was initially admitted in observation status (per physician order) and the stay was more than 48 hours.
- When a client is admitted to the hospital as an inpatient and is discharged in less than 48 hours, the hospital may request that the physician change the admission order from inpatient status to outpatient observation status. This practice is acceptable when the physician makes changes to the admitting order before the hospital submits the claim for payment.
- The correction in admission status, when the above criteria are met avoids errors in claims submission and the potential need for a more lengthy appeal process.
- If the physician admitting orders do not accurately reflect the services provided, the hospital inpatient claim may be denied and the inappropriate payment recovered from both the hospital and the admitting physician.

3.6.7 Technical Denials (DRG Prospective Payment)

3.6.7.1 On-Site Reviews

The following information describes on-site reviews:

- If the complete medical record is not made available during the on site review, a preliminary technical denial is issued on site. The hospital is allowed 60 calendar days from the date of the exit conference to provide the complete medical record to HHSC. If the complete medical record is not received by HHSC within this specified time frame, a final technical denial is issued and payment is recouped.
- If a complete medical record is made available on site, but a copy is required for further review, and the copy is not received by HHSC within the specified time frame, a preliminary technical denial is issued by certified mail or fax. The hospital has 60 calendar days from the date of receipt of the notice to submit the complete medical record. If the complete medical record is not received by HHSC within this specified time frame, a final technical denial is issued and payment is recouped.

Note: *A notarized business record affidavit in the format approved by HHSC is required for paper and electronic copies of requested medical records. A provider failing to provide this documentation must resubmit the requested records with the affidavit.*

Refer to: Subsection 1.6.3, “Retention of Records and Access to Records and Premises,” in Section 1, “Provider Enrollment and Responsibilities” (*Vol. 1, General Information*).

3.6.7.2 Mail-In Reviews

If the complete medical record is not received by HHSC within the specified time frame, a preliminary technical denial is issued by certified mail or fax. The hospital has 60 calendar days from the date of receipt of the notice to submit the complete medical record. If the complete medical record is not received by HHSC within this specified time frame, a final technical denial is issued and payment is recouped.

Hospital inpatient claim payments that have been recouped because of a technical denial may not be resubmitted on an outpatient claim.

Note: *A notarized business record affidavit in the format approved by HHSC is required for paper and electronic copies of requested medical records. A provider who fails to provide this documentation must resubmit the requested records with the affidavit.*

Refer to: Subsection 1.6.3, “Retention of Records and Access to Records and Premises,” in Section 1, “Provider Enrollment and Responsibilities” (*Vol. 1, General Information*).

3.6.8 Acknowledgment of Penalty Notice

Hospitals must have on file a signed acknowledgment from the physician stating that the physician received the following notice:

Notice to Physicians: Medicaid payment to hospitals is based, in part, on each client’s principal and secondary diagnoses and the major procedures performed on the client, as attested to by the client’s attending physician by virtue of his or her signature in the medical record. Anyone who misrepresents, falsifies, or conceals essential information required for payment of federal or state funds, may be subject to fine, imprisonment, or civil penalty under applicable federal and state laws.

The acknowledgment of penalty notice must be specific to Texas Medicaid. Medicare penalty notices are not accepted.

3.6.9 Sanctions

Compliance with the DRG prospective payment system and aspects of the review as stated above are evaluated quarterly. Identified problems may result in an educational visit or action such as recoupment or referral to HHSC OIG MPI or Sanctions Unit.

3.6.10 Utilization Review Appeals

Hospital providers may appeal adverse decisions by HHSC OIG UR Unit to the HHSC UR Medical Appeals Unit. A UR Medical Appeals decision is the final administrative decision of HHSC. Neither HHSC OIG UR Unit nor TMHP are responsible for Medical UR appeals.

Refer to: Subsection 7.3.3, “Utilization Review Appeals,” in Section 7, “Appeals” (*Vol. 1, General Information*).

3.7 Claims Filing and Reimbursement

3.7.1 Medicaid Relationship to Medicare

Texas Medicaid may make deductible or coinsurance payments according to current Medicaid payment guidelines on valid, assigned Part A (hospital) and Part B (medical) Medicare claims.

Refer to: Subsection 2.7, “Medicare Crossover Claim Reimbursement,” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for information about coinsurance and deductible payment guidelines.

Texas Medicaid provides reimbursement for 30 inpatient benefit days per spell of illness. When the 30 days coincide with the first 30 days of the Medicare benefit period and the client is eligible for both Medicare and Medicaid, Texas Medicaid pays the:

- Inpatient hospital deductible under Medicare Part A.
- Medicare Part A deductible for the first three pints of whole blood or packed red cells.

When the client only has Medicare Part B coverage, the hospital must follow these guidelines:

- Submit to Medicare the charges for certain inpatient ancillary services on a Medicare Claim Form 1483 for payment under the client’s Part B coverage. The ancillary charges include the following:

- Diagnostic X-ray tests, diagnostic laboratory tests, and other diagnostic tests
- X-ray, radium, and radioactive isotope therapy, including materials and services of technicians
- Surgical dressings, splints, casts, and other devices used for reduction of fractures and dislocations
- Prosthetic devices (other than dental) that replace all or part of an internal body organ or member (including contiguous tissue) or all or part of the function of a permanently inoperative or malfunctioning internal body organ or member including replacement or repairs of such devices (e.g., cardiac pacemakers, breast prostheses, maxillofacial devices, colostomy bags, and prosthetic lenses)
- Leg, arm, back, and neck braces, and artificial legs, arms, and eyes, including replacements and adjustments (if required) because of a change in the client’s physical condition
- Physical therapy (PT) services
- Speech pathology services
- Dialysis treatments
- Submit to TMHP the remaining Part A charges on a UB-04 CMS-1450 paper claim form (or its electronic equivalent) indicating in Block 80 that the client is eligible for Medicare Part B benefits only. The client’s health insurance claim (HIC) number must appear on the Medicaid claim in Block 80. TMHP must receive these charges within 95 days of the last date of service on the claim.

Refer to: Subsection 2.7, “Medicare Crossover Claim Reimbursement,” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*).

3.7.2 Inpatient Claims Information

Medicaid present on admission (POA) reporting is required for all inpatient hospital claims.

All hospital providers are required to submit a POA value for each diagnosis on the claim form, and no hospital is exempt from this POA requirement. Medicare crossover hospital claims must also comply with the Medicaid requirement to include the POA values.

POA is defined as present at the time the order for inpatient admission occurs. Conditions that develop during an outpatient visit, including emergency department, observation, or outpatient surgery, are considered POA.

The following table shows the POA values:

POA Value	Description	Payment
Y	Diagnosis was present at the time of admission	Payment will be made by Medicare when a hospital-acquired condition (HAC) is present
N	Diagnosis was not present at the time of admission	No payment will be made by Medicare when an HAC is present
U	Documentation was insufficient	No payment will be made by Medicaid when an HAC is present
W	Clinically undetermined	Payment will be made by Medicaid when an HAC is present:
(blank)	Exempt from POA reporting	Exempt from POA reporting

Note: Texas Medicaid follows Medicare guidelines for payments referenced in this table.

Note: *If a diagnosis code is exempt from POA reporting, providers should leave the POA indicator field blank on the claim.*

TMHP will not recalculate the DRG based on POA indicator values for Medicare crossover claims or MCOs.

Depending on the POA indicator value, the DRG may be recalculated, resulting in a lower payment to the hospital facility provider. If the number of days on an authorization is higher than the number of days allowed as a result of a POA DRG recalculation, the lesser of the number of days will be reimbursed.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (*Vol. 1, General Information*).

Section 6: Claims Filing (*Vol. 1, General Information*).

A complete list of POA exempt diagnosis codes can be found on the CMS website at www.cms.gov/Regulations-and-Guidance/Guidance/Transmittals/downloads/R1019OTN.pdf

Claims for inpatient hospital services must be submitted to TMHP in an approved electronic format or on the UB-04 CMS-1450 paper claim form. Providers may purchase UB-04 CMS-1450 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a UB-04 CMS-1450 paper claim form, all required information must be included on the claim, as TMHP does not key any information from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

In Block 44 of the UB-04 CMS-1450, enter the accommodation rate per day. Match the appropriate diagnoses listed in Blocks 67A through 67Q corresponding to each procedure. If a procedure corresponds to more than one diagnosis, enter the primary diagnosis. Each service and supply must be itemized on the claim.

Hospitals may submit information only claims to TMHP when one of the following situations exists. Hospitals must use TOB 110 to file these claims:

- Inpatient 30-day spell of illness benefit is exhausted.
- Payment made by a third party resource or other insurance exceeds the Medicaid allowed amount.

Additional claims information can be found within individual topic areas in this section.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (*Vol. 1, General Information*).

Section 6: Claims Filing (*Vol. 1, General Information*).

The [Claim Form Examples](#) page on the TMHP website at www.tmhp.com.

3.7.3 Inpatient Reimbursement

3.7.3.1 Prospective Payment Methodology

Inpatient hospital stays except state-owned teaching hospitals, and psychiatric facilities (CCP) are reimbursed according to a prospective payment methodology based on diagnosis-related groups (DRGs). The reimbursement method itself does not affect inpatient benefits and limitations. Inpatient admissions must be medically necessary and are subject to Texas Medicaid's UR requirements.

The DRG reimbursement includes all facility charges (e.g., laboratory, radiology, and pathology). Hospital-based laboratories and laboratory providers who deliver referred services outside the hospital setting must obtain reimbursement for the technical portion from the hospital. The technical portion includes the handling of specimens and the automated or technician-generated reading and reporting of results. The technical services are not billable to Texas Medicaid clients.

Texas Medicaid does not distinguish types of beds or units within the same acute care facility for the same inpatient stay (e.g., psychiatric or rehabilitation). Because all Medicaid inpatient hospitalizations are included in the DRG database that determines the DRG payment schedule, psychiatric and rehabilitation admissions are not excluded from the DRG payment methodology. To ensure accurate payment,

Texas Medicaid requires that only one claim be submitted for each inpatient stay with appropriate diagnosis and procedure code sequencing. The discharge and admission hours (military time) are required on the UB-04 CMS-1450 paper claim form, to be considered for payment.

The number of days of care charged to a beneficiary for inpatient hospital or skilled nursing facility (SNF) care services is always in units of full days. A day begins at midnight and ends 24 hours later. The midnight-to-midnight method is to be used in counting days of care for reporting purposes even if the hospital or SNF uses a different definition of day for statistical or other purposes.

A part of a day, including the day of admission and day on which a patient returns from leave of absence, counts as a full day. However, the day of discharge, death, or a day on which a patient begins a leave of absence is not counted as a day unless discharge or death occur on the day of admission.

If admission and discharge or death occur on the same day, the day is considered a day of admission and counts as one inpatient day.

Reimbursement to acute care hospitals for inpatient services is limited to \$200,000 per client, per benefit year (November 1 through October 31). Claims may be subject to retrospective review, which may result in recoupment. This limitation does not apply to services related to certain organ transplants or services to THSteps clients when provided through CCP.

In accordance with legislative direction included in the 2006–2007 General Appropriations Act (Article II, Section 49, S.B. 1, 79th Legislature, Regular Session, 2005), a rate reduction will be applied to inpatient hospital services rendered to non-Medicare Supplemental Security Income (SSI) and SSI-related Medicaid clients. The rate reduction will affect hospital providers within the Bexar, Dallas, El Paso, Harris, Lubbock, Nueces, Tarrant, and Travis service areas that are reimbursed by DRG.

Effective September 1, 2013, a hospital that is either located in a county with 60,000 or fewer persons, is a Medicare-designated rural referral center (RRC) or sole community hospital (SCH) that is not located in a metropolitan statistical area (MSA) as defined by the U.S. Office of Management and Budget, or is a Medicare-designated CAH, will be reimbursed the greater of the prospective payment system rate or a cost-reimbursement methodology authorized by DRG using the most recent data.

A new provider is given a reimbursement inpatient interim rate of 50 percent until a cost audit has been performed. A default standard dollar amount (SDA) rate is assigned for newly enrolled providers or newly constructed facilities.

Payment is calculated by multiplying the SDA for the hospital's payment division indicator times the relative weight associated with the DRG assigned by Grouper.

Hospital reimbursement is made in accordance with the following TAC rules:

- 1 TAC §355.761 - Reimbursement Methodology for Institutions of Mental Diseases (IMD)
- 1 TAC §355.8052 - Inpatient Hospital Reimbursement
- 1 TAC §355.8056 - State-Owned Teaching Hospital Reimbursement Methodology
- 1 TAC §355.8058 - Inpatient Direct Graduate Medical Education (GME) Reimbursement
- 1 TAC §355.8060 - Reimbursement Methodology for Freestanding Psychiatric Facilities
- 1 TAC §355.8061 - Outpatient Hospital Reimbursement
- 1 TAC §355.8065 - Disproportionate Share Hospital Reimbursement Methodology
- 1 TAC §355.8066 - Hospital-Specific Limit Methodology

Medicaid providers that are cost-reimbursed are subject to cost reporting, cost reconciliation, and cost settlement processes, as defined in the following TAC rules:

- 1 TAC §355.8061 (a)(2) - Outpatient Hospital Rembursement

- 1 TAC §355.8052 (i)(i) - Inpatient Hospital Reimbursement
- 1 TAC §355.8056 - State-Owned Teaching Hospital Reimbursement Methodology

3.7.3.2 Client Transfers

3.7.3.2.1 Admission Dates

To ensure correct payor identification, providers that receive transfer patients from another hospital must enter the actual date on which the client was admitted into each facility in Block 12 on the UB-04 CMS-1450.

3.7.3.2.2 Continuous Stays – Client Transfers and Readmissions

Client transfers within the same facility are considered one continuous stay and receive only one DRG payment. Texas Medicaid does not recognize specialty units within the same hospital as separate entities; therefore, these transfers must be submitted as one admission under the provider identifier. Readmissions to the same facility within 24 hours of a previous acute hospital or facility discharge are also considered one continuous stay and receive only one DRG payment.

Readmissions are considered a continuous stay regardless of the original or readmission diagnosis. Admissions submitted inappropriately are identified and denied during the UR process and may result in intensified review.

When more than one hospital provides care for the same client, the hospital providing the most significant amount of care receives consideration for a full DRG payment. The other hospitals are paid a per diem rate based on the lesser of either the mean length of stay for the DRG or the eligible days in the facility. The DRG modifier, PT, on the R&S Report indicated per diem pricing related to a client transfer. Services must be medically necessary and are subject to Texas Medicaid’s UR requirements.

HHSC performs a postpayment review to determine if the hospital providing the most significant amount of care received the full DRG. If the review reveals that the hospital providing the most significant amount of care did not receive the full DRG, an adjustment is initiated.

To ensure correct payor identification, providers that receive transfer patients from another hospital must enter the actual date that the client was admitted into each facility in Block 12 on the UB-04 CMS-1450. Inpatient authorization requirements are based on the requirements that are specified by the program in which the client is enrolled on the date of the original admission. Providers must adhere to the authorization requirements for claims to be considered for reimbursement. Providers are reimbursed at the rate in effect on the date of admission.

3.7.3.3 Observation Status to Inpatient Admission

The dates of the inpatient admission must be reported as follows:

- *Date of inpatient admission:* The date of admission must reflect the date that the client was admitted to the hospital as an inpatient.
- *Dates of service:* The from date of service (FDOS) must reflect the date that the client first presented at the hospital for services including, but not limited to, emergency room (ER), observation, labor and delivery, or inpatient services.

If services that are rendered before the inpatient admission must be submitted on the inpatient claim, the number of preadmission days that are related to the inpatient admission cannot exceed the days of allowed for the rendered services:

Services	Days Allowed	Units
Emergency room (ER) services	One day (24 hours) before the inpatient admission	Submitted per day

Observation services	Up to two days (48 hours) before the inpatient admission	Submitted in hours
Labor and Delivery	Up to three days before the inpatient admission	Submitted per day

Diagnosis-Related Group (DRG) hospital claims allow for a total of three days of pre-admit services. Non-DRG hospital claims are allowed one day of pre-admit services, and a second day if additional observation hours occurred.

Note: If the client is admitted as an inpatient more than 24 hours after presenting in the ER without being placed in observation status or more than 48 hours after being placed in observation status, the ER and observation services may be reimbursed separately as outpatient services and must not be included on the inpatient claim.

3.7.3.4 Outliers

TMHP makes outlier payment adjustments to DRG hospitals for admissions that meet the criteria for exceptionally high costs or exceptionally long lengths of stay for clients who are 20 years of age and younger as of the date of the inpatient admission. If a client’s admission qualifies for both a day and a cost outlier, the outlier resulting in the higher payment to the hospital is paid.

Providers can view their day and cost outlier payment information for inpatient hospital claims on the Electronic Remittance and Status (ER&S) Report. The R&S Report reflects the outlier reimbursement payment and defines the type of outlier paid. To view the day and cost outlier payment information, providers, facilities, and third party vendors may need to update their 835 electronic file format. For information about how to update the 835 electronic file format, refer to the [revised electronic data interchange \(EDI\) companion guide](#) (ANSI ASC X12N 835 Healthcare Claim Payment/Advice-Acute Care Companion Guide) on the TMHP website at www.tmhp.com.

3.7.3.4.1 Day Outliers

The following criteria must be met to qualify for a day outlier payment:

- Inpatient days must exceed the DRG day threshold for the specific DRG.
- Additional payment is based on inpatient days that exceed the DRG day threshold multiplied by 60 percent of the per diem amount of a full DRG payment.
- The per diem amount is established by dividing the full DRG payment amount by the arithmetic mean length of stay for the DRG.

In compliance with 1 TAC §355.8052, all DRG inpatient hospital day outlier payments must not exceed the allowed cost for the service. All hospitals except in-state children’s hospitals, both day and cost outlier payments have been reduced by 10 percent.

TMHP calculates payments as follows:

1) Calculate the day outlier.

Calculate the allowed cost for the service (i.e., the cap amount) by taking the difference between the Tax Equity and Fiscal Responsibility Act (TEFRA) and DRG-payable amounts.

Take the lesser of the day outlier or the cap amount.

Reduce the day outlier by 10 percent for all hospitals except in-state children’s hospitals.

2) Calculate the cost outlier:

Reduce the cost outlier by 10 percent for all hospitals except in-state children’s hospitals.

Reimbursement is made for day or cost outliers on claims that qualify. If a client’s admission qualifies for both a day and a cost outlier, the outlier resulting in the higher payment to the hospital is paid.

Example

Calculations	Example amount
<p>Day Outlier Calculation: $([SDA \times DRG \text{ relative weight} / \text{Mean Length of Stay}] \times \text{Outlier Days}) \times 0.6 = \text{day outlier amount}$</p>	\$500.00
<p>Apply Cap and Reduce by 10 Percent Calculate the allowed cost for the service (i.e., the cap amount) by taking the difference between the TEFRA and DRG payable amounts (in this example, \$600.00). Take the lesser of the day outlier or the cap amount (in this example it would be the day outlier of \$500.00). Reduce by 10 percent.</p>	\$450.00
<p>Calculation1: Cost Threshold $11.14 \times \text{Universal Mean } (\\$6,505.52) = \text{<amount A>}$ $11.14 \times \text{SDA} = \text{<amount B>}$ $1.5 \times \text{DRG Relative Weight} \times \text{SDA} = \text{<amount C>}$ Cost threshold = The greater of <amount C> compared with (the lesser of <amount A></p>	\$550.00
<p>Calculation2: Cost Outlier Allowed amount \times reimbursement rate = TEFRA amount TEFRA amount - cost threshold \times 0.6 percent = cost outlier amount Reduce by 10 percent.</p>	\$495.00

The calculations in this example would result in one of the following payments:

- If the claim qualifies for the day outlier payment only, payment will be made up to \$450.00.
- If the claim qualifies for the cost outlier payment only, payment will be made up to \$495.00.
- If the claim qualifies for both the day outlier and cost outlier payment, the payment will be made up to \$495.00, which is the greater of the day outlier or the cost outlier payment.

3.7.3.5 Children’s Hospitals

Children’s hospitals are reimbursed using the prospective payment methodology based on APR-DRG methodology.

With the exception of designated children’s hospitals, hospitals that are reimbursed by APR-DRG payment methodology receive one SDA rate.

Designated children’s hospitals receive two SDA rates:

- One rate for obstetric delivery services rendered to clients who are 18 years of age and older.
- One rate for all other services rendered to clients who are 18 years of age and older and all services rendered to clients who are 17 years of age and younger, including obstetric delivery services.

3.7.3.6 Potentially Preventable Complications (PPC) and Potentially Preventable Readmissions (PPR)

Potentially Preventable Complications (PPCs)

By definition, potentially preventable complications (PPCs) are harmful events or negative outcomes that develop after hospital admission and may result from processes of care and treatment rather than from the natural progression of the underlying illness. A PPC is an inpatient hospital complication that was potentially preventable based on criteria such as hospital characteristics, reason for admission, procedures, and the interrelationships between underlying medical conditions.

S.B. 7, Chapter 526, the 82nd Texas Legislature, 2011, establishes the authority of HHSC to identify PPCs in the Medicaid population. HHSC must confidentially report the results to each hospital that serves Texas Medicaid clients, and each of those hospitals must distribute the information to its care providers.

HHSC also produces a public version of the report, which does not specifically identify any of the hospitals. A statewide average PPC rate is calculated for all hospitals within Texas. Each hospital has an individual rate. Hospitals are able to compare their rate of PPC to the statewide average.

The PPC analysis is performed in accordance with TAC, §354.1446 Potentially Preventable Complications.

Potentially Preventable Re-admission (PPRs)

By definition, potentially preventable re-admissions (PPRs) are return hospitalizations of a person within a period specified by HHSC that results from deficiencies in the care or treatment provided to the person during a previous hospital stay or from deficiencies in post-hospital discharge follow-up.

Texas Medicaid uses a 15 day re-admission interval.

Section 531.913, House Bill (H.B.) 1218, 81st Legislature, 2009, requires the HHSC to identify PPRs in the Medicaid population. HHSC must confidentially report the results to each hospital that serves Texas Medicaid clients, and each of those hospitals must distribute the information to its care providers.

HHSC delivers an annual, confidential report of the results to each hospital that is enrolled in Texas Medicaid, and each of those hospitals must distribute the information to their care providers. HHSC also produces a public version of the report, which does not specifically identify any of the hospitals. Patients are never identified in the reports.

PPR Analysis

The PPR analysis is performed in accordance with TAC, §354.1446 Potentially Preventable Readmissions.

3.7.3.7 State-owned Teaching Hospitals

Inpatient hospital stays in designated state-owned teaching hospitals are reimbursed according to the payment methodology.

State-owned teaching hospitals are defined specifically in 1 TAC §355.8052 as the following hospitals: University of Texas Medical Branch (UTMB); University of Texas Health Center Tyler; and M.D. Anderson Hospital.

3.7.3.8 Payment Window Reimbursement Guidelines

Guidelines for Services Preceding an Inpatient Admission

The following payment window reimbursement guidelines apply to services that are rendered by the hospital or an entity that is wholly owned or operated by the hospital. The three-day (or one-day) payment window does not apply if:

- The hospital and the physician office or other entity are both owned by a third party, such as a health system.

- The hospital is not the sole or 100 percent owner of the entity.

Texas Medicaid inpatient hospital providers must submit, as part of the client’s inpatient hospital claim, all related professional and outpatient services that were rendered on the date of the client’s inpatient admission or one of the following dates immediately before admission:

- Within three calendar days before the client’s inpatient admission for hospitals that receive DRG reimbursement
- Within one calendar day before the client’s inpatient admission for hospitals that receive reimbursement other than DRG.

Professional and outpatient services that must be submitted as part of the inpatient hospital claim include the following services if they are rendered by the hospital or an entity that is wholly owned or operated by the hospital:

- Diagnostic services. Diagnostic services include outpatient laboratory and radiology services that are related to the inpatient admission and submitted by physician and outpatient hospital providers. Affected services will include the total and technical components. The professional interpretation component will not be included in the payment windows identified above.
- Non-diagnostic services. Non-diagnostic services include surgeries and other non-diagnostic procedures and services that are related to the inpatient admission and submitted by physician, outpatient hospital, or other providers.

Important: *Related professional and outpatient services that were rendered within the specified time frames must be submitted on the inpatient hospital claim and not on an outpatient hospital claim. An outpatient hospital claim for these services will be denied as part of the payment for the inpatient hospital stay.*

3.7.3.8.1 Exceptions

The following services are excluded from the payment window and may be submitted and reimbursed separately from the inpatient admission:

- Services rendered by federally qualified health center (FQHC) providers
- Services rendered by rural health center (RHC) providers
- Professional services that are rendered in the inpatient hospital setting (place of service 3)
- Non-emergency and emergency ambulance services

The outpatient emergency and maintenance renal dialysis procedure codes in the tables below are also exceptions to the one-day payment window reimbursement guidelines:

3.7.3.8.2 Professional and Outpatient Claims for Services Related to the Inpatient Admission

Professional and outpatient services that are rendered on the date of admission, or within one of the one-day or three-day timeframes indicated above by the hospital or an entity that is wholly owned or operated by the hospital, are considered part of the inpatient stay. Professional and outpatient claims submitted for services that are related to the inpatient admission will be denied or recouped if they are submitted with the specified payment window.

When modifier PD is appended to a professional or outpatient service, the modifier indicates that the service is related to the inpatient admission. The total and technical components for professional and outpatient services that are related to the inpatient admission will be denied when submitted with modifier PD.

***Note:** The professional interpretation component for professional and outpatient services that are related to the inpatient stay may be reimbursed separately even if accompanied by PD modifier.*

3.7.3.8.3 Professional and Outpatient Claims for Services Unrelated to the Inpatient Admission

Professional and outpatient services that are rendered within the specified timeframe by the hospital or an entity that is wholly owned or operated by the hospital may be reimbursed if they are identified as unrelated to the inpatient admission as follows:

- Professional and outpatient claims for diagnostic services that are unrelated to the inpatient admission must be submitted with modifier U4, which indicates the service is unrelated to the inpatient admission.
- Professional claims for non-diagnostic services that are unrelated to the inpatient admission will be identified by comparing the referenced diagnosis code that is on the professional claim to the principal inpatient diagnosis. Professional services must be submitted with modifier U4 if the services are unrelated and the referenced professional diagnosis is a three-digit match to the principal inpatient diagnosis.
- Outpatient claims for non-diagnostic services that are unrelated to the inpatient admission will be identified by comparing the referenced diagnosis code that is on the outpatient claim to the principal inpatient diagnosis. The outpatient services must be submitted with condition code 51 if the services are unrelated and the referenced outpatient diagnosis is a three-digit match to the principal inpatient diagnosis.

Unrelated services that are denied as part of the inpatient admission can be appealed with modifier U4 or condition code 51, which indicates that the service is unrelated to the inpatient admission.

Note: *Claims that are submitted with modifier U4 or condition code 51 will be subject to retrospective review and may be recouped if there is not sufficient documentation to indicate the service was unrelated to the inpatient admission.*

These benefit changes do not impact services rendered by providers that are not wholly owned or operated by the hospital.

3.7.3.9 Potentially Preventable Readmissions (PPR)

H.B. 1218, 81st Legislature, Regular Session 2009, requires that HHSC identify potentially preventable readmissions (PPRs) in the Medicaid population and report results confidentially to each hospital. The law also requires each hospital to distribute the information to its care providers.

Refer to: TMHP Hospital Initiatives web page at www.tmhp.com/Pages/Medicaid/Hospital_PPR.aspx for the new state fiscal year confidential Hospital Specific PPR Report, which includes frequently asked questions (FAQs) that help providers interpret their confidential reports.

3.7.4 Provider Cost and Reporting

The method of determining reasonable cost is similar to that used by Title XVIII (Medicare). Hospitals must include inpatient and outpatient costs in the cost reports submitted annually. The provider must prepare one copy of the applicable CMS Cost Report Form along with the required PCCM supplemental worksheets. The PCCM supplemental worksheets include the Inpatient PCCM D-4 worksheet, available from CMS, and the Outpatient PCCM D, Part V worksheet. A sample of the Outpatient PCCM D, Part V is available on the TMHP website at www.tmhp.com.

Refer to: Subsection 2.2.2, “Cost Reimbursement,” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*).

If a change of ownership or provider termination occurs, the cost report is due within five months after the date of the change in ownership or termination. Any request for an extension of time to file must be made on or before the cost report due date and sent to TMHP Medicaid Audit at the address indicated under “Written Communication With TMHP” in the “Appendix A: State, Federal, and TMHP Contact Information” (*Vol. 1, General Information*). For questions or assistance, call TMHP Medicaid Audit at 1-512-514-3648.

Annual cost reports must be filed as follows:

- Submit one copy of the cost report to TMHP Medicaid Audit within five months of the end of the hospital’s fiscal year along with any amount due to Texas Medicaid.
- TMHP Medicaid Audit performs a desk review of the cost report and makes a tentative settlement with the hospital. A tentative settlement letter requests payment for any balance due to Texas Medicaid or instructs TMHP to pay the amount due to the provider. Interim payment rates are changed at this time based on the cost report.
- Field audits are conducted when necessary.
- Medicaid final settlement is made after a copy of all the following information is received from the provider or the Medicare intermediary. The provider must send TMHP a copy of one of the following:
 - Audited or settled without audit Medicare Cost Report
 - Medicare Notice of Amount of Program Reimbursement
 - Medicare Audit Adjustment Report, if applicable

Medicaid hospitals may request copies of their claim summaries for their cost reporting fiscal year. The summaries for tentative settlements include three additional months of claim payments for the fiscal year. The summaries for final settlements include ten months of claim payments for the fiscal year. TMHP Medicaid Audit uses this data to determine the tentative and final settlements and interim rates.

The Medicaid claim summary data are only generated once each month, and the logs are received by the 15th of the following month. Requests for tentative settlement logs are submitted within 30 days after the fiscal year-end. Final settlement log requests are submitted within nine months after the fiscal year-end.

The Medicaid logs can be requested through the provider's administrator account on the TMHP website at www.tmhp.com. Medicaid logs can also be requested by calling 1-512-506-6117 or by sending a written request to the following address:

Texas Medicaid & Healthcare Partnership
Medicaid Audit
PO Box 200345
Austin, TX 78720-0345

Allow 45 days for receipt of these logs.

3.7.5 Third Party Liability

Hospitals and providers enrolled in Texas Medicaid are required to inform TMHP about circumstances that may result in third party liability for health-care claims. After receiving this information, TMHP pursues reimbursement from responsible third parties.

Hospitals and providers must mail or fax the Other Insurance Form for Health Insurance or the Tort Response Form for accidents to the following address:

Texas Medicaid & Healthcare Partnership
TPL Correspondence
Third Party Liability Unit PO Box 202948
Austin, TX 78720-2948
Fax: 1-512-514-4225

Refer to: Subsection 4.12, "Third Party Liability (TPL)," in Section 4, "Client Eligibility" (*Vol. 1, General Information*).

[Other Insurance Form](#) on the TMHP website at www.tmhp.com.

[Tort Response Form](#) on the TMHP website at www.tmhp.com.

4 Outpatient Hospital (Medical and Surgical Acute Care Outpatient Facility)

This section contains benefit, limitation, authorization, and claims filing information for outpatient hospital facility emergency, observation, and other services.

Refer to: Section 6: Claims Filing and Section 7: Appeals (*Vol. 1, General Information*) for more comprehensive information about claims filing and appeals.

Hospital providers are encouraged to review the other handbooks for applicable information, prior authorization requirements, and for specific requirements for special programs.

4.1 General Information

Outpatient diagnostic, therapeutic, and surgical services that are rendered in an acute care hospital setting are services that are provided to clients by or under the direction of a physician.

Outpatient hospital services include those services that are rendered:

- In the emergency room (ER)
- As day surgery
- In the observation room
- By ancillary departments such as the laboratory, radiology, physical or occupational therapy, cardiac rehabilitation, hyperbaric chamber, infusion services, and other areas able to provide services in the outpatient setting.

4.1.1 Drugs and Supplies

4.1.1.1 Self-Administered Drugs

Self-administered drugs are defined as drugs that the client administers themselves at home and may include, but are not limited to, prescription drugs, vitamins, and supplements.

These drugs that are provided by the hospital during an outpatient hospital visit are included in the hospital reimbursement and are not reimbursed separately. The client cannot be billed for self-administered drugs that are provided by the hospital during an outpatient hospital stay.

4.1.1.2 Take-Home Drugs and Supplies

Benefits do not include drugs and biologicals provided by the hospital and taken home by the client. Supplies provided by a hospital for use in physicians' offices are not reimbursable.

Take-home drugs and supplies are a benefit for services rendered to clients in the outpatient setting when supplied by prescription through the VDP.

4.1.2 Outpatient Services Provided Without Charge

Texas Medicaid pays the clinic registration fee in lieu of other benefits when a hospital provides outpatient services without charge, and if the registration fee is less than the allowed Medicaid payment.

Refer to: TAC Rule §354.1073 for information about authorized outpatient hospital services.

Subsection 1.11, "Texas Medicaid Limitations and Exclusions," in Section 1, "Provider Enrollment and Responsibilities" (*Vol. 1, General Information*) for more information about noncovered items or services.

4.1.3 Payment Window Reimbursement Guidelines for Services Preceding an Inpatient Admission

According to the three-day and one-day payment window reimbursement guidelines, most professional and outpatient diagnostic and nondiagnostic services that are rendered within the designated timeframe of an inpatient hospital stay and are related to the inpatient hospital admission will not be reimbursed separately from the inpatient hospital stay if the services are rendered by the hospital or an entity that is wholly owned or operated by the hospital.

Refer to: Subsection 3.7.3.8, "Payment Window Reimbursement Guidelines," in this handbook for additional information about the payment window reimbursement guidelines.

4.2 Services, Benefits, Limitations, and Prior Authorization

4.2.1 Prior Authorization Requirements

The hospital is responsible for requesting prior authorization for the non-emergency transport to the client's home or to a nursing home after a non-scheduled outpatient visit.

Refer to: [Non-emergency Ambulance Prior Authorization Request](http://www.tmhp.com) on the TMHP website at www.tmhp.com.

4.2.2 Emergency Department Services

An emergency department is defined as an organized hospital-based facility for the provision of unscheduled episodic services to clients who present for immediate medical attention. The facility must be available 24 hours a day, 7 days a week.

Hospital-based emergency departments are reimbursed for services based on a reasonable cost, based on the hospital's most recent tentative Medicaid cost report settlement. The reasonable cost is reduced by a percentage determined by the state.

All claims that are submitted by outpatient hospital providers must include a procedure code with each revenue code for services that are rendered to Texas Medicaid clients. This procedure code must be listed on the same claim detail line as the emergency department revenue code.

The procedure code billed may include, but is not limited to, E/M, surgical or other procedure, or any other service rendered to the client in the emergency room. The procedure code must accurately reflect the services rendered in the hospital's emergency department.

Emergency department reimbursement may include room changes and ancillary changes. Emergency department room charges may be submitted using the following revenue codes:

Revenue Code	Description
450	Emergency room
451	Emergency room-EMTALA emergency medical screening
456	Emergency room, urgent care
459	Emergency room, other

Emergency department ancillary services include, but are not limited to, the following:

- Laboratory services
- Radiology services
- Respiratory therapy services
- Diagnostic studies (including, but not limited to, ECGs, computed tomography (CT) scans, and supplies)

The administration of an injection may be reimbursed to the provider who administers the injection. The administration of the injection will not be reimbursed to outpatient hospital providers. An injection or infusion administered by a nurse is included in the emergency room charge and is not reimbursed separately to the outpatient facility.

Ancillary services must be submitted on the UB-04 CMS-1450 paper claim form using the appropriate procedure codes or revenue codes for rendered services.

If a client visits the emergency room more than once in one day, the times must be given for each visit.

If the client ultimately is admitted as an inpatient within 48 hours of treatment in the ER or clinic, the ER or clinic charges must be submitted on the inpatient hospital claim form as an ancillary charge. The date of inpatient admission is the date the client initially was seen in the ER or clinic.

According to the Emergency Medical Treatment and Active Labor Act (EMTALA) of 1986, if any individual presents at the hospital's emergency department requesting an examination or treatment, the hospital must provide an appropriate medical screening examination and stabilization services within the capability of the hospital's emergency department, including ancillary services routinely available to the emergency department, to determine whether an emergency medical condition exists.

EMTALA medical screening code (451) may be considered for reimbursement when submitted as a stand-alone service and provided by a qualified medical professional as designated by the facility. Ancillary, professional, or facility services will not be considered for separate reimbursement. Services beyond screening (451) can be submitted with the appropriate corresponding emergency services code (450).

Medicaid claims administrators are prohibited from requiring prior authorization or primary care provider notification for emergency services including those needed to evaluate or stabilize an emergency medical condition or emergency behavioral health condition.

Texas Medicaid provides that certain undocumented aliens and legalized aliens who require treatment of an emergency medical condition or emergency behavioral health condition are eligible to receive that treatment. After the emergency condition requiring care is stabilized and is no longer an emergency, the coverage ends. If the alien continues to receive ongoing treatment after the emergency ceases, the ongoing treatment is not a benefit.

Texas Medicaid provides for medical services for eligible clients while out-of-state. The attending physician or other provider must document that the client was treated for an emergency condition. Out-of-state emergency services are also a benefit when the client's health would be in danger if he or she were required to travel back to Texas.

Emergency department services are subject to retrospective review.

In instances of sudden illness or injury, the client may receive treatment in the ER and be discharged, placed on observation status, or admitted as an inpatient.

4.2.2.1 * Emergency Department Payment Reductions

Nonemergent and nonurgent evaluation and management (E/M) services rendered in the emergency room may be reimbursed at 125 percent of the adult, physician office visit fee for procedure code 99202. Reimbursement is based on the E/M procedure code submitted on the same line item as the emergency room revenue code.

Imaging services rendered by outpatient hospital providers are reimbursed at the flat fee that is based on the procedure code submitted on the same line item as the imaging revenue code.

***Note:** Evaluation and management services that are rendered in the emergency room for critically ill or critically injured Texas Medicaid clients of any age, are not subject to reduction in payment.*

***Exception:** Rural hospitals, nonemergent and nonurgent E/M services rendered in the emergency room may be reimbursed at 65 percent of the allowed rate.*

4.2.3 Day Surgery

Inpatients may occasionally require a surgery that has been designated as an outpatient procedure. The physician must document the need for this surgery as an inpatient procedure before the procedure is performed. These claims are subject to retrospective review.

These procedures are for clients who are scheduled for a day surgery procedure and are not inpatient at the time the day surgery is performed.

4.2.3.1 Inpatient Admissions for Day Surgeries

If a client is admitted for a day surgery procedure—whether scheduled or emergency—one of the following classifications may be considered an inpatient procedure.

- ASA Classification of Physical Status of III (P3), IV (P4), or V (P5)
- Classification of Heart Disease IV

The day surgery services must be submitted on an inpatient claim (TOB 111) using the hospital's provider identifier. The reason for the surgery (principal diagnosis), any additional substantiated conditions, and the procedure must be included on one inpatient claim.

Refer to: The Texas Medicaid Hospital Screening Criteria at www.hhs.state.tx.us/OIG/screen/SC_TOC.shtml#asa, for a description of the ASA classes of physical status.

The descriptions for ASA classes of physical status are as follows:

- *Class I.* A normal healthy patient, without organic, physiological, or psychiatric disturbance.
Example: *Healthy patient with good exercise tolerance.*
- *Class II.* A patient with mild systemic disease, controlled medical conditions without significant systemic effects.
Example: *Controlled hypertension or diabetes mellitus without system effects, cigarette smoking without evidence of chronic obstructive pulmonary disease (COPD), anemia, mild obesity, age less than 1 or greater than 70 years, or pregnancy.*
- *Class III.* A patient exhibiting *severe* systemic disturbance that may or may not be associated with the surgical complaint and that seriously interferes with the patient's activities.
Example: *Severely limiting organic heart disease, severe diabetes with vascular complications; moderate to severe degrees of pulmonary insufficiency; angina pectoris or healed myocardial infarction.*
- *Class IV.* A patient exhibiting *extreme* systemic disturbance that may or may not be associated with the surgical complaint, that interferes with the patient's regular activities, and that has already become life-threatening.
Example: *Organic heart disease with marked signs of cardiac insufficiency present (for example, cardiac decompensation); persistent anginal syndrome, or active myocarditis; advanced degrees of pulmonary, hepatic, renal, or endocrine insufficiency present.*
- *Class V.* The rare person who is *moribund* (in a dying state) before operation, whose pre-operative condition is such that he or she is expected to die within 24 hours even if not subjected to the additional strain of operation.
Example: *Burst abdominal aneurysm with profound shock; major cerebral trauma with rapidly increasing intracranial pressure; massive embolus.*

The Classification of Heart Disease consists of four classes:

- *Class I.* No limitation of physical activity. Ordinary physical activity does not cause undue fatigue, palpitation, dyspnea, or anginal pain.
- *Class II.* Slight limitation of physical activity. Comfortable at rest, but ordinary physical activity results in fatigue, palpitation, dyspnea, or anginal pain.
- *Class III.* Marked limitation of physical activity. Comfortable at rest, but less than ordinary activity causes fatigue, palpitation, dyspnea, or anginal pain.
- *Class IV.* Unable to carry on any physical activity without discomfort. Symptoms of cardiac insufficiency, or of the anginal syndrome, may be present even at rest. If any physical activity is undertaken, discomfort occurs.

4.2.3.2 Complications Following Elective or Scheduled Day Surgeries

If a condition of the scheduled day surgery requires additional care beyond the recovery period, the client may be placed in outpatient observation (stay less than 48 hours). The observation period must be submitted on an outpatient claim (TOB 131) using the hospital's provider identifier. If the client requires

inpatient admission following the observation stay, the admission date for the inpatient claim is the date the client was placed in observation. All charges for services provided from the time of observation placement (excluding the surgical procedure) must be included on the inpatient claim (TOB 111) using the hospital's provider identifier. The principal diagnosis to be used on the inpatient claim is the complication of the surgery that necessitated the extended stay. The day surgery procedure must still be submitted as an outpatient procedure under the HASC provider identifier.

4.2.3.3 Inpatient Admissions After Day Surgery

If a complication occurs for which the client requires inpatient admission immediately following the day surgery (no observation period), the day surgery must be submitted as an outpatient procedure (TOB 131), using the appropriate hospital or HASC provider identifier. The inpatient admission is to be submitted as an inpatient claim (TOB 111), using the hospital's provider identifier. The principal diagnosis to be used on the inpatient claim is the complication of the surgery that necessitated the extended stay. The day surgery procedure must not be included on the inpatient claim. The inpatient admission *must* be medically necessary and is subject to retrospective review.

4.2.3.4 Emergency or Unscheduled Day Surgeries

These procedures are for clients who require an unscheduled (emergency) day surgery procedure and are not inpatient at the time the day surgery is performed.

If a client is first treated in the ER and then requires emergency surgery as an outpatient, claims for emergency, unscheduled outpatient surgical procedures must be filed itemizing each service, such as room charge, laboratory, radiology, anesthesia, and supplies. Providers must submit claims for unscheduled day surgery procedures and emergency services as outpatient procedures using the hospital provider identifier. If a condition of the unscheduled day surgery requires additional care beyond the recovery period, the client may be placed on outpatient observation status. The observation period must be submitted on the same outpatient claim.

Providers *must* submit claims for the unscheduled day surgery procedures and emergency services as outpatient procedures (TOB 131) using the hospital's provider identifier. If a condition of the unscheduled day surgery requires additional care beyond the recovery period, the client may be placed on outpatient observation status (stay less than 48 hours). The observation period must be submitted on the same outpatient claim (TOB 131) using the hospital's provider identifier.

4.2.3.5 Complications Following Emergency or Unscheduled Day Surgery

If the client requires inpatient admission following the observation stay, the admission date for the inpatient claim is the date the client was placed in observation. All charges for services provided from the time of observation status (excluding surgical procedures and emergency services) must be included on the inpatient claim (TOB 111) using the hospital's provider identifier. The principal diagnosis to be used on the inpatient claim is the complication of the surgery that necessitated the extended stay. The day surgery and emergency services must not be included on the inpatient claim since they are to be submitted using TOB 131 as outpatient procedures under the hospital's provider identifier.

4.2.3.6 Incomplete Day Surgeries

When HASC providers submit claims to Texas Medicaid for an incomplete surgical procedure, one of the following *must* be included on the claim:

- Modifier 74 for a discontinued outpatient procedure after anesthesia administration or 73 for a discontinued outpatient procedure prior to anesthesia administration.
- At least one of the following diagnosis codes:

Diagnosis Code	Description
V641	Surgical or other procedure not carried out because of contraindication
V642	Surgical or other procedure not carried out because of patient's decision

Diagnosis Code	Description
V643	Procedure not carried out for other reasons

Claims that are submitted with diagnosis codes V641, V642, V643, or modifier 73 or 74 suspend for review of the medical documentation submitted with the claim. Providers must submit the operative report, the anesthesia report, and state why the operation was not completed.

Reimbursement to HASC facilities for canceled or incomplete surgeries because of patient complications, is made according to the following criteria, depending on the extent to which the anesthesia or surgery proceeded:

- Reimburse at 0 percent of HASC group payment schedule for a procedure that is terminated for nonmedical or medical reasons before the facility has expended substantial resources.
- Reimburse at 33 percent of HASC group payment schedule up to the administration of anesthesia.
- Reimburse at 67 percent of HASC group payment schedule after the administration of anesthesia but before incision.
- Reimburse at 100 percent of HASC group payment schedule after incision.

Surgeries canceled because of incomplete pre-operative procedures are not reimbursed.

4.2.4 Outpatient Observation Room Services

Observation care is defined by the CMS as “a well-defined set of specific, clinically appropriate services, which include ongoing short term treatment, assessment, and reassessment, that are furnished while a decision is being made regarding whether clients will require further treatment as hospital inpatients or if they are able to be discharged from the hospital.”

Outpatient observation services are usually ordered for clients who present to the emergency department and who then require a significant period of treatment or monitoring in order to make a decision about their admission or discharge. The decision whether to discharge a client from the hospital following resolution of the reason for the observation care or to admit the client as an inpatient can be made in less than 48 hours, usually in less than 24 hours.

Outpatient observation services require the use of a hospital bed and periodic monitoring by the hospital’s nursing or other ancillary staff to evaluate the client’s condition and to determine the need for an inpatient admission. Outpatient observation services can be provided anywhere in the hospital. The level of care, not the physical location of the bed, dictates the observation status.

Outpatient observation services (revenue codes 760, 761, 762, and 769) are a benefit only when medically necessary and when provided under a practitioner’s order or under the order of another person who is authorized by state licensure law and hospital bylaws to admit clients to the hospital and to order outpatient services.

Outpatient observation services are considered medically necessary if the following conditions are met (this list is not all-inclusive):

- The client is clinically unstable for discharge and one of the following additional conditions apply:
 - Laboratory, radiology, or other testing is necessary to assess the client’s need for an inpatient admission.
 - The treatment plan is not established or, based on the client’s condition, is anticipated to be completed within a period not to exceed 48 hours.
 - The client had a significant adverse response to therapeutic services, invasive diagnostic testing, or outpatient surgery and requires short-term monitoring or evaluation.
- The medical necessity for inpatient treatment is unclear, that is:

- The client's medical condition requires careful monitoring and evaluation, or treatment to confirm or refute a diagnosis in order to determine whether an inpatient admission is necessary
- There is a delayed or slow progression of the client's signs and symptoms that makes diagnosis difficult and the monitoring or treatment does not meet the criteria for an inpatient level of care.
- The client is undergoing treatment for a diagnosed condition, and continued monitoring of clinical response to therapy may prevent an inpatient admission.
- The admitting practitioner anticipates that the client will require observation care for a minimum of eight hours.

Medically necessary services that do not meet the definition of observation care should be submitted separately or included as part of the emergency department or clinic visit, and are not reimbursed as observation care.

Outpatient observation services are not a substitute for a medically appropriate inpatient admission. If a client meets the medical necessity criteria for an inpatient admission and an inpatient admission is ordered by the practitioner, an inpatient admission is a benefit regardless of the length of stay. Claims for observation services may be denied in their entirety if the services should have initially been inpatient admissions or if a reason for an inpatient admission developed, but the observation stay was not converted to inpatient.

The determination of an inpatient or outpatient status for any given client is specifically reserved to the admitting practitioner. The decision must be based on the practitioner's expectation of the care that the client will require.

4.2.4.1 Direct Outpatient Observation Admission

A client may be directly admitted to outpatient observation from the evaluating practitioner's office without being seen in the emergency room by a hospital-based practitioner. The practitioner's order should clearly specify that the practitioner wants the client to be admitted to outpatient observation status. An order for "direct admission" will be considered an inpatient admission unless otherwise specified by the practitioner's orders.

Brief observation periods following an office visit or at the direction of an off-site practitioner that involve a simple procedure (e.g., a breathing treatment) would be more appropriately coded as a treatment room visit.

4.2.4.2 Observation Following Emergency Room

A client may be admitted to outpatient observation through the emergency room if the client presents to the facility with an unstable medical condition and the evaluating practitioner determines that outpatient observation is medically necessary to determine a definitive treatment plan. An unstable medical condition is defined as one of the following:

- A variance in laboratory values from what is considered the generally accepted, safe values for the individual client.
- Clinical signs and symptoms that are above or below those of normal range and that require extended monitoring and further evaluation.
- Changes in the client's medical condition are anticipated, and further evaluation is necessary.

If a client is admitted to observation status from the emergency room, the hospital is reimbursed only for the observation room charges. The emergency room charges are not reimbursed separately, but must be submitted on a separate detail on the same claim as the observation room charges.

Brief observation periods following an emergency room evaluation will not be reimbursed if the service would normally have been provided within the time frames and facilities of an emergency room visit.

4.2.4.3 Observation Following Outpatient Day Surgery

If a medical condition or complication of a scheduled day surgery requires additional care beyond the routine recovery period, the client may be placed in outpatient observation. The observation period should be submitted as an outpatient claim.

Reimbursement for outpatient observation after a scheduled day surgery is limited to situations in which the client exhibits an unusual reaction to the surgical procedure and requires monitoring or treatment beyond what is normally provided in the immediate post-operative period. Examples include, but are not limited to:

- Difficulty in awakening from anesthesia.
- A drug reaction.
- Other post-surgical complications.

4.2.4.4 Observation Following Outpatient Diagnostic Testing or Therapeutic Services

A client may be admitted to outpatient observation if the client develops a significant adverse reaction to a scheduled outpatient diagnostic test or to a therapeutic service, such as chemotherapy, that requires further monitoring. Observation services begin when the reaction occurred and end when the practitioner determines that the client is stable for discharge, or that an inpatient admission is appropriate.

4.2.4.5 Documentation Requirements for Outpatient Observation

Documentation that supports the medical necessity of the outpatient observation services must be maintained by the facility in the client's medical record. Documentation must include:

- The order of the ordering practitioner for admission to observation care, which must be dated and timed.
- The practitioner's admission and progress notes, which must be dated and timed, confirm the need for observation care, and outline the client's condition, treatment, and response to treatment.
- Nurse's notes, which must be dated and timed, reflect the time at which the client was admitted to the observation bed, and the reason for the observation stay.
- All supporting diagnostic and ancillary testing reports, including orders for the testing or any preadmission testing.
- Procedure notes and operative notes that address any complication that would support admission to observation status and must be dated and timed.
- Anesthesia and recovery room/post anesthesia care unit notes from the practitioner and the nurse, which must be dated and timed and detail orders and any complications that require admission to observation status.
- Documentation related to an outpatient clinic visit or critical care service that was provided on the same date of service as the observation service. The documentation must address any need for observation services and be dated and timed.
- All of the client education that was provided during the observation stay.
- The order for discharge from observation care, which must be signed, dated, and timed.
- The discharge notes, including nurse's notes that reflect the date and time at which the client was discharged from observation.

The client must be in the care of a practitioner during the period of observation, as documented in the medical record by admission, discharge, and other appropriate progress notes that are dated, timed, written, and signed by the practitioner.

Claims submitted for outpatient procedures in which the original intention was to keep the client for an extended period of time, such as overnight or for a 48-hour period, will be denied unless significant medical necessity is documented.

Retrospective review may be performed to ensure that the documentation supports the medical necessity of the outpatient observation services. Medical records will be evaluated to determine whether the practitioner's order (practitioner intent) and the services that were actually provided were consistent.

The medical records must clearly support the medical necessity of the outpatient observation services and must include a timed order for observation services that will support the number of hours that the client was under observation care and the hours that were submitted for payment.

4.2.4.6 Reporting Hours of Observation

Providers must submit the number of observation hours the client was under observation care.

Observation time begins at the clock time documented in the client's medical record. This time should coincide with the time that the client is placed in a bed for the purpose of initiating observation care in accordance with the practitioner's order.

Observation time ends when all medically necessary services related to observation care are completed. The end time of observation services may coincide with the time the client is actually discharged from the hospital or is admitted as an inpatient.

Hospitals should round clock times for the beginning and end of observation to the nearest hour and submit the total number of hours for the observation stay on the claim. For the purposes of submitting claims for observation services, one unit equals one hour. Partial units or hours should be rounded up or down to the nearest hour. Claims submitted with observation room units exceeding 48 hours will be denied.

Any service that was ordered within the observation period may be included on the outpatient claim if a practitioner's order for the service was made within the observation period time frame but hospital scheduling limitations prevented the service from being performed before the 48 hours expired. Any services ordered after 48 hours must not be included on the outpatient claim nor billed to the client. If a period of observation spans more than one calendar day (i.e., extends past midnight), all of the hours for the entire period of observation must be included on a single line, and the date of service for that line is the date on which the observation care began.

Observation time may include medically necessary services and follow-up care that is provided after the time the practitioner writes the discharge order, but before the client is discharged. Reported observation time does not include the time the client remains in the observation area after treatment is completed for reasons such as waiting for transportation home.

Observation services must not be submitted concurrently with diagnostic or therapeutic services for which active monitoring is part of the procedure. In situations where a diagnostic or therapeutic procedure interrupts the observation stay, hospitals should record for each period of observation services the beginning and ending times of the observation period and add the lengths of time for the periods of observation services together to reach the total number of units reported on the claim.

Recovery room hours that are associated with an outpatient procedure must not be submitted simultaneously with hours of observation time.

Revenue code 761 will be denied if it is submitted for the same date of service by the same provider as revenue code 760, 762, or 769.

4.2.4.7 Client Status Change

When a client's status changes from outpatient observation to inpatient admission within the allowed 48-hour observation period, both the outpatient observation service and the inpatient admission must be submitted as separate details on the same inpatient claim.

The inpatient claim must include:

- The provider must submit the correct FDOS and Date of Admission (DOA) on the claim header.
- Charges for the observation room on the inpatient claim may be coded using the appropriate revenue code (760, 761, 762, or 769).
- The observation services are considered part of the facility's DRG payment, and are not separately reimbursed.

The practitioner's order for a change in client status from outpatient observation to inpatient admission must be written, dated, and timed before the outpatient observation claim is submitted for reimbursement.

4.2.4.8 Inpatient Admission to Outpatient Observation

When a client is admitted to the hospital as an inpatient and a subsequent internal utilization review (UR) determines that the services did not meet inpatient criteria, the hospital may change the client's status from inpatient to outpatient observation. The order to change from an inpatient to outpatient observation admission is effective for the same date and time as the inpatient order. This practice is acceptable under Texas Medicaid if all of the following conditions are met:

- The change in client status is made before the claim is submitted.
- The hospital has not submitted a claim for the inpatient admission.
- The practitioner responsible for the care of the client concurs with the hospital UR determination to change to outpatient status.
- The practitioner's concurrence with the UR decision is documented in the client's medical record.

Note: *When the hospital has determined that it may submit an outpatient claim according to the conditions described above, the entire episode of care should be billed as an outpatient episode of care.*

Reimbursement for emergency room (ER) and observation services are considered part of the inpatient DRG payment and must be submitted as separate details on the inpatient claim when the client is admitted as an inpatient under one or both of the following circumstances:

- The client has spent fewer than 24 hours after presenting in the ER without being placed in observation status.
- The client has spent fewer than 48 hours in observation status after presenting in the ER.

The date of admission on the inpatient claim must reflect the date the client presents at the hospital.

If the client is admitted as an inpatient more than 24 hours after presenting in the ER without being placed in observation status or more than 48 hours after being placed in observation status, the ER and observation services may be reimbursed separately as outpatient services.

Examples

The following examples indicate the appropriate dates of admission and claim submissions for different scenarios:

Scenario 1

In scenario 1, the ER and outpatient observation services must be submitted on the inpatient hospital claim, because the ER services are within 24 hours of the observation services, and the observation services are within 48 hours of the inpatient admission, and the client was not discharged and sent home before being admitted as an inpatient.

The inpatient admission date reflects the date the patient presented at the ER.

Date and Time	Patient Services
5/1/12 (11:50 p.m.)	Patient presents in the ER
5/2/12 (12:30 a.m.)	40 minutes later, patient is placed in observation status
5/3/12 (12:00 a.m.)	23.5 hours later, after placement is in observation status, patient is admitted as an inpatient

Claims submissions are as follows:

- **ER visit:** Submitted on the inpatient claim as a separate detail (part of the DRG payment)
- **Observation services:** Submitted on the inpatient claim as a separate detail (part of the DRG payment)
- **Date of inpatient admission:** May 1, 2012

Scenario 2

In scenario 2, the ER service was more than 24 hours before the observation period began and must be submitted on an outpatient hospital claim. The observation service must be billed on the inpatient hospital claim because the service was within 48 hours of the inpatient admission, and the client was not discharged and sent home before being admitted as an inpatient.

The inpatient admission date reflects the date the patient was placed in observation status.

Date and Time	Patient Services
5/1/12 (11:50 p.m.)	Patient presents in the ER
5/2/12 (11:55 p.m.)	24 + hours later, patient is placed in observation status
5/3/12 (4:00 a.m.)	4 hours later, patient admitted as an inpatient

Claims submissions are as follows:

- **ER visit:** Submitted on an outpatient claim and reimbursed separately from the observation and inpatient services
- **Observation services:** Submitted on the inpatient claim as a separate detail (part of the DRG payment)
- **Date of inpatient admission:** May 2, 2012

Scenario 3

In scenario 3, the ER service must be submitted on an outpatient claim as part of the observation service because the ER service was within 24 hours of the observation service. The observation service may be reimbursed separately from the inpatient admission because the observation service was more than 48 hours before the inpatient admission, and the client was not discharged and sent home before being admitted as an inpatient.

The inpatient admission date reflects the date the patient was admitted as an inpatient.

Date and Time	Patient Services
5/1/12 (11:50 p.m.)	Patient presents in the ER
5/2/12 (12:30 a.m.)	40 minutes later, patient placed in observation status
5/4/12 (12:45 a.m.)	48 + hours later patient admitted as an inpatient

Claims submissions are as follows:

- **ER visit:** Submitted on an outpatient claim and reimbursed as part of the outpatient observation services
- **Observation services:** Submitted on the outpatient claim and reimbursed separately from the inpatient services
- **Date of inpatient admission:** May 4, 2012

Scenario 4

In scenario 4, the ER service may be reimbursed separately because it was more than 24 hours before the client was placed in observation status. The observation service may be reimbursed separately because it was more than 48 hours before the client was admitted as an inpatient.

The inpatient admission date reflects the date the patient was admitted as an inpatient.

Date and Time	Patient Services
5/1/12 (11:50 p.m.)	Patient presents in the ER
5/2/12 (11:55 p.m.)	24 + hours later, patient is placed in observation status
5/4/12 (12:00 p.m.)	48 + hours later, patient admitted as an inpatient

Claims submissions are as follows:

- **ER visit:** Submitted on an outpatient claim and reimbursed separately from the observation and inpatient services.
- **Observation services:** Submitted on an outpatient claim and reimbursed separately from the inpatient services.
- **Date of inpatient admission:** May 4, 2012

Scenario 5

In scenario 5, the ER service must be submitted on an outpatient claim as part of the observation service because the ER service was within 24 hours of the observation service. The observation service may be reimbursed separately from the inpatient admission because the client was discharged and sent home without being admitted as an inpatient.

The inpatient admission date reflects the date the patient presented at the ER after being discharged and sent home 14 hours earlier.

Date and Time	Patient Services
5/1/12 (11:50 p.m.)	Patient presents in the ER
5/2/12 (12:30 a.m.)	40 minutes later, patient is placed in observation status.
5/2/12 (10:00 a.m.)	9.5 hours later, patient is discharged and sent home
5/3/12 (12:05 a.m.)	14 hours later, patient presents at the ER again and is admitted as an inpatient

Claims submissions are as follows:

- **ER visit:** Submitted on an outpatient claim and reimbursed as part of the observation services
- **Observation services:** Submitted on the outpatient claim and reimbursed separately from the inpatient services
- **Date of inpatient admission:** May 3, 2012

When the hospital has determined that it may submit an outpatient claim according to the conditions described above, the entire episode of care should be submitted as an outpatient episode of care.

4.2.4.9 Observation Services that are not a benefit

Outpatient observation services that are not medically necessary or appropriate are not benefits of Texas Medicaid, including, but not limited to, services provided under the following circumstances:

- As a substitute for an inpatient admission.
- Without a practitioner's order, including services ordered as inpatient services by the ordering practitioner, but submitted as outpatient by the billing office.
- For clients awaiting transfer to another facility, such as for nursing home placement.
- For clients with lack of or delay in transportation.
- As a convenience to the client, client's family, the practitioner, hospital, or hospital staff.
- For routine preparation before, or recovery after, outpatient diagnostic or surgical services.
- When an overnight stay is planned before diagnostic testing.
- To medically stable clients who need diagnostic testing or outpatient procedures that are routinely provided in an outpatient setting.
- Following an uncomplicated treatment or procedure.
- As standing orders for observation following outpatient surgery.
- For postoperative monitoring during a standard recovery period of four to six hours, which is considered part of the recovery room service.
- For outpatient blood or chemotherapy administration and concurrent services.
- For services that would normally require an inpatient admission.
- Beyond 48 hours from the time of the observation admission.
- For a medical examination for clients who do not require skilled support.

4.2.5 Hospital-Based Rural Health Clinic Services

Hospital-based RHCs must use the encounter code T1015. A hospital-based RHC is paid based on an all-inclusive encounter rate. One of the following modifiers must be submitted for general medical services: AH, AJ, AM, SA, TD, TE, or U7.

The services listed below must be submitted using the RHC provider identifier and the appropriate benefit code:

- THSteps medical checkups
- Family planning services (including implantable contraceptive capsules provision, insertion, or removal)
- Immunizations provided in hospital-based RHCs

These services must be submitted with an AM, SA, or U7 modifier if performed in an RHC setting. Claims are paid under the Prospective Payment System (PPS) reimbursement methodology.

When submitting a claim on the CMS-1500 paper claim form, providers must use the appropriate national POS (72) for an RHC setting.

Outpatient hospital services (including emergency room services) and inpatient hospital services provided outside the RHC setting are to be submitted using the individual or group physician provider identifier.

Hospital-based RHCs must submit claims for pneumococcal and influenza vaccines as non- RHC services, under their hospital provider identifier.

Note: *A visit is a face-to-face encounter between an RHC client and a physician, PA, nurse practitioner (NP), certified nurse-midwife (CNM), visiting nurse, or clinical NP. Encounters with more than one health professional and multiple encounters with the same health professional that take place on the same day and at a single location constitute a single visit, except where one or the other of the following conditions exists:*

- After the first encounter, the client suffers illness or injury requiring additional diagnosis or treatment.
- The RHC client has a medical visit and an other health visit.

An *other* health visit includes, but is not limited to, a face-to-face encounter between an RHC client and a clinical social worker.

4.2.6 Cardiac Rehabilitation

Cardiac rehabilitation is a physician-supervised program that furnishes physician-prescribed exercise, cardiac risk factor modification, psychosocial assessment, and outcomes assessment.

Outpatient cardiac rehabilitation is considered reasonable and necessary for clients who have had one of the following within 12 months of beginning the cardiac rehabilitation program:

- Acute myocardial infarction
- Coronary artery bypass surgery (CABG)
- Percutaneous transluminal coronary angioplasty or coronary stenting
- Heart valve repair or replacement
- Major pulmonary surgery
- Sustained ventricular tachycardia or fibrillation
- Class III or class IV congestive heart failure
- Chronic stable angina

Note: *A cardiac rehabilitation program in which the cardiac monitoring is done using telephonically transmitted electrocardiograms to a remote site is not covered by Texas Medicaid.*

Cardiac rehabilitation must be provided in a facility that has the necessary cardiopulmonary, emergency, diagnostic, and therapeutic life-saving equipment (i.e. oxygen, cardiopulmonary resuscitation equipment, or defibrillator) available for immediate use. If no clinically significant arrhythmia is documented during the first three weeks of the program, the provider may have the client complete the remaining portion without telemetry monitoring by the physician's order.

Although cardiac rehabilitation may be considered a form of physical therapy, it is a specialized program conducted by non-physician personnel who are trained in both basic and advanced cardiac life support techniques and exercise therapy for coronary disease, and provide the services under the direct supervision of a physician.

Direct supervision of a physician means that a physician must be immediately available and accessible for medical consultations and emergencies at all times when items and services are being furnished under cardiac rehabilitation programs. Outpatient cardiac rehabilitation begins after the client has been discharged from the hospital. A physician's prescription is required after the acute convalescent period and after it has been determined that the client's clinical status and capacity will allow for safe participation in an individualized progressive exercise program. Outpatient cardiac rehabilitation requires close monitoring and direct supervision by a physician and includes:

- Medical evaluation performed by the physician responsible for prescribing the client's rehabilitation program and includes a clinical examination, a medical history, and an initial plan or goal.
- An education and counseling program to modify risk factors (nutritional counseling, stress reduction, smoking cessation, weight loss, etc.).
- Prescribed exercise concurrent with and without electrocardiogram (ECG) monitoring.
- Services performed in an approved facility by trained professionals.

Note: *Direct supervision is met when the services are performed on hospital premises or within 250 yards of the hospital.*

Cardiac rehabilitation will be limited to a maximum of 2 one-hour sessions per day and 36 sessions over 18 weeks per rolling year.

Providers must obtain prior authorization for additional cardiac rehabilitation sessions, which will be limited to a maximum of 36 sessions in an extended period of time in a 52-week period from the date of authorization of additional sessions.

To confirm that a continuation of cardiac rehabilitation is at the request of, and coordinated with the attending physician, the medical record must include evidence of communication between the cardiac rehabilitation staff and either the medical director or the referring physician. If the physician responsible for such follow-up is the medical director, then his or her notes must be evident in each client's medical record.

Cardiac rehabilitation may be considered medically necessary beyond 36 sessions if the medical record contains documentation that the client has had another cardiac event, or if the prescribing physician documents that a continuation of cardiac rehabilitation is medically necessary. Medical necessity documentation must include the following:

- Progress made from the beginning of the cardiac rehabilitation period to the current service request date, including progress towards previous goals
- Information that supports the client's capability of continued measurable progress
- A proposed treatment plan for the requested extension dates with specific goals related to the client's individual needs

Prior authorization must be obtained through the TMHP Special Medical Prior Authorization (SMPA) Department. Providers must send prior authorization requests, along with documentation to support medical necessity, to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway
Austin, TX 78727
Fax: 1-512-514-4213

Requests for prior authorization can also be submitted online through the TMHP website at www.tmhp.com.

The evaluation provided by the cardiac rehabilitation team at the beginning of each cardiac rehabilitation session is not considered a separate service and will be included in the reimbursement for the cardiac rehabilitation session. Evaluation and management (E/M) services unrelated to cardiac rehabilitation may be submitted with modifier 25 appended to the E/M code when supporting documentation in the medical record demonstrates a separately identifiable E/M service was provided on the same day by the same provider who renders the cardiac rehabilitation.

Physical and occupational therapy will not be reimbursed separately when furnished in addition to cardiac rehabilitation exercise program services unless there is also a diagnosis of a non-cardiac condition requiring such therapy.

Example: *If a client is recuperating from an acute phase of heart disease and has had a stroke that requires physical or occupational therapy, the physical or occupational therapy for the stroke may be reimbursed separately from the cardiac rehabilitation services for the acute phase of heart disease.*

When provided as part of the cardiac rehabilitation program, client education services, such as formal lectures and counseling on diet, nutrition, and sexual activity to assist the client in adjusting living habits because of the cardiac condition, will not be separately reimbursed.

Hospitals may be reimbursed for revenue code 943 when submitted with procedure code S9472 and one of the following diagnosis codes:

Diagnosis Codes									
40201	41000	41001	41002	41010	41011	41012	41020	41021	41022
41030	41031	41032	41040	41041	41042	41050	41051	41052	41060
41061	41062	41070	41071	41072	41080	41081	41082	41090	41091
41092	4139	4148	4149	4271	42741	4280	4281	42820	42821
42822	42823	42830	42831	42832	42833	42840	42841	42842	42843
4289	V151	V421	V422	V433	V4581	V4582			

Note: *Revenue code 943 is the code that will be reimbursed. Procedure code S9472 is required on the claim but is informational only.*

4.2.7 Chemotherapy Administration

Hospitals must submit outpatient charges using the appropriate revenue codes for room charges, supplies, IV equipment, and pharmacy.

Revenue code 636 may be reimbursed for the technical component of prolonged infusion of chemotherapeutic agents. The most appropriate chemotherapy procedure code must be billed with revenue code 636.

Refer to: Subsection 9.2.20, “Chemotherapy,” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

4.2.8 Colorectal Cancer Screening

Procedure code G0122 may be reimbursed once every 5 years for services rendered to clients who are 50 years of age and older.

Procedure code G0106 may be reimbursed once every 5 years and is limited to one of the following diagnosis codes:

Diagnosis Codes					
V1090	V1272	V7650	V7651	V7652	V700

Procedure code G0120 may be reimbursed when billed with one of the following diagnosis codes:

Diagnosis Codes									
5550	5551	5552	5559	5560	5561	5562	5563	5568	5569
55841	55842	5589	V1005	V1006	V1090	V1272	V160	V1851	

Procedure code G0328 may be reimbursed once a year for services rendered to clients who are 50 years of age and older.

Procedure code G0122 may be reimbursed once every 5 years for services rendered to clients who are 50 years of age and older.

Refer to: Subsection 9.2.15.2, “Colorectal Cancer Screening,” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

4.2.9 Computed Tomography and Magnetic Resonance Imaging

Prior authorization is required for all outpatient nonemergent (i.e., those that are scheduled) CT, computed tomography angiography (CTA), magnetic resonance imaging (MRI), and magnetic resonance angiography (MRA) studies before services are rendered. Authorization is not required for the emergency department or inpatient hospital radiology services. Retroactive authorization may be required for some outpatient emergent studies.

Reimbursement for procedures with descriptions that specify “with contrast” include payment for contrast materials. Some diagnostic radiopharmaceuticals are benefits of Texas Medicaid. Outpatient hospitals may submit the total component of the following procedure codes:

Procedure Codes							
77371	77372	77373	77422	77423	77520	77525	G0339

Procedure code 77399 may be submitted as either the total component or the technical component.

Providers can refer to the [OFL](#) or the applicable fee schedules on the TMHP website at www.tmhp.com to review the diagnostic radiopharmaceuticals that are reimbursed by Texas Medicaid. OFL and static fee schedules available on the TMHP website display fees after applicable rate reductions have been applied. Previously, the OFL and static fee schedules did not reflect all rate reductions, and providers were required to calculate the 1- and 2-percent reductions implemented.

Refer to: Subsection 4.2.9, “Computed Tomography and Magnetic Resonance Imaging,” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*, for additional information about prior authorization requirements.

Subsection 3.2.6, “Authorization Requirements for CT, CTA, MRI, fMRI, MRA, PET, and Cardiac Nuclear Imaging Services,” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)* for additional information about emergency outpatient imaging services.

4.2.10 Electrodiagnostic (EDX) Testing

Electromyography (EMG) and nerve conduction studies (NCS), collectively known as EDX testing, must be medically indicated and may be reimbursed to outpatient hospitals. Testing must be performed using EDX equipment that provides assessment of all parameters of the recorded signals. Studies performed with devices designed only for screening purposes rather than diagnoses are not a benefit of Texas Medicaid.

NCS and EMG studies are diagnosis restricted and may require prior authorization.

Refer to: Subsection 9.2.26.7, “Esophageal pH Probe Monitoring,” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

4.2.11 Fluocinolone Acetonide

The fluocinolone acetonide intravitreal implant (procedure code J7311) may be reimbursed for services rendered to clients who are 12 years of age and older. Procedure code J7311 requires prior authorization.

4.2.11.1 Prior Authorization for Fluocinolone Acetonide

The fluocinolone acetonide intravitreal implant (procedure code J7311) may be reimbursed for services rendered to clients who are 12 years of age and older. Procedure code J7311 requires prior authorization.

To request prior authorization, providers must submit requests by fax or mail to the SMPA Department at:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway
Austin, TX 78727
Fax: 1-512-514-4213

Requests for prior authorization can be submitted online through the TMHP website at www.tmhp.com.

4.2.12 Fetal Nonstress Testing and Contraction Stress Test

Claims for nonstress and contraction stress testing conducted in the outpatient setting must be submitted with revenue code 729. Services during an inpatient hospital stay are reimbursed under the hospital's DRG.

Refer to: Subsection 9.2.46.10, "Prenatal Surveillance," in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

4.2.13 Hyperbaric Oxygen Therapy (HBOT)

HBOT is a type of therapy that increases the environmental oxygen pressure to promote the movement of oxygen from the environment into the client's body tissues. Such treatment may be a benefit of Texas Medicaid when it is performed in specially constructed hyperbaric chambers, pressurized to 1.4 atmosphere absolute (atm abs) or higher, which may hold one or more clients.

Sea-level pressure is equal to atm.abs). Although oxygen may be administered by mask, cannula, or tube in addition to the hyperbaric treatment, this use of oxygen is not considered hyperbaric oxygen treatment in itself. HBOT procedure codes 99183 and G0277 require prior authorization before the date that service is initiated.

The number of billable units of procedure code G0277 is based upon the time that the client receives treatment with hyperbaric oxygen.

In calculating how many 30-minute intervals to report, hospitals should take into consideration the time spent under pressure during descent, air breaks, and ascent, (in minutes), as follows:

- The first unit is for the time spent in the chamber receiving hyperbaric oxygen and must be for a minimum of 16 minutes.
- To bill for a second (or subsequent unit), all previous units of time must have been for the full thirty minutes, and the last unit must be for 16-30 minutes.

Procedure code 99183 equates to one total treatment (one professional session).

Procedure code G0277 must be billed with revenue code B-413 on the same claim. If procedure code G0277 is not on the same claim as revenue code B-413, the claim will be denied.

Refer to: Subsection 9.2.33, "Hyperbaric Oxygen Therapy (HBOT)," in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information.

4.2.14 Laboratory Services

Routine laboratory services, directly related to the surgical procedure being performed, are not reimbursed separately. Claims for nonroutine laboratory services provided with emergency conditions may be submitted separately with documentation that the complicating condition arose after the initiation of the surgery. Outpatient claims for laboratory services must reflect only tests actually performed by the hospital laboratory.

Exception: Hospital laboratories may submit claims for all the tests performed on a specimen if some but not all the tests are done by another laboratory on referral from the hospital submitting the claim.

The billing hospital must enter the name and provider identifier of the performing laboratory in Block 80 of the UB-04 CMS-1450 paper claim form and must enter the performing laboratory's provider identifier next to the service provided by the performing laboratory.

Hospitals may submit claims for a handling fee (procedure code 99001) for collecting and forwarding a specimen to a referral laboratory when the laboratory handling fee is not being billed through other methods. Only one handling fee may be charged per day, per client, unless specimens are sent to two or more different laboratories; this must be documented on the claim.

Refer to: *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks).*

4.2.14.1 Clinical Laboratory Improvement Amendments (CLIA)

All providers of laboratory services must comply with the rules and regulations of CLIA. Providers not complying with CLIA will not be reimbursed for laboratory services.

Refer to: Subsection 1.1, "Provider Enrollment and Reenrollment," in Section 1, "Provider Enrollment and Responsibilities" (*Vol. 1, General Information*) for more information about enrollment procedures.

Subsection 2.1.1, "Clinical Laboratory Improvement Amendments (CLIA)," in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)* for more information about CLIA.

The *Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks)*.

4.2.15 Lung Volume Reduction Surgery (LVRS)

LVRS surgery must be performed in a facility that meets at least one of the following requirements:

- Certified under the Disease Specific Care Certification Program for LVRS by the Joint Commission on Accreditation of Health Care Organization (JCAHO)
- Approved by Medicare as a lung or heart-lung transplant facility

The surgery must be both preceded and followed by a program of diagnostic and therapeutic services that are consistent with those provided in the National Emphysema Treatment Trial (NETT) and designed to maximize the client's potential to successfully undergo and recover from surgery. The program must meet all of the following requirements:

- Include a 6-to 10-week series of at least 16, and no more than 20, pre-operative sessions, each lasting a minimum of 2 hours
- Include at least 6, and no more than 10, post-operative sessions, each lasting a minimum of 2 hours, within 8 to 9 weeks after the LVRS
- Be consistent with the care plan that was developed by the treating physician following the performance of a comprehensive evaluation of the client's medical, psychosocial, and nutritional needs

- Be arranged, monitored, and performed under the coordination of the facility where the surgery takes place. Prior authorization is required for the LVRS procedure. However, prior authorization is not required for the pre-operative and post-discharge pulmonary services.

LVRS must be prior authorized and is limited to clients who have severe emphysema, disabling dyspnea, and evidence of severe air trapping. Prior authorization is not required for the associated preoperative pulmonary surgery services for preparation of LVRS (procedure codes G0302, G0303, and G0304) or the associated postdischarge pulmonary surgery services after LVRS (procedure code G0305). These services are restricted to diagnosis codes 4928 and 5182.

Procedure codes 32491, G0302, G0303, G0304 and G0305 are limited to one per rolling year per client any provider.

Procedure code G0305 may be reimbursed only if a claim for LVRS (procedure code 32491) has been submitted within the past 12 months.

Refer to: Subsection 9.2.42, “Lung Volume Reduction Surgery (LVRS)” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

4.2.16 Neurostimulators

Neurostimulators may be a benefit in the outpatient hospital setting when medically necessary. All procedures require prior authorizations.

Refer to: Subsection 9.2.44, “Neurostimulators,” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

Subsection 4.2.16.1, “Prior Authorization for Neurostimulators,” in this handbook.

4.2.16.1 Prior Authorization for Neurostimulators

All devices and related procedures for the initial application or surgical implantation of the stimulator device require prior authorization. Requests for prior authorization must be submitted to the SMPA Department.

Refer to: Subsection 9.2.44.1, “Prior Authorization for Neurostimulators,” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2 Provider Handbooks)*.

4.2.17 Occupational and Physical Therapy Services

Refer to: *Nursing and Therapy Services Handbook (Vol. 2, Provider Handbooks)* for more information about therapy services.

4.2.18 Radiation Therapy Services

Take-home drugs given during the course of therapy can be reimbursed separately through the VDP.

Hospitals use revenue code 333, Radiation therapy, on the UB-04 CMS-1450 paper claim form when submitting charges for these services.

The following radiation therapy services provided in an outpatient setting are allowed only once per day unless documentation of medical necessity supports the need for repeated services:

- Therapeutic radiation treatment planning
- Therapeutic radiology simulation-aided field setting
- Teletherapy
- Brachytherapy isodose calculation
- Treatment devices
- Proton beam delivery/treatment

- Intracavity radiation source application
- Interstitial radiation source application
- Remote afterloading high intensity brachytherapy
- Radiation treatment delivery
- Localization, and radioisotope therapy

4.2.18.1 Radiopharmaceuticals

Radiopharmaceuticals may be considered for separate reimbursement when used for therapeutic treatment.

The following procedure codes are payable to outpatient hospitals

Procedure Codes							
79403*	A9542	A9543	A9545	A9563	A9564	A9600	A9699
*Total or technical component							

Procedure codes A9542, A9543, and A9545 require prior authorization. Only one of these agents may be considered per lifetime by any provider. Procedure codes A9542, A9543, A9545 must be submitted with diagnosis code 20280.

Procedure code A9600 is limited to diagnosis code 1985 and to one service per day by the same provider with a total of 10 mci intravenously injected every 90 days, by any provider.

Procedure code A9563 is limited to the following diagnosis codes:

Diagnosis Codes									
1985	20410	20412	20422	20492	20510	20512	20522	20582	20592
20812	20822	20892	2384						

Procedure code A9564 is limited to diagnosis code 1972 or 1976. Modifier 76 must be used when submitting a claim for a radiopharmaceutical procedure code more than once per day by the same provider.

Refer to: Subsection 9.2.63, “Radiation Therapy,” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

Prior Authorization for Therapeutic Radiopharmaceuticals

Prior authorization is required for A9542, A9543, and A9545, which will be considered with documentation of all of the following:

- A diagnosis of either a low-grade follicular or transformed B-cell non-Hodgkin’s lymphoma.
- Client has failed, relapsed, or become refractory to conventional chemotherapy.
- Marrow involvement is less than 26 percent.
- Platelet count is 100,000 cell/mm3 or greater.
- Neutrophil count is 1,500 cells/mm3 or greater.
- Client has failed a trial of rituximab.

Prior authorization must be requested through the SMPA department with appropriate documentation. Requests can be mailed or faxed to:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway
Austin, TX 78727
Fax: 1-512-514-4213

Requests for prior authorization can be submitted online through the TMHP website at www.tmhp.com.

4.2.19 Respiratory Services

4.2.19.1 Aerosol Treatment

Aerosol treatments, including vaporizers, humidifiers, nebulizers, and inhalers are a benefit of Texas Medicaid. Authorization is not required for aerosol treatments.

The following diagnosis codes are payable for aerosol treatments:

Diagnosis Codes									
1363	27700	27701	27702	27703	27709	46611	46619	4801	48242
486	48801	48802	48811	48812	4910	4911	49120	49121	49122
4918	4919	4920	4928	49300	49301	49302	49310	49311	49312
49320	49321	49322	49381	49382	49390	49391	49392	4940	4941
4950	4951	4952	4953	4954	4955	4956	4957	4958	4959
496	5070	5071	5078	51911	51919	5533	7707	99527	99731
99739									

Revenue code 412 may be reimbursed separately when submitted for aerosol therapy in the recovery room after outpatient surgery, as it is a necessary adjunct to the postoperative recovery of a client who has undergone general anesthesia.

Outpatient facilities must submit claims for aerosol treatments using revenue code 412. Revenue code 412 includes the inhalers listed below and is payable once per day in the outpatient setting for either the aerosol therapy or the inhaler, but not both.

- Beclomethasone dipropionate (*Vanceril* or *Beclovent* oral inhalers)
- Isoproterenol sulfate (*Iso-Autohaler*, *Luf-Iso Inhaler*, *Medihaler-Iso*, *Norisodrine Aerohaler*)
- Isoproterenol hydrochloride (*Iprenol*, *Vapo-Iso inhalers*)
- Bilateral (*Proventil* or *Ventolin inhalers*)
- Metaproterenol sulfate (*Alupent Metered Dose inhaler*, *Metaprel inhaler*, *Alupent 10 mL*, *Alupent 30 mL*)
- Epinephrine bitartrate (*Medihaler-Epi* and *Primatene Mist Suspension inhaler*)
- Phenylephrine bitartrate (*Duo-Medihaler*)
- Isoetharine mesylate inhalation aerosol (*Bronkometer*)
- Dexamethasone sodium phosphate (*Turbinaire* or *Respihaler*)

Demonstration and evaluation of client utilization of an aerosol generator, nebulizer, metered dose inhaler, or intermittent positive pressure breathing (IPPB) device will not be reimbursed separately.

IPPB treatments have been determined to be inappropriate for the treatment of most respiratory problems and are denied.

4.2.19.2 Pentamidine Aerosol

Aerosol pentamidine treatments are reimbursed using procedure code 94642. The provider may also be reimbursed for the medication using procedure code J2545.

Payment for aerosol pentamidine treatments is limited to the following diagnosis codes:

Diagnosis Codes						
042	07951	07952	07953	1363	48284	5186

Aerosol pentamidine treatments are limited to one treatment every 28 days.

Oral trimethoprim-sulfamethoxazole is available from pharmacies for self administration at home. The use of oral trimethoprim-sulfamethoxazole is not a payable benefit of the insured portion of Texas Medicaid.

4.2.19.3 Diagnostic Testing

Nitric oxide expired gas determination (FeNO) measurement provided in the physician’s office or outpatient hospital setting is considered medically necessary as an adjunct to the established clinical and laboratory assessments for diagnosing and assessing asthma, predicting exacerbations, and evaluating the response of a patient with asthma to anti-inflammatory therapy.

Claims for nitric oxide treatments may be submitted using procedure code 95012. Hospital providers must include the following when submitting claims for procedure code 95012:

- Revenue code 419 must appear on the same line as procedure code 95012.
- The claim must have a line item for either procedure code 94010 or 94060. This line item must also indicate revenue code 419.

Note: Procedure code 94010 or 94060, when submitted in conjunction with procedure code 95012, may only be reimbursed in an office or outpatient hospital setting, and is not reimbursed for critical care, emergency care, or anesthesiology.

4.2.19.4 Pulmonary Function Studies

Pulmonary function studies considered for reimbursement to outpatient hospitals include, but are not limited to, the following procedures when submitted with the total component (TOS 5):

Procedure Codes									
94010	94060	94070	94150	94200	94250	94375	94400	94450	94452
94453	94620	94621	94726	94727	94728	94729	95012		

Procedure codes 94452 and 94453 must be submitted with one of the following diagnosis codes. Additionally, evidence of hypoxemia must be documented in the client’s medical record.

Diagnosis Codes							
27700	27701	27702	27703	27709	4160	4161	4168
4169	4910	4911	49120	49121	49122	4918	4919
4920	4928	4940	4941	500	5080	5081	5088
5089	515	5160	5161	5162	5163	5168	5169
5181	5183	51883	7485	74861	7707		

When multiple procedure codes are submitted, the most inclusive code of the related codes will be reimbursed and all other related codes will be denied.

When unrelated pulmonary function studies are submitted together, each will be considered for reimbursement.

4.2.20 Screening, Brief Intervention, and Referral to Treatment (SBIRT)

SBIRT is a comprehensive, public health approach to the delivery of early intervention and treatment services for clients with substance use disorders and those at risk of developing such disorders. Substance abuse includes, but is not limited to, the abuse of alcohol and the abuse of, improper use of, or dependency on illegal or legal drugs. SBIRT is used for intervention directed to individual clients and not for group intervention. SBIRT is targeted to clients who are 14 years of age through 20 years of age and who present to the hospital emergency department for a traumatic injury, condition, or accident related to substance abuse. SBIRT may also be medically necessary for clients who are 10 years of age through 13 years of age.

Claims for the first SBIRT session, including screening and brief intervention, must be submitted by the hospital using an appropriate revenue code and procedure code H0050. Screening to identify clients with problems related to substance use must be performed during the first session in the hospital emergency department or inpatient setting, but will not be separately reimbursed.

Screening may be completed through interview and self-report, blood alcohol content, toxicology screen, or by using a standardized tool. Standardized tools that may be used include, but are not limited to, the following:

- Alcohol, Smoking, and Substance Involvement Screening Test (ASSIST)
- Drug Abuse Screening Test (DAST)
- Alcohol Use Disorders Identification Test (AUDIT)
- Cut-down, Annoyed, Guilty, Eye-opener (CAGE) questionnaire
- Car, Relax, Alone, Forget, Family or Friends, Trouble (CRAFFT) questionnaire
- Binge drinking questionnaire

Brief intervention is performed during the first session following a positive screen or a finding of at least a moderate risk for substance or alcohol abuse. Brief intervention, directed to the client, involves motivational discussion focused on raising the client's awareness of their substance use and its consequences, and motivated them toward behavioral change. Successful brief intervention encompasses support of the client's empowerment to make behavioral changes. A client found to have a moderate risk for substance or alcohol abuse should be referred for brief treatment of up to three sessions. Upon determination that the client has a severe risk for substance or alcohol abuse, the client should also be referred for more extensive treatment to the appropriate chemical dependency treatment center or outpatient behavioral health provider. If the client is currently under the care of a behavioral health provider, the client must be referred back to that provider.

SBIRT documentation for the first session must include:

- The client has an alcohol or drug-related traumatic injury or condition.
- Positive screening by a standardized screening tool.
- Laboratory results such as blood alcohol content, toxicology screen, or other measures showing at least a moderate risk for alcohol or substance abuse.
- The name, address, and telephone number of the provider to which the client is referred, if a referral is made.

The provider who performed the screening must document that a follow-up appointment was made for a subsequent session.

4.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including hospital services. Hospital services are subject to retrospective review and recoupment if documentation does not support the service that was submitted for reimbursement.

4.4 Outpatient Utilization Review

UR activities of all Medicaid services provided by hospitals reimbursed under the DRG prospective payment system are required by Title XIX of the Social Security Act, Sections 1902 and 1903. The review activities are accomplished through a series of monitoring systems developed to ensure services are appropriate to need, of optimum quality and quantity, and rendered in the most cost-effective mode. Clients and providers are subject to UR monitoring. The monitoring focuses on the appropriate screening activities, medical necessity of all services, and quality of care as reflected by the choice of services provided, type of provider involved, and settings in which the care was delivered. This monitoring ensures the efficient and cost-effective administration of Texas Medicaid.

TMHP is responsible for a comprehensive integrated review process to identify misuse and inappropriate claim submission patterns by outpatient hospitals and HASCs. All providers are subject to TMHP's UR monitoring. Providers are selected for review based on a comparison of their individual resource utilization with a peer group of similar specialty and geographic locality. The main goal of the required utilization control is to identify those providers whose practice patterns are aberrant from their peers and provide the necessary educational actions to help the provider achieve Texas Medicaid compliance. An analysis of UR data is completed by a registered nurse analyst for review by the medical director and staff. If the analyst substantiates that a provider's practice and claim submission patterns are inconsistent with the federal requirements and Texas Medicaid's scope of benefits, a TMHP representative contacts the provider. The purpose of the contact is to discuss appropriate claim submission guidelines and to assist the provider in resolving the inappropriate claim submission patterns identified in the review.

TMHP uses the following criteria when reviewing all hospital outpatient medical records. Services must be:

- Medically necessary.
- Ordered by a physician, signed, and dated. Signature stamps are valid if initialed and dated by the physician.
- Submitted in the quantities ordered and documented as provided.
- Program benefits.
- Specifically identified on the charge tickets or itemized statement submitted with the claim or by the HCPCS procedure code on the claim.
- Indicated by the documentation in the medical record.
- Submitted to Texas Medicaid only after other medical insurance resources have been exhausted.

Refer to: Subsection 4.12.1, "Your Texas Benefits Medicaid Card," in Section 4, "Client Eligibility" (*Vol. 1, General Information*).

The determination of the TMHP UR process may result in the following:

- Educational letters and visits
- Mail-in of medical records for review

- On-site medical record review (outpatient, HASC, or inpatient records not reviewed)
- Referral of questionable claims to HHSC or HHSC OIG
- Recoupment
- Prepayment review

The intent of these actions is to ensure the most effective and appropriate use of available services and facilities and provide appropriate, cost-effective care to clients with Medicaid coverage.

4.5 Claims Filing and Reimbursement

4.5.1 Outpatient Claims Information

Claims for scheduled procedures that are performed in a HASC must be submitted using the HASC provider identifier with type of bill (TOB) 131. Claims for emergency or unscheduled procedures performed in a hospital when the client is an outpatient must be submitted using the hospital provider identifier and appropriate revenue and HCPCS code (if required) with TOB 131.

Claims for outpatient hospital services must be submitted to TMHP in an approved electronic format or on the UB-04 CMS-1450 paper claim form.

Freestanding ambulatory surgical centers must submit claims on the CMS-1500 claim form. The performing surgeon or referring physician name and number must be identified in Block 17. Identification of outpatient charges must be in Block 44 if submitting by HCPCS code. If appropriate, the revenue code must be indicated in Block 42. Texas Medicaid recommends the use of specific procedure codes for claim submission. Do *not* use the revenue code description in Block 43; the HCPCS narrative description must be identified in this block. For example, when submitting charges for physical therapy, do not use the description associated with revenue code 420. To receive reimbursement for physical therapy services, providers must identify the specific modality used (e.g., gait training).

Examples:

- *Emergency Room.* Submit as “Emergency room” or “Emergency room charge per use.” If the client visits the emergency room more than once in one day, the time must be given for each visit. The time of the first visit must be identified in Block 13, using 00 to 23 hours military time (e.g., 1350 for 1:50 p.m.). Indicate other times on the same line as the procedure code. Claims for emergency CT, CTA, MRI, or MRA studies provided in the emergency department must have the appropriate corresponding emergency services revenue code (450, 451, 456, or 459) to be considered for payment.
- *Observation Room.* Submit as “observation room.” (Revenue code 762).
- *Operating Room.* Submit as “Operating Room.” (Revenue code 360, 361, or 369).
- *Recovery Room.* Submit as “Recovery Room” or “Cast Room” as appropriate. (Revenue code 710 or 719).
- *Injections.* Must have “Inj.-name of drug; route of administration; the dosage and quantity” or the injection code.
- *Drugs and Supplies.* The drug description must include the name, strength, and quantity. Take-home drugs and supplies are not a benefit of Texas Medicaid:
 - Take-home drugs must be submitted with revenue code 253.
 - Take-home supplies must be submitted with revenue code 273.
 - Self-administered drugs must be submitted with revenue code 637.

- *Radiology.* Facilities must submit claims using the most appropriate revenue and HCPCS code. The physician must submit claims for professional services by a physician separately. The license number of the ordering physician must be in Block 83. If the client receives the same radiology procedure more than once in one day, the time must be given for each visit. The time of the first visit must be identified in Block 13, using 00 to 23 hours military time (such as 1350 for 1:50 p.m.). Indicate other times on the same line as the procedure code.
- *Laboratory.* Provide a complete description or use the procedure codes for the laboratory procedures. The physician must submit claims for professional services by a physician separately. Blocks 78–79 must have the license number of the ordering physician. If laboratory work is sent out, enter the name of the test and name and address or Medicaid number of the laboratory where the work was forwarded. If the client receives the same laboratory procedure more than once in one day, give the time for each visit. The time of the first visit must be identified in Block 13, using 00 to 23 hours military time (e.g., 1350 for 1:50 p.m.). Indicate other times on the same line as the procedure code.
- *Nuclear Medicine.* Provide a complete description.
- *Day Surgery.* Day surgery must be submitted as an inclusive charge using TOS F. Providers must not submit claims for separate services that were provided in conjunction with the surgery (e.g., lab, radiology, and anesthesia). File claims for unscheduled emergency outpatient surgical procedures with separate charges (e.g., lab, radiology, anesthesia, and emergency room) for all services using TOB 131 and the hospital's provider identifier.

Claims for emergency or unscheduled procedures performed in a hospital when the client is an outpatient must be submitted using the hospital provider identifier and appropriate revenue and HCPCS code (if required) with TOB 131.

Refer to the ASC/HASC section for information on scheduled procedures. Additional claims information can be found within individual topic areas within this section.

Charges on claims must be itemized on the face of the UB-04 CMS-1450 paper claim form instead of submitting attachments or charge details. TMHP uses information attached to the claim for clarification purposes only.

If a claim contains more than 28 details, continue the claim on additional UB-04 CMS-1450 paper claim forms or electronic equivalent. Total each claim form as a stand-alone claim. If you do not total each page, your claim may be denied for being over the limitation, and must be resubmitted with 28 or less details.

Providers may purchase UB-04 CMS-1450 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a UB-04 CMS-1450 paper claim form, all required information must be included on the claim, as TMHP does not key any information. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (*Vol. 1, General Information*) for information on electronic claims submissions.

Section 6: Claims Filing (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.6, "UB-04 CMS-1450 Paper Claim Filing Instructions," in Section 6, "Claims Filing" (*Vol. 1, General Information*). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Outpatient hospital services must be itemized by date of service. Procedures repeated over a period of time must be submitted for each separate date of service. Do not combine multiple dates of service on the same line detail.

4.5.2 Outpatient Reimbursement

Outpatient services are reimbursed on a reasonable cost based on a percentage of the hospital’s most recent tentative Medicaid cost report settlement.

The reimbursement rate for *non-high-volume* hospitals is as follows with the application of the hospital specific interim rate:

Non-high-volume Provider	Current Allowable Rate
Children’s hospitals	72.27 percent of the allowable charges
Rural hospitals	100 percent of the allowable charges
State-owned teaching hospitals	72.27 percent of the allowable charges
Other hospitals	68.44 percent of the allowable charges

The reimbursement rate for *high-volume* hospitals is as follows with the application of the hospital specific interim rate:

High-volume Provider	Current Allowable Rate
Children’s hospitals	72.27 percent of the allowable charges
Rural hospitals	100 percent of the allowable charges
State-owned teaching hospitals	72.27 percent of the allowable charges
Other hospitals	68.44 percent of the allowable charges
ASCs/HASCs that qualify as high-volume providers	Additional 5.2 percent increase in payment rates

High-volume providers are eligible for additional payments on Texas Medicaid fee-for-service claims. A high-volume outpatient hospital provider is defined as one that was paid at least \$200,000 during calendar year 2004.

All clinical laboratory services are reimbursed at a percentage of the prevailing charge. Hospitals that are identified by Medicare as sole community hospitals are reimbursed at a higher percentage of the prevailing charges for services that are provided to clients in the outpatient setting.

Clinical pathology consultations are also allowed for reimbursement.

Refer to: The HHSC Rate Analysis web page at www.hhsc.state.tx.us/rad/hospital-svcs/index.shtml for additional information about hospital reimbursement.

Subsection 3.7.4, “Provider Cost and Reporting,” in this handbook for more information about the calculation of the interim rate.

Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA),” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

4.5.3 Provider Cost and Reporting

Refer to: Subsection 3.7.4, “Provider Cost and Reporting,” in this handbook.

4.5.4 National Correct Coding Initiative (NCCI) and Medically Unlikely Edit (MUE) Guidelines

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* are subject to National Correct Coding Initiative (NCCI) relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals. Providers should refer to the [Centers for Medicare & Medicaid Services \(CMS\) NCCI web page](#) for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

4.5.5 Outpatient Hospital Revenue Codes

UB-04 CMS-1450 revenue codes must be used to submit claims for outpatient hospital facility services. In some instances, a HCPCS procedure code is required in addition to the revenue code for accurate claims processing:

Revenue Code	Description	Comments
Special Charges – Canceled Surgery		
220	Special Charges	Procedure code required
Pharmacy		
250	General classification	
251	Generic drugs	
252	Nongeneric drugs	
253	Take-home drugs	Not a benefit
254	Drugs incident to other diagnostic services	
255	Drugs incident to radiology	
256	Experimental drugs	Not a benefit
257	Nonprescription drugs	
258	IV solutions	
259	Other pharmacy	
260	General classification	
261	Infusion pump	
262	IV therapy/pharmacy services	
263	IV therapy/drug/supply delivery	
264	IV therapy/supplies	
269	Other IV therapy	
Medical/Surgical Supplies and Devices		
270	General classification	
271	Nonsterile supply	
272	Sterile supply	
273	Take-home supplies	Not a benefit
274	Prosthetic/orthotic devices	Not a benefit
275	Pacemaker	
276	Intraocular lens	
277	Oxygen take-home	Not a benefit
278	Medical/surgical supplies and devices- other implants	Procedure code required
279	Medical/surgical supplies and devices- other	Procedure code required
280	General Classification	
289	Other oncology	
300	Laboratory	Procedure code required

Revenue Code	Description	Comments
301	Laboratory- chemistry	Procedure code required
302	Laboratory- immunology	Procedure code required
303	Laboratory- renal patient (home)	Procedure code required
304	Laboratory- non-routine dialysis	Procedure code required
305	Laboratory- hematology	Procedure code required
306	Laboratory- bacteriology/microbiology	Procedure code required
307	Laboratory- urology	Procedure code required
309	Laboratory- other	Procedure code required
Laboratory – Pathological		
310	Laboratory- pathological	Procedure code required
311	Laboratory- pathological cytology	Procedure code required

Refer to: The National Uniform Billing Committee (NUBC) website at www.nubc.org for additional information.

4.5.6 Third Party Liability

Hospitals and providers enrolled in Texas Medicaid are required to inform TMHP about circumstances that may result in third party liability for health-care claims. After receiving this information, TMHP pursues reimbursement from responsible third parties.

Hospitals and providers must mail or fax the Other Insurance Form for Health Insurance or the Tort Response Form for accidents to the following address:

Texas Medicaid & Healthcare Partnership
TPL Correspondence
Third Party Liability Unit PO Box 202948
Austin, TX 78720-2948
Fax: 1-512-514-4225

Refer to: Subsection 3.7.1, “Medicaid Relationship to Medicare,” in this handbook.

Subsection 4.12, “Third Party Liability (TPL),” in Section 4, “Client Eligibility” (*Vol. 1, General Information*).

[Other Insurance Form](#) on the TMHP website at www.tmhp.com.

[Tort Response Form](#) on the TMHP website at www.tmhp.com.

Subsection 3.7.5, “Third Party Liability,” in this handbook.

5 Ambulatory Surgical Center and Hospital Ambulatory Surgical Center

5.1 Enrollment

To enroll in Texas Medicaid, an ASC must do the following:

- Meet and comply with applicable state and federal laws, rules, regulations, and provisions of the state plan under Title XIX of the Social Security Act
- Be enrolled in Medicare
- Meet and comply with state licensure requirements for ASCs

Providers cannot be enrolled if their license is due to expire within 30 days; a current license must be submitted.

All hospitals enrolling in Texas Medicaid (except psychiatric and rehabilitation hospitals) are issued an HASC provider number at the time of enrollment.

An out-of-state provider may enroll in Texas Medicaid if it is the customary or general practice for clients in a particular locality to use medical resources in another state. An out-of-state provider located within 50 miles of the Texas border is automatically considered to meet this criterion.

Refer to: Subsection 1.1, “Provider Enrollment and Reenrollment,” in Section 1, “Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for more information about enrollment procedures.

Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA),” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

The *Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks)*.

5.2 Services, Benefits, Limitations, and Prior Authorization

ASCs, both freestanding and hospital-based, provide same day elective surgery for clients who do not require a hospital admission and who are not expected to require extensive postoperative care.

5.2.1 Drugs and Supplies

Outpatient prescribed medications are a benefit to eligible clients when obtained through a pharmacy contracted with the Medicaid Vendor Drug Program. Prescribed take-home supplies are a benefit to eligible clients when obtained through Medicaid durable medical equipment (DME).

Refer to: Appendix B: Vendor Drug Program (*Vol. 1, General Information*) for information about outpatient prescription drugs and the Medicaid Vendor Drug Program.

Subsection 2.2.3, “* Medical Supplies,” in the *Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook (Vol. 2, Provider Handbooks)*.

5.2.2 Incomplete Surgical Procedures

When an ASC or HASC bills Texas Medicaid for an incomplete surgical procedure, one of the following *must* be included on the claim:

- Modifier 73 for a discontinued outpatient procedure prior to anesthesia administration
- Modifier 74 for a discontinued outpatient procedure after anesthesia administration
- At least one of the following diagnosis codes: V641, V642, or V643

Claims that are submitted with diagnosis code V641, V642, or V643 or with modifier 73 or 74 are suspended for review of the medical documentation that was submitted with the claim. Providers must submit the operative report, the anesthesia report, and state why the operation was not completed.

Reimbursement to ASC and HASC facilities for canceled or incomplete surgeries because of patient complications is made according to the following criteria, based on the extent to which the anesthesia or surgery proceeded:

- Reimburse at 0 percent of ASC group payment schedule for a procedure that is terminated for nonmedical or medical reasons before the facility has expended substantial resources
- Reimburse at 33 percent of ASC group payment schedule up to the administration of anesthesia
- Reimburse at 67 percent of ASC group payment schedule after the administration of anesthesia but before incision
- Reimburse at 100 percent of ASC group payment schedule after incision

Surgeries canceled because of incomplete preoperative procedures are *not* reimbursed.

5.2.3 Complications Following Day Surgery Requiring Outpatient Observation or Inpatient Admission

If the client is placed in outpatient observation or inpatient status following an HASC day surgery, the day surgery procedure must still be submitted as an outpatient procedure under the HASC provider identifier.

Refer to: Subsection 4.2.3.2, “Complications Following Elective or Scheduled Day Surgeries,” and Subsection 4.2.3.4, “Emergency or Unscheduled Day Surgeries,” in this handbook.

5.2.4 Planned Admission for Day Surgery

Inpatients may occasionally require a surgery that has been designated as an outpatient procedure. The physician must document the need for this surgery as an inpatient procedure before the procedure is performed. These claims are subject to retrospective review.

5.2.5 Cochlear Implants

A cochlear implant is a benefit of Texas Medicaid when medically indicated. ASC and HASC providers may be reimbursed for the implantation procedure using procedure code 69930, and for the cochlear implant devices using procedure code L8614.

Refer to: Subsection 9.2.23, “Cochlear Implants,” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

5.2.6 Colorectal Cancer Screening

Procedure codes G0104 and G0105 are benefits of Texas Medicaid in the ASC or HASC setting.

Procedure code G0104 is limited to diagnosis codes V1090, V1272, V700, V7650, V7651, or V7652.
 Procedure code G0105 is limited to the following diagnosis codes:

Diagnosis Codes									
5550	5551	5552	5559	5560	5561	5562	5563	5568	5569
55841	55842	5589	V1005	V1006	V1090	V1272	V160	V1851	

Authorization is not required for colorectal cancer screening.

5.2.7 Dental Therapy Under General Anesthesia

Facilities must use procedure code 41899 with modifier EP to submit claims for dental therapy under general anesthesia. Prior authorization is not required for ASCs and HASCs unless the client is enrolled in a Medicaid managed care organization.

Refer to: Subsection 4.2.25, “Dental Therapy Under General Anesthesia,” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)*.

Subsection 4.2.26, “Hospitalization and ASC/HASC,” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)*.

5.2.8 Fluocinolone Acetonide

Procedure code 67027 for implantation may be reimbursed to HASCs. This benefit is limited to clients who are 12 years of age and older and requires prior authorization.

Refer to: [Non-emergency Ambulance Prior Authorization Request](http://www.tmhp.com) on the TMHP website at www.tmhp.com.

Subsection 4.2.11, “Fluocinolone Acetonide,” in this handbook.

5.2.9 Implantable Infusion Pumps

Implantable infusion pumps are a benefit of Texas Medicaid. Implantable infusion pumps may be medically necessary in the following circumstances:

- Administration of intrathecal or epidural antispasmodic drugs to treat refractory intractable spasticity
- Administration of intrathecal, epidural, or central venous analgesic (opioid or non-opioid) drugs for treatment of severe chronic intractable pain
- Administration of intrahepatic chemotherapy for primary liver cancer or metastatic cancer with metastases limited to the liver

An IIP is not a benefit for the following uses:

- Continuous insulin infusion for diabetes
- Continuous heparin infusion for recurrent thromboembolic disease
- Continuous intralesional infusion for severe chronic intractable pain
- Continuous intra-arterial infusion
- Continuous intra-articular infusion for severe chronic intractable pain
- Administration of antibiotics for osteomyelitis

All supplies associated with an IIP are included with the reimbursement for the surgery to implant the infusion pump and are not reimbursed separately.

Providers may be reimbursed for implantable infusion pumps using procedure codes E0782, E0783, and E0786.

If procedure codes E0782 and E0783 are billed with the same date of service, only one may be reimbursed.

Refer to: Subsection 9.2.39.22, “Implantable Infusion Pumps,” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

5.2.9.1 Prior Authorization for Implantable Infusion Pump

Implantable infusion pumps (procedure codes E0782, E0783, and E0786) require prior authorization.

Prior authorization is not required for the physician services associated with the insertion, revision, removal, refilling, or maintenance of the IIP.

Providers must request prior authorization for the implantable infusion pump through the SMPA department with the supporting documentation for medical necessity. Send authorization requests to:

Texas Medicaid & Healthcare Partnership
 Special Medical Prior Authorization
 12357-B Riata Trace Parkway
 Austin, TX 78727
 Fax: 1-512-514-4213

Requests for prior authorization can be submitted online through the TMHP website at www.tmhp.com.

Refer to: Subsection 9.2.39.22.1, “Prior Authorization for Implantable Infusion Pumps,” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2 Provider Handbooks)*.

5.2.10 Stereotactic Radiosurgery

Procedure code S8030 is payable to ASC and HASC facilities. Prior authorization is required.

Refer to: Subsection 9.2.63.2, “Stereotactic Radiosurgery,” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

5.2.11 Brachytherapy

The following procedure codes are payable to ASC and HASC facilities:

Procedure Codes									
19296	19297	19298	31643	55860	55862	55865	55875	57155	58346
92974									

Prior authorization is not required for brachytherapy services.

Refer to: Subsection 9.2.63, “Radiation Therapy,” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

5.2.12 Neurostimulators

Neurostimulators are a benefit of Texas Medicaid when medically necessary. All procedures require prior authorization.

Refer to: Subsection 9.2.44, “Neurostimulators,” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

Neurostimulator devices may be reimbursed separately from the global fee.

Refer to: The [Texas Medicaid fee schedules](http://www.tmhp.com) on the TMHP website at www.tmhp.com for procedure codes that may be reimbursed to ASC providers.

5.2.13 Prior Authorization

Some procedures require the performing provider to obtain prior authorization. When prior authorization is required, providers can mail or fax the request to:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway
Austin, TX 78727
Fax: 1-512-514-4213

Requests for prior authorization can be submitted online through the TMHP website at www.tmhp.com.

5.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including ASC and HASC services. ASC and HASC services are subject to retrospective review and recoupment if documentation does not support the service submitted for reimbursement.

5.4 Claims Filing and Reimbursement

5.4.1 Claims Information

Freestanding ASC claims must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 paper claim form. Hospital-based ASCs must submit claims to TMHP in an approved electronic claims format or on a UB-04 CMS-1450 paper claim form.

Claims must contain the billing provider's complete name, address, and a provider identifier. When completing a UB-04 CMS-1450 or a CMS-1500 paper claim form, providers must include all required information on the claim; TMHP does not key any information from claim attachments. Providers must purchase UB-04 CMS-1450 and CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply them.

Scheduled procedures performed in a HASC must be submitted for reimbursement using the HASC provider identifier with TOB 131. Emergency or unscheduled procedures performed in a hospital when the client is an outpatient must be submitted for reimbursement using the hospital provider identifier with TOB 31.

To submit claims for services performed by certified registered nurse anesthetists (CRNAs), an ASC must enroll as a CRNA group provider and indicate the CRNA performing provider identifier on claims for those services.

Refer to: Section 4, "Certified Registered Nurse Anesthetist (CRNA)" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for specific billing instructions for CRNA services.

Section 6: Claims Filing (*Vol. 1, General Information*).

Section 10, "Claim Form Examples" in this handbook.

5.4.2 Reimbursement

Reimbursement of ASC and HASC procedures is based on the CMS-approved Ambulatory Surgical Code Groupings (1 through 9 per CMS and Group 10 per HHSC) payment schedule. Reimbursement is limited to the lesser of the amount reimbursed to an ASC for similar services, the hospital's actual charge, or the allowable cost determined by HHSC. When multiple surgical procedures are performed on the same day, only the procedure with the highest surgical code grouping is reimbursed. A complete list of approved ASC and HASC procedure codes with the assigned payment group can be found on the TMHP website at www.tmhp.com. Click on Fee Schedules. This list can also be obtained by calling the TMHP Contact Center at 1-800-925-9126.

Claims for physician and CRNA services performed in an ASC or HASC must be submitted under the physician or CRNA provider identifier and are reimbursed separately.

5.4.2.1 ASC and HASC Global Services

The ASC or HASC payment represents a global payment and includes room charges and supplies. Covered services provided are submitted as one inclusive charge. All facility services provided in conjunction with the surgery (e.g., laboratory, radiology, anesthesia supplies, medical supplies) are considered part of the global payment and cannot be itemized or submitted separately.

Routine X-ray and laboratory services directly related to the surgical procedure being performed are not reimbursed separately. All nonroutine laboratory and X-ray services provided with emergency conditions may be submitted separately with documentation that the complicating condition arose after the initiation of the surgery.

Medical and prosthetic devices such as intraocular lenses may be supplied by the ASC or HASC and implanted, inserted, or otherwise applied during a covered surgical procedure and is considered part of the global surgical fee.

Exception: *Certain pieces of equipment, (e.g., cochlear implants, implantable infusion pumps, and neurostimulator devices) may be reimbursed separately from the ASC or HASC global rate.*

Refer to: Subsection 2.2, “Fee-for-Service Reimbursement Methodology,” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

Subsection 4.2.3, “Day Surgery,” in this handbook for information about HASCs.

5.4.2.2 NCCI and MUE Guidelines

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals. Providers should refer to the [CMS NCCI web page](#) for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

6 Military Hospitals

6.1 Military Hospital Enrollment

To enroll in Texas Medicaid, a military hospital must be certified by Medicare, have a valid provider agreement with HHSC, and have completed the TMHP enrollment process. Veterans Administration (VA) hospitals are eligible to receive Texas Medicaid payment only on claims that have crossed over from Medicare.

Military hospital providers must comply with CLIA rules and regulations. Providers who do not comply with CLIA will not be reimbursed for laboratory services.

6.2 Services, Benefits, Limitations and Prior Authorization

6.2.1 Military Hospital Inpatient Services

Inpatient hospital services include medically necessary items and services ordinarily furnished by a Medicaid hospital or by an approved out-of-state hospital under the direction of a physician for the care and treatment of inpatient clients. Reimbursement to hospitals for inpatient services is limited to the Medicaid “spell of illness.” The *spell of illness* is defined as “30 days of inpatient hospital care, which may accrue intermittently or consecutively.”

After 30 days of inpatient care have been provided, reimbursement for additional inpatient care is not considered until the client has been out of an acute care facility for 60 consecutive days. Exceptions are made in the following instances:

- THSteps-eligible clients do not have a 30-day spell of illness limitation, if medically necessary conditions exist (covered under THSteps-CCP).

Refer to: *Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks).*

Subsection 3.1.2, "Spell of Illness," in this handbook.

Hospitals may submit *information only* claims to TMHP when one of the following situations exists:

- The inpatient 30-day spell of illness benefit is exhausted.
- Payment that was made by a third party resource or other insurance exceeds the Medicaid allowed amount.

For clients who are 21 years of age and older, there is an inpatient expenditure cap of \$200,000 per benefit year (November 1 through October 31). Claims are reviewed retrospectively, and payments exceeding \$200,000 will be recouped.

It is appropriate to submit *information only* claims using TOB 110.

The following hospital services must be medically necessary and are subject to the utilization review requirements of Texas Medicaid. Medicaid reimbursement for services cannot exceed the limitations of Texas Medicaid.

Inpatient hospital services include the following items and services:

- Bed and board in semiprivate accommodations or in an intensive care or coronary care unit, including meals, special diets, and general nursing services; or an allowance for bed and board in private accommodations, including meals, special diets, and general nursing services up to the hospital's charge for its most prevalent semiprivate accommodations. Bed and board in private accommodations are provided in full if required for medical reasons, as certified by the physician. Additionally, the hospital must document the medical necessity for a private room, such as the existence of a critical or contagious illness or a condition that could result in disturbance to other patients. This type of information is included in Block 80 or attached to the claim.
- Whole blood and packed red cells that are reasonable and necessary for treatment of illness or injury, provided they are not available without cost.
- All medically necessary services or supplies ordered by a physician.

Medicaid benefits are not available for take-home or self-administered drugs or personal comfort items except when received by prescription through the VDP.

Only inpatient claims that have an emergency diagnosis on the claim are considered for reimbursement.

6.2.2 Military Hospital Outpatient and Physician Services

Although Medicare reimburses for emergency outpatient and inpatient services, Medicaid does not reimburse for either outpatient or physician services. Military hospitals are not reimbursed for outpatient day surgery.

6.2.3 Prior Authorization

Prior authorization is not required for services rendered in military hospitals.

6.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including military hospital services. Military hospital services are subject to retrospective review and recoupment if documentation does not support the service submitted for reimbursement.

6.3.1 Documentation for Nursing Facility Admissions

The admission Minimum Data Set (MDS) must be used for admissions to a nursing facility. There are instances in which hospital social workers and discharge nurses might also complete the admission MDS, such as:

- If the client is in a long-term care acute center.
- If the potential receiving nursing facility wants a better clinical picture of the client, a paper copy of the admission MDS is completed by the hospital staff before the client is accepted for admission into the nursing facility.

Refer to: The [Long Term Care Program](#) page on the TMHP website at www.tmhp.com for additional information, including instructions for all forms and assessments.

6.4 Claims Filing and Reimbursement

6.4.1 Military Hospital Claims Information

If TOB 110 is used to submit a claim, all charges must be noncovered and the claim will finalize with EOB 217, "Payment reduced through hospital action."

It is appropriate to submit *information only* claims using TOB 110.

Military hospitals may submit total charges in one line with appropriate accommodation revenue codes. Emergency hospital services must be submitted to TMHP in an approved electronic format or on the UB-04 CMS-1450 paper claim form. Providers may purchase claim forms from the vendor of their choice. TMHP does not supply the forms.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (*Vol. 1, General Information*) for information on electronic claims submissions.

Section 6: Claims Filing (*Vol. 1, General Information*) for general information about claims filing.

When completing a UB-04 CMS-1450 paper claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claims supplements.

Refer to: Subsection 6.6, "UB-04 CMS-1450 Paper Claim Filing Instructions," in Section 6, "Claims Filing" (*Vol. 1, General Information*) for paper claims completion instructions. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

[Military Hospital \(Emergency Inpatient\)](#) on the TMHP website at www.tmhp.com for a claim form example.

6.4.2 Military Hospital Reimbursement

Reimbursement is limited to claims submitted for emergency inpatient care only.

Allowed inpatient hospital stays are reimbursed according to a prospective payment methodology based on DRGs. The reimbursement method itself does not affect inpatient benefits and limitations. Texas Medicaid requires that one claim be submitted for each inpatient stay with appropriate diagnosis and procedure code sequencing. Providers must submit only one claim per inpatient stay to Medicaid, regardless of the diagnosis, to ensure accurate payment. The DRG reimbursement includes all facility services provided to the client while registered as an inpatient.

Reimbursement to hospitals for inpatient services is limited to \$200,000 per client, per benefit year (November 1 through October 31). This limitation does not apply to services related to certain organ transplants or services to clients who are 20 years of age and younger and covered by the CCP.

Military hospitals should keep a Medicaid client as an inpatient for only the length of time necessary to stabilize the client. The Medicaid client, once stabilized, should be transferred to the nearest Medicaid acute care hospital facility for further treatment.

When more than one hospital provides care for the same client, the hospital that furnishes the most significant amount of care receives consideration for a full DRG payment.

The other hospital is paid a per diem rate based on the lesser of the mean length of stay for the DRG or eligible days in the facility.

Client transfers within the same facility or readmissions to the same facility within 24 hours of a previous acute hospital or facility discharge are considered one continuous stay. These readmissions are considered a continuous stay regardless of the original or readmission diagnosis. Texas Medicaid does not recognize specialty units within the same hospital as separate entities; therefore, these transfers must be included in one submission under the provider identifier. Admissions that were submitted inappropriately are identified and denied during the utilization review process and may result in an intensified review.

After all hospital claims have been submitted, TMHP performs a post-payment review to determine if the hospital furnishing the most significant amount of care received the full DRG. If the review reveals that the hospital furnishing the most significant amount of care did not receive the full DRG, an adjustment is initiated.

The inpatient DRG reimbursement includes payment for all radiology and laboratory services, including those sent to referral laboratories.

Refer to: Subsection 2.2, “Fee-for-Service Reimbursement Methodology,” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

7 Claims Resources

Refer to the following sections and forms when filing claims:

1 General Information

The information in this handbook is intended for Texas Medicaid managed care providers, including providers who are enrolled in a managed care organization (MCO) that is contracted by Texas Medicaid to provide managed care coverage for Texas Medicaid clients.

This handbook provides information about the following managed care programs and services:

- STAR
- STAR+PLUS
- NorthSTAR
- STAR Health
- Children's Medicaid Dental Services

Refer to: Medicaid managed care website at www.hhsc.state.tx.us/medicaid/managed-care/mmc.shtml.

2 Overview of Medicaid Managed Care

Texas Medicaid, which is administered by the Texas Health and Human Services Commission (HHSC), operates Medicaid managed care under the authority of federal waivers and state plan amendments that were approved by the Centers for Medicare & Medicaid Services (CMS).

Medicaid managed care is administered by MCOs, dental maintenance organizations (dental plans), and BHOs that are contracted by HHSC to provide services for Medicaid managed care clients. The Medicaid managed care MCOs and dental plans cover the same services that Texas Medicaid covers for the Medicaid fee-for-service clients. Some plans may also elect to cover value-added services.

The principle objectives of Medicaid managed care are to emphasize early intervention and to promote improved access to quality care, thereby significantly improving health outcomes for the target population, with a special focus on prenatal and well-child care.

Higher use of medical services occurs when clients obtain nonurgent or emergent acute care through emergency rooms or access duplicate services for the same medical condition. In Medicaid managed care, clients assume more responsibility for their personal health care by choosing a health plan and primary care provider (PCP) and by making use of preventive primary care services. Eligible clients may also choose a dental plan and a main dentist. This collaborative approach to health-care delivery helps to reduce costs by eliminating duplicate services and unnecessary emergency and inpatient care.

Clients who are enrolled in Medicaid managed care may reside in metropolitan or rural areas. Medicaid managed care consists of the following programs:

- The STAR program uses MCOs to cover acute care services in select groupings of counties known as service areas (SAs). STAR is available statewide. The STAR program operates under a federal 1115 waiver.
- The STAR+PLUS program uses MCOs to cover integrated acute and long term services and supports in specific SAs. The STAR+PLUS program operates under a federal 1115 waiver.
- The STAR Health program uses an MCO to deliver health-care services to children who are in foster care throughout the state. STAR Health is administered by Superior HealthPlan Network and operates under a federal 1915(a) waiver. The STAR Health program only manages the health care of some of the children who are enrolled in foster care. Some foster care clients are enrolled in the Permanency Care Assistance (PCA) program and are not considered eligible for enrollment in Medicaid managed care.

- The NorthSTAR program is administered by the Department of State Health Services (DSHS). It uses a contracted BHO to provide behavioral health services in the Dallas service area. NorthSTAR operates under a federal 1915(b) waiver.
- Children’s Medicaid dental services are administered by dental plans that process dental authorization requests and claims for most Medicaid fee-for-service and Medicaid managed care clients who are 20 years of age and younger regardless of their medical benefit plan.

Refer to: Section 7, “Children’s Medicaid Dental Services” in this handbook for exceptions and additional information.

2.1 Managed Care Services

MCOs and dental plans administer almost all of the services that are rendered to Medicaid managed care clients, including, but not limited to, the following:

- Professional, inpatient facility, and outpatient facility medical services
- Prescription drug/pharmacy services.
- Children’s Medicaid dental services for most clients who are 20 years of age and younger.
- Orthodontia services.
- Services rendered to Medicaid managed care SSI clients.
- Value-added services that an individual MCO or dental plan elects to cover.

All questions about these services must be directed to the MCO or dental plan that administers the client’s Medicaid benefits. TMHP does not have access to the individual MCO or dental plan authorization and claims information.

2.1.1 Medical Services

Most medical service benefits including professional, inpatient, and outpatient services rendered to Medicaid managed care clients are administered by individual MCOs. Medical services include all those administered by TMHP for fee-for-service clients as well as any value-added services covered by the individual MCOs.

Some services rendered to Medicaid managed care clients are considered “carve-out” services. Carve-out services are administered and paid by TMHP and not by the client’s MCO.

Refer to: Section 8, “Carve-Out Services” in this handbook.

2.1.2 Prescription Drug/Pharmacy Services

Pharmacy services rendered to Medicaid managed care clients are administered and paid by the clients’ MCOs according to S.B. 7, 82nd Legislature, First Called Session, 2011.

Pharmacy providers must first be contracted with the Medicaid/Children’s Health Insurance Program (CHIP) Vendor Drug Program before they can contract with the MCOs.

Refer to: Subsection 2.2, “Provider Enrollment and Responsibilities” in this handbook.

Generally, there is no monthly prescription limit for managed care clients.

Refer to: The MCO that administers the clients Medicaid managed care benefits for information about prescription drug and pharmacy benefits.

Each MCO contracts with one Pharmacy Benefit Manager (PBM). The MCOs and PBMs must adhere to Medicaid preferred drug list (PDL) and HHSC Medicaid and CHIP formularies.

HHSC will manage the Texas Medicaid and CHIP formularies.

The MCOs will:

- Perform drug utilization review for managed care clients.
- Monitor pharmacy providers for compliance.
- Establish help lines for providers and clients.
- Ensure that all clients have access to a minimum of one network pharmacy:
 - Within 15 miles of the client's residence
 - With 24-hour coverage within 75 miles of the client's residence.

Important: *MCOs and PBMs cannot require clients to use a mail-order pharmacy.*

- Provide e-prescribing abilities to:
 - Verify client eligibility.
 - Review medication history.
 - Review formulary and PDL information.
- Process correct pharmacy claims submitted electronically within 18 days of submission

2.1.2.1 Prescription Drug Prior Authorizations

Prescribers may be required to request prior authorization for a prescription drug. The prescriber must contact the client's MCO or PBM and follow MCO or PBM guidelines and procedures for prior authorization requests.

Important: *TMHP does not have access to the MCOs' or PBMs' guidelines and procedures for prior authorizations. The provider must contact the MCOs or PBMs for information. Individual PBMs will have their own PA processes and telephone lines.*

The MCO must notify the prescriber's office of a prior authorization approval or denial:

- Within 24 hours of a request submitted by fax or web.
- Immediately for telephone requests.

Prior authorization is required for non-preferred drugs.

If the pharmacy cannot dispense the client's prescription because prior authorization is required but has not been requested, the pharmacy should contact the MCO or PBM to request prior authorization. The prescribing provider is required to submit certain prior authorization requests including, but not limited to, non-preferred drug prior authorizations.

2.1.2.1.1 Emergency 72-Hour Prescriptions

If the prescribing provider cannot be reached or is unable to request a prior authorization, the pharmacy should submit an emergency 72-hour prescription. The request for an emergency 72-hour prescription claim should not be used for routine and continuous overrides.

A 72-hour emergency prescription will be paid in full to pharmacy providers and does not count toward the three-prescription limit for adults who have not already received their maximum prescriptions for the month.

Reminder: *There is no prescription limit for clients who are 20 years of age and younger.*

Federal and Texas law require that a 72-hour emergency supply of prescribed medication should be dispensed any time a prior authorization is not available and the prescription must be filled without delay for a medical condition. This rule applies to non-preferred drugs on the Preferred Drug list and any drug for which prior authorization must be requested by the prescribing physician.

2.1.2.1.2 Formulary

The MCOs or PBMs is responsible for informing network providers about how to access the formulary and PDL.

Refer to: The Medicaid and CHIP formularies on the VDP website at www.txvendordrug.com and at www.epocrates.com for more information.

MCOs may also selectively contract with pharmacies for specialty drugs.

2.2 Provider Enrollment and Responsibilities

Important: *All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

Refer to: Section 1: Provider Enrollment and Responsibilities (*Vol. 1, General Information*) for more information about enrollment procedures.

“Appendix B: Vendor Drug Program” (*Vol. 1, General Information*) for more information about pharmacy enrollment.

2.2.1 Enrollment, Contracting, and Credentialing

Providers must be enrolled in Texas Medicaid before they can be contracted and credentialed by an MCO or dental plan.

Individual MCOs and dental plans have their own guidelines for contracting and credentialing providers.

Important: *Enrollment in Texas Medicaid does not guarantee that an MCO or dental plan will contract or credential a particular provider.*

Providers must refer all questions about contracting and credentialing to the MCO or dental plan that administers the clients’ managed care benefits. TMHP does not have access to the contracting and credentialing requirements for the individual MCOs and dental plans.

All questions about Texas Medicaid enrollment can be referred to the TMHP Contact Center.

Note: *Providers who render only carve-out services are not required to contract with Medicaid MCOs and dental plans.*

Refer to: Section 8, “Carve-Out Services” for a list of services that are carved out of the Medicaid Managed Care Program.

Subsection B.1, “Vendor Drug Program” (*Vol. 1, General Information*) for more information about pharmacy enrollment.

2.2.2 Online Provider Lookup (OPL)

Providers that participate in specific MCOs and dental plans are responsible for declaring themselves managed care providers on the OPL. Clients can search for providers using a particular county, service area, or name to find providers who participate in a managed care area.

Clients are able to search for providers contracted with the STAR+PLUS MCOs on the OPL. Links to the websites of the MCOs and dental plans are also provided through the OPL and enable clients to search each MCO's and dental plan's network of participating providers.

2.2.3 Terminated Enrollment

Texas Medicaid monitors provider claim activity. Providers that have not submitted a claim to Texas Medicaid or a Medicaid MCO or dental plan within an 18-month period are notified that their Texas Medicaid enrollment will be terminated at 24 months if they have not submitted any claims.

If a provider's Texas Medicaid enrollment is terminated, the provider's Medicaid managed care contracts with individual MCOs or dental plans will also be terminated.

To reactivate a TPI that has been terminated, the provider must complete the Texas Medicaid Provider Enrollment Application.

2.2.4 Excluded Entities and Providers

The Code of Federal Regulations (CFR) section 1003.102(a)(2) states that civil monetary penalties may be imposed against managed care entities (MCEs) that employ or enter into contracts with excluded individuals or entities to provide items or services to Medicaid clients. No Medicaid payments can be made to an MCE for any items or services directed or prescribed by an excluded physician or other authorized person if the MCE either knew or should have known of the exclusion. This prohibition applies even when the Medicaid payment itself is made to another provider, practitioner, or supplier that is not excluded.

2.2.5 Accounts Receivable

Providers that have outstanding accounts receivables on their weekly Remittance & Status (R&S) reports must settle them with TMHP even if they no longer submit claims to TMHP.

Payments from the MCOs and dental plans may be held until the debt with TMHP is resolved.

Providers can refund payments to TMHP as follows:

- If the provider no longer receives claim payments from TMHP, the provider must issue a check for the refund amount to TMHP. Payment options may be available. If a refund check is mailed to TMHP, the provider must also submit Form 7.2, "Texas Medicaid Refund Information Form."
- If the provider continues to receive claim payments from TMHP, a recoupment of the funds may be requested through the paper appeal process. If the provider requests a recoupment through the paper appeal process, the provider must not issue a check to TMHP. The refund amounts will be deducted from future payments, and the deductions will appear on the provider's R&S reports.

2.2.6 Educating Clients about Managed Care

Providers cannot enroll Medicaid clients; however, providers are encouraged to educate clients about Medicaid managed care.

Providers that participate in one or more Texas Medicaid managed care plans should follow these rules when educating clients:

- Providers may not influence clients to choose one MCO or dental plan over another.
- Providers must inform clients of all Medicaid managed care health plans and dental plans in which the providers participate.

- Providers and subcontractors may only directly contact potential clients with whom they have an established relationship.
- Providers may inform clients of special services offered by all Medicaid managed care health and dental plans in which the providers participate.
- Providers may inform clients of particular hospital services, specialists, or specialty care available in all plans in which the providers participate.
- Providers may assist a client by contacting a plan (or plans) to determine if a particular specialist or service is available, if the client requests this information.
- Providers may not influence clients based on reimbursement rates or methodology used by a particular plan.
- At the member's request, providers can provide the necessary information for the client to contact a particular plan but cannot promote any plan over another.
- In no instances can providers stock, reproduce, assist in filling out, or otherwise handle the enrollment form. Information can be provided as outlined on the previous page, and clients can be reminded that they can easily enroll over the telephone with the enrollment broker. However, the call must be made by the client, not by the provider or the provider's agent.
- Providers may assist clients with completing the Medicaid application.
- Providers may display stickers that indicate that they participate in a particular Medicaid managed care health or dental plan as long as they do not indicate anything more than "(health plan or dental plan) is accepted or welcomed here" (provided the sticker meets Medicaid/CHIP Marketing Guidelines regarding size limitations).
- Providers may display state-approved, health-related marketing materials in their offices, provided it is done equally for all MCOs and dental plans in which they participate. MCO and dental plan providers cannot give out or display plan-specific marketing items or giveaways to clients.
- **Important:** Providers must comply with their applicable licensing agency's laws and regulations, including any related to marketing and advertising, and any applicable state and federal laws and regulations, contractual requirements, and other guidance documents. Providers are encouraged to review the [Provider Marketing Guidelines](#) page of the TMHP website at www.tmhp.com.

2.3 General Information About Client Enrollment in Managed Care

Most of the clients who have been determined to be eligible for Texas Medicaid are first enrolled in fee-for-service. Specific client groups within the Texas Medicaid population are eligible for managed care based on certain established criteria. If the client is eligible for Medicaid managed care, the client will choose an MCO and PCP or a dental plan and main dentist or both. The managed care enrollment date is separate from the Medicaid eligibility date. In most cases, Medicaid managed care enrollment is not retroactive.

Refer to: The STAR, STAR+PLUS, STAR Health, and NorthSTAR sections of this handbook for exceptions.

Claim and authorization transactions for services rendered during the client's fee-for-service eligibility must be submitted to TMHP, and claim and authorization transactions for services rendered during the client's Medicaid managed care enrollment must be submitted to the appropriate entity (i.e., TMHP for carve-out services and the MCO or dental plan for managed care services).

If a client loses Medicaid eligibility and then regains eligibility, the client is automatically reassigned to the same health plan and PCP or dental plan that the client had before the client lost Medicaid eligibility.

Refer to: Subsection 2.4, “PCP/Main Dentist Guidelines for Medicaid Managed Care Clients” in this handbook.

Section 4: Client Eligibility (*Vol. 1, General Information*).

2.3.1 Managed Care Enrollment Broker

Medicaid clients who are eligible for STAR or STAR+PLUS choose an MCO and a PCP, and those eligible for Children’s Medicaid Dental Services choose a dental plan and a main dentist using the official state enrollment form or by calling the Enrollment Broker.

The Help Line (Enrollment Broker) is available 8 a.m. to 8 p.m., Central Time, Monday through Friday at:

- Telephone: 1-800-964-2777
- Telecommunications device for the deaf (TDD): 1-800-267-5008

2.3.2 Eligibility Verification Resources

The provider is responsible for verifying the client’s eligibility before providing services. The provider must also verify and abide by prior authorization or administrative requirements established by the MCO or dental plan.

Refer to: Section 4: Client Eligibility (*Vol. 1, General Information*) for more information.

The client’s managed care MCO and dental plan enrollment information can be verified by:

- Visiting the Your Texas Benefits card website at www.yourtexasbenefitscard.com or calling the help line at 1-855-827-3747.
- Checking the client’s health plan or dental plan ID card (if applicable).
- Calling the client’s health or dental plan.

The client’s managed care eligibility can also be verified using:

- The TMHP Automated Inquiry System (AIS) at 1-800-925-9126
- Third-party software that uses the TMHP EDI Gateway.
- Batched electronic verifications.
- National Council for Prescription Drug Programs (NCPDP) E1 transaction
- The E1 transaction is submitted through the pharmacy’s point-of-sale system.
- Vendor Drug Eligibility Verification Portal (EVP). EVP is a browser-based application that is free for all contracted pharmacy providers.

Refer to: Subsection 4.5.3, “Client Eligibility Verification” in Section 4: Client Eligibility (*Vol. 1, General Information*) for additional information about verifying client eligibility.

The Texas Medicaid Vendor Drug Program website at www.txvendordrug.com/claims/eligibility-verification.shtml for more information.

2.3.3 Client Rights

In Texas, Medicaid managed care clients have defined rights and responsibilities. Each health plan and PCP share the responsibility to ensure and protect client rights and to assist clients in understanding and fulfilling their responsibilities as plan clients.

Medicaid managed care clients have the right to:

- Be treated fairly and with dignity and respect.

- Know that their medical records and discussions with their providers will be kept private and confidential.
- Request changes to their medical records (if incorrect).
- A reasonable opportunity to choose a health-care plan and PCP (the doctor or health-care provider they will see most of the time and who will coordinate their care) and to change to another plan or provider in a reasonably easy manner. These opportunities include the right to:
 - Be informed of available health plans and PCPs in their areas.
 - Be informed of how to choose and change health plans and PCPs.
 - Choose any health plan that is available in their area and choose a PCP.
 - Change their PCP at any time for any reason.
 - Change health plans without penalty.
 - Be educated about how to change health plans or PCPs.
 - Know that doctors, hospitals, and others who provide care can advise clients about their health status, medical care, and treatment. The health plan cannot prevent them from giving clients this information, even if the care or treatment is not a covered service.”
 - Know that clients are not responsible for paying for covered services. Doctors, hospitals, and others cannot require clients to pay copayments or any other amounts for covered services.
- Ask questions and get answers about anything the client doesn’t understand, and that includes the right to:
 - Have their provider explain their health-care needs to them and talk to them about the different ways their health-care problems can be treated.
 - Be told why care or services were denied and not given.
- Consent to or refuse treatment and actively participate in treatment decisions, and that includes the right to:
 - Work as part of a team with their provider in deciding what health care is best for them.
 - Say yes or no to the care recommended by their provider.
- Utilize each available complaint and appeal process through the MCO and through Medicaid, receive a timely response to complaints, appeals, and fair hearings. These processes include the right to:
 - Make a complaint to their health plan or to the state Medicaid program about their health-care, provider, or health plan.
 - Receive a timely answer to their complaint.
 - Access the health plan appeal process and the procedures for doing so.
 - Request a fair hearing from the state Medicaid program and request information about the process for doing so.
- Timely access to care that does not have any communication or physical access barriers. They have the right to:
 - Have telephone access to a medical professional 24 hours a day, 7 days a week in order to obtain any needed emergency or urgent care.
 - Receive medical care in a timely manner.

- Be able to get in and out of a health-care provider's office, including barrier free access for persons with disabilities or other conditions limiting mobility, in accordance with the *Americans with Disabilities Act*.
- Have interpreters, if needed, during appointments with their providers and when talking to their health plan. Interpreters include people who can speak in their native language, assist with a disability, or help them understand the information.
- Be given an explanation they can understand about their health plan rules, including the health-care services they can get and how to get them.
- Not be restrained or secluded when doing so is for someone else's convenience, or is meant to force them to do something they are unwilling to do, or to punish them.

2.3.3.1 Advance Directives

Federal and state law require providers to maintain written policies and procedures for informing and providing written information to all adult clients who are 18 years of age and older about their rights under state and federal law, in advance of their receiving care (*Social Security Act* §§1902[a][57] and 1903[m][1][A]). The written policies and procedures must contain procedures for providing written information regarding the client's right to refuse, withhold, or withdraw medical treatment advance directives.

These policies and procedures must comply with provisions contained in 42 *Code of Federal Regulations* (CFR) §§434.28 and 489, SubPart I, relating to the following state laws and rules:

- A client's right to self-determination in making health-care decisions.
- The Advance Directives Act, Chapter 166, Texas Health and Safety Code, which includes:
 - A client's right to execute an advance written directive to physicians and family or surrogates, or to make a nonwritten directive to administer, withhold or withdraw life-sustaining treatment in the event of a terminal or irreversible condition.
 - A client's right to make written and nonwritten Out-of-Hospital Do-Not-Resuscitate Orders.
 - A client's right to execute a Medical Power of Attorney to appoint an agent to make health-care decisions on the client's behalf if the client becomes incompetent.
- The Declaration for Mental Health Treatment, Chapter 137, Texas Civil Practice and Remedies Code, which includes a Member's right to execute a Declaration for Mental Health Treatment in a document making a declaration of preferences or instructions regarding mental health treatment.

These policies can include a clear and precise statement of limitation if a participating provider cannot or will not implement a client's advance directive. A statement of limitation on implementing a client's advance directive should include at least the following information:

- A clarification of the provider's conscience objections.
- Identification of the state legal authority permitting a provider's conscience objections to carrying out an advance directive.
- A description of the range of medical conditions or procedures affected by the conscience objection.

A provider cannot require a client to execute or issue an advance directive as a condition for receiving health-care services. A provider cannot discriminate against a client based on whether or not the client has executed or issued an advance directive.

A provider's policies and procedures must require the provider to comply with the requirements of state and federal law relating to advance directives.

2.3.3.2 PCP/Main Dentist and Health/Dental Plan Changes

A client who is enrolled in a Medicaid MCO or dental plan may request a PCP or Main Dentist change at any time and for any reason. PCP or main dentist changes are processed by the MCO or dental plan.

Clients also have the right to change health or dental plans if other options are available in the service area in which the client resides. Plan change requests are processed by the enrollment provider.

Refer to: Subsection 2.4.3, “PCP and Main Dentist Changes” in this handbook.

2.3.4 Client Responsibilities

Medicaid managed care health plans and PCPs should help clients understand their responsibilities. These include the responsibility to:

- Learn and understand each right they have under Medicaid. That includes the responsibility to:
 - Learn and understand their rights under the Medicaid program.
 - Ask questions if they do not understand their rights.
 - Learn what choice of health plan is available in their area.
- Abide by the health plan and Medicaid managed care policies and procedures. That includes the responsibility to:
 - Learn and follow their health plan rules and Medicaid rules.
 - Choose their health plan and a PCP.
 - Make any changes in their health plan and PCP in the ways established by Medicaid managed care and by the health plan.
 - Keep their scheduled appointments.
 - Cancel appointments in advance when they cannot keep them.
 - Always contact their PCP first for nonemergency medical needs.
 - Be sure they have approval from their PCP before going to a specialist (except for self-referred services).
 - Understand when they should and should not go to the ER.
- Share information relating to their health status with their PCP and become fully informed about service and treatment options. That includes the responsibility to:
 - Tell their PCP about their health.
 - Talk to their providers about their health-care needs and ask questions about the different ways their health-care problems can be treated.
 - Help their providers get their medical records.
- Actively participate in decisions relating to service and treatment options, make personal choices, and take action to maintain their health. That includes the responsibility to:
 - Work as a team with their providers in deciding what health care is best for them.
 - Understand how the things they do can affect their health.
 - Do the best they can to stay healthy.
 - Treat providers and staff with respect.

2.4 PCP/Main Dentist Guidelines for Medicaid Managed Care Clients

In Medicaid managed care, eligible Medicaid clients choose a primary care provider (PCP) or a main dentist who will work with the client to coordinate the client's health care or dental services.

The managed care client's PCP/main dentist is responsible for the following:

- Furnishes primary-care related services
- Arranges for and coordinates referrals for all medically necessary specialty services
- Is available directly or through on-call arrangements 24 hours a day, 7 days a week for urgent or emergency care

Refer to: Subsection 2.4.4, "Continuous Access" in this handbook.

Primary care includes ongoing responsibility for preventive health or dental care, health or dental maintenance, treatment of illness and injuries, and the coordination of access to needed specialist providers or other services.

PCPs/main dentists can choose to contract with various MCOs or dental plans.

Provider types who are eligible to serve as a PCP include:

- Pediatricians
- Family/general practitioners
- Internists
- Obstetrician/gynecologists
- Advanced Practice Registered Nurses (APRNs) under the supervision of a physician
- Certified nurse-midwives (CNM) practicing under the supervision of a physician
- Physician assistants (PAs) practicing under the supervision of a physician
- Rural health clinics (RHCs)
- Federally Qualified Health Centers (FQHCs)
- Community Clinics
- Specialists willing to provide medical homes to clients who have special needs

The following provider types are eligible to serve as a main dentist:

- General dentist
- Pediatric dentist
- Federally qualified healthcare center (FQHC)

The PCP or main dentist either furnishes or arranges for most of the client's health-care or dental-care needs, including well-checkups, office visits, referrals, outpatient surgeries, hospitalizations, and health- and dental-related services.

Although PCPs are encouraged to assist clients in accessing these services, Medicaid managed care enrollees may self-refer for the following services:

- Emergency services
- Family planning
- THSteps medical services

- Immunizations
- Early Childhood Intervention (ECI) targeted case management
- Case Management for Children and Pregnant Women
- Obstetric or gynecological services
- School Health and Related Services (SHARS)
- Department of Assistive and Rehabilitative Services (DARS) case management
- DSHS case management
- Department of Aging and Disability Services (DADS) case management
- Behavioral health services (contact client's health plan for specific requirements)
- Vision care (including ophthalmologic or therapeutic optometry)

2.4.1 Enrolling as a PCP or Main Dentist

Various providers may be eligible to enroll in Medicaid managed care as primary care providers or main dentist. Providers must contact the individual Medicaid managed care health plans or dental plans for enrollment information.

2.4.2 PCP Requirements for THSteps Medical Services

THSteps providers must be enrolled with Medicaid to be reimbursed for services provided to clients. THSteps medical services are self-referred. Medicaid MCOs determine how their clients will access THSteps services. The MCO may require the client to go to an in-network THSteps provider or may allow the client to go to any Medicaid THSteps provider, whether or not they are in the MCO's network. Providers that render THSteps services must work in collaboration with the client's PCP to ensure continuity of care.

THSteps providers are required to bill claims as an exception to periodicity when the clients visit is outside of the periodicity schedule because of extenuating circumstances.

Refer to: Section 5, "THSteps Medical", subsection 5.3.7, "Exception-to-Periodicity Checkups", and subsection 4.2.10.1, "Exceptions to Periodicity" in the *Children's Services Handbook (Vol. 2, Provider Handbooks)* for more information about billing an exception-to-periodicity checkup.

2.4.3 PCP and Main Dentist Changes

PCP and main dentist changes may be requested or initiated by any of the following:

- A client who is enrolled in a Medicaid MCO or dental plan may request a PCP or main dentist change at any time and for any reason.
- The MCO or dental plan may reassign the client to another PCP or main dentist for any of the following reasons:
 - The PCP or main dentist is sanctioned by HHSC.
 - The PCP or main dentist exhibits a documented pattern of unacceptable quality of care.
 - The PCP or main dentist inappropriately reduces the client's right to access specialty services covered under Medicaid managed care.
 - The provider leaves Medicaid, retires, or dies.
- A provider may request a client be reassigned to another PCP or main dentist for any of the following reasons:
 - The client is not included in the PCP's or main dentist's scope of practice.

- The client is noncompliant with medical or dental advice.
- The client consistently displays unacceptable office decorum.
- The client's relationship with the PCP or main dentist is not mutually agreeable.

Any request by a provider to reassign a client to another PCP or main dentist must be processed through the applicable Medicaid MCO or dental plan. Before a request for reassignment can be initiated, reasonable measures must be taken to correct the client's behavior. Reasonable measures may include education or counseling by the MCO or dental plan staff. The MCO or dental plan will notify the client of the reassignment if all attempts to remedy the situation have failed. Providers should also notify the client about the reassignment in writing and send a copy of the notification to the MCO or dental plan.

The MCOs and dental plans can affect a PCP or main dentist change immediately if necessary; however, the Medicaid client eligibility verification systems may not immediately reflect the change.

2.4.4 Continuous Access

Continuous access is an important feature of Medicaid managed care. Twenty-four-hour PCP and main dentist availability enables clients to access and use services appropriately, instead of relying on ERs for after-hours care.

Continuous access can be provided through direct access to a PCP's or main dentist's office or through on-call arrangements with another office or service. Clients should be informed of the PCP's or main dentist's normal office hours and should be instructed how to access urgent medical care after normal office hours.

2.4.4.1 After-Hours Guidelines

PCPs and main dentists are required to have at least one of the following arrangements in place to provide 24-hour, 7-day a week access for managed care clients:

- The office telephone is answered after-hours by an answering service, which meets language requirements of the major population groups and which can contact the PCP, main dentist, or another designated provider. All calls answered by an answering service must be returned within 30 minutes.
- The office telephone is answered after normal business hours by a recording in the language of each of the major population groups served, directing the patient to call another number to reach the PCP, main dentist, or another provider designated by the PCP or main dentist. Someone must be available to answer the designated provider's telephone. Another recording is not acceptable.
- The office telephone is transferred after office hours to another location where someone will answer the telephone and be able to contact the PCP, main dentist, or another designated medical practitioner, who can return the call within 30 minutes.

2.4.4.2 Unacceptable Telephone Arrangements

The telephone answering procedures listed below are *not* acceptable:

- The office telephone is only answered during office hours.
- The office telephone is answered after-hours by a recording that tells clients to leave a message.
- The office telephone is answered after-hours by a recording that directs clients to go to an Emergency Room for any services needed.
- Returning after-hours calls outside of 30 minutes.

2.5 Cultural Competency and Sensitivity

HHSC values the diversity of the Texas Medicaid population and requires Medicaid managed care to provide programs to support clients from diverse cultural backgrounds:

- Helplines are staffed by both Spanish- and English-speaking customer service representatives who, at any time, may access a multi-language translation service for assistance.
- Articles in the *Texas Medicaid Bulletin* and educational workshops include topics that focus on cultural sensitivity and the need for culturally competent staff in PCP or main dentist offices.

Providers are expected to comply with the laws concerning discrimination on the basis of race, color, national origin, or sex.

2.5.1 Limited English Proficiency

Medicaid providers are required to provide services in the languages of the major Medicaid population groups they serve and to ensure quality appropriate translations. Title VI, section 601, of the *Civil Rights Act* of 1964 states that “no person in the United States shall on the basis of race, color, or national origin, be excluded from participating in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance.”

HHSC requires Medicaid providers to ensure persons with limited English proficiency have equal access to the medical services to which they are legally entitled.

Meeting the requirements of Title VI may require the PCP or main dentist to take all or some of the following steps at no cost or additional burden to the beneficiary with limited English proficiency:

- Have a procedure for identifying the language needs of patients/clients.
- Have access to proficient interpreters during hours of operation (MCOs or dental plans arrange interpreters).
- Develop written policies and procedures regarding interpreter services (MCOs or dental plans arrange interpreters).
- Disseminate interpreter policies and procedures to staff and ensure staff awareness of these policies and procedures and of their Title VI obligations to persons with limited English proficiency.

In order to meet interpretation requirements, providers may choose to incorporate into their business practice any of the following (or equally effective) procedures:

- Hire bilingual staff. (Does not apply to MCOs.)
- Hire staff interpreters. (Does not apply to MCOs.)
- Use qualified volunteer staff interpreters. (Does not apply to MCOs.)
- Arrange for the services of volunteer community interpreters—excluding the client’s family or friends. (Does not apply to MCOs.)
- Contract with an outside interpreter service. (MCO or dental plan must provide.)
- Use a telephone interpreter service.
- Develop a notification and outreach plan for beneficiaries with limited English proficiency.

It is the provider’s responsibility to ensure that interpretive services are available to his practice to meet requirements on limited English proficiency and communication disabilities. Interpretive services include language and American Sign Language (ASL) interpreters.

Language Line Services operate 24 hours a day, 7 days a week. Language Line Services provides over-the-telephone interpretation, video interpreting, document translation, interpreter testing and training, and other language products as well. Language Line Services charges a fee for the service. For complete details about their billing practices and services, providers should visit the Language Line Services website at www.language-line.com or call 1-800-752-6096.

Complaints and reports of non-compliance with Title VI regulations are handled by the Office for Civil Rights (OCR). Additional information, including the complete guidance memorandum on prohibition of discrimination against persons with limited English proficiency issued by the OCR, can be found on the Internet at www.hhs.gov/ocr/civilrights/resources/specialtopics/lep/index.html.

Note: MCOs are responsible for providing interpreter services.

2.6 Reimbursement

Providers must read and comply with Section 2: Texas Medicaid Fee-for-Service Reimbursement (Vol. 1, General Information).

Reimbursement for benefits that are administered by a Texas Medicaid MCO or dental plan is determined by the MCO or dental plan. Providers should contact the MCO or dental plan for additional information.

Note: The MCOs and dental plans are not limited to following the Texas Medicaid fee schedules. There may be some differences in reimbursement based on decisions made by the individual health and dental plans.

Texas Medicaid reimburses carve-out services according to the appropriate reimbursement methodology defined in the applicable Texas Medicaid Provider Procedures Manual handbook and the applicable Texas Medicaid fee schedules, which are available on the TMHP website at www.tmhp.com.

2.6.1 Coinsurance and Deductible Payments for Dual-Eligible Clients

Crossover claims for payment for deductibles or coinsurance according to current payment guidelines are processed by TMHP and not the client's MCO.

For clients who are enrolled in a Medicare Advantage Plan (MAP) and/or Special Needs Plan (SNP), crossover claims for coinsurance and deductible payments are processed by the MAP and/or SNP. These claims are not processed by TMHP.

2.6.2 Third Party Liability (TPL)

A third-party resource (TPR) is a source of payment for services other than Medicaid, Medicaid MCOs, Medicaid dental plans, the client, or non-TPR sources. Federal and state laws require that all reasonable measures be made to use a client's TPR or other insurance to pay for most medical services before Medicaid funds are used.

MCO and dental plan claims payments for services rendered to Texas Medicaid managed care clients are subject to this federal and state requirement. Texas Medicaid will collect overpayments based on claims data processed by the MCO or dental plan.

TPL includes payments from any of the following sources:

- Other health insurance, including assignable indemnity contracts
- Commercial MCOs (private insurance available through a source other than Texas Medicaid or Medicare)

A provider who furnishes services and participates in Texas Medicaid may not refuse to furnish services to an eligible client because of a third party's potential liability for the payment of the services.

2.6.2.1 TPL Overview and Provider Responsibilities for Medicaid Managed Care Clients

The Third Party Liability program helps reduce Medicaid costs by shifting claims expenses to third party payers. Third party payers are entities or individuals that are legally responsible for paying the medical claims of Medicaid clients. As a condition of eligibility, Medicaid clients assign their rights (and the rights of any other eligible individuals on whose behalf he or she has legal authority under state law to assign such rights) to medical support and payment for medical care from any third party to Medicaid. Federal law and regulations require states to ensure Medicaid clients use all other resources available to them to pay for all or part of their medical care before turning to Medicaid. Medicaid pays only after the third party has met its legal obligation to pay (i.e., Medicaid is the payer of last resort). A third party is any individual, entity, or program that is, or may be, liable to pay for any medical assistance provided to a client under the approved state Medicaid plan. Third parties may include any of the following:

- Private health insurance
- Employment-related health insurance
- Medical support from absent parents
- Casualty coverage resulting from an accidental injury such as automobile or property insurance (including no-fault insurance)
- Court judgments or settlements from a liability insurer
- State workers' compensation
- First party probate-estate recoveries
- Other federal programs (e.g., Indian Health, Community Health, and Migrant Health programs), unless excluded by statute

Refer to: [Other Insurance Form](#) on the TMHP website at www.tmhp.com.

[Tort Response Form](#) on the TMHP website at www.tmhp.com.

Note: *Adoption agencies or foster parents are no longer considered a TPR. Medicaid is primary in the STAR Health program (except when court-ordered to provide health insurance). This is an exception to the rule that Medicaid is payer of last resort. Providers must not bill other health insurance unless there is a court order that places this responsibility elsewhere. For THSteps or pharmacy TPL, providers must refer to the MCO, PBM, or dental plan that administers the client's managed care benefits for additional information.*

2.6.3 Health Insurance Premium Payment Program

Health Insurance Premium Payment (HIPP) Program clients access their benefits as Texas Medicaid fee-for-service clients and are not enrolled in managed care unless they choose to leave the HIPP program.

Note: *STAR Health program clients are not eligible to receive HIPP benefits and will continue to receive benefits through the STAR Health program. Some STAR+PLUS clients are eligible to receive HIPP benefits and continue to receive benefits through the STAR+PLUS program.*

Refer to: Subsection 4.13, "Health Insurance Premium Payment (HIPP) Program" in Section 4, "Client Eligibility" (Vol. 1, General Information).

2.6.4 Providers With Unsatisfied Medicaid Accounts Receivables

TMHP notifies MCOs when a provider has an outstanding accounts receivable balance.

Providers who have an outstanding balance should contact the TMHP Contact Center to make repayment arrangements, even if they are no longer submitting fee-for-service claims.

If providers do not make repayment arrangements, the MCO in which they participate may withhold future payments from them.

2.7 Managed Care Plan Changes

The MCO or dental plan changes can be affected any of the following ways:

- Client initiated.
- Medical or dental plan initiated

2.7.1 Client-Initiated Plan Changes

Clients have the right to change plans. Clients must call the Enrollment Broker at 1-800-964-2777 to initiate a plan change. If a plan change request is received before the middle of the month, the plan change is effective on the first day of the following month. If the request is received after the middle of the month, the plan change will be effective on the first day of the second month following the request, as shown below.

Example	
Request received on or before	Mid-May
Change effective	June 1
Request received after	Mid-May
Change effective	July 1

Note: All plan change requests must be processed by the Enrollment Broker.

The STAR Health Program only has one plan choice available. As a result, clients cannot change plans, but may change PCPs within their assigned STAR Health MCO.

2.7.2 Plan Administrator-Initiated Changes

Each health plan and dental plan has a limited right to request that a client be disenrolled without the client’s consent. HHSC must approve any request for such disenrollment.

Health plans and dental plans may request that a client be disenrolled for the following reasons:

- The client loans his or her Your Texas Benefits Medicaid card to another person to obtain services.
- The client continually disregards the advice of his PCP or main dentist.
- The client repeatedly uses the ER inappropriately.
- Client is disruptive, unruly, threatening, or uncooperative to the extent that client’s membership seriously impairs MCO’s, dental plan’s, or provider’s ability to provide services to the client or to obtain new patients, and the client’s behavior is not caused by a physical or behavioral health condition.
- Client refuses to comply with managed care restrictions (e.g., repeatedly using emergency room in combination with refusing to allow MCO to treat the underlying medical condition).
- For STAR+PLUS MCOs, under limited conditions, the MCO may request disenrollment of members who are totally dependent on a ventilator or who have been diagnosed with End Stage Renal Disease.

Before a request for disenrollment can be initiated, reasonable measures must be taken to correct the client’s behavior. Reasonable measures may include education or counseling conducted by health plan or dental plan staff. HHSC will notify the client in writing of the disenrollment if all attempts to remedy the situation have failed. HHSC will also notify the client in writing of the availability of appeal procedures and the HHSC fair hearing process.

Health plans, dental plans, and providers can not request a client's disenrollment because of an adverse change in the client's health or the utilization of services that are medically necessary for the treatment of a client's condition.

2.7.3 Managed Care Organization (MCO) Clients Who Transition to Medicaid Fee-For Service (FFS)

When clients transition from an MCO to FFS, providers can request that previously approved authorizations for Comprehensive Care Program (CCP) services, occupational therapy (OT), physical therapy (PT), private duty nursing (PDN), and speech therapy (ST) be transferred from the MCO to FFS.

2.7.3.1 Submission Guidelines

To consider the reimbursement of claims for services that were rendered on or after the MCO disenrollment date, TMHP must receive the request to transition the authorization from the MCO to FFS within the following time frames:

- Providers have three business days from the client's MCO disenrollment date to submit a request to TMHP to transfer the authorization for PDN and Skilled Nursing/Aide visit services from the MCO to FFS.
- Providers have five business days from the client's MCO disenrollment date to submit a request to TMHP to transfer the authorizations of all therapy services from the MCO to FFS.

2.7.3.2 Documentation Requirements

All of the requests to transfer the authorizations from the MCO to FFS must include:

- A copy of the authorization letter.
- All of the documentation that was sent in the original authorization request, including any physician orders that were used to determine the start of care. TMHP will accept the physician orders as the required documentation for the requested services.
- The completed CCP prior authorization form, Special Medical Prior Authorization (SMPA) form, or Home Health Plan of Care, whichever is applicable for the requested service. The form must include:
 - The dates of service and quantities that are being requested from TMHP, which must match the dates of service and quantities that were approved in the original authorization.
 - It is not necessary to obtain signatures or dates on the forms listed above when submitted to TMHP for the purpose of transferring an authorization from an MCO to FFS Medicaid.

Note: *Authorizations for services transferred from an MCO to FFS Medicaid are subject to retrospective review.*

TMHP will verify the client's eligibility, the dates of service, and the quantities requested.

If a request to transfer an authorization is submitted after the deadline, TMHP will process reimbursement claims as follows:

- Claims for services that were rendered before the date on which the transfer request was received will be denied as a late submission, and the provider will be notified of their administrative appeal rights through the Health and Human Services Commission (HHSC).
- Claims for services that were rendered on or after the date of receipt use the required information from the transferred authorization and will be processed as if the request was received in a timely manner.

If a client transfers from an MCO to FFS and the provider does not have an authorization letter from the MCO, TMHP will process the request to transfer the authorization based on established TMHP authorization submission guidelines for OT, PT, PDN, and ST services.

All new requests for rendered services must meet the documentation requirements.

For therapy services, the prescribing physician's signature is required unless one of the following from the prescribing physician is attached to the request: a signed and dated prescription, a dated written order, or a dated documented verbal order.

2.7.3.3 New Services and Extension of Services

For new services that occur after the client's MCO disenrollment change date, the provider is responsible for submitting all TMHP required paperwork and meeting all established submission guidelines for prior authorization.

Requests for the extension of services that occur after the MCO disenrollment change date must include all of the paperwork that is required by TMHP. The requests must be submitted within the following time frames:

- Within seven calendar days of the extension start of care for CCP-PDN
- No more than 30 days before the current authorization expires for all therapy services

2.7.3.4 Loss of Eligibility

If an MCO disenrolled a client and the client also loses Medicaid eligibility, providers must anticipate, if and when Medicaid eligibility is restored, that the client will initially be considered a Medicaid FFS client and will have a retroactive eligibility period.

All requests for services that require prior authorization and that occur during the client's retroactive eligibility period, must be submitted to TMHP following the process that is outlined in subsection 5.1.1, "Prior Authorization Requests for Clients with Retroactive Eligibility" in Section 5: Fee-for-Service Prior Authorizations (*Vol. 1, Provider Handbooks*).

If a client is retroactively disenrolled by an MCO, all of the services that are rendered by the provider during this retroactive disenrollment period (specifically from the date on which the client was eligible for FFS to the date of the client's MCO eligibility change) will be denied by TMHP, and the provider will be notified of their administrative appeal rights.

TMHP may consider services for the MCO transition beginning on the date of the client's MCO eligibility change date and going forward. TMHP uses the MCO transition process for the submission of paperwork and the processing of provider requests.

2.8 Authorizations for Managed Care Services

Authorization requests for services administered by the client's MCO or dental plan must be submitted to the client's MCO or dental plan according to the guidelines specific to the plan under which the client is covered.

Health plan prior authorizations do not transfer with a client between plans. For payment to be considered when a client changes plans, providers must obtain prior authorization through the plan under which the client is covered for the date of service.

Dental prior authorizations may transfer from one dental plan to another.

Note: Authorizations and claims for SSI clients who are enrolled in the STAR Program are submitted to the client's MCO or dental plan.

2.9 Claims Filing for Managed Care Services

Claims for services administered by an MCO or dental plan must be submitted to the client's MCO or dental plan. Providers may submit the managed care claims either of the following ways:

- Submit directly to the appropriate MCO or dental plan using the methods established by the MCO or dental plan

- Submit electronically to TMHP for routing to the appropriate MCO or dental plan

Providers who submit claims directly to the MCO or dental plan must follow the guidelines established by the MCO or dental plan for claims submissions. Providers must contact the appropriate MCO or dental plan for information about filing electronic or paper claims directly to the MCO or dental plan.

Refer to: The TMHP website at www.tmhp.com/Pages//Medicaid/Medicaid_Managed_Care.aspx for additional information, including MCO and dental plan contact information.

Providers also have the option to submit STAR, STAR+PLUS, STAR Health, and Children's Medicaid Dental Services claims to TMHP using TexMedConnect or the TMHP EDI Gateway. These claims are automatically routed to the appropriate MCO or dental plan based on the client's eligibility on file.

Note: *TMHP will not forward electronic claim submissions for pharmacy benefits, NorthSTAR, CHIP, or long term care services, and TMHP will not forward any managed care paper claim submissions. These submissions must be submitted directly to the MCO or dental plan that administers the client's Medicaid managed care benefits.*

To submit MCO and dental plan claims to TMHP for proper routing:

- Using TexMedConnect: Log in to the TMHP secure website and submit the claims to TMHP.
- Through EDI: Log in to the claims billing software and submit the claims through EDI to TMHP.

Note: *Each claim must contain services administered by a single entity, either all fee-for-service (including services for fee-for-service clients and carve-out services), all MCO services, or all dental plan services. Fee-for-service procedures and MCO procedures for the same client cannot be billed on the same claim. Each claim may be submitted individually or in a batch. Each batch may contain claims destined for a variety of plans including fee-for-service and managed care.*

Providers receive a message that indicates whether the claim was transmitted successfully or unsuccessfully. The provider can correct the submission and submit the claim until the transmission is successful.

Once the claims have been transmitted successfully, the portal will route each claim to the appropriate entity based on the client's eligibility on file. For MCO and dental plan claims, the provider will receive an electronic claim transmission report that indicates the claim was accepted or rejected by the MCO or dental plan:

- If the claim has been accepted, the provider will receive no more transmissions from TMHP. Notices for payment determinations and all payments will be sent to the provider by the MCO or dental plan according to their individual practices and procedures.
- If the claim has been rejected by the MCO or dental plan, the provider will receive an electronic claim status report, and will be able to correct the submission and submit the claim until the transmission is successful.

Important: *Providers must call the client's MCO or dental plan who processed the claim for information about the MCO's or dental plan's explanation of benefits (EOB), claims payment, claim rejection, how to correct a rejected claim, or any other questions about the MCO or dental plan claim guidelines and processes. TMHP does not have any information about the MCO's or dental plan's claims, benefits, or processes.*

Electronic claims submitted to TMHP require an NPI. If an electronic claim is submitted without an NPI, the claim will be denied. If a claim is submitted electronically with a TPI instead of the NPI, the claim will be denied.

For assistance with enrollment for filing eligible electronic claims to TMHP, providers can contact the TMHP Electronic Data Interchange (EDI) Help Desk at 1-888-863-3638.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (*Vol. 1, General Information*) for information on electronic claims submissions to TMHP.

Subsection 6.3.4, “National Drug Code (NDC)” in Section 6, “Claims Filing” (*Vol. 1, General Information*), for NDC requirements.

Reminder: *Claims for Medicaid managed care clients must be submitted to the MCO or dental plan in which the client is enrolled at the time of service (or date of admission for inpatient hospital claims). The MCO or dental plan, as a payor of last resort, does not determine payment based on the primary payor’s (i.e., TPR or other primary source of insurance) authorization of services or approval of hospital stays.*

Refer to: Subsection 2.6.2, “Third Party Liability (TPL)” in this handbook for additional information about primary insurance sources.

Refer to: The TMHP Medicaid Managed Care web page at www.tmhp.com/Pages/Medicaid/Medicaid_Managed_Care.aspx for additional information.

2.9.1 Newborn Claims Filing for MCO Services

Newborns are automatically assigned to the MCO in which the mother is enrolled at the time of the newborn’s birth. The effective date of the newborn’s enrollment is the same as the newborn’s date of birth. Claims for services provided to newborns should be filed with the mother’s MCO. Health-care providers should file newborn claims using the newborn’s Medicaid identification number as soon as the number is made available. Providers filing claims for services provided to newborns are still responsible for meeting the Medicaid filing deadlines, which in most cases is within 95 days of each date of service.

MCOs must pay providers for inpatient and professional services related to neonatal care for up to 48 hours after vaginal delivery and 96 hours after Cesarean delivery. (Prior authorizations and PCP assignment cannot be a reason for denial of claims.)

MCOs may require prior authorizations for hospital and professional services beyond the 48-hour and 96-hour time limits.

Authorization requests, utilization review questions, and claim status inquiries and appeals should be directed to the MCO in which the client is enrolled.

Note: *Telephone numbers and addresses for MCO claims submission and appeals can be found in the appropriate MCO provider policies and procedures manual for the appropriate service area.*

2.9.2 Filing Deadlines

The following table summarizes the filing deadlines that apply for MCO and dental plan claim submissions:

Submission	Filing Deadline
Initial submission submitted to the correct plan	95 days from the DOS
Initial submission submitted to the wrong plan	95 days of the date on the Remittance and Status (R&S) Report from the other (wrong) carrier (documentation of timely filing is required)
Initial submission to TPR (not the Medicaid MCO or dental plan)	95 days from the date of disposition by the other insurance resource
Initial submission for newborns	Submit to the client’s or mother’s MCO within 95 days of the DOS

Claims must be submitted to the appropriate entity whether TMHP or the MCO or dental plan within 95 days of the date of service. If the claim is not received by the MCO or dental plan within 95 days, the claim will be denied.

If the provider files with the wrong plan within the 95 day submission requirement (e.g., State Claims Administrator but not with the MCO or dental plan), the provider must resubmit the claim with documentation that shows the claim was submitted within the appropriate time frame but to the wrong plan. The MCO or dental plan must honor the initial filing date and process the claim without denying the resubmission for the sole reason of passing the filing timeframe. The provider must file the claim with the correct MCO within 95 days of the date on the Remittance and Status (R&S) Report from the other (wrong) carrier.

When a service is billed to a third party insurance resource, the claim must be refiled and received by the Medicaid MCO or dental plan within 95 days from the date of disposition by the other insurance resource. The MCO or dental plan will determine, as a part of its provider claims filing requirements, the documentation required when a provider refiles these types of claims with the MCO or dental plan.

MCOs and dental plans are subject to the requirements related to coordination of benefits for secondary payers in the Texas Insurance Code section 843.349 (e) and (f).

Refer to: Subsection 2.9, “Claims Filing for Managed Care Services” in this handbook for details about MCO claims processed by TMHP and not the client’s MCO.

2.9.3 System Requirements for MCO and Dental Plan Claim Submissions Through TMHP

Before a claim can be routed to the MCO or dental plan through TMHP’s electronic claims filing system, TMHP must certify that both the system the provider uses to submit the claim and the system the MCO or dental plan uses to receive the claim are compatible with the EDI 5010 standard.

Refer to: Subsection 3.7, “Third Party Vendor Implementation” in Section 3, “TMHP Electronic Data Interchanges (EDI)” (*Volume 1, General Information*), for information about EDI 5010 compatibility and certification.

MCOs or dental plans must also complete trading partner testing with TMHP to certify EDI 5010 compatibility and verify that routed claims can be received. Providers that submit claims through TMHP to MCOs or dental plans that have not completed trading partner testing will receive a claim rejection.

If the system requirements are not met, providers must submit claims directly to the MCO or dental plan using the MCO’s or dental plan’s established methods for claims submission. Providers must contact the client’s MCO or dental plan with questions about the MCO’s or dental plan’s billing guidelines and methods.

Note: Use of TMHP’s electronic claim submission system is optional. Providers may continue to submit claims directly to the appropriate MCO or dental plan. Regardless of submission method, adjudication and reimbursement for managed care services is the responsibility of the appropriate MCO or dental plan and not TMHP.

2.10 MCO/Dental Plan Appeals, Complaints, and Fair Hearings

Providers can submit their appeals directly to the MCO or dental plan that administers the clients’ managed care benefits.

Claims that were originally submitted to TMHP for routing to the appropriate MCO or dental plan can be appealed to TMHP using TexMedConnect or EDI. The appeals will be routed to the appropriate entity for processing.

Refer to: Subsection 5.4, “Complaints and Appeals” in this handbook for additional information about NorthSTAR complaints and appeals.

2.10.1 Medicaid Managed Care Complaints and Fair Hearings

Medicaid managed care providers may file complaints with HHSC if they find they did not receive full due process from the respective managed care health plan.

Appeals, grievances, or dispute resolution is the responsibility of each MCO or dental plan. Providers must exhaust the complaints or grievance process with their MCO or dental plan before filing a complaint with HHSC.

Refer to the respective MCO or dental plan for information about specific complaint policies and procedures. For NorthSTAR, see subsection 5.4, “Complaints and Appeals” in this section. For MCO appeals and fair hearing process, refer to the respective health plan’s policies and procedures. For paper appeals, refer to subsection 7.1.4, “Paper Appeals” in Section 7, “Appeals” (*Vol. 1, General Information*).

Once the MCO’s or dental plan’s complaints or grievance process has been exhausted, complaint requests may be sent to HHSC.

STAR, STAR+PLUS, STAR Health, and dental plan complaint requests may be emailed or mailed to HHSC:

- STAR, STAR+PLUS, and dental plan complaints may be emailed to HPM_Complaints@hhsc.state.tx.us.
- STAR Health complaints may be emailed to STAR.Health@hhsc.state.tx.us.
- STAR, STAR+PLUS, STAR Health, and dental plan complaints may be mailed to HHSC at the following address:

Health and Human Services Commission
 Health Plan Management
 4900 N. Lamar Blvd.
 MC H320
 Austin, TX 78751

3 STAR Program

The principal objectives of the STAR Program are to emphasize early intervention and to promote improved access to quality care thereby significantly improving health outcomes for the target populations. The special focus of the STAR Program is on prenatal and well-child care.

In the STAR Program, each MCO contracts with PCPs, hospitals, and other providers to create a health-care delivery network. Eligible clients whose enrollment in the STAR Program is mandatory are required to select a health plan and a PCP. The client selects the PCP from the MCO provider listing.

Refer to: The TMHP website at www.tmhp.com/Pages/Medicaid/Medicaid_Managed_Care.aspx for a current list of STAR Program service areas.

3.1 STAR Program Clients

HHSC has targeted these client groups within the Texas Medicaid population for STAR Program enrollment:

Medicaid Base Plan	Medicaid Cat.	Medicaid Type Prog.	Description	SA Group 1	SA Group 2
10	01, 03,04	12	SSI Manually Certified-with Medicare living in a Title XIX facility (also Medicare skilled nursing care)	X	X

Medicaid Base Plan	Medicaid Cat.	Medicaid Type Prog.	Description	SA Group 1	SA Group 2
10	01, 03, 04	12	SSI Manually Certified without Medicare living in a Title XIX facility (also Medicare skilled nursing care)	X	C
10	01, 03, 04	13	SSI Recipient-with Medicare living in a Title XIX facility (also Medicare skilled nursing care)	X	X
10	01, 03, 04	13	SSI Recipient without Medicare living in a Title XIX facility (also Medicare skilled nursing care)	X	C
10	01, 03, 04	14	MAO and deemed SSI with Medicare in a Title XIX facility	X	X
10	01, 03, 04	14	MAO and deemed SSI without Medicare in a Title XIX facility	X	C
13	1	3	MAO RSDI Increases-with Medicare	X	X
13	1	3	MAO RSDI Increases without Medicare	X	M
13	1	12	SSI Manually Certified-with Medicare	X	X
13	1	12	SSI Manually Certified - without Medicare	X	M
13	1	13	SSI Recipient-with Medicare	X	X
13	1	13	SSI Recipient-without Medicare	X	M
13	1	14	MAO and SSI Clients in 1915 (c) waiver programs-with Medicare	X	X
13	1	14	MAO and SSI Clients in 1915(c) waiver programs - without Medicare	X	M
13	1	18	Disabled Adult / Children denied SSI due to increase in SS benefits-with Medicare	X	X
13	1	18	Disabled Adult/Children denied SSI due to increase in SS benefits - without Medicare	X	M
13	1	22	Early Age Widows/Widowers-with Medicare	X	X
13	1	22	Early Age Widow/Widowers without Medicare	X	M
13	1	51	Rider 51 MAO-with Medicare	X	X

C = Conditional, V = Voluntary, M = Mandatory, X = Not Eligible
Group 1 SAs- Bexar, Dallas, El Paso, Harris, Hidalgo, Jefferson, Lubbock, Nueces, Tarrant, Travis
Group 2 SA - Medicaid Rural Service Area (Medicaid RSA)

Health-care providers must verify eligibility before medical care is provided to STAR Program clients, except in cases of emergency. In situations where emergency care must be provided, the client’s MCO and PCP should be determined as soon as possible.

The client’s Your Texas Benefits Medicaid card will provide the client’s managed care enrollment and health plan. Additionally, STAR MCOs provide their clients an MCO identification card. Both forms of identification should be required when determining whether or not the client is a STAR Program client.

Refer to: Subsection 4.2, “Eligibility Verification” in Section 4, “Client Eligibility” (*Vol. 1, General Information*).

3.2 STAR Client Enrollment

Eligible clients in a STAR service area choose an MCO and a PCP. To maximize enrollment, clients may enroll any of the following ways:

Method of Enrollment	Description
Telephone	Clients may call 1-800-964-2777. A customer care representative will provide essential education about the program and details needed for enrollment.
Mail	Clients may complete the STAR Program enrollment form and send the form to the address on the postage-paid, self-addressed envelope provided with the form. Enrollment forms are mailed to all eligible mandatory clients along with a brochure explaining the program and provider listings for each health plan.

Method of Enrollment	Description
Onsite	<p>Clients can meet with a STAR Program customer care representative at any of the following locations:</p> <ul style="list-style-type: none"> • Local HHSC offices • Women, Infants, and Children (WIC) classes • Community facilities • Enrollment events
Default	<p>Clients may be enrolled through an assignment process.</p> <p>If a client does not exercise the right to choose an MCO and PCP, the client will be assigned to a health plan and PCP. The following factors are considered when processing a default enrollment:</p> <ul style="list-style-type: none"> • Client’s past claims history, taking into account an established relationship with a participating PCP • Client’s age, sex, and geographic proximity to the PCP

STAR Example 1

Benefits under the STAR Program usually begin on the first day of the next month following the client’s selection of a managed care plan and PCP. The following example shows the managed care enrollment date for a client who selects a health plan and PCP before the designated cutoff date (approximately the 15th of the month):

Task	Date
Client certified for Texas Medicaid	January 1
Medicaid benefits begin	January 1
Client selects health plan and PCP (before the 15th of the month)	January 1
Managed care benefits begin	February 1

STAR Example 2

The following example shows the managed care enrollment date for a client who selects a health plan and PCP after the designated cutoff date (approximately the 15th of the month):

Task	Date
Client certified for Texas Medicaid	January 1
Medicaid benefits begin	January 1
Client selects health plan and PCP (after the 15th of the month)	January 20
Managed care benefits begin	March 1

3.2.1 Expedited Enrollment of Pregnant Women (Program Type 40)

A pregnant woman who applies for program type 40 has 16 days from the date of application to choose a STAR MCO. If she does not choose a STAR MCO, one will be chosen for her.

The Enrollment Broker contacts the client to begin the enrollment process and assists the client in selecting an MCO. The client may also contact the Enrollment Broker directly at 1-800-964-2777 (STAR Help Line). To protect continuity of care and client choice, the Enrollment Broker will work with each pregnant woman to select a health plan that includes her current prenatal care provider or to choose an obstetrical care provider that meets her needs.

Clients will be covered under Texas Medicaid fee-for-service until their Medicaid MCO coverage begins. When the client’s Medicaid managed care eligibility is first established, the client’s Your Texas Benefits Card may indicate that the client is enrolled in the STAR Program, but the MCO’s name may not appear on the card. To ensure proper billing, providers should call the Enrollment Broker at 1-800-964-2777 (STAR Help Line) to obtain the name of the client’s health plan. The health plan’s name should appear on the Your Texas Benefits Card the following month. However, client eligibility should always be verified at the time the service is to be rendered.

Women certified as Medicaid program type 40 may be retroactively enrolled in STAR. Women who are certified as Medicaid program type 40 on or before the 10th of the month will be enrolled in STAR beginning the first of the month of certification. Those who are certified after the 10th of the month will be on Texas Medicaid fee-for-service the month of certification and will be enrolled in STAR beginning the first of the month following the month of certification.

There are two exceptions to this rule:

- Women who are certified at any time in their estimated month of delivery will be enrolled in STAR the first of the following month (prospective enrollment).
- Women who are certified at any time in their actual month of delivery (if known by HHSC before certification) will be enrolled in STAR the first of the following month (prospective enrollment).

Important: Providers must verify the client’s plan and PCP information.

The following examples show when benefits begin in relation to certification:

Example 1: Woman Certified in Her 6th Month	
Client certified for Texas Medicaid	August 1
Medicaid benefits begin	August 1
STAR Program benefits begin	August 1

Example 2: Woman Certified in Her 6th Month	
Client certified for Texas Medicaid	August 12
Medicaid benefits begin	August 1
STAR Program benefits begin	September 1

Example 3: Woman Certified in Her 9th Month	
Client certified for Texas Medicaid	August 5
Medicaid benefits begin	August 1
STAR Program benefits begin	September 1

Within 14 days of enrolling in an MCO, a plan representative will contact the new client to help arrange the first prenatal appointment. Providers should also expect contact from the health plans to facilitate prenatal appointments for new clients. Physicians and other prenatal care providers are encouraged to make prenatal appointments within two weeks.

Note: Expedited enrollments of pregnant women (program type 40) into the STAR Program may be retroactive.

3.2.2 Enrollment of Newborns

In the STAR Program, newborns are automatically assigned to the STAR MCO the mother is enrolled with at the time of the newborn’s birth for at least 90 days following the date of birth unless the mother requests a plan change as a special condition. The effective date of the newborn’s enrollment is the same as the newborn’s DOB. STAR MCOs are responsible for all covered services provided to newborn members.

There may be a delay of up to several months from the DOB for a newborn to receive a Medicaid client number. Providers should check with each STAR MCO for claim filing requirements for newborns who do not yet have a Medicaid client number.

If the newborn has not yet been assigned a PCP, the Your Texas Benefits Medicaid card will indicate that the client is “Newborn” and instruct the provider to “Call Plan” to inquire about filing a claim.

Refer to: Subsection 2.9.1, “Newborn Claims Filing for MCO Services” in this section.

STAR Example

Enrollments of newborns born to mothers enrolled in STAR are retroactive to the newborn’s date of birth. The following example shows the managed care enrollment date for a newborn:

Task	Date
Client’s date of birth (mother enrolled in STAR)	January 3
Client certified for Texas Medicaid	February 1
Medicaid benefits begin	January 3 (retroactive to DOB)
STAR enrollment begins (mother’s STAR plan at time of birth)	January 3 (retroactive to DOB)

3.2.3 Timely Notification and Assignment of Medicaid ID for Newborns

Hospitals that submit their birth certificate information utilizing the DSHS, Bureau of Vital Statistics (BVS) electronic Certificate Manager software and the Hospital Report (Newborn Child or Children) (Form 7484), receive a rapid and efficient assignment of a newborn Medicaid identification number. This process expedites reimbursement to hospitals and other providers involved in newborn care including pharmacies providing outpatient prescription benefits for medically-needy newborns.

For more information or to comment on this process, call 1-512-458-7367.

Note: The enrollment of newborns that are born to mothers who are enrolled in an MCO on the date of birth are retroactive to the newborn’s date of birth (DOB).

3.3 STAR Program Benefits

STAR Program clients receive all the benefits of Texas Medicaid fee-for-service and the following additional benefits:

- Removal of the inpatient spell of illness limitation for adults
- Unlimited medically necessary prescription drugs for adults

3.3.1 Spell of Illness

STAR clients are not limited to the 30-day spell of illness. The spell of illness limitation is defined as 30 days of inpatient hospital care, which may accrue intermittently or consecutively. After 30 days of inpatient care is provided, reimbursement for additional inpatient care is not considered until the client has been out of an acute care facility for 60 consecutive days. All Medicaid clients who are 20 years of age and younger already are not limited to the 30-day spell of illness.

3.3.2 Prescriptions

STAR Program clients who are 21 years of age and older receive unlimited medically necessary prescription drugs. The elimination of the three prescription limit per month for adult clients enrolled in STAR allows the provider greater flexibility in treating and managing a client’s health-care needs. All Medicaid clients who are 20 years of age and younger already receive unlimited medically necessary prescription drugs.

3.3.3 National Drug Code

All STAR providers that submit professional or outpatient claims with physician-administered prescription drug procedure codes are required to use the associated NDC. Drug claims submitted with procedure codes in the “A” code series do not require an NDC. The NDC is only required on outpatient hospital claims and physician claims.

N4 can be entered before the NDC on claims. The NDC is an 11-digit number on the package or container from which the medication is administered.

Refer to: Subsection 6.3.4, “National Drug Code (NDC)” in Section 6, “Claims Filing” (*Vol. 1, General Information*).

4 STAR+PLUS Program

The STAR+PLUS Program is designed to improve access to care, provide care in the least restrictive setting, and provide more accountability and control on costs. The STAR+PLUS program integrates acute care and long-term care services and supports into a Medicaid managed care delivery system for SSI-eligible Medicaid clients.

In the STAR+PLUS Program, each MCO contracts with providers and delegated networks to create a health-care provider delivery network.

Refer to: The TMHP website at www.tmhp.com/Pages/Medicaid/Medicaid_Managed_Care.aspx for a current list of STAR+PLUS Program service areas.

4.1 STAR+PLUS Program Clients

HHSC has targeted these client groups within the Texas Medicaid population for STAR+PLUS Program enrollment:

Program Type	Description
	Enrollment for category 01, 03, 04 (SSI, aged, and blind and disabled clients), and the following program types are mandatory for STAR+PLUS:
02	Medicaid Buy-In
03	Denied SSI clients who are Medicaid-eligible under Pickle provisions.
12	SSI client
13	SSI client
14	STAR+PLUS Waiver (SPW) clients only <i>Note: Clients in program type 14 who are not determined eligible for the Home and Community-Based Services (HCBS) STAR+PLUS Waiver (SPW) will be excluded from participation in STAR+PLUS.</i>

Program Type	Description
18	Disabled adult children who are denied SSI coverage due to increase in Social Security benefits
22	Clients who are denied SSI coverage and who receive widow/widower Social Security benefits
Enrollment for category 03 and 04 (SSI blind and disabled children), and the following program type may enroll in a STAR+PLUS MCO.	
19	Medicaid and community-based waiver program for children who are 20 years of age and younger

Clients who are eligible for Medicaid under the SSI Program and who reside in a STAR+PLUS service area can enroll in STAR+PLUS. Enrollment in STAR+PLUS is mandatory for clients who are 21 years of age and older and voluntary for clients who are 20 years of age and younger.

SSI clients who meet the following conditions are required to select a PCP from the MCO provider directory:

- Reside in one of the STAR+PLUS service area counties
- Have selected an MCO
- Are not covered by Medicare

SSI clients who are also covered by Medicare (i.e., dual-eligible clients) must select a STAR+PLUS MCO to receive Medicaid community based long term care services.

Clients enrolled in any of the following Texas Department of Aging and Disability Services (DADS) programs can enroll in STAR+PLUS for acute care benefits, unless the client is dual eligible for Medicaid and Medicare:

- Community-based Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF-IID)
- Community Living Assistance and Support Services (CLASS)
- Deaf Blind with Multiple Disabilities (DBMD)
- Home and Community-Based Services (HCS)
- Texas Home Living (TxHmL)

Note: Enrollment in STAR+PLUS is mandatory for clients who are 21 years of age and older and voluntary for clients who are 20 years of age and younger.

Exception: Clients who receive Medicare Part B in addition to Medicaid, will remain in FFS for all Medicaid services.

4.1.1 STAR+PLUS Program Dual-Eligible Clients

Many STAR+PLUS clients are eligible for Medicaid and Medicare. STAR+PLUS MCOs are not at risk for the delivery of acute care services needed by dual-eligible clients.

Most STAR+PLUS clients with Medicare and Medicaid are Medicaid Qualified Medicare Beneficiaries (MQMBs). MQMBs receive Medicare benefits through a Medicare risk product (MCO) or Medicare fee-for-service insurance program. To reduce confusion, HHSC has mandated that STAR+PLUS MQMBs continue to receive all their acute care services as they do today, with Medicare being the primary payor and Texas Medicaid fee-for-service, through TMHP, the secondary payor.

MQMB clients qualify for Medicaid benefits that are not covered by Medicare.

Providers are to continue billing for Medicare acute care services through the client’s Medicare MCO or fee-for-service insurer following the rules of the Medicare insurer. If the client is in both a Medicare MCO and a Medicaid MCO, the client uses the Medicare PCP, and providers follow the Medicare MCO’s medical management rules for authorization, concurrent review, etc. MQMBs choose a Medicaid MCO but do not choose a Medicaid PCP.

HIPP Program clients access their benefits through Texas Medicaid fee-for-service, and are not enrolled in managed care unless they choose to leave the HIPP program.

Note: *STAR+PLUS clients who are receiving services through the 1915(c) waiver for individuals with intellectual and developmental disabilities (IDD) or residing in a community-based intermediate care facility for individuals with an intellectual disability or related conditions (ICF/IID) may also be enrolled in HIPP.*

Refer to: Subsection 4.11, “Medicare and Medicaid Dual Eligibility” in Section 4, “Client Eligibility” (*Vol. 1, General Information*) for more information and further MQMB instructions.

Subsection 4.13, “Health Insurance Premium Payment (HIPP) Program” in Section 4, “Client Eligibility” (*Vol. 1, General Information*).

4.1.2 Clients Who Are Ineligible For The STAR+PLUS Program

Clients who meet the following criteria are not eligible to enroll in STAR+PLUS and will remain in Texas Medicaid fee-for-service:

- Residents in a nursing facility
- Residents in an ICF-IID
- Residents of state hospitals or institutions for mental diseases
- Frail Elderly (or 1929B) Program clients
- In-Home and Family Support Program Services clients
- Qualified Medicare Beneficiaries (QMBs) that do not receive Medicaid benefits other than Medicare deductible or coinsurance liabilities according to current payment guidelines
- Undocumented aliens
- Clients who receive limited Medicaid benefits and do not qualify for participation in the VDP
- Clients who participate in one of the following Home and Community-Based Waiver programs (other than the Nursing Facility Waiver):
 - Medically Dependent Children’s Program (MDCP) Waiver Program
 - Mental Retardation Local Authority (MRLA) Waiver Program

4.2 STAR+PLUS Client Enrollment

Clients in a STAR+PLUS service area must choose an MCO and a PCP. To maximize enrollment, clients may enroll any of the following ways:

Method of Enrollment	Description
Telephone	<p>Clients may call 1-800-964-2777.</p> <p>A customer care representative will provide essential education about the program and details needed for enrollment.</p>

Method of Enrollment	Description
Mail	<p>Clients may complete the STAR+PLUS Program enrollment form and send the form to the address on the postage-paid, self-addressed envelope provided with the form.</p> <p>Enrollment forms are mailed to all eligible mandatory clients along with a brochure explaining the program and provider directories for each health plan.</p>
Onsite	<p>Clients can meet with a STAR+PLUS Program customer care representative at any of the following locations:</p> <ul style="list-style-type: none"> • Local HHSC offices • Women, Infants, and Children (WIC) classes • Community facilities • Enrollment events
Default	<p>Clients may be enrolled through an assignment process.</p> <p>If a client does not exercise the right to choose an MCO and PCP, the client will be assigned to a health plan and PCP. The following factors are considered when processing a default enrollment:</p> <ul style="list-style-type: none"> • Client’s past claims history, taking into account an established relationship with a participating PCP • Client’s age, sex, and geographic proximity to the PCP

Benefits under the STAR+PLUS Program usually begin on the first day of the next month following the client’s selection of a managed care plan and PCP.

STAR+PLUS Example 1

The following example shows the eligibility dates for a client who selects a health plan and PCP before the designated cutoff date (approximately the 15th of the month):

Task	Date
Client certified for Texas Medicaid	January 1
Medicaid benefits begin	January 1
Client selects health plan and PCP (before the 15th of the month)	January 1
Managed care benefits begin	February 1

STAR+PLUS Example 2

The following example shows the eligibility dates for a client who selects a health plan and PCP after the designated cutoff date (approximately the 15th of the month):

Task	Date
Client certified for Texas Medicaid	January 1
Medicaid benefits begin	January 1
Client selects health plan and PCP (before the 15th of the month)	January 20
Managed care benefits begin	March 1

4.2.1 Enrollment of Newborns

Children born to STAR+PLUS clients will be automatically enrolled with the STAR MCO in the service area operated by the same STAR+PLUS MCO if available. The effective date of the newborn's enrollment is the same as the newborn's date of birth. If the STAR+PLUS MCO does not also operate a STAR MCO in the service area, the newborn is placed into Texas Medicaid fee-for-service, and the mother is given the opportunity to choose a STAR MCO for the newborn.

Reminder: *Hospitals that submit the newborn's birth certificate information using the DSHS Bureau of Vital Statistics (BVS) electronic Certificate Manager software and the Hospital Report (Newborn Child or Children) (Form 7484), receive a rapid and efficient assignment of a newborn Medicaid identification number. This process expedites reimbursement to hospitals and other providers involved in newborn care including pharmacies providing outpatient prescription benefits for medically-needy newborns.*

For more information or to comment on the process for expedited assignment of a newborn Medicaid identification number, providers can call 1-512-458-7367.

4.3 STAR+PLUS Program Benefits

STAR+PLUS Program clients receive all the benefits of Texas Medicaid fee-for-service and the following additional benefits:

- Unlimited medically necessary prescription drugs for adults who are not dual-eligible
- A service coordinator

Refer to: Subsection 3.3.2, "Prescriptions" in this handbook for more information about prescription benefits.

Note: *Dual eligible adults continue to be limited to three prescriptions unless they have joined the Medicare MCO also offered by their STAR+PLUS MCO.*

4.3.1 Prescriptions

STAR+PLUS clients who are 21 years of age and older and do not receive Medicare receive unlimited medically necessary prescription drugs. The elimination of the three prescription limit per month for adult clients enrolled in STAR+PLUS allows the provider greater flexibility in treating and managing a client's health care needs. All Medicaid clients who are 20 years of age and younger already receive unlimited medically necessary prescription drugs.

4.3.2 Spell of Illness

The spell-of-illness limitation applies to clients in the STAR+PLUS Program.

A spell-of-illness is defined as 30 days of inpatient hospital care, which may accrue intermittently or consecutively. After 30 days of inpatient care is provided, reimbursement for additional inpatient care is not considered until the client has been out of an acute care facility for 60 consecutive days.

An individual may be discharged from and readmitted to a hospital several times, regardless of the admittance reasons, and still be considered to be in the same spell of illness if 60 days have not elapsed between discharge and readmission.

The spell-of-illness limitation does not apply in the following situations:

- A prior-approved solid organ transplant has an additional 30-day spell of illness, which begins on the date of the transplant.
- No spell-of-illness limitation exists for THSteps-eligible clients who are 20 years of age and younger when a medically necessary condition exists.
- The client is enrolled in the Medicaid managed care STAR program.

4.3.3 Service Coordination and Care Management

The MCO must furnish a service coordinator to all STAR+PLUS clients who request one, or when the MCO determines the need for a service coordinator through an assessment. A service coordinator is the person with primary responsibility for providing service coordination and care management to STAR+PLUS clients.

5 NorthSTAR Program

Behavioral health providers that practice in the Dallas SA must be enrolled as a network provider in the NorthSTAR BHO to be reimbursed for services provided to STAR and STAR+PLUS clients.

***Note:** Behavioral health providers that render services to clients in services areas other than the Dallas service area must enroll with each MCO to be reimbursed for services rendered to Medicaid managed care clients. Although managed care clients may self-refer for behavioral health services, providers should contact the client's MCO for specific in-network requirements.*

NorthSTAR provides behavioral health services (mental health, chemical dependency, and substance abuse treatment) for Medicaid clients who are enrolled in a BHO in the Dallas service area. NorthSTAR also serves a clinically and financially eligible non-Medicaid population.

NorthSTAR is known as a *behavioral health carve-out* of the STAR and STAR+PLUS Programs in the Dallas SA. Medicaid provides access to physical health care while NorthSTAR provides mental health and chemical dependency (behavioral health) services.

NorthSTAR provides easier access to a comprehensive array of behavioral health services and providers. The program's goal is to provide clinically necessary behavioral health services to enrollees, through a network of qualified and credentialed providers.

In the NorthSTAR Program, ValueOptions is the sole BHO and is responsible for contracting with providers and maintaining a behavioral health-care provider delivery network. The BHO also:

- Offers education and support to the provider network.
- Performs utilization management through authorization of services, concurrent review, and special studies.
- Performs quality assurance monitoring and activities.
- Provides client services including education and outreach.
- Processes claims.

In the STAR and STAR+PLUS Programs, clients select a PCP from among the providers who have contracted with a STAR or STAR+PLUS MCO. In the NorthSTAR Program, a client may have several different providers for different specialty behavioral health services. The BHO will arrange behavioral health services and make referrals to specific providers within the BHO network.

Providers are encouraged to coordinate care with physical health providers in the Medicaid managed care and Texas Medicaid fee-for-service programs. Behavioral health providers may do this by notifying the Medicaid managed care or Texas Medicaid fee-for-service provider. Behavioral health providers may also notify the BHO that the client is receiving services.

Providers interested in becoming a ValueOptions network provider can obtain additional information by contacting ValueOptions at 1-888-800-6799.

Note: *If a behavioral health provider practices in the Dallas SA, he must be enrolled as a network provider in the NorthSTAR BHO (ValueOptions) to provide services to NorthSTAR enrollees. Providers who serve NorthSTAR enrollees without being in the provider network or without prior authorization in nonemergency situations risk non-payment of claims.*

5.1 NorthSTAR Program Clients

Most Medicaid clients residing in the Dallas SA must enroll in NorthSTAR. All STAR and STAR+PLUS Program enrollees are subject to mandatory enrollment in NorthSTAR. Once enrolled in NorthSTAR, ValueOptions will coordinate enrollee behavioral health services.

Refer to: [Your Texas Benefits Medicaid Card \(English and Spanish\)](http://www.tmhp.com) on the TMHP website at www.tmhp.com.

Note: *NorthSTAR Program enrollment information is not reflected in the Medicaid ID verification, but enrollment can be confirmed by the BHO or the enrollment broker.*

Medicaid clients residing in the Dallas SA that are not eligible to enroll in a NorthSTAR BHO are:

- Medicaid clients living in a nursing facility
- Medicaid clients living in an ICF-IID
- Medicaid clients living in state hospitals’ Institutions for Mental Disease Over Age 65 Program
- Children who are in the custody of the Department of Family and Protective Services (DFPS) (in foster care)
- Certain Medicaid clients that are ineligible for NorthSTAR such as program type 55

When a Medicaid enrollee requests services, the provider should contact ValueOptions or the Enrollment Broker to verify enrollment in NorthSTAR. If the client is not currently enrolled in NorthSTAR, the provider may give the client the telephone number of the Enrollment Broker so the client may become enrolled in NorthSTAR.

The Enrollment Broker staff is trained to assist potential clients in their understanding of the STAR, STAR+PLUS, and NorthSTAR programs.

5.2 NorthSTAR Client Enrollment

Medicaid clients must enroll through the Enrollment Broker during regular business hours. If it is an emergency and after regular business hours, the NorthSTAR BHO can enroll a Medicaid client into NorthSTAR.

Medicaid clients may also mail in their enrollment using the NorthSTAR enrollment form. Non-Medicaid clients may be enrolled by NorthSTAR at designated enrollment sites.

NorthSTAR eligibility is retroactive to the NorthSTAR eligibility certification date. NorthSTAR does not require a PCP.

NorthSTAR Example

Task	Date
Client certified for Texas Medicaid in NorthSTAR SA	January 1
Medicaid benefits begin	January 1
Client enrolls in NorthSTAR	January 20
NorthSTAR benefits begin	January 1

5.3 NorthSTAR Program Benefits

ValueOptions is the NorthSTAR BHO in the Dallas SA that administers all NorthSTAR benefits and process authorizations and claims for NorthSTAR services.

5.3.1 Hospital Billing

In the Dallas SA, SSI clients are subject to mandatory enrollment in Medicaid managed care through the NorthSTAR Program. In some instances, general acute care hospitals treat a NorthSTAR client with a primary behavioral health diagnosis. In that instance, the general acute care hospital needs to seek authorization and reimbursement from ValueOptions using the CMS-1500 form for outpatient services and UB-04 CMS-1450 for inpatient services.

5.3.2 Behavioral Health Billing

Services provided under the STAR and STAR+PLUS Programs are billed to the STAR or STAR+PLUS MCO in which the client is enrolled. The STAR and STAR+PLUS Programs in the Dallas SA covers medically necessary physical health-care services and behavioral health services that are delivered by medical providers, such as primary care providers, FQHCs, and RHCs. STAR and STAR+PLUS also cover ambulatory laboratory and ancillary services required to diagnose or treat behavioral health conditions and psychological testing for certain non-behavioral health diagnoses.

The program-related forms are the CMS-1500 and UB-04 CMS-1450.

5.3.3 Prior Authorization Requirements

To receive payment for services provided to ValueOptions clients, providers must be enrolled with ValueOptions. (Exceptions include emergency care and medically necessary treatment episodes that began before the client joined NorthSTAR.) ValueOptions requires that the provider obtain prior authorization for most nonemergency services. If the provider does not obtain prior authorization, they may not get payment for services. These rules apply whether the provider's practice or facility is located in or out of the Dallas SA.

Exception: *Expedited enrollments of pregnant women (program type 40) into the STAR Program may be retroactive; and NorthSTAR has enrollment that is retroactive to the NorthSTAR eligibility certification date.*

5.4 Complaints and Appeals

A *complaint* is defined as any dissatisfaction expressed in writing by the provider, or on behalf of that provider, concerning any aspect of the health plan. The term *complaint* does not include a misunderstanding or a problem of misinformation that is resolved promptly by clearing up the misunderstanding or supplying the appropriate information to the provider's satisfaction.

Appeals and grievances, hearings, or dispute resolution is the responsibility of ValueOptions. Providers must exhaust the appeals and grievance process with ValueOptions before filing a complaint with NorthSTAR Provider Relations. Under the complaint process, NorthSTAR Provider Relations works with ValueOptions and providers to verify the validity of the complaint, determine if the established due process was followed in resolving appeals and grievances, and addresses other program/contract issues, as applicable. When filing a complaint, providers must submit a letter explaining the specific reasons they believe the final appeal decision by the NorthSTAR health plan is incorrect and copies of the following documentation as appropriate:

- All R&S Reports of the claims and services in question, if applicable
- Provider's claims and billing records (electronic or manual) related to the complaint
- Provider's internal notes and logs when pertinent
- Memos from the state or the health plan indicating any problems, policy changes, or claims processing

- Discrepancies that may be relevant to the complaint
- Other documents such as receipts (e.g., certified mail)
- Original date-stamped envelopes, in-service notes
- Minutes from meetings, etc., if relevant to the complaint

All NorthSTAR providers must exhaust the ValueOptions complaint and appeals process first. After this process is exhausted and if the outcome is unsatisfactory, NorthSTAR providers may file complaints or appeals with NorthSTAR Provider Relations at the following address:

Department of State Health Services
NorthSTAR Enrollee/Provider Relations
PO Box 149347
Mail Code 2012
Austin, TX 78714-9347

Quality of care concerns can be submitted to ValueOptions or NorthSTAR Provider Relations at the following address:

ValueOptions
Attn: Complaint and Grievance Coordinator
1199 South Beltline, Suite 100
Coppell, TX 75019

Refer to: Subsection 7.1.4, “Paper Appeals” in Section 7, “Appeals” (*Vol. 1, General Information*) for more information on paper appeals.

6 STAR Health Program

The STAR Health program ensures that children taken into state conservatorship are able to receive all services they need immediately upon entry into conservatorship.

HHSC has selected Superior HealthPlan Network as the MCO administrator for this program. Superior HealthPlan is responsible for assigning a PCP to clients when they are enrolled in the STAR Health Program. Foster care families are given the opportunity to change their PCP after this initial assignment.

6.1 STAR Health Program Clients

All Medicaid clients in foster care are placed in this program with the following exceptions:

- Children adjudicated and placed in a Texas Youth Commission (TYC) or Texas Juvenile Probation Commission (TJPC) facility
- Children from other states who are placed in Texas Children in Medicaid-paid facilities such as children in nursing homes, ICF-IIDs, or State-Supported Living Centers
- Children who are dual eligible clients in Medicare and Medicaid
- Children who are active SSI-related Medicaid clients
- Children who are in state conservatorship who are placed outside of Texas
- Children who are in adoption assistance

Clients who participate in the Medicaid for Transitioning Foster Care Youth (MTFCY) program and the Former Foster Care in Higher Education (FFCHE) program are eligible for the STAR Health program.

The following table shows the age ranges for clients who may be eligible for the STAR Health program:

Group Clients Belong to	Age Ranges
Client under DFPS conservatorship	DFPS can retain conservatorship through the month of the client’s 18th birthday. (Eligibility ends the month conservatorship ends.)
Clients who voluntarily continue in a foster care placement after DFPS conservatorship ends	18 through 21 years of age (Eligibility ends the month of their 22nd birthday.)
Clients who are participating in the MTFCY program	18 through 20 years of age (Eligibility ends the month of their 21st birthday.)
Clients who are participating in the FFCHE program	21 through 22 years of age (Eligibility ends the month of their 23rd birthday.)

STAR Health members can gain eligibility on any day of the month. To ensure the accurate confirmation of STAR Health eligibility, it is essential that all health-care providers verify eligibility by contacting the STAR Health MCO. The STAR Health MCO receives updated eligibility information on a daily basis, so it will have the most current eligibility information.

The Department of Family and Protective Services (DFPS) Form 2085 as well as the Your Texas Benefits Medicaid card may also be used to verify eligibility in the STAR Health Program.

Newborns born to a mother who is enrolled in the STAR Health program are automatically enrolled in STAR Health.

Newborns born to a mother who is enrolled in STAR Health through the Former Foster Care in Higher Education (FFCHE) Program are not eligible to be enrolled in STAR Health.

Newborns that are taken into State conservatorship while still in the hospital will be enrolled in STAR Health on the date the State takes conservatorship.

6.2 STAR Health Client Enrollment

Benefits under STAR Health begin when the client is placed in conservatorship.

STAR Health Example

Task	Date
Client placed in conservatorship	January 26
Client certified for Texas Medicaid	January 26
Medicaid benefits begin	January 26
STAR Health benefits begin	January 26

6.3 STAR Health Program Benefits

STAR Health Program clients receive all the benefits of traditional Texas Medicaid as well as service coordination to assist in making appointments and accessing services; and service management to assist with managing the health care of those with ongoing and serious medical needs.

Refer to: “Appendix B: Vendor Drug Program” (*Vol. 1, General Information*) for information about outpatient prescription drugs.

Most Medicaid foster care claims are capitated services and must be submitted to Superior HealthPlan.

Refer to: Section 8, “Carve-Out Services” in this handbook for the list of non-capitated services that may be reimbursed by TMHP.

All THSteps dental, medical, vision, and mental health providers should submit claims for services rendered to foster care clients to Superior HealthPlan’s dental, vision, and mental health contractors.

For general provider information, contact STAR Health at 1-866-439-2042.

For authorizations, contact:

Contractor	Contact Information
Physical Health authorizations:	1-800-218-7508 (Fax 1-800-690-7030)
Cenpatico Behavioral Health authorizations:	1-866-218-8263 (Fax 1-866-534-5958)
Total Vision Health Plan (TVHP) vision services authorizations:	1-800-642-9488 (Fax 1-252-451-2140)
DentaQuest authorization:	Prior authorization requests must be sent to the following address: DentaQuest 12121 North Corporate Parkway Mequon, WI 53092 Fax: (262) 241-7150 or 1-888-313-2883 Telephone: 1- 888-308-9345 (provider line).

Note: HIPP program clients who are enrolled in STAR HEALTH should be removed from the HIPP program and continue to receive their benefits under the STAR Health program.

Refer to: Subsection 4.13, “Health Insurance Premium Payment (HIPP) Program” in Section 4, “Client Eligibility” (*Vol. 1, General Information*), for more information about outpatient prescription drugs that are provided by VDP contracted pharmacies.

“Appendix B: Vendor Drug Program” (*Vol. 1, General Information*) for information about VDP.

6.3.1 STAR Health Mental Health Rehabilitation Mental Health Claims Submissions

STAR Health providers must submit their mental health rehabilitation claims for Superior HealthPlan foster care clients to Cenpatico at the following address:

Cenpatico Claims
PO Box 6300
Farmington, MO 63640-3806

Providers should submit their electronic claims to one of the clearinghouses that are trading partners with Cenpatico. Information about these clearinghouses can be found on the Cenpatico website at www.cenpatico.com. Click **Providers**, click **Resources**, and then click **Electronic Transactions (EDI)**. Texas mental health providers can use the following:

Clearing House Trading Partner	Payer ID
Availity	68058
Emdeon	68053
Gateway EDI	68053
McKesson	68058
SSI	68053

For more information on the use of other clearinghouses, providers should call Cenpatico at 1-800-225-2573, extension 25525 or visit the Cenpatico website at www.cenpatico.com.

The following procedure codes and modifier combinations must be submitted to Cenpatico for mental health rehabilitation services:

Procedure Code	Modifier
G0177	
G0177	HK
H0034	
H0034	HK
H0034	HQ
H0034	HK and HQ
H0034	HA
H0034	HA and HR or UK
H0034	HA and HQ

H2017	HQ and HK and TD
H2017	ET
H2017	HK and ET

The services listed above may be reimbursed when rendered to clients who satisfy the criteria of the mental health, priority population and who are determined to need inpatient rehabilitation. These services may be provided to a person with a single severe mental disorder (excluding mental retardation, pervasive developmental disorder, or substance use disorder) or a combination of severe mental disorders as defined in the *American Psychiatric Association Diagnostic and Statistical Manual of Mental Disorders*, Fourth Edition, Text Revision (DSM-IV-TR).

7 Children's Medicaid Dental Services

7.1 Overview

The principal objectives of children's Medicaid managed care dental services are to provide quality, comprehensive dental services in a manner that improves oral health of clients through preventative care, health education, and early intervention and to promote improved access to quality care, thereby significantly improving health outcomes for the target populations.

7.2 Children's Medicaid Dental Services Model

Clients primary and preventive Medicaid dental services are provided statewide through Medicaid managed care dental plans. Each Medicaid managed care dental plan is responsible for contracting with general dentists, pediatric dentists, and dental specialists to create a delivery network. Clients who receive their dental services through a Medicaid managed care dental plan are required to select a dental plan and a Main Dentist (or Main Dental Home provider or Dental Home). The client selects the Main Dentist from a provider directory.

A Main Dentist means a provider who has agreed with a Dental Contractor to provide a Dental Home to Members and who is responsible for providing routine preventive, diagnostic, urgent, therapeutic, initial, and primary care to patients, maintaining the continuity of patient care, and initiating referral for care. Provider types that can serve as Main Dental Home Providers are general dentist and pediatric dentist.

The First Dental Home Initiative is included in this model.

Refer to: Section 4.2.7, "First Dental Home" in the *Children's Services Handbook (Vol. 2, Provider Handbooks)*.

Services provided through children's Medicaid dental plans are separate from the medical services provided by the STAR, STAR+PLUS, and STAR Health managed care organizations.

7.3 Client Eligibility

Most children who are 20 years of age and younger will receive their dental services through Medicaid managed care dental plan.

Populations that will not receive services through the children's Medicaid managed care dental plans are:

- Medicaid recipients who are 21 years of age or older.
- Recipients who reside in an institution, i.e. nursing homes, state supported living centers, or ICF-IID.
- Recipients in the STAR Health Program (Managed Care Foster Care Program)

7.4 Client Enrollment

Clients choose a dental plan and Main Dentist. To maximize enrollment, the children's Medicaid dental services offer four alternative ways that clients can enroll:

- Telephone Enrollment. A client can enroll in a dental plan by calling 1-800-964-2777 (telecommunications device for the deaf (TDD): 1-800-267-5008) A customer care representative will provide essential education about the program and details needed for enrollment.
- Mail-in Enrollment. If calling is not convenient, a client may enroll by completing the an enrollment form and dropping it in the mail using the postage-paid, self-addressed envelope. Enrollment forms are mailed to all eligible mandatory clients along with information explaining the services and how to choose a Main Dentist.

- Onsite Enrollment. In addition to telephone and mail-in enrollment, clients can enroll by talking with customer care representative at a local HHSC office, at Women, Infants, and Children (WIC) classes, community facilities, or during enrollment events.
- Default Enrollment. The final method of enrollment is through an assignment process. If a client does not exercise the right to choose a dental and Main Dentist, the client will be assigned to a dental plan. After the default assignment is made, the dental plan will assign the client a Main Dentist.

7.5 Children’s Medicaid Dental Plan Choices

Children’s Medicaid dental services benefits are administered by two dental managed care organizations (i.e., dental plans) across the state of Texas.

Medicaid Managed Care Dental Plan	Dental Plan Provider Services
DentaQuest	1-800-685-9971
MCNA Dental	1-855-776-6262

7.6 Authorizations for Children’s Medicaid Managed Care Dental Services (Non-orthodontia Services)

Authorization requests for services administered by the client’s dental plan must be submitted to the client’s dental plan according to the guidelines specific to the plan under which the client is covered.

If a member is new to a dental plan and has an open authorization for covered dental services from TMHP or another HHSC-contracted Medicaid managed care dental plan, the dental plan must accept that authorization and cannot require additional authorization or review.

TMHP authorizes and processes dental and emergent orthodontic services for clients who are 20 years of age and younger but have not yet enrolled in a dental plan.

TMHP also authorizes services for the following clients:

- Dental services for Medicaid clients who are 21 years of age and older
- Dental and orthodontia services for all Medicaid clients, regardless of age, who reside in Medicaid-paid facilities such as nursing homes, state-supported living centers, or ICF-IIDs

Exception: STAR Health Foster Care Program clients receive dental and orthodontic services through DentaQuest.

7.7 Children’s Medicaid Dental Orthodontia Services

The Medicaid managed care dental plans will be responsible for prior authorizing, processing, and reimbursing any orthodontic services rendered to Texas Medicaid fee-for-service and managed care clients. Claims for orthodontic services that were initially authorized by TMHP but later transitioned to a managed care dental plan will be processed and reimbursed by the dental plan. Providers should check client eligibility to identify the managed care dental plan in which the client is enrolled.

TMHP will continue to process claims and claims adjustments for:

- Orthodontia services with dates of service on or before February 29, 2012.
- Clients who had orthodontia services that were prior authorized by TMHP and who lost Medicaid eligibility before March 1, 2012.
- Orthodontia services claims for clients who are ICF-IID residents.

8 Carve-Out Services

Some services are “carved out” of one or more of the managed care programs. Carved out services are those that are rendered to Medicaid managed care clients, but are processed for payment consideration by TMHP and not an MCO or dental plan.

The following table shows the services that are partially or completely carved out of the MCO and dental plan managed care program as well as services that are no longer carved out as of March 1, 2012:

Carve Out	STAR	STAR+PLUS	STAR Health
Nutritional products through WIC	TMHP	TMHP	TMHP
DSHS MH rehabilitation	TMHP	TMHP	MCO
County Indigent Health Care Program (CIHCP)	TMHP	TMHP	TMHP
Early Childhood Intervention (ECI) case management	TMHP	TMHP	TMHP
ECI specialized skills training	TMHP	TMHP	TMHP
Family planning services for Seton managed care health plan	TMHP	N/A	N/A
SHARS	TMHP	TMHP	TMHP
Elevated lead investigation services	TMHP	TMHP	TMHP
DSHS TB providers	TMHP	TMHP	TMHP
DSHS targeted case management	TMHP	TMHP	TMHP
DARS Blind Children’s Vocational Discovery and Development Program	TMHP	TMHP	TMHP
Case Management for Children and Pregnant Women	TMHP	TMHP	TMHP
Community First Choice (CFC)	TMHP	MCO	MCO
Personal Care Services (PCS)	TMHP	MCO	MCO
Medical Transportation	TMHP	TMHP	TMHP
Youth Empowerment Services (YES) Waiver	TMHP	TMHP	TMHP

Dental Carve Out	Children’s Medicaid Dental	STAR Health
THSteps Dental	Dental plan	MCO
Orthodontia for most clients who are 20 years of age and younger	Dental plan	MCO
Orthodontia for clients who turned 21 years of age before March 1, 2012, and whose services were authorized by TMHP before March 1, 2012	TMHP	TMHP
ICF-IID Dental Services	TMHP	TMHP

Note: Authorizations and claims for SSI clients who are enrolled in the STAR Program are submitted to the client’s MCO or dental plan.

Authorization requests for services that are carved out of the managed care program must be submitted to TMHP according to the fee-for-service guidelines that are established for the same service.

Claims filing for services that are carved out of the managed care program must be submitted to TMHP according to the fee-for-service guidelines that are established for the same service.

Providers should refer to the appropriate *Texas Medicaid Provider Procedures Manual* handbook for the applicable authorization request and claims filing guidelines.

8.1 Family Planning Carve-Out Services

Some family planning services are carved-out services for Texas Medicaid clients whose managed care benefits are administered through Seton Health Plan. These carved out services may be considered for payment by Texas Medicaid through TMHP if the service has been denied by the health plan as a family planning service.

All Seton Medicaid providers should submit family planning claims using the CMS-1500 paper claim form, or electronic equivalent, to the client's managed care health plan in order to receive the health plan's denial.

Important: *Services that are denied by the health plan for any other reason will not be considered for reimbursement by Texas Medicaid.*

8.1.1 Professional and Outpatient Claims

For affected claims to be eligible for reimbursement through TMHP, providers must do the following:

- 1) Submit the claim to the client's managed care health plan in order to receive the health plan's denial. Claims that are submitted electronically using TexMedConnect will automatically be forwarded to the client's Medicaid managed care plan.
- 2) Submit a paper claim to TMHP upon receipt of the health plan's denial. All applicable documentation must be included with the paper claim, including, but not limited to:
 - The health plan's EOB document that indicates the denial code with its description and the date the EOB was issued. The denial must indicate that the service was denied because it was a family planning service. The EOB date will be used to calculate the filing deadline for the claim submission.
 - All documentation for family planning services including Sterilization Consent Forms and Hysterectomy Acknowledgements Forms, and any other documentation that is required by Texas Medicaid.

Note: *A paper claim is required because TMHP automatically forwards electronic claims to the client's health plan without processing. Providers must comply with all filing deadlines unless otherwise specified below in this article.*

Refer to: *The Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks)* for Texas Medicaid guidelines for family planning services.

8.1.1.1 Claim Forms for Submission to TMHP

After receiving the health plan's denial, Medicaid family planning services providers should submit paper claim forms to TMHP as follows:

- Providers that contract with the DSHS Family Planning Program should submit claims on a 2017 paper claim form along with the health plan's denial.
- Providers that do not contract with the DSHS Family Planning Program should submit claims on a CMS-1500 paper claim form along with the health plan's denial.

Providers should submit the health plan's EOB document that indicates the denial code with its description and the date that the EOB was issued. The denial must indicate that the service was denied because it was a family planning service. The EOB date will be used to calculate the filing deadline for the claim submission.

Providers must comply with all filing deadlines.

The initial paper claim will be denied by TMHP. TMHP will automatically reprocess for payment consideration any claim that has been denied only with EOB 00081, “Services billed to TMHP in error. Bill HMO.”

TMHP will reprocess only those claims that were denied with EOB 00081 as the only EOB message on the claim. If a claim has been denied with other EOB messages in addition to EOB 00081, the provider must resolve the other reasons for denial through the standard appeals process before TMHP can reprocess the claim for payment of the carved-out services.

8.1.2 Inpatient Claims

For affected claims to be eligible for reimbursement through TMHP, providers must do the following:

- 1) Submit the claim to the client’s managed care health plan in order to receive the health plan’s denial. Claims that are submitted electronically using TexMedConnect will automatically be forwarded to the client’s Medicaid managed care plan.
- 2) Submit a paper claim to HHSC Administrative Appeals upon receipt of the health plan’s denial. All applicable documentation must be included with the paper claim, including, but not limited to:
 - The health plan’s EOB document that indicates the denial code with its description and the date the EOB was issued. The denial must indicate that the service was denied because it was a family planning service. The EOB date will be used to calculate the filing deadline for the claim submission.
 - All documentation for family planning services including Sterilization Consent Forms and Hysterectomy Acknowledgements Forms, and any other documentation that is required by Texas Medicaid.

HHSC Administrative Appeals will send the family planning services inpatient claims to TMHP for reprocessing. Medical portions of the claims will be denied by Texas Medicaid because they are covered under the client’s health plan and will not be considered for reimbursement through TMHP. The services that were denied by the health plan as family planning services will be considered for payment according to Medicaid guidelines.

Refer to: *The Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks)* for Texas Medicaid guidelines for family planning services.

Section 7: Appeals (*Vol. 1, General Information*) for additional information about administrative appeals.

8.1.3 Provider Working With Clients Enrolled in the Christus Health Plan

Christus Health Plan is entirely owned by a Catholic health system and is bound by the Ethical and Religious Directives for Catholic Health Care Services and will not directly or indirectly provide, arrange, or pay for the following family planning carve-out services:

- Family planning annual exams, outpatient visits, and laboratory and radiology services
- Contraceptive devices and related procedures
- Contraceptive drugs, supplies, and counseling (unless prescribed for purposes other than family planning)
- Sterilization and related procedures
- Abortions

The above carve-out services may be covered through Medicaid when provided by family planning providers that are not contracted through Christus Health Plan. Providers should submit their claims for these carve-out services to Christus Health Plan. The claims are then routed to HealthSmart for processing of the family planning carve-out services.

Refer to: The *Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks)* for family planning services.

9 PCCM and Managed Care Claims Processed by TMHP Before March 1, 2012

On or after March 1, 2012, TMHP will continue to process all transactions for PCCM and managed care claims that were submitted to TMHP before March 1, 2012.

9.1 PCCM Appeals

The following types of managed care claims must be appealed to TMHP and not the MCO or dental plan:

- Services that were carved-out before March 1, 2012
- Other managed care exceptions that were processed by TMHP before March 1, 2012

Providers can find benefit, limitation, and claims filing information in the appropriate Texas Medicaid Provider Procedures Manual or Texas Medicaid website article for the dates of service on the claim.

9.2 PCCM Cost and Reporting

Providers who rendered services to Texas Medicaid PCCM clients on or before February 29, 2012, must continue to prepare one copy of the applicable CMS Cost Report Form along with the required PCCM supplemental worksheets. The PCCM supplemental worksheets include the Inpatient PCCM D-4 worksheet, available from CMS, and the Outpatient PCCM D, Part V worksheet. A sample of the Outpatient PCCM D, Part V is available on the TMHP website at www.tmhp.com.

Hospitals must include inpatient and outpatient costs in the cost reports submitted annually.

Refer to: Subsection 2.2.2, “Cost Reimbursement” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*).

Subsection 3.7.4, “Provider Cost and Reporting” in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for additional information about cost reporting.

9.2.1 PCCM Outpatient Services Cost Reporting

PCCM Outpatient Services are subject to cost report settlements. PCCM outpatient services providers are not required to submit any additional forms or reports, because HHSC has required providers to submit the necessary PCCM supplemental worksheets along with the CMS form number CMS-2552-96, “Cost Report for Electronic Filing of Hospitals,” for hospital cost reports that end on or after October 1, 2007. The PCCM supplemental worksheets include the Inpatient PCCM D-4 worksheet and the Outpatient PCCM D, Part V worksheet.

The interim cost report settlement process will be completed within six months of the date on which the TMHP Medicaid Audit Department receives the workable cost report. The cost settlement is determined by comparing the total Medicaid-allowable costs to the provider’s interim payments for PCCM outpatient hospital services that were delivered during the reporting period. HHSC will then issue a notice of settlement that specifies the amount due to or from the PCCM outpatient hospital.

10 Other State Health-Care Programs

The services available under the following programs are administered by TMHP or other state programs and not by the client’s MCO or dental plan:

- Texas Women’s Health Program (TWHP) - HHSC/TMHP
- DSHS Family Planning Program contracted services - DSHS/TMHP
- Medicaid Breast and Cervical Cancer (MBCC) - HHSC
- Medicaid Medical Transportation Program (MTP)
- CHIP Perinatal Program - The CHIP Perinatal Program provides prenatal care to the unborn children of pregnant women up to 200 percent of the federal poverty level who are not eligible for other Medicaid programs or traditional CHIP. The professional services are administered by the health plan, and some inpatient services are administered by TMHP.

Refer to: Subsection 6.19, “Children’s Health Insurance Program (CHIP) Perinatal Claims” in Section 6, “Claims Filing” (*Vol.1, General Information*).

Claims and authorization requests for the services listed above must be submitted according to the established guidelines.

11 Contact Information

The following information can be used to communicate with TMHP:

Correspondence	Contact Information
All correspondence for services rendered to clients who are enrolled with a Texas Medicaid health/dental plan	Contact the client’s health/dental plan.
Claims, authorizations, and other TMHP correspondence for transactions that are processed by TMHP.	Volume 1, “Written Communication With TMHP,” for the list of post office box addresses that must be used for specific items.
HHSC contact information for STAR+PLUS, STAR, STAR Health, NorthSTAR, Children’s Medicaid dental services, and PCCM	1-800-252-8263
Questions about PCCM claims and appeals after March 1, 2012	1-800-925-9126

9.2 Services, Benefits, Limitations, and Prior Authorization 34

9.2.1 Teaching Physician and Resident Physician 34

 9.2.1.1 Teaching Physician Prerequisites 35

9.2.2 Substitute Physician 36

9.2.3 Aerosol Treatment 37

 9.2.3.1 Diagnostic Testing 38

9.2.4 Allergy Services 38

 9.2.4.1 Allergy Immunotherapy 39

 9.2.4.1.1 *Prior Authorization for Allergy Immunotherapy* 39

 9.2.4.1.2 *Limitations of Allergy Immunotherapy* 40

 9.2.4.2 Allergy Testing 40

 9.2.4.2.1 *Allergy Blood Tests* 41

 9.2.4.2.2 *Collagen Skin Test* 42

 9.2.4.2.3 *Prior Authorization for Collagen Skin Tests* 42

 9.2.4.2.4 *Ingestion Challenge Test* 42

9.2.5 Ambulance Transport Services - Nonemergency 42

9.2.6 Anesthesia 42

 9.2.6.1 Medical Direction by an Anesthesiologist 43

 9.2.6.2 Anesthesia for Sterilization 44

 9.2.6.3 Anesthesia for Labor and Delivery 44

 9.2.6.4 Anesthesia Provided by the Surgeon (Other Than Labor and Delivery) 45

 9.2.6.5 Complicated Anesthesia 45

 9.2.6.6 Multiple Procedures 45

 9.2.6.7 Monitored Anesthesia Care 45

 9.2.6.8 Reimbursement Methodology 45

 9.2.6.9 Anesthesia Modifiers 47

 9.2.6.9.1 *State-Defined Modifiers* 47

 9.2.6.9.2 *Modifier Combinations* 47

 9.2.6.9.3 *CRNA and AA Services* 48

 9.2.6.10 Prior Authorization for Anesthesia 48

 9.2.6.10.1 *Anesthesia for Medical Services* 48

 9.2.6.11 Claims Filing 48

 9.2.6.12 Anesthesia (General) for THSteps Dental 48

9.2.7 Abdominal Aortic Aneurysm Screening 48

9.2.8 Bariatric Surgery 48

 9.2.8.1 Prior Authorization for Bariatric Surgery 49

9.2.9 Bacillus Calmette-Guérin (BCG) Intravesical for Treatment of Bladder Cancer 51

9.2.10 Behavioral Health Services 52

9.2.11 Biopsy 52

9.2.12 Biofeedback Services 52

 9.2.12.1 Biofeedback Certification 52

 9.2.12.2 Prior Authorization for Biofeedback Services 53

9.2.13 Blepharoplasty Procedures 54

9.2.14 Bone Growth Stimulation 55

 9.2.14.1 Invasive Bone Growth Stimulation 55

 9.2.14.2 Non-invasive Bone Growth Stimulation 55

 9.2.14.3 Ultrasound Bone Growth Stimulation 56

 9.2.14.4 Reimbursement 56

9.2.15 Cancer Screening and Testing 56

 9.2.15.1 BRCA Testing 56

 9.2.15.2 Colorectal Cancer Screening 56

- 9.2.15.2.1 *Prior Authorization for Colorectal Cancer Screening* 58
- 9.2.15.3 Genetic Testing for Colorectal Cancer 58
 - 9.2.15.3.1 *Testing for Familial Adenomatous Polyposis*..... 59
 - 9.2.15.3.2 *Hereditary Nonpolyposis Colorectal Cancer (HNPCC)* 59
 - 9.2.15.3.3 *Prior Authorization for Genetic Testing for Colorectal Cancer* 60
- 9.2.15.4 Mammography (Screening and Diagnostic Studies of the Breast)..... 60
- 9.2.15.5 Prognostic Breast and Gynecological Cancer Studies..... 61
- 9.2.16 Capsulotomy 62
- 9.2.17 Cardiac Rehabilitation 63
 - 9.2.17.1 *Prior Authorization for Cardiac Rehabilitation*..... 64
 - 9.2.17.2 *Reimbursement* 64
- 9.2.18 Casting, Splinting, and Strapping 65
- 9.2.19 Cardiopulmonary Resuscitation (CPR) 66
- 9.2.20 Chemotherapy 66
 - 9.2.20.1 *Chemotherapy Procedure Codes*..... 67
- 9.2.21 Circumcisions 67
- 9.2.22 Closure of Wounds 68
- 9.2.23 Cochlear Implants 69
- 9.2.24 Continuous Glucose Monitoring (CGM)..... 69
 - 9.2.24.1 *Prior Authorization for Continuous Glucose Monitoring*..... 69
- 9.2.25 Developmental and Neurological Assessment and Testing..... 70
 - 9.2.25.1 *Assessment of Aphasia*..... 70
 - 9.2.25.2 *Developmental Screening* 71
 - 9.2.25.3 *Developmental Testing* 71
 - 9.2.25.4 *Neurobehavioral Testing*..... 71
 - 9.2.25.5 *12-Hour Limitation for Procedure Codes 96110, 96111, and 96116* 74
- 9.2.26 Diagnostic Tests 74
 - 9.2.26.1 *Ambulatory Blood Pressure Monitoring* 74
 - 9.2.26.2 *Ambulatory Electroencephalogram (Ambulatory EEG)* 75
 - 9.2.26.3 *Bone Marrow Aspiration, Biopsy*..... 76
 - 9.2.26.4 *Cytopathology Studies—Other Than Gynecological* 76
 - 9.2.26.5 *Echoencephalography*..... 76
 - 9.2.26.6 *Electrocardiogram (ECG)*..... 77
 - 9.2.26.6.1 *Prior Authorization for ECG* 78
 - 9.2.26.7 *Esophageal pH Probe Monitoring* 78
 - 9.2.26.7.1 *Prior Authorization* 79
 - 9.2.26.8 *Helicobacter Pylori (H. pylori)* 79
 - 9.2.26.9 *Myocardial Perfusion Imaging*..... 80
 - 9.2.26.10 *Pediatric Pneumogram* 80
- 9.2.27 Diagnostic Doppler Sonography 81
- 9.2.28 Evoked Response Tests and Neuromuscular Procedures 85
 - 9.2.28.1 *Autonomic Function Tests* 85
 - 9.2.28.2 *Electromyography and Nerve Conduction Studies* 86
 - 9.2.28.2.1 *EMG*..... 88
 - 9.2.28.2.2 *NCS*..... 88
 - 9.2.28.3 *Evoked Potential Testing*..... 89
 - 9.2.28.3.1 *Visual Evoked Potentials* 90
 - 9.2.28.4 *Motion Analysis Studies*..... 91
- 9.2.29 Extracorporeal Membrane Oxygenation (ECMO)..... 91
- 9.2.30 Family Planning 93
- 9.2.31 Gynecological Health Services 93

9.2.32 Hospital Visits 93

9.2.33 Hyperbaric Oxygen Therapy (HBOT) 93

 9.2.33.1 Prior Authorization for HBOT 94

9.2.34 Ilizarov Device and Procedure 96

9.2.35 Immunization Guidelines and Administration 96

 9.2.35.1 Administration Fee 97

 9.2.35.2 Documentation 99

 9.2.35.3 Vaccine Adverse Event Reporting System (VAERS) 99

9.2.36 Immunizations for Clients Birth through 20 Years of Age 100

 9.2.36.1 Vaccine Coverage Through the TVFC Program 100

 9.2.36.2 Vaccine and Toxoid Procedure Codes 101

9.2.37 Immunizations for Clients Who Are 21 Years of Age and Older 102

9.2.38 Postexposure Prophylaxis for Rabies 104

 9.2.38.1 Prior Authorization for Postexposure Rabies Vaccine 104

 9.2.38.2 Limitations for Postexposure Rabies Vaccine 104

 9.2.38.2.1 Obtaining Rabies Vaccine and HRIG from DSHS for PEP Use 105

9.2.39 Medications - Injectable 105

 9.2.39.1 Abatacept (Orencia) 108

 9.2.39.1.1 Prior Authorization for Abatacept (Orencia) 108

 9.2.39.2 Ado-trastuzumab entansine (Kadcyla) 109

 9.2.39.3 Alatrofloxacin Mesylate (Trovan) 109

 9.2.39.4 Alglucosidase Alfa (Myozyme) 110

 9.2.39.4.1 Prior Authorization for Alglucosidase Alfa (Myozyme) 110

 9.2.39.5 Amifostine 110

 9.2.39.6 Antibiotics and Steroids 112

 9.2.39.7 Blood Factor Products 112

 9.2.39.8 Botulinum Toxin Type A and Type B 113

 9.2.39.9 Chelating Agents 114

 9.2.39.9.1 Dimercaprol 114

 9.2.39.9.2 Edetate calcium disodium 114

 9.2.39.9.3 Deferoxamine mesylate (Desferal) 114

 9.2.39.9.4 Edetate disodium 115

 9.2.39.10 Clofarabine 115

 9.2.39.10.1 Prior Authorization for Clofarabine 115

 9.2.39.11 Colony Stimulating Factors (Filgrastim, Pegfilgrastim, and Sargramostim) 115

 9.2.39.12 Fluocinolone Acetonide (Retisert) 117

 9.2.39.13 Hematopoietic Injections 118

 9.2.39.13.1 Epoetin Alfa (EPO) 118

 9.2.39.13.2 Darbepoetin Alfa 119

 9.2.39.14 * Hydroxyprogesterone Caproate 119

 9.2.39.14.1 * Prior Authorization for Hydroxyprogesterone Caproate 119

 9.2.39.15 Immune Globulin 120

 9.2.39.16 Medroxyprogesterone Acetate (Depo Provera) 120

 9.2.39.17 Immunosuppressive Drugs 120

 9.2.39.18 Interferon 122

 9.2.39.19 Joint Injections and Trigger Point Injections 123

 9.2.39.20 Leuprolide Acetate (Lupron Depot) 124

 9.2.39.21 Omalizumab 124

 9.2.39.21.1 Prior Authorization for Omalizumab 124

 9.2.39.22 Implantable Infusion Pumps 125

 9.2.39.22.1 Prior Authorization for Implantable Infusion Pumps 126

- 9.2.39.22.2 *Implantation of Catheters, Reservoirs, and Pumps* 130
- 9.2.39.23 Trastuzumab 131
- 9.2.39.24 Vitamin B12 (Cyanocobalamin) Injections 131
- 9.2.39.25 Injection Administration 132

1 General Information

The information in this handbook is intended for Texas chiropractors, nurse practitioners (NP), clinical nurse specialists (CNS), certified nurse midwives (CNM), certified registered nurse anesthetists (CRNA), podiatrists, geneticists, maternity service clinics, physicians, and physician assistants. The handbook provides information about Texas Medicaid's benefits, policies, and procedures.

Important: *All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide healthcare services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers may also be subject to Texas Medicaid sanctions for failure, at all times, to deliver healthcare items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

Refer to: Section 1: Provider Enrollment and Responsibilities (*Vol. 1, General Information*).

Subsection 2.2, "Provider Enrollment and Responsibilities," in the *Medicaid Managed Care Handbook (Vol. 2, Provider handbooks)*.

Section 5, "THSteps Medical" in the *Children's Services Handbook (Vol. 2, Provider Handbooks)*.

For information on Advanced Practice Registered Nurses (APRNs), refer to the following subsections in this handbook:

Section 3, "Certified Nurse Midwife (CNM)"

Section 4, "Certified Registered Nurse Anesthetist (CRNA)" Subsection 4.1, "Enrollment"

Section 5, "Geneticists" Subsection 5.2, "Services, Benefits, Limitations, and Prior Authorization"

Section 8, "Nurse Practitioner (NP) and Clinical Nurse Specialist (CNS)" Subsection 8.1, "Enrollment"

Section 9, "Physician" Subsection 9.2, "Services, Benefits, Limitations, and Prior Authorization"

1.1 Payment Window Reimbursement Guidelines for Services Preceding an Inpatient Admission

According to the three-day and one-day payment window reimbursement guidelines, most professional and outpatient diagnostic and nondiagnostic services that are rendered within the designated timeframe of an inpatient hospital stay and are related to the inpatient hospital admission will not be reimbursed separately from the inpatient hospital stay if the services are rendered by the hospital or an entity that is wholly owned or operated by the hospital.

These reimbursement guidelines do not apply in the following circumstances:

- The professional services are rendered in the inpatient hospital setting.
- The hospital and the physician office or other entity are both owned by a third party, such as a health system.
- The hospital is not the sole or 100-percent owner of the entity.

Refer to: Subsection 3.7.3.8, “Payment Window Reimbursement Guidelines,” in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for additional information about the payment window reimbursement guidelines.

2 Chiropractic Manipulative Treatment (CMT)

2.1 Enrollment

To enroll in Texas Medicaid, a doctor of chiropractic medicine (DC) must be licensed by the Texas Board of Chiropractic Examiners and enrolled as a Medicare provider.

Providers cannot be enrolled if their license is due to expire within 30 days; a current license must be submitted.

2.2 Services, Benefits, Limitations, and Prior Authorization

CMT performed by a chiropractor licensed by the Texas State Board of Chiropractic Examiners is a benefit of Texas Medicaid.

CMT is limited to an acute condition or an acute exacerbation of a chronic condition for a maximum of 12 visits in a consecutive 12-month period, and a maximum of one visit per day. The 12-month period consists of 12 consecutive months, beginning with the date the client receives the first treatment.

If the condition persists more than 180 days from the start of therapy, the condition is considered chronic, and treatment is no longer considered acute.

CMT is not a benefit of Texas Medicaid for maintenance therapy when:

- Further clinical improvement cannot reasonably be expected from continuous ongoing care.
- The chiropractic treatment becomes supportive rather than corrective in nature.

CMT may be reimbursed when billed using procedure codes 98940, 98941, or 98942.

Procedure codes 98940, 98941, and 98942 must be submitted with the AT modifier. The AT modifier is used to identify treatment provided for an acute condition or an exacerbation of a chronic condition that persists for 180 days or less from the start date of treatment. Providers may file an appeal for a claim denied beyond the 180 days of treatment with documentation supporting that further clinical improvement can be reasonably expected, maximal improvement has not been reached, and further improvement has not ceased.

Procedure code 98940 will be denied as part of another service when billed for the same date of service as 98941 or 98942 by any provider.

Procedure code 98941 will be denied as part of another service when billed for the same date of service as 98942 by any provider.

Texas Medicaid does not reimburse chiropractors for X-ray services, office visits, injections, supplies, appliances, spinalator treatments, laboratory services, physical therapy, or other adjunctive services furnished by themselves or by others under their orders or directions. Additionally, braces or supports, even though ordered by a physician (doctor of medicine [MD] or doctor of osteopathy [DO]) and supplied by a chiropractor are not reimbursable items.

CMT is reimbursed only for a diagnosis of subluxation of the spine. The level of subluxation must be indicated by the appropriate diagnosis codes listed below:

Diagnosis Codes						
7390	7391	7392	7393	7394	7395	7398

2.2.1 Prior Authorization

Prior authorization is not required for CMT services.

2.3 Documentation Requirements

Manipulations must be provided in accordance with an ongoing, written treatment plan that supports medical necessity of an acute condition or an acute exacerbation of a chronic condition.

Documentation that supports medical necessity for the treatment plan includes all of the following:

- Diagnosis
- Region(s) treated
- Degree of severity
- Impairment characteristics
- Physical examination findings, X-ray, or other pertinent findings
- Specific statements of short- and long-term goals
- A reasonable estimate of when the goals will be reached (estimated duration of treatment)
- Frequency of treatment (number of times per week)
- Equipment and/or the techniques utilized

The treatment plan must be updated as the client's condition changes. Treatment plans must be maintained in the medical records and are subject to retrospective review.

2.4 Claims Filing and Reimbursement

2.4.1 Claims Information

Chiropractic services must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 paper claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply them.

When completing a CMS-1500 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (*Vol. 1, General Information*) for information on electronic claims submissions.

Section 6: Claims Filing (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions," in Section 6, "Claims Filing" (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

2.4.2 Reimbursement

The Medicaid rates for chiropractic manipulative treatment (CMT) are reimbursed in accordance with 1 TAC §355.8081 and 355.8085. See the [online fee lookup \(OFL\)](#) or the applicable fee schedule on the TMHP website at www.tmhp.com.

Texas Medicaid implemented mandated rate reductions for certain services. The Online Fee Lookup (OFL) and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

Note: *Certain rate reductions including, but not limited to, reductions by place of service, client type program, or provider specialty may not be reflected in the Adjusted Fee column.*

Refer to: Subsection 2.2, “Fee-for-Service Reimbursement Methodology,” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

3 Certified Nurse Midwife (CNM)

3.1 Provider Enrollment

To enroll in Texas Medicaid, a CNM must be licensed as a registered nurse and as an advanced practice registered nurse (APRN) by the Texas Board of Nursing (BON), and be authorized to practice as a nurse-midwife. A registered nurse under the multistate licensure compact may be licensed in another state but certified as an APRN for the state of Texas by the Texas BON. Texas Medicaid accepts a signed letter of certification from the Texas BON as documentation of appropriate licensure and certification for enrollment.

Refer to: The Texas Department of State Health Services (DSHS) website at www.dshs.state.tx.us/famplan for information about family planning and the locations of family planning clinics that receive funding from the DSHS Family Planning Program.

Providers cannot be enrolled if their license is due to expire within 30 days; a current license must be submitted.

All providers of laboratory services must comply with the rules and regulations of the Clinical Laboratory Improvement Amendments (CLIA). Providers not complying with CLIA are not reimbursed for laboratory services.

All APRNs (including CNMs, CRNAs, CNSs, and NPs) are enrolled within the categories of practice as determined by the Texas BON. CNSs and NPs must enroll as an APRN; CNMs and CRNAs may enroll using their specific titles.

A CNM must identify the licensed physician or group of physicians with whom there is an arrangement for referral and consultation if medical complications arise. Upon initial enrollment and upon re-enrollment, the CNM must complete and submit to TMHP, along with the Texas Medicaid Provider Enrollment Application, the Physician’s Letter of Agreement form that affirms the CNM’s referring or consulting physician arrangement. A separate letter of agreement must be submitted for each physician or group of physicians with whom an arrangement is made. This agreement must be signed by the CNM and the physician. The collaborating physician does not have to be a participating provider in Texas Medicaid. According to TAC, §354.1252 (3), if the collaborating physician or group is not a participating provider in Texas Medicaid, the CNM must inform clients of their potential financial responsibility. If the arrangement is changed or canceled, the CNM must notify TMHP Provider Enrollment in writing and a new letter of agreement must be completed and submitted to TMHP within 10 business days of the change or cancellation.

CNMs are encouraged to participate in or make referrals to family planning agencies.

Refer to: Section 1: Provider Enrollment and Responsibilities (*Vol. 1, General Information*) for more information about enrollment in Texas Medicaid.

Subsection 5.2, “Enrollment,” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for more information about enrollment in the THSteps Program.

Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA),” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

3.1.1 Enrollment in Texas Health Steps (THSteps)

CNMs may enroll as providers of THSteps medical checkups for newborns and adolescent females.

3.2 Services, Benefits, Limitations, and Prior Authorization

CNM providers may be reimbursed for family planning, obstetrical, neonatal, and primary care services.

3.2.1 Deliveries

CNM providers may be reimbursed for procedure code 59409, 59410, 59612, or 59614 for delivery services.

Refer to: Subsection 9.2.46, “Obstetrics and Prenatal Care,” in this handbook for billing requirements.

3.2.2 Newborn Services

Routine newborn care may be reimbursed to CNM providers.

Refer to: Subsection 5.3.9, “Newborn Examination,” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)*.

Subsection 9.2.45, “Newborn Services,” in this handbook for additional guidelines and limitations.

3.2.3 Prenatal and Postpartum Services

CNM and physician providers are limited to a combined total of 20 outpatient prenatal care visits and 1 postpartum care visit per pregnancy. Normal pregnancies are anticipated to require around 11 visits per pregnancy and high-risk pregnancies are anticipated to require around 20 visits per pregnancy. If more than 20 visits are medically necessary, the provider can appeal with documentation supporting pregnancy complications. The high-risk client’s medical record documentation should reflect the need for increased visits and is subject to retrospective review.

When billing for prenatal services, use modifier TH with the appropriate evaluation and management procedure code to the highest level of specificity.

Postpartum care provided after discharge must be billed using procedure code 59430. Only one postpartum visit is allowed per pregnancy.

Refer to: Subsection 9.2.46, “Obstetrics and Prenatal Care,” in this handbook for additional information about postpartum care.

3.2.4 Laboratory and Radiology Services

Laboratory (including pregnancy tests) and radiology services that are rendered during pregnancy must be billed separately from prenatal care visits.

3.2.5 Prior Authorization

Prior authorization is not required for any of these services except delivery in the home. For prior authorization of a home delivery and the related supplies (procedure code S8415), the CNM must submit a written request for prior authorization during the client’s third trimester of pregnancy. The CNM must include a statement signed by a licensed physician who has examined the client during the third

trimester and determined at that time that she is not at high risk and is suitable for a home delivery. Documentation must also include a plan for access to emergency transport for mother and neonate, if needed. Requests for home delivery prior authorizations must be submitted to the TMHP Medical Director at the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway, Suite 100
Austin, TX 78727
Fax: 1-512-514-4213

Claims submitted for home deliveries performed by a CNM without prior authorization will be denied.

3.2.6 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including CNM services.

CNM services are subject to retrospective review and recoupment if documentation does not support the service billed.

3.2.7 Claims Filing and Reimbursement

CNMs must bill maternity services in one of two ways: itemizing each service individually on one claim form and filing at the time of delivery (the filing deadline is applied to the date of delivery) or itemizing each service individually and submitting claims as the services are rendered (the filing deadline is applied to each individual date of service).

CNM services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 claim form all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

According to 1 TAC §355.8161(a), the Medicaid rate for CNMs is 92 percent of the rate paid to a physician (doctor of medicine [MD] or doctor of osteopathy [DO]) for the same service and 100 percent of the rate paid to physicians for laboratory services, X-ray services, and injections.

Note: CNM providers who are enrolled in Texas Medicaid as THSteps providers also receive 92 percent of the rate paid to a physician for THSteps services when a claim is submitted with their THSteps provider identifier as the billing provider.

Physicians who submit a claim using the physician's own provider identifier for services provided by a CNM must submit modifier SB on each claim detail if the physician does not make a decision regarding the client's care or treatment on the same date of service as the billable medical visit.

Physicians may be reimbursed 92 percent of the established reimbursement rate for services provided by a CNM if the physician does not make a decision regarding the client's care or treatment on the same date of service as the billable medical visit. This 92 percent reimbursement rate does not apply to laboratory services, X-ray services, and injections provided by a CNM.

Providers can refer to the [Online Fee Lookup \(OFL\)](#) or the applicable fee schedule on the TMHP website at www.tmhp.com.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled "Adjusted Fee" to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

Refer to: Subsection 4.1, “General Medicaid Eligibility,” in Section 4, Client Eligibility (*Vol. 1, General Information*) for information about crossover payments.

Section 3: TMHP Electronic Data Interchange (EDI) (*Vol. 1, General Information*) for information on electronic claims submissions.

Subsection 6.1, “Claims Information,” in Section 6, “Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions,” in Section 6, “Claims Filing” (*Vol. 1, General Information*).

Subsection 2.2, “Fee-for-Service Reimbursement Methodology,” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

4 Certified Registered Nurse Anesthetist (CRNA)

4.1 Enrollment

To enroll in Texas Medicaid, a CRNA must be licensed as a registered nurse (RN) and as an APRN by the Texas BON and must be currently certified by the Council on Certification of Nurse Anesthetists or the Council on Recertification of Nurse Anesthetists. An RN under the multistate licensure compact may be licensed in another state but certified as an APRN for the state of Texas by the Texas BON. Texas Medicaid accepts a signed letter of certification from the Texas BON as acceptable documentation of appropriate licensure and certification for enrollment.

Medicare enrollment is a prerequisite for enrollment as a Medicaid provider. A current copy of the provider’s Council on Certification of Nurse Anesthetists or Recertification of Nurse Anesthetists Certificate must be submitted with the Medicaid provider enrollment application.

Providers cannot be enrolled if their license is due to expire within 30 days; a current license must be submitted.

4.2 Services, Benefits, Limitations, and Prior Authorization

Medically necessary services that are performed by a CRNA are benefits if the services are within the scope of the CRNA’s practice as defined by state law; are prescribed, supervised by, and provided under the direction of a supervising physician (MD or DO), dentist, or podiatrist licensed in the state in which they practice and to the extent allowed by state law; and are provided under one of the following conditions:

- There is no physician anesthesiologist on the medical staff of the facility where the services are provided (e.g., rural settings).
- There is no physician anesthesiologist available to provide the services, as determined by the policies of the facility in which the services are provided.
- The physician, dentist, or podiatrist who performs the procedure that requires the services specifically requests the services of a CRNA.
- The eligible client who requires the services specifically requests the services of a CRNA.
- The CRNA is scheduled or assigned to provide the services according to the policies of the facility in which the services are provided.
- The services are provided by the CRNA in connection with a medical emergency.

Texas Medicaid does not reimburse the CRNA for equipment, drugs, or supplies.

Refer to: Subsection 4.2, “Services, Benefits, Limitations, and Prior Authorization,” in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for information about drugs, equipment and supplies.

4.2.1 Prior Authorization

Services performed by a CRNA are subject to the same prior authorization guidelines as services performed by other provider types.

4.3 Documentation Requirements

All services require documentation to support the medical necessity of the services rendered, including CRNA services. CRNA services are subject to retrospective review and recoupment if documentation does not support the service billed.

4.4 Claims Filing and Reimbursement

4.4.1 Claims Information

All CRNA services must be billed with a CRNA individual provider identifier or a CRNA group provider identifier. No payment for CRNA services will be made under a hospital or physician provider identifier.

CRNA services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (*Vol. 1, General Information*) for information on electronic claims submissions.

Section 6: Claims Filing (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions,” in Section 6, “Claims Filing” (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Subsection 9.2.6.9.3, “CRNA and AA Services,” in this handbook for more information on billing for CRNA services.

4.4.1.1 Interpreting the R&S Report

The Billed Qty field on the Remittance and Status (R&S) Report reflects only the number of time units TMHP processes. The Relative Value Units (RVUs) assigned for the procedure code are not shown in the Billed Qty field.

4.4.2 Reimbursement

A CRNA is reimbursed the lesser of either the CRNA’s billed charges or 92 percent of the reimbursement for the same service paid to a physician (MD or DO) anesthesiologist in accordance with 1 TAC §355.8221.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

Note: *Certain rate reductions including, but not limited to, reductions by place of service, client type program, or provider specialty may not be reflected in the Adjusted Fee column.*

Refer to: Subsection 9.2.6.8, “Reimbursement Methodology,” in this handbook for more information about flat fees and time based fees.

5 Geneticists

5.1 Enrollment

5.1.1 * Geneticists

Geneticists may enroll in Texas Medicaid as both a physician or physician group and as a geneticist. Enrollment as a geneticist allows enhanced reimbursement for specific procedure codes when a claim is submitted using the geneticist provider identifier.

A provider of genetic services that wishes to enroll in Texas Medicaid as a geneticist must complete the required Medicaid provider enrollment forms and enter into a written agreement with HHSC. Texas Medicaid provider enrollment forms are available from TMHP, and may be downloaded on the TMHP website at www.tmhp.com. Completed applications are submitted to:

Texas Medicaid & Healthcare Partnership
Provider Enrollment
PO Box 200795
Austin, TX 78720

Prior to enrollment, applicant qualifications for the provision of genetic services are verified and approved by DSHS. Verification and approval are administered through the Newborn Screening Unit. Basic contract requirements are as follows:

- The provider must be a clinical geneticist (MD or DO) who is board **eligible or board** certified by the American Board of Medical Geneticists (ABMG).

Note: *Board eligible providers are required to provide documentation reflecting completion of education requirements in a residency program in genetics.*

- The provider must use a team of professionals to provide genetic evaluative, diagnostic, and counseling services. The team rendering the services must consist of professional staff including the clinical geneticist and at least one of the following: nurse, social worker, medical geneticist, or genetic counselor.
- Upon DSHS approval, TMHP issues a provider identifier and a performing provider identifier for the provision of genetic services.
- Providers cannot be enrolled if their license is due to expire within 30 days; a current license must be submitted.

5.2 Services, Benefits, Limitations, and Prior Authorization

Genetic services may be used to diagnose a condition, optimize disease treatment, predict future disease risk, and prevent adverse drug response. Genetic services may be provided by a physician, physician assistant, nurse practitioner, or clinical nurse specialist and typically include one or more of the following:

- Comprehensive physical exams
- Diagnosis, management, and treatment for clients with genetically-related health problems
- Evaluation of family histories for the client and the client's family members
- Genetic risk assessment
- Genetic laboratory tests
- Interpretation and evaluation of laboratory test results
- Education and counseling of clients, their families, and other medical professionals on the causes of genetic disorders
- Consultation with other medical professionals to provide treatment

Pharmacogenetics encompasses the use of information encoded in DNA to help predict responses to medicines and thereby enhance the effectiveness and safety of medicines for individual clients. Testing for drug efficacy is not a benefit of Texas Medicaid, except as outlined in other sections of the *Texas Medicaid Provider Procedures Manual*.

5.2.1 Family History

It is important for primary care providers to recognize potential genetic risk factors in a client so that they can make appropriate referrals to a genetic specialist.

Obtaining an accurate family history is an important part of clinical evaluations, even when genetic abnormalities are not suspected. Knowing the family history may help health-care providers identify single-gene disorders or chromosomal abnormalities that occur in multiple family members or through multiple generations. Some genetic disorders that can be traced through an accurate family history include diabetes, hypertension, certain forms of cancer, and cystic fibrosis. Early identification of the client's risk for one of these diseases can lead to early intervention and preventive measures that can delay onset or improve health conditions.

Using a genetics-specific questionnaire helps to obtain the information needed to identify possible genetic patterns or disorders. The most commonly used questionnaires are provided by the American Medical Association and include the Prenatal Screening Questionnaire, the Pediatric Clinical Genetics Questionnaire, and the Adult History Form.

5.2.2 Genetic Tests

Diagnostic tests to check for genetic abnormalities must be performed only if the test results will affect treatment decisions or provide prognostic information. Tests for conditions that are treated symptomatically are not appropriate since the treatment would not change. Providers who are uncertain whether a test is appropriate are encouraged to contact a geneticist or other specialist to discuss the client's needs.

Any genetic testing and screening procedure must be accompanied by appropriate non-directive counseling, both before and after the procedure. Information must be provided to the client and family (if appropriate) about the possible risks and purpose and nature of the tests being performed.

The interpretation of certain tests, such as nuchal translucency, requires additional education and experience. Texas Medicaid supports national certification standards when available.

5.2.3 Laboratory Practices

For many heritable diseases and conditions, test performance and interpretation of test results require information about client race/ethnicity, family history, and other pertinent clinical and laboratory information. To facilitate test requests and ensure prompt initiation of appropriate testing procedures and accurate interpretation of test results, the requesting provider must be aware of the specific client information needed by the laboratory before tests are ordered.

To help providers make appropriate test selections and requests, handle and submit specimens, and provide clinical care, laboratories that perform molecular genetic testing for heritable diseases and conditions must educate providers that request services about the molecular genetic tests the laboratory performs. For each molecular genetic test, the laboratory must provide the following information:

- Indications for testing
- Relevant clinical and laboratory information
- Client race and ethnicity
- Family history
- Pedigree

Testing performed on a client to provide genetic information for a family member, and testing performed on a non-Medicaid client to provide genetic information for a Medicaid client are not benefits of Texas Medicaid.

5.2.4 Genetic Counselors

Genetic counselor services may be billed by a physician when the genetic counselor is under physician supervision and is an employee of the physician. Services provided by independent genetic counselors are not a benefit of Texas Medicaid.

5.2.5 Genetic Evaluation and Counseling by a Geneticist

A provider enrolled in Texas Medicaid as a geneticist may bill the following evaluation and management codes and receive an enhanced reimbursement. All other procedure codes must be billed under the geneticist’s individual, group, or laboratory provider identifier.

Procedure Code	Limitations
96040	None
99213	None
99214	None
99215	One per year, any provider
99244	One every three years, per provider
99245	One every three years, per provider
99254	One every three years, per provider
99255	One every three years, per provider
99402	One per pregnancy, per provider*
99404	One every three years, per provider
* Exception: Additional services are allowed when documentation of medical necessity to repeat a procedure accompanies a claim.	

One office consultation, performed by a geneticist, (procedure code 99244 or 99245) may be considered for reimbursement if procedure code 99244, 99245, 99254, or 99255 has not been submitted by and reimbursed to that geneticist in the previous three years.

Inpatient consultations, performed by a geneticist, (procedure codes 99254 and 99255) may be considered for reimbursement once every three years even if an office consultation has been reimbursed in the previous three years.

5.2.6 Prior Authorization

Prior authorization is not required for services billed by a geneticist.

5.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including genetic services. Genetic services are subject to retrospective review and recoupment if documentation does not support the service billed.

5.4 Claims Filing and Reimbursement

5.4.1 Claims Information

Genetic services must be submitted to TMHP in an approved electronic format or on a CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

TMHP representatives are available for provider questions about genetic services, such as reimbursement rates and procedures. For more information, call the TMHP Contact Center at 1-800-925-9126.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (*Vol. 1, General Information*) for information on electronic claims submissions.

Section 6: Claims Filing (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions,” in Section 6, “Claims Filing” (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

5.4.2 Reimbursement

Genetic services providers are reimbursed according to the established allowable maximum fee schedule. Providers can refer to the [OFL](#) or the applicable fee schedule on the TMHP website at www.tmhp.com.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

Refer to: Subsection 2.2, “Fee-for-Service Reimbursement Methodology,” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

6 Licensed Midwife (LM)

6.1 Provider Enrollment

To enroll in Texas Medicaid, an LM must be licensed as a midwife by the Texas Midwifery Board.

Providers cannot be enrolled if their license is due to expire within 30 days; a current license must be submitted.

An LM must identify the licensed physician or group of physicians with whom there is an arrangement for referral and consultation if medical complications arise. Upon initial enrollment and upon re-enrollment, the LM must complete and submit to TMHP, along with the Texas Medicaid Provider Enrollment Application, the Physician's Letter of Agreement form that affirms the LM's referring or consulting physician arrangement. A separate letter of agreement must be submitted for each physician or group of physicians with whom an arrangement is made. This agreement must be signed by the LM and the physician.

If the arrangement is changed or canceled, the LM must notify TMHP Provider Enrollment in writing and a new letter of agreement must be completed and submitted to TMHP within 10 business days after the change or cancellation.

The referral physician or group does not have to be a participating provider in Texas Medicaid. According to TAC, §354.1253(c), if the referral physician or group is not a participating provider in Texas Medicaid, the LM must inform clients of their potential financial responsibility.

Refer to: Section 1: Provider Enrollment and Responsibilities (*Vol. 1, General Information*) for more information about enrollment in Texas Medicaid.

6.2 Services, Benefits, Limitations, and Prior Authorization

LM providers may be reimbursed for obstetrical and newborn care services provided in a freestanding birthing center that is also enrolled as a Texas Medicaid provider.

6.2.1 Deliveries

LM providers may be reimbursed for procedure code 59409 for delivery services.

Refer to: Subsection 9.2.46, "Obstetrics and Prenatal Care," in this handbook for billing requirements.

6.2.2 Newborn Services

Newborn care procedure codes 99460 and 99463 may be reimbursed to LM providers.

Refer to: Subsection 9.2.45, "Newborn Services," in this handbook for additional guidelines and limitations.

6.2.3 Prenatal Services

LM providers must include modifier TH with the appropriate evaluation and management procedure code (99201, 99202, 99211, or 99212) for prenatal services.

LM providers are limited to a total of 20 outpatient prenatal care visits, performed in a birthing center, per pregnancy. Normal pregnancies are anticipated to require around 11 visits per pregnancy and high-risk pregnancies are anticipated to require around 20 visits per pregnancy. If more than 20 visits are medically necessary, the provider can appeal with documentation supporting pregnancy complications. The high-risk client's medical record documentation should reflect the need for increased visits and is subject to retrospective review.

If a client is discharged before delivery, LM providers may submit procedure code 99218, 99219, or 99220 for labor services only. Clinical documentation that clearly demonstrates the level of medical decision-making (i.e., moderate or complex) must be included in the client's medical record. All medical documentation is subject to retrospective review. Services that are not supported by the medical documentation are subject to recoupment.

Refer to: Subsection 9.2.46, "Obstetrics and Prenatal Care," in this handbook for billing requirements.

6.2.4 Prior Authorization

Prior authorization is not required for services billed by an LM.

6.2.5 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including LM services.

LM services are subject to retrospective review and recoupment if documentation does not support the service billed.

6.2.6 Claims Filing and Reimbursement

LM services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 claim form all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

According to 1 TAC §355.8161 (b), the Medicaid rate for LMs is 70 percent of the rate paid to a physician (doctor of medicine [MD] or doctor of osteopathy [DO]) for the same service.

Providers can refer to the [Online Fee Lookup \(OFL\)](#) or the applicable fee schedule on the TMHP website at www.tmhp.com.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled "Adjusted Fee" to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

7 Maternity Service Clinics (MSC)

7.1 Provider Enrollment

To enroll in Texas Medicaid, MSCs must submit a complete application and meet the following requirements:

- Must be a facility that is not an administrative, organizational, or financial part of a hospital.
- Must be organized and operated to provide maternity clinic services to outpatients.
- Must comply with all applicable federal, state, and local laws and regulations.
- Must employ or have a contractual agreement or formal arrangement with a licensed MD or DO who assumes professional responsibility for the services provided to the clinic's patients.
- Must adhere to the Bureau of Maternal and Child Health Maternity Guidelines, dated June 20, 1988, and subsequent revisions issued by the Texas Department of Health, unless otherwise specified by the department or its designee.

- Must ensure that services provided to each patient are commensurate with the patient’s risk assessment and are documented in the patient’s medical record.

The supervising physician’s license information must be provided. Providers cannot be enrolled in Texas Medicaid if their licenses are due to expire within 30 days.

Medicare certification is not a prerequisite for MSC enrollment.

7.1.1 Physician Responsibility

To meet the requirement to assume professional responsibility for the services provided to the clinic’s clients, the supervising physician must do the following:

- See the client at least once
- Prescribe the type of care to be provided or approve the client’s plan of care (POC)
- Periodically review the need for continued care (if the services are not limited by the prescription)

The physician must base the POC on a risk assessment completed by the physician or by licensed, professional clinic staff. The assessment must be based on findings obtained through a health history, laboratory or screening services, and a physical examination.

7.1.2 Case Management Services to High-Risk Individuals

An MSC that wants to bill and receive reimbursement for case management services to high-risk individuals including infants, pregnant adolescents, and women must meet the eligibility criteria for case management services. To be considered for reimbursement for case management for these clients, the MSC must enroll as a group in Case Management for Children and Pregnant Women, and each eligible case manager must enroll as a performing provider.

Refer to: Section 3, “Case Management for Children and Pregnant Women” in the *Behavioral Health, Rehabilitation, and Case Management Services Handbook (Vol. 2, Provider Handbooks)*, for case management services provider eligibility criteria.

7.2 Services, Benefits, Limitations, and Prior Authorization

Services billed by an MSC are those provided by a physician or by licensed, professional clinic staff and are determined to be reasonable and medically necessary for the care of a pregnant adolescent or woman during the prenatal period and subsequent 60-day postpartum period. MSC benefits do not include deliveries.

MSCs are limited to 20 prenatal care visits and 1 postpartum care visit per pregnancy. Normal pregnancies are anticipated to require around 11 visits per pregnancy and high-risk pregnancies are anticipated to require around 20 visits per pregnancy. If more than 20 visits are medically necessary, the provider can appeal with documentation supporting pregnancy complications. The high-risk client’s medical record documentation must reflect the need for increased visits and is subject to retrospective review.

Procedure codes in the following table are for prenatal and postpartum care visits:

Procedure Codes						
59430*	99201-TH	99202-TH	99203-TH	99204-TH	99205-TH	99211-TH
99212-TH	99213-TH	99214-TH	99215-TH			
* Procedure code 59430 is not submitted with modifier TH Note: The prenatal visits must be billed with modifier TH						

Providers must bill the most appropriate new or established prenatal visit code or postpartum visit code. New patient codes may be used when the client has not received any professional services from the provider, or another provider of the same specialty who belongs to the same group practice, within the past three years (36 months).

An MSC may be reimbursed for prenatal and postpartum care visits only. Hemoglobin, hematocrit, and urinalysis procedures are included in the charge for prenatal care and not separately reimbursed. Services other than prenatal and postpartum care visits will be denied. MSCs that are enrolled in Case Management for Children and Pregnant Women as a group may be reimbursed for these services under the group provider identifier assigned to their facility.

Medical services must be furnished on an outpatient basis by the physician or by licensed, professional clinic staff under the direction of the physician and must be within the staff's scope of practice or licensure as defined by state law. Although the physician does not necessarily have to be present at the clinic when services are provided, the physician must assume professional responsibility for the medical services provided at the clinic and ensure through approval of the POC that the services are medically appropriate. The physician must spend as much time in the clinic as is necessary to ensure that clients are receiving medical services in a safe and efficient manner in accordance with accepted standards of medical practice.

MSCs must follow the procedures outlined throughout this manual. All service, frequency, and documentation requirements are applicable.

Providers submitting charges for high-risk prenatal care must document the high-risk diagnosis on the claim form and document the condition in the client's medical record.

Refer to: Subsection 9.2.46.14.1, "HIV Testing," in this handbook for information about required HIV testing for pregnant women.

7.2.1 Initial Prenatal Care Visit Components

The following initial prenatal care visit components should be completed as early as possible in the client's pregnancy.

7.2.1.1 History

History includes OB-GYN, present pregnancy, medical and surgical, substance use, environmental, nutritional, psychosocial (including violence), and family support system.

7.2.1.2 Physical Examination

Physical examination includes height, weight, blood pressure; head, neck, lymph, breasts, heart, lungs, back, abdomen, pelvis, rectum, extremities, and skin; and uterine size, fetal heart rate, and location.

7.2.1.3 Laboratory Tests

The initial hematocrit or hemoglobin and each subsequent hematocrit or hemoglobin is included in the visit fee and is not separately reimbursable to MSCs.

The laboratory services listed may not be billed using the MSC provider identifier. These services may be ordered by MSC personnel and provided by a reference laboratory.

MSCs must supply the client's Medicaid number and the MSC provider identifier to the reference laboratory when laboratory services are requested.

The laboratory services requested by an MSC may include, but are not limited to, the following:

- Hemoglobin, hematocrit, or complete blood count (CBC)
- Urinalysis
- Blood type and Rh

- Antibody screen
- Rubella antibody titer
- Serology for syphilis
- Hepatitis B surface antigen
- Cervical cytology
- Other laboratory tests

The following tests may be performed at the initial prenatal care visit, as indicated:

- Pregnancy test
- Gonorrhea test
- Urine culture
- Sickle cell test
- Tuberculosis (TB) test
- Chlamydia test

As stated in the Health and Safety Code §81.090, screening for Hepatitis B virus infection, HIV, and Syphilis must be performed at the initial prenatal care visit. In addition, HIV testing must be performed in the third trimester. HBV and Syphilis must be performed at labor and delivery.

Multiple marker screens for neural tube defects must be offered if the client initiates care between 16 and 20 weeks.

7.2.1.4 Assessment

Assessment includes pregnancy, general health, medical, and psychosocial.

7.2.1.5 Plan

Plan includes pregnancy, preventive health, medical, and referral as indicated.

7.2.1.6 Education and Counseling

Education and counseling includes pregnancy, delivery, nutrition, breast-feeding, family planning, and preventive health. The education and counseling should also include the need for a medical home and information about THSteps medical and dental checkups for the client.

The complete physical examination may be completed at the second visit if the MSC's routine involves a two-stage initial evaluation.

7.2.2 Subsequent Prenatal Care Visits

The following is a recommended guide for the frequency of subsequent prenatal visits for a regular pregnancy:

- One visit every 4 weeks for the first 28 weeks of pregnancy
- One visit every 2 to 3 weeks from 28 to 36 weeks of pregnancy
- One visit per week from 36 weeks to delivery

More frequent visits may be medically necessary. Physicians, CNMs, and MSCs are limited to 20 prenatal care visits per pregnancy and 1 postpartum care visit per pregnancy after discharge from the hospital, without documentation of a complication of pregnancy.

Each subsequent visit must include the following:

- Interim History

- Problems
- Maternal status
- Fetal status

7.2.2.1 Physical Examination

The physical examination must include the following:

- Weight and blood pressure
- Fundal height, fetal position and size, and fetal heart rate
- Extremities

7.2.2.2 Laboratory Tests

Required laboratory tests include the following:

- Urinalysis for protein and glucose every visit

Note: The urinalysis for protein and glucose, hemoglobin, and hematocrit is included in the visit fee and is not separately reimbursable to MSCs.
- Hematocrit or hemoglobin repeated once a trimester and at 32 to 36 weeks of pregnancy
- Multiple marker screen for fetal abnormalities offered at 16 to 20 weeks of pregnancy
- Repeated antibody screen for Rh negative women at 28 weeks (followed by Rho immune globulin administration if indicated)
- Gestational diabetes screen at 24 to 28 weeks of pregnancy, one hour post 50 gram glucose load
- Blood sample for HBsAg screening at the first examination and visit followed by a second blood sample for HBsAg screening on admission for delivery
- Other laboratory tests as indicated by the medical condition of the client

7.2.3 Postpartum Care Visit

Postpartum care provided by MSCs must be billed using procedure code 59430. A maximum of 1 postpartum visit is allowed per pregnancy.

Refer to: Subsection 9.2.46, “Obstetrics and Prenatal Care,” in this handbook for additional information about postpartum care.

7.2.4 Prior Authorization

Prior authorization is not required for services rendered in MSCs.

7.3 Documentation Requirements

Each client must have a complete and accepted standard medical record with documentation for the initial visit with procedures, as well as each subsequent visit with procedures. Such records must be made available when requested by HHSC or TMHP for utilization and quality assurance reviews as required by federal regulations. The documentation record or a true copy or narrative abstract must be sent to the hospital of delivery by the client’s 35th week of pregnancy. The record must be made available to the client if the client transfers care to another institution. Records completed by licensed professional clinic staff under the direction of a physician must be signed by the supervising physician.

7.4 Claims Filing and Reimbursement

MSC services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms. When completing a CMS-1500 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (*Vol. 1, General Information*) for information on electronic claims submissions.

Section 6: Claims Filing (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions,” in Section 6, “Claims Filing” (*Vol. 1, General Information*). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

MSCs are reimbursed in accordance with 1 TAC §355.8081. Providers can refer to the [OFL](#) or the applicable fee schedule on the TMHP website at www.tmhp.com.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

Note: *Certain rate reductions including, but not limited to, reductions by place of service, client type program, or provider specialty may not be reflected in the Adjusted Fee column.*

8 Nurse Practitioner (NP) and Clinical Nurse Specialist (CNS)

For other APRNs, see Section 4, “Certified Registered Nurse Anesthetist (CRNA)” in this handbook for information regarding CRNAs, and Section 3, “Certified Nurse Midwife (CNM)” in this handbook for information about certified nurse midwives (CNMs).

8.1 Enrollment

To enroll in Texas Medicaid, an NP or CNS must be licensed as a registered nurse and as an APRN by the Texas BON. A registered nurse under the multistate licensure compact may be licensed in another state but certified as an APRN for the state of Texas by the Texas BON. Texas Medicaid accepts a signed letter of certification from the Texas BON as documentation of appropriate licensure and certification for enrollment.

Providers cannot be enrolled if their license is due to expire within 30 days.

All providers of laboratory services must comply with the rules and regulations of the Clinical Laboratory Improvement Amendments (CLIA). Providers not complying with CLIA are not reimbursed for laboratory services.

All APRNs (including CNMs, CRNAs, CNSs, and NPs) are enrolled within the categories of practice as determined by the Texas BON. CNSs and NPs must enroll as an APRN; CNMs and CRNAs may enroll using their specific titles.

Refer to: Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA),” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

Section 3, “Certified Nurse Midwife (CNM)” in this handbook for more information on CNM enrollment.

Section 4, “Certified Registered Nurse Anesthetist (CRNA)” in this handbook for more information on CRNA enrollment.

8.1.1 Enrollment in Texas Health Steps (THSteps)

APRNs, including NPs, and CNSs, who are recognized by the Texas BON can enroll as THSteps providers and provide checkup services within their scope of practice. Specific information is found in the *Children’s Services Handbook*.

Refer to: Subsection 5.2, “Enrollment,” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for more information on enrollment procedures.

8.2 Services, Benefits, Limitations, and Prior Authorization

Services performed by NPs and CNSs are benefits if the services meet the following criteria:

- Are within the scope of practice for NPs and CNSs, as defined by Texas state law.
- Are consistent with rules and regulations promulgated by the Texas BON or other appropriate state licensing authority.
- Are covered by Texas Medicaid when provided by a licensed physician (MD or DO).
- Are reasonable and medically necessary as determined by HHSC or its designee.

NPs and CNSs who are employed or remunerated by a physician, hospital, facility, or other provider must not bill Texas Medicaid for their services if the billing results in duplicate payment for the same services.

Physicians who submit a claim using the physician’s own provider identifier for services provided by an NP or CNS must submit modifier SA on each claim detail if the physician does not make a decision regarding the client’s care or treatment on the same date of service as the billable medical visit.

Benefit limitation information for services can be found in Section 9, “Physician” in this handbook, the *Children’s Services Handbook (Vol. 2, Provider Handbooks)*, and the *Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks)*.

Payment for supplies is not a benefit of Texas Medicaid. Costs of supplies are included in the reimbursement for office visits.

Refer to: Section 2, “Medicaid Title XIX family planning services” in the *Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks)*.

Section 9, “Physician” in this handbook.

Section 5: “THSteps Medical” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for more information on THSteps services.

8.2.1 Prior Authorization

Services performed by an NP or CNS are subject to the same prior authorization guidelines as services performed by other provider types.

8.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including NP and CNS services. NP and CNS services are subject to retrospective review and recoument if documentation does not support the service billed.

8.4 Claims Filing and Reimbursement

8.4.1 Claims Information

APRN services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (*Vol. 1, General Information*) for information on electronic claims submissions.

Section 6: Claims Filing (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions,” in Section 6, “Claims Filing” (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

8.4.2 Reimbursement

According to 1 TAC §355.8281, the Medicaid rate for NPs and CNSs is 92 percent of the rate paid to a physician (MD or DO) for the same professional service and 100 percent of the rate paid to physicians for laboratory services, X-ray services, and injections. When NPs or CNSs bill Medicaid directly for services they performed, they must use their individual provider identifier. If the services are performed by the NP or CNS but billed by a physician or physician group, the billing provider is the physician or physician group. Physicians may be reimbursed 92 percent of the established reimbursement rate for services provided by an NP or CNS if the physician does not make a decision regarding the client’s care or treatment on the same date of service as the billable medical visit. This 92 percent reimbursement rate does not apply to laboratory services, X-ray services, and injections provided by an NP or CNS.

Note: *NP and CNS providers who are enrolled in Texas Medicaid as THSteps providers also receive 92 percent of the rate paid to a physician for THSteps services when a claim is submitted with their THSteps provider identifier as the billing provider.*

Providers can refer to the [OFL](#) or the applicable fee schedule on the TMHP website at www.tmhp.com.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

Refer to: Subsection 1.1, “Provider Enrollment and Reenrollment,” in Section 1, “Provider Enrollment and Responsibilities” (*Vol. 1, General Information*).

Subsection 2.2, “Fee-for-Service Reimbursement Methodology,” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

9 Physician

9.1 Enrollment

9.1.1 Physicians and Doctors

To enroll in Texas Medicaid to provide medical services, physicians (MD or DO), doctors of dental surgery [DDS], and doctors of podiatric medicine (DPM) must be authorized by the licensing authority of their profession to practice in the state where the services are performed at the time they are provided.

Providers cannot be enrolled in Texas Medicaid if their licenses are due to expire within 30 days. A current Texas license must be submitted.

Important: *The Centers for Medicare & Medicaid Services (CMS) guidelines mandate that physicians who provide durable medical equipment (DME) products such as spacers or nebulizers are required to enroll as Texas Medicaid DME providers.*

All physicians except gynecologists, pediatricians, pediatric subspecialists, pediatric psychiatrists, and providers performing only Texas Health Steps (THSteps) medical or dental checkups must be enrolled in Medicare before enrolling in Medicaid. TMHP may waive the Medicare enrollment prerequisite for pediatricians or physicians whose type of practice and service may never be billed to Medicare.

9.2 Services, Benefits, Limitations, and Prior Authorization

The Administrative Simplification provisions of the *Health Insurance Portability and Accountability Act* (HIPAA) of 1996 mandates the use of national coding and transaction standards. HIPAA requires that the American Medical Association's (AMA) Current Procedural Terminology (CPT) system be used to report professional services, including physician services. Correct use of CPT coding requires using the most specific code that matches the services provided, based on the code's description. Providers must pay special attention to the standard CPT descriptions for the evaluation and management (E/M) services. The medical record must document the specific elements necessary to satisfy the criteria for the level of services as described in CPT. Reimbursement may be recouped when the medical record documents a different level of service from what is submitted on the claim. The level of service provided and documented must be medically necessary, based on the clinical situation and needs of the client.

To receive reimbursement, providers must document the following information in the client's medical record:

- The service
- The date rendered
- Pertinent information about the client's condition supporting the need for the service
- The care given

Physician services include those reasonable and medically necessary services ordered and performed by physicians or under physician supervision that are within the scope of practice of their profession as defined by state law.

9.2.1 Teaching Physician and Resident Physician

The roles of the teaching physician and resident physician occur in the context of an accredited graduate medical education (GME) training program.

The teaching physician is the Medicaid-enrolled physician who is professionally responsible for the particular services that were provided and are being submitted for reimbursement; the physician must be affiliated and in good standing with an accredited GME program and must possess all appropriate licensure.

Physician services must be performed personally by the teaching physician or by the person to whom the physician has delegated the responsibility. The level of supervision required may be direct or personal.

In all cases, the client's medical record must clearly document that the teaching physician provided identifiable supervision of the resident. As defined below, the supervision must be direct or personal depending on the setting and the clinical circumstances:

- Direct supervision means that the teaching physician must be in the same office, building, or facility when and where the service is provided and must be immediately available to furnish assistance and direction.
- *Personal supervision* means that the teaching physician must be physically present in the room when and where the service is being provided.

Personal supervision by the teaching physician is required during the key portions of all major surgeries and the key portions of all other physician services billed to Texas Medicaid if the immediate supervision, participation, or intervention of the supervising physician is medically prudent in order to assure the health and safety of the client. Physician services that require personal supervision may include invasive procedures and evaluation and management services that require complex medical decision making. Situations that require personal supervision include those in which:

- The clinical condition of the client is unstable or will likely become unstable during, or as a result of, the planned medical intervention.
- The planned medical intervention, even under optimal conditions will result in a medically reasonable risk for significant morbidity or death following the procedure.
- Deviation from the expected technique at the time the procedure or service is performed presents a medically reasonable, causally-related, foreseeable risk to the patient's life or health.

This criterion applies regardless of the place of service.

The teaching physician must provide medically appropriate, identifiable direct supervision for all other services that do not require personal supervision.

The following prerequisites apply when the teaching physician submits claims for services performed, in whole or in part, by the resident physician in the inpatient hospital setting, the outpatient hospital setting, and surgical services and procedures.

9.2.1.1 Teaching Physician Prerequisites

Services provided in an outpatient setting.

For services provided in an outpatient setting, a face-to-face encounter between the teaching physician providing direct supervision and the client is not required in the context of a GME program. All other requirements for personal or direct supervision in this division must be met for the services to qualify for reimbursement. The following tasks must be performed by the teaching physician and their completion must be documented in the patient's medical record before the claims are submitted for consideration of reimbursement:

- Review the patient's history and physical examination.
- Confirm or revise the patient's diagnosis.
- Determine the course of treatment to be followed.
- Assure that any necessary supervision of interns or residents was provided.

- Confirm that documentation in the medical record supports the level of service provided.

Exception: *Exception for E/M services furnished in certain primary care centers. Teaching physicians that meet the primary care exception under Medicare are allowed to bill for low-level and mid-level E/M services for residents. Facilities that meet the primary care exception under Medicare may bill Texas Medicaid, Family Planning, or the Children with Special Health Care Needs (CSHCN) Services Program for new patient services (procedure codes 99201, 99202, and 99203) and established patient services (procedure codes 99211, 99212, and 99213).*

Note: *All services provided in an outpatient setting that do not qualify for the exception above require that the teaching physician examine the patient.*

Services provided in an inpatient setting.

For services provided in an inpatient setting, the teaching physician must demonstrate that medically appropriate supervision was provided. The following tasks must be performed and their completion must be documented in the patient's medical record before the claims are submitted for consideration of reimbursement. The documentation must be made in the same manner as required by federal regulations under Medicare:

- Review the patient's history, review the resident's physical examination, and examine the patient no later than 36 hours after the patient's admission and before the patient's discharge.
- Confirm or revise the patient's diagnosis.
- Determine the course of treatment to be followed.
- Document the teaching physician's presence and participation in the major surgical or other complex and dangerous procedure or situation.
- Confirm that documentation in the medical record supports the level of service provided.
- A face-to-face encounter with the client on the same day as any services provided by the resident physician.

Surgical services and procedures.

The teaching surgeon is responsible for the patient's preoperative, operative, and postoperative care. The teaching physician must demonstrate that medically appropriate supervision was provided. The following tasks must be performed and their completion must be documented in the patient's medical record before the claims are submitted for consideration of reimbursement. The documentation must be made in the same manner as required by federal regulations under Medicare:

- Review the patient's history, review the resident's physical examination, and examine the patient within a reasonable period of time after the patient's admission and before the patient's discharge.
- Confirm or revise the client's diagnosis.
- Determine the course of treatment to be followed.
- Document the teaching physician's presence and participation in the major surgical or other complex and dangerous procedure or situation.

Important: *Reimbursement may be reduced, denied, or recouped if the prerequisites are not documented in the medical record. The documentation must be made in the same manner as required by federal regulations under Medicare.*

9.2.2 Substitute Physician

Physicians may bill for the service of a substitute physician who sees clients in the billing physician's practice under either a reciprocal or locum tenens arrangement.

A reciprocal arrangement is one in which a substitute physician covers for the billing physician on an occasional basis when the billing physician is unavailable to provide services. Reciprocal arrangements are limited to a continuous period no longer than 14 days and do not have to be in writing.

A locum tenens arrangement is one in which a substitute physician assumes the practice of a billing physician for a temporary period no longer than 90 days when the billing physician is absent for reasons such as illness, pregnancy, vacation, continuing medical education, or active duty in the armed forces. The locum tenens arrangement may be extended for a continuous period of longer than 90 days if the billing physician’s absence is due to being called or ordered to active duty as a member of a reserve component of the armed forces. Locum tenens arrangements must be in writing.

The substitute physician must be enrolled in Texas Medicaid and must not be on the Texas Medicaid or DSHS Family Planning Program provider exclusion list. The billing provider’s name, address, and national provider identifier must appear in Block 33 of the claim form. The name and office or mailing address of the substitute physician must be documented on the claim in Block 19, *not* Block 33.

When a physician bills for a substitute physician, modifier Q5 or Q6 must follow the procedure code in Block 24D for services provided by the substitute physician. The Q5 modifier is used to indicate a reciprocal arrangement and the Q6 modifier is used to indicate a locum tenens arrangement.

When physicians in a group practice bill substitute physician services, the performing provider identifier of the physician for whom the substitute provided services must be in Block 24J.

Physicians must familiarize themselves with these requirements and document accordingly. Those services not supported by the required documentation as detailed above will be subject to recoupment.

9.2.3 Aerosol Treatment

Aerosol treatment (procedure codes 94640, 94644, and 94645) for aerosol therapy is a benefit of Texas Medicaid and is limited to the following diagnosis codes:

Diagnosis Codes						
1363	27700	27701	27702	27703	27709	46611
46619	4801	48242	486	48801	48802	48811
48812	48881	48882	4910	4911	49120	49121
49122	4918	4919	4920	4928	49300	49301
49302	49310	49311	49312	49320	49321	49322
49381	49382	49390	49391	49392	4940	4941
4950	4951	4952	4953	4954	4955	4956
4957	4958	4959	496	5070	5071	5078
5082	51911	51919	5533	7707	99527	99731
99739						

Procedure codes J7605, J7608, J7622, J7626, J7631, J7633, J7639, J7644, and J7682 are limited to the following diagnosis codes:

Diagnosis Codes						
01150	27702	46611	46619	4801	48242	486
48801	48802	48811	48812	48881	48882	4910
4911	49120	49121	49122	4918	4919	4920
4928	49300	49301	49302	49310	49311	49312
49320	49321	49322	49381	49382	49390	49391

Diagnosis Codes						
49392	4940	4941	4950	4951	4952	4953
4954	4955	4956	4957	4958	4959	496
500	501	502	503	504	505	5060
5061	5062	5063	5064	5069	5070	5071
5078	5080	5081	5082	5088	5089	51911
51919	74861	7864				

Diagnoses not listed above may be considered with supporting documentation of medical necessity.

Medications used in aerosol therapy, when billed by the provider, are reimbursed separately and must be billed using the appropriate Healthcare Common Procedure Coding System (HCPCS) procedure code. A separate charge for saline used in aerosol therapy is denied as part of the aerosol therapy.

Refer to: Subsection 9.2.56, “Pentamidine Aerosol,” in this handbook for a list of diagnosis codes that are valid for pentamidine aerosol treatments.

9.2.3.1 Diagnostic Testing

Nitric oxide expired gas determination (FeNO) measurement (procedure code 95012) is a benefit for Texas Medicaid.

FeNO measurement provided in the physician’s office is considered medically necessary as an adjunct to the established clinical and laboratory assessments for diagnosing and assessing asthma, predicting exacerbations, and evaluating the response of a client who has asthma to anti-inflammatory therapy. FeNO measurement may be reimbursed by Texas Medicaid when the test is used as follows:

- To assist in assessing the etiology of respiratory symptoms
- To help identify the eosinophilic asthma phenotype
- To assess potential response or failure to respond to anti-inflammatory agents, particularly inhaled corticosteroids (ICS)
- To establish a baseline FeNO during non-exacerbations for subsequent monitoring of chronic persistent asthma
- To guide changes in dosing of anti-inflammatory medications, i.e., step-down dosing, step-up dosing, or discontinuation of anti-inflammatory medications
- To assist in the evaluation of adherence to anti-inflammatory medications
- To assess whether airway inflammation is contributing to respiratory symptoms

The technical and interpretation components of procedure code 95012 will not be reimbursed separately, as the instrument produces an exhaled nitric oxide (NO) measurement that requires little interpretation. Procedure code 95012 will be limited to once per day and must be submitted with procedure code 94010 or 94060.

If FeNO is measured during an office visit where additional E/M components are fulfilled, a separate E/M procedure code may be reimbursed if it is submitted with modifier 25.

9.2.4 Allergy Services

Texas Medicaid uses the following guidelines for reimbursement of allergy services.

9.2.4.1 Allergy Immunotherapy

Allergen immunotherapy consists of the parenteral administration of allergenic extracts as antigens at periodic intervals, usually on an increasing dosage scale to a dosage which is maintained as maintenance therapy.

Preparation of the allergy vial or extracts is a benefit of Texas Medicaid when preparations are made in accordance with the American Academy of Allergy, Asthma, and Immunology. Claims for preparations should be submitted using the following procedure codes:

Procedure Codes for Preparation of Allergy Vial or Extract							
95145	95146	95147	95148	95149	95165	95170	95180

Administration of the allergy extract may be reimbursed using procedure codes 95115 and 95117.

Allergen immunotherapy is a benefit for clients who have allergy conditions when the following criteria are met:

- A diagnosed hypersensitivity to an allergen can be indicated by one of the valid diagnosis codes listed below.
- Hypersensitivity cannot be managed by avoidance or pharmacologic therapy to control allergic symptoms, or the client has unacceptable side effects with pharmacologic therapy.
- The pharmacologic treatment is refused by the client or leads to significant side effects.
- The allergen content is based on appropriate skin testing, and the allergens are prepared for the client individually.

The preparation of the allergy vial or extract and the administration of an injection may be reimbursed for the following diagnosis codes:

Diagnosis Codes									
37214	38100	38101	38102	38103	38104	38105	38106	38110	38119
4770	4778	4779	49300	49301	49302	49310	49311	49312	49320
49321	49322	49390	49391	49392	7080	9895			

9.2.4.1.1 Prior Authorization for Allergy Immunotherapy

Authorization is not required for immunotherapy services; however, requests for services beyond the established limits of 160 doses per one-year period for procedure code 95165 may be considered for prior authorization with documentation of medical necessity. Documentation must be submitted to the Special Medical Prior Authorization Department and include the following information:

- Copy of the allergen testing results
- Severity and periodicity of symptoms
- Physical limitations created by the symptoms
- Concurrent drug treatment
- Explanation of how efficacy has not been achieved with prior treatment and the objectives of the new anticipated treatment program

9.2.4.1.2 Limitations of Allergy Immunotherapy

The quantity billed for the allergy extract preparation procedure must represent the total number of doses to be administered from the vial. If the number of doses is not stated on the claim, a quantity of one is allowed.

Note: A “dose” is defined as the amount of antigen(s) administered in a single injection from a multidose vial.

Procedure code 95165 is limited to a total of 160 doses per one-year period, which begins the date the immunotherapy is initiated. Additional doses may be considered for reimbursement through prior authorization with documentation of medical necessity. Procedure code 95165 is limited to no more than ten doses per vial.

When an injection is given from a vial, providers should use an administration-only procedure code (95115 or 95117). Reimbursement for the administration is limited to one per day.

An office visit, clinic visit, or observation room visit is not considered for reimbursement in addition to the fee for the preparation or the administration of the allergy vial or extract unless the additional visit results in a non-allergy-related diagnosis or a re-evaluation of the client’s condition. The following E/M procedure codes may be submitted with modifier 25:

Procedure Codes									
99201	99202	99203	99204	99205	99211	99212	99213	99214	99215
99217	99218	99219	99220						

Allergen immunotherapy that is considered experimental, investigational, or unproven is not a benefit of Texas Medicaid.

Single dose vials (procedure code 95144) are not a benefit of Texas Medicaid.

9.2.4.2 Allergy Testing

Texas Medicaid benefits include allergy testing for clients with clinically significant allergic symptoms. Allergy testing is focused on determining the allergens that cause a particular reaction and the degree of the reaction. Allergy testing also provides justification for recommendations of particular medicines, of immunotherapy, or of specific avoidance measures in the environment.

An initial evaluation of a new patient is considered for reimbursement in addition to allergy testing on the same day.

Established patient visits are not considered for reimbursement in addition to allergy testing on the same day. The allergy testing is considered for reimbursement and the visit is denied as part of another procedure on the same day.

The following allergy tests are benefits of Texas Medicaid:

- *Percutaneous and intracutaneous skin test.* The skin test for IgE-mediated disease with allergenic extracts is used in the assessment of allergy-prone clients. The test involves the introduction of small quantities of test allergens below the epidermis. Procedure codes 95004, 95017, 95018, 95024, 95027, and/or 95028 should be used to submit skin tests for consideration of reimbursement.
- *Patch or application tests.* Patch testing (procedure code 95044) is used for diagnosing contact allergic dermatitis.
- *Photo or photo patch skin test.* Procedure codes 95052 and 95056 may be used for diagnosing contact allergic dermatitis.
- *Ophthalmic mucous membrane or direct nasal mucous membrane tests.* Nasal or ophthalmic mucous membrane tests (procedure codes 95060 and 95065) are used for the diagnosis of either food or inhalant allergies and involve the direct administration of the allergen to the mucosa.

- *Inhalation bronchial challenge testing (not including necessary pulmonary function tests).* Bronchial challenge testing with methacholine, histamine, or allergens (procedure codes 95070 and 95071) is used for defining asthma or airway hyperactivity when skin testing results are not consistent with the client's medical history. Results of these tests are evaluated by objective measures of pulmonary function.

Procedure code 95199 may be used for an unlisted allergy or clinical immunologic service or procedure if there is not a specific procedure code that describes the service performed. Prior authorization is required for unlisted procedure codes. Every effort must be used to bill with the appropriate CPT code that describes the procedure being performed. If a code does not exist to describe the service performed, prior authorization may be requested using unlisted procedure code 95199 and must be submitted with documentation to assist in determining coverage. The documentation submitted must include all of the following:

- The client's diagnosis
- Medical records indicating prior treatment for this diagnosis and the medical necessity of the requested procedure
- A clear, concise description of the procedure to be performed
- Reason for recommending this particular procedure
- A CPT or HCPCS procedure code that is comparable to the procedure being requested
- Documentation that this procedure is not investigational or experimental
- Place of service (POS) the procedure is to be performed
- The physician's intended fee for this procedure

Prior authorization requests for Texas Medicaid fee-for-service clients must be submitted by the physician to the Special Medical Prior Authorization (SMPA) department.

The number of allergy tests performed must be indicated on the claim. When the number of tests is not specified, a quantity of one is allowed.

9.2.4.2.1 Allergy Blood Tests

Allergy blood testing procedure codes 86001, 86003, and 86005 are a benefit when the test is performed for a reason that includes, but is not limited to, the following:

- The client is unable to discontinue medications
- An allergy skin test is inappropriate for the client for the following reasons:
 - The client is pediatric
 - The client is disabled
 - The client suffers from a skin condition such as dermatitis

Radioallergosorbent tests (RAST) and multiple antigen simultaneous tests (MAST) are benefits of Texas Medicaid. RAST testing is used to detect specific allergens. RAST testing is usually performed by an independent lab; however, there are physicians who have the capability of performing these tests in their offices. Physicians who submit RAST/MAST tests performed in the office setting must use modifier SU to be considered for reimbursement. Without the use of the SU modifier, RAST/MAST testing submitted with POS 1 (office) is denied with the message, "Lab performed outside of office must be billed by the performing facility."

RAST/MAST tests must be submitted using procedure codes 86003 and 86005.

Procedure code 86001 is limited to 20 allergens per rolling year, any provider.

Procedure code 86003 is limited to 30 allergens per rolling year, any provider.

Procedure code 86005 is limited to 4 multiallergen tests per rolling year, same provider.

9.2.4.2.2 Collagen Skin Test

Collagen skin tests are a benefit of Texas Medicaid using procedure code Q3031. Collagen skin tests are administered to detect a hypersensitivity to bovine collagen. This skin test is given four weeks prior to any type of surgical procedure that utilizes collagen.

Collagen injections that are used for cosmetic surgery are not considered medically necessary and are not a benefit of Texas Medicaid.

9.2.4.2.3 Prior Authorization for Collagen Skin Tests

Prior authorization is required for collagen skin test procedure code Q3031.

Prior authorization requests for Texas Medicaid fee-for-service clients must be submitted by the physician to the Special Medical Prior Authorization (SMPA) department.

Prior authorization is not required for other allergy testing procedure codes unless the limits are exceeded. The following medical documentation must be submitted to the SMPA Department with the prior authorization request for additional procedures:

- Results of any previous treatment
- Documentation that explains why the client's treatment could not be completed within the policy limits for the requested procedures
- Client diagnosis and conditions that support the medical necessity for the additional procedures requested
- Client outcomes that the requested procedures will achieve

9.2.4.2.4 Ingestion Challenge Test

Ingestion challenge tests are a benefit of Texas Medicaid using procedure code 95076. Ingestion challenge tests are used to confirm an allergy to a food or food additive.

Procedure code 95076 is limited to one service per day, any provider.

9.2.5 Ambulance Transport Services - Nonemergency

Nonemergency ambulance services require prior authorization in circumstances not involving an emergency. Facilities and other providers must request and obtain prior authorization before contacting the ambulance provider for nonemergency ambulance services.

Refer to: [Non-emergency Ambulance Prior Authorization Request](http://www.tmhp.com) on the TMHP website at www.tmhp.com.

Subsection 2.2.2, “* Nonemergency Ambulance Transport Services,” in the *Ambulance Services Handbook (Vol. 2, Provider Handbooks)* for more information about ambulance services.

Subsection 5.1.8, “* Prior Authorization for Nonemergency Ambulance Transport,” in Section 5, “Fee-for-Service Prior Authorizations” (*Vol. 1, General Information*) for more information about nonemergency ambulance transport prior authorization.

9.2.6 Anesthesia

Anesthesia services are a benefit of Texas Medicaid with specific benefits and limitations to reimbursement.

Medicaid may reimburse anesthesiologists, certified registered nurse anesthetists (CRNAs), and anesthesiologist assistants (AAs) for administering anesthesia as defined within their individual scope of practice.

9.2.6.1 Medical Direction by an Anesthesiologist

Medical direction by an anesthesiologist of an anesthesia practitioner (CRNA, AA, or other qualified professional) is a benefit of Texas Medicaid if the following criteria are met:

- No more than four anesthesia procedures are being performed concurrently.
- The anesthesiologist is physically present in the operating suite.

Exception: *Anesthesiologists may be considered for reimbursement when they medically direct more than four anesthesia services or simultaneously supervise a combination of more than four CRNAs, AAs, or other qualified professionals under emergency circumstances only.*

Medical direction provided by an anesthesiologist is a benefit of Texas Medicaid if the following criteria are met:

- The anesthesiologist performs a preanesthetic examination and evaluation.
- The anesthesiologist prescribes the anesthesia plan.
- The anesthesiologist personally participates in the critical portions of the anesthesia plan, including induction and emergence.
- The anesthesiologist ensures that a qualified professional can perform the procedures in the anesthesia plan that the anesthesiologist does not perform personally.
- The anesthesiologist monitors the course of anesthesia administration at intervals.
- The anesthesiologist provides direct supervision when medically directing an anesthesia procedure. Direct supervision means the anesthesiologist must be immediately available to furnish assistance and direction.
- The anesthesiologist provides postanesthesia care.

The anesthesiologist does not perform any other services (except as noted below) during the same time period. The anesthesiologist who directs the administration of no more than four anesthesia procedures may provide the following without affecting the eligibility of the medical direction services:

- Address an emergency of short duration in the immediate area
- Administer an epidural or caudal anesthetic to ease labor pain
- Provide periodic, rather than continuous, monitoring of an obstetrical patient
- Receive clients entering the operating suite for the next surgery
- Check or discharge clients in the recovery room
- Handle scheduling matters

As noted above, an anesthesiologist may concurrently medically direct up to four anesthesia procedures. Concurrency is defined as the maximum number of procedures that the anesthesiologist is medically directing within the context of a single procedure and whether those other procedures overlap each other. Concurrency is not dependent on each of the cases involving a Medicaid client. For example, if three procedures are medically directed but only two involve Medicaid clients, the Medicaid claims must be billed as concurrent medical direction of three procedures.

For medical direction, the anesthesiologist must document in the client's medical record that he or she did the following:

- Performed the pre-anesthetic exam and evaluation.

- Provided indicated post-anesthesia care.
- Was present during the critical and key portions of the anesthesia procedure, including, if applicable, induction and emergence.
- Was present during the anesthesia procedure to monitor the client’s status.

The following information must be available to state agencies upon request and is subject to retrospective review:

- The name of each CRNA, AA, or other qualified professional that was concurrently medically directed or supervised and a description of the procedure that was performed must be documented and maintained.
- Signatures of the anesthesiologist, CRNA, AA, or other qualified professional involved in administering anesthesia services must be documented in the client’s medical record.

9.2.6.2 Anesthesia for Sterilization

Refer to: Subsection 2.2, “Services, Benefits, Limitations, and Prior Authorization,” in the *Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks)* for the complete list of family planning diagnosis codes.

Subsection 2.2.8, “Sterilization and Sterilization-Related Procedures,” in the *Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks)*.

Subsection 3.3.8.3, “Anesthesia for Sterilization,” in the *Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks)*.

Section 4, “Federally Qualified Health Center (FQHC)” in the *Clinics and Other Outpatient Facility Services Handbook (Vol. 2, Provider Handbooks)* for more information about FQHCs and billing the annual family planning examination for Title XIX clients.

9.2.6.3 Anesthesia for Labor and Delivery

Providers must bill the most appropriate procedure code for the service provided. Other time-based procedure codes cannot be submitted if either 01960 or 01967 is the most appropriate procedure code.

The following procedure codes must be used for obstetrical anesthesia:

Procedure Codes					
01960	01961	01963	01967	01968	01969

Procedure codes 01960 and 01967 are limited to once every 210 days when billed by any provider and are reimbursed a flat fee. The time reported must be in minutes. Providers should refer to the definition of time in the CPT manual in the “Anesthesia Guidelines—Time Reporting” section.

Procedure code 01968 or 01969 may be considered for reimbursement when submitted with procedure code 01967. For a Cesarean delivery following a planned vaginal delivery, the anesthesia administered during labor must be billed with procedure code 01967 and must indicate the time in minutes that represents the time between the start and stop times for the procedure. The additional anesthesia services administered during the operative session for a Cesarean delivery must be submitted using procedure code 01968 or 01969 and must indicate the time spent administering the epidural and the actual face-to-face time spent with the client. The insertion and injection of the epidural are not considered separately for reimbursement.

All time must be documented in block 24D of the claim form or the appropriate field of the chosen electronic format.

For continuous epidural analgesia procedure codes (other than procedure codes 01960 and 01967), Texas Medicaid reimburses providers for the time when the physician is physically present and monitors the continuous epidural. Reimbursable time refers to the period between the catheter insertion and when the delivery commences.

Texas Medicaid reimburses the epidural anesthesia services and the delivery at full allowance when they are provided by the delivering obstetrician.

9.2.6.4 Anesthesia Provided by the Surgeon (Other Than Labor and Delivery)

Local, regional, or general anesthesia provided by the operating surgeon is not reimbursed separately from the surgery. A surgeon billing for a surgery will not be reimbursed for the anesthesia when billing for the surgery, even when using the CPT modifier 47. The anesthesia service is included in the global surgical fee.

9.2.6.5 Complicated Anesthesia

The following procedure codes may be reimbursed in addition to an anesthesia procedure or service: 99100, 99116, 99135, and 99140. Documentation supporting the medical necessity for use of the procedure codes may be subject to retrospective review.

Procedure code 99140 is not reimbursed for diagnosis codes 650, 66970, or 66971 when one of these diagnoses is documented as the referenced diagnosis on the claim. The referenced diagnosis must indicate the emergency condition. An emergency is defined as existing when delay in treatment of the client would lead to a significant increase in the threat to life or body part.

9.2.6.6 Multiple Procedures

When billing for anesthesia and other services on the same claim, the anesthesia charge must appear in the first detail line for correct reimbursement. Any other services billed on the same day must be billed as subsequent line items.

When billing for multiple anesthesia services performed on the same day or during the same operative session, use the procedure code with the higher RVU. For accurate reimbursement, apply the total minutes and dollars for *all* anesthesia services rendered on the higher RVU code. Multiple services reimbursement guidelines apply.

9.2.6.7 Monitored Anesthesia Care

Monitored anesthesia care may include any of the following:

- Intraoperative monitoring by an anesthesiologist or qualified professional under the medical direction of an anesthesiologist
- Monitoring of the client's vital physiological signs in anticipation of the need for general anesthesia
- Monitoring of the client's development of an adverse physiological reaction to a surgical procedure

Anesthesiologists, CRNAs, or AAs may use modifier QS to report monitored anesthesia care.

The QS modifier is an informational modifier.

9.2.6.8 Reimbursement Methodology

There are two types of reimbursement for anesthesia procedure codes.

- Flat fee
- Time-based fees, which require documentation of the exact amount of face-to-face time with the client

The anesthesiologist's reimbursement for medical direction of CRNAs and non-CRNA qualified professionals is 100 percent of the maximum allowable fee.

If multiple CRNAs, anesthesiologists, or anesthesiologist assistants under anesthesiologist supervision are providing anesthesia services for a client, only one CRNA or AA and one anesthesiologist may be reimbursed.

Both the flat-fee and time-based-fee procedure codes must be submitted with modifiers and are subject to medical direction/supervision reimbursement adjustments.

Flat Fees

Both OB related anesthesia procedure codes 01960 and 01967 are considered for reimbursement with a flat-fee rate.

- Flat fees are subject to medically-directed modifier combination adjustments based on the modifier submitted with the anesthesia procedure code.
- The time-based add-on procedure code 01968 must be billed in addition to the flat fee when anesthesia for Cesarean delivery following neuraxial labor analgesia/anesthesia has occurred.

For flat-fee anesthesiology codes, anesthesia time begins when the anesthesia practitioner begins to prepare the client for the induction of anesthesia in the operating room or the equivalent area and ends when the anesthesia practitioner is no longer in personal attendance, that is, when the client may be safely placed under postoperative supervision.

Time-Based Fees

For time-based anesthesiology procedure codes, anesthesia time is the time during which an anesthesia practitioner is present with the client. Anesthesia time begins when the anesthesia practitioner begins to prepare the client for the induction of anesthesia in the operating room or the equivalent area and ends when the anesthesia practitioner is no longer in personal attendance (e.g., when the client may be safely placed under postoperative supervision).

For time-based anesthesiology codes, anesthesia practitioners must document interruptions in anesthesia time in the client’s medical record.

The documented time must be the same in the records or claims of the anesthesiologist and other anesthesia practitioners who were medically directed by the anesthesiologist.

One time unit is equal to 15 minutes of anesthesia. Providers must submit the total anesthesia time in minutes on the claim. The claims administrator will convert total minutes to time units.

Reimbursement of time-based anesthesia services is derived by adding the RVUs (e.g., base units) for the procedures performed (when multiple procedures are performed use the procedure with the highest RVUs) to the total face-to-face anesthesia time in minutes divided by 15 minutes, multiplied by the appropriate conversion factor, and then by the appropriate modifier combination adjustment:

$$[RVUs + (Minutes / 15)] \times Conversion\ Factor \times Modifier\ Combination\ Adjustment = Anesthesia\ Reimbursement$$

Provider Type Description - Physician Pricing Example				
Time: 120 minutes	=	120/15	=	8 (quantity billed)
Procedure code: 00851	=	(6 RVUs) 6.00 + 8	=	14.00
Conversion factor: \$19.58	=	14.00 x 19.58	=	\$274.12 (physician reimbursement)

Conversion Factor

A conversion factor is the multiplier that transforms relative values into payment amounts. There is a standard conversion factor for anesthesia services.

9.2.6.9 Anesthesia Modifiers

Each anesthesia procedure code must be submitted with the appropriate anesthesia modifier combination whether billing as the sole provider or for the medical direction of CRNAs, AAs, or other qualified professionals.

When an anesthesia service is billed without the appropriate reimbursement modifiers or is billed with modifier combinations other than those listed below in the Modifier Combinations section, the claim will be denied.

A procedure billed with a modifier indicating that the anesthesia was personally performed by an anesthesiologist (modifier AA) will be denied if another claim has been paid indicating the service was personally performed by, and reimbursed to, a CRNA (modifier QZ) for the same client, date of service, and procedure code. The opposite is also true—a CRNA-administered procedure will be denied if a previous claim was paid to an anesthesiologist for the same client, date of service, and procedure code. Denied claims may be appealed with supporting documentation of any unusual circumstances.

9.2.6.9.1 State-Defined Modifiers

Modifiers U1 (indicating one Medicaid claim billed by an anesthesia practitioner and U2 (indicating two Medicaid claims) are state-defined modifiers that must be billed by an anesthesiologist, CRNA, or AA.

Modifier U1, indicating that only one Medicaid claim will be submitted, cannot be billed by two providers for the same procedure, client, and date of service. Modifier U2, indicating that two Medicaid claims will be submitted, can only be billed by two providers for the same procedure, client, and date of service if one of the providers was medically directed by the other. Denied claims may be appealed with supporting documentation of any unusual circumstances.

Anesthesia providers must submit the U1 or U2 modifier with an appropriate pricing modifier (AA, QY, QK, AD, QZ, QX) when billing for anesthesia procedure codes.

9.2.6.9.2 Modifier Combinations

Modifiers AA and U1 must be submitted when an anesthesiologist has personally performed the anesthesia service.

Anesthesiologists may be reimbursed for medical direction of CRNAs, AAs, or other qualified professional by using one of the following modifier combinations:

Modifier Combination Submitted by Anesthesiologist	When is it used?	Who will submit claims?
Anesthesiologist Directing Other Qualified Professionals		
QY and U1	When directing one procedure provided by one other qualified professional.	Only the anesthesiologist
QK and U1	When directing two, three, or four concurrent procedures provided by other qualified professionals.	Only the anesthesiologist
AD and U1 (<i>Emergency circumstances only</i>)	When directing five or more concurrent procedures provided by other qualified professionals. Used in emergency circumstances only and limited to 6 units (90 minutes) per case for each occurrence requiring five or more concurrent procedures.	Only the anesthesiologist
Anesthesiologist Directing CRNAs or AAs		
QY and U2	When directing one procedure provided by a CRNA or AA.	Both the anesthesiologist and CRNA, or AA

Modifier Combination Submitted by Anesthesiologist	When is it used?	Who will submit claims?
QK and U2	When directing two, three, or four concurrent procedures involving CRNA(s) or AA(s).	Both the anesthesiologist and CRNA or AA
AD and U2 (Emergency circumstances only)	When directing five or more concurrent procedures involving CRNA(s) or AAs. Used in emergency circumstances only and limited to 6 units (90 minutes) per case for each occurrence requiring five or more concurrent procedures.	Both the anesthesiologist and CRNA or AA

9.2.6.9.3 CRNA and AA Services

Modifiers QZ and U1 must be submitted when a CRNA has personally performed the anesthesia services, is not medically directed by the anesthesiologist, and is directed by the surgeon.

Modifiers QX and U2 must be submitted by a CRNA or AA who provided services under the medical direction of an anesthesiologist.

9.2.6.10 Prior Authorization for Anesthesia

9.2.6.10.1 Anesthesia for Medical Services

Anesthesia services provided in combination with most medical surgical procedures do not require prior authorization. However, some medical surgical procedures may require prior authorization. Anesthesia may be reimbursed if prior authorization for the surgical procedure was not obtained, but services provided by the facility, surgeon, and assistant surgeon will be denied.

9.2.6.11 Claims Filing

Texas Medicaid reimburses anesthesiologists based on the Tax Equity and Fiscal Responsibility Act (TEFRA) of 1982. Anesthesiologists must identify the following information on their claims:

- Procedure performed (CPT anesthesia code in Block 24 of the CMS-1500 paper claim form).
- Person (physician, CRNA, or AA) administering anesthesia (modifiers must be used to designate this provider type).
- Time in minutes.
- Any other appropriate modifier (refer to subsection 6.3.5, “* Modifiers” in Section 6, “Claims Filing” (*Vol. 1, General Information*) for a list of the most common modifiers).

9.2.6.12 Anesthesia (General) for THSteps Dental

Refer to: Section 4, “Texas Health Steps (THSteps) Dental” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for additional information.

9.2.7 Abdominal Aortic Aneurysm Screening

Procedure code G0389 is a benefit for male clients who are 65 through 75 years of age with diagnosis codes V700 or V1582.

Procedure code G0389 is limited to once per lifetime any provider.

9.2.8 Bariatric Surgery

Bariatric surgery is considered medically necessary when used as a means to treat covered medical conditions that are caused or significantly worsened by the client’s obesity in cases where those comorbid conditions cannot be adequately treated by standard measures unless significant weight

reduction takes place. The pathophysiology of the covered comorbid conditions must be sufficiently severe that the expected benefits of weight loss subsequent to this surgery significantly outweigh the risks associated with bariatric surgery.

The following procedure codes may be reimbursed for medically necessary bariatric surgery services with prior authorization: 43644, 43645, 43659, 43770, 43771, 43772, 43773, 43774, 43775, 43842, 43843, 43845, 43846, 43847, 43848, 43886, 43887, and 43888.

Bariatric surgery is not a benefit when the primary purpose of the surgery is any of the following:

- For weight loss for its own sake
- For cosmetic purposes
- For reasons of psychological dissatisfaction with personal body image
- For the client's or provider's convenience or preference

9.2.8.1 Prior Authorization for Bariatric Surgery

All clients must meet the criteria outlined below.

The same contraindications exist for bariatric surgery as for any other elective abdominal surgery. Documentation provided for prior authorization must attest that none of the following additional contraindications exist:

- Endocrine cause for obesity, inflammatory bowel disease, chronic pancreatitis, cirrhosis, portal hypertension, or abnormalities of the gastrointestinal tract
- Chronic, long-term steroid treatment
- Pregnant, or plans to become pregnant within 18 months
- Noncompliance with medical treatment
- Significant psychological disorders that would be exacerbated or interfere with the long-term management of the client after the operation
- Active malignancy

All clients must undergo preoperative psychological evaluation by a behavioral health provider and have clearance for surgery if any of the following conditions exist:

- They have a history of psychiatric or psychological disorders.
- They are currently under the care of a psychologist or psychiatrist.
- They are on psychotropic medications.

The client's medical record must include documentation of the evaluation.

Clients without a history of psychiatric or psychological disorder must also undergo a preoperative psychological evaluation by a behavioral health provider and have clearance for surgery. The client's medical record must include documentation that the client is psychologically mature and able to cope with the postsurgical changes of the surgery.

Documentation must be submitted with the prior authorization request that is signed by the surgeon and attests that the services are provided by a facility in Texas that is one of the following:

- Accredited by the Metabolic and Bariatric Surgery Accreditation and Quality Improvement Program (MBSAQIP).
- A children's hospital that has a bariatric surgery program and provides access to an experienced surgeon who employs a team that is capable of long-term follow-up of the metabolic and psychosocial needs of the client and family.

Bariatric surgery for clients who are 20 years of age and younger may be prior authorized when the client meets all of the following criteria:

- The client has reached a Tanner Scale stage IV or V plus 95 percent of adult height based on bone age.
- The client has a body mass index (BMI) of greater than or equal to 40 kg/m².
- The client has one or more comorbid conditions that are exacerbated by or attributable to obesity.
- Female clients must be at least 13 years of age and menstruating.
- Male clients must be at least 15 years of age.

Bariatric surgery for clients who are 21 years of age and older may be prior authorized when the client meets all of the following criteria:

- The client has a BMI of greater than or equal to 35 kg/m².
- The client has one or more of the following comorbid conditions that are exacerbated by or attributable to obesity:
 - Obesity-associated hypoventilation
 - Moderate to severe sleep apnea (defined as apnea/hypoapnea index of 16 or more events per hour)
 - Congestive heart failure
 - Obesity-induced cardiomyopathy
 - Refractory hypertension resistant to pharmacotherapy (defined as blood pressure greater than 140mmHg systolic or greater than 90mmHg diastolic, despite maximally tolerated doses of at least three different classes of antihypertensive medications)
 - Pseudotumor cerebri (documented idiopathic intracerebral hypertension)
 - Adult onset (Type II) diabetes (with or without complications) with Hgb A1c greater than 9 percent, regardless of therapy, or 7 to 9 percent on maximal medical therapy (defined as taking insulin or maximally tolerated doses of at least two different classes of oral hypoglycemic medications)
 - Cardiovascular or peripheral vascular disease
 - Refractory hyperlipidemia (defined as triglycerides greater than 250 mg/dl, cholesterol greater than 220/mg/dl, HDL less than 35 mg/dl, or LDL greater than 200 mg/dl, despite maximally tolerated doses of at least two different classes of lipid-lowering medications)
 - Recurrent or chronic skin ulcerations with infection
 - Pulmonary hypertension
 - Chronic joint disease, deterioration of the joint cartilage, and the formation of new bone (bone spurs) at the margins of the joints, with symptoms that severely affect work or leisure activities, on maximal medical therapy (defined as maximally tolerated dose of a non-steroidal anti-inflammatory drug (NSAID) or COX-II inhibitor or acetaminophen and the completion of at least one physical-therapist-supervised exercise program)
 - Hepatic steatosis without evidence of active inflammation

Documentation must include a summary of the treatment provided for the client's comorbid conditions, including descriptions of how the client's response to standard treatment measures are unsatisfactory and why the bariatric surgery is medically necessary in the context of current treatment and medically-reasonable alternatives that are available.

Referral for bariatric surgery to the bariatric surgeon is required from the practitioner who is treating the comorbid condition(s). The bariatric surgeon will determine the client’s eligibility for bariatric surgery. Documentation of the referral must be submitted with the prior authorization request.

The client must have had previous unsuccessful medical treatment for obesity, as documented in the medical record. All of the following minimal requirements must be met:

- The client has made a diligent effort to achieve healthy body weight with such efforts described in the medical record and certified by the operating surgeon.
- The client has failed to maintain a healthy weight despite a minimum of 6 months documented regular participation in a structured dietary program overseen by a physician (M.D. or D.O.) within 12 months of the request date.

Documentation that is submitted for prior authorization must also include all of the following:

- The process by which the client will receive postoperative surgical, nutritional, and psychological services.
- Affirmation that the client and the parent/guardian (if applicable) understand and will support the changes in eating habits that must accompany the surgery and the extensive postoperative follow-up.

Repeat bariatric surgery may be considered medically necessary in either of the following circumstances:

- To correct complications from bariatric surgery such as band malfunction, obstruction, or stricture
- To convert to a Roux-en-Y gastroenterostomy or to correct pouch failure in an otherwise compliant client when the initial bariatric surgery met medical necessity criteria

Note: Conversion to a Roux-en-Y gastroenterostomy may be considered medically necessary for clients who have not had adequate success (defined as a loss of more than 50 percent of excess body weight) two years following the primary bariatric surgery procedure, and the client has been compliant with a prescribed nutrition and exercise program following the procedure.

All documentation required for prior authorization is to be maintained in the client’s medical record and is subject to retrospective review. This includes medical records from both the practitioner treating the comorbid condition(s) and the bariatric surgeon.

Providers may fax or mail prior authorization requests for bariatric surgery services for clients who are 20 years of age and younger to the TMHP Comprehensive Care Program (CCP) Prior Authorization Department. Prior authorization requests for clients who are 21 years of age and older may be faxed or mailed to the TMHP Special Medical Prior Authorization Department.

Clients may be eligible under Texas Medicaid or CCP for separate reimbursement for nutritional and psychological assessment and counseling associated with bariatric surgery.

Behavioral health services provided as part of the preoperative or postoperative phase of bariatric surgery are subject to behavioral health guidelines, and are not considered part of the bariatric surgery.

Refer to: Subsection 6.16, “Psychiatric Services for Hospitals,” in the *Behavioral Health, Rehabilitation, and Case Management Services Handbook (Vol. 2, Provider Handbook)* for information about behavioral health services.

9.2.9 Bacillus Calmette-Guérin (BCG) Intravesical for Treatment of Bladder Cancer

Live BCG for intravesical (procedure code 90586) or transvesical (procedure code J9031) are benefits of Texas Medicaid for the following diagnosis codes:

Diagnosis Codes									
1880	1881	1882	1883	1884	1885	1886	1887	1888	1889

Diagnosis Codes

2337

Procedure code 90585 is a benefit of Texas Medicaid for diagnosis code V032. Authorization is not required for the BCG vaccine.

Bladder instillation of anticarcinogenic agent (procedure code 51720) may be reimbursed separately when billed with BCG instillation (procedure code 90586 or J9031).

9.2.10 Behavioral Health Services

Refer to: The *Behavioral Health, Rehabilitation, and Case Management Services Handbook (Vol. 2, Provider Handbooks)*.

9.2.11 Biopsy

A biopsy refers to the surgical excision of tissue for pathological examination.

If a surgeon bills separate charges for a surgical procedure and a biopsy on the same organ or structure on the same day, the charges are reviewed and reimbursed only for the service with the higher of the allowed amounts.

9.2.12 Biofeedback Services

Biofeedback services are a benefit of Texas Medicaid for clients who are 4 years of age and older with the following conditions:

- Urinary incontinence
- Fecal incontinence
- Migraine and tension headache

Biofeedback services may be reimbursed using procedure codes 90901 and 90911.

Biofeedback services are limited to a maximum of 18 sessions rendered by any provider for the lifetime of each client for each condition.

Biofeedback services that are not a benefit of Texas Medicaid are the following:

- Biofeedback performed in the home setting
- Neurofeedback (such as, but not limited to, electroencephalography [EEG])
- Treatment for muscle tension, except tension headache
- Psychological, psychophysiological, and behavioral health therapy and psychosomatic conditions
- Investigational or experimental biofeedback services and procedures

Procedure code 90901 or 90911 are limited to one service per day. The reimbursement for procedure codes 90901 and 90911 include all modalities of the biofeedback training performed on the same day, regardless of the time increments or the number of modalities performed.

Any device used during a biofeedback session is considered part of the procedure and will not be reimbursed separately.

9.2.12.1 Biofeedback Certification

A staff member who is certified by Biofeedback Certification International Alliance (BCIA) must perform biofeedback services.

The certification types accepted by Texas Medicaid are the following:

- General biofeedback certification (BCB)

- Pelvic muscle dysfunction biofeedback certification (BCB-PMD)

Providers must maintain documentation in the client's medical record to support the medical necessity of the biofeedback service provided. Documentation must include the name of the staff person who provided the biofeedback and the prescribing physician must maintain in the office a record of the current certification of the staff member(s) who perform biofeedback. Documentation is subject to retrospective review.

9.2.12.2 Prior Authorization for Biofeedback Services

Prior authorization is required for biofeedback services.

- Any combination of procedure codes 90901 and 90911 are a benefit for biofeedback sessions for urinary or fecal incontinence conditions in clients who are 4 years of age and older.
- Procedure code 90901 is a benefit for biofeedback sessions for migraine or tension headache conditions.

The initial request may include up to 12 visits and not exceed a total duration of 12 weeks. Documentation of the following must be submitted for consideration of prior authorization:

- Conventional treatments that were given but were not successful, including, but not limited to, pharmacotherapy, exercise, rest, and heating and cooling modalities.
- Statements from the prescribing physician that the client is capable of understanding the requirements and agrees actively to participate in the biofeedback sessions.
- Name and certification information for the person performing the training.

In addition, documentation must be submitted to support the specific type of biofeedback requested.

Urinary and Fecal Incontinence

- Diagnosis of fecal or urinary stress, urge, overflow, or a mix of stress and urge incontinence in a client who is 4 years of age or older.
- Exclusion by the physician of any underlying medical conditions that could be causing the problem.
- Failed pelvic floor muscle exercise (PME) training for clients who are 21 years of age and older.

Note: Failed trial of PME training is defined as no clinically significant improvement in urinary incontinence after completing four weeks of an ordered plan of PME exercises.

Migraine and tension headache

- A diagnosis of migraine, tension headache, or mixed migraine and tension headache.
- Symptoms that occur with a duration of at least 4 hours for at least 15 days a month over at least 3 months.
- Failure of first-line approaches, including avoidance of precipitating stimuli and pharmacological prophylaxis.

Prior authorization requests must be submitted by the physician to the Special Medical Prior Authorization (SMPA) Department. The request must be submitted with documentation that supports medical necessity. Providers may submit prior authorization requests online through the TMHP website at www.tmhp.com, by fax to 1-512-514-4213, or by mail to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway
Austin, TX 78727

After the client completes the initial biofeedback treatment course, prior authorization may be considered for a total of six follow-up sessions not to exceed three sessions per week and total duration not to exceed eight weeks. Providers must submit prior authorization documentation for the same condition as the original request, and must include each original symptom and how it has objectively improved. Documentation may include, but is not limited to, the following:

- For treatment of urinary incontinence, improvement in continence scores, vitality, health, a decrease in high-grade stress incontinence, nocturnal enuresis, and urine loss with activity. In clients who are 21 years of age and older, evidence of increased pelvic floor contraction strength and the ability to hold the contractions longer and to perform more repetitions.
- For treatment of fecal incontinence, improvement in continence scores, squeeze and anal pressures, squeeze duration, vitality, and health. In clients who are 21 years of age and older, evidence of increased pelvic floor contraction strength and the ability to hold the contractions longer and to perform more repetitions.
- For migraine and tension headaches, diminished intensity, frequency, and duration of the headache activity.

9.2.13 Blepharoplasty Procedures

Procedure codes 67901, 67902, 67903, 67904, 67906, 67908, and 67909 may be reimbursed for clients who are 20 years of age and younger without prior authorization when performed for one of the following diagnosis codes: 74361, 74362, or 7439.

Procedure codes 67901, 67902, 67903, 67904, 67906, and 67908 do not require prior authorization for clients who are 21 years of age and older when billed for the following diagnosis codes: 37431, 37432, 37433, and 37434.

Blepharoplasty for clients who are 21 years of age and older requires mandatory prior authorization. The following information from the physician is required at the time of the request for blepharoplasty for procedure codes 15820, 15821, 67901, 67902, 67903, 67904, 67906, 67908, 67909, 67911:

- A brief history and physical evaluation
- Photographs of the eyelid problem
- Visual field measurements
- ICD-9-CM diagnosis(es)

The following blepharoplasty and eyelid repair procedures do *not* require prior authorization:

Procedure Codes									
67916	67917	67923	67924	67961	67966	67971	67973	67974	67975

All supporting documentation must be included with the request for authorization. Send requests and documentation to the following address:

Texas Medicaid & Healthcare Partnership
 Special Medical Prior Authorization
 12357-B Riata Trace Parkway, Suite 100
 Austin, TX 78727
 Fax: 1-512-514-4213

Retroactive authorization may be granted on an appeal basis when submitted with the appropriate documentation.

9.2.14 Bone Growth Stimulation

Professional services for bone growth stimulation (procedure codes 20974, 20975, and 20979) are a benefit of Texas Medicaid

Prior authorization is required for a bone growth stimulator device (procedure codes E0747, E0748, E0749, and E0760).

Refer to: Subsection 2.2.7, “Bone Growth Stimulators,” in the *Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook (Vol. 2, Provider Handbooks)* for prior authorization criteria.

9.2.14.1 Invasive Bone Growth Stimulation

Invasive bone growth stimulation (procedure code 20975) is indicated for the following conditions:

- Nonunion of long bone fractures (i.e., clavicle, humerus, radius, ulna, femur, tibia, fibula, and metacarpal, metatarsal, carpal, and tarsal bones). Nonunion of long bone fractures is considered to exist only when serial radiographs have confirmed that fracture healing has ceased for three or more months prior to starting treatment with the bone growth stimulator. Serial radiographs must include a minimum of 2 sets of radiographs separated by a minimum of 90 days. Each set of radiographs must include multiple views of the fracture site.
- Failed fusion of a joint other than the spine when a minimum of three months has elapsed since the joint fusion was performed.
- Congenital pseudoarthrosis.
- An adjunct to spinal fusion surgery for patients at high risk for pseudoarthrosis due to previously failed spinal fusion at the same site.
- An adjunct to multiple-level fusion, which involves three or more vertebrae (e.g., L3-L5, L4-S1, etc.).

9.2.14.2 Non-invasive Bone Growth Stimulation

Non-invasive bone growth stimulation (procedure code 20974) is indicated for the following conditions:

- Nonunions, failed fusions, and congenital pseudarthrosis where there is no evidence of progression of healing for three or more months despite appropriate fracture care.
- Delayed unions of fractures of failed arthrodesis at high risk sites (e.g., open or segmental tibial fractures, carpal navicular fractures).

Documentation must also indicate all of the following:

- Serial radiographs have confirmed that no progressive signs of healing have occurred.
- The fractured gap is 1 cm or less.
- The individual can be adequately immobilized and is likely to comply with non-weight-bearing restrictions.

Non-invasive bone growth stimulation for spinal application is indicated for the following conditions:

- One or more failed fusions.
- Grade II or worse spondylolisthesis.
- A multiple-level fusion with extensive bone grafting is required.
- Other risk factors for fusion failure are present, including gross obesity, degenerative osteoarthritis, severe spondylolisthesis, current smoking, previous fusion surgery, previous disc surgery, or gross instability.

9.2.14.3 Ultrasound Bone Growth Stimulation

Ultrasound bone growth stimulation (procedure code 20979) is indicated for nonunion of a fracture, other than the skull or vertebrae, in a skeletally mature person, which is documented by a minimum of two sets of radiographs that were:

- Obtained prior to starting treatment with the osteogenesis stimulator.
- Separated by a minimum of 90 days.
- Taken with multiple views of the fracture site.
- Accompanied by a written interpretation by a physician who states that there has been no clinically significant evidence of fracture healing between the two set of radiographs.

Documentation must also indicate evidence of all of the following:

- The fracture is not tumor-related.
- The fracture is not fresh (less than 7 days), closed or grade I open, tibial diaphyseal fractures, or closed fractures of the distal radius (Colles fracture).

9.2.14.4 Reimbursement

Professional claims that are submitted for bone growth stimulation (procedure codes 20974, 20975, and 20979) may be reimbursed if the claim includes documentation of one of the following:

- Documentation of medical necessity as outlined for each type of bone growth stimulation.
- The corresponding bone growth stimulator device was submitted within 95 days of the date the bone growth stimulation procedure was performed.

The appropriate evaluation and management (E/M) procedure code must be billed for monitoring the effectiveness of bone growth stimulation treatment.

Procedure codes 20974, 20975, and 20979 are limited to one per six months. During the six-month limitation period, a subsequent fracture that meets the criteria for a bone growth stimulator may be reimbursed after the submission of an appeal with documentation of medical necessity that demonstrates the criteria have been met.

9.2.15 Cancer Screening and Testing

9.2.15.1 BRCA Testing

Refer to: Subsection 2.2.6, “Breast Cancer Gene 1 and 2 (BRCA) Testing” in the Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks).

9.2.15.2 Colorectal Cancer Screening

Fecal occult blood tests, barium enemas, screening colonoscopies, and sigmoidoscopies are benefits of Texas Medicaid. Screening refers to the testing of asymptomatic persons in order to assess their risk for the development of colorectal cancer. Screening has been shown to decrease mortality due to this cancer by detecting cancers at earlier stages and allowing the removal of adenomas, thus preventing the subsequent development of cancer.

The American Cancer Society (ACS) and U.S. Preventive Services Task Force (USPSTF) both recommend screening people at average risk for colorectal cancer beginning at 50 years of age by any of the following methods:

- A fecal occult blood test (FOBT)* or fecal immunochemical test (FIT) every year
- Flexible sigmoidoscopy every five years

- A FOBT* or FIT every year plus flexible sigmoidoscopy every five years, or (of these three options, the combination of FOBT or FIT every year plus flexible sigmoidoscopy every five years is preferable)
- Double-contrast barium enema every five years
- Colonoscopy every ten years

**For FOBT, the take-home multiple sample method should be used.*

The ACS and USPSTF recommends screening for people at high-risk for colorectal cancer once every two years.

Indications/characteristics of a high-risk individual:

- A close relative (sibling, parent or child) has had colorectal cancer or an adenomatous polyp.
- There is a family history of familial adenomatous polyposis.
- There is a family history of hereditary nonpolyposis colorectal cancer.
- There is a personal history of adenomatous polyps.
- There is a personal history of colorectal cancer.
- There is a personal history of colonic polyps.
- There is a personal history of inflammatory bowel disease, including Crohn's disease and ulcerative colitis.

Colorectal screening services are considered for reimbursement when submitted using procedure codes G0104, G0105, G0106, G0120, G0121, G0122, and G0328 by associated risk category based on the ACS and USPSTF frequency recommendations. Reimbursement for these procedure codes is considered when medical necessity is documented in the client's record.

Fecal Occult Blood Tests

Procedure code G0328 may be reimbursed once per year for clients who are 50 years of age and older.

Barium Enemas

Procedure code G0122 is considered for reimbursement once every 5 years for clients who are 50 years of age and older.

Sigmoidoscopies

Procedure codes G0104 and G0106 are considered for reimbursement once every five years when submitted with diagnosis codes V1090, V1272, V7650, V7651, V7652, or V700, as recommended by the ACS and USPSTF. Diagnosis code V700 may be used for screening if no other diagnosis is appropriate for the service rendered, but not more frequently than recommended by the USPSTF.

A screening barium enema may be substituted for a screening flexible sigmoidoscopy if the effectiveness has been established by the physician for substitution. Procedure code G0106 may be used as an alternative to procedure code G0104 respectively.

If during the course of screening flexible sigmoidoscopy, a lesion or growth is detected that results in a biopsy or removal of the growth, the appropriate diagnostic procedure classified as a flexible sigmoidoscopy with biopsy or removal must be reported rather than procedure code G0104 or G0106.

Colonoscopies: Average Risk

Procedure code G0121 is considered for reimbursement once every ten years when submitted with diagnosis codes V1272, V7650, V7651, V7652, or V700 as recommended by the ACS and USPSTF for clients who do not meet the criteria for high-risk.

If during the screening colonoscopy a lesion or growth is detected that results in a biopsy or removal of the growth, the procedure code for a colonoscopy with biopsy or removal of lesion should be reported rather than procedure code G0121.

Colonoscopies: High-Risk

Procedure codes G0105 and G0120 are considered for reimbursement once every two years for clients who meet the definition of high-risk. Procedure codes G0105 and G0120 must be submitted with one of the following diagnosis codes:

Diagnosis Codes									
5550	5551	5552	5559	5560	5561	5562	5563	5568	5569
55841	55842	5589	V1005	V1006	V1272	V160	V1851		

A screening barium enema may be substituted for a screening colonoscopy if the effectiveness has been established by the physician for substitution. Procedure code G0120 may be used as an alternative to procedure code G0105 respectively.

If during the screening colonoscopy a lesion or growth is detected that results in a biopsy or removal of the growth, the procedure code for a colonoscopy with biopsy or removal of lesion should be reported rather than procedure code G0105 or G0120.

9.2.15.2.1 Prior Authorization for Colorectal Cancer Screening

Prior authorization is not required for colorectal screening.

9.2.15.3 Genetic Testing for Colorectal Cancer

Genetic testing for colorectal cancer may be considered for reimbursement to independent laboratories with prior authorization.

Genetic testing may be provided to clients who have a known predisposition (i.e., having a first- or second-degree relative) for colorectal cancer. Results of the testing may indicate whether the client has an increased risk of developing colorectal cancer. A first-degree relative is defined as a sibling, parent, or offspring. A second-degree relative is defined as an uncle, aunt, grandparent, nephew, niece, or half-sibling.

Genetic test results, when informative, may influence clinical management decisions. Documentation in the medical record must reflect that the client or family members have been given information on the nature, inheritance, and implications of genetic disorders to help them make informed medical and personal decisions before the genetic testing.

Genetic testing for colorectal cancer may be considered for reimbursement with the following procedure codes:

Procedure Codes									
81201	81202	81203	81210	81275	81288	81292	81293	81294	81295
81296	81297	81298	81299	81300	81301	81317	81318	81319	

Diagnosis code V160 is acceptable as a diagnosis for the procedure codes in the table above. Prior authorization is still required and must be obtained for these services. Interpretation of gene mutation analysis results is not reimbursed separately. Interpretation is part of the physician E/M service.

The following procedure codes are limited to once per lifetime for any procedure code by any provider. Testing is limited to once per lifetime for any procedure code by any provider, regardless of whether additional services are authorized.

Procedure Codes									
81201	81202	81203	81210	81275	81288	81292	81293	81294	81295
81296	81297	81298	81299	81300	81301	81317	81318	81319	

Providers must maintain the following documentation in the client’s medical record for genetic testing for colorectal cancer:

- Documentation of formal pre-test counseling, including assessment of the client’s ability to understand the risks and limitations of the test.
- The client’s informed choice to proceed with the genetic testing for colorectal cancer.

The provider must order the most appropriate test based on familial medical history and the availability of previous family testing results.

The medical record is subject to retrospective review.

9.2.15.3.1 Testing for Familial Adenomatous Polyposis

Testing for familial adenomatous polyposis (procedure codes 81201, 81202, and 81203) may be offered to clients who have well-defined hereditary cancer syndromes and for whom a positive or negative result will change medical care. Testing for familial adenomatous polyposis may be considered for reimbursement with documentation of at least one of the following:

- The client has more than 20 polyps.
- The client has a first-degree relative with familial adenomatous polyposis and a documented mutation.
- For clients who are 7 years of age and younger, testing must be medically necessary and supported by documentation with a clear rationale for testing, which must be retained in the client’s medical record.

9.2.15.3.2 Hereditary Nonpolyposis Colorectal Cancer (HNPCC)

Testing for HNPCC (procedure codes 81288, 81292, 81293, 81294, 81295, 81296, 81297, 81298, 81299, 81300, 81301, 81317, 81318, and 81319) is used to determine whether a client has an increased risk of colorectal cancer or other HNPCC-associated cancers, including Lynch Syndrome. Results of the test may influence clinical management decisions. Testing for HNPCC may be considered for reimbursement with documentation of at least one of the following:

- The client has three or more family members, one of whom is a first-degree relative, with colorectal cancer; two successive generations are affected; one or more of the colorectal cancers was diagnosed before the family member was 50 years of age; and familial adenomatous polyposis has been ruled out for the client.
- The client has had two previous HNPCCs.
- The client has colorectal cancer and a first-degree relative who has one of the following:
 - Colorectal cancer or HNPCC extracolonic cancer at 50 years of age and younger
 - Colorectal adenoma at 40 years of age and younger
- The client has had colorectal cancer or endometrial cancer at 50 years of age and younger.
- The client has had right-sided colorectal cancer with an undifferentiated pattern of histology at 50 years of age and younger.
- The client has had signet-cell type colorectal cancer at 50 years of age and younger.
- The client has had a colorectal adenoma at 40 years of age and younger.

- The client is asymptomatic and has a first- or second-degree relative who has a documented HPNCC mutation.
- The client has a family history of malignant neoplasm in the gastrointestinal tract.
- For clients who are 20 years of age and younger, testing must be medically necessary and supported by documentation with a clear rationale for testing, which must be retained in the client's medical record.

9.2.15.3.3 Prior Authorization for Genetic Testing for Colorectal Cancer

Prior authorization is required for genetic testing for colorectal cancer. A written authorization request that is signed and dated by the referring provider must be submitted. A provider's signature, including the prescribing provider's, on a submitted document indicates that the provider certifies, to the best of the provider's knowledge, the information in the document is true, accurate, and complete.

All documentation that is submitted with a handwritten provider's signature must have a handwritten date next to the signature and must be kept in the client's medical record. Stamped and digitalized signatures will not be accepted. Medical documentation that is submitted by the physician must verify the client's diagnosis or family history. Requisition forms from the laboratory are not sufficient for verification of the personal and family history.

To complete the prior authorization process, the provider must mail or fax the request to the TMHP Special Medical Prior Authorization Unit and include documentation of medical necessity. The form may be faxed to 1-512-514-4213 or mailed to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization Department
12357-B Riata Trace Parkway, Suite 100
Austin, TX 78727

A request for retroactive authorization must be submitted no later than 7 calendar days after the lab draw is performed. To facilitate a determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including the accurate medical necessity of the services requested.

9.2.15.4 Mammography (Screening and Diagnostic Studies of the Breast)

The following breast imaging studies are benefits of Texas Medicaid:

- Screening mammogram
- Diagnostic mammogram
- Diagnostic breast ultrasound

A screening mammogram may be billed using procedure code 77057 or G0202. Procedure code 77057 will be denied when billed if it is submitted for the same date of service as procedure code G0202 by any provider.

Note: *The American Cancer Society recommends annual screening mammography for women beginning at 40 years of age.*

A diagnostic mammogram may be billed using procedure code 77055, 77056, G0204, or G0206.

Procedure code 77055 will be denied if it is submitted for the same date of service as procedure code 77056, G0204, or G0206 by any provider.

Procedure code 77056 will be denied if it is submitted for the same date of service as procedure code G0204 by any provider.

Procedure code G0206 will be denied if it is submitted for the same date of service as procedure code 77056 or G0204 by any provider.

Screening mammograms may be reimbursed for the same date of service as a diagnostic mammogram if the diagnostic mammography procedure codes are submitted with a GG modifier.

A mammogram may be indicated for a male client based on medical necessity due to existing signs and symptoms. In such rare circumstances, procedure codes 77055, 77056, G0204, and G0206 may be considered for reimbursement.

Other breast diagnostic radiology procedures may be medically necessary based on existing signs and symptoms. When indicated, such procedures may be considered for reimbursement using procedure code 76098, 77053, or 77054. Procedure code 77053 will be denied if it is submitted for the same date of service as procedure code 77054 by any provider. Procedure code 76098 may be reimbursed for both male and female clients.

Computer-aided detection (CAD) procedure codes 77051 and 77052 may be reimbursed in addition to screening and diagnostic mammography.

Procedure codes 77051 and 77052 are add-on codes and must be submitted with the primary procedure code to be considered for reimbursement. Procedure code 77051 must be submitted for reimbursement with procedure code 77055, 77056, G0204, or G0206. Procedure code 77052 must be submitted for reimbursement with procedure code 77057 or G0202.

Breast ultrasound may be considered for reimbursement using procedure code 76641 or 76642.

Authorization is not required for these services.

The prescribing physician must maintain documentation of medical necessity in the client's medical record. The radiologist or interpreting physician at the testing facility may determine and document that, because of the abnormal result of the diagnostic test performed, additional studies are medically necessary. The radiologist or interpreting physician ordering the additional studies must provide documentation to the prescribing physician.

9.2.15.5 Prognostic Breast and Gynecological Cancer Studies

Prognostic breast and gynecological cancer studies are benefits of Texas Medicaid when ordered by a physician for the purpose of determining the best course of treatment for a patient with breast/gynecological cancers.

Prognostic breast and gynecological cancer studies are divided into three categories: Receptor assays, Her-2/neu, and gene expression profiling.

- Receptor Assays (procedure codes 84233 and 84234) - The estrogen receptor assay (ERA) and the progesterone receptor assay (PRA) are tests in which a tissue sample is exposed to radioactively tagged estrogen or progesterone. The presence of these receptors can have prognostic significance in breast and endometrial cancer.
- Her-2/neu (procedure codes 83950, 88237, 88239, 88271, 88274, 88291, 88341, 88342, 88344, 88360, 88361, 88364, 88365, 88366, 88367, 88368, 88369, 88373, 88374, and 88377) - Human epidermal growth factor receptor 2 (Her-2/neu) is responsible for the production of a protein that signals cell growth. The overexpression of Her-2/neu in breast cancer is associated with decreased overall survival and response to some therapies. Each procedure used in the analysis should be coded separately.
- Gene expression profiling (procedure code 81519) - Gene expression profiling using the Oncotype DX® Breast Cancer Assay analyzes the expression of a panel of 21 genes to predict the likelihood of breast cancer recurrence in clients with newly diagnosed early stage invasive breast cancer.

Reimbursement for procedure codes 84233, 84234, 88360, and 88361 is limited to claims with a diagnosis of breast or uterine cancer as listed in the following table:

Diagnosis Codes									
1740	1741	1742	1743	1744	1745	1746	1748	1749	1750
1759	1820	1821	1828	1982	19881	2330			

Testing for other diagnoses will be denied.

Interpretation of receptor assays, and Her-2/neu results is not considered separately for reimbursement. Interpretation is part of the physician’s E/M service.

Gene expression profiling (procedure code 81519) is a benefit when all of the following criteria are met:

- The test is ordered by an oncologist.
- The client is a female, with newly diagnosed breast cancer. (“Newly diagnosed” means that not more than six months have elapsed since the initial diagnosis.)
- The clinical stage of the breast cancer is I or II.
- Axillary node biopsy is negative for tumor, and there is no evidence of metastatic breast cancer.
- The primary tumor is estrogen receptor-positive, and Her-2/neu receptor negative, or the primary tumor is Her-2/neu receptor positive and less than 1 cm in diameter.
- The client is a candidate for adjuvant chemotherapy.
- The outcome of the test will guide decision-making regarding adjuvant chemotherapy.
- The client has one of the following diagnosis codes:

Diagnosis Codes									
1740	1741	1742	1743	1744	1745	1746	1748	1749	2330
V860									

Gene expression profiling is limited to once per lifetime, but may be considered for reimbursement more than once per lifetime for the same client on appeal. The provider must submit documentation that demonstrates that the client has a new, second, primary breast cancer diagnosis that meets the criteria described above.

The provider must maintain documentation of medical necessity in the client’s medical record. Retrospective review may be performed to ensure that the documentation supports the medical necessity of the service.

Gene expression profiling is not covered for the following:

- Repeat testing or testing of multiple tumor sites in the same client.
- Use in predicting the likelihood of distant recurrence in male breast cancer.

Tests for gene expression profiling other than Oncotype DX® are considered experimental and investigational, and are not benefits of Texas Medicaid.

9.2.16 Capsulotomy

A capsulotomy is a benefit when not performed with a joint surgery.

9.2.17 Cardiac Rehabilitation

Cardiac rehabilitation is a physician-supervised program that furnishes physician-prescribed exercise, cardiac risk factor modification, psychosocial assessment, and outcomes assessment. Cardiac rehabilitation programs must include all of the following:

- Physician-prescribed exercise for each day on which cardiac rehabilitation items and services are furnished
- Cardiac risk factor modification, including education, counseling, and behavioral intervention, tailored to a client’s individual needs
- Psychosocial assessment
- Outcomes assessment
- An individual treatment plan that specifies how components are used for a client and that is reviewed and signed by the prescribing physician every 30 days

Cardiac rehabilitation procedure codes 93797 and 93798 are benefits of Texas Medicaid.

The appropriate procedure code must be billed with one of the following diagnosis codes:

Diagnosis Codes									
40201	41000	41001	41002	41010	41011	41012	41020	41021	41022
41030	41031	41032	41040	41041	41042	41050	41051	41052	41060
41061	41062	41070	41071	41072	41080	41081	41082	41090	41091
41092	4139	4148	4149	4271	42741	4280	4281	42820	42821
42822	42823	42830	42831	42832	42833	42840	42841	42842	42843
4289	V151	V421	V422	V433	V4581	V4582			

Coverage of cardiac rehabilitation programs is considered reasonable and necessary only for clients for whom there is documentation of any of the following conditions within the 12 months immediately preceding the beginning of the program:

- Acute myocardial infarction
- Coronary artery bypass surgery (CABG)
- Percutaneous transluminal coronary angioplasty or coronary stenting
- Heart valve repair or replacement
- Major pulmonary surgery
- Sustained ventricular tachycardia or fibrillation
- Class III or class IV congestive heart failure
- Chronic stable angina

Note: A cardiac rehabilitation program in which the cardiac monitoring is done using telephonically transmitted electrocardiograms (ECGs) to a remote site is not a benefit of Texas Medicaid.

Cardiac rehabilitation must be provided in a facility that has the necessary cardiopulmonary, emergency, diagnostic, and therapeutic life-saving equipment (e.g., oxygen, cardiopulmonary resuscitation equipment, or defibrillator) available for immediate use.

Cardiac rehabilitation is limited to 2 one-hour sessions per day for 18 weeks per rolling year and can not exceed 36 sessions.

Cardiac rehabilitation may be considered medically necessary beyond 36 sessions if the client has another documented cardiac event or if the prescribing physician documents that a continuation of cardiac rehabilitation is medically necessary. To confirm that a continuation of cardiac rehabilitation is at the request of or is coordinated with the prescribing physician, the medical record must include evidence of communication between the cardiac rehabilitation staff and the prescribing physician. If the physician responsible for such follow-up is the medical director, then the physician's notes must be evident in each client's chart.

Additional cardiac rehabilitation sessions must be prior authorized and must not exceed a total of 36 sessions for 52 weeks from the date of authorization of additional sessions.

If no clinically-significant arrhythmia is documented during the first three weeks of the program, the physician may give the order for the client to complete the remaining portion of the cardiac rehabilitation without telemetry monitoring.

Although cardiac rehabilitation may be considered a form of physical therapy, it is a specialized program that is conducted by personnel who are not physicians but are trained in both basic and advanced cardiac life support techniques and exercise therapy for coronary disease and who provide the services under the direct supervision of a physician.

Direct supervision of a physician means that a physician must be immediately available and accessible for medical consultations and emergencies at all times when items and services are being furnished under cardiac rehabilitation programs.

9.2.17.1 Prior Authorization for Cardiac Rehabilitation

Prior authorization is not required for the initial 36 sessions of cardiac rehabilitation.

Cardiac rehabilitation may be considered medically necessary beyond 36 sessions in the following circumstances:

- The medical record must support the client has had another cardiac event; or
- The prescribing physician documents that a continuation of cardiac rehabilitation is medically necessary. Documentation must include the following:
 - Progress made from the beginning of cardiac rehabilitation period to the current service request date, including progress towards previous goals.
 - Information that supports the client's capability of continued measurable progress.
 - A proposed treatment plan for the requested extension dates with specific goals related to the client's individual needs.

Requests for prior authorization for additional sessions that exceed a total of 36 sessions in 52 weeks will not be granted. Prior authorization must be obtained through the TMHP Special Medical Prior Authorization (SMPA) Department.

9.2.17.2 Reimbursement

The evaluation provided by the cardiac rehabilitation team at the beginning of each cardiac rehabilitation session is not considered a separate service and will be included in the reimbursement for the cardiac rehabilitation session. Evaluation and management (E/M) services unrelated to cardiac rehabilitation may be billed with modifier 25 appended to the E/M code when a separately identifiable E/M service was provided on the same day by the provider that rendered cardiac rehabilitation. Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client's medical record and made available to Texas Medicaid upon request.

Physical and occupational therapy will not be reimbursed when furnished in addition to cardiac rehabilitation exercise program services unless there is also a diagnosis of a non-cardiac condition that requires such therapy, e.g., a client who is recuperating from an acute phase of heart disease and may have had a stroke that requires physical and/or occupational therapy.

Client education services, such as formal lectures and counseling on diet, nutrition, and sexual activity, that help a client adjust living habits because of the cardiac condition; will not be separately reimbursed when the services are provided as part of the cardiac rehabilitation program.

9.2.18 Casting, Splinting, and Strapping

Casting, splinting, and strapping supplies are considered part of the procedure and are not reimbursed separately. The following procedure codes for casting, splinting, and strapping are a benefit of Texas Medicaid:

Procedure Codes									
29000	29010	29015	29035	29040	29044	29046	29049	29055	29058
29065	29075	29085	29086	29105	29125	29126	29130	29131	29200
29220	29240	29260	29280	29305	29325	29345	29355	29358	29365
29405	29425	29435	29440	29445	29450	29505	29515	29520	29530
29540	29550	29580							

When a claim for casting, splinting, or strapping is submitted with the same date of service as a surgery, the surgery may be reimbursed and the procedure codes listed in the table above will be denied as part of another procedure.

The replacement of a cast, splint, or strapping is not included in the original surgical fee and may be reimbursed separately. Reimbursement for cast removal, windowing, wedging, or repair will be denied if submitted for reimbursement within six weeks of the initial cast application, splinting, or strapping by the same provider.

Procedure Codes					
29700	29705	29710	29720	29730	29740

The following procedure codes for cast removal, windowing, wedging, or repair may be reimbursed to a provider other than the provider who applied the initial cast, splint, or strap:

Procedure Codes							
29700	29705	29710	29720	29730	29740	29750	29799

Authorization is not required for casting, splinting, or strapping services.

The following table includes the procedure codes that will be denied when submitted for reimbursement with other casting, splinting, and strapping procedure codes:

Procedure Codes That Will Be Denied	When Submitted With Any of These Procedure Codes
36000, 36410, 37202, 51701, 51702, 51703, 62318, 62319, 64415, 64416, 64417, 64450, 96360, 96365, 96372, 96374, or 96375	29000, 29010, 29015, 29035, 29040, 29044, 29046, 29049, 29055, 29058, 29065, 29075, 29085, 29086, 29105, 29125, 29126, 29130, 29131, 29200, 29220, 29240, 29260, 29280, 29305, 29325, 29345, 29355, 29358, 29365, 29405, 29425, 29435, 29440, 29445, 29450, 29505, 29515, 29520, 29530, 29540, 29550, 29580, 29700, 29705, 29710, 29720, 29730, 29740, 29750, or 29799
29035	29040, 29044, or 29046

Procedure Codes That Will Be Denied	When Submitted With Any of These Procedure Codes
29044	29046
29075	29065, 29105, or 29425
29085, 29125, 29126, or 29705	29065 or 29075
29105	29065
11055, 11056, 11057, or 29125	29425
12001, 12002, 12035, 29125, or 29705	29105
12001, 28190, 28192, 28193, 29130, 29131, 29260, or 29700	29075
29705	29435
12002	29125, 29530, or 29580
12001, 12032, 12042, 12044, 13121, 13132, 29130, or 29260	29125
29305	29325
29365 or 29425	29345
29405	29345, 29425, or 29740
29345, 29365, 29405, or 29425	29355
29440, 29580, 29700, or 29705	29405 or 29425
29580	29515 or 29705
29730	29405
29540	29425, 29505, 29515, or 29580
29730 or 29740	29445
29515	29505
11055, 11056, or 29550	29515
11900, 12004, or 29550	29540
12004, 15852, 29550, or 29700	29580
G0127, 11719, or 11900	29550
15852	29705

9.2.19 Cardiopulmonary Resuscitation (CPR)

CPR (procedure code 92950) is a benefit of Texas Medicaid and may be reimbursed when medical necessity is documented in the client’s medical record. Only the primary provider performing CPR may be reimbursed for procedure code 92950. CPR billed as an ambulance service by an ambulance provider will be denied.

CPR may be billed with the same date of service as critical care when reported as a separately identifiable procedure. The time spent performing CPR must not be included in the time reported as critical care.

9.2.20 Chemotherapy

Chemotherapy infusion procedure codes listed in the following table are comprehensive codes that include all supplies, catheters, and solutions necessary to safely administer the necessary chemotherapeutic agents either by or under the supervision of the physician, but do not include the provision of the chemotherapeutic agents:

Procedure Codes									
96401	96402	96405	96406	96409	96411	96413	96415	96416	96417

Procedure Codes									
96420	96422	96423	96425	96440	96446	96450	96521	96522	96523
96542	96549								

The appropriate E/M procedure code must be billed by a physician for a face-to-face visit with the patient to review chemotherapy options.

9.2.20.1 Chemotherapy Procedure Codes

Procedure code 51720 should be used for intravesical instillation of anti carcinogenic agents into the bladder including retention time.

The chemotherapy administration procedure codes 96440, 96446, and 96450 include payment for the surgical procedure; separate reimbursement for the surgical codes will not be allowed. These procedure codes may be paid in addition to E/M procedure codes billed on the same day, regardless of the place of service billed.

Chemotherapeutic drugs and other injections given in the course of chemotherapy may be billed separately and reimbursed using the appropriate procedure codes.

For the first 15 minutes, up to the first hour of chemotherapy infusion, procedure code 96409 or 96413 must be used for a single or initial chemotherapeutic medication. Procedure code 96411 must be used for each additional chemotherapeutic medication given and must be billed with procedure code 96409 or 96413.

Procedure code 96415 must be used for each additional hour beyond the initial hour and must be used in conjunction with procedure code 96413.

Procedure code 96417 must be used for one additional hour per subsequent infusion and must be used in conjunction with procedure code 96413. Procedure code 96415 may be used for each additional hour.

Procedure code 96425 must be used when initiating an infusion that will take more than eight hours and requires using an implanted pump or a portable pump.

Procedure code 96422 must be used for the first hour of intra-arterial push administration. Procedure code 96423 must be used for each additional hour in conjunction with procedure code 96422.

Chemotherapy administration by push technique (procedure codes 96409 and 96420) and by infusion technique (procedure codes 96413 and 96422) are reimbursed when billed for the same date of service.

Only one intravenous push administration (procedure code 96409) and only one intra-arterial push administration (procedure code 96420) will be allowed per day, regardless of whether separate drugs are given.

Evaluation and management (E/M) services related to other services and procedures being performed may be billed with modifier 25 appended to the E/M code. Documentation that supports the provision of that significant, separately identifiable E/M service must be maintained in the client’s medical record and made available to Texas Medicaid upon request. Modifier 25 use is subject to retrospective review.

Prolonged infusion of chemotherapeutic agents is reimbursed using procedure codes 95991, 96413, 96415, 96416, 96417, 96422, 96423, and 96425.

Inpatient and outpatient hospitals must use revenue code 636 for the reimbursement of the technical component. The appropriate chemotherapy procedure code must be listed on the claim.

9.2.21 Circumcisions

Texas Medicaid may provide reimbursement for circumcisions billed with procedure code 54150 or procedure code 54161. Circumcisions performed on clients who are 1 year of age and older must be documented with medical necessity.

Refer to: Subsection 9.2.45.1, “Circumcisions for Newborns,” in this handbook for additional benefit information.

9.2.22 Closure of Wounds

The repair of wounds is defined as simple, intermediate, or complex. Simple repair involves the dermis and subcutaneous tissue and requires a one-layer closure. Intermediate repair requires some layered closure of deeper layers of subcutaneous tissue and superficial fascia. Complex repair involves more layered closure, debridement, extensive undermining, stints, or retention sutures.

Wound closures may use sutures, staples, or tissue adhesives. Wounds closed with adhesive strips must not be reported using wound closure procedure codes. When adhesive strips are the only wound closure material used, providers must report the most appropriate E/M visit procedure code on their claim.

Simple exploration of nerves, blood vessels, or tendons exposed in an open wound is considered inclusive to the wound closure and will not be reimbursed separately.

The lengths of multiple closures of wounds must be added together and billed as one procedure code if they meet at least one of the following criteria:

- The closures have the same CPT classification (see “Repair [Closure]” in the CPT manual).
- The closures are in anatomic sites that are grouped together in the same procedure code descriptor.

Providers must submit the procedure code that represents the total length of the repairs. Lengths of repairs from different CPT classifications or groupings of anatomic sites must be billed as separate procedure codes.

Wound closures must be billed using the following procedure codes:

Procedure Codes									
Repair Simple									
12001	12002	12004	12005	12006	12007	12011	12013	12014	12015
12016	12017	12018	12020	12021					
Repair Intermediate									
12031	12032	12034	12035	12036	12037	12041	12042	12044	12045
12046	12047	12051	12052	12053	12054	12055	12056	12057	
Repair Complex									
13100	13101	13102	13120	13121	13122	13131	13132	13133	13151
13152	13153	13160							

Multiple wounds on the same day will be paid the full allowed amount for the major (largest total length of the repair at the same anatomic site) wound and one-half the allowed amount for each additional laceration (total length of the repair at the same anatomic site).

No separate payment will be made for incision closures billed in addition to a surgical procedure when the closure is part of that surgical procedure.

No separate payment will be made for supplies in the office.

When the debridement is carried out separately without immediate primary closure, when gross contamination requires prolonged cleansing, or when large amounts of devitalized or contaminated tissue are removed, debridement may be reimbursed separately. Debridement rendered during the same surgical session as wound closure is considered inclusive to the closure and is not reimbursed separately.

Refer to: Subsection 9.2.71.11, “Supplies, Trays, and Drugs,” in this handbook for the hospital-based emergency department.

Wound suture and wound closure are considered part of any surgical procedure performed on the same area, except for excision of benign or malignant lesion procedure codes that require more than simple closure. Providers may be reimbursed for the appropriate intermediate or complex closure procedure code. Multiple surgery guidelines apply.

The exceptions listed above apply to the following excision and closure procedure codes:

Excision of Benign Lesion Procedure Code									
11400	11401	11402	11403	11404	11406	11420	11421	11422	11423
11424	11426	11440	11441	11442	11443	11444	11446		

Excision of Malignant Lesion Procedure Codes									
11600	11601	11602	11603	11604	11606	11620	11621	11622	11623
11624	11626	11640	11641	11642	11643	11644	11646		

Intermediate Closure Procedure Codes									
12031	12032	12034	12035	12036	12037	12041	12042	12044	12045
12046	12047	12051	12052	12053	12054	12055	12056	12057	

Complex Closure Procedure Codes									
13100	13101	131022	13120	13121	13122	13131	13132	13133	13151
13152	13153	13160							

9.2.23 Cochlear Implants

Cochlear implants, when medically indicated, are benefits of Texas Medicaid with prior authorization. A cochlear implant device (procedure code 69930) is an electronic instrument, part of which is implanted surgically to stimulate auditory nerve fibers, and part of which is worn externally to capture and amplify sound. These devices are available in single and multichannel models. Cochlear implants are used to provide awareness and identification of sound and to facilitate communication for persons who are profoundly hearing impaired.

Refer to: Subsection 3.2.1, “Cochlear Implants,” in the *Vision and Hearing Services Handbook (Vol. 2, Provider Handbooks)* for additional information on benefit and authorization requirements for cochlear implants.

9.2.24 Continuous Glucose Monitoring (CGM)

CGM (procedure codes 95250 and 95251) is a benefit of Texas Medicaid with prior authorization.

Procedure codes 95250 and 95251 are limited to once per 12 calendar months by any provider.

The rental or purchase of a continuous glucose monitoring system (CGMS) is considered part of the CGM and is not reimbursed separately.

9.2.24.1 Prior Authorization for Continuous Glucose Monitoring

CGM requires prior authorization and must be prescribed by a physician performing the glucose monitoring.

CGM may be prior authorized for clients with Type I diabetes or diabetes during pregnancy, including gestational diabetes. The client must be compliant with his or her current medical regimen, use insulin injections three or more times per day or be on an insulin pump, and have documented self-blood glucose monitoring at least four times per day. At least one or more of the following conditions must also be present:

- Frequent unexplained hypoglycemic episodes
- Unexplained large fluctuations in daily, preprandial blood glucose
- Episodes of ketoacidosis or hospitalization for uncontrolled glucose

Additional CGM services may be considered with documentation of medical necessity that indicates the client meets the criteria above and has a change in condition that would warrant a second procedure within 12 calendar months.

To avoid unnecessary denials, the physician must provide correct and complete information, including documentation of medical necessity for the requested services. The physician must maintain documentation of medical necessity in the client's medical record. The requesting provider may be asked for additional information to clarify or complete a request for the use of CGM.

9.2.25 Developmental and Neurological Assessment and Testing

The following types of developmental and neurological assessment and testing are benefits of Texas Medicaid when medically necessary:

- Assessment of aphasia (procedure code 96105)
- Developmental screening when performed outside of a Texas Health Steps (THSteps) medical checkup (procedure code 96110)
- Developmental testing (procedure code 96111)
- Neurobehavioral testing (procedure code 96116)

The physician must maintain documentation of medical necessity in the client's medical record. Retrospective review may be performed to ensure that the documentation supports the medical necessity of the service. The following information is required at least every six months to establish medical necessity:

- The physician's prescription that includes a description of the specific service being prescribed
- The treatment plan that includes a copy of the current evaluation and documented age of the child at the time of the evaluation

Re-evaluations are a benefit of Texas Medicaid only to address a clinical need, to provide the documentation needed to measure a client's status over time, and to direct the plan of care.

Procedure codes 96105, 96110, 96111, and 96116 are used to report medically necessary developmental and neurological assessment and testing.

Administration of the Mini-Mental State Exam (MMSE) is considered part of an E/M service and will not be reimbursed separately.

Prior authorization is not required for aphasia assessment, developmental screening, developmental testing, and neurobehavioral status exam.

9.2.25.1 Assessment of Aphasia

Aphasia assessment (procedure code 96105) is a benefit of Texas Medicaid when medically necessary and is limited to diagnosis codes 7843, 78451, and 78459. Procedure code 96105 is limited to two services per rolling year, any provider.

9.2.25.2 Developmental Screening

Developmental screening using a recommended standardized screening tool (procedure code 96110) is a benefit of Texas Medicaid for clients who are birth through 20 years of age. Separate reimbursement for developmental screening completed without the use of one of the recommended standardized screening tools is not a benefit.

Developmental screening is limited to once per rolling year, any provider, outside of a THSteps medical checkup when medically necessary. This screening should only be completed for a diagnosis of suspected developmental delay or to evaluate a change in the client's developmental status outside of a THSteps medical checkup.

Developmental screening should be used to identify clients who are birth through 6 years of age and who may need a more comprehensive evaluation. Results of developmental screening may guide or identify the need for further testing. Clients who have abnormal screening results must be referred to an appropriate provider for further testing. Clients who are birth through 35 months of age with suspected developmental delay must be referred to Texas Early Childhood Intervention (ECI) within 48 hours.

Refer to: Subsection 2.7, "Early Childhood Intervention (ECI) Services," in the *Children's Services Handbook (Vol. 2, Provider Handbooks)* for additional information on the Texas ECI program.

Subsection 5.3.11.1.2, "Developmental Surveillance or Screening," in the *Children's Services Handbook (Vol. 2, Provider Handbooks)* for additional information on developmental screening for THSteps checkups.

Standardized screening (procedure code 96110) is not a benefit when completed to meet day care, Head Start, or school program requirements unless completed during an acute care visit in a clinic setting.

9.2.25.3 Developmental Testing

Developmental testing (procedure code 96111) is a benefit of Texas Medicaid for clients who are birth through 20 years of age.

Developmental testing must consist of an extended evaluation and include the use of a standardized assessment tool. Developmental testing is medically necessary when there is suspected developmental delay supported by clinical evidence. Developmental testing is only medically indicated when clinical evidence suggests the following:

- Suspected developmental delay or atypical development cannot be clearly diagnosed through clinical interview or standardized screening tools alone.
- Retesting of a client to evaluate a change in developmental status that results in a change of treatment plan.

Procedure code 96111 is limited to two services per rolling year, any provider.

Developmental testing performed when a development delay or a change in the client's developmental status is not suspected, is not a benefit of Texas Medicaid. Standardized testing (procedure code 96111) is not a benefit when completed to meet day care, Head Start, or school program requirements unless completed during an acute care visit in a clinic setting.

Providers cannot bill the client for developmental testing that is considered developmental screening.

9.2.25.4 Neurobehavioral Testing

A neurobehavioral examination (procedure code 96116) is a benefit of Texas Medicaid only when a medical or psychiatric diagnosis exists that establishes the need for a detailed evaluation of neurological impairment. Neurobehavioral testing is not medically necessary if a clinical interview alone would provide all the necessary diagnostic information.

Neurobehavioral testing is limited to the diagnosis codes listed in the following table:

Diagnosis Codes									
0460	04611	04619	04672	04679	05821	05829	2900	29010	29011

85250	85251	85252	85253	85254	85255	85256	85259	85300	85301
85302	85303	85304	85305	85306	85309	85310	85311	85312	85313
85314	85315	85316	85319	85400	85401	85402	85403	85404	85405
85406	85409	986	9941	9947	V110	V111	V112	V113	V114
V1552	V170	V401	V402	V6282	V6283	V6284	V6285	V695	V7101
V7102	V790	V791	V792	V793	V798	V8001	V8009		

Testing performed for other diagnoses constitute screening and are not covered by Texas Medicaid. Documentation maintained in the client’s medical record must support medical necessity for each test performed.

Procedure code 96116 is limited to four hours per day and eight hours per calendar year, any provider. Providers must bill the preponderance of each half hour of neurobehavioral testing and indicate that number of units on the claim form.

9.2.25.5 12-Hour Limitation for Procedure Codes 96110, 96111, and 96116

APRNs, PAs, and psychologists are limited to a maximum, combined total of 12 hours per day for developmental screening and testing, neurobehavioral testing, and inpatient and outpatient behavioral health services.

Because physicians (M.D. and D.O.) can delegate and may submit claims for services in excess of 12 hours per day, they are not subject to the 12-hour system limitation.

Developmental screening, developmental testing, and neurobehavioral testing are included in the 12-hour per day, per provider, system limitation. The following table lists the procedure codes that are included in the 12-hour per day system limitation, along with the time increments the system will apply based on the billed procedure code. The time increments applied will be used to calculate the 12-hour per day system limitation.

Procedure Code	Time Assigned by Procedure Code Description	Time Applied by System
96110	N/A	30 Minutes
96111	N/A	60 Minutes
96116	60 Minutes	60 Minutes

Refer to: Subsection 6.3, “The 12-Hour System Limitation,” in the *Behavioral Health, Rehabilitation, and Case Management Services Handbook (Vol. 2, Provider Handbooks)* for more information about procedure codes included in the 12-hour system limitation.

All providers, including physicians and all providers to whom they delegate services, are subject to retrospective review. HHSC and TMHP routinely perform retrospective reviews of all providers. All providers are subject to retrospective review for the total hours of services performed and billed in excess of 12 hours per day. Retrospective review may include:

- All E/M procedure codes, including those listed in the Evaluation and Management Section of the *CPT Manual*, billed with a diagnosis listed in the diagnosis table above under Neurobehavioral Testing
- All developmental and neurological assessment and testing procedure codes included in the 12-hour system limitation

Note: *Developmental and neurological assessment and testing procedure codes and behavioral health procedure codes are included in the review. If a provider provides developmental and neurological assessment and testing at more than one location, any of these services may be retrospectively reviewed.*

9.2.26 Diagnostic Tests

9.2.26.1 Ambulatory Blood Pressure Monitoring

Ambulatory blood pressure monitoring is a benefit of Texas Medicaid when used as a diagnostic tool to assist a physician in diagnosing hypertension in individuals whose blood pressure is either elevated, or inconclusive when evaluated in the office alone.

Ambulatory blood pressure monitoring may also be used for the following:

- Clients with established hypertension under treatment
- Evaluating refractory or resistant blood pressure
- Evaluating symptoms such as light-headedness corresponding with blood pressure changes
- Evaluating nighttime blood pressure
- Examining diurnal patterns of blood pressure

Ambulatory blood pressure monitoring is indicated for the evaluation of one of the following conditions:

- White coat hypertension, which is defined as the following:
 - Blood pressure measurements taken in the clinic or office are greater than 140/90 mm Hg on at least three separate visits, with two separate measurements made at each visit.
 - At least two separately documented blood pressure measurements taken outside of the clinic or office that are less than 140/90 mm Hg.
 - There is no evidence of end-organ damage.
- Resistant hypertension
- Hypotensive symptoms as a response to hypertension medications
- Nocturnal angina
- Episodic hypertension
- Syncope

Ambulatory blood pressure monitoring is for diagnostic purposes only.

Use procedure codes 93784, 93786, 93788, and/or 93790 to bill in 24-hour increments for ambulatory blood pressure monitoring. Ambulatory blood pressure monitoring is limited to two services per lifetime, any provider. Ambulatory blood pressure monitoring performed more than twice per lifetime may be considered when documentation of medical necessity is submitted with the claim.

9.2.26.2 Ambulatory Electroencephalogram (Ambulatory EEG)

Ambulatory EEG monitoring or 24-hour ambulatory monitoring is a covered benefit for clients in whom a seizure diathesis is suspected but not defined by history, physical, and resting EEG.

Benefits are limited to 3 units (each unit 24 hours) for each physician for the same client per 6 months when medically necessary.

Use the following procedure codes to bill ambulatory EEG: 95950, 95951, 95953, and 95956.

Procedure codes 95950, 95951, 95953, and 95956 may be reimbursed when billed with the following diagnosis codes:

Diagnosis Codes									
2930	2948	33111	33119	3315	33182	3332	34500	34501	34510
34511	3452	3453	34540	34541	34550	34551	34560	34561	34570
34571	34580	34581	34590	34591	64940	64941	64942	64943	64944
7790	7797	78032	78033	78039	78097	85011	85012		

Other diagnosis codes may be considered on appeal with supporting medical documentation to the TMHP Medical Director.

9.2.26.3 Bone Marrow Aspiration, Biopsy

Physicians may bill procedure code 85097 if interpretation is for smear interpretation, or procedure code 88305 if interpretation is for preparation and interpretation of cell block. If both procedure codes 85097 and 88305 are billed, procedure code 88305 is paid and procedure code 85097 is denied.

Physicians may bill procedure code 85097 or 88305 for preparation and interpretation of the specimen.

9.2.26.4 Cytopathology Studies—Other Than Gynecological

Procurement and handling of the specimen for cytopathology of sites other than vaginal, cervical, or uterine is considered part of the client’s E/M and will not be reimbursed separately.

Procedure codes 88160, 88161, and 88162 are reimbursed according to the POS where the cytopathology smear is interpreted.

9.2.26.5 Echoencephalography

Echoencephalography (procedure code 76506) is medically indicated for the following conditions or diagnosis codes:

Diagnosis Codes									
0065	01300	01301	01302	01303	01304	01305	01306	01310	01311

9.2.26.6 Electrocardiogram (ECG)

Electrocardiograms (ECG) are a benefit of Texas Medicaid when used for the evaluation and management (E/M) of a confirmed or suspected primary disease of the heart, pericardium, and coronary arteries or when necessary for management of diseases that are not primarily cardiac, but can affect the heart directly or indirectly.

ECGs are limited to six treatments for each client, by any provider per benefit period.

For ECGs, a benefit period is defined as 12 consecutive months, beginning with the month the client receives the first ECG.

The following procedure codes may be reimbursed for ECGs: 93000, 93005, 93010, 93040, 93041, and 93042.

Claims that are denied for exceeding the six-ECG limitation may be appealed with documentation supporting medical necessity. The documentation must include the following:

- Diagnosis
- Treatment history
- Documentation of why additional ECGs are needed

The report of the professional component (the interpretation) for the ECG must be a complete written report that includes relevant findings and appropriate comparisons.

The interpretation may appear on the actual tracing.

When the ECG is performed in conjunction with the performance of an evaluation and management (E/M) service, the interpretation may appear with a progress note or other report of the E/M service; however, if the ECG is billed as a separate service from the E/M service, the interpretation should contain the same information as a report made upon the tracing itself.

A simple notation of “ECG/EKG normal” without an accompanying tracing will not suffice as documentation of a separately payable interpretation.

Appropriate documentation, which includes a copy of the ECG tracing, must be kept in the client’s medical record. Documentation must support the medical necessity of the ECG. Documentation may appear on the actual tracing or with a progress note or report. Documentation is subject to retrospective review.

Only an ECG interpretation that directly contributes to the diagnosis and treatment of a client may be considered for reimbursement. Services, such as routine admission ECGs performed without medical indications, that do not directly contribute to the diagnosis and treatment of an individual client are not considered medically necessary.

9.2.26.6.1 Prior Authorization for ECG

Prior authorization is not required for ECGs performed in the emergency room or inpatient hospital setting.

Prior authorization is required for more than six ECGs in a rolling 12-month period.

Requests for additional ECGs must be submitted on the Special Medical Prior Authorization (SMPA) Request Form along with documentation of medical necessity.

Providers may request a prior authorization up to 12 months in advance. When requesting retroactive authorization, a provider must submit the request no later than 14 calendar days after the ECG is completed.

Before submitting a prior authorization request for an ECG, a provider must have a completed SMPA Request Form that has been signed and dated by a physician who is familiar with the client. All signatures and dates must be current, unaltered, original, and handwritten. Computerized or stamped signatures/dates will not be accepted. The completed SMPA Request Form must include the procedure codes and numerical quantities for the services requested. The completed SMPA Request Form with the original dated signature must be maintained by the prescribing physician in the client's medical record.

The SMPA Request Form must include all of the following information, which is related to medical necessity:

- Procedure requested (CPT)
- Diagnosis
- Treatment history
- Treatment plan

Prior authorization requests submitted by paper, must be faxed or mailed with the completed SMPA Request Form to the SMPA department and a copy of the signed and dated form must be retained in the client's medical record at the provider's place of business. Requests may be faxed or mailed to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway
Austin, TX 78727
Fax: 1-512-514-4213

Requests for prior authorization can also be submitted online through the TMHP website at www.tmhp.com.

9.2.26.7 Esophageal pH Probe Monitoring

Esophageal pH monitoring uses an indwelling pH microelectrode positioned just above the esophageal sphincter. The pH electrode and skin reference electrode are connected to a battery-powered pH meter and transmitter worn as a shoulder harness. The esophageal pH is monitored continuously and a strip chart is used to record the pH determinations. The patient is usually monitored for a 24-hour period. Esophageal pH monitoring is a medically appropriate adjunct procedure to help establish the presence or absence of gastroesophageal reflux.

Esophageal pH probe monitoring should be coded with procedure codes 91034, 91035, and 78262.

Esophageal pH probe testing (procedure codes 78262, 91034, and 91035) are limited to two services per rolling year, same procedure, any provider.

Claims that are denied for exceeding two services per rolling year may be considered on appeal with documentation of one of the following:

- The client is new and the provider has been unsuccessful in obtaining the client's previous records from a different provider.
- The provider is not aware that the client received previous esophageal testing.

Only one appeal will be considered per client, for the same provider. Providers must request prior authorization for any additional esophageal testing performed after the appealed service.

9.2.26.7.1 Prior Authorization

Esophageal pH probe testing (procedure codes 78262, 91034, and 91035) require prior authorization for services that exceed two per rolling year.

Requests for additional testing may be considered when submitted with documentation of medical necessity that supports, but is not limited to, the following:

- Adult's unintentional weight loss is more than 5 percent of their normal body weight in a span of 12 months or less
- Child's weight loss is 3 to 5 percent of their body mass in less than 30 days
- Symptoms of gastroesophageal reflux disease (GERD) that include heartburn and regurgitation that do not respond to treatment with medication
- Atypical symptoms of GERD, such as chest pain, coughing, wheezing, hoarseness, and sore throat

Prior authorization requests must be submitted to the Special Medical Prior Authorization Department using the Special Medical Prior Authorization (SMPA) Request Form. The completed prior authorization request form must be maintained by the requesting provider and the prescribing physician. The original, signed copy must be kept by the physician in the client's medical record.

9.2.26.8 Helicobacter Pylori (H. pylori)

Initial testing for H. pylori may be performed using the following tests:

- Serology testing (procedure codes 83009 and 86677)
- Stool testing (procedure code 87338)
- Breath testing (procedure codes 78267, 78268, 83013, and 83014)

Serology testing for H. pylori is a noninvasive diagnostic procedure that is preferred for initial diagnosis but is not indicated after a diagnosis has been made. Serology testing is not indicated or covered for monitoring a response to therapy.

Procedure codes 83009 and 86677 are allowed once per lifetime when submitted by any provider. A second test may be considered on appeal with documentation that indicates the original test result was negative for H. pylori.

Urea breath tests (UBTs) and fecal antigen tests provide reliable means of identifying active H. pylori infection before antibiotic therapy. UBTs are the most reliable non-endoscopic test to document eradication of H. pylori infection.

H. pylori is accepted as an etiologic factor in duodenal ulcers, peptic ulcer disease, gastric carcinoma, and primary B cell gastric lymphoma. H. pylori testing may be indicated for symptomatic clients who have a documented history of chronic/recurrent duodenal ulcer, gastric ulcer, or chronic gastritis. The history must delineate the failed conservative treatment for the condition.

H. pylori testing is not indicated or covered for any of the following:

- New onset uncomplicated dyspepsia.
- New onset dyspepsia responsive to conservative treatment (e.g., withdrawal of nonsteroidal anti-inflammatory drugs [NSAID] and/or use of antisecretory agents). If the treatment does not prove successful in eliminating the symptoms, further testing may be indicated to determine the presence of H. pylori.
- Screening for H. pylori in asymptomatic clients.
- Dyspeptic clients requiring endoscopy and biopsy.

H. pylori testing is not indicated under the following circumstances:

- There has been a negative endoscopy in the previous 90 days.
- An endoscopy is planned.
- H. pylori is of new onset and still being treated.

H. pylori testing will be denied if it is performed within 90 days of an upper gastrointestinal endoscopy. Procedure codes 78267, 78268, 83013, 83014, and 87338 may be reimbursed within the 90 days if the provider submits documentation that indicates the client was tested for eradication after treatment.

If a follow-up breath or stool test is used to document eradication of H. pylori, the medical record documentation must verify the history of the following previous complication(s):

- The client remains symptomatic after a treatment regimen for H. pylori.
- The client is asymptomatic after H. pylori eradication therapy but has a history of hemorrhage, perforation, or outlet obstruction from peptic ulcer disease.
- The client has a history of ulcer on chronic NSAID or anticoagulant therapy.

Testing for H. pylori eradication after the completion of antibiotic therapy (procedure codes 78267, 78268, 83013, 83014, and 87338) will be denied if billed less than 35 days after the initial test.

Procedure code 87339 is not a benefit of Texas Medicaid.

9.2.26.9 Myocardial Perfusion Imaging

Refer to: Subsection 3.2.1, “Cardiac Nuclear Imaging,” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

9.2.26.10 Pediatric Pneumogram

A pediatric pneumogram (procedure code 94772) is a 12-hour to 24-hour recording of breathing effort, heart rate, oxygen level, and airflow to the lungs during sleep. The study is useful in identifying abnormal breathing patterns, with or without bradycardia, especially in premature infants.

The following diagnosis codes may be reimbursed for a pediatric pneumogram in infants from birth through 11 months of age:

Diagnosis Codes									
5300	53010	53011	53012	53013	53019	53081	7685	7686	7689
769	7707	77081	77082	77083	77084	77087	77088	77089	78603
78606	78607	78609	79982	99739					

A pediatric pneumogram is limited to two services without prior authorization when submitted with one of the diagnosis codes listed above. Additional studies may be considered under CCP with documentation of medical necessity, and will require prior authorization.

Refer to: Section 2: "Medicaid Children's Services Comprehensive Care Program (CCP)" in the *Children's Services Handbook (Vol. 2, Provider Handbooks)*.

EMGs, polysomnography, EEGs, and ECGs are denied when billed on the same day as a pediatric pneumogram.

Pediatric pneumograms are reimbursed on the same day as an apnea monitor (rented monthly) if documentation supports the medical necessity.

Pneumogram supplies are considered part of the technical component and are denied if billed separately.

9.2.27 Diagnostic Doppler Sonography

Diagnostic Doppler sonography is a benefit of Texas Medicaid when treatment decisions depend on the results. Authorization is not required for diagnostic Doppler services.

A vascular diagnostic study may be personally performed by a physician or by a technologist. The accuracy of noninvasive vascular diagnostic studies depends on the knowledge, skill, and experience of the technologist and physician performing and interpreting the study. Consequently, the physician who performs and/or interprets the study must be able to document training through recent residency training or post-graduate continuing medical education and experience and must maintain that documentation for post-payment review.

If noninvasive vascular diagnostic studies are performed by a technologist, the technologist must have demonstrated competency in ultrasound by receiving one of the following credentials in vascular ultrasound technology:

- Registered Vascular Specialist (RVS) provided by Cardiovascular Credentialing International (CCI)
- Registered Vascular Technologist (RVT) provided by the American Registry of Diagnostic Medical Sonographers (ARDMS)
- Vascular Sonographer (VS) provided by the American Registry of Radiologic Technologists (ARRT), Sonography

Alternately, such studies must be performed in a facility or vascular laboratory accredited by one of the following nationally recognized accreditation organizations. If a vascular laboratory or facility is accredited, the technologists performing noninvasive cerebrovascular arterial studies in that laboratory are considered to have demonstrated competency in cerebrovascular ultrasound:

- American College of Radiology (ACR) Vascular Ultrasound Accreditation Program
- Intersocietal Commission for the Accreditation of Vascular Laboratories (ICAVL)

Cerebrovascular Doppler Studies

Cerebrovascular Doppler sonography includes both extracranial and transcranial (intracranial) studies. Cerebrovascular Doppler sonography should not be used when treatment decisions will not be affected by the findings.

Cerebrovascular Doppler studies for the diagnosis of migraine are considered experimental and are not a benefit of Texas Medicaid.

Extracranial arterial Doppler (procedure codes 93880 and 93882) are limited to the following diagnosis codes:

Diagnosis Codes											
2373	34200	34201	34202	34210	34211	34212	34280	34281	34282

** Use diagnosis code 4449 to report paradoxical cerebral embolism									
*** Use diagnosis code 7802 when symptomatology indicates a strong clinical suspicion of vertebrobasilar insufficiency									
**** Use diagnosis code 7859 to report carotid bruit									

In addition to the diagnosis codes listed in the table above, procedure codes 93886 and 93888 are benefits for clients who are 2 through 16 years of age with sickle cell disease to evaluate the risk of stroke when submitted with the following diagnosis codes: 28260, 28261, 28262, 28263, 28264, 28268, or 28269.

Peripheral Arterial Doppler Studies

Peripheral arterial Doppler (procedure codes 93922, 93923, 93924, 93925, 93926, 93930, and 93931) are limited to the following diagnosis codes (unless otherwise indicated):

Diagnosis Codes								
25070	25071	25072	25073	3530	41000	41001	41002	41010
41011	41012	41020	41021	41022	41030	41031	41032	41040

*** This diagnosis code may not be reimbursed when submitted with procedure code 93930 or 93931								

Peripheral Venous Doppler Studies

Peripheral venous Doppler (procedure codes 93965, 93970, and 93971) are limited to the following diagnosis codes:

Diagnosis Codes								
41511	41512	41519	4162	4449*	4510	45111	45119	4512
45181	45182	45183	45184	45189	4519	4532	45340	45341
45342	45350	45351	45352	4536	45371	45372	45373	45374
45375	45376	45377	45379	45381	45382	45383	45384	45385
45386	45387	45389	4540	4541	4542	4548	45910	45911

99960	99961	99962	99963	99969	99970	99971	99972	99973
99974	99975	99976	99977	99978	99979	9998	99983	99984
99985	V420	V4581	V7283**					
* Use diagnosis code 4449 only for paradoxical embolism								
** Use diagnosis code V7283 only for preoperative venous studies								

Doppler echocardiography color flow velocity mapping (procedure code 93325) must be billed with one of the corresponding procedure codes in column B to be considered for reimbursement:

Column A Procedure Code	Column B Procedure Codes
93325	76825, 76826, 76827, 76828, 93303, 93304, 93307, 93308, 93312, 93314, 93315, 93317, 93320, 93321, or 93350

Limitations for Diagnostic Doppler Sonography

Documentation of medical necessity for the diagnostic Doppler study must be maintained by the ordering provider in the client’s medical record.

Procedure codes described as complete bilateral studies are inclusive codes, and right and left studies billed on the same day will be reimbursed at a quantity of one.

Diagnostic Doppler procedure codes are limited to one study per day, same provider.

When medically necessary, multiple Doppler procedures (e.g., studies of extracranial arteries and intracranial arteries) billed on the same day by the same provider will be reimbursed at full fee for the first study and one-half fee for each additional study, regardless of the number of services billed.

The use of transcranial Doppler studies performed for the assessment of stroke risk in clients who are 2 through 16 years of age who have sickle cell anemia should be limited to once every 6 months.

The use of a simple hand-held or other Doppler device that does not produce hard copy output or that does not permit analysis of bidirectional vascular flow is considered part of the physical examination of the vascular system and is not separately reported.

9.2.28 Evoked Response Tests and Neuromuscular Procedures

The following services are a benefit of Texas Medicaid:

- Autonomic function test (AFT)
- Electromyography (EMG)
- Nerve conduction studies (NCS)
- Evoked potential (EP) testing
- Motion analysis studies

9.2.28.1 Autonomic Function Tests

AFTs are a benefit of Texas Medicaid when submitted with procedure codes 95921, 95922, 95923, 95924, and 95943.

Procedure codes 95921, 95922, and 95923 are limited to once per date of service, by the same provider.

Autonomic disorders may be congenital or acquired (primary or secondary). Some of the conditions under which autonomic function testing may be appropriate include, but are not limited to, the following:

- Amyloid neuropathy
- Diabetic autonomic neuropathy
- Distal small fiber neuropathy
- Excessive sweating
- Gastrointestinal dysfunction
- Idiopathic neuropathy
- Irregular heart rate
- Multiple system atrophy
- Orthostatic symptoms
- Pure autonomic failure
- Reflex sympathetic dystrophy or causalgia (sympathetically maintained pain)
- Sjogren's syndrome

The reason for the referral, the specific autonomic function being tested, and a clear diagnostic impression must be documented in the client's medical record for each AFT performed.

The client's medical records must clearly document the medical necessity for the AFT. The medical record documentation must reflect the actual results of specific tests (such as latency and amplitude).

Medical necessity for reevaluation of a client (beyond the initial consultation and testing) must be clearly documented in the client’s medical record. Supporting documentation includes, but is not limited to, the following:

- The client has new symptoms unrelated to those previously evaluated, suggestive of a new diagnosis.
- Evidence that the client’s condition is changing rapidly, supported by the following:
 - Diagnosis
 - Current clinical signs and symptoms
 - Prior clinical condition
 - Expected clinical disease course
- Clinical benefit of additional studies.

The client’s medical records are subject to retrospective review. Wave form recordings obtained during the testing will aid documentation requirements in cases where a review becomes necessary.

9.2.28.2 Electromyography and Nerve Conduction Studies

Electromyography (EMG) and nerve conduction studies (NCS), collectively known as electrodiagnostic (EDX) testing, must be medically indicated and may be reimbursed with the diagnosis codes listed below. Testing must be performed using EDX equipment that provides assessment of all parameters of the recorded signals. Studies performed with devices designed only for screening purposes rather than diagnoses are not a benefit of Texas Medicaid.

Diagnosis Codes for Electrodiagnostic Testing									
1922	1923	25060	25061	25062	25063	2650	2651	2691	2725
27730	27739	33383	33399	3350	33510	33511	33519	33520	33521

72283	72291	72292	72293	7230	7234	7235	72400	72401	72402
72409	7241	7242	7243	7244	7245	7249	7280	7282	72881
72887	7289	7291	7292	7295	73605	73606	73609	73679	7812
7814	7817	7820	78449	78451	78459	78821	78830	78831	78832

Diagnosis Codes for Electrodiagnostic Testing									
78833	78834	78835	78836	78837	78838	78839	95200	95201	95202
95203	95204	95205	95206	95207	95208	95209	95210	95211	95212
95213	95214	95215	95216	95217	95218	95219	9522	9523	9524
9528	9529	9530	9531	9532	9533	9534	9535	9538	9539
9540	9541	9548	9549	9550	9551	9552	9553	9554	9555
9556	9557	9558	9559	9560	9561	9562	9563	9564	9565
9568	9569	9570	9571	9587	9579				

In addition to the diagnoses listed in the preceding table the following procedure codes may also be reimbursed with the following diagnosis codes:

Procedure Code	Diagnosis Codes
51784, 51785	56032, 72403, 78760, 78761, 78762, 78763
95860, 95861, 95863, 95864, 95866, 95867, 95868, 95869, 95870, 95872, 95875, 95905	72403, 78492
95937	72403, 78492, 78760, 78761

Any EDX testing procedures may be reimbursed up to four different dates of service per calendar year, same provider. Any E/M service will be denied as part of another service when billed for the same date of service as EMG or NCS service by the same provider.

The reason for the referral, the specific site(s) tested, and a clear diagnostic impression must be documented in the client’s medical record for each NCS or EMG study performed.

The client’s medical records must clearly document the medical necessity for the NCS and EMG testing. The medical record documentation must reflect the actual results of specific tests (such as latency and amplitude).

Medical necessity for re-evaluation of a client (beyond the initial consultation and testing) must be clearly documented in the client’s medical record. Supporting documentation includes, but is not limited to, the following:

- The client has new symptoms unrelated to those previously evaluated, suggestive of a new diagnosis. Examples may include suspected:
 - Peripheral nerve entrapment syndromes
 - Other neuropathies (traumatic, metabolic, or demyelinating)
 - Neuromuscular junction disorders (myasthenia gravis, botulism)
 - Myopathies (dermatomyositis, congenital myopathies)
 - Unexplained symptoms suggestive of peripheral nerve, muscle or neuromuscular junction pathology, manifested by muscle weakness, muscle atrophy, loss of dexterity, spasticity, sensory deficits, swallowing dysfunction, diplopia, or dysarthria
- The client’s diagnosis could not be confirmed on previous studies, although suspected.
- Evidence exists that the client’s condition is changing rapidly, supported by the following:
 - Diagnosis
 - Current clinical signs and symptoms
 - Prior clinical condition

- Expected clinical disease course
- There is clinical benefit of additional electrodiagnostic studies.

The client’s medical records are subject to retrospective review. NCS hard copies of the wave form recordings obtained during the testing will aid documentation requirements in cases where a review becomes necessary.

9.2.28.2.1 EMG

The following EMG procedure codes may be reimbursed for one service per day, each procedure, by the same provider:

Procedure Codes									
51784	51785	95860	95861	95863	95864	95865	95867	95868	95869
95872	95875								

Procedure code 95866 may be reimbursed up to two services per day, same provider. Procedure code 95870 may be reimbursed in multiple quantities if specific muscles are documented.

The needle EMG examination must be performed by a physician specially trained in electrodiagnostic medicine, as these tests are simultaneously performed and interpreted.

Surface or macro-EMG testing is considered experimental and is not a benefit of the Texas Medicaid.

9.2.28.2.2 NCS

NCS are reimbursed by Texas Medicaid with documentation of medical necessity using the following procedure codes:

Procedure Codes									
95885	95886	95887	95905	95907	95908	95909	95910	95911	95912
95913	95933	95937							

NCS must be performed by one of the following:

- A physician
- A trained individual under the direct supervision of a physician. (Direct supervision means that the physician is in close physical proximity to the electrodiagnostic laboratory while testing is underway, immediately available to provide the trained individual with assistance and direction, and responsible for selecting the appropriate NCS to be performed.)

When the same studies are performed on unique sites by the same provider for the same date of service, studies for the first site must be billed without a modifier and studies for each additional site must be billed with modifier XE, XP, XS, or XU, indicating a distinct procedural service. Modifier 59 should be used when modifier XE, XP, XS, or XU is not appropriate.

Procedure codes 95907, 95908, 95909, 95910, 95911, 95912, and 95913 may be reimbursed only once when multiple sites on the same nerve are stimulated or recorded.

Authorization is required when the number of nerve conduction studies performed during an evaluation exceeds the following maximum number of studies:

Procedure Code	Limitation
95885, 95886	Reimbursed once per extremity up to 4 units, using any combination of procedure codes, per day, any provider.
95885, 95886, 95887	Must be billed with one of the primary procedure codes 95907, 95908, 95909, 95910, 95911, 95912, or 95913.

Procedure Code	Limitation
95905	1 study per limb, per day, same provider. Claims may be submitted with a quantity of no more than 2 per detail line. Will be denied if billed on the same date of service by the same provider as procedure codes 95907, 95908, 95909, 95910, 95911, 95912, or 95913.
95933	Up to 2 studies per day, same provider.
95937	Up to 3 studies per day, per procedure, same provider without prior authorization.

Since the need for additional NCS or alternate procedures may be determined following initiation of the evaluation, a request for retroactive authorization may be submitted no later than seven calendar days beginning the day after testing is completed.

Medical record documentation must establish medical necessity for the additional studies, including:

- Other diagnosis in the differential that require consideration. The provider should note:
 - The additional diagnoses considered.
 - The clinical signs, symptoms, or electrodiagnostic findings that necessitated the inclusion.
- Multiple diagnoses are established by nerve conduction studies; the recommendations in the table above for a single diagnostic category do not apply. The provider should document all diagnoses established as a result of EDX testing.
- Testing of an asymptomatic contralateral limb to establish normative values for an individual client (particularly the elderly, diabetic, and clients with a history of ethyl alcohol [ETOH] usage).
- Comorbid clinical conditions are identified. The clinical condition must be one that may cause sensory or motor symptoms, for example:
 - Underlying metabolic disease (such as thyroid condition or diabetes mellitus)
 - Nutritional deficiency (alcoholism)
 - Malignant disease
 - Inflammatory disorder (including but not limited to lupus, sarcoidosis or Sjögren's syndrome)

Texas Medicaid recognizes that EDX testing is tailored to the clinical findings of an individual client. It is, however, the expectation that testing be guided by accepted practice parameters and physician guidelines. The number of studies performed should be the minimum needed to establish an accurate diagnosis. Texas Medicaid, consistent with the American Association of Neuromuscular & Electrodiagnostic Medicine (AANEM) recommendations, believes the recommendations of the AANEM to be a reasonable maximum number of studies for the documented clinical conditions as noted in the CPT manual. The AANEM recommendations will be used in determination of medical necessity of additional tests requested with prior authorization.

9.2.28.3 Evoked Potential Testing

Evoked potential (EP) tests are a benefit of Texas Medicaid when medically necessary. The most common EP tests are:

- Brainstem auditory evoked potentials (BAEPs)
- Motor evoked potentials (MEPs)
- Somatosensory evoked potentials (SEPs)
- Visual evoked potentials (VEPs)

Each EP test (procedure codes 92585, 92586, 95925, 95926, 95927, 95928, 95929, 95930, 95938, or 95939) is considered a bilateral procedure and is limited to once per date of service any provider regardless of modifiers that indicate multiple sites were tested.

EP tests may be reimbursed up to four services per rolling year, any combination of services by any provider. Claims that exceed the limitation of four services per rolling year may be considered for reimbursement on appeal with documentation that supports the medical necessity.

Intraoperative neurophysiology testing (procedure codes 95940 and 95941) is a benefit when performed in addition to each evoked potential test on the same day.

The documentation for the intraoperative neurophysiology testing must include the time for which each test is performed.

Procedure codes 95940 and 95941 are limited to a maximum of two hours per date of service, per client, per provider.

Procedure codes 95940 and 95941 must be billed in conjunction with one of the following procedure codes or the service will be denied:

Procedure Codes									
92585	95822	95860	95861	95867	95868	95870	95907	95908	95909
95910	95911	95912	95913	95925	95926	95927	95928	95929	95930
95933	95937								

Procedure codes 95940 and 95941 cannot be reported by the surgeon or anesthesiologist.

The reason for the referral, the specific nerve evoked potential being tested, and a clear diagnostic impression must be documented in the client’s medical record for each EP study performed.

The client’s medical records must clearly document the medical necessity for the EP testing. The medical record documentation must reflect the actual results of specific tests (such as latency and amplitude).

Medical necessity for re-evaluation of a client (beyond the initial consultation and testing) must be clearly documented in the client’s medical record. Supporting documentation includes, but is not limited to, the following:

- The client has new symptoms unrelated to those previously evaluated, suggestive of a new diagnosis.
- Evidence exists that the client’s condition is changing rapidly, supported by the following:
 - Diagnosis
 - Current clinical signs and symptoms
 - Prior clinical condition
 - Expected clinical disease course
- There is clinical benefit of additional studies.

The client’s medical records are subject to retrospective review. Wave form recordings obtained during the testing will aid documentation requirements in cases where a review becomes necessary.

9.2.28.3.1 Visual Evoked Potentials

Some of the conditions under which VEP testing (procedure code 95930) may be appropriate include, but are not limited to, the following:

- Identification of persons at increased risk for developing clinically definite multiple sclerosis.
- Diagnosing, monitoring, and assessing treatment response in multiple sclerosis.

- Localizing the cause of a visual field defect not explained by lesions seen on CT or MRI, or by metabolic disorders or infectious disease.
- Evaluating the signs and symptoms of visual loss in persons who are unable to communicate (e.g., unresponsive persons, non-verbal persons).
- Evaluating clients who experience double vision, blurred vision, loss of vision, eye injuries, head injuries, or weakness of the eyes, arms, or legs.

9.2.28.4 Motion Analysis Studies

Motion analysis studies (procedure codes 96000, 96001, 96002, and 96003) are a benefit of Texas Medicaid for clients who are 3 through 20 years of age.

Procedure codes 96000, 96001, 96002, and 96003 are limited to one per date of service by the same provider and two per rolling year, any provider.

In the following table, the procedure codes in Column A will be denied when they are submitted on the same date of service by the same provider as the procedure codes in Column B:

Column A (Denied)	Column B
96000	96001
95860, 95861, 95863, 95864, 95865, 95866, 95869, 95870, 95872	96002 or 96003

Documentation must include the following information that indicates the client meets all the requirements for motion analysis studies. The client must be:

- Ambulatory for a minimum of ten consecutive steps, with or without assistive devices.
- At least three years of age.
- Physically able to tolerate up to three hours of testing.

The reason for the referral and a clear diagnostic impression must be documented in the client’s medical record for each motion analysis study performed.

The client’s medical records must clearly document the medical necessity for the motion analysis study. The medical record documentation must reflect the actual results of specific tests.

Medical necessity for re-evaluation of a client (beyond the initial consultation and testing) must be clearly documented in the client’s medical record. Supporting documentation includes, but is not limited to, the following:

- The client has new symptoms unrelated to those previously evaluated, suggestive of a new diagnosis.
- Evidence exists that the client’s condition is changing rapidly, supported by the following:
 - Diagnosis
 - Current clinical signs and symptoms
 - Prior clinical condition
 - Expected clinical disease course
- There is clinical benefit of additional studies.

The client’s medical records are subject to retrospective review.

9.2.29 Extracorporeal Membrane Oxygenation (ECMO)

ECMO may be effective on a short-term basis for clients with life-threatening respiratory and/or cardiac insufficiency.

ECMO may be reimbursed for clients who have the following clinical indications (this is not an all-inclusive list):

- Persistent pulmonary hypertension
- Meconium aspiration syndrome
- Respiratory distress syndrome
- Adult respiratory distress syndrome
- Congenital diaphragmatic hernia
- Sepsis
- Pneumonia
- Preoperative and postoperative congenital heart disease or heart transplantation
- Reversible causes of cardiac failure
- Cardiomyopathy
- Myocarditis
- Aspiration pneumonia
- Pulmonary contusion
- Pulmonary embolism

The following procedure codes may be used when billing ECMO:

Procedure Codes									
33946	33947	33948	33949	33951	33952	33953	33954	33955	33956
33957	33958	33959	33962	33963	33964	33965	33966	33969	33984
33985	33986	33987	33988	33989					

Terminal disease with expectation of short survival, advanced multiple organ failure syndrome, irreversible central nervous system injury and severe immunosuppression are contraindications to ECMO. Claims for ECMO services may be recouped if the services are provided in the presence of these conditions.

The initial 24 hours of veno-venous (VV) ECMO should be submitted using procedure code 33946. Procedure code 33948 should be used for each additional 24 hours. Procedure code 33946 is denied as part of procedure code 33948 if submitted with the same date of service. Procedure codes 33946 and 33948 are limited to one per day when billed by any provider.

The initial 24 hours of veno-arterial (VA) ECMO should be submitted using procedure code 33947. Procedure code 33949 should be used for each additional 24 hours. Procedure code 33947 is denied as part of procedure code 33949 if submitted with the same date of service. Procedure codes 33947 and 33949 are limited to one per day when billed by any provider.

If insertion of VV cannula (procedure codes 33951, 33952, 33953, 33954, 33955, and 33956) for prolonged extracorporeal circulation for cardiopulmonary insufficiency is submitted by the same provider with the same date of service as procedure code 33946 or 33948, the insertion of the cannula is denied, and the ECMO (procedure code 33946 or 33948) is considered for reimbursement.

If insertion of VA cannula (procedure codes 33951, 33952, 33953, 33954, 33955, and 33956) for prolonged extracorporeal circulation for cardiopulmonary insufficiency is submitted by the same provider with the same date of service as procedure code 33947 or 33949, the insertion of the cannula is denied, and the ECMO (procedure code 33947 and 33949) is considered for reimbursement.

9.2.30 Family Planning

Physicians, PAs, NPs, CNSs, and CNMs are encouraged to provide family planning services to Texas Medicaid clients, especially pregnant and postpartum clients. No separate enrollment is required. Providers are reimbursed for family planning services through Texas Medicaid (Title XIX) or through the DSHS Family Planning Program.

Refer to: Section 2, “Medicaid Title XIX family planning services” in the *Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks)*.

Section 3, “Texas Women’s Health Program” in the *Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks)*.

9.2.31 Gynecological Health Services

Gynecological examinations, surgical procedures, and treatments are benefits of Texas Medicaid.

Refer to: Section 5, “Gynecological Health Services” in the *Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks)* for information about contraception, sterilizations, and family planning annual examinations.

9.2.32 Hospital Visits

Refer to: Subsection 9.2.59, “Physician Evaluation and Management (E/M) Services,” in this handbook.

9.2.33 Hyperbaric Oxygen Therapy (HBOT)

Physicians who bill for the professional component of HBOT must use procedure code 99183. Hospital providers who bill for the chamber time must use procedure code G0277 with revenue code 413.

Note: *Although oxygen may be administered by mask, cannula, or tube in addition to the hyperbaric treatment, the use of oxygen by mask, or other device, or applied topically is not considered hyperbaric treatment in itself.*

Texas Medicaid recognizes the following indications for HBOT, as approved by the Undersea and Hyperbaric Medical Society (UHMS):

- Air or gas embolism
- Carbon monoxide poisoning
- Central retinal artery occlusion
- Compromised skin grafts and flaps
- Crush injuries, compartment syndrome, and other acute traumatic ischemias
- Decompression sickness
- Delayed radiation injury (soft tissue and bony necrosis)
- Diabetic foot ulcer
- Severe anemia
- Clostridial myositis and myonecrosis (gas gangrene)
- Intracranial abscess
- Necrotizing soft tissue infections
- Refractory osteomyelitis
- Acute thermal burn injuries

HBOT is not a replacement for other standard successful therapeutic measures.

Texas Medicaid considers HBOT experimental and investigational for any indications other than the ones approved by UHMS and outlined in this section. Non-covered indications include, but are not limited to, autism and traumatic brain injury.

Oxygen administered outside of a hyperbaric chamber, by any means, is not considered hyperbaric treatment.

The physician must be in constant attendance of hyperbaric oxygen therapy during compression and decompression of the chamber and may not delegate the rendering of the service. Both the facility’s medical record and the client’s medical record must contain documentation to support that there was a physician in attendance who provided direct supervision of the compression and decompression phases of the HBOT treatment. All documentation pertaining to HBOT is subject to retrospective review.

9.2.33.1 Prior Authorization for HBOT

HBOT procedure codes 99183 and G0277 require prior authorization. Prior authorization requests submitted for procedure code G0277 must also include revenue code 413. When requesting prior authorization, providers should use the [Special Medical Prior Authorization \(SMPA\) Request Form](#) on the TMHP website at www.tmhp.com.

Refer to: Section 5: Fee-for-Service Prior Authorizations for detailed information about prior authorization requirements.

The prior authorization request must include documentation that supports medical necessity and is specific to each appropriate covered indication as listed in the following table:

Covered Indication	Total 30-Minute Intervals Allowed for Procedure Code G0277	Total Professional Sessions Allowed for Procedure Code 99183	Medical Necessity Documentation of the Following is Required
Air or gas embolism	6	2	Evidence that gas bubbles are detectable by ultrasound, Doppler or other diagnostics
Carbon monoxide poisoning - initial authorization	15	5	Persistent neurological dysfunction secondary to carbon monoxide inhalation
Carbon monoxide poisoning - one subsequent authorization	9	3	Evidence of continuing improvement in cognitive functioning
Central retinal artery occlusion	36	6	Evidence of central retinal artery occlusion with treatment initiated within 24 hours of the occlusion
Compromised skin grafts and flaps - initial authorization	80	10	Evidence the flap or graft is failing because tissue is/has been compromised by irradiation or there is decreased perfusion or hypoxia
Compromised skin grafts and flaps - one subsequent authorization	40	5	Evidence of stabilization of graft or flap

Note: The following Wagner wound classification grades apply only to the diabetic foot ulcer indications:
Grade 1: Superficial diabetic ulcer
Grade 2: Ulcer extension - involves ligament, tendon, joint capsule or fascia (No abscess or osteomyelitis)
Grade 3: Deep ulcer with abscess or osteomyelitis
Grade 4: Gangrene to portion of forefoot
Grade 5: Extensive gangrene of foot

Covered Indication	Total 30-Minute Intervals Allowed for Procedure Code G0277	Total Professional Sessions Allowed for Procedure Code 99183	Medical Necessity Documentation of the Following is Required
Crush injury, compartment syndrome and other acute traumatic ischemias	36	12	Adjunct to standard medical and surgical interventions
Decompression sickness	28	1	Diagnosis based on signs and/or symptoms of decompression sickness after a dive or altitude exposure
Diabetic foot ulcer - initial authorization	60	30	After at least 30 days of standard medical wound therapy, with a wound pO ₂ less than 40 mmHg AND wound classified as Wagner grade 3 or higher. *
Diabetic foot ulcer - two subsequent authorizations	60	20	Evidence of continuing healing and wound pO ₂ less than 40 mmHg
Severe anemia	50	10	Hgb less than 6.0 sustained secondary to hemorrhage, hemolysis, or aplasia, when the client is unable to be cross matched or refuses transfusion because of religious beliefs
Clostridial myositis and myonecrosis (gas gangrene)	39	13	Evidence of unsuccessful medical and/or surgical wound treatment and positive Gram-stained smear of the wound fluid
Necrotizing soft tissue infections - initial authorization	36	12	Evidence of unsatisfactory response to standard medical and surgical treatment and advancement of dying tissue
Necrotizing soft tissue infections - two subsequent authorizations	15	5	Evidence that advancement of dying tissue has slowed
Delayed radiation injury (soft tissue and bony necrosis) -initial authorization	40	10	Evidence of unsatisfactory clinical response to conventional treatment
Delayed radiation injury - one subsequent authorization	40	10	Evidence of improvement demonstrated by clinical response
Refractory osteomyelitis - initial authorization	40	10	Evidence of unsatisfactory clinical response to conventional multidisciplinary treatment
Refractory osteomyelitis - one subsequent authorization	15	5	Evidence of improvement demonstrated by clinical response

Note: The following Wagner wound classification grades apply only to the diabetic foot ulcer indications:
Grade 1: Superficial diabetic ulcer
Grade 2: Ulcer extension - involves ligament, tendon, joint capsule or fascia (No abscess or osteomyelitis)
Grade 3: Deep ulcer with abscess or osteomyelitis
Grade 4: Gangrene to portion of forefoot
Grade 5: Extensive gangrene of foot

Covered Indication	Total 30-Minute Intervals Allowed for Procedure Code G0277	Total Professional Sessions Allowed for Procedure Code 99183	Medical Necessity Documentation of the Following is Required
Acute thermal burn injury - initial authorization	45	15	Partial or full thickness burns covering greater than 20% of total body surface area OR with involvement of the hands, face, feet or perineum
Acute thermal burn injury - three subsequent authorizations	30	10	Evidence of continuing improvement demonstrated by clinical response
Intracranial abscess - initial authorization	15	5	Adjunct to standard medical and surgical interventions when one or more of the following conditions exist: Multiple abscesses Abscesses in a deep or dominant location Compromised host Surgery contraindicated or client is a poor surgical risk
Intracranial abscess - one subsequent authorization	15	5	Evidence of improvement demonstrated by clinical response and radiological findings
<p>Note: The following Wagner wound classification grades apply only to the diabetic foot ulcer indications: Grade 1: Superficial diabetic ulcer Grade 2: Ulcer extension - involves ligament, tendon, joint capsule or fascia (No abscess or osteomyelitis) Grade 3: Deep ulcer with abscess or osteomyelitis Grade 4: Gangrene to portion of forefoot Grade 5: Extensive gangrene of foot</p>			

Procedure code 99183 is authorized according to the number of professional sessions (total HBOT treatments), and procedure code G0277 is authorized according to the number of 30-minute intervals of chamber time. The units in the columns for procedure codes 99183 and G0277 represent the maximum number of sessions and intervals that are allowed for that procedure code per authorization.

Limitations beyond those listed in the table above are considered experimental and investigational.

In emergency situations, the prior authorization request must be submitted no later than three business days after the date the service is rendered. Providers must not submit a claim until the prior authorization request has been approved. If the request has not been approved, the claim will be denied.

9.2.34 Ilizarov Device and Procedure

Providers must use procedure codes 20692, 20693, 20694, and 20999 when submitting claims for the Ilizarov procedure. A global fee payment methodology is applied to the Ilizarov device procedure codes. Procedure codes 20692, 20693, 20694, and 20999 include the preconstruction, surgical application, adjustments to the device for up to 6 months, and the removal of the device.

Providers who bill for other external fixator devices, such as the Monticelli device, should continue to use procedure codes 20690 or 20692, where applicable, when billing for the surgical applications.

9.2.35 Immunization Guidelines and Administration

Texas Medicaid reimburses immunizations (vaccines and toxoids) that the Advisory Committee on Immunization Practices (ACIP) recommends as routine.

Providers must follow the most current ACIP recommendations unless they conflict with guidelines from the Texas Vaccines for Children (TVFC) Program, in which case providers must follow TVFC guidelines. Providers must also provide the appropriate vaccine information statements (VISs) produced by the Centers for Disease Control and Prevention (CDC). VISs explain the benefits and risks of the vaccines and toxoids administered.

Note: Administered vaccines and toxoids must be reported to DSHS. After obtaining consent, DSHS submits all reported vaccines and toxoids to a centralized repository of immunization histories. This lifespan registry is known in Texas as ImmTrac.

9.2.35.1 Administration Fee

An administration fee may be reimbursed for all covered vaccines and toxoids that are administered according to the ACIP. The following procedure codes may be reimbursed when billed for vaccine and toxoid administration:

Procedure Code					
90460	90461	90471	90472	90473	90474

Procedure codes 90460 and 90461 are benefits for services rendered to clients who are birth through 18 years of age when counseling is provided for the immunization administered.

Procedure codes 90471, 90472, 90473, and 90474 are benefits when counseling is not provided for the immunization administered. Procedure codes 90471 and 90472 may be reimbursed for services rendered to clients of any age. Procedure codes 90473 and 90474 are restricted to clients who are 20 years of age and younger.

The administration fee may be reimbursed when the procedure code for the vaccine or toxoid administered (regardless of the source of the vaccine or toxoid) and the administration fee procedure code are billed on the same claim with the same date of service. Only one administration fee may be reimbursed to any provider for each vaccine or toxoid administered per day.

The following vaccines and toxoids procedure codes are a benefit of Texas Medicaid for clients who are 20 years of age and younger based on the number of recognized components as follows:

Procedure Code	Number of Recognized Components**	Procedure Code	Number of Recognized Components**
90632	1	90633*	1
90636	2	90644	2
90647*	1	90648*	1
90649*	1	90650*	1
90654	1	90655*	1
90656*	1	90657*	1
90658*	1	90660*	1
90661	1	90670*	1
90673	1	90680*	1
90681*	1	90685*	1
90686*	1	90687*	1
90688*	1	90696*	4
90698*	5	90700*	3
90702*	2	90703	1
90707*	3	90710*	4

Procedure Code	Number of Recognized Components**	Procedure Code	Number of Recognized Components**
90713*	1	90714*	2
90715*	3	90716*	1
90721	4	90723*	5
90732*	1	90733	1
90734*	1	90743	1
90744*	1	90746	1
90748*	2	90749	1

* TVFC-distributed vaccine/toxoid
 ** The number of components applies if counseling is provided and procedure codes 90460 and 90461 are submitted.

Each vaccine or toxoid and its administration must be submitted on the claim in the following sequence: the vaccine procedure code immediately followed by the applicable immunization administration procedure code(s). All of the immunization administration procedure codes that correspond to a single vaccine or toxoid procedure code must be submitted on the same claim as the vaccine or toxoid procedure code.

Each vaccine or toxoid procedure code must be submitted with the appropriate “administration with counseling” procedure code(s) (procedure codes 90460 and 90461) or the most appropriate “administration without counseling” procedure code (procedure code 90471, 90472, 90473, or 90474). If an “administration with counseling” procedure code is submitted with an “administration without counseling” procedure code for the same vaccine or toxoid, the second administration of the vaccine or toxoid will be denied.

Administration with Counseling

Providers must submit claims for immunization administration procedure codes 90460 or 90461 based on the number of components per vaccine. Providers must specify the number of components per vaccine by billing 90460 and 90461 as defined by the procedure code descriptions:

- Procedure code 90460 is submitted for the administration of the first component.
- Procedure code 90461 is submitted for the administration of each additional component identified in the vaccine.

Procedure code 90461 will be denied if procedure code 90460 has not been submitted on the same claim for the same vaccine or toxoid.

The necessary counseling that is conducted by a physician or other qualified health-care professional must be documented in the client’s medical record.

The following is an example of how to submit claims for immunization administration procedure codes when counseling is provided:

Procedure Code	Quantity Billed
Vaccine or toxoid procedure code with 1 component	1
90460 (1 st component)	1
Vaccine or toxoid procedure code with 3 components	1
90460 (1 st component)	1
90461 (2 nd and 3 rd components)	2

Note: The term “components” refers to the number of antigens that prevent disease(s) caused by one organism. Combination vaccines are those that contain multiple vaccine components.

Administration without Counseling

Procedure codes 90471, 90472, 90473, and 90474 may be reimbursed per vaccine based on the route of administration.

The following is an example of how to submit claims for injection administration procedure codes when counseling is not provided:

Procedure Code	Quantity Billed
Vaccine or toxoid procedure code	1
90471 (Injection administration)	1
Vaccine or toxoid procedure code	1
90472 (Injection administration)	1
Vaccine or toxoid procedure code	1
90472 (Injection administration)	1

9.2.35.2 Documentation

Providers must document the following information in the client’s medical record, which is subject to retrospective review to determine appropriate utilization and reimbursement of this service:

- The vaccine or toxoid given
- The date of the vaccine or toxoid administration (day, month, year)
- The name of the vaccine or toxoid manufacturer and the vaccine or toxoid lot number
- The signature and title of the person administering the vaccine or toxoid
- The organization’s name and address
- The publication date of the VIS issued to the client, parent, or guardian
- The site at which the vaccine was given (recommended)

9.2.35.3 Vaccine Adverse Event Reporting System (VAERS)

VAERS encourages providers to report any adverse event that occurs after the administration of any vaccine in the United States, even if it’s unclear whether a vaccine caused it. The *National Childhood Vaccine Injury Act* (NCVIA) requires health-care providers to report:

- Any adverse event listed by the vaccine manufacturer as a contraindication to subsequent doses of the vaccine.
- Any reaction listed in the VAERS Reportable Events Table that occurs within the specified time period after vaccination.

Clinically significant adverse events should be reported even if it is unclear whether a vaccine caused the event.

Documentation of the injection site is recommended but not required.

A copy of the Reportable Events Table can be obtained by calling VAERS at 1-800-822-7967 or by downloading it from <http://vaers.hhs.gov/resources/vaersmaterialspublications>.

9.2.36 Immunizations for Clients Birth through 20 Years of Age

Administration of vaccines and toxoids to clients who are birth through 20 years of age may be a benefit of THSteps when provided as part of a THSteps medical checkup. A THSteps provider who bills vaccines and toxoids with diagnosis or age restrictions is subject to those restrictions. Providers must bill the claim with the diagnosis code that indicates the condition that necessitates the vaccine or toxoid. For clients who are birth through 20 years of age, diagnosis code V202 may be used.

Administration of vaccines and toxoids to clients who are birth through 20 years of age may be a benefit of CCP when the vaccine or toxoid is provided as part of an acute medical visit outside of a THSteps medical checkup.

9.2.36.1 Vaccine Coverage Through the TVFC Program

Providers may refer to the TVFC web site at www.dshs.state.tx.us/immunize/tvfc/default.shtm for information about the program and for a list of vaccines available through the program.

Note: *TVFC program resolutions do not always match the ACIP's general usage recommendations, but rather represent the rules that providers must follow when administering each specific vaccine under the TVFC.*

When a single antigen vaccine or toxoid or a comparable antigen vaccine or toxoid is available through TVFC, but the provider chooses to use a different ACIP-recommended product, the administration fee will be reimbursed but the vaccine or toxoid will not be reimbursed.

Although Texas Medicaid does not mandate that providers enroll in TVFC, Texas Medicaid will not reimburse providers when the vaccine is available through TVFC. Only the administration fee will be reimbursed through Texas Medicaid when the vaccine or toxoid procedure code is identified on the claim. Clients may not be billed for vaccines and toxoids that are available through TVFC.

If a vaccine or toxoid meets the definition of “not available” through TVFC, it may be separately reimbursed through CCP when billed with modifier U1. Modifier U1 may be used in the following situations:

- The TVFC, based on their federal resolution (distribution/guidelines), does not distribute an HHSC-approved vaccine or toxoid following the ACIP recommendation, and the provider purchases vaccine to administer to all ACIP-recommended ages or risk groups.
- A new vaccine or toxoid approved by the ACIP with established guidelines, but has not been negotiated or added to a TVFC contract
- Funding for new vaccine or toxoid has not been established by TVFC
- Insufficient vaccine and toxoid supply due to national supply or distribution issues, as reported to HHSC by TVFC

HHSC will notify providers if a vaccine or toxoid meets the definition of “not available” from TVFC and when the provider's privately purchased vaccine or toxoid may be billed with modifier U1. Modifier U1 must not be used due to a provider's failure to enroll in TVFC or to maintain sufficient TVFC vaccine or toxoid inventory.

Refer to: Subsection 5.1.3, “Texas Vaccines for Children (TVFC) Program,” in the *Children's Services Handbook (Vol. 2, Provider Handbooks)* for additional information about TVFC and immunizations for infants and children.

9.2.36.2 Vaccine and Toxoid Procedure Codes

The following vaccine and toxoid procedure codes may be reimbursed for Texas Medicaid clients who are birth through 20 years of age:

Procedure Code				
Bacillus Calmette-Guérin (BCG)				
<i>Refer to:</i> Subsection 9.2.9, “Bacillus Calmette-Guérin (BCG) Intravesical for Treatment of Bladder Cancer,” in this handbook.				
Hepatitis A and B				
90632	90633*	90636	90723*	90740
90743	90744*	90746	90747	90748*
Providers must document in the client’s medical record the indication for the hepatitis B vaccine, for dialysis patients. These records are subject to retrospective review to determine appropriate utilization of and reimbursement for this service.				
Procedure codes 96372 and 96374 may be reimbursed for the administration of hepatitis B vaccine procedure codes 90740 and 90747.				
Providers are expected to follow the ACIP recommendations for administration.				
Hepatitis B Immune Globulin				
90371	96372	96374	J1571	J1573
Providers must document in the client’s medical record the indication for the immunoglobulin. These records are subject to retrospective review to determine appropriate utilization of and reimbursement for this service.				
Intramuscular hepatitis B immune globulin (HBIG) may be reimbursed when medically necessary to provide coverage for acute exposure to the hepatitis B virus. HBIG is not provided through TVFC.				
Procedure codes 90371, J1571, and J1573 must be billed with diagnosis code V0179.				
Only one HBIG procedure code will be paid if billed with the same date of service by any provider as any other HBIG procedure code.				
Procedure codes 96372 and 96374 may be reimbursed for HBIG administration. Providers are expected to follow the ACIP recommendations for administrations.				
Hib				
90647*	90648*			
Human Papilloma (HPV)				
90649*	90650*			
Influenza				
90654	90655*	90656*	90657*	90658*
90660*	90661	90672*	90673	90685*
90686*	90687*	90688*		
Influenza vaccine is a benefit of Texas Medicaid for high-risk clients who are not covered by THSteps or TVFC or when the vaccine is not declared available through the TVFC.				
Texas Medicaid considers the influenza season in the United States to be October through the end of May.				
* Indicates a vaccine or toxoid distributed through TVFC. Vaccines and toxoids available through TVFC for clients who are birth through 18 years of age will not be reimbursed through Texas Medicaid. These vaccines and toxoids will be processed as informational.				

Procedure Code				
MMR and MMRV				
90707*	90710*			
Pneumococcal and Meningococcal				
90670*	90732*	90733	90734*	
The pneumococcal polysaccharide vaccine (procedure code 90732) is a benefit for Texas Medicaid clients who are not covered by the THSteps or TVFC programs				
The initial pneumococcal polysaccharide vaccine is limited to one per client per lifetime. For high-risk clients, revaccination is recommended once in a lifetime five years after the initial dose. Revaccination after a second dose is not a benefit of Texas Medicaid.				
Pneumococcal polysaccharide vaccine is not recommended for children who are birth through 23 months of age.				
Providers are expected to follow the ACIP recommendations for administrations.				
Poliovirus (IPV)				
90713*				
Rotavirus				
90680*	90681*			
Tetanus and Diphtheria				
90696*	90698*	90700*	90702*	90703
90714*	90715*	90721	90723*	
Unlisted				
90749				
Varicella Virus				
90716*				
* Indicates a vaccine or toxoid distributed through TVFC. Vaccines and toxoids available through TVFC for clients who are birth through 18 years of age will not be reimbursed through Texas Medicaid. These vaccines and toxoids will be processed as informational.				

9.2.37 Immunizations for Clients Who Are 21 Years of Age and Older

Vaccines and toxoids may be reimbursed through Texas Medicaid at a fee determined by HHSC when the vaccine is medically necessary. Providers are expected to follow the ACIP recommendations for administration.

The following immunizations are identified and recommended by the ACIP as medically-necessary for clients who are 21 years of age and older (this list is not all-inclusive):

Immunization Procedure Codes		
BCG		
<i>Refer to:</i> Subsection 9.2.9, “Bacillus Calmette-Guérin (BCG) Intravesical for Treatment of Bladder Cancer,” in this handbook.		
Hepatitis A		
90632		
Hepatitis B		
90740	90746	90747

Immunization Procedure Codes				
<p>Providers must document in the client’s medical record the indication for the hepatitis B vaccine, for dialysis patients. These records are subject to retrospective review to determine appropriate utilization of and reimbursement for this service.</p> <p>Procedure codes 96372 and 96374 may be reimbursed for the administration of hepatitis B vaccine procedure codes 90740 and 90747.</p>				
Hepatitis B Immune Globulin				
90371	96372	96374	J1571	J1573
<p>Providers must document in the client’s medical record the indication for the immunoglobulin. These records are subject to retrospective review to determine appropriate utilization of and reimbursement for this service.</p> <p>Intramuscular HBIg may be reimbursed when medically necessary to provide coverage for acute exposure to the hepatitis B virus. HBIg is not provided through TVFC.</p> <p>Procedure codes 90371, J1571, and J1573 must be billed with diagnosis code V0179.</p> <p>Only one HBIg procedure code will be paid if billed with the same date of service by any provider as any other HBIg procedure code.</p> <p>Procedure codes 96372 and 96374 may be reimbursed for HBIg administration.</p>				
Hepatitis A and B				
90636				
Human Papilloma (HPV)				
90649	90650			
Influenza				
90630	90654	90656	90658	90661
90662	90673	90686	90688	
<p>Influenza vaccine is a benefit of Texas Medicaid for all clients.</p> <p>Texas Medicaid considers the influenza season in the United States to be October through the end of May. The optimal time to receive influenza vaccine is as early in the season as it is available. However, clients should continue to receive influenza vaccine through March. The vaccine may be administered one time per influenza season.</p>				
Measles, Mumps, Rubella Vaccine (MMR)				
90707				
Pneumococcal Vaccine				
90670	90732			
<p>The initial pneumococcal polysaccharide vaccine is limited to one per client per lifetime. Revaccination is recommended five years (not interpreted to mean every five years) after the initial dose for high-risk individuals.</p> <p>Revaccination after a second dose is not reimbursed.</p>				
Shingles				
90736				
Shingles vaccine is a benefit of Texas Medicaid for clients who are 60 years of age and older.				
Tetanus				
90703	90714			

Immunization Procedure Codes
Tetanus, Diphtheria, and Acellular Pertussis Vaccine (Tdap)
90715

The specific diagnosis necessitating the vaccine or toxoid is required when billing the administration fee procedure code in combination with the appropriate vaccine procedure code.

9.2.38 Postexposure Prophylaxis for Rabies

Postexposure prophylaxis for rabies procedure codes 90375, 90376, and 90675 is a benefit of Texas Medicaid. Rabies vaccine for pre-exposure procedure code 90676 is not a benefit of Texas Medicaid.

Postexposure rabies vaccine is limited to clients with diagnosis code V015.

Animal bites to people must be reported as soon as possible to the Local Rabies Control Authority (LRCA).

Postexposure prophylaxis for rabies is not necessary following exposure to an animal that tests negative for the rabies virus.

An exposed person who has never received a complete pre- or postexposure rabies vaccine series will first receive a dose of rabies immune globulin (HRIG). This is a blood product that contains antibodies against rabies and gives immediate, short-term protection. The injection should be given in or near the wound area.

HRIG that is not administered when vaccination begins can be administered up to seven days after the administration of the first dose of vaccine. Beyond the seventh day, HRIG is not recommended since an antibody response to the vaccine is presumed to have occurred, and HRIG may inhibit the immune response to the vaccine.

The recommended dose of HRIG is 20 IU/kg body weight. This formula is applicable to all age groups, including children.

The postexposure treatment will also include five doses of rabies vaccine (1.0 ml. intramuscular). The first dose should be given as soon as possible after the exposure (day 0). Additional doses should be given on days 3, 7, 14, and 28 after the first shot. For an exposed person who has previously been vaccinated with a complete pre- or postexposure vaccine series, two doses of rabies vaccine should be given on days 0 and 3.

Health care providers, who determine their client requires the preventative rabies vaccination series after valid rabies exposure, may obtain the biologicals directly from the manufacturer or through one of the DSHS depots around the state.

Injection administration is a benefit for administration of rabies vaccine for post exposure.

9.2.38.1 Prior Authorization for Postexposure Rabies Vaccine

Prior authorization is not required for postexposure rabies vaccine. The physician must maintain documentation of the exposure in the client's medical record.

9.2.38.2 Limitations for Postexposure Rabies Vaccine

Reimbursement for postexposure rabies vaccine is limited to one per client per day, by any provider.

Reimbursement for postexposure rabies vaccine is limited to 5 occurrences per 90 rolling days. Claims billed for any vaccine given beyond 90 rolling days will be denied.

9.2.38.2.1 Obtaining Rabies Vaccine and HRIG from DSHS for PEP Use

Providers may obtain the vaccine and HRIG directly from the manufacturer. If a provider is not able to obtain the vaccine and/or HRIG directly, providers may contact DSHS local or state public health professionals.

For each potential rabies exposure, providers must consult with their local health department or the DSHS regional ZC program office that serves their area. Requests for consultations made to DSHS after-hours or on holidays should be directed to the DSHS On-Call Physician at 1-888-963-7111.

Local public health professionals or regional ZC staff will help providers determine whether or not the exposure situation warrants PEP. If the exposure situation is determined to be valid, providers will be given detailed information about how to obtain rabies vaccine and HRIG for the patient.

Providers can refer to the following DSHS web pages for the contact information of local public health professionals:

- Full Service Local Health Departments and Districts of Texas at www.dshs.state.tx.us/regions/lhds.shtm
- Zoonosis Control Branch at www.dshs.state.tx.us/idcu/health/zoonosis/contact/

- Regional DSHS ZC offices
- “Human Rabies Prevention—United States, 2008 Recommendations of the Advisory Committee on Immunization Practices”
- CDC rabies website at www.cdc.gov/rabies/

9.2.39 Medications - Injectable

Providers are responsible for administering drugs based on the FDA-approved guidelines. In the absence of FDA indications, a drug needs to meet the following criteria:

- The drug is recognized by the American Medical Association Drug Evaluations (AMA-DE), American Hospital Formulary Service Drug Information, the *U.S. Pharmacopoeia Dispensing Information*, Volume I, or two articles from major peer-reviewed journals that have validated and uncontested data supporting the proposed use for the specific medical condition as safe and effective.
- It is medically necessary to treat the specific medical condition, including life-threatening conditions or chronic and seriously debilitating conditions.
- The off-label use of the drug is not investigational or experimental.

Retrospective review may be performed to ensure documentation supports the medical necessity of the service.

Injections given in the physician’s office, the client’s home, or the nursing home may be reimbursed using the correct procedure code for the specific drug and dosage given. The following injections are benefits of Texas Medicaid and are subject to the indicated limitations:

Injected Drug	Procedure Code(s)	Limitation(s)
Adalimumab	J0135	Diagnosis limitations: 5550, 5551, 5552, 5559, 5560, 5561, 5562, 5563, 5564, 5565, 5566, 5568, 5569, 6960, 6961, 7140, 7141, 7142, 71430, 7200
Azacitidine (<i>Vidaza</i>)	J9025	Diagnosis limitations: 20502, 20510, 20512, 20522, 20532, 20582, 20592, 23872, 23873, 23874, 23875, 2850
Cladribine (<i>Leustatin</i>)	J9065	Diagnosis limitations: 20240, 20241, 20242, 20243, 20244, 20245, 20246, 20247, 20248, 20270, 20271, 20272, 20273, 20274, 20275, 20276, 20277, 20278
Denileukin diftitox (<i>Ontak</i>)	J9160	Benefit for clients who have advanced or recurrent cutaneous T-cell lymphoma with the CD25 component of IL-2 and failure of at least one type of traditional therapy. Documentation of diagnosis and treatment must be submitted with the claim.
Dimethyl sulfoxide	J1212	Diagnosis limitation: 5951
Eculizumab	J1300	Diagnosis limitations: 28311, 2832
Ferric carboxymaltose	J1439	Treatment may be indicated for, but is not limited to, treatment of iron deficiency anemia for adult clients with the following: <ul style="list-style-type: none"> • Intolerance or unsatisfactory response to oral iron • Non-dialysis-dependent chronic kidney disease
Galsulfase	J1458	Diagnosis limitation: 2775
Granisetron hydrochloride	J1626	Diagnosis limitations: V580, V5811, V5812, V661, or V662
Ibutilide fumarate	J1742	Diagnosis limitations: 42731 or 42732
Idursulfase (<i>Elaprase</i>)	J1743	Diagnosis limitation: 2775
Infliximab (<i>Remicade</i>)	J1745	Diagnosis limitations: 5550, 5551, 5552, 5559, 5560, 5561, 5562, 5563, 5565, 5566, 5568, 5569, 5651, 56981, 6960, 6961, 7140, 7141, 7142, 71430, or 7200 Documentation supporting the client’s inadequate response to methotrexate-only therapy must be maintained in the client’s file. The documentation is subject to retrospective review.
Iron Dextran	J1750	Treatment may be indicated for, but is not limited to, the following condition: Iron deficiency anemia when oral administration is unsatisfactory or impossible.
(Diagnosis limitations) The procedure code must be billed with one of the diagnosis codes listed.		

Injected Drug	Procedure Code(s)	Limitation(s)
Iron Sucrose (<i>Venofer</i>)	J1756	Treatment may be indicated for, but is not limited to, the following conditions: <ul style="list-style-type: none"> • Non-dialysis-dependent chronic kidney disease (NDD-CKD) for clients who are receiving erythropoietin. • NDD-CKD for clients who are not receiving erythropoietin. • Hemodialysis-dependent chronic kidney disease (HDD-CKD) for clients who are receiving erythropoietin. • Peritoneal dialysis-dependent chronic kidney disease (PDD-CKD) clients who are receiving erythropoietin.
Melphalan	J9245	Diagnosis limitations: 1740, 1741, 1742, 1743, 1744, 1745, 1746, 1748, 1749, 1750, 1759, 1830, 1860, 1869, 20300, or 20301
Natalizumab	J2323	Diagnosis limitations: 340, 5550, 5551, 5552, or 5559
Porfimer (<i>Photofrin</i>)	J9600	Diagnosis limitations: 1500, 1501, 1502, 1503, 1504, 1505, 1508, 1509, or 1978
Sodium Ferric Gluconate Complex in Sucrose (<i>Ferrlecit</i>)	J2916	Treatment may be indicated for, but is not limited to the following condition: Iron deficiency anemia in clients who are six years of age and older who are undergoing long term hemodialysis treatments and who are receiving supplemental epoetin therapy.
Sumatriptan succinate (<i>Imitrex</i>)	J3030	Diagnosis limitations: 34600, 34601, 34602, 34603, 34610, 34611, 34612, 34613, 34620, 34621, 34622, 34623, 34630, 34631, 34632, 34633, 34640, 34641, 34642, 34643, 34650, 34651, 34652, 34653, 34660, 34661, 34662, 34663, 34670, 34671, 34672, 34673, 34680, 34681, 34682, 34683, 34690, 34691, 34692, or 34693
Thyrotropin alpha for injection (<i>Thyrogen</i>)	J3240	Diagnosis limitations: 1613, 193, 2310, 2348, 2356, 2374, 2397, 2409, 24200, 24220, or V1087
Valrubicin sterile solution for intravesical instillation (<i>Valstar</i>)	J9357	Benefit for clients with the diagnosis of bladder cancer <i>in situ</i> who have been treated unsuccessfully with BCG therapy and have an unacceptable morbidity or mortality risk if immediate cystectomy should be performed. Documentation of diagnosis and treatment must be submitted with the claim.
(Diagnosis limitations) The procedure code must be billed with one of the diagnosis codes listed.		

Important: The 11-digit National Drug Code (NDC) must be submitted on the claim with the appropriate procedure code. The NDC submitted to Texas Medicaid must be the NDC on the package or container from which the medication was administered.

Refer to: Subsection 6.3.4, “National Drug Code (NDC),” in Section 6, “Claims Filing” (*Vol. 1, General Information*) for more information about filing claims with the NDC.

Refer to: Subsection 6.3.4.3, “Drug Rebate Program,” in Section 6, “Claims Filing” (*Vol. 1, General Information*) for information about the reimbursement of clinician-administered drugs and biologicals.

Note: *Physicians billing for injections, either intramuscular (IM) or subcutaneous (SQ) or intravenous administration (IV) in the inpatient hospital setting, skilled nursing facility or outpatient hospital will be denied, as these costs are included in the reimbursement methodology of the inpatient facility, skilled nursing facility, or the outpatient facility.*

Refer to: Subsection 2.2.1.3, “Drugs and Biologicals,” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for the reimbursement methodology for injections.

9.2.39.1 Abatacept (Orencia)

Abatacept is a benefit of Texas Medicaid for clients who have moderately to severely active rheumatoid arthritis. These clients may also have an inadequate response to one or more non-biological, disease-modifying antirheumatic drugs (DMARDs).

9.2.39.1.1 Prior Authorization for Abatacept (Orencia)

Providers must obtain prior authorization for procedure code J0129 to request reimbursement for abatacept. The prior authorization requests must include medical necessity documentation that contains the following information:

- Dates of treatment
- Diagnosis of adult RA or juvenile idiopathic arthritis (JIA)

Note: *A diagnosis of adult RA must conform to the American College of Rheumatology (ACR) RA classification that requires the following:*

- Presence of synovitis in at least one joint
- Absence of an alternative diagnosis to explain the synovitis
- A combined score of at least six out of ten on the level of involved joints, abnormality, and symptom duration from the individual scores in four domains:
 - The number and sites of involved joints
 - Serologic abnormality
 - Elevated acute-phase response
 - Symptom duration
- The number of anticipated doses
- The dosage to be administered

Prior authorization for an initial request for abatacept injections may be granted for six months for eight doses. Prior authorization will be considered when the client has an inadequate response after 12 weeks to a nonbiological DMARD such as methotrexate or sulfasalazine or one or more biological (injectable) DMARDs, such as adalimumab, etanercept, or tumor necrosis factor (TNF) antagonists. The inadequate response must be indicated by all of the following commonly used prognostic factors:

- Visual Analogue scale (VAS) (4 or greater on a pain scale from 0-10)
- Global Arthritis Score (GAS) (3 or greater with remission defined as less than 3)
- Health Assessment Questionnaire Disability Index (HAQDI) score (greater than 1)
- Evidence of radiographic erosions
- Elevated erythrocyte sedimentation rate (greater than 20 millimeters/hour)

- Elevated C-reactive protein level (greater than zero milligrams/deciliter)
- Elevated rheumatoid factor (RF) level (greater than 60 units/millimeter or a titer greater than 1:80 titer)
- Elevated anti-cyclic citrullinated peptide (anti-CCP) antibody level (20 units/millimeter or greater)

Prior authorization for a subsequent request must include all of the following:

- Documentation from the physician stating that there has been at least a 20-percent improvement as defined by the ACR
- The number of anticipated doses
- The dosage to be administered

Prior authorization for subsequent dosing may be given for a maximum of six doses when documentation supports medical necessity for continued treatment with abatacept.

The documentation of medical necessity must be maintained by the requesting provider in the client's medical record and is subject to retrospective review.

Prior authorization is a condition for reimbursement; it is not a guarantee of payment. Providers may fax or mail the prior authorization request to the TMHP Special Medical Prior Authorization Department at:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization Department
12357-B Riata Trace Parkway, Suite 100
Austin, TX 78727
Fax: 1-512-514-4213

9.2.39.2 Ado-trastuzumab entansine (Kadcyla)

Ado-trastuzumab entansine (Kadcyla), procedure code J9354, is a benefit of Texas Medicaid for clients of any age.

Documentation must be maintained by the treating physician in the client's medical record to support administration of Ado-trastuzumab entansine (Kadcyla).

At initiation of treatment, documentation must include all of the following:

- Evidence of HER2 positive breast cancer as evidenced by immunochemistry (IHC) test or fluorescent in situ hybridization (FISH) test
- Evidence of metastatic breast cancer
- Evidence demonstrating prior treatment for this diagnosis with trastuzumab and a taxane oncology agent separately or in combination
- Evidence demonstrating receipt of prior therapy for this diagnosis or recurrent disease, including the previous treatment protocol, within six months of completing adjuvant therapy.

9.2.39.3 Alatrofloxacin Mesylate (Trovan)

Texas Medicaid follows the recommendation of the FDA about the use of intravenous alatrofloxacin mesylate, (Trovan). Alatrofloxacin mesylate should be reserved for use *only* in the treatment of clients who meet all the following treatment criteria:

- Have at least one of the following infections judged by the treating physician to be serious and life- or limb-threatening:
 - Nosocomial pneumonia
 - Community-acquired pneumonia

- Complicated intra-abdominal infections (including postsurgical infections)
- Gynecologic and pelvic infections
- Complicated skin and skin-structure infections (including diabetic foot infections)
- Receive initial therapy in an inpatient health-care facility
- The treating physician believes that, given the new safety information, the benefit of the product to the client outweighs the risk.

9.2.39.4 Alglucosidase Alfa (Myozyme)

Alglucosidase alfa is a benefit of Texas Medicaid for clients of any age who are diagnosed with glycosidase, or Pompe disease (diagnosis code 2710).

9.2.39.4.1 Prior Authorization for Alglucosidase Alfa (Myozyme)

Providers must obtain prior authorization for procedure code J0220 or J0221 to request reimbursement for alglucosidase alfa. The prior authorization request must include medical necessity documentation that contains laboratory evidence of acid alpha-glucosidase (GAA) deficiency (i.e., below the laboratory-defined cutoff value as determined by the laboratory performing the GAA enzyme activity assay). Tissues used for the determination of GAA deficiency include blood, muscle, or skin fibroblasts.

Prior authorization is a condition for reimbursement; it is not a guarantee of payment. Providers may fax or mail prior authorization requests, including all required documentation, to the TMHP Special Medical Prior Authorization Department at:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization Department
12357-B Riata Trace Parkway, Suite 100
Austin, TX 78727
Fax: 1-512-514-4213

9.2.39.5 Amifostine

Amifostine is a benefit of Texas Medicaid for the reduction of the cumulative renal toxicity associated with administration of cisplatin in clients who have advanced ovarian cancer or non-small cell lung cancer with documentation of a creatinine clearance of 50 or less and where no other chemotherapeutic agent can be used.

Amifostine may also be used to reduce the incidence of moderate-to-severe xerostomia in clients undergoing postoperative radiation treatment for head and neck cancers where the radiation port includes a substantial portion of the parotid glands.

Amifostine may be reimbursed for the following indications:

- Bone marrow toxicity
- Cisplatin- and cyclophosphamide-induced (prophylaxis)
- Advanced solid tumors
- Head and neck carcinoma
- Malignant lymphoma
- Non-small cell lung cancer
- Myelodysplastic syndromes
- Nephrotoxicity
- Advanced ovarian carcinoma
- Melanoma

- Advanced solid tumors of non-germ cell origin
- Neurotoxicity
- Reduction in the incidence of mucositis in clients receiving radiation therapy, or radiation combined with chemotherapy
- Reduction in the incidence of xerostomia associated with postoperative radiation treatment of head and neck cancer, where the radiation port includes a substantial portion of the parotid glands

Providers must use procedure code J0207 with one of the following diagnosis codes:

Diagnosis Codes									
101	1400	1401	1403	1404	1405	1406	1408	1409	1410

9.2.39.6 Antibiotics and Steroids

Injectable antibiotic or steroid medications may be considered for reimbursement even if the same oral medications are appropriate and available. Injected antibiotics or steroid medications, when used in place of oral medications, require the use of the modifier KX.

Physicians billing for injectable antibiotic and steroid medications *must* indicate the appropriate modifiers with the appropriate injection code and quantity:

Modifier	Use
AT	For acute conditions*
KX	To indicate any of the following: <ul style="list-style-type: none"> • Oral route contraindicated or an acceptable oral equivalent is not available. • Injectable medication is the accepted treatment of choice. Oral medication regimen has proven ineffective or is not applicable. • The patient has a temperature over 102 degrees and a high level of antibiotic is needed immediately. • Injection is medically necessary into joints, bursae, tendon sheaths, or trigger points to treat an acute condition or the acute flare-up of a chronic condition.

*** If a steroid medication is injected into joints, bursae, tendon sheaths, or trigger points, modifier AT must be used to indicate an acute condition. When performed for a chronic condition, these procedures are denied.**

9.2.39.7 Blood Factor Products

Reimbursement is available when the antihemophilic product is administered by or under personal physician supervision.

The following blood factor products are a benefit of Texas Medicaid:

Procedure Codes									
J7178	J7180	J7181	J7183	J7185	J7186	J7187	J7189	J7190	J7191
J7192	J7193	J7194	J7195	J7196	J7197	J7198	J7200	J7201	Q9975

Prior authorization through the SMPA department is required for procedure code J7199. Supporting documentation that must be submitted with electronic or paper requests for prior authorization must include the following:

- The client’s diagnosis
- A clear, concise description of the drug or biological such as the manufacturer’s prescribing information
- A CPT or HCPCS procedure code that is comparable to the drug or biological being requested
- Documentation of the medical necessity of the requested drug or biological
- The rationale for the recommendation of this particular drug or biological
- Documentation of prior treatment or that prior treatment was considered but ruled out in favor of a new drug for this diagnosis
- Documentation that the drug or biological is not investigational or experimental
- The place of service in which the drug or biological is to be administered
- The physician’s intended charge for the drug or biological

All documentation must include the authorization request form and be maintained in the client’s medical record and is subject to retrospective review.

9.2.39.8 Botulinum Toxin Type A and Type B

Procedure code J0585 is a benefit when billed with one of the following diagnosis codes:

Diagnosis Codes									
3331	3332	3336	33371	33379	33381	33382	33383	33384	33385
33389	3341	340	3410	3411	3418	3419	34210	34211	34212
3430	3431	3432	3433	3434	3438	3439	34400	34401	34402
34403	34404	34409	3441	3442	34430	34431	34432	34440	34441

37803	37804	37805	37806	37807	37808	37810	37811	37812	37813
37814	37815	37816	37817	37818	37820	37821	37822	37823	37824
37830	37831	37832	37833	37834	37835	37840	37841	37842	37843
37844	37845	37850	37851	37852	37853	37854	37855	37856	37860
37861	37862	37863	37871	37872	37873	37881	37882	37883	37884
37885	37886	37887	3789	43820	43821	43822	43830	43831	43832
43840	43841	43842	43850	43851	43852	43853	43889	47875	5277
5300	5650	59651	59654	59655	7235	72871	72885	78442	78449

Procedure code J0586 is a benefit when billed with one of the following diagnosis codes:

Diagnosis Codes									
3336	33381	33382	33383	33384	33389	3341	340	3410	3411
3418	3419	34210	34211	34212	3430	3431	3432	3433	3434
3438	3439	47875	7235	72871	72885				

Procedure code J0587 is a benefit when billed with diagnosis code 33383 or 5277.

Procedure code J0588 is a benefit when billed with diagnosis code 33381, 33383, 34210, 34211, or 34212.

Claims for botulinum toxin type A and B must indicate the number of units used. If the number of units is not specified, the claim will be paid a quantity of one. Claims that exceed the following quantity limitations, per day, may be considered on appeal with documentation of medical necessity:

Procedure Codes	Quantity Limitations of Medication	Billing Units
J0585	360 units	One billing unit is equal to 1 unit of medication. Example: A provider that administers 360 units of medication would submit a claim for a quantity of 360.
J0586	1,000 units	One billing unit is equal to 5 units of medication. Example: A provider that administers 1,000 units of medication would submit a claim for a quantity of 200.
J0587	10,000 units	One billing unit is equal to 100 units of medication. Example: A provider that administers 10,000 units of medication would submit a claim for a quantity of 100.

Procedure Codes	Quantity Limitations of Medication	Billing Units
J0588	120 units	One billing unit is equal to 1 unit of medication. Example: A provider that administers 120 units of medication would submit a claim for a quantity of 120.

If a client is administered botulinum toxins more frequently than every 12 weeks, the claims must be submitted with documentation of medical necessity that justifies why the medication was given at an interval sooner than 12 weeks. The following documentation must be included in the client’s medical record:

- Support for the medical necessity of the botulinum toxin injection
- A covered diagnosis
- Dosage and frequency of the injections
- Support for the clinical effectiveness of the injections
- Specific site(s) injected

All documentation is subject to retrospective review.

Procedures that are billed in conjunction with botulinum toxin injections are subject to current reimbursement guidelines. Any supplies billed by the physician for the administration of botulinum toxin type A or type B are not paid separately. Only the actual amount of drug that is administered is a benefit of Texas Medicaid. Providers cannot submit claims for discarded amounts of botulinum toxin drugs.

Procedure code J0588 will be denied when it is billed with procedure code J0585 or J0586.

Procedure code J0587 will be denied when it is billed with procedure code J0585, J0586, or J0588.

Procedure code J0586 will be denied when it is billed with procedure code J0585.

9.2.39.9 Chelating Agents

Chelating agent procedure codes J0470, J0600, J0895, and J3520 are benefits of Texas Medicaid.

9.2.39.9.1 Dimercaprol

Procedure code J0470 is a benefit when billed with one of the following diagnosis codes:

Diagnosis Codes							
9840	9841	9848	9849	9850	9851	9858	9859

9.2.39.9.2 Edetate calcium disodium

Procedure code J0600 is a benefit when billed with one of the following diagnosis codes: 9840, 9841, 9848, 9849, or 9858.

9.2.39.9.3 Deferoxamine mesylate (*Desferal*)

Procedure code J0895 must be billed with one of the following diagnosis codes to be considered for reimbursement of deferoxamine mesylate:

Diagnosis Codes									
0470	27502	27503	28241	28242	28249	28260	28261	28262	28263
28264	28268	28269	5851	5852	5853	5854	5855	5856	5859
586	9640	9730	9858	9859					

9.2.39.9.4 Edetate disodium

Procedure code J3520 is a benefit when billed with diagnosis code 27542 or 9721.

Procedure codes J0470, J0600, J0895, and J3520 are denied if they are billed with diagnosis codes other than the codes listed above.

9.2.39.10 Clofarabine

Clofarabine is used for the treatment of relapsed or refractory acute lymphoblastic leukemia. Clofarabine is administered by IV infusion once daily for five days and is repeated every two to six weeks, as needed.

9.2.39.10.1 Prior Authorization for Clofarabine

Prior authorization is required for treatment with clofarabine (procedure code J9027) and may be granted for a maximum of six weeks.

Clofarabine may be prior authorized for the treatment of relapsed or refractory acute lymphoblastic leukemia (diagnosis code 20400). The following criteria apply to requests for prior authorization:

- The number of anticipated injections needed as well as the dosage per injection must be submitted with the request for prior authorization.
- Prior authorization must be obtained before services are rendered whenever possible. If authorization cannot be obtained prior to the rendering of the service, the authorization request must be submitted within three business days from the date the treatment is initiated.

Prior authorization requests may be considered with documentation of both of the following:

- A diagnosis of refractory or relapsed acute lymphoblastic leukemia (diagnosis code 20400)
- A history of at least two prior failed chemotherapy regimens

The prior authorization number must be included on the claim along with the number of units, based on the dosage given.

Failure to place the prior authorization number on the claim or to obtain prior authorization within the allotted timeframe will result in denied claims.

9.2.39.11 Colony Stimulating Factors (Filgrastim, Pegfilgrastim, and Sargramostim)

Colony stimulating factors (CSFs) are growth factors (glycoproteins) that support survival, clonal expansion and differentiation of blood forming cells and are a benefit of Texas Medicaid. CSFs reduce the likelihood of neutropenic complications due to chemotherapy and bone marrow transplant. Filgrastim (procedure code J1442) and pegfilgrastim (procedure code J2505) are granulocyte colony stimulating factors (G-CSFs). Sargramostim (procedure code J2820) is a granulocyte-macrophage colony stimulating factor (GM-CSF). GM-CSF and G-CSF stimulate neutrophil production after autologous bone marrow transplant and significantly reduce the duration and impact of neutropenia. To submit claims for reimbursement of colony stimulating factors, providers must submit the most appropriate procedure code with the number of units administered.

One of the following diagnosis codes must be billed with the appropriate procedure code:

Diagnosis Codes									
1400	1401	1403	1404	1405	1406	1408	1409	1410	1411

7767	9631	99685	V4281	V4282	V5811	V5812	V662		

Procedure code J2505 is not reimbursed when submitted with the same date of service as procedure code J1442.

9.2.39.12 Fluocinolone Acetonide (Retisert)

Procedure code J7311 is a benefit of Texas Medicaid for clients of all ages.

Procedure code J7311 is only considered for reimbursement with a posterior uveitis diagnosis (36320) of more than six months in duration and only when the condition has been unresponsive to oral or systemic medication treatment. Prior authorization is required.

To request prior authorization, providers must submit requests to the Special Medical Prior Authorization Department by fax at 1-512-514-4213.

9.2.39.13 Hematopoietic Injections

Hematopoietic agents erythropoietin alfa or epoetin alfa (EPO) and darbepoetin alfa are benefits of Texas Medicaid and reimbursed using procedure codes J0881, J0882, J0885, and J0886 and an appropriate diagnosis code.

Providers must maintain medical records in their offices that document regular monitoring of hemoglobin or hematocrit levels and explain the rationale for the dosing of epoetin alfa and darbepoetin alfa. These records are subject to retrospective review to determine appropriate utilization and reimbursement for this service.

When billing procedure code J0882 or J0886, providers must submit the client’s most recent dated hemoglobin or hematocrit levels in the comments section of the claim form.

EPO and darbepoetin alfa injections are limited to specific diagnosis codes as indicated in this section.

9.2.39.13.1 Epoetin Alfa (EPO)

EPO (procedure codes J0885 and J0886) is a glycoprotein that stimulates the formation of red blood cells and the production of the precursor red blood cells of the bone marrow. EPO is indicated for:

- Anemia associated with chronic renal failure (CRF), including clients on dialysis (end-stage renal disease or ESRD) and clients not on dialysis.
- Anemia related to therapy with zidovudine (AZT) in HIV-infected clients.
- Anemia due to the effects of concomitantly administered chemotherapy in clients who have non-myeloid malignancies.
- Anemia of prematurity.
- Clients scheduled to undergo elective noncardiac, nonvascular surgery to decrease need for allogenic blood transfusion.

Procedure code J0885 must be billed with one of the following diagnosis codes:

Diagnosis Codes									
042	20300	20301	20302	23872	23873	23874	23875	23876	23879

5855	5856	5859	586	7766					

Procedure code J0886 must be billed with one of the following diagnosis codes:

Diagnosis Codes								
28521	5851	5852	5853	5854	5855	5856	5859	586

EPO may be considered for reimbursement when the dose is titrated consistent with prevailing, evidence-based clinical guidelines, as published by the National Kidney Foundation Kidney Disease Outcomes Quality Initiative, including appropriate monitoring of the rise and fall of the hemoglobin or hematocrit levels.

EPO is limited to three injections per calendar week (Sunday through Saturday).

9.2.39.13.2 Darbepoetin Alfa

Darbepoetin alfa (procedure codes J0881 and J0882) is an erythropoiesis-stimulating protein closely related to erythropoietin. Darbepoetin stimulates erythropoiesis by the same mechanism as EPO. Darbepoetin alfa has approximately a three-fold longer half-life than EPO, resulting in a sustained erythropoietic effect and less frequent dosing. Darbepoetin alfa is indicated for:

- Treatment of anemia associated with chronic renal failure (CRF), including clients on dialysis and clients not on dialysis.
- Treatment of anemia in clients who have non-myeloid malignancies where anemia is due to the effect of chemotherapy.

Procedure code J0881 must be billed with one of the following diagnosis codes:

Diagnosis Codes									
20300	20301	20302	23872	28489	28521	28522	2853	2858	2859
5851	5852	5853	5854	5855	5856	5859	586	V5811	V5812

Procedure code J0882 must be billed with one of the following diagnosis codes:

Diagnosis Codes								
28521	5851	5852	5853	5854	5855	5856	5859	586

Darbepoetin is limited to 100 units per day (100 mcg). Darbepoetin should be administered as follows:

- Once a week if the client was receiving EPO two to three times weekly
- Once every two weeks if the client was receiving EPO once a week

9.2.39.14 * Hydroxyprogesterone Caproate

Hydroxyprogesterone caproate is a benefit of Texas Medicaid. Hydroxyprogesterone caproate, whether compounded or the trademarked drug is a benefit for clients who are 10 through 55 years of age, and is restricted to diagnosis code V2341.

Hydroxyprogesterone caproate is administered intramuscularly at a dose of 250 mg once a week (every 7 days). All of the following must be documented and maintained in the client's medical record to support medical necessity for administration of a hydroxyprogesterone caproate injection:

- The client's treatment is initiated between 16 weeks, 0 days and 20 weeks, 6 days gestation.
- The client's treatment continues, as medically indicated, through 36 weeks, 6 days gestation or delivery, whichever occurs first.
- The client has a singleton pregnancy.
- The client has had a prior, singleton, spontaneous, preterm delivery before 37 weeks gestation.

The maximum amount for hydroxyprogesterone caproate is 21 doses per pregnancy.

Providers must submit claims for a compounded drug using procedure code J1725, modifier U1, and the NDC number. Trademarked hydroxyprogesterone caproate (such as *Makena*®) must be submitted with procedure code J1725 and the NDC number.

9.2.39.14.1 * Prior Authorization for Hydroxyprogesterone Caproate

Initiation of the client's treatment after 20 weeks, 6 days gestation but before 24 weeks gestation must be approved by the Medical Director. Prior authorization requests must be submitted to the Special Medical Prior Authorization Department using the Special Medical Prior Authorization (SMPA) Request Form. Documentation supporting medical necessity for starting treatment at that stage of gestation must be submitted with the prior authorization request.

9.2.39.15 Immune Globulin

Immune globulins may be indicated for treatment of certain immune disorders and states of immunodeficiency. The following immune globulin procedure codes are benefits of Texas Medicaid:

Procedure Codes									
90284	90291	J0850	J1459	J1460	J1556	J1557	J1559	J1560	J1561
J1566	J1568	J1569	J1572	J1599	J1670	J2788	J2791	J2792	J7504
J7511									

Note: Procedure codes 90291 and J0850 may only be reimbursed when billed with diagnosis code V420, V421, V426, V427, or V4283.

9.2.39.16 Medroxyprogesterone Acetate (Depo Provera)

Medroxyprogesterone acetate injectable suspension (*Depo-Provera*) has been approved by the FDA as a method of contraception. Intramuscular injections of medroxyprogesterone acetate given at 90-day intervals has been proven to be a long-term method of preventing pregnancy. Medroxyprogesterone acetate injectable suspension is reimbursed by Texas Medicaid to providers of family planning services.

Medroxyprogesterone acetate must be billed using procedure code J1050 with modifier U1 and a valid family planning diagnosis codes.

Refer to: Subsection 2.2, “Services, Benefits, Limitations, and Prior Authorization,” in the *Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks)* for more information about family planning contraceptives.

9.2.39.17 Immunosuppressive Drugs

The following procedure codes are benefits of Texas Medicaid:

Procedure Codes							
J0215	J0257	J0480	J0485	J0490	J0717	J1595	J1602
J7501	J7505	J7513	J7516	J7525			

The following procedure codes may be indicated for, but are not limited to, treatment of the following conditions:

Procedure Code	Conditions
J0215	Plaque psoriasis: Treatment of adult clients with moderate to severe chronic plaque psoriasis who are candidates for systemic therapy or phototherapy.
J0257	Alpha-1 proteinase inhibitor deficiency: For the treatment of clients who have a deficiency of the alpha-1 proteinase inhibitor enzyme (also known as alpha-1 antitrypsin deficiency) in the treatment of emphysema.
J0480	Organ rejection: For the prophylaxis of acute organ rejection in patients receiving renal transplantation when used as part of an immunosuppressive regimen that includes cyclosporine and corticosteroids.
J0485	Organ rejection: For the prophylaxis of organ rejection in adults receiving a kidney transplant, to be used in combination with basiliximab injection, mycophenolate mofetil, and corticosteroids.

Procedure Code	Conditions
J0490	Systemic lupus erythematosus (SLE): For use in clients with moderate to severe SLE when other forms of treatment have failed to control moderate to severe symptoms
J0717	Psoriatic arthritis Ulcerative colitis Ankylosing spondylitis Crohn's disease
J1595	Multiple sclerosis (MS): For the reduction of the frequency of relapses in clients with relapsing remitting MS, including clients who have experienced a first clinical episode and have magnetic resonance imaging (MRI) features consistent with MS.
J1602	Psoriatic arthritis Rheumatoid arthritis Ankylosing spondylitis
J7501	Renal homotransplantations: Adjunct for the prevention of rejection in renal homotransplantation. Rheumatoid arthritis: Azathioprine is indicated only in adult patients meeting the criteria for classic or definite rheumatoid arthritis as specified by the American Rheumatism Association.
J7505	Renal allograft rejection Cardiac/hepatic allograft rejection
J7513	Organ rejection: For the prophylaxis of acute organ rejection in clients receiving renal transplants, to be used as a part of an immunosuppressive regimen that includes cyclosporine and corticosteroids.
J7516	Allogeneic transplants: For prophylaxis of organ rejection in kidney, liver, and heart allogeneic transplants.
J7525	Organ rejection prophylaxis: For the prophylaxis of organ rejection in clients receiving allogeneic liver, kidney, or heart transplants.

Note: Oral, self-administered immunosuppressive drugs may be reimbursed for Medicaid fee-for-service clients through the Medicaid Vendor Drug Program (VDP).

Refer to: Subsection 9.2.40, "Medications - Oral," in this handbook for more information about oral self-administered drugs.

Authorization is not required for immunosuppressive drugs.

Retrospective review may be performed to ensure documentation supports the medical necessity of the service.

9.2.39.18 Interferon

The following interferon procedure codes are benefits of Texas Medicaid:

Procedure Codes								
J1826	J1830	J9212	J9213	J9214	J9215	J9216	Q3027	Q3028

The following procedure codes may be indicated for, but are not limited to, treatment of the conditions listed below:

Procedure Code	Condition(s)
J1826, J1830, Q3027, and Q3028	Relapsing forms of multiple sclerosis
J9212	Chronic hepatitis C virus
J9213	AIDS-related Kaposi sarcoma Chronic hepatitis C virus Chronic myelogenous leukemia Hairy cell leukemia Metastatic melanoma Renal cell carcinoma
J9214	Acute leukemias AIDs-related Kaposi sarcoma Basal- and squamous-cell cancer Behcet syndrome Bladder tumors (local use for superficial tumors) Carcinoid tumor Chronic granulocytic leukemia Chronic hepatitis B virus Chronic hepatitis C virus Chronic myelogenous leukemia

Procedure Code	Condition(s)
	Condylomata acuminata Cutaneous T-cell lymphoma Cytomegalovirus Essential thrombocytopenia Essential thrombocytosis Follicular lymphoma Hairy cell leukemia Herpes simplex Hodgkin’s disease Hypereosinophilic syndrome Melanoma Multiple myeloma Mycosis fungoides Non-Hodgkin’s lymphoma Ovarian and cervical carcinoma Papilloma viruses Polycythemia vera Renal cell carcinoma Rhino viruses Varicella zoster
J9215	Condylomata acuminata
J9216	Chronic granulomatous disease Malignant osteoporosis

Note: Pegylated interferons are self-administered weekly and are available through Texas Medicaid Vendor Drug Program for Medicaid fee-for-service clients.

9.2.39.19 Joint Injections and Trigger Point Injections

Procedure codes 20600, 20604, 20605, 20606, 20610, 20611, and 20612 must be used to submit claims for injections into joints.

Procedure codes 20526, 20550, 20551, 20552, and 20553 must be used to submit claims for trigger point injections.

These procedures are valid only in the treatment of acute problems. Procedures billed for reimbursement with chronic diagnosis codes are denied. The provider must use the AT modifier to indicate an acute condition. The cost of the injection does not include the drugs used. The drug can be reimbursed separately.

Multiple joint injections may be reimbursed when billed with the same date of service if the claim indicates the specific site of each injection. The first injection or aspiration is reimbursed at the full profile allowance and any subsequent injections are reimbursed at half allowance.

9.2.39.20 Leuprolide Acetate (Lupron Depot)

Procedure codes J9217, J1950, J9218, or J9219 may be reimbursed for leuprolide acetate injections with the following limitations:

Procedure Code	Limitation(s)
J1950	Reimbursed once per month
J9219	Reimbursed once per year

Procedure code J9217 may be reimbursed in monthly, three-month, four-month, and six-month doses as follows:

Frequency	Dosage	Limitation(s)
Monthly	7.5 mg	Billed with a quantity of 1 Reimbursed once per month
3-month	22.5 mg	Billed with a quantity of 3 Reimbursed once every three months
4-month	30 mg	Billed with a quantity of 4 Reimbursed once every 4 months
6-month	45 mg	Billed with a quantity of 6 Reimbursed once every 6 months
The total dosage allowed within a 6-month period is 45 mg.		

9.2.39.21 Omalizumab

Omalizumab is an injectable drug that is FDA approved for the treatment of clients who are 12 years of age and older with moderate to severe asthma (as defined by the National Heart, Lung, and Blood Institute’s Guidelines for the Diagnosis and management of Asthma) or moderate to severe chronic idiopathic urticaria.

9.2.39.21.1 Prior Authorization for Omalizumab

Omalizumab is a benefit to Medicaid- eligible clients when medically necessary and must be prior authorized. THSteps-eligible clients who are 11 years of age and younger will be considered on an exception basis through CCP.

When requesting prior authorization, the exact dosage must be included with the request using procedure code J2357. Doses are determined by body weight and frequency is determined by clinical severity. Each prior authorization of omalizumab for treatment of asthma is based on provider documentation with the following medical necessity criteria:

- Positive skin test or RAST to a perennial (not seasonal) aeroallergen within the past 36 months.
- Total IgE level greater than 30 IU/ml but less than 700 IU/ml within the past 12 months.
Note: The total IgE level is required only for the initial prior authorization request and is not required for subsequent prior authorization requests.
- Documentation of client compliance with inhaled steroid regimen.
- Client is not currently smoking.
- Clinical evidence of inadequate asthma control. Pulmonary function tests must have been performed within a three-month period and be documented for all clients when requesting prior authorization for omalizumab. This clinical evidence of inadequate asthma control may include any of the following:

- Dependence upon daily systemic steroids or maximal inhaled steroid regimen with frequent systemic steroid pulses.
- Frequent hospitalizations or acute care visits for severe asthma exacerbations in the face of adequate maximal standard therapy. The client must have been on daily therapy for persistent asthma for at least one year with frequent use of beta agonist.
- Persistence of significantly decreased pulmonary function testing (spirometry), demonstrating refractory lower airways' obstruction and hyper-reactivity over time, despite the rigorous medical regimen delineated above.
- Exceptions may be considered with documentation of medical reasons as to why pulmonary function tests cannot be performed.

Prior authorization requests for clients with chronic idiopathic urticaria must include the following documentation of medical necessity:

- Documented failure of, or contraindication to, antihistamine, leukotriene inhibitor, and immunosuppressive therapies
- Evidence of an evaluation that excludes other medical diagnoses associated with chronic urticaria

Prior authorization approvals for omalizumab are for intervals of six months at a time. Clients must be fully compliant with their omalizumab regimen in order to qualify for any additional authorizations. The provider must submit a statement documenting full compliance with the requests for each renewal. After 12 continuous months of omalizumab authorizations, the requesting provider must submit documentation of satisfactory clinical response to omalizumab in order to qualify for any additional authorizations. Prior authorizations will be considered on an individual basis for lapses in treatment with provider documentation.

Requests for clients who are 20 years of age and younger who do not meet the criteria above will be reviewed for medical necessity, on a case-by-case basis, by the TMHP medical director.

9.2.39.22 Implantable Infusion Pumps

Implantable infusion pumps are a benefit of Texas Medicaid. An implantable infusion pump may be medically necessary in the following circumstances:

- Administration of intrathecal or epidural antispasmodic drugs to treat refractory intractable spasticity
- Administration of Intrathecal, epidural, or central venous analgesic (opioid or non-opioid) drugs for treatment of severe chronic intractable pain
- Administration of intrahepatic chemotherapy for primary liver cancer or metastatic cancer with metastases limited to the liver
- Administration of intra-arterial chemotherapy in head and neck cancers

An implantable infusion pump is not a benefit for the following uses:

- Continuous insulin infusion for diabetes
- Continuous heparin infusion for recurrent thromboembolic disease
- Continuous intralesional infusion for severe chronic intractable pain
- Continuous intra-arterial infusion
- Continuous intra-articular infusion for severe chronic intractable pain
- Administration of antibiotics for osteomyelitis

All supplies associated with an IIP are included with the reimbursement for the surgery to implant the infusion pump and are not reimbursed separately.

Providers may be reimbursed for implantable infusion pumps using procedure codes E0782, E0783, and E0786.

If procedure codes E0782 and E0783 are billed with the same date of service, only one may be reimbursed.

9.2.39.22.1 Prior Authorization for Implantable Infusion Pumps

Implantable infusion pumps (procedure codes E0782, E0783, and E0786) require prior authorization.

Prior authorization is not required for the physician services associated with the insertion, revision, removal, refilling, or maintenance of the IIP.

Providers must request prior authorization through the Special Medical Prior Authorization (SMPA) department. The ASC or DME provider may submit a request for prior authorization using the Special Medical Prior Authorization (SMPA) Form, which must be completed and signed by a physician.

All signatures and dates on the SMPA form must be current, unaltered, original, and handwritten. Computerized or stamped signatures or dates will not be accepted. The completed, signed, and dated SMPA form must be maintained by the provider and the prescribing physician in the client's medical record.

The completed SMPA Form must include the procedure code and quantity for the services that are requested. Documentation that is submitted with the prior authorization request must indicate whether the IIP will be provided by the ASC or the DME provider.

To avoid unnecessary denials, the physician must provide correct and complete information, including documentation of medical necessity for the requested IIP. The requesting provider may be asked for additional information to clarify or complete a request for the IIP.

Documentation submitted with the prior authorization request must indicate the client or caregiver has:

- The ability to provide a return demonstration performance.
- The attention, desire, interest, flexibility, and independence.
- An understanding of cause and effect and object permanence.

As indicated in the following sections, supporting documentation that is based on the type of IIP requested must be included with the request for prior authorization.

IIP for Administration of Anti-spasmodic Drug to Treat Severe Refractory Spasticity

The following documentation is required for prior authorization:

- Initial evaluation
- Type of surgical implantation and description of IIP requested
- Symptoms:
 - Degree of spasticity
 - Affected muscle groups
 - Functional impact
- Duration of symptoms
- Any recent hospitalizations (within past 12 months)
- Comorbid conditions

- All pertinent laboratory and radiology results
- Treatment history of self administration with evidence of:
 - A minimum of six weeks of non-invasive methods of spasticity control, including, but not limited to, oral antispasmodics, that either:
 - Failed to adequately control the spasticity, or
 - Produced intolerable side effects
- The role, participation, and compliance of the family or client that demonstrate the following:
 - The ability to provide a return demonstration performance
 - Attentiveness, desire, interest, flexibility, and independence
 - An understanding of cause and effect and object permanence
- Favorable response to a trial intrathecal dose of the antispasmodic
- No contraindications to implantation exist, including, but not limited to, the following:
 - Coagulopathy
 - Infection
 - Other implanted devices where the “crosstalk” between devices may inadvertently change the prescription
 - Allergy or hypersensitivity to the drug being administered
- Treatment plan, including the following:
 - Antispasmodic to be infused
 - Follow-up, including pump refilling, maintenance, and monitoring of changes in infusion rate
 - Expected outcome
 - Treatment goals

IIP for Administration of Analgesic (Opioid or Nonopioid) Drug for Treatment of Severe Intrac-table Pain

The following documentation is required for prior authorization:

- The initial evaluation
- Type of surgical implantation and description of IIP requested
- Symptoms
 - Severity of pain
 - Functional impact
- Source of pain or location, including whether pain is malignant or non-malignant
- Duration of symptoms
- Any recent hospitalizations (within the past 12 months)
- Comorbid conditions
- All pertinent laboratory and radiology results

- A life expectancy of at least three months
 - *Note: The standard of care for treatment of severe intractable pain for a client with a life expectancy of less than three months is to use less invasive techniques such as an external infusion pump.*
- For malignant pain:
 - Treatment history with evidence of a favorable response to a trial intrathecal dose of the analgesic drug, defined as a minimum of 50 percent reduction in pain
 - Failure of more conservative methods of pain control, including, but not limited to, oral analgesics, surgery, or therapy, that were ineffective due to one of the following:
 - Failed to adequately control the pain, or
 - Produced intolerable side effects
- For nonmalignant pain:
 - A minimum of six months of more conservative methods of pain control, including but not limited to oral analgesics, surgery, attempts to eliminate physical and behavioral abnormalities that may cause an exaggerated pain reaction, that were ineffective due to one of the following:
 - Failed to adequately control the pain, or
 - Intolerable side effects were produced
- Examples of non-malignant severe intractable pain include, but are not limited to, the following:
 - Complex regional pain syndrome I & II (causalgia/RSD) refractory to other treatments.
 - Post herpetic neuralgia
 - Failed back syndrome
 - Phantom limb pain
 - Arachnoiditis (proven with MRI/increased CSF protein levels)
 - Spinal cord myelopathy (refractory to conservative measurements)
- The role, participation, and compliance of the family or client that demonstrate the following:
 - The ability to provide a return demonstration performance
 - Attentiveness, desire, interest, flexibility, and independence
 - An understanding of cause and effect and object permanence
- No contraindications to implantation exist, including, but not limited to, the following:
 - Coagulopathy
 - Infection
 - Other implanted devices where the “crosstalk” between devices may inadvertently change the prescription
 - Tumor encroachment on the thecal sac
 - Allergy or hypersensitivity to the drug being administered
- Treatment plan, including the following:
 - Analgesic to be infused
 - Follow-up including pump refilling, maintenance, and monitoring of changes in infusion rate
 - Expected outcome

- Treatment goals

IIP for Administration of Intrahepatic Chemotherapy in Primary Liver Cancer or Colorectal Cancer with Liver Metastases

The following documentation is required for prior authorization:

- The initial evaluation
- Type of surgical implantation and description of IIP requested
- Diagnosis of one of the following:
 - Primary liver cancer
 - Metastatic cancer with metastases limited to the liver
- Any recent hospitalizations (within the past 12 months)
- Comorbid conditions
- All pertinent laboratory and radiology results
- The role, participation, and compliance of the family and/or client demonstrating:
 - The ability to provide a return demonstration performance
 - Attentiveness, desire, interest, flexibility, and independence
 - An understanding of cause and effect and object permanence
- No contraindications to implantation exist, including, but not limited to, the following:
 - Coagulopathy
 - Infection
 - Other implanted devices where the “crosstalk” between devices may inadvertently change the prescription
 - Allergy or hypersensitivity to the drug being administered
- Treatment plan, including the following:
 - Chemotherapeutic agent to be infused. The prescribed drug must be approved by the U.S. Food and Drug Administration (FDA) for the intended use and must be compatible with the implantable device (such as floxuridine or methotrexate)
 - Follow-up, including pump refilling, maintenance, and monitoring of changes in infusion rate
 - Expected outcome
 - Treatment goals

IIP for Administration of Intra-Arterial Chemotherapy in Head and Neck Cancers

The following documentation is required for prior authorization:

- Initial evaluation
- Type of surgical implantation and description of IIP requested
- Diagnosis and site(s) of any metastases
- Any hospitalizations (within the past 12 months) and all other diagnoses
- All pertinent laboratory and radiology results
- The role, participation, and compliance of the family or client that demonstrates the following:

- The ability to provide a return demonstrate performance
- Attentiveness, desire, interest, flexibility, and independence
- An understanding of cause and effect and object permanence
- No contraindications to implantation exist, including, but not limited to, the following:
 - Coagulopathy
 - Infection
 - Other implanted devices where the “crosstalk” between devices may inadvertently change the prescription
 - Allergy or hypersensitivity to the drug being administered
- Treatment plan, including the following:
 - Chemotherapeutic agent to be infused
 - Follow-up, including pump refilling, maintenance, and monitoring of changes in infusion rate
 - Expected outcome
 - Treatment goals

Replacement of an IIP

An IIP is expected to last a minimum of five years. Prior authorization for replacement of an IIP is considered within five years when one of the following occurs:

- There has been a significant change in the client’s condition and the current equipment no longer meets the client’s needs.
- The equipment is no longer functional and either cannot be repaired or it is not cost-effective to repair.
- Loss or irreparable damage to the IIP has occurred. The following must be submitted with the prior authorization request:
 - A copy of the police or fire report, when appropriate
 - A statement about the measures to be taken in order to prevent reoccurrence

Replacement of an IIP for a client who is birth through 20 years of age that does not meet the criteria above may be considered for prior authorization through CCP.

The DME Certification and Receipt Form is required and must be completed before reimbursement can be made for any DME delivered to a client. The certification form must include the name of the item, the date the client received the DME, and the signatures of the provider and the client or primary caregiver.

The DME provider must maintain the signed and dated form in the client’s medical record.

Refer to: Subsection 2.6.3.5, “DME Certification and Receipt Form,” in the *Children’s Services Handbook* (Vol. 2, *Provider Handbooks*) for more information about this form.

9.2.39.22.2 Implantation of Catheters, Reservoirs, and Pumps

The following procedure codes may be used to bill the implantation of catheters and infusion pumps or devices for long term medication administration:

Procedure Codes				
62350	62351	62360	62361	62362

Procedure code 62350 or 63251 may be reimbursed when billed for the same date of service as procedure code 62360, 62361, or 62362.

Procedure codes 62355 and 62365 do not require prior authorization.

The following procedure codes are denied as included in the total anesthesia time when billed with the same date of service as an anesthesia procedure by the same physician:

Procedure Codes						
62350	62351	62355	62360	62361	62362	62365

These procedure codes are considered for reimbursement according to multiple surgery guidelines when billed with the same date of service as another surgical procedure performed by the same physician.

Procedure codes 95990, 96521, and 96522 are considered for reimbursement when used for refilling an implantable pump.

Procedure codes 62367, 62368, 62369, and 62370 may be used to bill for electronic analysis of an implantable infusion pump.

Procedure codes 62369 and 62370 will be denied when billed for the same date of service by the same provider as procedure code 62362.

The following procedure codes may be used to bill the insertion, revision, removal, or repair associated with implantable infusion pumps:

Procedure Codes						
36260	36261	36262	36563	36576	62355	62365

9.2.39.23 Trastuzumab

Procedure code J9355 is a benefit of Texas Medicaid. Reimbursement for this drug is considered when it is used as a single agent for the treatment of clients who have metastatic breast cancer whose tumors overexpress the Her-2 protein and who have received one or more chemotherapy regimens for their metastatic disease. Trastuzumab may also be reimbursed when:

- Used in combination with paclitaxel for the treatment of clients who have metastatic breast cancer whose tumors overexpress the Her-2 protein and who have not received chemotherapy for their metastatic disease.
- Used as part of a treatment regimen containing doxorubicin, cyclophosphamide, and paclitaxel for the adjuvant treatment of clients who have Her-2-overexpressing, node-positive breast cancer.

Trastuzumab is a benefit for clients whose tumors have Her-2 protein overexpression.

When billing for the test used to determine whether a client overexpresses the Her-2 protein, use procedure code 83950. Diagnosis of overexpression of the Her-2 protein must be made before Texas Medicaid will consider reimbursement for trastuzumab. This test may be reimbursed only once in a client’s lifetime to the same provider. An additional test by the same provider requires documentation to support the medical necessity.

9.2.39.24 Vitamin B12 (Cyanocobalamin) Injections

Vitamin B12 injections are a benefit of Texas Medicaid. Vitamin B12 injections should only be considered for clients with conditions that are refractory to, or have a contraindication to, oral therapy.

Vitamin B12 injections may be considered for the following indications:

- Dementia secondary to vitamin B12 deficiency

- Resection of the small intestine
- Schilling test (vitamin B12 absorption test)

Procedure code J3420 must be used when billing for Vitamin B12 (cyanocobalamin) injections.

Vitamin B12 (cyanocobalamin) injections are limited to the following diagnosis codes:

Diagnosis Codes							
1234	2662	2703	2704	2707	2810	2813	2819
3574	3575	37732	37734	5609	5642	5790	5791
5792	5793	5794	5798	5799	V453	V4575	V8741

Claims that are denied for indications or other diagnosis codes may be considered on appeal with documentation of medical necessity. Documentation must include rationale as to why the client was unable to be treated with oral therapy.

9.2.39.25 Injection Administration

Injectable medications and the administration of medications through the intramuscular (IM), subcutaneous (SQ), or intravenous (IV) route is a benefit of Texas Medicaid.

For the administration of drugs through intramuscular (IM), subcutaneous (SQ), or intravenous (IV) route providers should submit claims using procedure codes 96372, 96374, 96375, and 96376.

Injection administration is reimbursed separate from the medication.

Procedure codes 96372 and 96374 are limited to one per day, unless the claim clearly indicates that the medication could not be mixed.

Procedure codes 96375 and 96376 will only be reimbursed when billed in conjunction with 96374 on the same date of service by the same provider on the same claim.

9.2.39.26 * Billing for Injectable Medications

Providers must use oral medication in preference to injectable medication in the office and outpatient hospital. If an oral medication cannot be used, the claim must be billed as follows:

Claim Form	Reason for Injection
Modifier KX	<ul style="list-style-type: none"> • No acceptable oral equivalent is available. • Injectable medication is the standard treatment of choice. • The oral route is contraindicated. • The client has a temperature over 102 degrees Fahrenheit (documented on the claim and in the medical record) and a high blood level of antibiotic is needed quickly. • The client has demonstrated noncompliance with orally prescribed medication (must be documented on the claim and in the medical record). • Previously attempted oral medication regimens have proven ineffective (must be supported by documentation in the medical record). • Situation is emergent.

The claim and the client’s medical record must include documentation of medical necessity to support the need for the service. Retrospective review may be performed to ensure that the documentation supports the medical necessity of the service and any modifier used when billing the claim.

Refer to: Subsection 9.2.35, “Immunization Guidelines and Administration,” in this handbook.
 “Appendix B. Immunizations” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)*.

Subsection 5.3.11.3, “Immunizations,” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for information on immunizations for infants and children.

Providers may utilize the “white bagging” delivery method, in which the treating provider submits prescriptions to pharmacies and the prescription is shipped or mailed to the provider’s office.

Refer to: Subsection B.1.2, “* Pharmacy Delivery Method for Physician-Administered Drugs,” in Appendix B: Vendor Drug Program (*Vol. 1, General Information*) for additional information on the “white bagging” delivery method.

9.2.39.27 Unit Calculations for Billing Drugs

Providers must calculate the number of units to be billed on the claim based on the number of units indicated in the procedure code description and the amount of the drug actually administered. Providers should refer to the procedure code description for the unit amount to calculate the number of units to be billed.

The formula to use to calculate the appropriate quantity of units to bill is:

Amount administered divided by the units indicated in the procedure code description.

For example:

Units Indicated in the Description	Amount Administered by the Provider	Calculation	Quantity to Bill on the Claim
50 mg	100 mg	$100 / 50 = 2$	2 units
per unit	20 units	$20 / 1 = 20$	20 units
per 100 units	2,500 units	$2500 / 100 = 25$	25 units
per 50 mg	250 mg	$250 / 50 = 5$	5 units

Claims submitted with incorrect unit calculations may cause delayed or incorrect payment.

The specific NDC of the drug actually dispensed should be entered on the claim form. Additional information about entering NDC codes is available on the [NDC page](http://www.tmhp.com) of the TMHP website at www.tmhp.com.

9.2.40 Medications - Oral

Oral medications that are given in the hospital or physician’s office are a benefit to Texas Medicaid clients through Texas Medicaid. Take-home and self-administered drugs are not benefits of Texas Medicaid and should not be billed to TMHP except when they are provided to eligible Texas Medicaid fee-for-service clients through the Medicaid Vendor Drug Program (VDP) with a prescription.

Refer to: “Appendix B: Vendor Drug Program” (*Vol. 1, General Information*).

9.2.40.1 Drug Monitoring Services

Providers must use the most appropriate procedure codes when submitting claims for drug monitoring services that monitor prescribed medications that can be abused when used for the treatment of chronic pain. These claims are subject to retrospective review. Claims may be reprocessed and recouped if they are submitted for these drug monitoring services in the office setting using a procedure code for a quantitative test rather than a qualitative or semiquantitative test.

An enzyme immunoassay (EIA) device can be used to provide preliminary qualitative or semiquantitative test results for point-of-care monitoring purposes. EIA devices and the reagents used to perform in-office drug testing are cleared by the FDA only to obtain qualitative or semiquantitative initial screen or preliminary results.

Immunoassay and enzyme assay are tests that produce qualitative and semiquantitative results, so these tests must not be reported with procedure codes for quantitative tests. A qualitative or semiquantitative test is not a quantitative test and must not be billed as such.

The initial drug screen or preliminary result testing yields qualitative and semiquantitative results, which must be reported with an appropriate drug testing procedure code, as categorized in the CPT manual as “Drug Testing.” Only those procedure codes that are a benefit of Texas Medicaid may be reimbursed.

CPT-categorized “Chemistry” and “Therapeutic Drug Assay” procedure codes are for quantitative tests and must not be reported for an initial screen or preliminary result that was performed in the point-of-care setting.

Refer to: The CPT manual for drug testing, chemistry, and therapeutic drug assay procedure codes, and to the Texas Medicaid fee schedule for procedure codes that may be reimbursed by Texas Medicaid.

Using procedure codes for quantitative tests to report preliminary qualitative or semiquantitative test results is considered systematic upcoding and may lead to administrative sanctions, civil monetary penalties, and criminal prosecution.

Providers may refer to the CMS website for more information about laboratory tests that may be rendered in the office setting. For tests that require a CLIA certificate of waiver, CMS publishes a list of all waived tests. The list is updated quarterly and includes the procedure code to use when billing a test.

9.2.41 Laboratory Services

Texas Medicaid benefits are provided for professional and technical services ordered by a physician and provided under the supervision of a physician in a setting other than a hospital (inpatient or outpatient). All laboratory services must be documented in the client’s medical record as medically necessary and referenced to an appropriate diagnosis. Texas Medicaid does not reimburse baseline or screening laboratory studies.

Providers may bill only for laboratory tests that are actually provided in their office. Any test sent to an outside laboratory must not be billed on the provider’s claim. Laboratories bill Texas Medicaid directly for the tests they perform.

Unless otherwise noted, interpretation of laboratory tests is considered part of the provider’s professional services (hospital, office, or emergency room visits) and must not be billed separately. Modifier Q4 is required for laboratory, radiology, and ultrasound interpretations by any provider other than the attending physician.

Laboratory tests that are generally considered part of a laboratory panel (e.g., chemistries, CBCs, urinalyses [UAs]) and that are performed on the same day must be billed as a panel regardless of the method used to perform the tests (automated or manual).

Physician interpretations that are requested of a consulting pathologist and require professional reading and reporting of results may be billed to Texas Medicaid separately as a professional charge.

All providers of laboratory services must comply with the rules and regulations of CLIA. Providers not complying with CLIA cannot be reimbursed for laboratory services.

Texas Medicaid follows the Medicare categorization of tests for CLIA certificate holders.

Refer to: The CMS website at www.cms.gov/CLIA/10_Categorization_of_Tests.asp for information about procedure code and modifier QW requirements.

Subsection 2.2.5, “Automated Laboratory Tests and Laboratory Paneling,” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)* for claims processing instructions.

Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA),” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

Subsection 3.4.2, “Reimbursement,” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)* for claims processing instructions.

Subsection 2.2, “Fee-for-Service Reimbursement Methodology,” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

9.2.41.1 THSteps Laboratory Services

Refer to: Subsection 5.3.11.6, “Laboratory Test,” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)*.

9.2.41.2 Laboratory Handling Charge

The laboratory handling charge covers the expense of obtaining and packaging the specimen and sending it to a reference laboratory.

A laboratory handling charge (procedure code 99000) may be billed if the specimen is obtained by venipuncture or catheterization *and* sent to an outside lab. The reference laboratory name and address or provider identifier must be listed in Block 32 of the CMS-1500 claim form, and Block 20 must be completed.

The provider is required to forward the client’s name, address, Medicaid ID number, and diagnosis, if appropriate, with the specimen to the reference laboratory so the laboratory may bill Texas Medicaid for its services.

A provider may bill only one laboratory handling charge per client visit unless the specimen is divided and sent to different laboratories or different specimens are collected and sent to different labs. The claim must indicate the name and/or address of each laboratory to which a specimen is sent for more than one laboratory handling fee to be paid. This laboratory handling benefit does not apply to THSteps medical checkup providers who must submit specimens to the DSHS Laboratory.

9.2.41.3 Blood Counts

Texas Medicaid considers a baseline CBC appropriate for the evaluation and management of existing and suspected disease processes. CBCs should be individualized and based on client history, clinical indications, or proposed therapy and will not be reimbursed for screening purposes.

Refer to: Subsection 2.2.7, “Complete Blood Count (CBC),” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)* for more information about blood counts.

9.2.41.4 Clinical Lab Panel Implementation

Refer to: Subsection 2.2.5, “Automated Laboratory Tests and Laboratory Paneling,” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)* for more information about laboratory panels.

9.2.41.5 Clinical Pathology Consultations

Clinical pathology consultations (procedure code 80500 or 80502) are a benefit of Texas Medicaid for services rendered by a consultant who is either a clinical pathologist or a geneticist. In a clinical pathology consultation, the consultant may also help the ordering physician determine whether further study is appropriate, based on test results.

Providers may be reimbursed for clinical pathology consultations when the claim indicates the following information:

- The name and address or provider identifier of the physician who requested the consultation.
- A written narrative report describing the findings of the consultation, which will also be included in the client’s medical record.

Note: *To submit claims for interpretation, the provider must document an interaction that clearly shows that the consultant interpreted the test results and made specific recommendations to the attending physicians.*

If the claim does not include all of this information, the clinical pathology consultation will be denied.

Note: *Geneticists who provide a pathology consultation must submit claims using their acute care provider identifier.*

Routine conversations held between a consultant and attending physicians about test orders or results are not consultations. Information that can be furnished by a non-physician laboratory specialist does not qualify as a consultation service.

9.2.41.6 Cytogenetics Testing

Cytogenetics testing is a group of laboratory tests involving the study of chromosomes.

Clinical evidence supports the significance of cytogenetics evaluation in the diagnosis, prognosis, and treatment of acute leukemias and lymphomas, especially in children. The detection of the well-defined recurring genetic abnormalities often enables a correct diagnosis with important prognostic information that affects the treatment protocol.

Reimbursement for cytogenetics testing is limited to the following diagnosis codes:

Diagnosis Codes									
20030	20031	20032	20033	20034	20035	20036	20037	20038	20040

Cytogenetics testing may be reimbursed with the following procedure codes and limitations:

Procedure Code	Quantity Allowed
Tissue Culture Procedure Codes and Limitations	
88230	1 per day any provider
88233	1 per day any provider
88235	1 per day any provider
88237	1 per day any provider
88239	1 per day any provider
Chromosome Analysis Procedure Codes and Limitations	
88245	1 per day any provider
88248	1 per day any provider
88249	1 per day any provider
88261	1 per day any provider
88262	1 per day any provider
88263	1 per day any provider
88264	1 per day any provider
88280	5 per day any provider
88283	1 per day any provider
88285	1 per day any provider
88289	1 per day any provider
Molecular Cytogenetics Procedure Codes and Limitations	
88271	50 per provider per day
88272	10 per provider per day
88273	10 per provider per day
88274	10 per provider per day
88275	10 per provider per day
Interpretation and Report Procedure Code	
88291	As medically necessary

9.2.41.7 Maternal Serum Alpha-Fetoprotein (MSAFP)

MSAFP may be reimbursed once per pregnancy per provider for all pregnant women eligible for Medicaid. For additional services, payment is allowed with documentation attached to the claim. Procedure code 82105 should be used for MSAFP.

9.2.42 Lung Volume Reduction Surgery (LVRS)

LVRS is a benefit for clients who are not high risk but have a presence of severe, upper-lobe emphysema (as defined by radiologist assessment of upper-lobe predominance on CT scan) or who are not high risk but have a presence of severe, non-upper-lobe emphysema with low exercise capacity.

Note: Clients who have low exercise capacity are those whose maximal exercise capacity is at or below 25 watts for women and 40 watts for men after completion of the pre-operative therapeutic program in preparation for LVRS. Exercise capacity is measured by incremental, maximal, symptom-limited exercise with a cycle ergometer utilizing a 5- or 10-watt-per-minute ramp on 30-percent oxygen after 3 minutes of unloaded pedaling.

LVRS must be performed in a facility that meets at least one of the following requirements:

- Certified under the Disease Specific Care Certification Program for LVRS by the Joint Commission on Accreditation of Health Care Organization
- Approved by Medicare as a lung or heart-lung transplant facility

The surgery must be both preceded and followed by a program of diagnostic and therapeutic services that are consistent with those provided in the National Emphysema Treatment Trial (NETT) and designed to maximize the client's potential to successfully undergo and recover from surgery. The program must meet all of the following requirements:

- Include a 6- to 10-week series of at least 16, and no more than 20, pre-operative sessions, each lasting a minimum of 2 hours
- Include at least 6, and no more than 10, post-operative sessions, each lasting a minimum of 2 hours, within 8 to 9 weeks after the LVRS
- Be consistent with the care plan that was developed by the treating physician following the performance of a comprehensive evaluation of the client's medical, psychosocial, and nutritional needs
- Be arranged, monitored, and performed under the coordination of the facility where the surgery takes place

Clients must have surgical clearance by a licensed cardiologist for any of the following conditions:

- Unstable angina
- Left ventricular ejection fraction (LVEF) cannot be estimated from the echocardiogram
- LVEF less than 45 percent
- Dobutamine-radionuclide cardiac scan indicates coronary artery disease or ventricular dysfunction
- Arrhythmia (more than 5 premature ventricular contractions (PVC) per minute)
- Cardiac rhythm other than sinus
- PVCs on electrocardiogram (EKG) at rest

For clients with cardiac ejection fraction less than 45 percent, there must be no history of congestive heart failure or myocardial infarction within six months of consideration for surgery.

Clients must have surgical clearance by a licensed pulmonologist, thoracic surgeon, and anesthesiologist after completion of pre-operative rehabilitation.

Procedure codes 32491, G0302, G0303, G0304, and G0305 are limited to one per rolling year per client for any provider.

Pre-operative pulmonary rehabilitation services for preparation for LVRS (procedure codes G0302, G0303, and G0304) and post-discharge pulmonary surgery services LVRS (procedure code G0305) will be restricted to diagnosis codes 4928 and 5182.

Procedure code G0305 may be reimbursed only if a claim for LVRS (procedure code 32491) has been submitted within the past 12 months.

9.2.42.1 Prior Authorization for Lung Volume Reduction Surgery

LVRS must be prior authorized and is limited to clients who have severe emphysema, disabling dyspnea, and evidence of severe air trapping. The following documentation must be submitted with the request for prior authorization:

- The client's history and physical examination is consistent with emphysema
- BMI less than 31.1 kg/m² (men) or less than 32.3 kg/m² (women)
- Pulmonary status that is stable with less than 20 mg prednisone (or equivalent) per day
- A radiographic high resolution computer tomography (HRCT) scan has been conducted that shows evidence of bilateral emphysema.
- The forced expiratory volume in one second (FEV₁) (maximum of pre- and postbronchodilator values) is less than or equal to 45 percent of the predicted value. If the client is 70 years of age and older, FEV₁ is 15 percent of the predicted value or more.
- The total lung capacity (TLC) greater than 100 percent predicted postbronchodilator
- Residual volume (RV) greater than 150 percent predicted postbronchodilator found on prerehabilitation pulmonary function study.
- Arterial blood gas level (pre-rehabilitation):
 - Partial pressure of carbon dioxide (PaCO₂) less than or equal to 60 mm Hg (PaCO₂ less than or equal to 55 mm Hg if one mile above sea level)
 - Partial pressure of oxygen (PaO₂) greater than or equal to 45 mm Hg on room air (PaO₂ greater than or equal to 30 mm Hg if one mile above sea level)
- The plasma cotinine is less than or equal to 13.7 ng/ml (if the client is not using nicotine products) or the carboxyhemoglobin is less than or equal to 2.5 percent (if the client is using nicotine products).
- Nonsmoking for four months prior to initial interview and throughout evaluation for surgery
- Successful 6-minute walk test equal to or greater than 140 meters following pre-operative rehabilitation
- Successful completion of three minute unloaded pedaling in an exercise tolerance test both before and after pre-operative rehabilitation

To complete the prior authorization process, a provider must mail or fax the request to the TMHP Special Medical Prior Authorization Unit and include documentation of medical necessity.

- Requisition forms from the laboratory are not sufficient for verification of the personal and family history.
- Medical documentation that is submitted by the physician must verify the client's diagnosis or family history.

Prior authorization is not required for the associated preoperative pulmonary surgery services for preparation for LVRS (procedure codes G0302, G0303, and G0304) or the associated postdischarge pulmonary surgery services after LVRS (procedure code G0305).

9.2.42.1.1 Noncovered Conditions

LVRS is not a benefit in any of the following clinical circumstances:

- A client with characteristics that carry a high risk for perioperative morbidity and/or mortality

- A disease that is unsuitable for LVRS
- A medical condition or other circumstance that makes it likely that the client will be unable to complete the preoperative and postoperative pulmonary diagnostic and therapeutic program required for surgery
- The client presents with FEV1 less than or equal to 20 percent of predicted value, and either a homogeneous distribution of emphysema on the CT scan or a carbon monoxide diffusing capacity of less than or equal to 20 percent of predicted value (a high-risk group identified in October 2001 by the NETT)
- The client satisfies the criteria outlined above and has severe, non-upper-lobe emphysema with a high-exercise capacity. High-exercise capacity is defined as a maximal workload at the completion of the preoperative diagnostic and therapeutic program that is above 25 watts for women or 40 watts for men (under the measurement conditions for cycle ergometry).
- A previous LVRS (laser or excision) on the same lung
- A pleural or interstitial disease which precludes surgery
- A giant bulla (greater than 1/3 the volume of the lung in which the bulla is located)
- A clinically significant bronchiectasis
- A pulmonary nodule requiring surgery
- A previous lobectomy
- Uncontrolled hypertension (systolic greater than 200 mm Hg or diastolic greater than 110 mm Hg)
- Oxygen requirement greater than 6 liters per minute during resting to keep oxygen saturation greater than or equal to 90 percent
- A history of recurrent infections with clinically significant production of sputum
- Unplanned weight loss greater than 10 percent within 3 months before the consideration of surgery
- Pulmonary hypertension, defined as the mean pulmonary artery pressure of 35 mmHg or greater on the right heart catheterization or peak systolic pulmonary artery pressure of 45 mmHg or greater. Right heart catheterization is required to rule out pulmonary hypertension if the peak systolic pulmonary artery pressure is greater than 45 mmHg on an echocardiogram
- Resting bradycardia (less than 50 beats per minute)
- Frequent multifocal premature ventricular contractions (PVCs) of complex ventricular arrhythmia or sustained supraventricular tachycardia (SVT)
- Evidence of a systemic disease or neoplasia that is expected to compromise survival

9.2.43 Mastectomy and Breast Reconstruction

Mastectomy and breast reconstruction services are benefits of Texas Medicaid for male or female clients. These procedures are to be individualized, specific, and not in excess of the client's needs.

Mastectomy and breast reconstruction procedures may be reimbursed when the procedures are consistent with confirmed diagnosis of illness or injury under treatment or with appropriate personal history.

The following services are not benefits of Texas Medicaid:

- Mastectomy for a diagnosis of fibrocystic disease in the absence of documented risk factors.
- Cosmetic services performed primarily to improve appearance, except as outlined in this section.
- Commercial or "decorative" tattooing.

- Replacement of external breast prostheses beyond the limitations outlined in this policy, when the replacement is due to ordinary wear and tear.

9.2.43.1 Mastectomies

The following procedure codes for partial mastectomy, simple, subcutaneous, radical, and modified radical mastectomy are benefits of Texas Medicaid:

Procedure Codes						
19301	19302	19303	19304	19305	19306	19307

Procedure codes 19301 and 19302 may be reimbursed for services rendered to male or female clients of any age when the services are billed with an appropriate diagnosis code.

For clients with a diagnosis of cancer, procedure codes 19301 and 19302 may be reimbursed for more than 2 services rendered per lifetime.

Procedure codes 19303, 19304, 19305, 19306, and 19307 may be reimbursed for services rendered to male or female clients who are 18 years of age and older when the services are billed with an appropriate diagnosis code. Prior authorization is required for services rendered to clients who are 17 years of age and younger.

Procedure codes 19303, 19304, 19305, 19306, and 19307 are limited to 2 services per lifetime.

Mastectomy and breast reconstruction procedures may be reimbursed without prior authorization for services rendered to clients who are 18 years of age and older when the procedures meet the criteria outlined below and are billed with the following diagnosis codes:

Diagnosis Codes									
1740	1741	1742	1743	1744	1745	1746	1748	1749	1750
1759	19881	2330	V103*	V163*	V4571*	V8401*			
*Diagnosis codes V103, V163, V4571, and V8401 may be billed only with breast reconstruction procedures and simple, subcutaneous, radical, and modified radical mastectomy procedures.									

The physician must maintain documentation of medical necessity in the client’s medical record. Services are subject to retrospective review.

9.2.43.2 Prophylactic Mastectomies

Prophylactic mastectomy is the removal of the breast to prevent the development of cancer. This procedure is a benefit of Texas Medicaid for clients who are 18 years of age and older and who are at moderate-to-high risk for the development of breast cancer. Prior authorization is required for services rendered to clients who are 17 years of age and younger.

Moderate-risk to high-risk clients are those who meet one or more of the following criteria:

- Presence of a breast cancer 1 (BRCA1) or a breast cancer 2 (BRCA2) genetic mutation
- Presence of lesions associated with an increased risk of cancer, such as atypical hyperplasia or lobular carcinoma in situ (LCIS)
- Diagnosis of breast cancer in one breast

Refer to: Subsection 2.2.6, “Breast Cancer Gene 1 and 2 (BRCA) Testing” in the Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks).

Documentation that supports medical necessity for the procedure must be maintained in the client’s medical record and must include the following:

- Documentation that the client is moderate-to-high risk.

- Documentation that, as a candidate for prophylactic mastectomy, the client has undergone counseling regarding cancer risks. Counseling must include assessment of all of the following:
 - The client's ability to understand the risks and long-term implications of the surgical procedure.
 - The client's informed choice to proceed with the surgical procedure.

All documentation is subject to retrospective review.

9.2.43.3 Breast Reconstruction

Breast reconstruction following a medically necessary mastectomy is a benefit of Texas Medicaid when all of the following criteria are met:

- The client is eligible for Texas Medicaid at the time of the breast reconstruction.
- The client has a documented history of a mastectomy performed while eligible for Texas Medicaid and has one of the diagnoses listed above.

Note: Prior authorization is required for breast reconstruction service rendered to clients who do not have an established history of mastectomy procedure(s) reimbursed by Texas Medicaid for the client.

- The client meets age and sex criteria for the requested procedure as outlined above.
- The physician has documented a plan in the client's chart that addresses the recommended breast reconstruction.

All Medicaid services, including breast reconstruction after breast cancer surgery, are covered for Medicaid Breast and Cervical Cancer (MBCC) clients who are receiving active cancer treatment. Active cancer treatment is defined as services that are related to the client's condition as documented in the client's plan of care, such as, surgery, chemotherapy, radiation, reconstructive surgery, and medication (e.g., ongoing hormonal treatments).

Breast reconstruction includes the following:

- Creation of a new mound.
- Reconstruction of the nipple or areola, which is accomplished with small flaps for the nipple and either tattooing or a skin graft for the areola. Nipple-areola pigmentation, commonly known as medical tattooing, is the final stage of breast reconstruction surgery.

Breast reconstruction may also include the following, in order to establish symmetry with the contralateral breast:

- Reduction mammoplasty
- Mastopexy
- Augmentation

Breast implants, tissue flaps, or both are surgically placed in the area where natural tissue has been removed.

Breast reconstruction is performed in order to correct or repair abnormal structures of the breast caused by any of the following:

- Tumor or disease (e.g. following a primary mastectomy procedure in order to establish symmetry with a contralateral breast or following bilateral mastectomy)
- Congenital defect
- Developmental abnormality
- Infection

- Trauma to the chest wall

Breast reconstruction may be based on the type of treatment a client receives or on the extent of surgery performed. The reconstructive surgery may be performed in a single stage or several stages and may occur during or after the initial surgical procedure.

The following breast reconstruction procedure codes may be reimbursed for services rendered to clients who are 18 years of age and older:

Procedure Codes									
11920	11921	11922	19316*	19324*	19325*	19340*	19342*	19350	19355
19357*	19361	19364	19366	19367	19368	19369	19396*	S2068	
* Procedure codes 19316, 19324, 19325, 19340, 19342, 19357, and 19396 may be reimbursed for services rendered to female clients only. Prior authorization is required for services rendered to male clients.									

Prior authorization is required for services rendered to clients who are 17 years of age and younger. The following procedure codes may be reimbursed when performed as part of breast reconstruction:

Procedure Codes							
11920	11921	11922	19316	19324	19325	19355	19396

For clients with a diagnosis of cancer, the following procedure codes may be reimbursed for more than two services rendered per lifetime:

Procedure Codes									
19340	19342	19350	19357	19361	19364	19366	19367	19368	19369
19370	19371								

The following procedure codes may be reimbursed if a mastectomy (procedure code 19303, 19304, 19305, 19306, or 19307) has been reimbursed for the client by Texas Medicaid:

Procedure Codes									
19340	19342	19350	19357	19361	19364	19366	19367	19368	19369
S2068									

The following procedure codes may be reimbursed if a mastectomy (procedure code 19303, 19304, 19305, 19306, or 19307) has been reimbursed by Texas Medicaid within the client’s lifetime:

Procedure Codes				
19316	19324	19325	19355	19396

9.2.43.4 Tattooing to Correct Color Defects of the Skin

Tattooing to correct color defects of the skin (procedure codes 11920, 11921, and 11922) is limited to clients who have a documented history of a breast reconstruction performed within the past 12 months. The breast reconstruction must have been performed while the client was eligible for Texas Medicaid. Prior authorization is required for tattooing services for clients who do not have an established history.

Procedure codes 11920, 11921, and 11922 are limited to two services per lifetime.

Procedure code 11922 must be billed with procedure code 11920 or 11921.

9.2.43.5 Treatment for Complications of Breast Reconstruction

The treatment of complications related to breast reconstruction may be reimbursed using procedure codes 19370, 19371, and 19380 when all of the following criteria are met:

- The client is eligible for the Texas Medicaid breast reconstruction benefit when the complications occur.
- The client is 18 years of age or older at the time the services are rendered.
- A breast reconstruction (procedure code 19316, 19324, 19325, 19340, 19342, 19350, 19355, 19357, 19361, 19364, 19366, 19367, 19368, 19369, or S2068) has been reimbursed for the client by Texas Medicaid.

Procedure codes 19370 and 19371 may be reimbursed for services rendered to female clients only.

Prior authorization is required for services rendered to clients who do not have an established history of related services reimbursed for the client by Texas Medicaid or for clients who do not meet age and gender criteria.

9.2.43.6 External Breast Prostheses

External breast prostheses are benefits when provided by a licensed prosthetist or orthotist to clients who have a history of a medically necessary mastectomy procedure. The following procedure codes may be reimbursed for external breast prostheses services rendered to female clients of any age:

Procedure Codes									
L8000	L8001*	L8002	L8010*	L8015	L8020*	L8030*	L8031*	L8032	L8035
L8039									
* Modifier LT or RT required.									

Procedure codes L8001, L8010, L8020, L8030, and L8031 must be submitted with modifier LT or RT indicating the location for the breast prosthesis.

The external breast prosthesis procedure codes are limited as follows:

Procedure Code	Limitation
L8000	4 per rolling year
L8001	4 per rolling year, per modifier <i>Note: If more than 4 unilateral mastectomy bras are required per rolling year, prior authorization may be requested for the additional item(s). If a second mastectomy is performed within the same year, the bilateral procedure code must be used for the necessary mastectomy bra.</i>
L8002	4 per rolling year
L8010	8 total per rolling year (regardless of modifier)
L8015	2 per lifetime
L8020	1 total per 6 rolling months (regardless of modifier)
L8030	1 total per 2 rolling years (regardless of modifier)
L8031	1 total per 2 rolling years (regardless of modifier)
L8032	8 total per rolling year
L8035	Prior authorization required
L8039	Prior authorization required

The following procedure codes may be reimbursed if a mastectomy (procedure code 19303, 19304, 19305, 19306, or 19307) has been reimbursed for the client by Texas Medicaid:

Procedure Codes								
L8000	L8001	L8002	L8010	L8015	L8020	L8030	L8031	L8032

Prior authorization is required for the initial prosthesis for clients who do not have an established history of mastectomy procedure(s) reimbursed for the client by Texas Medicaid.

Prior authorization is required for the replacement of external breast prosthesis as follows:

- If the external breast prosthesis is lost or irreparably damaged, prosthesis of the same type may be prior authorized at any time.
- If the external breast prosthesis is needed due to a change in the client’s medical condition, prosthesis of a different type may be prior authorized at any time.

9.2.43.7 Prior Authorization Requirements for Mastectomy and Breast Reconstruction

Prior authorization is not required when all of the following criteria are met:

- The procedure is a mastectomy.
- The procedure is a breast reconstruction and the client has an established history of mastectomy procedure(s) reimbursed for the client by Texas Medicaid.
- The client is 18 years of age or older.
- The diagnosis code is listed above.
- The client meets gender criterion.
- The request is within the limitations outlined in this section for external breast prosthesis procedure code L8000, L8001, L8002, L8010, L8015, L8020, or L8030.

Prior authorization is required when any of the following criteria is met:

- The client is 17 years of age or younger.

Exception: *Partial mastectomy procedure codes 19301 and 19302 may be reimbursed for clients of any age and do not require prior authorization.*

- The diagnosis code is not listed above.

Note: *If it becomes medically necessary to submit a noncovered diagnosis code that differs from the noncovered diagnosis code approved in the prior authorization, the authorization may be updated before claim submission.*

- The client does not meet the gender criterion for the requested procedure.
- The client does not have an established history of related services while Medicaid-eligible as follows:
 - For breast reconstruction procedures, the client does not have an established history of mastectomy procedure(s) reimbursed for the client by Texas Medicaid.
 - For complications related to breast reconstruction, the client does not have an established history of breast reconstruction procedure(s) reimbursed for the client by Texas Medicaid.
 - For external breast prostheses, the client does not have an established history of mastectomy procedure(s) reimbursed for the client by Texas Medicaid.
- The request is for external breast prosthesis procedure code L8035 or L8039. The request must include documentation of medical necessity for the requested device.

- The request is for new or replacement external breast prostheses outside of the limitations outlined above.

Prior authorization requests for fee-for-service Medicaid clients must be submitted by the physician to the Special Medical Prior Authorization (SMPA) department. Documentation that supports medical necessity for the requested procedure must be included with the request. When required, the requests must include the physician's original signature and the date signed. Stamped or computerized signatures and dates are not accepted. Without this information, requests will be considered incomplete.

9.2.44 Neurostimulators

Neurostimulator and neuromuscular stimulator procedures and the rental or purchase of devices and associated supplies, such as leads and form fitting conductive garments are a benefit of Texas Medicaid when medically necessary.

Neurostimulator devices are considered DME, so providers must complete both the Home Health (Title XIX) DME/Medical Supplies Physician Order Form (Title XIX Form) to prescribe the DME and the DME Certification and Receipt Form to show receipt of the DME by the client. Both forms must be maintained in the client's medical record.

Refer to: Subsection 2.2.2, “* Durable Medical Equipment (DME) and Supplies,” in the *Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook (Vol. 2, Provider Handbooks)* for more information about DME.

Rental of equipment includes all necessary accessories, supplies, adjustments, repairs, and replacement parts.

Items and/or services addressed in the sections below are either reimbursed at a maximum fee determined by HHSC or are manually priced. If an item is manually priced, the manufacturer's suggested retail pricing (MSRP) must be submitted for consideration of rental or purchase with the appropriate procedure codes. Manually priced items are reimbursed at the MSRP minus a discount (18 percent) as determined by HHSC.

9.2.44.1 Prior Authorization for Neurostimulators

All devices and related procedures for the initial application or surgical implantation of the stimulator or neuromuscular stimulator device require prior authorization.

Requests for prior authorization must be submitted to the Special Medical Prior Authorization (SMPA) department with documentation supporting the medical necessity of the requested device. Providers may use the Special Medical Prior Authorization (SMPA) Request Form when they submit requests to the SMPA department.

To avoid unnecessary denials, the physician must provide correct and complete information including documentation for medical necessity of the equipment and/or supplies requested. The physician must maintain documentation of medical necessity in the client's medical record. The requesting provider may be asked for additional information to clarify or complete a request for the equipment and/or supplies. Prior authorization requests for all neurostimulators and related procedures must include the provider identifiers for both the surgeon and the facility.

A neurostimulator device that has been purchased is anticipated to last a maximum of five years and may be considered for replacement when five years have passed and/or the equipment is no longer repairable. At that time, replacement of the device will be considered. Replacement devices require prior authorization. Replacement of equipment may also be considered when loss or irreparable damage has occurred. A copy of the police or fire report when appropriate, and the measures to be taken to prevent reoccurrence must be submitted.

9.2.44.2 Neuromuscular Electrical Stimulation (NMES)

NMES application and the rental or purchase of devices and conductive garments are a benefit of Texas Medicaid when medically necessary and prior authorized. Prior authorization requests for NMES must include documentation of a spinal cord injury or disuse atrophy that is refractory to conventional therapy.

NMES may be reimbursed using the following procedure codes:

Procedure Codes							
64580	E0731	E0745	E0762	E0764	A4556	A4557	A4595

9.2.44.2.1 NMES Rental

The rental of a NMES device may be considered before purchase and is limited to a one-month trial period with consideration for one additional month’s trial with documentation of medical necessity. Supplies are considered to be part of the rental and will not be separately reimbursed. Garments may be considered for reimbursement during the rental period when medically necessary.

9.2.44.2.2 NMES Purchase

The purchase of a NMES device is limited to once per five years, and may be reimbursed when there is documentation of successful test stimulation (during rental or other therapeutic period) that showed improvement as measured by the following:

- A demonstrated increase in range of motion.
- The client’s improved ability to complete activities of daily living or perform activities outside the home.

Garments may be considered for reimbursement during the purchase period when medically necessary.

9.2.44.2.3 NMES for Muscle Atrophy

NMES may be reimbursed when used to treat muscle disuse atrophy when brain, spinal cord, and peripheral nerve supply to the muscle is intact, as well as other non-neurological conditions. Examples of NMES treatment for non-neurological conditions include, but are not limited to, casting or splinting of a limb, contracture due to scarring of soft tissue as in burn lesions, and hip replacement surgery until orthotic training begins.

9.2.44.2.4 NMES for Walking in Clients with Spinal Cord Injury (SCI)

The type of NMES that is used to enhance the ability to walk of SCI clients is commonly referred to as functional electrical stimulation (FES). These devices are surface units that use electrical impulses to activate paralyzed or weak muscles in precise sequence.

The use of NMES/FES is limited to SCI clients who have completed a training program which consists of at least 32 physical therapy sessions with the device over a period of three months.

The trial period of physical therapy will enable the treating physician to properly evaluate the client’s ability to use NMES/FES devices frequently and for the long term.

Physical therapy necessary to perform this training must be directly performed by the physical therapist as part of a one-on-one training program. The goal of physical therapy must be to train SCI clients on the use of NMES/FES devices to achieve walking, not to reverse or retard muscle atrophy.

NMES/FES is a benefit for SCI clients who have all of the following characteristics:

- Clients with intact lower motor unit (L1 and below) (both muscle and peripheral nerve).
- Clients with muscle and joint stability for weight bearing at upper and lower extremities that can demonstrate balance and control to maintain an upright posture while standing independently for at least three minutes.

- Clients who demonstrate brisk muscle contraction to NMES and have sensory perception electrical stimulation sufficient for muscle contraction.
- Clients who possess high motivation, commitment, and cognitive ability to use such devices for ambulation, as established by provider interview and documentation.
- Clients who can transfer independently.
- Clients who can demonstrate hand and finger function to manipulate controls.
- Clients with at least six-month post recovery spinal cord injury and restorative surgery.
- Clients with hip and knee degenerative disease and no history of long bone fracture secondary to osteoporosis.

NMES and FES used for walking is not a benefit in SCI clients with any of the following:

- Cardiac pacemakers
- Severe scoliosis or severe osteoporosis
- Skin disease or cancer at area of stimulation
- Irreversible contracture
- Autonomic dysflexia

9.2.44.3 Transcutaneous Electrical Nerve Stimulation (TENS)

TENS involves the attachment of a transcutaneous nerve stimulator to the surface of the skin over the peripheral nerve to be stimulated.

TENS may be reimbursed for the treatment of acute postoperative pain or chronic pain that is refractory to conventional therapy.

TENS may be reimbursed using the following procedure codes:

Procedure Codes						
64550	E0720	E0730	E0731	A4556	A4557	A4595

9.2.44.3.1 TENS Rental

Rental of a TENS device will be considered for prior authorization when there is documentation of a condition that indicates acute postoperative pain or chronic pain that is refractory to conventional therapy.

The rental of a TENS device is limited to one-month trial period with consideration for one additional month’s trial with documentation of medical necessity. Supplies, such as lead wires and electrodes, are considered to be part of the rental and will not be separately reimbursed. Garments may be considered during the rental period when medically necessary.

When the TENS device is rented for a trial period rather than supplied by the provider, the combined payment made for professional services and the rental of the stimulator must not exceed the amount which would be reimbursed for the total service, including the stimulator, if furnished by the provider alone.

9.2.44.3.2 TENS Purchase

The purchase of a TENS device is limited to once every five years and may be reimbursed with prior authorization when there is documentation of the following:

- A condition that indicates chronic pain that is refractory to conventional therapy.

- A successful test stimulation (during rental or other therapeutic period) that showed improvement as measured by demonstrated increase in range of motion.
- The client's improved ability to complete activities of daily living or perform activities outside the home.

9.2.44.4 NMES and TENS Garments

The rental of the NMES/TENS garment is not covered during the trial rental period unless the client has a documented skin problem prior to the start of the trial period, and HHSC or its designee determines that use of such an item is medically necessary for the client based on the documentation submitted.

The purchase of conductive garments for NMES/TENS devices may be considered when:

- The garment has been prescribed by a physician for use in providing covered NMES/TENS treatment.
- A NMES/TENS device has been purchased for the client's use.
- The conductive garment is necessary for one of the medical indications outlined below:
 - The client cannot manage without the conductive garment because there is such a large area or so many sites to be stimulated and the stimulation would have to be delivered so frequently that it is not feasible to use conventional electrodes, adhesive tapes, and lead wires.
 - The client cannot manage the treatment for chronic intractable pain without the conductive garment because the areas or sites to be stimulated are inaccessible with the use of conventional electrodes, adhesive tapes, and lead wires.
 - The client has a documented medical condition such as skin problems that preclude the application of conventional electrodes, adhesive tapes, and lead wires.

9.2.44.5 NMES and TENS Supplies

Supplies for purchased devices are limited as follows:

- If additional electrodes are required, procedure code A4556 may be considered for reimbursement at a maximum of 15 per month.
- If additional lead wires are required, procedure code A4557 may be considered for reimbursement at a maximum of 2 per month.
- Procedure code A4595 is limited to 1 per month.

Supplies are included in the rental and will not be reimbursed separately.

Supply procedure codes A4556, A4557, or A4595 may be reimbursed for clients with a purchased device and a claims history of an NMES/TENS procedure within the past five years. Providers must maintain documentation in the client's medical record that a device has been purchased. Additional documentation such as the purchase date, serial number, and purchasing entity of the device may be required.

9.2.44.6 Diaphragm-Pacing Neuromuscular Stimulation

Diaphragm-pacing neuromuscular stimulation is a benefit of Texas Medicaid when medically necessary and prior authorized.

Diaphragm-pacing neuromuscular stimulation is the electrical stimulation to one or both of the phrenic nerves or to the phrenic motor point regions of the diaphragm muscles that cause contraction of one or both of the two hemidiaphragms rhythmically to produce inspiration.

Diaphragm-pacing neuromuscular stimulation may be reimbursed when billed with procedure codes 64575 and 64590.

9.2.44.6.1 Prior Authorization for Diaphragm-Pacing Neuromuscular Stimulation

The surgical implantation of the diaphragm-pacing neuromuscular stimulator and purchase of a device are considered for prior authorization when medically necessary for individuals with severe, chronic respiratory failure that requires mechanical ventilation for any of the following reasons:

- Improvement of ventilatory function in stable, non-acute members with spinal cord injury (SCI) with high quadriplegia at or above C-3
- Alveolar hypoventilation, either primary or secondary to brainstem disorder
- Amyotrophic lateral sclerosis

All of the following criteria must be met:

- The phrenic nerves are viable
- Diaphragmatic function is sufficient to accommodate chronic stimulation
- Pulmonary function is known to be adequate
- The client has normal chest anatomy, a normal level of consciousness, and has the ability to participate in and complete the training and rehabilitation associated with the use of the device

9.2.44.7 Dorsal Column Neurostimulator (DCN)

DCN involves the surgical implantation of neurostimulator electrodes within the dura mater (endodural) or the percutaneous insertion of electrodes in the epidural space. The neurostimulator system stimulates pain-inhibiting nerve fibers, masking the sensation of pain with a tingling sensation (paresthesia).

DCN implantation may be reimbursed using procedure codes 61783, 63650, 63655, or 63685.

Conditions that may indicate chronic intractable pain include, but are not limited to, the following:

- Post-amputation “ghost” pain
- Cancer with bone metastasis
- Causalgia of upper/lower limb
- Herniated disc
- Radiculitis
- Spinal stenosis
- Spinal surgery
- Tic douloureux (trigeminal neuralgia)

9.2.44.7.1 Prior Authorization for Dorsal Column Neurostimulators

DCN electrode implantation and the purchase of devices is a benefit of Texas Medicaid when medically necessary and prior authorized.

The surgical implantation of DCN device may be considered for prior authorization for clients who have chronic intractable pain with documentation that indicates the following:

- Other treatment modalities, including pharmacological, surgical, physical, and/or psychological therapies, have been tried and shown to be unsatisfactory, unsuitable, or contraindicated for the client.
- The client has undergone careful screening, evaluation, and diagnosis by a multidisciplinary team prior to implantation.

- There has been evidence of pain relief during a trial period for DCN with a temporarily implanted electrode or electrodes preceding the permanent implantation.

Note: A trial period including device and supplies is considered part of DCN procedures and will not be separately reimbursed.

- All the facilities, equipment, and professional and support personnel required for the proper diagnosis, treatment, training, and the client's follow-up are available.

9.2.44.8 Gastric Electrical Stimulation (GES)

GES involves electrical stimulation of the lower stomach (antrum) with a fully implantable system that consists of two unipolar intramuscular leads (thin wires) and a neurostimulator device.

GES is a benefit of Texas Medicaid when medically necessary and prior authorized for the treatment of chronic intractable nausea and vomiting that is secondary to gastroparesis that has proven to be refractory to medical management.

GES may be reimbursed with procedure codes 43647, 43881, and 64590.

GES is a benefit for Texas Medicaid clients with the following conditions:

- Organic obstruction or pseudo-obstruction
- A primary eating or swallowing disorder
- Chemical dependency
- Pregnancy

9.2.44.8.1 Prior Authorization for GES

The surgical implantation of a GES and purchase of a device are considered for prior authorization for chronic intractable nausea and vomiting secondary to gastroparesis of diabetic or idiopathic etiology when all of the following criteria are met:

- Gastric emptying is significantly delayed as documented by standard scintigraphic imaging of solid food.
- Patient is refractory or intolerant of two out of three classes of prokinetic medications and two out of three antiemetic medications.
- The client's nutritional status is sufficiently low that all of the following criteria for total parenteral nutrition are met.
- Adequate trials of dietary adjustment, oral supplements, or tube enteral nutrition have demonstrated that the patient can receive no more than 30 percent of his/her caloric needs orally and/or by tube.
- The patient must be in a stage of wasting as indicated by all of the following:
 - Weight is significantly less than normal body weight for a patient's height and age in comparison with pre-illness weight.
 - Serum albumin is less than 3.4 grams.
 - BUN is less than 10 mg.
 - Phosphorus level is less than 2.5 mg.

9.2.44.9 Intracranial Neurostimulators

The surgical implantation, revision, and removal of intracranial deep brain stimulators (DBS) are a benefit for the relief of chronic intractable pain when more conservative methods, such as TENS, PENS, or pharmacological management have failed or were contraindicated.

Intracranial neurostimulation may be reimbursed using the following procedure codes:

Procedure Codes									
61781	61782	61850	61860	61863	61864	61867	61868	61870	61885
61886									

9.2.44.9.1 Prior Authorization for Intracranial Neurostimulators

Intracranial neurostimulation involves the stereotactic implantation of electrodes in the brain and is a benefit of Texas Medicaid when medically necessary and prior authorized.

The surgical implantation and purchase of an intracranial neurostimulation device may be considered for prior authorization for chronic intractable pain or treatment of intractable tremors.

Requests for prior authorization must include documentation of the following:

- Other treatment modalities, including pharmacological, surgical, physical, and psychological therapies, have been tried and shown to be unsatisfactory, unsuitable, or contraindicated for the client.
- The client has undergone careful screening, evaluation, and assessment by a multidisciplinary team prior to implantation.
- The client has reported pain relief with a temporarily implanted electrode preceding the permanent implantation.
- All the facilities, equipment, and support personnel required for the proper assessment, treatment, training, and client’s follow-up are available.

Prior authorization will not be given for the treatment of motor function disorders such as multiple sclerosis; however, the implantation, revision, and removal of deep brain stimulators may be reimbursed for the treatment of intractable tremors due to the following:

- Idiopathic Parkinson’s disease
- Essential tremor

9.2.44.10 Pelvic Floor Stimulation

Purchase of a non-implantable pelvic floor stimulator (procedure code E0740) is a benefit of Texas Medicaid for the treatment of stress or urge incontinence in clients who have failed conservative treatment, such as Kegel exercises, behavior management, bladder training, or medication.

Purchase of the pelvic floor stimulator device is limited to once per five years. All accessories and supplies are considered part of the purchase price and are not reimbursed separately.

9.2.44.10.1 Prior Authorization for Pelvic Floor Stimulation

Prior authorization is required for the purchase of a pelvic floor stimulator device.

Documentation submitted with the prior authorization request must demonstrate that the client:

- Has a diagnosis of stress or urge incontinence.
- Has completed a six-month trial of pelvic muscles exercises with no significant clinical improvement.

9.2.44.11 Percutaneous Electrical Nerve Stimulation (PENS)

PENS is a benefit of Texas Medicaid when medically necessary and prior authorized. Devices and supplies are considered a part of the service and are not separately reimbursable.

PENS is a diagnostic procedure for the treatment of chronic pain involving the stimulation of peripheral nerves by a needle electrode inserted through the skin.

9.2.44.11.1 Prior Authorization for PENS

PENS services may be reimbursed with prior authorization for clients who meet the following criteria:

- The client has a diagnosis that indicates chronic pain, which is refractory to conventional therapy.
- Treatment with TENS has failed or is contraindicated for the client.

PENS may be reimbursed using the following procedure codes: 64553, 64555, or 64590. The revision or removal of a peripheral neurostimulator used in PENS therapy may be reimbursed without prior authorization using procedure code 64595.

9.2.44.12 Sacral Nerve Stimulators (SNS)

SNS are a benefit of Texas Medicaid when medically necessary and prior authorized. SNS implantation may be reimbursed using procedure code 64561, 64581, or 64590.

SNS involves the use of pulse generators that transmit electrical impulses to the sacral nerves through a surgically implanted wire for treatment of urinary retention, urinary frequency, and urinary/fecal incontinence.

9.2.44.12.1 Prior Authorization for SNS

The surgical implantation of SNS and purchase of a device may be considered for prior authorization with the following diagnosis codes: 59655, 78820, 78831, 78841, or 78760.

Additionally, the medical record of the client must have documentation of the following:

- The urinary retention, urinary frequency, and urinary/fecal incontinence are refractory to conventional therapy (documented behavioral, pharmacological, and/or surgical corrective therapy).
- The client is an appropriate surgical candidate such that implantation with anesthesia can occur.

9.2.44.13 Vagal Nerve Stimulators (VNS)

VNS are a benefit of Texas Medicaid when medically necessary and prior authorized, for the treatment of intractable partial onset seizures.

VNS involves the use of devices that deliver electrical pulses to the cervical portion of the vagus nerve by an implanted generator.

9.2.44.13.1 Prior Authorization for VNS

The surgical implantation and purchase of VNS devices may be considered for prior authorization with the following diagnosis codes: 34541 or 34551.

The surgical implantation of VNS may be reimbursed using procedure code 61885, 61886, 64553, or 64568.

VNS are not a benefit of Texas Medicaid in the following cases:

- For the treatment of clients with an absent left vagus nerve
- For the treatment of clients with depression
- For the treatment of clients with diseases or conditions with a poor prognosis or are progressively terminal in nature

Incapacities due to intellectual disabilities or cerebral palsy may confound the assessment of benefits resulting from VNS. When a diagnosis of intellectual disabilities or cerebral palsy exists, the treating physician must document in the client's medical record how VNS will measurably benefit the client in spite of intellectual disabilities or cerebral palsy.

9.2.44.14 Prior Authorization of Neurostimulator Devices Procedure Codes

The following device procedure codes may be reimbursed with prior authorization:

Procedure Codes									
L8681	L8682	L8683	L8684	L8685	L8686	L8687	L8688	L8689	L8695

To identify the service as a VNS device, procedure code L8686 must be submitted with modifier TG. Only one similar device code may be reimbursed per date of service for any provider.

9.2.44.15 Supplies for Neurostimulators

Supply procedure codes A4290, C1883, C1897, L8680, and L8696 may be reimbursed for clients with a purchased device and a claims history of a prior neurostimulator or neuromuscular stimulator implantation within the past five years. Providers must maintain documentation in the client’s medical record that a device has been purchased. Additional documentation such as the purchase date, serial number and purchasing entity of the initial implantable device may be required. Supplies for implantable devices may be considered for reimbursement on appeal with documentation of a prior neurostimulator or a neuromuscular stimulator implantation procedure for clients with a history that is more than five years or for those who have a neurostimulator that was not received through Texas Medicaid.

To identify the service as a VNS implantable electrode, procedure code L8680 must be submitted with modifier TG.

9.2.44.16 Electronic Analysis for Neurostimulators

The following procedure codes may be reimbursed without prior authorization for the electronic analysis of the implanted neurostimulator and neuromuscular stimulation:

Procedure Codes									
95970	95971	95972	95973	95974	95975	95978	95979	95980	95981
95982									

9.2.44.17 Revision or Removal of Neurostimulator Devices

The revision or removal of implantable neurostimulators may be reimbursed without prior authorization using the following procedure codes:

Procedure Codes									
43648	43882	61781	61782	61783	63661	63662	63663	63664	63688
61880	61888	64569	64570	64585	64595				

9.2.44.18 Noncovered Neurostimulator Services

The following services are not a benefit of Texas Medicaid:

- VNS is not a benefit when provided for the treatment of depression.
- Neurostimulation and neuromuscular stimulation services for indications other than those outlined above.

9.2.45 Newborn Services

The newborn period is defined as the time from birth through 28 days of life. This section addresses routine newborn care, attendance at delivery, newborn resuscitation, neonatal critical care, and intensive (noncritical) low birth weight services.

Retrospective review may be performed to ensure documentation supports the medical necessity of the service and any modifier used when billing a claim.

Modifier 25 may be used to identify a significant separately identifiable E/M provided on the same day by the same physician as a procedure or other service. Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client’s medical record and made available to Texas Medicaid upon request.

Physician standby (procedure code 99360) is not a benefit.

Note: Some of the services addressed in this section may also be used for care beyond 28 days of life.

Refer to: Subsection 9.2.59, “Physician Evaluation and Management (E/M) Services,” in this handbook.

Subsection 2.6.5, “Cardiorespiratory (Apnea) Monitor,” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for authorization of apnea monitors through CCP.

9.2.45.1 Circumcisions for Newborns

Texas Medicaid may provide reimbursement for circumcisions billed with procedure code 54150 or procedure code 54160.

9.2.45.2 Hospital Visits and Routine Care

The following procedure codes may be reimbursed for neonatal care and intensive care services:

Service	Procedure Code(s)	Benefit(s) and Limitation(s)
Initial hospital E/M admission	99221 99222 99223	If the client is readmitted within the first 28 days of life, the provider must bill an initial hospital evaluation and management (E/M) admission. Reimbursed one per day, any provider.
Hospital discharge	99238 99239	Reimbursed for the client’s discharge from the hospital.
Subsequent hospital and hospital consultation services	99251 99252 99253 99254 99255	Services for a client who is not critically ill and unstable but who happens to be in a critical care unit must be reported using subsequent hospital codes (99478, 99479, and 99480) or hospital consultation codes (99251, 99252, 99253, 99254, and 99255).
Initial newborn care	99460*	May be reimbursed once per lifetime, any provider. May be reimbursed when billed with a well newborn diagnosis code.
Normal newborn care	99461*	May be reimbursed once per lifetime, any provider. Subsequent visits must be billed using an appropriate visit code based on the place of service. May be reimbursed when billed with a well newborn diagnosis code.
Subsequent hospital care	99462	Reimbursable once per day in the hospital. Procedure code 99462 is not reimbursable in the birthing center. May be reimbursed when billed with a well newborn diagnosis code.
Newborn admission and discharge, same date	99463**	May be reimbursed once per lifetime when submitted by any provider. Reimbursed for newborns who are admitted and discharged on the same day from the hospital or birthing room setting (either hospital or birthing center). May be reimbursed when billed with a well newborn diagnosis code.

* Newborn examinations billed with procedure codes 99460, 99461, and 99463 may be counted as a THSteps periodic medical checkup when all necessary components are completed and documented in the medical record.
** If the client is readmitted within the first 28 days of life, the provider must bill an initial hospital evaluation and management (E/M) admission (procedure code 99221, 99222, or 99223).

Service	Procedure Code(s)	Benefit(s) and Limitation(s)
Attendance at delivery	99464	May be reimbursed once, and only on the day of delivery, when billed by a physician other than the delivering physician.
Newborn resuscitation	99465	Reimbursed for the resuscitation of the newborn.
Initial hospital care and initial intensive care	99477	Reimbursed for those neonates who require intensive observation, frequent interventions, and other intensive services. Non-time-based procedure codes must be billed daily irrespective of the time that the provider spends with the neonate or infant. Initial neonatal critical and intensive care (procedure codes 99468 and 99477) may be reimbursed once per admission, any provider. Note: For subsequent admissions during the first 28 days of life, procedure codes 99468 and 99477 may be considered for reimbursement upon appeal.
Subsequent intensive care	99478 99479 99480	Non-time-based procedure codes must be billed daily irrespective of the time that the provider spends with the neonate or infant. Subsequent critical and intensive care (procedure codes 99469, 99478, 99479, and 99480) will be considered for reimbursement once per day, any provider. Services for a client who is not critically ill and unstable but who happens to be in a critical care unit must be reported using subsequent hospital codes (99478, 99479, and 99480) or hospital consultation codes (99251, 99252, 99253, 99254, and 99255). Procedure codes 99478, 99479, and 99480 must be billed for subsequent neonatal intensive (noncritical) services. The present body weight of the neonate or infant determines the appropriate procedure code that must be billed. When the present body weight of a neonate exceeds 5,000 grams, a subsequent hospital care service (procedure code 99231, 99232, or 99233) must be billed.

* Newborn examinations billed with procedure codes 99460, 99461, and 99463 may be counted as a THSteps periodic medical checkup when all necessary components are completed and documented in the medical record.
** If the client is readmitted within the first 28 days of life, the provider must bill an initial hospital evaluation and management (E/M) admission (procedure code 99221, 99222, or 99223).

Note: Services for a newborn’s unsuccessful resuscitation may be billed under the mother’s Texas Medicaid number using procedure code 99499.

Refer to: Section 5, “THSteps Medical” in the *Children’s Services Handbook (Vol. 2 Provider Handbooks)*.

Subsection 5.3.9, “Newborn Examination,” in the *Children’s Services Handbook (Vol. 2 Provider Handbooks)* for a list of the required components for an initial THSteps exam.

Retrospective review may be performed to ensure documentation supports the medical necessity of the service and any modifier used when billing a claim.

Procedure codes 99460, 99461, 99462, and 99463 may be reimbursed when billed with one of the following well newborn diagnosis codes:

Diagnosis Codes									
V290	V291	V292	V293	V298	V299	V3000	V3001	V301	V302
V3100	V3101	V311	V312	V3200	V3201	V321	V322	V3300	V3301
V331	V332	V3400	V3401	V341	V342	V3500	V3501	V351	V352

Diagnosis Codes									
V3600	V3601	V361	V362	V3700	V3701	V371	V372	V3900	V3901
V391									

In the following table, procedure codes in Column A will be denied when billed with the same date of service by the same provider as a procedure code in Column B:

Column A (Denied)	Column B
99238, 99239	99460, 99461, 99463
99462	99238, 99239
99461, G0102	99463
36410, 96361, 99292, 99307, 99354, 99355, 99356, 99357	99468, 9469
36410, 96361, 99354, 99355, 99356, 99357, 99471, 99472	99477
36410, 96361, 99291, 99292, 99307, 99354, 99355, 99356, 99357, 99471, 99472, 99478	99478
36410, 94761, 96361, 99291, 99292, 99307, 99354, 99355, 99356, 99357, 99471, 99472, 99478, 99479	99479
36410, 96361, 99291, 99292, 99307, 99308, 99309, 99310, 99318, 99324, 99325, 99326, 99327, 99328, 99334, 99335, 99336, 99337, 99354, 99355, 99356, 99357, 99471, 99472, 99478, 99479, 99480	99480

9.2.45.3 Newborn Hearing Screening

The newborn hearing screening procedure is a screening procedure, not diagnostic, and will not be reimbursed separately from the usual inpatient newborn delivery payment. Special investigations and examination codes are not appropriate for use with hearing screening of infants. For more information on newborn hearing screening, providers may contact:

Texas Early Hearing Detection and Intervention
 PO Box 149347, MC-1918
 Austin, TX. 78714-9347
 1-512-458-7111, Ext. 2600
www.dshs.state.tx.us/audio

Refer to: Section 2, “Nonimplantable Hearing Aid Devices and Related Services” in the *Vision and Hearing Services Handbook (Vol. 2, Provider Handbooks)*.

Subsection 5.3.11.2.3, “Hearing Screening,” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for additional information about hearing screenings.

9.2.46 Obstetrics and Prenatal Care

Medicaid reimburses prenatal care, deliveries, and postpartum care as individual services. Providers may choose one of the following options for billing maternity services:

- Providers may itemize each service individually on *one* claim form and file at the time of delivery. The filing deadline is applied to the date of delivery.
- Providers may itemize each service individually and submit claims as the services are rendered. The filing deadline is applied to each individual date of service.

Providers who only provide prenatal care and choose to submit prenatal visit charges on one claim form have the filing deadline applied to the estimated date of confinement (EDC) that must be stated in Block 24D of the CMS-1500 claim form.

Laboratory (including pregnancy tests) and radiology services provided during pregnancy must be billed separately and claims must be received by TMHP within 95 days of the date of service.

When billing for prenatal services, use modifier TH with the appropriate evaluation and management procedure code to the highest level of specificity. Failure to use modifier TH may result in recoupment of payment rendered.

Providers must bill the most appropriate new or established patient prenatal or postnatal visit procedure code. New patient codes may be used when the client has not received any professional services from the same physician or a physician of the same specialty who belongs to the same group, within the past three years.

Physicians (obstetricians, family practice physicians, and maternal-fetal medicine specialists), CNMs, and maternity service clinics (MSCs) are limited to 20 prenatal care visits per pregnancy and one postpartum care visit after discharge from the hospital. Routine pregnancies are anticipated to require around 11 visits per pregnancy, and high-risk pregnancies are anticipated to require around 20 visits per pregnancy.

More frequent visits may be necessary for high-risk pregnancies. High-risk obstetrical visits are not limited to 20 visits per pregnancy. The provider can appeal with documentation supporting a complication of pregnancy. Documentation reflecting the need for increased visits must be maintained in the physician's files and is subject to retrospective review.

Prenatal and postpartum care visits billed in an inpatient hospital (POS 3) are denied as part of another procedure when billed within the three days before delivery or the six weeks after delivery. The inpatient intrapartum and postpartum care are included in the fee for the delivery or Cesarean section and should not be billed separately.

One postpartum care procedure code may be reimbursed per pregnancy. The claim for the postpartum visit may be submitted with either procedure code 59430 or with a delivery procedure code (59410, 59515, 59614, or 59622) that includes postpartum care. The reimbursement amount for the submitted procedure code covers all postpartum care per pregnancy regardless of the number of postpartum visits provided.

Procedure code 59430 may be reimbursed once per pregnancy following a delivery if the delivery procedure code does not include postpartum care. Since delivery procedure codes 59410, 59515, 59614, and 59622 include postpartum care, procedure code 59430 will be denied if procedure codes 59410, 59515, 59614, or 59622 were submitted by any provider for the same pregnancy.

Any other E/M office visit will not be reimbursed when billed with the same date of service, by the same provider, as any antenatal or postpartum office visit. Modifier 25 may be used to identify a significant, separately identifiable E/M service performed by the same physician on the same date of service as the procedure or other service. Documentation that supports the provision of a significant, separately-identifiable E/M service must be maintained in the client's medical record and made available to Texas Medicaid upon request.

Delivering physicians who perform regional anesthesia or nerve block do not receive additional reimbursement because these charges are included in the reimbursement for the delivery except as outlined under subsection 9.2.6.3, "Anesthesia for Labor and Delivery" in this handbook. Medicaid may reimburse only one delivery or Cesarean section procedure code per client in a seven-month period; reimbursement includes multiple births.

Procedure code 99140 is not considered for reimbursement when submitted with diagnosis code 650 for a normal delivery or with diagnosis code 66970 or 66971 for a Cesarean delivery when one of these diagnosis codes is documented on the claim as the referenced diagnosis. The referenced diagnosis must indicate the complicating condition. An emergency is defined as a situation when delay in treatment of the client poses a significant health threat to a client’s life, bodily organ, or body part.

Hospital admissions resulting from conditions or comorbidities complicating labor should be billed using the appropriate E/M procedure codes. These codes are not subject to the three-day pre-care period but are not payable on the date of delivery or the following six-week post-care period.

Refer to: Subsection 9.2.6, “Anesthesia,” in this handbook for complete information about anesthesia for obstetrical procedures.

9.2.46.1 Amniocentesis, Cordocentesis, and Ultrasonic Guidance

Procedure code 59001 is restricted to diagnosis codes 65700, 65701, and 65703.

Cordocentesis and ultrasonic guidance procedure code 76941 are benefits of Texas Medicaid when billed with one of the following diagnosis codes:

Diagnosis Codes									
64190	64191	64193	65530	65531	65533	65610	65613	65620	65623
67800	67801	67803							

The Medical Director reviews cordocentesis requests on a case-by-case basis for diagnosis codes other than those listed above.

Cordocentesis or umbilical blood sampling is included in the global fee for procedure code 36460.

9.2.46.2 Deliveries

Texas Medicaid restricts any cesarean section, labor induction, or any delivery following labor induction to one of the following criteria:

- Gestational age of the fetus should be determined to be at least 39 weeks.
- When the delivery occurs prior to 39 weeks, maternal and/or fetal conditions must dictate medical necessity for the delivery.

Cesarean sections, labor inductions, or any deliveries following labor induction that occur prior to 39 weeks of gestation and are not considered medically necessary will be denied.

Claims that are submitted for obstetric delivery procedure codes 59409, 59410, 59514, 59515, 59612, 59614, 59620, or 59622 require one of the following modifiers:

Modifier	To Indicate
U1	Medically necessary delivery prior to 39 weeks of gestation
U2	Delivery at 39 weeks of gestation or later
U3	Non-medically necessary delivery prior to 39 weeks of gestation

Note: Claims for deliveries that are submitted without one of the required modifiers will be denied.

Records are subject to retrospective review. Payments made for a Cesarean section, labor induction, or any delivery following labor induction that fail to meet these criteria (as determined by review of medical documentation), will be recouped. Recoupment will apply to the obstetric delivery procedure code and the associated hospital claim.

9.2.46.3 External Cephalic Version

External cephalic version is the external manipulation of a fetus to alter its position in the uterus to make it more favorable for delivery.

Procedure code 59412 is payable in the inpatient hospital (POS 3) or outpatient hospital (POS 5) setting when billed as an independent procedure performed by a physician at least one day before delivery.

Emergency room and subsequent hospital care visit procedure codes billed the same day as external cephalic version by the same provider are denied.

9.2.46.4 Fetal Fibronectin

Procedure code 82731 is a benefit of Texas Medicaid and may be considered for reimbursement when the fetal gestational age is 23 weeks through 34 weeks on the date the service was provided.

Fetal fibronectin is limited to threatened preterm labor using diagnosis code 64400 or 64403.

9.2.46.5 Fetal Intrauterine Transfusion (FIUT)

FIUT (procedure code 36460) is limited to the following diagnosis codes:

Diagnosis Codes									
64190	64191	64193	65530	65531	65533	65610	65613	65620	65623
67800	67801	67803							

FIUT is reimbursed as a global fee and, therefore, includes all other services provided by the same physician, including umbilical blood sampling or cordocentesis.

In addition to the physician performing the FIUT, another physician may assist with echography control. Procedure code 76941 may be reimbursed separately when billed by a different physician.

9.2.46.6 Doppler Studies

Umbilical artery Doppler (procedure code 76820) is limited to the following indications, as supported by the American College of Obstetricians and Gynecologists (ACOG):

- Suspected intrauterine growth restriction (IUGR)
- Post-term gestation
- Diabetes mellitus
- Systemic lupus erythematosus or antiphospholipid antibody syndrome

Middle cerebral artery Doppler (procedure code 76821) is indicated, but not limited to, fetuses who are alloimmunized.

9.2.46.7 Fetal Echocardiography

Fetal echocardiography (procedure codes 76825, 76826, 76827, and 76828) may be reimbursed for the following risk factors and syndromes:

- Fetal Risk Factors
 - Extracardiac anomalies (including chromosomal and anatomic)
 - Fetal cardiac dysrhythmia (including irregular rhythm, tachycardia, and bradycardia)
 - Nonimmune hydrops fetalis
 - Suspected cardiac anomaly on ultrasound
 - Abnormal fetal situs
- Maternal Risk Factors

- Congenital heart disease
- Cardiac teratogen exposure (including lithium, alcohol, phenytoin, trimethadione, and isotretinoin)
- Maternal metabolic disorders (including diabetes mellitus and phenylketonuria)
- Familial Risk Factors
 - Congenital heart disease (including previous sibling and paternal)
- Syndromes
 - Marfan's
 - Noonan's
 - Tuberous sclerosis

9.2.46.8 Fetal Surgery

Fetal surgery procedures require prior authorization. Prior authorization requests must be submitted with a completed Special Medicaid Prior Authorization (SMPA) Request Form to the SMPA department.

9.2.46.8.1 Fetal Surgery Repairs

Procedure codes S2401, S2402, S2403, S2405, and S2409 may be prior authorized only when the hospital is a member of the North American Fetal Therapy Network (NAFTNet). The pediatric surgeon who performs these surgeries must submit documentation which includes the following:

- A clear description of the fetal malformation. The malformation must interfere with the in utero organ development and fetal survival and have potential fatal consequences before or after birth.
- Evidence that in utero correction of the fetal congenital malformation will result in a clinical outcome that is better than what would be seen in expectant management.

9.2.46.8.2 Fetoscopic Laser Therapy

Procedure code S2411 may be considered for prior authorization when the submitted documentation indicates all of the following:

- Fetal gestational age is less than 26 weeks.
- Evidence of polyhydramnios in the recipient fetus.
- Donor fetus is oligohydramniotic.
- Evidence of abnormal blood flow documented by Doppler studies in one or both fetuses.

9.2.46.8.3 Umbilical Cord Occlusion

Procedure code 59072 may be considered for prior authorization when the submitted documentation indicates all of the following:

- A diagnosis of monoamniotic-monochorionic twins.
- There is spontaneous fetal death of one of the twins with the presence of hydrops.
- The ratio of acardiac:pump twin weight is greater than 50 percent.
- The abdominal circumference of the twin with reversed arterial perfusion is greater than or equal to the abdominal circumference of the pump twin.

9.2.46.9 Obstetric Ultrasound

Ultrasound of the pregnant uterus is a benefit of Texas Medicaid when medically indicated. Ultrasound may be indicated for suspected genetic defects, high risk pregnancy, and fetal growth retardation.

The following procedure codes for ultrasound of the pregnant uterus are limited to a total of three per pregnancy:

Procedure Codes									
76801	76802	76805	76810	76811	76812	76813	76814	76815	76816
76817									

The limit of three obstetric ultrasounds per pregnancy does not apply to obstetric ultrasound procedures that are rendered in the emergency room, outpatient observation, or inpatient hospital setting. Obstetric ultrasounds provided in the emergency department must be submitted with modifier U6 when submitted on the professional claim form in order to be considered for payment. Obstetric ultrasounds provided in the emergency department or during a hospital observation stay must be submitted with the appropriate corresponding emergency services or hospital observation revenue code in order to be considered for payment.

The initial three claims paid for obstetric ultrasounds do not require prior authorization. Any obstetric ultrasound claims submitted with or without prior authorization for the initial three will count toward the three-per-pregnancy limit. If it is medically necessary to perform more than three obstetrical ultrasounds on a client during one pregnancy, the provider must request prior authorization with documentation of medical necessity using the [Obstetric Ultrasound Prior Authorization Request](#) on the TMHP website at www.tmhp.com.

Documentation is required to substantiate the need to perform a transvaginal obstetric ultrasound in addition to a transabdominal examination on the same date of service. Texas Medicaid follows the ACOG indications for sonography. First trimester ultrasounds may be medically necessary for, but are not limited to, the following reasons:

- To confirm the presence of an intrauterine pregnancy
- To evaluate a suspected ectopic pregnancy
- To evaluate vaginal bleeding
- To evaluate pelvic pain
- To estimate gestational age
- To diagnose or evaluate multiple gestation
- To confirm cardiac activity
- As an adjunct to chorionic villus sampling or localization and removal of an intrauterine device
- To assess certain fetal anomalies, such as anencephaly, in clients at high risk
- To evaluate maternal pelvic or adnexal masses or uterine abnormalities
- To screen for fetal aneuploidy
- To evaluate a suspected hydatidiform mole

Second and third trimester ultrasounds may be medically necessary for the following reasons:

- To estimate fetal age
- To evaluate fetal growth
- To evaluate vaginal bleeding
- To evaluate cervical insufficiency
- To evaluate abdominal and pelvic pain
- To determine fetal presentation

- As an adjunct to amniocentesis or other procedure
- To evaluate suspected multiple gestation
- To evaluate a significant discrepancy between uterine size and clinical dates
- To evaluate a pelvic mass
- To evaluate a suspected hydatidiform mole
- As an adjunct to cervical cerclage placement
- To evaluate a suspected ectopic pregnancy
- To evaluate suspected fetal death
- To evaluate suspected uterine abnormality
- To evaluate fetal well-being
- To evaluate suspected amniotic fluid abnormalities
- To evaluate suspected placental abruption
- As an adjunct to external cephalic version
- To evaluate premature rupture of membranes or premature labor
- To evaluate abnormal biochemical markers
- As a follow-up evaluation of a fetal anomaly
- As a follow-up evaluation of placental location for suspected placenta previa
- To evaluate clients who have a history of previous congenital anomaly
- To evaluate fetal condition in late registrants for prenatal care
- To assess findings that may increase the risk of aneuploidy
- To screen for fetal anomalies

The Obstetric Ultrasound Prior Authorization Request Form must be completed, signed, dated, and maintained in the client's medical record by the provider ordering the test, regardless of the method of request for authorization. A physician, nurse practitioner (NP), clinical nurse specialist (CNS), certified nurse midwife (CNM), or physician assistant (PA) may sign the Obstetric Ultrasound Prior Authorization Request Form. Residents may order obstetric ultrasounds; however, the attending physician must sign the authorization form and include the group or supervising provider identifier on the form.

The provider's signature must be current, unaltered, original, and handwritten. A computerized or stamped signature or date will not be accepted.

The form must include information related to medical necessity of the test including all of the following:

- Procedure code requested (CPT code) and quantity requested
- The trimesters during which the requested ultrasounds will be performed
- The date range during which the procedures will be performed
- Client's estimated date of confinement (EDC) at the time the request is submitted
- Diagnosis

Additional documentation to support medical necessity may include any of the following:

- Treatment history
- Treatment plan

- Medications
- Previous imaging results

When requesting retroactive authorization, providers must submit the request no later than 14 calendar days beginning the day after the study is completed.

Providers can submit requests for prior authorization or retroactive authorization by fax, online, or by mailing to:

Texas Medicaid & Healthcare Partnership
Inpatient/Outpatient Prior Authorization
12357-B Riata Trace Parkway Ste. 100
Austin, TX 78727

Reimbursement for obstetric ultrasounds may be considered on appeal when submitted with documentation that indicates any one of the following:

- Ultrasound was performed for a different pregnancy.
- The provider was unable to obtain the previous ultrasound records from a different provider.
- The provider was new to treating the client and was not aware the client had already had three obstetric ultrasounds.

Only one appeal will be considered per client for the same provider. Providers must obtain prior authorization for any additional obstetric ultrasounds performed after the appealed service. Claims for add-on codes for multiple fetuses should be billed with modifier 76 if there is more than one additional fetus. Claims will be considered on appeal with documentation indicating the number of fetuses.

The following procedure codes must be billed together:

- Procedure code 76802 must be billed in conjunction with primary procedure code 76801.
- Procedure code 76810 must be billed in conjunction with primary procedure code 76805.
- Procedure code 76812 must be billed in conjunction with primary procedure code 76811.
- Procedure code 76814 must be billed in conjunction with primary procedure code 76813.

Note: Add-on procedure codes (76802, 76810, 76812, and 76814) do not count toward the three-per-pregnancy limitation.

9.2.46.10 Prenatal Surveillance

Prenatal surveillance includes fetal contraction stress test (procedure code 59020), fetal nonstress test (procedure code 59025), and fetal biophysical profile with or without nonstress testing (procedure code 76818 or 76819). According to guidelines established by ACOG, some of the conditions under which testing may be appropriate include, but are not limited to, the following maternal and pregnancy related conditions:

- Maternal Conditions
 - Antiphospholipid syndrome
 - Hyperthyroidism (poorly controlled)
 - Hemoglobinopathies (hemoglobin SS, SC, or S-thalassemia)
 - Cyanotic heart disease
 - Systemic lupus erythematosus
 - Chronic renal disease
 - Type I diabetes mellitus

- Hypertensive disorders
- Pregnancy Related Conditions
 - Pregnancy-induced hypertension
 - Decreased fetal movement
 - Oligohydramnios
 - Polyhydramnios
 - Intrauterine growth restriction
 - Post-term pregnancy
 - Isoimmunization (moderate to severe)
 - Previous fetal demise (unexplained or recurrent risk)
 - Multiple gestations (with significant growth discrepancy)

Procedure code 59025 is payable in the office setting only and procedure code 59020 is payable in the inpatient and outpatient hospital settings only.

Procedure codes 59020 and 59025, when billed with revenue code 729 for outpatient facilities, may be reimbursed on the same day by a different provider without appeal. However, procedure codes 59020 and 59025, billed with revenue code 729 more than once per day by the same provider, will be denied. The provider may appeal with documentation supporting the performance of the test more than once on the same day by the same provider.

Fetal biophysical profile (procedure codes 76818 and 76819) may be reimbursed separately when billed with one of the following procedure codes on the same day:

Procedure Codes							
76805	76810	76811	76812	76813	76814	76815	76816

To prevent repeat unintended or unwanted pregnancies, physicians are urged to include family planning services or referrals in the maternity care of the client. Genetic diagnosis and counseling is also available through Texas Medicaid for clients suspected of having a genetic disorder for informed reproductive decision making.

Refer to: Section 2, “Medicaid Title XIX family planning services” in the *Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks)*.

9.2.46.11 Tobacco Use Cessation Counseling

Tobacco use cessation counseling (procedure codes 99406 and 99407) is a benefit of Texas Medicaid for pregnant clients who are 10 through 55 years of age. Both procedure codes are restricted to diagnosis codes 64900, 64901, 64902, 64903, and 64904.

Only one procedure code, either 99406 or 99407, will be reimbursed per day, any provider. Procedure codes 99406 and 99407 will be limited to a combined total of 8 visits per rolling year, any provider.

9.2.46.12 Transabdominal Amnioinfusion

Procedure codes 59070, 59074, and 59076 are restricted to diagnosis codes 65610, 65613, 65620, and 65623.

9.2.46.13 Documentation Requirements for Diagnostic Studies

Texas Medicaid requires providers to follow the documentation requirements as set forth in the Diagnostic Ultrasound section of the *Current Procedural Terminology (CPT)* manual for the diagnostic studies of the fetus, including when ultrasound is used to guide a procedure.

Documentation requirements set forth in the CPT manual include, but are not limited to, the following:

- Permanently recorded images with measurements, when measurements are clinically indicated.
- Final written report included in the client's medical record (includes written interpretation).
- Report must include description of elements that comprised a "complete" or "limited" exam, and the reasons an element could not be visualized.
- Permanently recorded images are also required for ultrasound guidance procedures of the site to be localized. In addition, description of the localization process, either separately or within the report of the procedure, when the guidance is used.

Permanently recorded images must be made available on request by HHSC.

Medical record documentation must include assessment findings that substantiate the medical necessity for each diagnostic test.

9.2.46.14 Required Screening of Pregnant Women for Syphilis, HIV, and Hepatitis B

Providers are required to perform serologic testing during pregnancy for syphilis, HIV, and hepatitis B (*Health and Safety Code* §81.090).

9.2.46.14.1 HIV Testing

An HIV test must be performed at the first prenatal care visit and during the third trimester of pregnancy.

If there is no record of a third-trimester test when a woman arrives at labor and delivery, a test must be immediately performed. The laboratory must provide the results of the test to the provider within six hours of the submission of the sample. If there is no record of a third-trimester test and no test was performed during labor and delivery, the infant must be tested within two hours of birth, and those test results must be provided to the provider within six hours of the submission of the sample.

If a pregnant woman refuses HIV testing, the attending health care provider must make a note in the client's record of the following:

- The HIV test was offered.
- The patient declined testing.
- A referral to an anonymous testing site was made.
- The patient was provided with appropriate literature.

9.2.46.14.2 Hepatitis B and Syphilis Screening

Providers and hospitals are required to screen all pregnant women for hepatitis B surface antigen (HBsAg) and syphilis at their first prenatal visit and at delivery. Pregnant women who test positive for HBsAg must be reported to DSHS (25 TAC §97.3) and appropriate prophylaxis must be administered to the infant born to that pregnant woman per DSHS and the ACIP. The Perinatal Hepatitis B Prevention Program manual, reporting forms, and information brochures are available at www.texas-perinatalhepb.org. Providers may also contact the Perinatal Hepatitis B Prevention Program Coordinator at 1-512-776-7447.

Pregnant women who are identified as being chronically infected with HBsAg should receive appropriate follow-up services.

9.2.47 Occupational Therapy (OT) Services

Occupational therapy (OT) is a payable benefit to physicians.

Refer to: Section 4, “Therapists, Independent Practitioners, and Physicians” in the *Nursing and Therapy Services Handbook (Vol. 2, Provider Handbooks)* for information about occupational therapy services provided by a physician.

9.2.48 Ophthalmology

When an ophthalmologist sees a client for a minor condition that does not require a complete eye exam, such as conjunctivitis, providers are to use the appropriate office E/M code.

Providers are to use the eye exam procedure codes with a diagnosis of ophthalmological disease or injury.

Refer to: Subsection 4.3.5, “Vision Testing,” in the *Vision and Hearing Services Handbook (Vol. 2, Provider Handbooks)*.

9.2.48.1 Corneal Transplants

Corneal transplants are benefits of Texas Medicaid. Corneal transplants are subject to global surgery fee guidelines. Procedure codes 65710, 65730, 65750, 65755, 65756, and 65757 are used for this surgery.

Bioengineered cornea transplants remain investigational at this time and are not considered for reimbursement under Texas Medicaid.

Procurement of the cornea is not reimbursed separately.

9.2.48.2 Eye Surgery by Laser

Eye surgery by laser is a benefit of Texas Medicaid when medically necessary and meets the conditions and limitations stated in this section.

Authorization is not required for eye surgery by laser.

All procedure codes in this section are subject to multiple surgery guidelines. For bilateral procedures, the following modifiers must be added to the claim to indicate that the procedures were performed on the right and left eyes:

- Modifier RT to indicate the right eye
- Modifier LT to indicate the left eye

All procedures may be reimbursed only to physicians and are limited to reimbursement once every 90 days for the same eye with the exception of infants from birth through 23 months of age. Procedures performed on infants from birth through 23 months of age are not subject to any frequency restrictions.

9.2.48.2.1 Other Eye Surgery Procedures

Anterior Segment of the Eye–The Cornea

Laser surgery to the cornea by laser-assisted in situ keratomileusis (LASIK) or photorefractive keratectomy (PRK) for the purpose of correcting nearsightedness (myopia), farsightedness (hyperopia), or astigmatism is not a benefit of Texas Medicaid.

Reimbursement for laser surgery to the cornea, procedure codes 65450, 65855, and 65860 is limited to once every 90 days for the same eye.

Anterior Segment of the Eye–The Iris, Ciliary Body

Laser surgery to the anterior segment of the eye–the iris, ciliary body may be reimbursed only when billed with one of the following procedure codes:

Procedure Codes						
66600	66605	66710	66711	66761	66762	66770

Reimbursement for procedure codes 66600, 66605, 66710, 66711, 66761, 66762, and 66770 is limited to once every 90 days for the same eye.

Claims for iridectomy (66600, 66605, 66625, 66630, or 66635) or iridotomy (66500 or 66505) are not reimbursed when billed for the same date of service as a trabeculectomy (66170 or 66172). These claims are considered for review when filed on appeal with documentation of medical necessity. The iridectomy is considered part of a trabeculectomy. An iridectomy billed with any other eye surgery on the same day suspends for review.

An iridectomy is also considered part of certain types of cataract extractions. An iridectomy (66600 or 66605) is not reimbursed when billed for the same date of service as the cataract surgeries listed in the following table. The iridectomy is considered part of the cataract surgery. These claims are considered for review when filed on appeal with documentation of medical necessity.

Procedure Codes									
65920	66840	66850	66852	66920	66930	66940	66983	66984	66985
66986									

Posterior Segment of the Eye–Retina or Choroid

Laser surgery to the retina or choroid may be reimbursed only when billed with one of the following procedure codes:

Procedure Codes									
67105	67107	67108	67110	67112	67113	67145	67210	67220	67221
67225	67228	67229	G0186						

Procedure code 67229 is restricted to clients who are birth through 1 year of age.

When billed for the same date of service, same eye, any provider, procedure code 67031 will be denied as part of any of the following procedure codes:

Procedure Codes									
67036	67108	67110	67120	67121	67141	67142	67208	67210	67218
67227	67228								

When billed for the same date of service, same eye, any provider, only one of the following procedure codes may be reimbursed: 67220, 67221, 67225, or G0186.

When billed for the same date of service, same eye, by any provider, procedure codes 67025, 67028, 67031, 67036, 67039, 67040, and 67105 will be denied as part of 67108.

Posterior Segment of the Eye, Vitreous–Vitreotomy

Laser surgery to the vitreous may be reimbursed only when billed with one of the following procedure codes: 67031, 67039, 67040, and 67043.

Reimbursement for procedure codes 67031, 67039, 67040, and 67043 is limited to once every 90 days for the same eye.

When billed for the same date of service, same eye, any provider procedure codes 67500 and 69990 are denied as part of 66821.

Procedure code 66821 is denied as part of 66830, 67031, and 67228.

Procedure codes 66820, 66984, 66985, and 67036 will pay according to multiple surgery guidelines when billed with procedure code 66821.

When billed for the same date of service, same eye, different provider procedure codes 66821, 67005, 67010, and 69990 will be denied as part of 67031.

When billed for the same date of service, same eye, any provider procedure code 67031 will be denied as part of any of the following procedure codes: 67036, 67108, 67110, 67120, 67121, 67208, 67218, 67227, and 67228.

9.2.48.3 Eye Surgery by Incision

The following restrictions apply to vitrectomy and cataract surgeries:

- Procedure codes 66500, 66505, 66605, 66625, 66630, and 66635 are denied as part of another procedure when billed with the following cataract surgeries: 65920, 66840, 66850, 66852, 66920, 66930, 66940, 66983, 66984, 66985, and 66986. Claims may be appealed with additional documentation to demonstrate the medical necessity.
- Procedure code 66020 is denied as part of another procedure when billed with any related eye surgery procedure code.
- Procedure code 67036 may be reimbursed when billed alone.
- Procedure code 67036 is denied as part of another procedure when billed with procedure codes 67039, 67040, 67041, 67042, 67043, or 67108.
- Procedure codes 67039 and 67040 are combined and reimbursed as procedure code 67108 when billed by the same provider for the same date of service.
- For clients who are 8 years of age and younger, the following cataract extraction and vitrectomy procedure codes, performed on the same eye, will be considered for payment per multiple surgery guidelines:

Procedure Codes									
66840	66850	66852	66920	66930	66940	66983	66984	67005	67010
67015	67025	67027	67028	67030	67031	67036	67039	67040	67041
67042	67043								

- For clients who are nine years of age and older, the following procedure codes will be paid when performed on the same eye as a cataract extraction:

Procedure Codes									
67005	67010	67015	67025	67027	67028	67030	67031	67036	67039
67040	67041	67042	67043						

- For clients who are nine years of age and older, the following procedure codes will be denied as part of the codes listed above, when performed on the same eye:

Procedure Codes							
66840	66850	66852	66920	66930	66940	66983	66984

Reimbursement for procedure codes 67041, 67042, and 67043 is limited to once every 90 days for the same eye.

9.2.48.4 Intraocular Lens (IOL)

An IOL (V2630, V2631, and V2632) may be reimbursed only to physicians in the office setting (POS 1). Providers must submit a copy of the manufacturer’s invoice for procedure code V2631 to TMHP with their claim. Reimbursement for the lens is limited to the actual acquisition cost for the lens (taking into account any discount) plus a handling fee not to exceed five percent of the acquisition cost.

Medicaid does not reimburse physicians who supply IOLs to ASCs/HASCs.

Reimbursement for the surgical procedure necessary to implant an IOL remains unchanged.

9.2.48.5 Intravitreal Drug Delivery System

Procedure codes 67027 and 67121 pertain to the procurement, implantation, and removal of an intra-vitreous drug delivery system (e.g., a ganciclovir implant). They are set to deny when billed concurrently.

9.2.48.6 Other Eye Surgery Limitations

The following procedure codes require modifier LT or RT to identify the eye for which the surgery is being performed:

Procedure Codes									
65205	67311	67312	67314	67316	67318	67320	67331	67332	67334
67345	67414	67800	67801	67805	67808	V2790			

In the following table, the procedure codes in Column A may be reimbursed only when at least one corresponding procedure code from Column B has been paid to the same provider for the same date of service:

Column A Procedure Codes	Column B Procedure Codes
66990	65820, 65875, 65920, 66985, 66986, 67036, 67039, 67040, 67041, 67042, 67043, or 67112
67320, 67331, 67332, 67334	67311, 67312, 67314, 67316, or 67318
67335, 67340	67311, 67312, 67314, 67316, or 67318
V2790	65780

9.2.49 Organ/Tissue Transplants

Organ/tissue transplants that include bone marrow, peripheral stem cell, heart, intestine, lung, liver, kidney, or pancreas are a benefit of Texas Medicaid.

Solid organ transplants are a benefit of Texas Medicaid when medically necessary based on safety and efficacy, as demonstrated by scientific evidence and by controlled clinical studies, in accordance with the Texas Administrative Code (TAC). Solid organ transplants are limited to clients with a critical medical condition who are expected to have a successful clinical outcome that will result in a return to improved functional independence. Benefits are not available for the following experimental or investigational services:

- Artificial and bioartificial livers
- Xenotransplantation of solid organs
- Thymus transplant

Coverage is limited to one transplant per organ system (or organ systems for combined transplants) per lifetime except for one subsequent transplant because of organ rejection.

Solid organ transplants require prior authorization and may be reimbursed only when performed in a Medicaid-enrolled facility that is a designated children’s hospital with a transplant unit or program, or certified for the procedure by the United Network for Organ Sharing (UNOS).

The facility must be in Texas, unless there are no Texas facilities certified by UNOS or designated as a Children’s Hospital with a transplant unit or program for the requested procedure.

All requests for out-of-state (OOS) services, whether for pre-transplant evaluation, transportation, or post-transplant monitoring, must be sent to the medical director for prior authorization review. Texas Medicaid will consider authorizing OOS services when the following criteria are met:

- The client does not leave Texas to receive care that can be received in Texas.
- An in-state facility approved for the procedure has declined to accept the client and documentation is submitted to explain why the in-state team cannot perform the procedure.
- There is no physician provider or facility with the level of expertise required to perform the necessary procedure available in Texas, or the client has received an initial transplant at the OOS facility and requires additional transplant services due to complications or graft loss.
- There is reasonable assurance that the client meets the clinical criteria required by Texas Medicaid for transplant approval.
- The service is necessary, reasonable, and federally allowable, and the facility and physicians agree to accept Medicaid reimbursement for these services.
- The OOS facility must be certified by UNOS or designated as a Children’s Hospital with a transplant unit or program.

When requesting an OOS prior authorization for a pre-transplant evaluation, the provider must submit a copy of the transplant evaluation performed by a Texas facility to support the need for an OOS solid organ pre-transplant evaluation.

When requesting an OOS prior authorization for transplant of a solid organ, the provider must submit a copy of the transplant evaluation performed by a Texas facility and a copy of the transplant evaluation performed by the OOS facility to support the need for an OOS solid organ transplant.

When requesting an OOS prior authorization for post-transplant monitoring or other post-transplant services, the provider must submit documentation that the client received the initial transplant at the same OOS facility to include complications or graft loss if present, in order to support the need for OOS solid organ post-transplant monitoring or other post-transplant services.

Expenses incurred for the procurement of a living donor’s organ are not a benefit of Texas Medicaid.

Refer to: Subsection 3.2.5, “Organ and Tissue Transplant Services,” in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for more information about the transplant facility approval criteria.

Subsection 3.2.5.2, “Transplant Benefits and Limitations,” in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for more information about organ/tissue transplant program limitations.

9.2.49.1 General Prior Authorization Requirements

Solid organ transplant prior authorization requests must include all of the following:

- A complete history and physical
- A statement of the current medical conditions and status of the transplant recipient
- Documentation of how the client meets the prior authorization criteria specified for the transplant requested
- Documentation of the absence of co-morbidities or contraindications such as the following:
 - Severe pulmonary hypertension
 - End-stage cardiac, renal, hepatic, or other organ dysfunction unrelated to the primary disorder
 - Uncontrolled HIV infection or AIDS defining illness

- Multiple organ compromise secondary to infection, malignancy, or condition with no known cure
- Ongoing or recurrent active infections that are not effectively treated
- Psychiatric instability severe enough to jeopardize incentive for adherence to medical regimen
- Active alcohol or chemical dependency that might interfere with compliance to a medical regimen
- History of compliance with other medical treatments, regimen, and plan of care

Backbench procedures do not require prior authorization but may only be reimbursed when a corresponding transplant procedure has been paid for the same date of service.

Note: Clients who are birth through 20 years of age and who do not meet the criteria for coverage may be considered through the Comprehensive Care Program (CCP).

Additional prior authorization criteria, if applicable, specific to each type of transplant are outlined in the following sections.

If prior authorization is not obtained for a solid organ transplant, services directly related to the transplant within the three-day preoperative and six-week postoperative period are also denied regardless of who provides the services (e.g., laboratory services, status post visits, radiology services). However, coverage for other services needed as a result of complication of the transplant or for services unrelated to the transplant may be considered when medically necessary, reasonable, and federally allowable.

Claims for transplant clients are placed on active review when the transplant was not prior authorized so that the services related to the transplant can be monitored.

9.2.49.2 Heart Transplants

9.2.49.2.1 Prior Authorization for Heart Transplants

A heart transplant to a client for primary heart dysfunction must be documented as the client being unresponsive to more conventional and/or standard therapies to be considered for coverage.

Procedure code 33945 may be considered for prior authorization with medical necessity documentation that indicates a New York Heart Association (NYHA) Class III or IV cardiac disease with one of the following medical conditions:

- Congenital heart disease
- Valvular heart disease
- Viral cardiomyopathy
- Familial and restrictive cardiomyopathy

9.2.49.3 Intestinal Transplants

An intestinal transplant may be considered for clients who are dependent on parental nutrition and have compromised venous access, have had two or more episodes of central line sepsis, or who have begun to manifest progressive parental nutrition associated liver dysfunction. Procedure codes 44135 and 44136 must be prior authorized.

Small bowel transplantation is considered medically necessary in clients with irreversible intestinal failure including, but not limited to:

- Short bowel syndrome
- Pseudo-obstruction
- Microvillus inclusion

- Tumor

The prior authorization request must include documentation of irreversible intestinal failure with failed total parenteral nutrition (TPN) therapy. The client has experienced TPN failure if any one of the following criteria is met:

- Impending or overt liver failure due to TPN-induced liver injury. Clinical indicators include the following:
 - Increased serum bilirubin levels
 - Increased liver enzyme levels
 - Splenomegaly
 - Thrombocytopenia
 - Gastroesophageal varices
 - Coagulopathy
 - Stomal bleeding
 - Hepatic fibrosis
 - Cirrhosis
- Thrombosis of major central venous channels (subclavian, jugular, or femoral veins). Thrombosis of two or more of these vessels is considered a life-threatening complication and TPN failure.
- Frequent central line-related sepsis. Two or more episodes of central-line-induced systemic sepsis per year that require hospitalization are considered TPN failure. A single episode of central-line-related fungemia, septic shock, or acute respiratory distress syndrome is considered TPN failure.
- Frequent episodes of severe dehydration despite TPN and intravenous fluid supplement. Under certain medical conditions, such as secretory diarrhea and nonconstructable gastrointestinal tract, the loss of combined gastrointestinal and pancreatobiliary secretions exceed the maximum intravenous infusion rates that can be tolerated by the cardiopulmonary system.

Diagnoses that indicate intestinal failure include, but are not limited to, the following:

- Small bowel syndrome resulting from inadequate intestinal propulsion due to neuromuscular impairment
- Small bowel syndrome resulting from postsurgical conditions due to resections
- Intestinal cysts
- Mesenteric cysts
- Small bowel or other tumors involving small bowel
- Crohn's disease
- Mesenteric thrombosis
- Volvulus
- Short-gut syndrome in which there is liver function impairment (usually secondary to TPN)

9.2.49.4 Kidney Transplants

9.2.49.4.1 Prior Authorization for Kidney Transplants

Procedure codes 50360 and 50365 must be prior authorized. Medical necessity documentation of one of the following is required:

- Hemodialysis or continuous ambulatory peritoneal dialysis (CAPD).
- Chronic renal failure with anticipated deterioration to end-stage renal disease.
- End-stage renal disease, evidenced by a creatinine clearance below 20 ml/min or development of symptoms of uremia.
- End-stage renal disease that requires dialysis or is expected to require dialysis within the next 12- to 18-month period.

9.2.49.4.2 Cytogam

Procedure code J0850 is reimbursable by Texas Medicaid. Cytogam is indicated for the attenuation of primary cytomegalovirus disease in seronegative kidney transplant recipients who receive a kidney from a seropositive donor. Payment of cytogam is limited to diagnosis code V420, status post kidney transplant. Cytogam is payable only in the office or outpatient setting.

Refer to: Subsection 3.2.5, “Organ and Tissue Transplant Services,” in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for more information about the transplant facility approval criteria.

9.2.49.5 Liver Transplants

9.2.49.5.1 Prior Authorization for Liver Transplants

For a client to be considered for coverage of a liver transplant, the medical records for the client must include documentation showing the client is unresponsive to more conventional and/or standard therapies.

Authorization of procedure codes 47133, 47135, and 47136 requires medical necessity documentation of liver disease in one of the following categories:

- Primary cholestatic liver disease
- Other cirrhosis:
 - Alcoholic
 - Hepatitis C, non-A, non-B, and Hepatitis B
- Fulminant hepatic failure
- Metabolic diseases
- Malignant neoplasms
- Benign neoplasms
- Biliary atresia

9.2.49.6 Lung Transplants

9.2.49.6.1 Prior Authorization for Lung Transplants

A lung transplant to a client must be documented as unresponsive to more conventional and/or standard therapies to be considered for coverage.

Prior authorization of procedure codes 32851, 32852, 32853, 32854, and S2060 may be considered with medical necessity documentation of the following:

- Symptoms at rest directly related to chronic pulmonary disease and resultant severe functional limitation
- End-stage pulmonary diseases in one of these categories:
 - Obstructive lung disease
 - Restrictive lung disease
 - Cystic Fibrosis
 - Pulmonary hypertension

9.2.49.7 Pancreas Transplant

9.2.49.7.1 Prior Authorization for Pancreas Transplant

A pancreas/simultaneous kidney-pancreas transplant must be documented as the client being unresponsive to more conventional and/or standard therapies to be considered for coverage.

For prior authorization of procedure codes 48160 and 48554, medical necessity documentation must be submitted that shows the following:

- Recurrent, acute, and severe metabolic and potentially life-threatening complications requiring medical attentions such as:
 - Hypoglycemia
 - Hyperglycemia
 - Ketoacidosis
 - Failure of exogenous insulin-based management to achieve sufficient glycemic control (HbA1c of greater than 8.0) despite aggressive conventional therapy
 - Insensibility to hypoglycemia; OR
- Satisfactory kidney function (creatinine clearance greater than 40mL/min), except for kidney-pancreas transplants; and
- Type 1 diabetes with secondary diabetic complications that are progressive despite the best medical management; and
- At least two of the following secondary complications:
 - Diabetic neuropathy
 - Retinopathy
 - Gastroparesis
 - Autonomic neuropathy
 - Extremely labile (brittle) insulin-dependent diabetes mellitus

9.2.49.8 Multi-Organ Transplants

Procedure codes 33935, S2053, and S2054 may be considered for prior authorization if medical necessity documentation meets the requirements for each organ.

Procedure code S2065 may be considered for prior authorization if medical necessity documentation indicates the client meets criteria for a pancreas transplant and has end-stage renal disease that requires dialysis or is expected to require dialysis within the next 12 months.

9.2.49.9 Nonsolid Organ Transplants

Nonsolid organ transplants covered by Texas Medicaid include allogeneic and autologous stem cell transplantation, allogeneic and autologous bone marrow transplantation, autologous islet cell transplantation, and hematopoietic progenitor cell (HPC) boost infusion.

9.2.49.9.1 Allogeneic and Autologous Bone Marrow and Stem Cell Transplantation

Stem cell transplantation is a process in which stem cells are obtained from either a client’s or donor’s bone marrow, peripheral blood, or umbilical cord blood for intravenous infusion. The transplant can be used to effect hematopoietic reconstitution following severely myelotoxic doses of chemotherapy and/or radiotherapy used to treat various malignancies, and also can be used to restore function in clients having an inherited or acquired deficiency or defect.

Benefits are not available for any experimental or investigational services, supplies, or procedures.

Coverage of bone marrow and stem cell transplantation is limited to the following procedure codes: 38206, 38230, 38232, 38240, 38241, 38242, and S2142.

Allogeneic stem cell transplantation may be authorized for the following diagnosis codes:

Diagnosis Codes

20295	20296	20297	20298	20300	20401	20501	20601	20701	20801
See ICD-9-CM: Neoplasm by site, malignant									

9.2.49.9.2 Autologous Islet Cell Transplantation

Autologous islet cell transplantation associated with the complete or partial removal of the pancreas (procedure code 48160) is a benefit of Texas Medicaid only for clients with a diagnosis of chronic pancreatitis (diagnosis code 5771).

Allogeneic islet cell transplantation is not a benefit.

9.2.49.9.3 HPC Boost Infusion

Prior authorization is required for HPC boost infusion procedure code 38243. The prior authorization request must include documentation of a prior stem cell transplant.

Requests for more than two boost procedures per lifetime requires medical necessity review and approval by the medical director.

9.2.49.9.4 Prior Authorization for Nonsolid Organ Transplants

All nonsolid organ transplants require mandatory prior authorization and must be performed in a Texas facility that is a designated children’s hospital or a facility in compliance with the criteria set forth by the Organ Procurement and Transportation Network (OPTN), the United Network for Organ Sharing (UNOS), or the National Marrow Donor Program (NMDP). Prior authorization is effective for the date span specified on the prior authorization approval letter. If the transplant has not been performed by the end of the authorization period, the physician must apply for an extension.

Documentation supplied with the prior authorization request must include the following:

- A complete history and physical.
- A statement of the client's current medical condition and the expected long-term prognosis for the client from the proposed procedure.

Each subsequent transplant must be prior authorized separately.

Peripheral or umbilical cord blood stem cell transplantation may be authorized in lieu of bone marrow transplantation (BMT), but will not be approved when performed simultaneously.

If a stem cell transplant has been prior authorized for a client who is 21 years of age or older, a maximum of 30 days of inpatient hospital services during a Title XIX spell of illness may be covered beginning with the actual first day of the transplant. This coverage is in addition to covered inpatient hospital days provided before the actual first day of the transplant. This 30-day period is considered a separate inpatient hospital admission for reimbursement purposes, but is included under one hospital stay.

Bone marrow harvesting (38230) or peripheral stem cell harvesting (38206) for autologous bone marrow or stem cell transplants are a benefit of Texas Medicaid and require prior authorization.

Autologous harvesting of stem cells (single or multiple sessions) may be reimbursed to the facility when prior authorized by HHSC or its designee and performed in the outpatient setting (POS 5). Harvesting of stem cells performed in the inpatient setting (POS 3) is included in the DRG and will not be reimbursed separately.

Physician services for the storage of stem cells are not a benefit of Texas Medicaid.

Donor expenses are included in the global fee for the transplant recipient and are not reimbursed separately. Therefore, allogeneic bone marrow or stem cell harvesting procedures are not a benefit of Texas Medicaid.

Stem cell transplants for other diagnoses may be considered on a case by case basis. Documentation for prior authorization must be submitted to determine whether the transplant is medically necessary and appropriate.

9.2.49.10 Organ Procurement

The appropriate DRG reimbursement coverage to the approved institution for a prior authorized solid organ transplant procedure includes procurement of the organ and services associated with the organ procurement as specified by HHSC or its designee. Documentation of organ procurement must be maintained in the hospital medical records.

9.2.50 Orthognathic Surgery

Orthognathic surgery is a benefit of Texas Medicaid only when it is necessary for medical reasons, or when it is necessary as part of an approved plan of care in the Texas Medicaid Dental Program. Orthognathic surgery is administered and may be reimbursed as part of the medical/surgical benefit of Texas Medicaid and not as part of the Texas Medicaid Dental Program.

Treatment of malocclusion is a benefit of the Texas Medicaid Dental Program. Orthognathic surgery is a benefit when it is necessary as part of the approved dental benefit.

Maxillary and/or mandibular facial skeletal deformities are associated with clearly abnormal masticatory malocclusion.

Orthognathic surgery may be considered medically necessary for the following client conditions:

- Producing signs or symptoms of masticatory dysfunction
- Facial skeletal discrepancies associated with documented sleep apnea, airway defects, and soft tissue discrepancies

- Facial skeletal discrepancies associated with documented speech impairments
- Structural abnormalities of the jaws secondary to infection, trauma, neoplasia, or congenital anomalies

Orthognathic surgery may be considered for reimbursement when required for the client to access a dental service. Orthognathic surgery that is done primarily to improve appearance and not for reasons of medical necessity is considered cosmetic and is not a benefit of Texas Medicaid.

9.2.50.1 Prior Authorization for Orthognathic Surgery

The following orthognathic medical surgical services may be considered for reimbursement to oral and maxillofacial surgeons with prior authorization. A narrative explaining medical necessity must be provided with the authorization request.

Procedure Codes									
21010	21031	21032	21050	21060	21073	21100	21110	21120	21121
21122	21123	21125	21127	21137	21138	21139	21145	21146	21147
21150	21151	21154	21155	21159	21160	21172	21175	21179	21180
21181	21182	21183	21184	21188	21193	21194	21195	21196	21198
21199	21206	21208	21209	21210	21215	21230	21235	21240	21242
21243	21244	21245	21246	21247	21255	21256	21260	21261	21263
21267	21268	21270	21275	21280	21282	21295	21296	21299	29800
29804	40840	40842	40843	40844	40845				

9.2.51 Osteopathic Manipulative Treatment (OMT)

OMT, when performed by a physician (MD or DO), is a benefit of Texas Medicaid for the acute phase of the acute musculoskeletal injury or the acute phase of an acute exacerbation of a chronic musculoskeletal injury with a neurological component.

OMT is covered when it is performed with the expectation of restoring the patient’s level of function, which has been lost or reduced by injury or illness. Manipulations should be provided in accordance with an ongoing, written treatment plan that supports medical necessity. A model of documentation that supports medical necessity for the treatment plan includes the following:

- Specific modalities/procedures to be used in treatment
- Diagnosis
- Region treated
- Degree of severity
- Impairment characteristics
- Physical examination findings (X-ray or other pertinent findings)
- Specific statements of long- and short-term goals
- Reasonable estimate of when the goals will be reached (estimated duration of treatment)
- Frequency of treatment (number of times per week)
- Equipment and techniques used

The treatment plan must be updated as the client’s condition changes. Treatment plans must be maintained in the medical records and are subject to retrospective review.

Reimbursement is contingent on correct documentation of the condition. The acute modifier AT must be submitted with the claim for payment to be made. Paper claims submitted without modifier AT will be denied; electronic claims will be rejected. The AT modifier is described as representing treatment provided for an acute condition or an exacerbation of a chronic condition that persists less than 180 days from the start date of therapy. If the condition persists for more than 180 days from the start of therapy, the condition is considered chronic, and treatment is no longer considered acute. Providers may file an appeal for claims denied as being beyond the 180 days of therapy with supporting documentation that the client’s condition has not become chronic and the client has not reached the point of plateauing. Plateauing is defined as the point at which maximal improvement has been documented and further improvement ceases.

The following procedure codes are payable when billing for OMT to the head, cervical, thoracic, lumbar, sacral, pelvic, lower extremities, upper extremities, rib cage, abdominal, and visceral regions: 98925, 98926, 98927, 98928, and 98929.

OMT will be denied when billed on the same date of service by the same provider as any of the following procedure codes:

Procedure Codes									
00640	51701	51702	51703	62310	62311	62318	62319	64400	64402
64405	64408	64410	64412	64413	64415	64416	64417	64418	64420
64421	64425	64430	64435	64445	64446	64447	64448	64449	64450
64470	64472	64475	64476	64479	64480	64483	64484	64505	64508
64510	64517	64520	64530	96360	96365	96372	96374	96375	99201
99202	99203	99204	99205	99211	99212	99213	99214	99215	99217
99218	99219	99220	99221	99222	99223	99231	99232	99233	99234
99235	99236	99238	99239	99241	99242	99243	99244	99245	99251
99252	99253	99254	99255	99281	99282	99283	99284	99285	99291
99304	99305	99306	99307	99308	99309	99310	99315	99316	99318
99324	99325	99326	99327	99328	99334	99335	99336	99337	99341
99342	99343	99344	99345	99347	99348	99349	99350	99354	99356
99460	99461	99462	99463	99464	99465	99468	99469	99471	99472
99478	99479	99480							

When multiples of procedure codes 98925, 98926, 98927, 98928, and 98929 are billed on the same day by the same provider, the most inclusive code is paid and the others are denied.

An E/M or initial or subsequent care visit or consultation may be paid in addition to OMT billed on the same day if the client’s condition requires a visit for a significant and separately identifiable service above and beyond the usual pre- and post-care associated with the OMT procedure, even if the visit and OMT are related to the same symptom or condition. Modifier 25 must be submitted with the E/M procedure code to identify a separate and distinct service rendered on the same day as OMT.

Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client’s medical record and made available to Texas Medicaid upon request.

Procedure code 97140 will be denied as part of another service if billed on the same date of service as procedure codes 98925, 98926, 98927, 98928, or 98929.

9.2.52 Pain Management

Pain management is a benefit of Texas Medicaid.

Procedure codes 62350, 62351, 62355, 62360, 62361, 62362, and 62365 billed on the same day as another surgical procedure performed by the same physician are paid according to multiple surgery guidelines.

Procedure codes 62350, 62351, 62355, 62360, 62361, 62362, and 62365 billed on the same day as an anesthesia procedure performed by the same physician are denied as included in the total anesthesia time.

Reimbursement to the physician for the surgical procedure is based on the assigned RVUs or maximum fee. Outpatient facilities are reimbursed at their reimbursement rate. Inpatient facilities are reimbursed under the assigned diagnosis-related group (DRG). No separate payment for the intrathecal pump is made.

Use the following procedure codes when billing for the implantation/revision/replacement of the pump/catheter:

Procedure Codes						
62350	62351	62355	62360	62361	62362	62365

Procedure codes 62367 and 62368 do not require prior authorization and are payable as a medical service only.

Refer to: Subsection 9.2.39.22, “Implantable Infusion Pumps,” in this handbook for more information about implanted pumps.

Acute pain is defined as pain caused by occurrences such as trauma, a surgical procedure, or a medical disorder manifested by increased heart rate, increased blood pressure, increased respiratory rate, shallow respirations, agitation or restlessness, facial grimace, or splinting.

Chronic pain is defined as persistent, often lasting more than six months; symptoms are manifested similarly to that of acute pain.

Postoperative refers to the time frame immediately following a surgical procedure in which a catheter is maintained in the epidural or subarachnoid space for the duration of the infusion of pain medication.

9.2.52.1 Epidural and Subarachnoid Infusion (Not Including Labor and Delivery)

Epidural and subarachnoid infusion for pain management is payable for acute, chronic, and postoperative pain management.

Procedure code 01996 is limited to once per day and is denied when billed on the same day as a surgical/anesthesia procedure. Procedure code 01996 billed longer than 30 days requires medical necessity documentation. Cancer diagnoses are excluded from the 30-day limitation.

Procedure code 01996 is payable to CRNAs and physicians.

9.2.53 Palivizumab Injections

RSV immune globulin, intramuscular palivizumab (*Synagis*) must be obtained through the Texas VDP. Providers must obtain prior authorization through the VDP.

Providers may not bill Texas Medicaid for RSV prophylaxis that was obtained through VDP; however providers may be reimbursed for administering the drug. Providers may refer to the HHSC Texas Medicaid/CHIP Vendor Drug Program website at www.txvendordrug.com/dur/synagis.shtml for more information about obtaining palivizumab for Texas Medicaid clients.

9.2.54 Panniculectomy and Abdominoplasty

Procedure codes 15830 and 15847 are benefits of Texas Medicaid when prior authorized.

To avoid unnecessary denials, the physician must provide correct and complete information, including documentation establishing medical necessity of the service requested. This documentation must remain in the client’s medical record and is subject to retrospective review.

9.2.54.1 Panniculectomy

A panniculectomy (procedure code 15830) may be reimbursed with prior authorization for one of the following conditions when the panniculus hangs to or below the level of the pubis:

- A panniculus has recurrent non-healing ulcers.
- Client is insulin dependent with recurring infection and causing the prolapse of a ventral hernia.
- Panniculus directly causes significant clinical functional impairment.

Panniculectomy is not a benefit when one of following is the primary purpose:

- To remove excess skin and fat from the middle and lower abdomen in order to contour and alter the appearance of the abdominal area to improve appearance.
- Dissatisfaction with personal body image.
- To minimize the risk of ventral hernia formation or recurrence.
- For the sole purpose of treating neck or back pain.

Panniculectomy may be prior authorized when the client meets one of the following:

- Panniculectomy is planned and there is no history of significant weight loss or gastric bypass surgery.
- Panniculectomy is planned without history of gastric bypass surgery but with significant weight loss and the panniculus hangs to or below the level of the pubis.
- Panniculectomy is planned with history of gastric bypass surgery or abdominoplasty and the client is 12 months post-surgery.

If a panniculectomy is planned and there is no history of significant weight loss or gastric bypass surgery, or a panniculectomy is planned without history of gastric bypass surgery but with significant weight loss and the panniculus hangs to or below the level of the pubis, one of the following must be met:

- Documentation of recurrent episodes of infection or recurrent non-healing ulcers over three months that are non-responsive to treatment or appropriate medical therapy, such as oral or topical prescription.
- The client is insulin-dependent and has a serious infection control problem and the panniculus is causing the prolapse of a ventral hernia.
- Documentation by the treating physician that the panniculus directly causes significant clinical functional impairment. Clinical functional impairment may be indicated by associated musculoskeletal dysfunction or interference with activities of daily living and there is reasonable evidence to support that this surgical intervention will correct the condition.

If a panniculectomy is planned with a history of gastric bypass surgery or abdominoplasty and the client is 12 months post-surgery, the following must be met:

- Documentation that the panniculus hangs to or below the level of the pubis and the client has maintained a significant (100 pounds or more), stable weight loss for at least six months. Documentation must include the weight loss history, prior and current height, prior and current weight, and the history and physical including all previous surgeries.
- Documentation of recurrent episodes of infection or recurrent non-healing ulcers over three months that are non-responsive to treatment or appropriate medical therapy, such as oral or topical prescription. The 12-month post-gastric bypass requirement may be waived.
- The client is insulin-dependent and has a serious infection control problem and the panniculus is causing the prolapse of a ventral hernia. The 12-month post-gastric bypass requirement may be waived.

- Documentation by the treating physician that the panniculus directly causes significant clinical functional impairment. The 12-month post-gastric bypass requirement may be waived. Clinical functional impairment may be indicated by associated musculoskeletal dysfunction or interference with activities of daily living and there is reasonable evidence to support that this surgical intervention will correct the condition.

All medical record documentation pertinent to the client's evaluation and treatment must support medical necessity of the panniculectomy. Documentation may include the following:

- Office records
- Consultation reports
- Operative reports
- Other hospital records (examples: pathology report, history and physical)

Documentation to support the panniculectomy must be submitted with the request for prior authorization. In addition to medical record documentation, the provider may also submit a letter of support or an explanation to substantiate medical necessity.

This service is typically expected to be limited to once per lifetime; however, repeat panniculectomies may be considered for prior authorization upon submission of supporting documentation as outlined above.

A panniculectomy provided as a secondary surgery may be considered for prior authorization when the panniculus interferes with a medically necessary intra-abdominal surgery (e.g., abdominal hernia repair or hysterectomy) or to facilitate an improved anatomical field in order to provide radiation treatment to the abdomen. Documentation of medical necessity must include:

- The comorbidity for the diagnosis of the primary surgery or for the nature of the condition undergoing radiation treatment.
- Documentation supporting the need for the panniculectomy as the panniculus hangs below the level of the pubis and will significantly interfere with a planned surgical procedure, or the abdominal structures identified as requiring radiation therapy will not be adequately treated due to the size of the panniculus.

A panniculectomy provided as a secondary surgery may be considered when the primary surgery was performed for an urgent condition defined as a symptom or condition that is not an emergency, but requires further diagnostic workup or treatment within 24 hours to avoid a subsequent emergent situation.

The need for the panniculectomy as a secondary surgery in conjunction with a primary urgent surgery must be supported by retrospective review of submission of all of the following documentation:

- History and physical and the operative report.
- The panniculus hangs below the level of the pubis and would have significantly interfered with the urgent primary surgical procedure.

9.2.54.2 Abdominoplasty

An abdominoplasty (procedure code 15847) is a benefit for clients who are birth through 20 years of age and may be reimbursed with prior authorization for one of the following conditions:

- Prune belly
- Diastasis recti in the presence of a true midline hernia (ventral or umbilical)

Abdominoplasty is not a benefit when one of the following is the primary purpose:

- To remove excess skin and fat and tighten abdominal wall from the middle and lower abdomen in order to contour and alter the appearance of the abdominal area to improve appearance.
- Dissatisfaction with personal body image.
- To repair diastases recti (unless prior authorization criteria has been met).

Abdominoplasty may be prior authorized when the client meets all of the following criteria:

- Documented diagnosis of prune belly (i.e., Eagle Barret syndrome) or repair of diastasis recti in the presence of a true midline hernia (ventral or umbilical).
- Documentation for reconstructive surgery that must include appropriate historical medical record documentation and may include any of the following:
 - Consultation reports
 - Operative reports or other applicable hospital records (examples: pathology report, history and physical)
 - Office records
 - Letters with pertinent information from provider (when medical records are requested, a letter of support or explanation may be helpful, but alone will not be considered sufficient documentation to make a medical necessity determination)
- For repair of diastasis recti with a true midline hernia, documentation must also include all of the following:
 - The size of the hernia
 - Whether it is reducible, painful, or other symptoms
 - Whether there is a defect rather than just thinning of the abdominal fascia

Consideration of other abdominal diagnoses may be considered for prior authorization with the submission of additional supporting documentation that may include the following:

- Consultation reports
- Operative reports or other applicable hospital records (examples: pathology report, history and physical)
- Office records
- Letters with pertinent information from provider (when medical records are requested, a letter of support or explanation may be helpful, but alone will not be considered sufficient documentation to make a medical necessity determination)

9.2.55 Penile and Testicular Prostheses

The following services are a benefit of Texas Medicaid for male clients:

- Removal of a penile prosthesis without replacement (procedure codes 54406 and 54415).
- Insertion of testicular prosthesis for the replacement of congenitally absent testes or testes lost due to disease, injury, or surgery (procedure code 54660)—prior authorization is required.

Procedure code 54660 is a benefit for clients who are birth through 20 years of age. Insertion of a testicular prosthesis may be prior authorized with the following criteria:

- The client has lost a testicle as a result of cancer or trauma or has congenital absence of a testicle.

- The loss of the testicle has resulted in detrimental psycho-social sequelae, as evidenced by a psychiatric evaluation.

Requests for prior authorization must be submitted by the physician to the Special Medical Prior Authorization (SMPA) department using the Special Medical Prior Authorization (SMPA) Request Form. The request must be submitted with documentation that supports medical necessity.

9.2.56 Pentamidine Aerosol

Payment for aerosol pentamidine medication (procedure code J2545) and treatments (procedure code 94642) is limited to the following diagnosis codes:

Diagnosis Codes						
042	07951	07952	07953	1363	48284	5186

Aerosol pentamidine treatments are limited to one treatment every 28 days.

9.2.57 Percutaneous Transluminal Coronary Interventions

Percutaneous transluminal coronary interventions are a therapeutic option for clients who have arteriosclerotic heart disease.

When any of the following procedure codes are performed on the same date of service and on the same vessel as intracoronary vessel stenting, any provider, only the stenting procedure code will be considered for reimbursement: 92973, 92982, 92984, 92995, and 92996.

Angioplasty, atherectomy, or thrombectomy performed on different coronary vessels may be reimbursed separately. When different coronary vessels are not indicated, only the stenting procedure will be paid.

9.2.58 Physical Therapy (PT) Services

Physical therapy (PT) is a payable benefit to physicians.

Refer to: Section 4, “Therapists, Independent Practitioners, and Physicians” in the *Nursing and Therapy Services Handbook (Vol. 2, Provider Handbooks)* for information about physical therapy services provided by a physician.

9.2.59 Physician Evaluation and Management (E/M) Services

E/M is a benefit of Texas Medicaid. E/M is divided into categories and subcategories. Medical documentation for E/M must consist of the appropriate components as designated in the 1995 and 1997 Physician Evaluation and Management guidelines published by CMS and in the CPT manual.

The following E/M services are benefits of Texas Medicaid:

- Domiciliary, rest home, or custodial care services
- Emergency department services
- Group clinical visits
- Home services
- Hospital services including inpatient, observation, critical care, discharge, and concurrent care services (includes consultation and prolonged services)
- Nursing facility services
- Office or other outpatient services for new and established patients (includes consultation and prolonged services)
- Preventive care visits

- Services outside of business hours

Claims submitted to TMHP by physicians for services provided during an inpatient hospital stay must be received by TMHP within 95 days of each date of service, not 95 days of the discharge date.

Inpatient claims must indicate the facility's provider identifier in Block 32 or in the appropriate field of electronic software.

9.2.59.1 Office or Other Outpatient Hospital Services

9.2.59.1.1 New and Established Patient Services

A new patient is one who has not received any professional services from a physician or from another physician of the same specialty who belongs to the same group practice, within the past three years. Providers must use procedure codes 99201, 99202, 99203, 99204, and 99205 when billing for new patient services provided in the office or an outpatient or other ambulatory facility. New patient visits are limited to one every three years, per client, per provider.

An established patient is one who has received professional services from a physician or from another physician of the same specialty within the same group practice, within the last three years. Providers must use procedure codes 99211, 99212, 99213, 99214, and 99215 when billing for established patient services provided in the office or an outpatient or other ambulatory facility.

New or established office or outpatient care visits are limited to once per day, same provider. When a new patient checkup is billed for the same date of service as a new patient acute care visit, both new patient services may be reimbursed when billed by the same provider or provider group if no other acute care visits or preventive care medical checkups have been billed in the past three years.

Modifier 25 may be used to identify a significant, separately identifiable E/M service performed by the same physician on the same day as another procedure or service. Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client's medical record and made available to Texas Medicaid upon request. The documentation must clearly indicate what the significant problem/abnormality was, including the important, distinct correlation with signs and symptoms to demonstrate a distinctly different problem that required additional work and must support that the requirements for the level of service billed were met or exceeded.

The date and time of both services performed must be outlined in the medical record and the time of the second service must be different than the time of the first service, although a different diagnosis is not required.

An established patient visit that is billed with the same date of service as a new patient visit by the same provider will be denied as part of another procedure except when the established patient visit is billed with a new THSteps medical checkup.

Office visits (procedure codes 99201, 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, and 99215) provided on the same date of service as a planned procedure (minor or extensive) are included in the cost of the procedure and are not separately reimbursed.

Office visit procedure code 99211, 99212, 99213, 99214, or 99215 must be billed by the same provider with the same date of service as a group clinical visit.

Refer to: Subsection 9.2.59.4, "Group Clinical Visits," in this handbook.

Emergency department-based physicians or emergency department-based groups may not bill charges for inconvenience or after hours services (procedure code 99050, 99056, or 99060).

9.2.59.1.2 Preventive Care Visits

Preventive care services are comprehensive visits that may include counseling, anticipatory guidance, and risk-factor-reduction interventions. Documentation must indicate the anticipatory guidance rendered.

Preventive health visits for clients who are birth through 20 years of age are available through THSteps medical checkups.

Refer to: Section 5, “THSteps Medical” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)*.

Subsection 5.3.11.2.3, “Hearing Screening,” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for additional information about hearing screenings.

Adult preventive services (procedure codes 99385, 99386, 99387, 99395, 99396, and 99397) are a benefit of Texas Medicaid for clients who are 21 years of age and older. Adult preventive services are limited to one service per rolling year, any provider, and must be billed with diagnosis code V700 or V7231.

Adult preventive services must be provided in accordance with the U.S. Preventive Services Task Force (USPSTF) recommendations with grades A or B. USPSTF recommendations, with specific age and frequency guidelines, are located on the Agency for Healthcare Research and Quality website at www.ahrq.gov/clinic/uspstfix.htm.

Laboratory, immunization, and diagnostic procedures recommended by USPSTF are covered benefits and may be billed separately, as clinically indicated, using the most appropriate diagnosis code that represents the client’s condition.

The following USPSTF recommendations are not reimbursed separately but must be provided, when applicable, as part of the routine preventive exam:

- Counseling to prevent tobacco use and tobacco-caused disease
- Behavioral counseling in primary care to promote a healthy diet
- Behavioral interventions to promote breast feeding
- Screening for obesity in adults (with intensive counseling and interventions)
- Screening and behavioral counseling interventions in primary care to reduce alcohol misuse
- Screening for depression

The following USPSTF recommendations are not a benefit of Texas Medicaid:

- Chemoprevention of breast cancer
- Varicella immunization

The following screenings are covered benefits in addition to USPSTF recommendations:

- Tuberculosis screening
- Prostate cancer screening; prostate specific antigen (PSA) for men who are 50 through 64 years of age

Services that exceed USPSTF recommendations are not considered part of a screening and require medical documentation to justify medical necessity of the services performed.

For clients who are 21 years of age and older, breast exams and Pap smears are available through programs related to women’s health, including Texas Medicaid family planning services and Texas Women’s Health Program.

Refer to: Section 2, “Medicaid Title XIX family planning services” in the *Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks)*.

Section 3, “Texas Women’s Health Program” in the *Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks)*.

9.2.59.1.3 Consultation Services

A consultation is an E/M service provided at the request of another provider for the evaluation of a specific condition or illness. The consultation must meet the following requirement:

- There must be a request from the referring provider for the evaluation of a particular condition or illness.
- There must be correspondence from the consulting provider back to the referring provider indicating the consulting provider's medical findings.

During a consultation, the consulting provider may initiate diagnostic and therapeutic services if necessary.

The visit is not considered a consultation if any of the following applies:

- If diagnostic or therapeutic treatment is initiated during a consultation and the patient returns for follow-up care, the follow-up visit is considered an established patient visit, and must be billed as an established patient visit.
- If the purpose of the referral is to transfer care.

The medical records maintained by both the referring and consulting providers must identify the other provider and the reason for consultation.

Providers must use procedure code 99241, 99242, 99243, 99244, or 99245 when billing new or established patient consultations in the office, or in an outpatient or other ambulatory facility.

Office or outpatient consultations are limited to one consultation every six months by the same provider for the same diagnosis. Subsequent office or outpatient consultation visits during this six-month period will be denied.

9.2.59.1.4 Services Outside of Business Hours

Texas Medicaid limits reimbursement for after-hours charges (procedure codes 99050, 99056, and 99060) to office-based providers rendering services after routine office hours.

An office-based provider may bill an after-hours charge in addition to a visit when providing medically necessary services for the care of a client with an emergent condition after the provider's posted, routine office hours. Office-based physicians may be reimbursed an inconvenience charge when either of the following exists and the reason is documented in the client's medical record:

- The physician leaves the office or home to see a client in the emergency room.
- The physician leaves the home and returns to the office to see a client after the physician's routine office hours.
- The physician is interrupted from routine office hours to attend to another client's emergency outside of the office.

9.2.59.1.5 Observation Services

Hospital observation (procedure codes 99217, 99218, 99219, and 99220) are professional services provided for a period of more than 6 hours but fewer than 24 hours regardless of the hour of the initial contact, even if the client remains under physician care past midnight. Subsequent observation care, per day (procedure codes 99224, 99225, and 99226) is also a benefit of Texas Medicaid.

Inpatient hospital observation services must be submitted using the procedure code 99234, 99235, or 99236.

Observation care discharge day management procedure code 99217 must be billed to report services provided to a client upon discharge from observation status if the discharge is on a date other than the initial date of admission. The following procedure codes are denied if submitted with the same date of service as procedure code 99217:

Procedure Codes							
99211	99212	99213	99214	99215	99218	99219	99220

If an E/M service is billed by the same provider with the same date of service as a physician observation visit, the E/M service is denied if provided in any place of service other than inpatient hospital.

If a physician observation visit (procedure code 99217, 99218, 99219, 99220, 99234, 99235, or 99236) is billed by the same provider with the same date of service as prolonged services (procedure code 99354, 99355, 99356, or 99357), the prolonged services will be denied as part of another procedure on the same day.

If dialysis treatment and a physician observation visit are billed by the same provider (and same specialty other than an internist or nephrologist) with the same date of service, the dialysis treatment may be reimbursed and the physician observation visit will be denied.

9.2.59.2 Domiciliary, Rest Home, or Custodial Care Services

The following procedure codes are used to report E/M in a facility that provides room, board, and other personal assistance services:

New Patient Procedure Codes				
99324	99325	99326	99327	99328

Established Patient Procedure Codes			
99334	99335	99336	99337

Established patient visits billed on the same date of service as a new patient visit, by the same provider, will be denied as part of another procedure. Established patient visits are limited to one per day regardless of diagnosis.

9.2.59.3 Physician Services Provided in the Emergency Department

Providers must use procedure codes 99281, 99282, 99283, 99284, and 99285 when billing emergency department services.

If an emergency department visit is billed by the same provider with the same date of service as any of the following office, outpatient consultation, or nursing facility service procedure codes, the emergency department visit may be reimbursed and the office, consultation, or nursing facility visit is denied:

Procedure Codes									
99201	99202	99203	99204	99205	99211	99212	99213	99214	99215
99241	99242	99243	99244	99245	99304	99305	99306	99307	99308
99309	99310								

Emergency department visits are denied when billed with the same date of service as an observation service (procedure code 99217) by the same provider.

Multiple emergency department visits provided by the same provider for the same client on the same day must have the times for each visit documented on the claim form. Also, more than one visit billed with the same date of service can be indicated by adding the appropriate modifier to the claim form. Medical documentation is required to support this service.

Reimbursement for physicians in the emergency department is based on Section 104 of TEFRA. TEFRA requires that Medicaid limit reimbursement for nonemergent and nonurgent physicians' services furnished in hospital outpatient settings that also are ordinarily furnished in physician offices. The emergency department procedure code that is submitted on the claim is used to determine the appropriate reimbursement for these services. The procedure code billed may include, but is not limited to, E/M, surgical or other procedure, or any other service rendered to the client in the emergency room. The procedure code must accurately reflect the services rendered by the physician in the hospital's emergency department. The reimbursement for each service is determined by multiplying the base allowable fee by 60 percent.

Refer to: Section 4, "Outpatient Hospital (Medical and Surgical Acute Care Outpatient Facility)" in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for information on emergency department services by facilities (room and ancillary).

Subsection 2.2.1.1, "Non-emergent and Non-urgent Evaluation and Management (E/M) Emergency Department Visits," in Section 2, "Texas Medicaid Fee-For-Service Reimbursement" (*Vol. 1, General Information*) for more information.

9.2.59.4 Group Clinical Visits

Texas Medicaid may reimburse physicians for group clinical visits (procedure code 99078) providing clinical services and educational counseling to a group of clients with the same condition.

To be considered for reimbursement, procedure code 99078 must be billed for the same date of service by the same provider as E/M procedure code 99211, 99212, 99213, 99214, or 99215.

Group clinical visits may be reimbursed for established patients only. The client's plan of care must be determined and documented in the medical record by the physician before attending group clinical visits.

Participation of established patients in a group clinical visit is optional. Informed consent must be obtained from the client and maintained in the medical record before rendering group clinical visit services.

Clients who participate in group clinical visits and who have diseases covered under the Texas Medicaid Enhanced Care Program (congestive heart failure, chronic obstructive pulmonary disease, diabetes, coronary artery disease, and asthma) must receive a referral to the disease management program. Clinical providers are encouraged to coordinate care with the Texas Medicaid Enhanced Care Program for clients who are eligible for the disease management program and choose to participate in the program.

The physician leading the group clinical visit is responsible for the effectiveness and content of the information provided during the group clinical visit.

Nationally approved curriculum on asthma and diabetes, such as that available through the American Association of Diabetic Educators and Asthma Education and Prevention Programs approved by the CDC must be incorporated into the educational portion of group clinical visits.

Group clinical visits must last at least 1 hour, but no longer than 2 hours, with a minimum of 2 clients and a maximum of 20 and must include:

- An informational and instructional presentation. In order to promote self-management of the chronic disease, the group visit must include a presentation instructing and informing the client about clinical issues including how to prevent exacerbation or complications, proper use of medications and other therapeutic techniques, and living with chronic illness.
- A question and answer period. Allow time for the clients to ask questions.

- An encounter with the physician. A short (approximately 5 to 15 minutes per client), one-on-one, private, face-to-face encounter with the physician is required. This visit consists of a physical examination; the gathering, monitoring, and reviewing of laboratory and diagnostic tests; and medical decision-making, including an individual treatment plan. Documentation in the client’s medical record must support the level of E/M as approved by CMS guidelines.

The documentation of the individual treatment plan retained in the client’s medical record must include data collected (physical exam and lab findings), educational services provided, patient participation, referrals to the HHSC disease management program, and the beginning and ending time of the visit.

Group visits for conditions of diabetes or asthma are limited to a maximum of four per year for any provider.

9.2.59.4.1 Group Clinical Visits for Diabetes

Group clinical visits are benefits of Texas Medicaid for the management of the condition of diabetes when submitted with one of the following diagnosis codes:

Diagnosis Codes									
25000	25001	25002	25003	25010	25011	25012	25013	25020	25021
25022	25023	25030	25031	25032	25033	25040	25041	25042	25043
25050	25051	25052	25053	25060	25061	25062	25063	25070	25071
25072	25073	25081	25082	25083	25090	25091	25092	25093	

Diabetic education must explain the following:

- What diabetes is
- Nutrition
- Exercise and physical activity
- Prevention of acute complications
- Prevention of chronic complications
- Monitoring
- Medication

9.2.59.4.2 Group Clinical Visits for Asthma

Group clinical visits are benefits of Texas Medicaid for the management of the condition of asthma when submitted with one of the following diagnosis codes:

Diagnosis Codes									
49300	49301	49302	49310	49311	49312	49320	49321	49322	49381
49382	49390	49391	49392						

Asthma education must consist of the following:

- What is asthma?
- What are symptoms of asthma?
- What happens during an episode of asthma?
- What exacerbates asthma?
- How is asthma controlled?
- What physical activities can people with asthma do?

9.2.59.4.3 Group Clinical Visits for Pregnancy

Group clinical visits are benefits of Texas Medicaid for the management of the condition of pregnancy when submitted with procedure code 99078 and modifier TH, along with one of the following diagnosis codes:

Diagnosis Codes									
V220	V221	V222	V230	V231	V232	V233	V2341	V2342	V2349
V235	V237	V2381	V2382	V2383	V2384	V2385	V2386	V2389	V239

Providers are encouraged to provide a comprehensive curriculum or use materials from the Centering Pregnancy Program that will be incorporated into the educational portion of the group clinical visit.

Comprehensive curriculums will allow clinical issues to be identified to promote a healthy pregnancy. The education material may include screenings and preparations, health maintenance, counseling, and birth plans:

- Screenings and preparations may consist of the following:
 - Expected course of the pregnancy
 - Anticipated outline of the scheduled visits
 - Signs and symptoms, which should be reported to the physician as soon as possible
 - Laboratory services
 - Appropriate use of medications
 - Proper weight monitoring
 - Immunizations (e.g., hepatitis, varicella, or RhoGAM)
 - Complications of pregnancy that may occur (e.g., preeclampsia, diabetes, or edema)
- Health maintenance may consist of the following:
 - Hygiene (e.g., hot tubs or baths)
 - Sexual activity
 - Exercise
 - Nutrition and dietary needs
- Counseling may consist of the following:
 - Use of seat belts
 - Job activity
 - Air travel
 - Dental care appointments
 - Domestic abuse or violence
 - Tobacco or drug use
- Birth planning may consist of the following:
 - What to expect during labor and delivery
 - Pain control during labor
 - Complications during delivery that may occur (e.g., Caesarean section or episiotomy)

- Breast feeding
- Newborn care
- Postpartum adjustments

Group clinical visits for the management of pregnancy are restricted to female clients who are 10 through 55 years of age and are limited to a maximum of 10 visits per 270 days for any provider.

To be considered for reimbursement, procedure code 99078 with modifier TH must be billed for the same date of service by the same provider as E/M procedure code 99211, 99212, 99213, 99214, or 99215 with modifier TH.

9.2.59.5 Home Services

Home services are provided in a private residence. New patient visits will be limited to once every three years. Providers must utilize procedure codes 99341, 99342, 99343, 99344, and 99345 when billing for new patient services provided in the home setting. New patient visits are limited to one every three years.

Providers must use procedure codes 99347, 99348, 99349, and 99350 when billing established patient services provided in the home setting.

A subsequent home visit (procedure codes 99347, 99348, 99349, and 99350) billed with the same date of service as a new patient home visit (procedure codes 99344 and 99345) by the same provider will be denied as part of another procedure, regardless of the diagnosis.

Subsequent home E/M codes are limited to one per day, regardless of diagnosis.

9.2.59.6 Inpatient Hospital Services

Hospital visits are limited to one per day for the same provider.

Only one initial hospital care visit may be reimbursed to the same provider within a 30-day period for the same diagnosis. Additional initial hospital visits with the same diagnosis within a 30-day period will be denied.

A hospital care visit submitted by the same provider for the same client within three days of a new patient office, home, nursing facility, or skilled nursing facility (SNF) visit, for the same or for a similar diagnosis must be submitted as a subsequent care visit.

Refer to: Subsection 9.2.71.6, “Global Fees,” in this handbook for more information about global services.

9.2.59.6.1 Hospital Admissions, Initial Visits, and Subsequent Visits

Inpatient hospital visits must be submitted using procedure codes 99221, 99222, 99223, 99231, 99232, and 99233.

If a subsequent hospital visit (procedure code 99231, 99232, or 99233) following admission is billed by the same provider with the same date of service as any of the following emergency department visits, office visits, or outpatient consultations, the subsequent hospital visit may be reimbursed and the other visits will be denied:

Procedure Code									
99281	99282	99283	99284	99285	99201	99202	99203	99204	99205
99211	99212	99213	99214	99215	99241	99242	99243	99244	99245

Only one initial hospital care visit may be reimbursed to the same provider within a 30-day period for the same diagnosis. Additional initial hospital visits with the same diagnosis within a 30-day period will be denied.

A subsequent hospital visit (procedure code 99231, 99232, or 99233) may be reimbursed to the same provider when performed on the same day as critical care services (procedure codes 99291 and 99292).

E/M services provided in a hospital setting following a major procedure and provided by the same provider or in direct follow-up for postsurgical care are included in the surgeon's global surgical fee and are denied as included in another procedure.

Refer to: Subsection 9.2.45, "Newborn Services," in this handbook for information about newborn services.

9.2.59.6.2 Concurrent Care

Concurrent care exists when services are provided to a patient by more than one physician on the same day during a period of hospitalization in the inpatient hospital setting. Concurrent care is appropriate when the level of care and the documented clinical circumstances require the skills of different specialties to successfully manage the patient in accordance with accepted standards of good medical practice. Concurrent care may be reimbursed to providers of different specialties when the services are for unrelated diagnoses involving different organ systems.

Concurrent care will be denied when billed for providers of the same specialty for the same or related diagnoses (i.e., diagnosis codes containing the same first three digits). Denied concurrent care may be appealed when accompanied by documentation of medical necessity.

Each appeal submitted for concurrent care must contain the following information:

- Documentation of the medical necessity for the physician's services (care and treatment)
- Diagnosis and indication of the severity of the client's condition (acute or critical)
- Role of the physician in the care of the client, including the name of the admitting physician
- Specialty and subspecialty of each physician and any limitations of practice

Claims appealed without clear documentation of medical necessity as described above will be denied.

Important: *If the attending physician requests only a consultation, the request must be clearly stated in the orders.*

All concurrent care is subject to retrospective review. Documentation of medical necessity for concurrent care must be retained by the physician as required by federal law and must include, but is not limited to, documentation of:

- The orders for concurrent care or valid reasons for the request by the attending physician.
- The name of the requesting physician by the physician rendering concurrent care.

9.2.59.6.3 Consultations

Consultations provided to hospital inpatients, residents of nursing facilities, or patients in a partial hospital setting must be billed using procedure codes 99251, 99252, 99253, 99254, and 99255.

One initial inpatient consultation (procedure code 99251, 99252, 99253, 99254, or 99255) is allowed for each hospitalization within a 30-day period. Subsequent consultations billed as initial consultations during this time period will be denied.

Refer to: Subsection 9.2.59.1.3, "Consultation Services," in this handbook for additional criteria information.

9.2.59.6.4 Critical Care

Critical care includes the care of critically ill clients that require the constant attention of the physician. The physician must either be at bedside or immediately available to the client. The physician's full attention must be devoted to the client so that the physician cannot render E/M to any other client

during the same period of time. Critical care is usually given in a critical care area, such as the coronary care unit, intensive care unit, respiratory care unit, neonatal intensive care unit, or the emergency department care facility. The following procedure codes are used to bill critical care services:

Procedure Code	Limitations
99291	A per day charge for the first 30 to 74 minutes of critical care (time spent by the physician does not have to be continuous on that day).
99292	A per day charge for each additional 30 minutes beyond the first 74 minutes of critical care for up to 6 units or 3 hours per day.*
99471	A per day charge for initial inpatient pediatric critical care of the critically ill client who is 29 days through 24 months of age.
99472	A per day charge for subsequent inpatient pediatric critical care of the critically ill client who is 29 days through 24 months of age.
99475	A per day charge for initial inpatient pediatric critical care of the critically ill client who is 2 years through 5 years of age.
99476	A per day charge for subsequent inpatient pediatric critical care of the critically ill client who is 2 years through 5 years of age.
* If the number of units is not stated on the claim, a quantity of one is allowed.	

Services for a client who is not critically ill and unstable but who was treated in a critical care unit must be reported using subsequent hospital visit codes or hospital consultation codes.

If the same provider who performed a major surgery must also perform critical care on the same day for the same client, the provider must bill the critical care with documentation that the critical care was unrelated to the specific anatomic injury or general surgical procedure.

Critical care (procedure codes 99291, 99292, 99471, 99472, 99475, and 99476) may be reimbursed only to the provider rendering the critical care service at the time of crisis. Critical care involves high-complexity decision-making to access, manipulate, and support vital system functions. While providers from various specialties may be consulted to render an opinion and assist in the management of a particular portion of the care, only the provider managing the care of the critically ill patient during a life threatening crisis may bill the critical care procedure codes.

Critical care procedure codes 99291 and 99292 are used to report the total duration of time spent by a physician providing critical care services to a critically ill or critically injured client, even if the time spent by the physician on that date is not continuous.

Actual time spent with the individual client must be recorded in the client’s record and reflect the time billed on the claim. The time that can be reported as critical care is the time spent engaged in work directly related to the individual client’s care whether that time was spent at the immediate bedside or elsewhere on the floor or unit.

Time spent under the following circumstances may not be reported as critical care:

- Activities that occur outside of the unit or off the floor
- Activities that do not directly contribute to the treatment of the client
- While performing separately reportable procedures or services

Critical care of less than 30 minutes total duration per day must be reported with the appropriate E/M procedure code.

If critical care that meets the initial 30-minute time requirement is provided to the same client by different physicians, the initial provider’s claim may be reimbursed. The second provider’s claim will be denied but may be appealed. The time spent by each physician cannot overlap; two physicians cannot bill critical care for care delivered at the same time. Supporting medical record documentation that

includes the time in which the critical care was rendered must be provided by the second physician. In addition, a statement must be submitted indicating the physician was the only provider managing the care of the critically ill patient during the life threatening crisis.

If the provider's time exceeds the 74-minute threshold for procedure code 99291, procedure code 99292 may be billed for each additional 30 minutes. Procedure code 99292 must be billed by the same performing provider or by a member of the same performing provider's group practice and is limited to 6 units per day for any provider.

Inpatient critical care services provided to infants 29 days through 24 months of age are reported with pediatric critical care procedure codes 99471 and 99472. The pediatric critical care procedure codes are reported as long as the infant or young child qualifies for critical care services during the hospital stay through 24 months of age.

Pediatric critical care (procedure codes 99471, 99472, 99475, and 99476) is a per-day charge. Only one physician can bill pediatric critical care per day. If an inpatient or outpatient E/M service is billed by the same provider with the same date of service as pediatric critical care, the E/M service is denied.

Critical care provided to a neonatal, pediatric, or adult client in an outpatient setting (e.g., emergency room), which does not result in admission must be billed using procedure codes 99291 and 99292.

Critical care provided to a neonatal or pediatric client in both the outpatient and inpatient settings on the same day must be billed using the appropriate neonatal or pediatric critical care procedure code.

If critical care (procedure code 99291 or 99292) is provided to a patient at a distinctly separate time from another outpatient E/M service by the same provider, both services may be reimbursed with supporting medical record documentation.

Prolonged physician services (procedure codes 99354, 99355, 99356, and 99357) will be denied when billed by the same provider with the same date of service as critical care (procedure code 99291, 99292, 99471, 99472, 99475, or 99476).

Claims may be subject to retrospective review to ensure documentation supports the medical necessity of the service when billing the claim.

Critical care procedure codes 99291 and 99292 will be denied when submitted with the same date of service by the same provider as neonatal intensive care procedure code 99468, 99469, 99478, 99479, or 99480.

9.2.59.6.5 Hospital Discharge

Hospital discharge must be submitted using procedure code 99238 or 99239.

Discharge management billed by the same provider with the same date of service as the admission will be denied.

Discharge management billed by the same provider with the same date of service as an emergency room visit will be denied but may be reimbursed upon appeal if provided at a separate time.

Subsequent hospital visits billed by the same provider with the same date of service as discharge management will be denied.

Initial hospital visit procedure codes 99221, 99222, and 99223 billed with the same date of service as hospital discharge day management procedure code 99238 will be denied as part of another procedure billed on the same day. Initial hospital visit procedure code 99221 billed with the same date of service as hospital discharge day management procedure code 99239 will be denied as part of another procedure billed on the same day.

9.2.59.6.6 Nursing Facility Services

Providers must use the following when billing initial nursing facility assessments, subsequent nursing facility care, and annual nursing facility assessments in a nursing facility:

Procedure Codes									
99304*	99305*	99306*	99307	99308	99309	99310	99315	99316	99318
* Initial nursing facility assessments include all services related to an admission to the nursing facility.									

Comprehensive initial nursing facility assessments performed by the same provider for the same diagnosis are limited to one every six months. The second initial nursing facility assessment within the six-month period will be denied.

Prolonged services in the nursing facility involving direct (face-to-face) patient contact that is beyond the usual service may be reimbursed on the same day as a nursing facility visit (procedure code 99304, 99305, 99306, 99307, 99308, 99309, or 99310).

Procedure code 99356 must be used to report the first hour of prolonged service and is limited to one per day.

Procedure code 99357 must be used to report each additional 30 minutes and is limited to a quantity of three units or one and one-half hours per day.

Prolonged physician services will not be reimbursed in addition to an emergency room visit billed on the same day.

All E/M services, regardless of setting, are considered part of the initial nursing facility care when performed by the same provider on the same day as the admission.

Subsequent nursing facility care E/M procedure codes 99307, 99308, 99309, and 99310 are limited to one per day regardless of diagnosis.

9.2.59.6.7 Observation

When a patient is admitted to the hospital as an inpatient and is discharged in less than 48 hours, the hospital may request that the physician change the admission order from inpatient status to outpatient observation status. This is an acceptable billing practice under Texas Medicaid when the physician makes the changes to the admitting order from inpatient status to outpatient observation status before the hospital submits the claim for reimbursement.

Refer to: Subsection 9.2.59.1.5, “Observation Services,” in this handbook for more information about hospital observation.

9.2.59.7 Prolonged Physician Services

Prolonged services involve face-to-face patient contact and may be provided in the office, outpatient hospital, or inpatient hospital settings. The face-to-face patient contact must exceed the time threshold of the following E/M procedure codes submitted for the date of service and be beyond the usual service.

Procedure Codes									
99201	99202	99203	99204	99205	99211	99212	99213	99214	99215
99221	99222	99223	99231	99232	99233	99241	99242	99243	99244
99245	99251	99252	99253	99254	99255	99341	99342	99343	99344
99345	99347	99348	99349	99350					

The following procedure codes must be used for prolonged physician services:

Procedure Codes	Limitation
99354 and 99356	Used in conjunction with the E/M procedure code to report the first hour of prolonged service and are limited to one per day.
99355 and 99357	Used to report each additional 30 minutes and are limited to a quantity of 3 units or 1.5 hours per day.
Note: Prolonged services that are less than 30 minutes in duration cannot not be reported separately.	

Prolonged services in the inpatient setting involving face-to-face client contact that is beyond the usual service may be reimbursed when provided on the same day as an initial hospital visit (procedure codes 99221, 99222, 99223, 99251, 99252, 99253, 99254, and 99255) or a subsequent hospital visit (99231, 99232, 99233).

Prolonged physician services are denied when billed with critical care or emergency room visits billed with the same date of service.

Prolonged physician services and physician standby services without a face-to-face contact (procedure codes 99358, 99359, and 99360) are not a benefit of Texas Medicaid.

9.2.59.8 Referrals

A *referral* is defined as the transfer of the total or specific care of a patient from one physician to another; a referral does not constitute a consultation. These services must be billed using the appropriate E/M visit code.

When a Texas Medicaid provider refers a Texas Medicaid client to another provider for additional treatment or services, the referring provider must forward notification of the client’s eligibility and his provider identifier. The client must be made aware that the provider he/she is referred to does or does not participate in Texas Medicaid. Some clients not eligible for Medicaid are eligible for family planning through the DSHS Family Planning Program. These clients should be referred to contracted agency providers for family planning services.

9.2.59.8.1 Referral Requirements for Children with Disabilities

All health-care professionals are required by state and federal legislation to refer children who are 35 months of age or younger with developmental delays to early childhood intervention services provided under the authority of the Department of Assistive and Rehabilitative Services (DARS).

Refer to: Subsection 2.7, “Early Childhood Intervention (ECI) Services,” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)*.

9.2.60 Physician Services in a Long Term Care (LTC) Nursing Facility

The Department of Aging and Disability Services (DADS) requires initial certification and recertification of Medicaid clients in nursing facilities by physicians in accordance with guidelines set forth in federal regulations. Physician visits for certification and recertification are considered medically necessary, and are reimbursable by Medicaid whether performed in the physician’s office or the nursing facility.

Additional information is available on the DADS website at www.dads.state.tx.us.

9.2.61 Podiatry and Related Services

Podiatry and related services are a benefit of Texas Medicaid.

9.2.61.1 Clubfoot Casting

Procedure code 29450 is limited to clients who are birth through 3 years of age and is payable to a physician in the management of clubfoot when a previous surgery has been performed. The physician may bill the appropriate E/M code with a casting code and be reimbursed for both. Procedure code 29750 is limited to clients who are birth through 2 years of age and is payable to a physician in addition to the initial casting or strapping procedure.

Use modifiers LT (left) and RT (right) with all procedures, as appropriate.

Casting and wedging are benefits if the client has one of the following conditions:

Diagnosis Codes									
73671	75450	75451	75452	75453	75459	75460	75461	75462	75469
75470	75471	75479							

9.2.61.2 Flat Foot Treatment

Reimbursement for treatment of deformities of the foot and lower extremity that includes flat foot as a component of the deformity may be considered when the client presents with significant pain in the foot, leg, or knee, resulting in a loss of or decrease in function, along with a secondary condition such as valgus deformity or plantar fasciitis.

Treatment of flat foot (flexible pes planus) that is solely cosmetic in nature is not a benefit of Texas Medicaid.

9.2.61.3 Routine Foot Care

Routine foot care must be medically necessary and billed with the following procedure codes. No specific diagnosis restrictions exist. The following procedures are limited to one service every six months per client, regardless of provider specialty: 11055, 11056, 11057, 11719, and G0127.

9.2.62 Prostate Surgery

A transurethral resection of the prostate (TURP) is the most common procedure performed to treat benign prostatic hyperplasia (BPH). A TURP may be billed with procedure code 52601, 52630, or 52640.

If a provider submits separate charges for any of the TURP procedure codes listed above and procedure code 52351 or 52354, the charges for procedure codes 52351 and 52354 will be denied as part of the TURP procedure.

9.2.63 Radiation Therapy

Radiation treatment management may be reimbursed by Texas Medicaid as defined in the *Current Procedure Terminology (CPT)* manual under the “Radiation Treatment Management” section.

The following radiation therapy services are limited to once per day unless documentation submitted with an appeal supports the need for the service to be provided more frequently:

- Therapeutic radiation treatment planning
- Therapeutic radiology simulation-aided field setting
- Teletherapy
- Brachytherapy isodose calculation
- Treatment devices
- Proton beam delivery/treatment
- Intracavitary radiation source application
- Interstitial radiation source application

- Remote afterloading high intensity brachytherapy
- Radiation treatment delivery
- Localization
- Radioisotope therapy

Laboratory and diagnostic radiological services provided in the office setting may be reimbursed to physicians as a total component. Radiation treatment centers may also be reimbursed for the total component for these services in the outpatient hospital setting. Injectable medications given during the course of therapy in any setting may be reimbursed separately.

Routine follow-up care by the same physician on the day of any therapeutic radiology service will be denied. Medical services within program limitations may be reimbursed on appeal when documentation supports the medical necessity of the visit due to services unrelated to the radiation treatment or radiation treatment complication.

The professional component and the technical component will be denied when billed with the total component. The total component includes the professional and the technical components.

The professional component may be reimbursed for services rendered in the inpatient hospital setting, radiation treatment center setting, or outpatient hospital setting. Physicians billing client services rendered in the office setting or in a facility recognized by Medicaid as a radiation treatment center may be reimbursed for total components.

9.2.63.1 Brachytherapy

9.2.63.1.1 Prior Authorization for Brachytherapy

Prior authorization is not required for brachytherapy.

9.2.63.1.2 Other Limitations on Brachytherapy

Clinical brachytherapy services include admission to the hospital and daily care. Initial and subsequent hospital care will be denied as part of another service when billed with the same date of service as clinical brachytherapy services.

An office visit will be denied as part of another service when billed with the same date of service by the same provider as clinical treatment planning and clinical brachytherapy.

Normal follow-up care by the same physician will be denied as part of another service when billed with the same dates of service as any therapeutic radiology service. Any other E/M office visit will be denied as part of another service when billed with the same date of service by the same provider as the radiation treatment or radiation treatment complication.

Providers may use modifier 25 to indicate that the additional visit was for a separate, distinct service unrelated to the radiation treatment or radiation treatment complication. Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client’s medical record and made available upon request.

9.2.63.2 Stereotactic Radiosurgery

9.2.63.2.1 Prior Authorization for Stereotactic Radiosurgery

The following procedure codes are a benefit of Texas Medicaid with prior authorization and documentation of medical necessity:

Procedure Codes									
32701	61781	61782	61783	61796	61797	61798	61799	61800	63620
63621	77371	77372	77373	77399	77422	77423	77520	77522	77523

Procedure Codes				
77525	G0339	G0340	G6002	S8030

Prior authorization requirements for stereotactic radiosurgery and stereotactic body radiation therapy may include, but are not limited to, diagnoses indicating one of the following medical conditions:

- Benign and malignant tumors of the central nervous system
- Vascular malformations
- Soft tissue tumors in chest, abdomen, or pelvis
- Trigeminal neuralgia refractory to medical management

Stereotactic radiosurgery and stereotactic body radiation therapy are considered investigational and not a benefit of Texas Medicaid for all other indications including, but not limited to, epilepsy, chronic pain, and pancreatic adenocarcinoma.

Prior authorization requirements for proton beam (procedure codes 77520, 77522, 77523, 77525, and S8030) and helium ion radiosurgery (procedure codes 77422 and 77423) may include, but are not limited to, diagnoses indicating one of the following medical conditions:

- Melanoma of the uveal tract (iris, choroid, ciliary body)
- Postoperative treatment for chordomas or low-grade chondrosarcomas of the skull or cervical spine
- Prostate cancer
- Pituitary neoplasms
- Other central nervous system tumors located near vital structures

Prior authorization for neutron beam radiosurgery may be considered for malignant neoplasms of the salivary gland.

Prior authorization requirements for procedure code 77399 include, but are not limited to, diagnosis, documentation of medical necessity, a specific description of the procedure to be performed, and an indication that the procedure would not be covered by a more specific procedure code.

Stereotactic radiosurgery and stereotactic body radiation therapy will not be prior authorized for clients with metastatic disease and a projected life span of less than six months or for clients with widespread cerebral or extracranial metastasis that is not responsive to systemic therapy.

9.2.63.2.2 Other Limitations on Stereotactic Radiosurgery

In the following table, the procedure codes in Column A may be reimbursed when at least one corresponding procedure code from Column B has been paid to the same provider for the same date of service:

Column A Procedure Code	Column B Procedure Code
61797	61796, 61798
61799	61798
61800	61796, 61798
63621	63620

Procedure codes 61796 and 63620 must not be billed more than once per course of treatment.

Procedure codes 61797 and 61799 must not be billed more than once per lesion, and may only be billed up to four times for the entire course of treatment, regardless of the number of lesions treated.

Procedure code 63621 may only be billed up to two times for the entire course of treatment, regardless of the number of lesions treated.

9.2.64 Radiology Services

In compliance with HHS regulations, physicians (MDs and DOs), group practices, and clinics may not bill for radiology services provided outside their offices. These services must be billed directly by the facility/provider that performs the service.

This restriction does not affect radiology services performed by physicians or under their supervision in their offices. The radiology equipment must be owned by physicians and be located in their office to allow for billing of TOS 4 (complete procedure) or TOS T with modifier TC to Texas Medicaid. If physicians are members of a clinic that owns and operates radiology facilities, they may bill for these services. However, if physicians practice independently and share space in a medical complex where radiology facilities are located, they may not bill for these services even if they own or share ownership of the facility, unless they supervise and are responsible for the operation of the facilities on a daily basis.

Providers billing for three or more of the same radiology procedures on the same day must indicate the time the procedure was performed to indicate that it is not a duplicate service. The use of modifiers 76 and 77 does not remove the requirement of indicating the times services were rendered. The original claim will be denied but can be appealed with the documentation of procedure times.

When billing for services in an inpatient or outpatient hospital setting, the radiologist may only bill the professional interpretation of procedures (modifier 26). This also applies when providing services to a client who is in an inpatient status even if the client is brought to the radiologist's office for the service. The hospital is responsible for all facility services (the technical component) even if the service is supplied by another facility/provider.

A separate charge for an X-ray interpretation billed by the attending or consulting physician is not allowed concurrently with that of the radiologist. Interpretations are considered part of the attending or consulting physician's overall work-up and treatment of the patient.

Providers other than radiologists are sometimes under agreement with facilities to provide interpretations in specific instances. Those specialties may be paid if a radiologist does not bill for the professional component of X-ray procedures.

If duplicate billings are found between radiologists and the other specialties, the radiologist may be paid, and the other provider is denied.

Abdominal flat plates (AFP) or kidneys, ureters, bladder (KUB) codes 74000, 74010, and 74020 are frequently done as preliminary X-rays before other, more complicated X-ray procedures. If a physician bills separately for an AFP or KUB and more complicated procedures, the charges are combined and the more complex procedure may be paid. If, however, the claim specifically states the AFP or KUB was done first and the results required additional X-rays, each procedure may be paid separately.

Oral preparations for X-rays are included in the charge for the X-ray procedure when billed by a physician. Separate charges for the oral preparation are denied as part of another procedure on the same day.

Separate charges for injectable radiopharmaceuticals used in the performance of specialized X-ray procedures may be paid. If a procedure code is not indicated, an unlisted code must have a drug name, route of administration, and dosage written on the claim.

9.2.64.1 Diagnosis Requirements

Physicians enrolled and practicing as radiologists are not routinely required to send a diagnosis with their request for payment except when providing the following services:

- Arteriograms
- Venography

- Chest X-rays
- Cardiac blood pool imaging
- Echography

Radiologists are required to identify the referring provider by full name and credentials in Block 17 of the CMS-1500 claim form. Radiology procedures submitted by all other physician specialties must reference a diagnosis with every procedure billed. As with all procedures billed to Texas Medicaid, baseline screening and/or comparison studies are not a benefit.

9.2.64.2 Cardiac Blood Pool Imaging

Cardiac blood pool imaging may be reimbursed with procedure codes 78472, 78473, 78481, 78483, 78494, and 78496. Prior authorization is required for outpatient diagnostic services.

Refer to: Subsection 9.2.26.9, “Myocardial Perfusion Imaging,” in this handbook for more information about myocardial perfusion imaging.

Section 3, “Radiological and physiological laboratory services” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)* for additional information and authorization requirements.

9.2.64.3 Chest X-Rays

All providers including radiologists billing for chest X-rays must supply a diagnosis code.

Screening, baseline, or rule-out studies do not qualify for reimbursement; however, the following diagnosis codes are payable:

Diagnosis Codes									
01100	01101	01102	01103	01104	01105	01106	01110	01111	01112
01113	01114	01115	01116	01120	01121	01122	01123	01124	01125
01126	01130	01131	01132	01133	01134	01135	01136	01140	01141
01142	01143	01144	01145	01146	01150	01151	01152	01153	01154

*Claims for clients who are 12 years of age and older may be appealed with documentation of medical necessity.

9.2.64.4 Magnetic Resonance Angiography (MRA)

MRA is an effective diagnostic tool used to detect, diagnose, and aid the treatment of heart disorders, stroke, and blood vessel diseases.

Refer to: Section 3, “Radiological and physiological laboratory services” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)* for additional information and authorization requirements.

9.2.64.5 Magnetic Resonance Imaging (MRI)

MRIs may be an effective diagnostic tool for detecting defects, diseases, and trauma.

Refer to: Section 3, “Radiological and physiological laboratory services” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)* for additional information and authorization requirements.

9.2.64.6 Technetium TC 99M

Procedure codes A9500 (Sestamibi) and A9502 (Tetrofosmin) are limited to three per day when billed by the same provider.

9.2.65 Reduction Mammoplasties

9.2.65.1 Prior Authorization for Reduction Mammoplasty

Procedure code 19318 is the removal of breast tissue and is a benefit of Texas Medicaid when prior authorized.

For prior authorization of reduction mammoplasty, a completed “Medicaid Certificate of Medical Necessity for Reduction Mammoplasty” form signed and dated by the physician, must be submitted and include at least one of the following criteria:

- Evidence of severe neck and/or back pain with incapacitation from the pain.
- Evidence of ulnar pain or paresthesia from thoracic nerve root compression.
- Submammary dermatological conditions such as intertrigo and acne that are refractory to conventional medication.
- Shoulder grooving with ulceration due to breast size.

In addition to the above criteria, documentation must indicate:

- The minimum weight of tissue expected to be removed from each breast with consideration to height and weight is as follows:

Height and Weight Chart		
Under 5'	<140 lb	300 grams per breast
5'-5'.4"	up to 180 lb	350 grams per breast
5'.4"-5'.7"	up to 220 lb	400 grams per breast
5'.7"- and up	211 lb and up	500 grams per breast

- The client, if 40 years of age or older, has had a mammogram within the past year that was negative for cancer.

The following services are *not* a benefit of Texas Medicaid:

- Reduction mammoplasty for cosmetic purposes (such as the equalization of breast size)
- Reduction mammoplasty for gynecomastia (enlargement of breast tissue in the male)
- Augmentation mammoplasty to increase breast size

The physician is required to maintain the following documentation in the client’s clinical records:

- A complete history and physical
- Pulmonary function studies results
- Past treatments, therapies, and outcomes for pain control and weight reduction

The physician is required to maintain preoperative photographs (frontal and lateral views) in the client’s clinical records and must be made available to Texas Medicaid upon request.

For reimbursement purposes on a bilateral procedure, the full allowed amount will be paid to the surgeon and assistant surgeon for the first breast reduction and one half the allowed amount will be paid for the second reduction. Facilities are paid for one surgical procedure.

When submitting for prior authorization, requests *must* be sent to TMHP Special Medical Prior Authorization. Sending requests directly to the TMHP Medical Director delays the processing of the request. Providers are to mail prior authorization requests for reduction mammoplasty to the following address:

Texas Medicaid & Healthcare Partnership
 Special Medical Prior Authorization
 12357-B Riata Trace Parkway, Suite 100
 Austin, TX 78727
 Fax 1-512-514-4213

9.2.66 Renal Disease

9.2.66.1 Dialysis Patients

Physician reimbursement for supervision of patients on dialysis is based on a monthly capitation payment (MCP) calculated by Medicare. The MCP is a comprehensive payment that covers all physician services associated with the continuing medical management of a maintenance dialysis patient for treatments received in the facility. An original onset date of dialysis treatment must be included on claims for all renal dialysis procedures in all POSs except inpatient hospital. The original onset date must be the same date entered on the 2728 form sent to the Social Security office.

9.2.66.1.1 Physician Supervision of Dialysis Patients

Physician supervision of outpatient ESRD services includes services provided in the course of office visits where any of the following occur:

- The routine monitoring of dialysis.
- The treatment or follow-up of complications of dialysis, including:
 - The evaluation of related diagnostic tests and procedures.
 - Services involved in prescribing therapy for illnesses unrelated to renal disease, if the treatment occurs without increasing the number of physician-client contacts.

Use the following procedure codes when billing for physician supervision of outpatient ESRD dialysis services:

Procedure Codes									
90951	90952	90953	90954	90955	90956	90957	90958	90959	90960
90961	90962	90963	90964	90965	90966	90967	90968	90969	90970

The procedure codes must be billed as described below:

- In the circumstances where the client is not on home dialysis and has had a complete assessment visit during the calendar month and ESRD-related services are provided for a full month, procedure codes 90951, 90952, 90953, 90954, 90955, 90956, 90957, 90958, 90959, 90960, 90961, or 90962 must be used, determined by the number of face-to-face visits the physician has had with the client during the month, and the client’s age.
- When a full calendar month of ESRD-related services are reported for clients on home dialysis, procedure codes 90963, 90964, 90965, or 90966 must be used, determined by the client’s age.
- Report procedure codes 90967, 90968, 90969, and 90970 when ESRD related services are provided for less than a full month, per day, under the following conditions:

- The client is seen for a partial month and is not on home dialysis and received one or more face-to-face visits but did not receive a complete assessment.
- The client is on home dialysis and received less than a full month of services.
- The client is a transient client.
- The client was hospitalized during a month of services before a complete assessment could be performed.
- Dialysis was stopped due to recovery or death of client.
- The client received a kidney transplant.
- Procedure codes 90967, 90968, 90969, and 90970 are limited to one per day by any provider. When billing procedure code 90967, 90968, 90969, or 90970, the date of service must indicate each day that supervision was provided.
- Procedure codes 90967, 90968, 90969, and 90970 will be denied when billed within the same calendar month by any provider as procedure code 90951, 90952, 90953, 90954, 90955, 90956, 90957, 90958, 90959, 90960, 90961, 90962, 90963, 90964, 90965, or 90966.
- Procedure codes 90951, 90952, 90953, 90954, 90955, 90956, 90957, 90958, 90959, 90960, 90961, 90962, 90963, 90964, 90965, or 90966 are limited to once per calendar month by any provider, and only one service may be reimbursed per calendar month by any provider.

The following services may be provided in conjunction with physician supervision of ESRD dialysis but are considered non-routine and may be billed separately:

- Declotting of shunts when performed by the physician.
- Physician services to inpatient clients. If a client is hospitalized during a calendar month of ESRD related services before a complete assessment is performed, or the client receives one or more face-to-face assessments, but the timing of inpatient admission prevents the client from receiving a complete assessment, the physician must bill procedure code 90967, 90968, 90969, or 90970 for each date of outpatient supervision and bill the appropriate hospital evaluation and management code for individual services provided on the hospitalized days. If a client has a complete assessment during a month in which the client is hospitalized, procedure code 90951, 90952, 90953, 90954, 90955, 90956, 90957, 90958, 90959, 90960, 90961, or 90962 must be reported for the month of supervision, determined by the number of face-to-face physician visits with the client during the month, and the client's age. The appropriate inpatient evaluation and management codes must be reported for procedures provided during the hospitalization.
- Dialysis at an outpatient facility other than the usual dialysis setting for a patient of a physician who bills the MCP. The physician must bill procedure code 90967, 90968, 90969, or 90970 for each date supervision is provided. The physician may not bill for days that the client dialyzed elsewhere.
- Physician services beyond those that are related to the treatment of the patient's renal condition that cause the number of physician-patient contacts to increase. Physicians may bill on a fee-for-service basis if they supply documentation on the claim that the illness is not related to the renal condition and that additional visits are required.

Use procedure codes 90935, 90937, 90945, and 90947 for inpatient dialysis services for ESRD or non-ESRD clients when the physician is present during dialysis treatment. The physician must be physically present and involved during the course of the dialysis. These codes are not payable for a cursory visit by the physician; hospital visit codes must be used for a cursory visit.

The hospital procedure codes 90935, 90937, 90945, and 90947 are for complete care of the patient; hospital visits cannot be billed on the same day as these codes. However, if the physician only sees the patient when they are not dialyzing, the physician must bill the appropriate hospital visit code. The inpatient dialysis code must not be submitted for payment.

Only one of procedure code 90935, 90937, 90945, or 90947 may be reimbursed per day, any provider. Procedure codes 90935, 90937, 90945, and 90947 may also be used for outpatient dialysis services for non-ESRD clients.

Inpatient services provided to hospitalized clients for whom the physician has agreed to bill monthly, may be reimbursed in one of the following three ways:

- The physician may elect to continue monthly billing, in which case she or he may not bill for individual services provided to the hospitalized clients.
- The physician may reduce the monthly bill by 1/30th for each day of hospitalization and charge fees for individual services provided on the hospitalized days.
- The physician may bill for inpatient dialysis services using the inpatient dialysis procedure codes. The physician must be present and involved with the clients during the course of the dialysis.

Clients may receive dialysis at an outpatient facility other than his or her usual dialysis setting, even if their physician bills for monthly dialysis coordination. The physician must reduce the monthly billed amount by 1/30th for each day the client is dialyzed elsewhere.

Physician services beyond those related to the treatment of the client's renal condition may be reimbursed on a fee-for-service basis. The physician should provide documentation stating the illness is not related to the renal condition and added visits are required.

Payment is made for physician training services in addition to the monthly capitation payment for physician supervision rendered to maintenance facility clients.

9.2.66.2 Laboratory Services for Dialysis Patients

Texas Medicaid may reimburse for laboratory services performed for dialysis patients.

Charges for *routine laboratory services* performed according to established frequencies are included in the facility's composite rate billed to Texas Medicaid regardless of where the tests were performed. Routine laboratory testing processed by an outside laboratory are billed to the facility and billed by a renal dialysis facility, unless they are inclusive tests.

Nonroutine laboratory services for people dialyzing in a facility and all laboratory work for people on CAPD may be billed separately from the dialysis charge.

Refer to: Subsection 6.2.9, "Laboratory and Radiology Services," in the *Clinics and Other Outpatient Facility Services Handbook (Vol. 2, Provider Handbooks)* for more information on laboratory services.

9.2.66.3 Self-Dialysis Patients

Physician reimbursement for supervision of patients on self-dialysis is made after completion of the patient's training. If the training is not completed, payment is proportionate to the amount of time spent in training. Payment for training may be made in addition to payment under the MCP for physician supervision of an in-facility maintenance dialysis patient. Use procedure codes 90989 and 90993 for dialysis training regardless of the type of training performed. These procedure codes must be billed as specified:

- When complete dialysis training is provided, bill procedure code 90989. Providers are to use modifier AT when using this procedure code. The date of service indicates the date training was completed, and the quantity is 1.
- When dialysis training is not completed, bill procedure code 90993. The date of service must list each day that a session of training was provided and the quantity must indicate the number of training sessions provided.

The amount of reimbursement of subsequent training is determined by prorating the physician's payment for initial training sessions. The amount of payment for each additional training session does not exceed \$20.

9.2.66.3.1 Physician Supervision

All physician services required to create the capacity for self-dialysis must include:

- Direction of and participation in training of dialysis patients.
- Review of family and home status and environment, and counseling and training of family members.
- Review of training progress.

9.2.66.3.2 Initial Training

The following services are included in the physician charge for supervision of a client on self-dialysis:

- Physician services rendered during a dialysis session including those backup dialyses that occur in outpatient facility settings.
- Office visits for the routine evaluation of patient progress, including the interpretation of diagnostic tests and procedures.
- Physician services rendered by the attending physician in the course of an office visit, the primary purpose of which is routine monitoring or the follow-up of complications of dialysis, including services involved in prescribing therapy for illnesses unrelated to renal disease, which may be appropriately treated without increasing the number of contacts beyond those occurring at regular monitoring sessions or visits for treatment of renal complications.
- General support services (for example, arranging for supplies).

9.2.66.3.3 Subsequent Training

No additional payment is made after the initial self-dialysis training course unless subsequent training is required for one of the following reasons:

- A change from the client's treatment machine to one the client had not been trained to use in the initial training course
- A change in setting
- A change in dialysis partner

The physician must document the reason for additional training sessions on the CMS-1500 paper claim form.

Dialysis equipment and supplies used by the client who dialyzes in the home are not benefits of Texas Medicaid, including the lease or purchase of dialysis machines and disposable supply kits.

9.2.67 Sign Language Interpreting Services

Sign language interpreting services are benefits of Texas Medicaid. Providers must use procedure code T1013 with modifier U1 for the first hour of service, and T1013 with modifier UA for each additional 15 minutes of service. Procedure code T1013 billed with modifier U1 is limited to once per day, same provider, and procedure code T1013 billed with modifier UA is limited to a quantity of 28 per day, same provider.

Sign language interpreting services are available to Medicaid clients who are deaf or hard of hearing or to a parent or guardian of a Medicaid client if the parent or guardian is deaf or hard of hearing.

Physicians in private or group practices with fewer than 15 employees may be reimbursed for this service. The physician will be responsible for arranging and paying for the sign language interpreting services to facilitate the medical services being provided. The physician will then seek reimbursement from Texas Medicaid for providing this service.

Sign language interpreting services must be provided by an interpreter who possesses one of the following certification levels (i.e., levels A through H) issued by either the DARS, Office for Deaf and Hard of Hearing Services, Board for Evaluation of Interpreters (BEI) or the National Registry of Interpreters for the Deaf (RID).

Certification Levels:

- BEI Level I/Ii and BEI OC: B (Oral Certificate: Basic)
- BEI Basic and RID NIC (National Interpreter Certificate) Certified
- BEI Level II/IIi, RID CI (Certificate of Interpretation), RID CT (Certificate of Transliteration), RID IC (Interpretation Certificate), and RID TC (Transliteration Certificate)
- BEI Level III/IIIi, BEI OC: C (Oral Certificate: Comprehensive), BEI OC: V (Oral Certificate: Visible), RID CSC (Comprehensive Skills Certificate), RID IC/TC, RID CI/CT, RID RSC (Reverse Skills Certificate), and RID CDI (Certified Deaf Interpreter)
- BEI Advanced and RID NIC Advanced
- BEI IV/IVi, RID MCSC (Master Comprehensive Skills Certificate), and RID SC: L (Specialist Certificate: Legal)
- BEI V/VI
- BEI Master; and RID NIC Master

Interpreting services include the provision of voice-to-sign, sign-to-voice, gestural-to-sign, sign-to-gestural, voice-to-visual, visual-to-voice, sign-to-visual, or visual-to-sign services for communication access provided by a certified interpreter.

The physician requesting interpreting services must maintain documentation verifying the provision of interpreting services. Documentation of the service must be included in the client’s medical record and must include the name of the sign language interpreter and the interpreter’s certification level.

Documentation must be made available if requested by HHSC or its designee.

9.2.68 Skin Therapy

Skin therapy is a benefit of Texas Medicaid and may be reimbursed with the following procedure codes:

Procedure Codes									
15782	15783	15792	15793	17000	17003	17004	17106	17107	17108
17110	17111	17250	17260	17261	17262	17263	17264	17266	17270
17271	17272	17273	17274	17276	17280	17281	17282	17283	17284
17286	17311	17312	17313	17314	17315	17340	17999	11900	11901
96900	96910	96912	96913	96920	96921	96922	96999		

Claims for incision and drainage of acne when the diagnosis states there is infection or pustules may be paid.

Procedure codes 96900, 96910, 96912, 96913, 96920, 96921, and 96922 are covered benefits for the following diagnosis codes:

Diagnosis Codes									
0780	07812	0850	0851	0852	0853	0854	0855	0859	1032
20210	20211	20212	20213	20214	20215	20216	20217	20218	37453
69010	69011	69012	69018	6908	6910	6918	6920	6921	6922
6923	6924	6925	6926	69272	69273	69275	69281	69282	69283
69284	69289	6929	6930	6931	6938	6939	6940	6941	6942
6943	6944	6945	69460	69461	6948	6949	6953	6960	6961
6962	6963	6964	6965	6968	7060	7061	70901		

Intralesional injection(s) may be considered for reimbursement in addition to an office visit.

Procedure codes 11900 and 11901 are covered benefits for intralesional injections for the following diagnosis codes:

Diagnosis Codes									
0780	07812	0850	0851	0852	0853	0854	0855	0859	135
6953	6960	6961	6962	6963	6964	6965	6968	7014	7015
70583	7060	7061	9400	9401	9402	9403	9404	9405	9409
94100	94101	94102	94103	94104	94105	94106	94107	94108	94109
94110	94111	94112	94113	94114	94115	94116	94117	94118	94119
94120	94121	94122	94123	94124	94125	94126	94127	94128	94129
94130	94131	94132	94133	94134	94135	94136	94137	94138	94139
94140	94141	94142	94143	94144	94145	94146	94147	94148	94149
94150	94151	94152	94153	94154	94155	94156	94157	94158	94159
94200	94201	94202	94203	94204	94205	94209	94210	94211	94212
94213	94214	94215	94219	94220	94221	94222	94223	94224	94225
94229	94230	94231	94232	94233	94234	94235	94239	94240	94241
94242	94243	94244	94245	94249	94250	94251	94252	94253	94254
94255	94259	94300	94301	94302	94303	94304	94305	94306	94309
94310	94311	94312	94313	94314	94315	94316	94319	94320	94321
94322	94323	94324	94325	94326	94329	94330	94331	94332	94333
94334	94335	94336	94339	94340	94341	94342	94343	94344	94345
94346	94349	94350	94351	94352	94353	94354	94355	94356	94359
94400	94401	94402	94403	94404	94405	94406	94407	94408	94410
94411	94412	94413	94414	94415	94416	94417	94418	94420	94421
94422	94423	94424	94425	94426	94427	94428	94430	94431	94432
94433	94434	94435	94436	94437	94438	94440	94441	94442	94443
94444	94445	94446	94447	94448	94450	94451	94452	94453	94454
94455	94456	94457	94458	94500	94501	94502	94503	94504	94505
94506	94509	94510	94511	94512	94513	94514	94515	94516	94519
94520	94521	94522	94523	94524	94525	94526	94529	94530	94531

Diagnosis Codes									
94532	94533	94534	94535	94536	94539	94540	94541	94542	94543
94544	94545	94546	94549	94550	94551	94552	94553	94554	94555
94556	94559	9460	9461	9462	9463	9464	9465	9470	9471
9472	9473	9474	9478	9479	94800	94810	94811	94820	94821
94822	94830	94831	94832	94833	94840	94841	94842	94843	94844
94850	94851	94852	94853	94854	94855	94860	94861	94862	94863
94864	94865	94866	94870	94871	94872	94873	94874	94875	94876
94877	94880	94881	94882	94883	94884	94885	94886	94887	94888
94890	94891	94892	94893	94894	94895	94896	94897	94898	94899
9490	9491	9492	9493	9494	9495				

Procedure codes 15782, 15783, 15792, 15793, and 17999 require prior authorization. Requests for prior authorization must be submitted by the physician to the Special Medical Prior Authorization (SMPA) department with documentation supporting the medical necessity of the anticipated procedure. This documentation must remain in the client’s medical record and is subject to retrospective review. To avoid unnecessary denials, the physician must provide correct and complete information.

Dermabrasion procedures (procedure codes 15782 and 15783) and chemical peel procedures (procedure codes 15792 and 15793) may be prior authorized with documentation that the client meets all of the following criteria:

- A diagnosis of actinic keratosis with more than three lesions.
- Failed conservative treatment or documentation that conservative treatment is contraindicated.

Prior authorization requests for procedure code 17999 must include the following documentation:

- A clear, concise description of the procedure to be performed.
- Reason for recommending the particular procedure.
- Documentation that a specific procedure code is not available for the procedure requested.
- The client’s diagnosis.
- Medical records indicating prior treatment for the diagnosis and the medical necessity of the requested procedure.
- Place of service the procedure is to be performed.
- Documentation that the procedure is not investigational or experimental.
- The physician’s intended fee for the procedure including a comparable procedure code.

9.2.69 Sleep Studies

Sleep study procedure code 95806 is not a benefit of Texas Medicaid.

9.2.69.1 Actigraphy

Actigraphy (procedure code 95803) may be reimbursed in the office or outpatient hospital setting with a limit of one per day, and two per rolling year by any provider. Claims denied for more than two times per year may be appealed with documentation of medical necessity.

Actigraphy can be performed as a stand-alone procedure or as an adjunct to polysomnography or multiple sleep latency test (MSLT).

Actigraphy (procedure code 95803) must be billed with one of the following diagnosis codes:

Diagnosis Codes									
32700	32701	32702	32709	32710	32711	32712	32713	32714	32715
32719	32730	32731	32732	32733	32734	32735	32736	32737	32739
32751	33394	78052	78054	78055					

If the primary care physician performs the actigraphy, the technical component must be billed (procedure code 95803 with modifier TC).

Documentation of actigraphy must include a hard-copy printout or electronic file. Interpretation and treatment recommendations must be completed by a sleep specialist. The physician’s professional interpretation and report must include inspection of the entire recording and integration of the information gathered from other professionals’ analysis and observations. Documentation of the interpretation must be maintained by the interpreting physician.

Under the following conditions, actigraphy may be a useful adjunct to a detailed history, examination, and subjective sleep diary for the diagnosis and treatment of insomnia, circadian-rhythm disorders, and excessive sleepiness:

- When demonstration of multiday rest-activity patterns is necessary to diagnose, document severity, and guide the proper treatment.
- When more objective information regarding the day-to-day timing or the amount or patterns of a client’s sleep is necessary for optimal clinical decision-making.
- When the severity of a sleep disturbance reported by the client or caretaker seems inconsistent with clinical impressions or laboratory findings.
- To clarify the effects of, and under some instances, compliance with pharmacologic, behavioral, phototherapeutic, or chronotherapeutic treatment.
- In symptomatic clients for whom an accurate history cannot be obtained and at least one of the following is true:
 - A polysomnographic study has already been conducted.
 - A polysomnographic study is considered unlikely to be of much diagnostic benefit.
 - A polysomnographic study is not yet clearly indicated (because of the absence of accurate historical data).
 - A polysomnographic study is not immediately available.

Actigraphy may be useful in the assessment of specific aspects of the following disorders:

- Insomnia. Assessment of sleep variability, measurement of treatment effects, and detection of sleep phase alterations in insomnia secondary to circadian rhythm disturbance.
- Restless legs syndrome or periodic limb movement disorder. Assessment of treatment effects.

9.2.69.2 Pneumocardiograms

Pneumocardiograms (procedure code 95807) are limited to clients who are birth through 12 months of age.

Pneumocardiograms are limited to one per day, and two per rolling year by any provider. Claims denied for more than two times per year may be appealed with documentation of medical necessity.

Procedure code 95807 must be billed with one of the following diagnosis codes:

Diagnosis Codes									
32721	32723	32724	32725	32726	32727	77081	77082	77083	77084
77981	77982	7825	78603	78604	79902	79982			

Documentation of the complete readings associated with the pneumocardiogram and the physician’s interpretation must be maintained in the client’s medical record in a hard-copy printout or electronic file at the facility where the procedure is performed.

The physician’s interpretation and report must include inspection and integration of the information gathered from all physiological systems and other professionals’ analysis and observations.

9.2.69.3 Polysomnography

Polysomnography (procedure codes 95782, 95783, 95808, 95810, and 95811) is a benefit of Texas Medicaid.

Polysomnography is distinguished from sleep studies by the inclusion of sleep staging that includes a 1-to 4- lead electroencephalogram (EEG), electro-oculogram (EOG), and a limb or submental electro-myogram (EMG).

Additional parameters of sleep that are evaluated in polysomnography include, but are not limited to, the following:

- ECG
- Airflow (by thermistor or intra-nasal pressure monitoring)
- Respiratory effort
- Adequacy of oxygenation by oximetry or transcutaneous monitoring
- Extremity movement or motor activity
- EEG monitoring for sleep staging
- Nocturnal penile tumescence
- Esophageal pH or intraluminal pressure monitoring
- Continuous blood pressure monitoring
- Snoring
- Body positions
- Adequacy of ventilation by end-tidal or transcutaneous CO2 monitoring

For a sleep study to be reported as a polysomnography, sleep must be recorded and staged. Use the following procedure codes to bill for polysomnography studies: 95782, 95783, 95808, 95810, and 95811.

Polysomnography (procedure codes 95782, 95783, 95808, 95810, and 95811) is limited to one per day and two per rolling year by any provider and is allowed for the following diagnosis codes:

Diagnosis Codes									
27801	27803	29182	29285	30740	30741	30742	30743	30744	30745
30746	30747	30748	32700	32701	32702	32710	32711	32712	32713
32715	32719	32720	32721	32722	32723	32724	32725	32726	32727
32729	32730	32731	32732	32733	32734	32735	32736	32737	32739
32740	32741	32742	32743	32744	32749	32751	32752	32753	32759

Diagnosis Codes									
3278	33394	3350	33511	33519	33520	34120	3439	34400	34700
34701	34710	34711	3481	3590	3591	47410	51883	60784	7428
7483	7560	7564	78050	78051	78052	78053	78054	78055	78056
78057	78058	78059	78603	79902					

Claims denied for more than two times per year may be appealed with documentation of medical necessity.

Documentation of the polysomnography testing must be maintained in the client’s medical record at the sleep facility and include approximately 1,000 pages or the electronically-stored equivalent of data during a single nighttime recording. Each record must be for sleep-wake states and stages, cardiac arrhythmias, respiratory events, motor activity, oxygen desaturations, and behavioral observations.

Documentation must also include the technologist’s analysis and report, the patient’s subjective report, and the influence of intervention applied during the night.

Interpretation and treatment recommendations must be completed by a sleep specialist. The physician’s professional interpretation and report must include inspection of the entire recording, examination of the technologist’s analysis and observations, and integration of the information gathered from all physiological systems. Documentation of the interpretation must be maintained in the sleep facility and by the interpreting physician.

9.2.69.4 Multiple Sleep Latency Test (MSLT)

Multiple sleep latency test (procedure code 95805) is limited to one per day and two per rolling year by any provider, and is restricted to the following diagnosis codes:

Diagnosis Codes									
27803	32700	32701	32702	32709	32743	32751	33394	34700	34701
34710	34711	78053							

Claims denied for more than two times per year may be appealed with documentation of medical necessity.

Documentation of MSLT must be maintained in the client’s medical record at the sleep facility and include a hard copy or electronic copy of four to five 20-minute recordings of sleep-wake states and stages spaced at two-hour intervals throughout the day, taking approximately seven to nine hours to complete. In addition, documentation must include the physiological recordings typically made during daytime testing. These typically include:

- EEG
- Electro-oculogram (EOG)
- EMG
- EKG
- Audio and video recordings made during the monitored portion of the day

Documentation must also include the technologist’s analysis and report, the client’s subjective report, and the influence of intervention applied during the night.

Interpretation and treatment recommendations must be completed by a sleep specialist. The physician's interpretation and report must include inspection of the entire recording, examination of the technologist's analysis and observations, and integration of the information gathered from all physiological systems. Documentation of the interpretation must be maintained in the sleep facility and by the interpreting physician.

MSLT procedure code 95805 must be performed in conjunction with polysomnography procedure code 95782, 95783, 95808, 95810, or 95811. Polysomnography must be performed on the date before MSLT. MSLT that is not performed in conjunction with polysomnography will be denied, but may be considered on appeal with documentation that explains why the polysomnography did not occur.

9.2.69.5 Home Sleep Study Test

Home sleep study tests are unattended studies that are performed in the client's home using a portable monitoring device. The portable monitoring device must meet American Academy of Sleep Medicine (AASM) practice parameters and clinical guidelines.

Home sleep study testing is a benefit of Texas Medicaid only when performed in conjunction with a comprehensive sleep evaluation that has been performed by a physician who is board-certified or board-eligible, as outlined in the AASM guidelines. Documentation of the comprehensive sleep evaluation must be kept in the client's medical record. The evaluation must indicate probability of moderate to severe obstructive sleep apnea to support medical necessity for home sleep study testing.

Procedure codes G0398, G0399, and G0400 are a benefit for Texas Medicaid clients who are 18 years of age and older with suspected or proven simple, uncomplicated obstructive sleep apnea. Procedure codes G0398, G0399, and G0400 are restricted to diagnosis code 32723.

Home sleep study tests are payable to physicians in the office setting. Procedure codes G0398, G0399, and G0400 are limited to one per day and a combined total of two tests per rolling year, with any provider. If a client needs more than two tests in a rolling year, subsequent tests must be performed in a sleep facility.

9.2.69.6 Sleep Facility Restrictions for Polysomnography and Multiple Sleep Latency Testing

Sleep facilities that perform services for Medicaid clients must be accredited with the AASM or the Joint Commission of Accreditation of Healthcare Organizations (JCAHO). Sleep facilities must maintain documentation with proof that the facility is accredited. Documentation is subject to retrospective review. Sleep facilities that perform services for Texas Medicaid clients must also follow current AASM practice parameters and clinical guidelines.

Physicians who provide supervision in sleep facilities must be board-certified or board-eligible, as outlined in the AASM guidelines.

Sleep facility technicians, technologists, and trainees must demonstrate that they have the skills, competencies, education, and experience that are set forth by their certifying agencies and AASM as necessary for advancement in the profession.

Polysomnographic technologists, technicians, and trainees must meet the following supervision requirements:

- A polysomnographic trainee provides basic polysomnographic testing and associated interventions under the direct supervision of a polysomnographic technician, polysomnographic technologist, or a physician.

Note: *Direct supervision means that the supervising licensed/certified professional must be present in the office suite or building and immediately available to furnish assistance and direction throughout the performance of the service. It does not mean that the supervising professional must be present in the room while the service is provided.*

- A polysomnographic technologist provides comprehensive evaluation and treatment of sleep disorders under the general supervision of the clinical director (MD or DO).
- A polysomnographic technician provides comprehensive polysomnographic testing and analysis and associated interventions under the general supervision of a polysomnographic technologist or clinical director (MD or DO).
- The supervising physician must be readily available to the performing technologist throughout the duration of the study, but is not required to be in the building.

The sleep facility must have one or more supervising physicians who are responsible for the direct and ongoing oversight of the quality of the testing performed, the proper operation and calibration of equipment used to perform tests, and the qualifications of the nonphysician staff who use the equipment.

Services provided without the required level of supervision are not considered medically appropriate and will be recouped upon retrospective record review.

Claims denied for more than two times per year may be appealed with documentation of medical necessity.

Documentation of MSLT must be maintained in the client's medical record at the sleep facility and include a hard copy or electronic copy of four to five, 20-minute recordings of sleep-wake states and stages spaced at two-hour intervals throughout the day, taking approximately seven to nine hours to complete. In addition, documentation must include the physiological recordings typically made during daytime testing. These typically include:

- EEG
- Electro-oculogram (EOG)
- EMG
- EKG
- Audio and video recordings made during the monitored portion of the day

Documentation must also include the technologist's analysis and report, the client's subjective report, and the influence of intervention applied during the night.

Interpretation and treatment recommendations must be completed by a sleep specialist. The physician's interpretation and report must include inspection of the entire recording, examination of the technologist's analysis and observations, and integration of the information gathered from all physiological systems. Documentation of the interpretation must be maintained in the sleep facility and by the interpreting physician.

MSLT procedure code 95805 must be performed in conjunction with polysomnography procedure code 95808, 95810, or 95811. Polysomnography must be performed on the date before MSLT. MSLT that is not performed in conjunction with polysomnography will be denied, but may be considered on appeal with documentation that explains why the polysomnography did not occur.

9.2.70 Speech Therapy (ST) Services

Speech therapy (ST) is a payable benefit to physicians.

Refer to: Section 4, "Therapists, Independent Practitioners, and Physicians" in the *Nursing and Therapy Services Handbook (Vol. 2, Provider Handbooks)* for information about speech therapy services provided by a physician.

9.2.71 Surgery Billing Guidelines

9.2.71.1 Primary Surgeon

A primary surgeon may be reimbursed for services provided in the inpatient hospital, outpatient hospital setting, and ASC/HASC Center.

A surgeon billing for a surgery and an assistant surgery fee on the same day may be reimbursed if two separate procedures are performed.

Refer to: Subsection 9.2.71.7, “Multiple Surgeries,” in this handbook.

9.2.71.2 Anesthesia Administered by Surgeon

If the physician bills for a surgical procedure and anesthesia for the same procedure, the surgery is paid and the anesthesia is denied as part of the surgical procedure. The exception to this policy is an epidural during labor and delivery.

Refer to: Subsection 9.2.6, “Anesthesia,” in this handbook.

9.2.71.3 Assistant Surgeon

Assistant surgeons may be reimbursed 16 percent of the TMRM fee for the surgical procedures performed.

Medicaid follows the TEFRA regulations for assistant surgeons in teaching hospitals. TEFRA states that an assistant surgeon will not be paid in a hospital classified by Medicare as a teaching facility with an approved graduate training program in the performing physician’s specialty. Medicaid may consider reimbursement for an assistant surgeon at a teaching hospital classified by Medicare as a teaching facility with approved graduate training program if one of the following situations is present and documented on the claim:

- No qualified resident was available. (Modifier 82 may be used to document this exception.)
- There were exceptional medical circumstances such as an emergency or life-threatening situation requiring immediate attention (modifiers 80 and KX).
- The primary surgeon has a policy of never, without exception, involving a resident in the preoperative, operative, or postoperative care of a patient (modifiers 80 and KX).
- The surgical procedure was complex and required a team of physicians (modifiers 80 and KX).

Use of these modifiers is not required but expedites claims processing. Therefore, it is *recommended* that these modifiers be used in conjunction with the procedure code rather than a narrative statement when these specific circumstances exist.

All claims for assistant surgeon services must include in Block 32 of the CMS-1500 paper claim form the name, address, and provider identifier of the hospital in which the surgery was performed. If the physician seeks an exception to this TEFRA regulation based on unavailability of a qualified resident, the following certification statement must appear on or attached to the claim form:

“I understand that section 1842(b)(6)(D) of the *Social Security Act* generally prohibits reasonable charge payment for the services of assistants at surgery in teaching hospitals when qualified residents are available to furnish such services. I certify that the services for which payment is claimed were medically necessary, and that no qualified residents were available to perform the services. I further understand that these services are subject to postpayment review by TMHP.”

Surgical procedures that do not ordinarily require the services of an assistant, as identified by Medicare, are denied when billed as an assistant surgery. One assistant surgeon is reimbursed for surgical procedures when appropriate.

Use modifier AS when the physician assistant is not enrolled as an individual provider and provides assistance at surgery. The claim must include the PA’s name and license number. Only procedures currently allowed for assistant surgeons are payable.

PAs actively enrolled as a Medicaid provider with an assigned provider identifier may bill assistant surgery services on a separate claim form using the PA’s individual provider identifier and modifiers U7 and 80.

9.2.71.4 Bilateral Procedures

When a bilateral procedure is performed and an appropriate bilateral code is not available, a unilateral code must be used. The unilateral code must be billed twice with a quantity of 1 for each code. For all procedures, use modifiers LT (left) and RT (right) as appropriate. For example, bilateral application of short leg cast is billed as follows:

Procedure Code	Modifier
29405	LT
29405	RT

9.2.71.5 Cosurgery

Cosurgery (two surgeons) may be reimbursed when the skills of two surgeons (usually with different skills) are required in the management of a specific surgical procedure. Cosurgery is for a surgery where the two surgeons’ separate contributions to the successful outcome of the procedure are considered to be of equal importance.

Note: No additional reimbursement will be made for an assistant surgeon.

Cosurgeons may be reimbursed for surgical procedure codes that are billed with modifier 62 if the CMS fee schedule indicates that the procedure allows for cosurgeons. Claims will not suspend for manual review of the documentation of medical necessity. Reimbursement will be calculated at 62.5 percent of the amount allowed for the intraoperative portion of the surgical procedure’s fee.

No cosurgery payment is made for claims submitted without modifier 62. In instances where the surgeons do not use modifier 62, the first claim received at TMHP for the service is considered that of the primary surgeon, and the subsequent claim is denied as a previously paid service.

9.2.71.6 Global Fees

Texas Medicaid uses global surgical periods to determine reimbursement for services that are related to surgical procedures. The following services are included in the global surgical period:

- Preoperative care, including history and physical
- Hospital admission work-up
- Anesthesia (when administered and monitored by the primary surgeon)
- Surgical procedure (intraoperative)
- Postoperative follow-up and related services
- Complications following the surgical procedure that do not require return trips to the operating room

Texas Medicaid adheres to a global fee concept for minor and major surgeries and invasive diagnostic procedures. Global surgical periods are defined as follows:

- 0-day Global Period-Reimbursement includes the surgical procedure and all associated services that are provided on the same day.

- 10-day Global Period-Reimbursement includes the surgical procedure, any associated services that are provided on the same day of the surgery, and any associated services that are provided for up to 10 days following the date of the surgical procedure.
- 90-day Global Period-Reimbursement includes the surgical procedure, preoperative services that are provided on the day before the surgical procedure, any associated services that are provided on the same day of the surgery, and any associated services that are provided for up to 90 days following the date of the surgical procedure.

Procedure codes that are designated as “Carrier Discretion” will have their global periods determined by HHSC.

The global surgical fee period applies to both emergency and nonemergency surgical procedures. Physicians who are in the same group practice and specialty must bill, and are reimbursed, as if they were a single provider.

Modifiers

For services that are rendered in the preoperative, intraoperative, or postoperative period to be correctly reimbursed, providers must use the appropriate modifiers from the following table. Failure to use the appropriate modifier may result in recoupment.

Modifiers Related to Surgical Fees					
24	25	54	55	56	57
58	62	76	77	78	79

For services that are billed with modifier 54, 55, or 56, medical record documentation must be maintained by both the surgeon and the physician who provides preoperative or postoperative care. Reimbursement for claims associated with modifier 54, 55, or 56 is limited to the same total amount as would have been paid if only one physician provided all of the care, regardless of the number of physicians who actually provide the care.

If a physician provided all of the preoperative, intraoperative, and postoperative care, claims may be considered for reimbursement when they are submitted without a modifier.

Documentation Requirements

For services that are billed with any of the listed modifiers to be considered for reimbursement, providers must maintain documentation in the client’s medical record that supports the medical necessity of the services. Acceptable documentation includes, but is not limited to, progress notes, operative reports, laboratory reports, and hospital records.

On a case-by-case basis, providers may be required to submit additional documentation that supports the medical necessity of services before the claim will be reimbursed.

***Note:** Retrospective review may be performed to ensure that the submitted documentation supports the medical necessity of the surgical procedure and any modifier used to bill the claim.*

Preoperative Services

Preoperative physician E/M services (such as office or hospital visits) that are directly related to the planned surgical procedure and provided during the preoperative limitation period will be denied if they are billed by the surgeon or anesthesiologist who was involved in the surgical procedure.

Reimbursement will be considered when the E/M services are performed for distinct reasons that are unrelated to the procedure. E/M services that meet the definition of a significant, separately identifiable service may be billed with modifier 25 if they are provided on the same day by the same provider as the surgical procedure.

Modifier 25 is not used to report an E/M service that results in a decision to perform a surgical procedure. Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client's medical record and made available to Texas Medicaid upon request. If the decision to perform a minor procedure is made during an E/M visit immediately before the surgical procedure, the E/M visit is considered a routine preoperative service and is not separately billable.

Physicians who provide only preoperative services for surgical procedures with a 10- or 90-day global period may submit claims using the surgical procedure code with the identifying modifier 56. Reimbursement will be limited to a percentage of the fee for the surgical procedure.

E/M services that are provided during the preoperative period (one day before or the same day) of a major surgical procedure (90-day global period) and result in the initial decision to perform the surgical procedure may be considered for reimbursement when billed with modifier 57. The client's medical record must clearly indicate when the initial decision to perform the procedure was made.

Intraoperative Services

Physicians who perform a surgical procedure with a 10- or 90-day global period but do not render postoperative services must bill the surgical procedure code with modifier 54. Modifier 54 indicates that the surgeon provided the surgical care only. Documentation in the medical record must support the transfer of care and must indicate that an agreement has been made with another physician to provide the postoperative management.

Postoperative Services

Postoperative services that are directly related to the surgical procedure are included in the global surgical fee and are not reimbursed separately. Postoperative services include, but are not limited to, all of the following:

- Postoperative follow-up visits (any place of service)
- Postoperative pain management
- Miscellaneous services, including:
 - Dressing changes
 - Local incision care
 - Platelet gel
 - Removal of operative packs
 - Removal of cutaneous sutures, staples, lines, wires, drains, casts, or splints
 - Replacement of vascular access lines
 - Insertion, irrigation, and removal of urinary catheters, routine peripheral intravenous lines, nasogastric tubes, and rectal tubes
 - Changes or removal of tracheostomy tubes

Note: *Removal of postoperative dressings or anesthetic devices is not eligible for separate reimbursement as the removal is considered part of the allowance for the primary surgical procedure.*

If the surgeon provides the surgery and only the postoperative care for a procedure that has a 10- or 90-day global period, the surgeon must include the following details on the claim form:

- The surgical procedure, date of the surgery, and modifier 54, which indicates that he or she was the surgeon.

- The surgical procedure, date of service, and modifier 55 to denote the postoperative care.
Note: Providers must not submit a claim for the postoperative care until after the client has been seen during a face-to-face follow-up visit.

When a transfer of care occurs for postoperative care for procedures that have a 10- or 90-day global period, the following conditions apply:

- When transfer of care occurs immediately after surgery, the surgeon or other provider assuming in-hospital postoperative care must bill subsequent care procedure code 99231, 99232, or 99233.
- When the transfer of care occurs after hospital discharge, the surgeon or other provider who provides postdischarge care must bill the appropriate surgical code with modifier 55. Reimbursement will be limited to a percentage of the allowable fee for the surgical procedure.
- Documentation in the medical record must include all of the following:
 - A copy of the written transfer agreement.
 - The dates the care was assumed and relinquished.
- The claim must indicate in the comments field of the claim form the dates on which care was assumed and relinquished, and the units field must reflect the total number of postoperative care days provided. Claims that are submitted on the CMS-1500 paper claim form must include the date of surgery in Block 14 and the dates on which care was assumed and relinquished in Block 19.

Staged or related surgical procedures or services that are performed during the postoperative period may be reimbursed when they are billed with modifier 58. A postoperative period will be assigned to the subsequent procedure. Documentation must indicate that the subsequent procedure or service was not the result of a complication and any of the following:

- It was planned at the time of the initial surgical procedure.
- It is more extensive than the initial surgical procedure.
- It is for therapy following an invasive diagnostic surgical procedure.

Note: Modifier 58 does not apply to procedure codes that are already defined as staged or sessioned services in the Current Procedural Terminology (CPT) Manual (e.g., 65855 or 66821).

Hospital visits by the surgeon during the same hospitalization as the surgery are considered to be related to the surgery and, as a result, not separately billable; however, separate payment for such visits can be allowed if any of the following conditions apply:

- Immunotherapy management is provided by the transplant surgeon. Immunosuppressant therapy following transplant surgery is covered separately from other postoperative services, so postoperative immunosuppressant therapy is not part of the global fee allowance for the transplant surgery. This coverage applies regardless of the setting.
- Critical care is provided by the surgeon for a burn or trauma patient.
- The hospital visit is for a diagnosis that is unrelated to the original surgery.

E/M services that are provided by the same provider for reasons that are unrelated to the operative surgical procedure may be considered for reimbursement if they are billed with modifier 24. The submitted documentation must substantiate the reasons for providing E/M services.

- Modifier 24 may be billed with modifier 25 if a significant, separately identifiable E/M service that was performed on the day of a procedure falls within the postoperative period of another unrelated procedure.
- Modifier 24 may be billed with modifier 57 if an E/M service that was performed within the postoperative period of another unrelated procedure results in the decision to perform major surgery.

Return Trips to the Operating Room

Return trips to the operating room for a repeat surgical procedure on the same part of the body may be considered for reimbursement when billed with modifiers 76 and 77. Billing with modifier 76 or 77 initiates the beginning of a new global period. Medical record documentation must support the need for a repeat procedure.

All surgical procedure codes with a predefined limitation (e.g., once per lifetime, one every 5 years) must not be submitted with modifier 76 or 77.

For modifiers 76 and 77, the repeated procedure must be the same as the initial surgical procedure. The repeat procedure must be billed with the appropriate modifier. The reason for the repeat surgical procedure should be entered in the narrative field on the claim form.

Return trips to the operating room for surgical procedures that are related to the initial surgery (i.e., complications) may be considered for reimbursement when they are billed with modifier 78 by the same provider.

- When a surgical procedure has a 0-day global period, the full value of the surgical procedure will be reimbursed; when the procedure has a 10- or 90-day global period only the intraoperative portion will be reimbursed.
- When an unlisted procedure is billed because no code exists to describe the treatment for the complications, reimbursement is a maximum of 50 percent of the value of the intraoperative services that were originally performed.

Reimbursement for the postoperative period of the first surgical procedure includes follow-up services from both surgical procedures, and no additional postoperative reimbursement is allotted. The global period will be based on the first surgical procedure.

Billing with modifier 78 does not begin a new global period.

Surgical procedures that are performed by the same provider during the postoperative period may be considered for reimbursement when they are billed with modifier 79 for any of the following:

- When the same procedure is performed with a different diagnosis.
- When the same procedure is performed on the left and right side of the body in different operative sessions and that procedure is billed with the RT or LT modifier.
- When a different procedure is performed with the same diagnosis.
- When a different procedure is performed with a different diagnosis.

Billing with modifier 79 initiates a new global surgical period.

9.2.71.7 Multiple Surgeries

Medicaid payment for multiple surgeries is based on the following guidelines:

- When two surgical procedures are performed on the same day at the same operative session, the primary procedure (such as the higher paying procedure) is paid at the full TMRM allowance. Secondary procedures performed on the same day are paid at half of the TMRM allowance when medically justified.
- Surgical procedures performed at different operative sessions on the same day are paid at the full TMRM allowance for each primary procedure at each session.
- Vaginal deliveries followed by tubal ligations are considered different operative sessions and are paid at full allowance for each primary procedure at a different session (i.e., both vaginal delivery and tubal ligation are paid at full allowance).
- Procedure code 58611 performed in conjunction with a Cesarean section is reimbursed at full allowance in cases where the allowance already represents half of the primary procedure.

- When a surgical procedure and a biopsy on the same organ or structure is done on the same day, the charges will be reviewed and reimbursement will be made only for the service with the higher of the allowed amounts.

9.2.71.8 Office Procedures

CMS has identified certain surgical procedures that are more appropriately performed in the office setting rather than as outpatient hospital, ASC/HASC procedures. The following list of surgical procedure codes should be billed in POS 1 (physician’s office). The medical necessity and/or special circumstances that dictate that these surgical procedures be performed in a POS other than the office must be documented on the claim. These surgical procedures are evaluated on a retrospective basis that may cause recoupment and/or adjustment of the original claim payment. This list is not all inclusive.

Procedure Codes		
Excision benign lesions	Excision malignant lesions	Manipulation (urethral)
11400	11600	53600
11401	11601	53601
11402	11602	53620
11403	11603	53621
11404	11604	53660
11420	11620	53661
11421	11621	
11422	11622	
11423	11623	
11440	11624	
11441	11640	
11442	11641	
11443	11642	
11444	11643	
	11644	
Simple repairs	Endoscopy	Biopsy (tongue)
28010	31505	41100
28011		
Lesions (penile)	Lesions (eyelid)	
54060	67801	

9.2.71.9 Orthopedic Hardware

Reimbursement for the orthopedic hardware (e.g., buried wire, pin, screw, metal band, nail, rod, or plate) is part of the surgeon’s global fee or the facility’s payment group. The hardware is not reimbursed separately to either the surgeon or the facility.

The removal of orthopedic hardware is not payable to the same provider who inserted it, if removed within the global operative care period of the original insertion.

Services for removal of orthopedic hardware may be reimbursed separately after the global post operative care period.

9.2.71.10 Second Opinions

Texas Medicaid benefits include payment to physicians when eligible clients request second opinions about specific problems. The claim must be coded with the appropriate office or hospital visit codes, and the notation “Client Initiated Second Opinion” should be identified in Block 24D of the CMS-1500 paper claim form.

Refer to: Subsection 9.2.59.1.3, “Consultation Services,” in this handbook.

9.2.71.11 Supplies, Trays, and Drugs

Payment to physicians for supplies is not allowed under Texas Medicaid. All supplies, including anesthetizing agents, inhalants, surgical trays, or dressings are included in the surgical payment on the day of surgery when the surgery is performed in the office or home setting.

Reimbursement for office visits includes overhead for supplies. If any of these items are submitted separately, they are denied as included in the surgical fee. If the supplies are submitted with a place of service (POS) other than the office, these supplies are denied as services that must be billed by the hospital, or as services that are included in nursing facility charges.

Silver nitrate applicators, used to treat granulated tissue around gastrostomy tubes and tracheostomies, are considered part of the office/hospital visit. Silver nitrate applicators are not a benefit for home use.

9.2.72 Telemedicine Services

Telemedicine services are a benefit of Texas Medicaid.

Refer to: The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for information about telemedicine services.

9.2.73 Therapeutic Apheresis

The following conditions must be met for therapeutic apheresis:

- To perform the medical services, including all nonphysician services, and to respond to medical emergencies at all times during client care, direct supervision by a physician is required.
- Each client must be under the care of a physician.

Procedure codes 36511, 36512, 36513, 36514, 36515, and 36516 are limited to the following diagnosis codes:

Diagnosis Codes									
20300	20302	20310	20311	20312	20380	20381	20382	20400	20401
20402	20410	20411	20412	20420	20421	20422	20480	20481	20482
20490	20491	20492	20500	20501	20502	20510	20511	20512	20520
20521	20522	20530	20531	20532	20580	20581	20582	20590	20591
20592	20600	20601	20602	20610	20611	20612	20620	20621	20622
20680	20681	20682	20690	20691	20692	20700	20701	20702	20710
20711	20712	20720	20721	20722	20780	20781	20782	20800	20801
20802	20810	20811	20812	20820	20821	20822	20880	20881	20882
20890	20891	20892	2384	23871	2720	2730	2731	2733	28260
28261	28262	28263	28264	28268	28269	2828	2830	28310	28311
28319	2863	28652	2866	2870	2871	2872	28730	28731	28732
28733	28739	2875	2878	2879	2884	28869	2890	28951	28952
2896	2897	28981	28989	2899	3564	3570	3571	3572	3573

Diagnosis Codes									
3574	3575	3576	3577	35781	35782	35789	35800	35801	35831
390	3918	44620	44621	44629	4466	4476	4478	570	5718
5724	5731	5732	5733	57431	57441	5800	5804	5810	5811
5812	5813	58181	58189	5819	5820	5821	5822	5824	5830
5831	5832	5834	5836	5837	58381	58389	5839	6944	7010
7100	7101	7103	7104	7140	7141	7142	71430	71431	71432
71433	99680								

Procedure codes 36515 and 36516 may be considered for reimbursement when billed for the low density lipoprotein (LDL) apheresis (such as *Liposorber LA 15*) or the protein A immunoabsorption (such as *Prosorba*) columns.

The protein A immunoabsorption column is indicated for use in either of the following cases:

- Clients who have a platelet count of less than 100,000 mm³.
- Adult clients who have signs and symptoms of moderate to severe rheumatoid arthritis with long-standing disease who have failed, or are intolerant to, DMARDs.

The LDL apheresis column is indicated for use in clients who have severe familial hypercholesterolemia whose cholesterol levels remain elevated despite a strict diet and ineffective or intolerated maximum drug therapy. Coverage is considered for the following high-risk population, for whom diet has been ineffective and maximum drug therapy has either been ineffective or not tolerated:

- Functional hypercholesterolemia homozygotes with LDL-C > 500 mg/dL.
- Functional hypercholesterolemia heterozygotes with LDL-C > 300 mg/dL.
- Functional hypercholesterolemia heterozygotes with LDL-C > 200 mg/dL and documented coronary heart disease.

Baseline LDL-C levels are to be obtained after the client has had, at a minimum, a six-month trial on an American Heart Association (AHA) Step II diet or equivalent and maximum tolerated combination drug therapy designed to reduce LDL-C. Baseline lipid levels are to be obtained during a two- to four-week period and should be within 10 percent of each other, indicating a stable condition.

Therapeutic apheresis using the LDL apheresis column may be reimbursed for diagnosis code 2720.

Apheresis services represents one 30-minute time interval of personal physician involvement in the apheresis. Apheresis is limited to three 30-minute time intervals per procedure. The actual time must be reflected on the claim, or a unit of 1, 2, or 3 must be indicated. If the time (or unit) is not indicated, payment is based on one 30-minute time interval.

Apheresis is denied for all other diagnosis codes. Other diagnosis codes can be reviewed by the TMHP Medical Director or designee on appeal with documentation of medical necessity.

Laboratory work before and during the apheresis procedure is covered when apheresis is performed in the outpatient setting (POS 5). Laboratory work billed in conjunction with apheresis performed in the inpatient setting (POS 3) is included in the DRG reimbursement and is not paid separately.

9.2.74 Therapeutic Phlebotomy

Therapeutic phlebotomy is a treatment whereby a prescribed amount of blood is withdrawn for medical reasons. Conditions that cause an elevation of the red blood cell volume or disorders that cause the body to accumulate too much iron may be treated by therapeutic phlebotomy.

Therapeutic phlebotomy is a benefit of Texas Medicaid and may be billed using procedure code 99195. This procedure code should be used only for the therapeutic form of phlebotomy and not for diagnostic reasons.

Reimbursement of therapeutic phlebotomy is limited to the following diagnosis codes:

Diagnosis Codes									
2384	27501	27503	27509	2771	2859	2890	2896	7764	

Therapeutic phlebotomy will autodeney for all other diagnosis codes.

9.2.75 Therapeutic Radiopharmaceuticals

Therapeutic radiopharmaceuticals, when used for therapeutic treatment, are a benefit of Texas Medicaid.

The following procedure codes may be submitted for therapeutic radiopharmaceuticals:

Procedure Codes									
79403	A9542	A9543	A9544	A9545	A9563	A9564	A9600	A9699	G3001

9.2.75.1 Prior Authorization for Therapeutic Radiopharmaceuticals

Prior authorization is not required for therapeutic radiopharmaceuticals except for tositumomab or ibritumomab tiuxetan.

Tositumomab or ibritumomab tiuxetan may be prior authorized when all of the following criteria are met:

- Client has a diagnosis of either a low-grade follicular or transformed B-cell non-Hodgkin’s lymphoma.
- Client has failed, relapsed, or become refractory to conventional chemotherapy and the following is documented:
 - Marrow involvement is less than 26 percent.
 - Platelet count is 100,000 cell/mm³ or greater.
 - Neutrophil count is 1,500 cell/mm³ or greater.
- Client has failed a trial of rituximab.

Prior authorization must be submitted through Special Medical Prior Authorization department.

Only one tositumomab or ibritumomab tiuxetan (procedure codes A9542, A9543, A9544, and A9545) may be prior authorized and reimbursed once per lifetime, any provider with diagnosis code 20280.

9.2.75.2 Other Limitations on Therapeutic Radiopharmaceuticals

Strontium-89 chloride (procedure code A9600) may be reimbursed when submitted with diagnosis code 1985.

Strontium-89 chloride is limited to a total of 10 mci intravenously injected every 90 days, any provider, and may be reimbursed one per day same provider.

Sodium phosphate P-32, therapeutic (procedure code A9563) may be reimbursed when submitted with the following diagnosis codes:

Diagnosis Codes									
1985	20410	20412	20422	20492	20510	20512	20522	20582	20592
20812	20822	20882	20892	2384					

Chromic phosphate P-32 suspension (procedure code A9564) may be reimbursed when submitted with diagnosis codes 1972 and 1976.

An appropriate modifier may be used when billing for services more than once per day, same provider.

9.2.76 Urethral Dilation

If urethral dilation (procedure code 53600, 53601, 53605, 53620, 53621, 53660, 53661, or 53665) is billed on the same date of service by the same provider as procedure code 52000, the charges will be combined and processed as procedure code 52281.

Urethral dilation will be denied when billed on the same date of service by the same provider as any other cystoscopy.

9.2.77 Ventilation Assist and Management for the Inpatient

Use the following procedure codes and guidelines for reimbursement of ventilation assist and management: 94002 and 94003. Procedure codes 94002 and 94003 may be reimbursed only when the client is in observation or inpatient status. Respiratory care billed in any other POS will be denied.

Use the ventilation assist and management subsequent code (procedure code 94003) when respiratory support must be established for a patient in the postoperative period in the hospital (POS 3). Subsequent days of ventilation assistance are payable when documentation indicates a respiratory problem.

When the use of a ventilator is required as part of a major surgery, initial ventilation assist and management will be denied. It should be billed as ventilation assist and management subsequent procedure code 94003.

Procedure codes 94002 and 94003 apply only to hospital care for critically ill patients. They do not apply to routine recovery room ventilation services. Separate support service charges billed on the same day as ventilatory support are denied (for example, arterial or venous punctures; interpretations of arterial blood gases; or pulmonary function tests and management of the hemodynamic functions of the patient).

Use ventilation assist and management and initiation of pressure or volume preset ventilators for assisted or controlled breathing—first day (procedure code 94002) when respiratory support must be established for a patient. It is a *one-time charge* per hospitalization that may be paid when the claim documents that a respiratory problem exists (for example, respiratory distress, asphyxia). After the first day, use subsequent days (procedure code 94003).

9.2.78 Wearable Cardiac Defibrillator (WCD)

A WCD (procedure codes 93292, 93745, and K0606) are a benefit of Texas Medicaid.

The rental of a WCD (procedure code K0606) is limited to once per month and must be submitted with modifier RR.

Modifier 25 may be used to identify a significant separately identifiable evaluation and management service performed (for example, different diagnosis) on the same day as the initial set up of a WCD by the same provider for the same client. Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client's medical record and made available to Texas Medicaid upon request.

Procedure code 93292 will be denied as part of procedure code 93745 when submitted on the same date of service by any provider.

Procedure codes 93000, 93005, 93010, 93040, 93041, and 93042 will be denied as part of procedure code 93745 when submitted on the same date of service by any provider.

9.2.78.1 Prior Authorization for WCD

Prior authorization is required for the rental of WCD (procedure code K0606).

The WCD may be prior authorized for clients at high-risk of sudden cardiac arrest who meets one of the following criteria:

- Has completed electrophysiologic studies to determine the type of arrhythmia present and confirm that a wearable cardiac defibrillator is the best course of treatment.
- Is contraindicated for an implantable cardiac defibrillator (ICD) at the current time, such as with a systemic infection.
- Is waiting for ICD implantation.
- Is waiting for ICD implantation and is undergoing treatment for a systemic infection.
- Has had an ICD explantation due to pocket infection.
- Is waiting for heart transplantation.
- Has self-limiting arrhythmias from iatrogenic (drug loading with potentially pro-arrhythmic medications) or other causes.
- Has a familial or inherited condition with a high risk of life-threatening ventricular tachyarrhythmias, such as long QT syndrome or hypertrophic cardiomyopathy.
- Has had either documented prior myocardial infarction or dilated cardiomyopathy and a measured left ventricular ejection fraction (LVEF) less than or equal to 35 percent.
- Has received a documented diagnosis of any one of the following conditions:
 - Clinically inducible hemodynamically significant ventricular tachycardia (HSVT) or ventricular fibrillation (VF), where drug treatment has been ineffective, or the side effects of the medication used to treat the arrhythmia are intolerable.
 - Inducible VT or VF despite endocardial ablation or surgical excision when drug therapy has failed.
 - VF or syncopal ventricular tachycardia.
 - Specific ST-T wave changes, borderline CPK-MB isoenzymes, and dangerous ventricular arrhythmias are exhibited in a postmyocardial infarction patient.
 - VT caused by ischemic heart disease not associated with an acute myocardial infarction, and where drug therapy or surgical therapy has failed.
 - Recurrent syncope of undetermined etiology in a patient with HSVT or VF induced by EPS in whom no effective or tolerated drug is available or appropriate. Symptoms must be linked to HSVT or VF.
 - Recurrent syncope of undetermined etiology with positive EPS studies where ventricular arrhythmia is documented as the cause.
 - Palliative treatment for VT or VF in clients awaiting heart transplant.

The WCD is contraindicated in clients with an active ICD and should not be used in clients who meet the following criteria:

- Have a vision or hearing problem that may interfere with the perception of alarms or messages from the WCD.
- Is taking medications that would interfere with responding to the alarms or message from the WCD by depressing buttons.
- Is unwilling or unable to wear the device continuously, except when bathing or showering.
- Is pregnant or breastfeeding.

- Is of childbearing age and is not attempting to prevent pregnancy.

The WCD is considered investigational and not medically necessary for all other indications, including but not limited to, the following:

- Clients with drug-refractory class IV congestive heart failure who is not candidates for heart transplantation.
- Clients who have a history of psychiatric disorders that interfere with the necessary care and follow-up.
- Clients in whom a reversible triggering factor for VT/VF can be definitely identified, such as ventricular tachyarrhythmias in evolving acute myocardial infarction or electrolyte abnormalities.
- Clients with terminal illnesses.

A completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form (Title XIX Form) prescribing the DME and/or medical supplies must be signed and dated by the prescribing physician familiar with the client prior to requesting authorization.

- All signatures must be current, unaltered, original, and handwritten. Computerized or stamped signatures will not be accepted.
- The completed Title XIX Form must be maintained by the requesting provider and the prescribing physician. The original signature copy must be kept in the physician's medical record for the client.
- The completed Title XIX Form must include the procedure codes and quantities requested for the services.

To complete the prior authorization process the provider must submit the completed Title XIX Form by fax to the Home Health Unit at 1-512-514-4209 or in writing to the following address:

Texas Medicaid & Healthcare Partnership
Home Health Services
PO Box 202977
Austin, TX 78720-2977

When a WCD is not covered as a home health service, it may be considered for reimbursement through the CCP for clients who are 20 years of age and younger. All of the following criteria must be met for CCP reimbursement for a WCD:

- The client is eligible for CCP benefits.
- The documentation submitted with the request supports the determination of medical necessity based on the criteria listed in the policy.
- Federal financial participation is available.
- The client's cardiac status would be compromised without the requested equipment.
- The requested equipment is safe in the home setting.

Rental of an automatic external defibrillator, with integrated electrocardiogram analysis, garment type (procedure code K0606) may be prior authorized (initially for up to three months) with documentation supporting the medical necessity and appropriateness of the device.

The provider may be reimbursed only for the length of time the device is used even though the authorization for the rental may be for a longer period of time.

The rental of the device includes the monitor, electrode belt (four sensors or electrodes and three treatment pads), garment, two rechargeable batteries, a battery charger and modem.

The purchase of a replacement battery (procedure code K0607), the purchase of a garment (procedure code K0608), and electrodes (procedure code K0609) will be considered part of the rental.

Prior authorization extensions for WCDs beyond the initial three-month rental may be considered by the medical director when documentation supports continued medical necessity for the device. Providers must submit new documentation to support continued medical necessity for an extension of the rental to be considered.

To avoid unnecessary denials, the physician must provide correct and complete information, including documentation for medical necessity of the device. The physician must maintain documentation of medical necessity in the client's medical record. The requesting provider may be asked for additional information to clarify or complete a request for the WCD.

Retrospective review may be performed to ensure documentation supports the medical necessity of the service when billing the claim.

9.2.79 Wound Care Management

Wound care management includes the care of acute and chronic wounds, which include, but are not limited to, open ulcers (venous pressure or diabetic ulcers), fistulas, or erosion of skin related to cancer. Acute and chronic wounds are defined as the following:

- Acute wounds: Wounds taking less than 30 days for complete healing
- Chronic wounds: Wounds taking more than 30 days for complete healing

Wound care includes the following:

- Optimization of nutritional status
- Debridement by any means to remove devitalized tissue
- Maintenance of a clean, moist bed of granulation tissue
- Necessary treatment to resolve any infection that may be present

For clients with an ulcer, wound care may include the following:

- Frequent repositioning of a client who has a pressure ulcer
- Off-loading pressure and good glucose control for a client who has a diabetic ulcer
- Establishment of adequate circulation for a client who has an arterial ulcer
- Use of a compression system for clients who have a venous ulcer

Wound care management includes first- and second-line therapies. First-line wound care is used for acute wounds. If the wound does not improve with first-line treatment, adjunctive second-line therapy may be used. Measurable signs of improved healing include the following:

- A decrease in wound size, either in surface area or volume
- A decrease in amount of exudate
- A decrease in amount of necrotic tissue

Wound care must be performed by a licensed health professional who is qualified to safely and effectively provide the medically necessary care. Providers are expected to exercise their clinical judgment to render the most appropriate care in accordance with their scope of practice as designated by their regulatory and governing boards.

The following services are not a benefit of Texas Medicaid:

- Infrared therapy
- Ultraviolet therapy
- Topical hyperbaric oxygen therapy

- Low-energy ultrasound wound cleanser (MIST therapy)
- Services that are submitted as debridement but do not include the removal of devitalized tissue. Examples include removal of non-tissue integrated fibrin exudates, crusts, biofilms, or other materials from a wound, without the removal of tissue.
- Electrical stimulation and electromagnetic therapy

9.2.79.1 First-Line Wound Care Therapy

First-line wound care therapy includes the following:

- Cleansing, antibiotics, and pressure off-loading
- Compression
- Debridement
- Dressing
- Whirlpool for burns

9.2.79.1.1 Cleansing, Antibiotics, and Pressure Off-loading

Wound cleansing helps to create an optimal healing environment and decreases the potential for infection by loosening and removing cellular debris and residual topical agents from previous dressings.

Wound cleansing agents may include normal saline, commercial wound cleansers, povidone iodine, hydrogen peroxide, or sodium hydrochlorite. Cleansing solutions and methods vary based on effectiveness and individual client needs.

Systemic or topical antibiotics may be used to prevent or treat wound infections and to aid in the healing of wounds.

Pressure off-loading devices, such as pillows, boots, mattresses, and protectors, may also be used as part of first-line wound care therapy to prevent or relieve pressure on the wound.

9.2.79.1.2 Compression

Compression performed as a part of wound care management is a benefit and may be reimbursed when billed with procedure code 29580.

9.2.79.1.3 Debridement

Wound debridement includes the pre-debridement wound assessment, the debridement, and the post-procedure instructions provided to the client on the date of service.

Selective debridement consists of the following:

- Conservative sharp debridement
- High-pressure lavage to selected areas

Non-selective debridement consists of the following:

- Autolytic debridement
- Blunt debridement
- Enzymatic debridement
- Hydrotherapy and wound immersion
- Mechanical debridement

The following procedure codes are a benefit for wound debridement:

Procedure Codes									
11000	11001	11042	11043	11044	11045	11046	11047	16020	16025
16030	97597	97598							

The procedure code submitted on the claim (and authorization request, if applicable) must reflect the level of debrided tissue, e.g., partial-thickness skin, full-thickness skin, subcutaneous tissue, muscle, and/or bone, and not the extent, depth, or grade of the ulcer or wound.

Prior authorization is required for non-emergent wound debridement procedure codes 11042, 11043, and 11044. A request for prior authorization must be submitted to TMHP with the Special Medical Prior Authorization (SMPA) Request Form before the procedure is performed. Providers must retain a copy of the signed and dated form in the client’s medical record at the provider’s place of business. The requesting provider may be asked for additional information to clarify or complete a request for the equipment/supply requested.

Requests for prior authorization for wound debridement procedure codes 11042, 11043, and 11044 must include the following documentation:

- Location of the wound
- Characteristics of the wound, including:
 - Dimensions (diameter and depth)
 - Drainage (amount and type)
 - Related signs and symptoms (swelling, pain, inflammation)
 - Presence of necrotic tissue/slough
- Wound care treatment plan

For procedure codes 11043 and 11044, at least one of the following conditions must be present and documented:

- Stage III or IV wounds
- Venous or arterial insufficiency ulcers
- Dehisced wounds or wounds with exposed hardware or bone
- Neuropathic ulcers
- Complications of surgically created or traumatic wound where accelerated granulation therapy is necessary but cannot be achieved by other available topical wound treatment

Wound debridement procedure codes 11042, 11043, and 11044 are not appropriate and will not be approved for the following:

- Washing bacteria or fungal debris from the feet
- Paring or cutting of corns or calluses
- Incision and drainage of an abscess
- Trimming or debridement of nails, or avulsion of nail plates
- Acne surgery
- Destruction of warts
- Burn debridement

Retroactive authorization is required for wound debridement procedure codes 11042, 11043, and 11044 that are performed on an urgent or emergent basis. The provider must submit a request for retroactive authorization within 14 calendar days, beginning the day after the procedure is performed.

9.2.79.1.4 Dressings and Metabolically Active Skin Equivalents

Wound dressings may include wet and dry dressings.

Dressings applied to the wound are considered part of the service for wound debridement. Metabolically active skin equivalents used in wound care may be considered separate benefits, in addition to the wound debridement procedure. The following procedure codes are a benefit for metabolically active skin equivalents provided in the office setting:

Procedure Codes									
C9250	Q4100	Q4101	Q4102	Q4103	Q4104	Q4105	Q4106	Q4107	Q4108
Q4110	Q4111	Q4112	Q4113	Q4114	Q4115	Q4116	Q4119	Q4120	Q4121
Q4122	Q4123	Q4124	Q4126	Q4127	Q4128	Q4129	Q4130	Q4131	Q4134
Q4135	Q4136	Q4137	Q4138	Q4140	Q4142	Q4143	Q4146	Q4147	Q4148
Q4149									

The client’s medical record must include documentation that wound treatments with metabolically active skin equivalents or skins substitutes are accompanied by appropriate adjunctive measures, and must identify the adjunctive therapies being provided to the client as part of the wound treatment regimen.

Prior authorization is required for unspecified skin substitute procedure code Q4100. When requesting prior authorization for procedure code Q4100, providers must submit the Special Medical Prior Authorization (SMPA) Request Form and the following information with the request:

- The client’s diagnosis
- Characteristics of the wound, including:
 - Location
 - Dimensions (diameter and depth)
 - Drainage (amount and type)
 - Related signs and symptoms (swelling, pain, inflammation)
 - Presence of necrotic tissue/slough
- Medical records that indicate prior treatment for the diagnosis, the medical necessity of the requested skin substitute, and the wound care treatment plan
- A clear, concise description of the skin substitute to be applied and the reason for recommending this particular item
- A CPT or HCPCS procedure code that is comparable to the requested procedure
- Documentation that demonstrates that the requested procedure is not investigational or experimental
- The place of service in which the requested procedure will be performed
- The physician’s intended fee for the requested procedure

9.2.79.1.5 Whirlpool for Burns

Whirlpool may be a benefit when used as first-line wound care therapy for the treatment of burn wounds.

9.2.79.2 Second-Line Wound Care Therapy

Second-line wound care therapy is limited to chronic Stage III or IV wounds and may be covered only after first-line therapy has been tried for at least 30 days without measurable signs of improved healing. First-line wound care therapy may continue as appropriate, with the addition of second line wound care measures as indicated by the client's medical condition.

Second-line wound care therapy includes the following:

- Whirlpool
- Irrigation, including pulsatile jet irrigation

9.2.79.2.1 Whirlpool

Whirlpool is a nonselective hydrotherapy used in the second-line treatment of chronic wounds that may be used in combination with other therapeutic treatments. Whirlpool generates water movement, which produces massage of body areas that impacts surface circulation and loosens nonviable tissue.

9.2.79.2.2 Pulsatile-Jet Irrigation

Pulsatile-jet irrigation is a benefit for the treatment of Stage III or IV wounds when other forms of treatment have failed. Removal of devitalized tissue using pulsatile-jet irrigation may be reimbursed when claims are submitted for procedure code 97597 or 97598.

9.2.79.3 Documentation Requirements

For all wound care management services, documentation that supports the medical necessity of the service must be maintained in the client's medical records, including the following information:

- Accurate diagnostic information that pertains to the underlying diagnosis and condition as well as any other medical diagnoses and conditions, which include the client's overall health status.
- Appropriate medical history related to the current wound, including the following:
 - Wound measurements, which includes length, width, and depth, any tunneling and/or undermining
 - Wound color, drainage (type and amount), and odor, if present
 - The prescribed wound care regimen, which includes frequency, duration, and supplies needed
 - Treatment for infection, if present
 - All previous wound care therapy regimens, if appropriate
 - The client's use of a pressure reducing support surface, mattress, and/or cushion, when appropriate

Documentation maintained in the client's medical record must support the level of debridement service provided.

Fewer than five surgical debridements that involve removal of muscle or bone are typically required for management of most wounds. Documentation that is maintained in the client's medical record must support the number of debridements involving muscle or bone that are performed.

9.3 Doctor of Dentistry Practicing as a Limited Physician

This section outlines the guidelines for the Doctor of Dentistry practicing as a limited physician. The THSteps dental program is not addressed in these guidelines.

Services by a dentist (DDS or DMD) are covered by Texas Medicaid in accordance with the Omnibus Budget Reconciliation Act (OBRA) of 1987 (public law 100-203), if the services are furnished within the dentist's scope of practice as defined by Texas state law and would be covered under Texas Medicaid when provided by a licensed physician (MD or DO).

Dentist (DDS or DMD) who want to participate as a dentist-physician in Texas Medicaid must be separately enrolled as a Doctor of Dentistry practicing as a limited physician even if they are enrolled in the THSteps Dental Program.

Dual licensure (MD, DO, and DDS) is not required for a dentist to enroll as a limited physician. Medicare enrollment is required for a dentist to enroll as a limited physician.

9.3.1 Prior Authorization for General Dental Services Due to Life-Threatening Medical Condition

Reimbursement for general dental services by any provider, irrespective of the medical or dental qualifications of the provider, is not a Medicaid benefit for Medicaid clients who are 21 years of age and older (who do not reside in an ICF-IID facility).

The TMHP Medical Director or designee may allow an exception for a dental condition causally related to a life-threatening medical condition. *Mandatory prior authorization is required* and the dental diagnoses *must* be secondary to a life-threatening medical condition.

Examples of dental procedures that may be authorized for a *general dentist* who is enrolled as a *limited physician* are:

- Extractions.
- Alveolectomies (in limited situations).
- Incision and drainage.
- Curettement.

Examples of dental procedures that may be authorized for an *oral and maxillofacial surgeon* who is enrolled as a *limited physician* are:

- Extractions.
- Alveolectomies (in limited situations).
- Incision and drainage.
- Curettement maxillofacial surgeries to correct defects caused by accident or trauma.
- Surgical corrections of craniofacial dysostosis.

Note: *Therapeutic procedures such as restorations, dentures, and bridges are not a benefit of the program and will not be authorized.*

9.3.1.1 Guidelines for Requesting Mandatory Prior Authorization

The *limited physician* dentist must request the mandatory prior authorization, and the request must include:

- A treatment plan that clearly outlines the dental condition as related to the life-threatening medical condition.
- Narrative describing the current medical problem, client status, and medical need for requested services.
- The client name and Medicaid number.
- The *limited physician* dentist's provider identifier.

- The name and address of the facility.
- CPT procedure codes.
- The history and physical.
- The *limited physician* dentist’s signature.

Note: The “*limited physician*” dentist who will perform the procedure(s) must submit the request for prior authorization.

All supporting documentation must be included with the request for authorization. Providers are to send requests and documentation to the following address:

Texas Medicaid & Healthcare Partnership
 Special Medical Prior Authorization
 12357-B Riata Trace Parkway, Suite 100
 Austin, TX 78727
 Fax: 1-512-514-4213

9.3.2 Benefits and Limitations

Dental procedure codes and their corresponding CPT procedures may not be billed on the same date of service by any provider.

Cosmetic procedures are not a benefit of Texas Medicaid. Certain procedure codes, including, but not limited to, the procedure codes in the following table, may be considered cosmetic and are not a benefit except when the procedure is performed as a result of trauma or injury for the purpose of:

- Reconstructing tissues/body structures.
- Repairing damaged tissues.

Procedure Codes									
11950	11951	11952	11954	11970	15780	15781	15786	15787	15788
15789	15838	15876	21089	21497	41820	41821	41828	61501	Q3031

9.3.2.1 Diagnosis Codes

The following table lists diagnosis codes (ICD-9-CM) that may be billed by a Doctor of Dentistry practicing as a limited physician:

Diagnosis Codes									
0542	1120	1400	1401	1403	1404	1405	1406	1408	1409
1410	1411	1412	1413	1414	1415	1416	1418	1419	1420
1421	1422	1428	1429	1430	1431	1438	1439	1440	1441
1448	1449	1450	1451	1452	1453	1454	1455	1456	1458
1459	1460	1461	1462	1463	1464	1465	1466	1467	1468
1469	1490	1498	1602	1700	1701	17300	17301	17302	17309
17330	17331	17332	17339	17340	17341	17342	17349	1950	20931
20932	20936	20975	2100	2101	2102	2103	2104	2105	2106

9.3.2.2 Evaluation and Management Procedure Codes

Patient evaluation and management services, and consultation procedure codes must be used with the appropriate diagnosis codes listed in Subsection 9.3.2.1, “Diagnosis Codes,” in this handbook.

9.3.2.3 Additional Payable Procedure Codes

The following procedure codes are a benefit when prior authorized and:

- Accompanied by the appropriate diagnosis code.
- The dentist is qualified and licensed to perform the procedures.

Procedure Codes									
Surgery

9.3.2.4 Immune Globulin by a Doctor of Dentistry as a Limited Physician

A Doctor of Dentistry Practicing as a Limited Physician may be reimbursed for immune globulin injection procedure code J1571 when billed with one of the following diagnosis codes:

Diagnosis Code								
27902	27905	27906	27941	27949	28489	35800	586	V0179

9.3.2.5 Radiographs by a Doctor of Dentistry Practicing as a Limited Physician

When a Doctor of Dentistry Practicing as a Limited Physician uses appropriate radiograph equipment to produce required radiographs, the following procedure codes are eligible for reimbursement when accompanied by an appropriate diagnosis:

Procedure Codes									
70100	70110	70120	70130	70140	70150	70160	70190	70200	70250
70260	70300	70310	70320	70328	70332	70336	70350	70355	70370
70371	70380	70390	73100	70450	70460	70470	70480	70481	70482

Procedure Codes					
70486	70487	70488	70490	70491	70492

9.3.2.6 Dental Anesthesia by a Doctor of Dentistry Practicing as a Limited Physician

A Doctor of Dentistry Practicing as a Limited Physician who is licensed by the Texas State Board of Dental Examiners (TSBDE) practicing in Texas, who has obtained an Anesthesia Permit from the TSBDE in accordance with Title 22 TAC §§110.1 through 110.9, may be reimbursed for anesthesia services on clients having dental/oral and maxillofacial surgical procedures in the dental office or hospital in accordance with all applicable rules for physician administration and supervision of anesthesia services.

Dentists providing sedation/anesthesia services must have the appropriate permit from TSBDE for the level of sedation/anesthesia provided.

The following anesthesia services are payable to dentists as physician services when accompanied by a payable diagnosis:

Procedure Codes									
00100	00102	00160	00162	00164	00170	00190	00192	00300	99100
99116	99135	99140							

9.4 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including physician services. Physician services are subject to retrospective review and recoupment if documentation does not support the service billed.

9.5 Claims Filing and Reimbursement

9.5.1 Claims Information

Claims for physician and doctor services must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply them.

When completing a CMS-1500 paper claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills and itemized statements are not accepted as claim supplements.

Physicians who submit a claim using the physician’s own provider identifier for services provided by an NP, CNS, PA, or CNM must submit one of the following modifiers on each claim detail if the physician does not make a decision regarding the client’s care or treatment on the same date of service as the billable medical visit:

- SA – Services were provided by an NP or CNS
- U7 – Services were provided by a physician assistant
- SB – Services were provided by a CNM

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (*Vol. 1, General Information*) for information on electronic claims submissions.

Section 6: Claims Filing (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions,” in Section 6, “Claims Filing” (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

9.5.2 National Drug Codes (NDC)

Refer to: Subsection 6.3.4, “National Drug Code (NDC),” in Section 6, “Claims Filing” (*Vol. 1, General Information*).

9.5.3 Reimbursement

Texas Medicaid rates for physicians and other practitioners are calculated in accordance with TAC §355.8085. Providers can refer to the [online fee lookup \(OFL\)](#) or the applicable fee schedule on the TMHP website at www.tmhp.com.

Physicians may be reimbursed 92 percent of the established reimbursement rate for services provided by an NP, CNS, PA, or CNM if the physician does not make a decision regarding the client’s care or treatment on the same date of service as the billable medical visit. The 92 percent reimbursement rate will not apply to laboratory services, X-ray services, and injections provided by an NP, CNS, PA, or CNM.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

Section 104 of the Tax Equity and Fiscal Responsibility Act (TEFRA) of 1982 requires that Medicare/Medicaid limit reimbursement for those physician services furnished in outpatient hospital settings (e.g., clinics and emergency situations) that are ordinarily furnished in physician offices.

Reimbursement for these services will be 60 percent of the Texas Medicaid rate for the service furnished in the physician’s office. The following table identifies the services applicable to the 60-percent limitation when furnished in outpatient hospital settings:

Procedure Codes									
99201	99202	99203	99204	99205	99211	99212	99213	99214	99215
99281	99282	99283							

These procedures are designated with note code “1” in the current [physician fee schedule](#), which is available at www.tmhp.com. The following list shows the services excluded from the 60-percent limitation:

- Services furnished in rural health clinics (RHCs).
- Surgical services that are covered ambulatory surgical center (ASC)/hospital-based ambulatory surgical center (HASC) services.
- Anesthesiology and radiology services.
- Emergency services provided in a hospital emergency room after the sudden onset of a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain), such that the absence of immediate medical attention could reasonably be expected to result in one of the following:

- Serious jeopardy to the client's health.
- Serious impairment to bodily functions.
- Serious dysfunction of any bodily organ or part.

Because of TEFRA, Texas Medicaid reimbursement for a payable nonemergency office service that is performed in the outpatient department of a hospital is limited to 60 percent of Texas Medicaid rate for that service. If the condition qualifies as an emergency or if the client is critically ill or critically injured, the 60 percent professional service reimbursement limit does not apply.

Refer to: Subsection 2.2, "Fee-for-Service Reimbursement Methodology," in Section 2, "Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for more information about reimbursement.

Subsection 2.2.1.1, "Non-emergent and Non-urgent Evaluation and Management (E/M) Emergency Department Visits," in Section 2, "Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for more information about conditions that are excluded from the 60-percent limitation.

Subsection 9.2.6, "Anesthesia," in this handbook for information on anesthesia services that are reimbursed according to relative value units (RVUs).

9.5.3.1 Affordable Care Act of 2010 (ACA) Rate Increase for Primary Care Services

To qualify for the Affordable Care Act of 2010 (ACA) rate increase for primary care services, a physician must have a specialty designated of general internal medicine, family practice, or pediatrics and must attest to one of the following:

- The provider has a certification recognized by the American Board of Allergy and Immunology (ABAI), American Board of Medical Specialties (ABMS), American Board of Physician Specialties (ABPS), or American Osteopathic Association (AOA) and meets the requirements as required by federal and state regulation to receive the increased payment.
- The provider does not have a certification recognized by the ABAI, ABMS, ABPS, or AOA, but at least 60 percent of the provider's Medicaid billings for the previous calendar year (or for the previous calendar month if the provider has been enrolled in Medicaid for less than one year) were for the evaluation and management (E/M) and vaccine administration procedure codes as published in the final federal and state regulations and the provider meets the requirement to receive payment.

Note: *New providers with no history of Medicaid billings can attest that 60 percent of their Medicaid billing will be for primary care services.*

Providers can attest using the Texas Medicaid Attestation for ACA Primary Care Services Rate Increases form. ABAI-certified allergists must indicate "ABAI-allergy" in the "List subspecialties" field of the attestation form.

Important: *By signing the form, providers attest that they qualify for the rate increase, and that the increase will be applied to paid claims for primary care services on or after the effective date. Payment of the rate increase may be subject to retrospective review and recoupment if it is determined at a later time that the provider did not qualify for the ACA primary care services rate increase. Federal regulations require states to conduct an annual audit of provider attestations.*

Non-physician practitioners who are under the supervision of a provider who has self-attested, are not required to submit a separate provider attestation form. Increased payment may be available to the supervising physician when the following conditions are met:

- The non-physician practitioner renders services under the personal supervision of a provider who has self-attested to meeting the requirements.
- Services are billed under the qualifying provider's provider identification number.

10 Physician Assistant

10.1 Enrollment

To enroll in Texas Medicaid, a PA must be licensed and recognized as a PA by the Texas Physician Assistant Board. Texas Medicaid accepts a signed letter of certification from the Texas Physician Assistant Board as acceptable documentation of appropriate licensure and certification for enrollment. The PA must identify their supervising physician in the appropriate field of the enrollment application.

Providers cannot be enrolled if their license is due to expire within 30 days.

Enrollment as an individual provider is optional. PAs currently treating clients and billing under the supervising physician's provider identifier may continue this billing arrangement.

All PA services must be delivered according to protocols developed jointly within the scope of practice and state law governing PAs.

All providers of laboratory services must comply with the rules and regulations of CLIA. Providers not complying with CLIA are not reimbursed for laboratory services.

PAs may enroll as providers of THSteps medical checkups.

Refer to: Subsection 1.1, "Provider Enrollment and Reenrollment," in Section 1, "Provider Enrollment and Responsibilities" (*Vol. 1, General Information*).

Subsection 2.1.1, "Clinical Laboratory Improvement Amendments (CLIA)," in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

Subsection 5.2, "Enrollment," in the *Children's Services Handbook (Vol. 2, Provider Handbooks)* for more information about enrolling as a THSteps provider.

10.2 Services, Benefits, Limitations, and Prior Authorization

Services performed by PAs are covered if the services meet the following criteria:

- Are within the scope of practice for PAs, as defined by Texas state law
- Are consistent with rules and regulations promulgated by the Texas Medical Board or other appropriate state licensing authority
- Are covered by Texas Medicaid when provided by a licensed physician (MD or DO)
- Are reasonable and medically necessary as determined by HHSC or its designee

Services provided to Medicaid clients must be documented in the client's medical record to include the following:

- Services provided
- Date of service
- Pertinent information about the client's condition supporting the need for service
- The individual practitioner of the service

PAs who are employed or remunerated by a physician, hospital, facility, or other provider must not bill Texas Medicaid for their services if the billing results in duplicate payment for the same services.

Physicians who submit a claim using the physician's own provider identifier for services provided by a PA must submit modifier U7 on each claim detail if the physician does not make a decision regarding the client's care or treatment on the same date of service as the billable medical visit.

Laboratory (including pregnancy tests) and radiology services provided during pregnancy must be billed separately from antepartum care visits and claims must be received within 95 days from the date of service.

Note: *Payment to providers for supplies is not a benefit of Texas Medicaid. Costs of supplies are included in the reimbursement for office visits.*

Refer to: Section 2, "Medicaid Title XIX family planning services" in the *Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks)*.

Section 9, "Physician" in this handbook.

Section 5, "THSteps Medical" in the *Children's Services Handbook (Vol. 2, Provider Handbooks)*.

10.2.1 Prior Authorization

Services performed by a PA are subject to the same prior authorization guidelines as services performed by other provider types.

10.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including PA services. PA services are subject to retrospective review and recoupment if documentation does not support the service billed.

10.4 Claims Filing and Reimbursement

10.4.1 Claims Information

Claims for PA services must include modifier U7 on the claim details to indicate that the client was treated by a PA.

PA services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: "Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information on electronic claims submissions.

"Section 6: Claims Filing" (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions," in "Section 6: Claims Filing" (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

10.4.2 Reimbursement

According to 1 TAC §355.8093, the Medicaid rate for PAs is 92 percent of the rate paid to a physician (MD or DO) for the same professional service and 100 percent of the rate paid to physicians for laboratory services, X-ray services, and injections.

Note: *PA providers who are enrolled in Texas Medicaid as THSteps providers also receive 92 percent of the rate paid to a physician for THSteps services when a claim is submitted with their THSteps provider identifier as the billing provider.*

PAs who bill Medicaid directly for services they perform must use their individual provider identifier. If the services were performed by the PA but billed by a physician or physician group, the billing provider is the physician or physician group. Physicians may be reimbursed 92 percent of the established reimbursement rate for services provided by a PA if the physician does not make a decision regarding the client’s care or treatment on the same date of service as the billable medical visit. This 92 percent reimbursement rate does not apply to laboratory services, X-ray services, or injections provided by a PA.

Providers can refer to the [online fee lookup \(OFL\)](#) or the applicable fee schedule on the TMHP website at www.tmhp.com. To request a hard copy, call the TMHP Contact Center at 1-800-925-9126.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

Refer to: Subsection 1.1, “Provider Enrollment and Reenrollment,” in Section 1, “Provider Enrollment and Responsibilities” (*Vol. 1, General Information*).

Section 3: TMHP Electronic Data Interchange (EDI) (*Vol. 1, General Information*) for information on how to obtain electronic fee schedules from the TMHP website.

7 Claim Form Examples15

1 General Information

The Medical Transportation Program (MTP), under the direction of the Texas Health and Human Services Commission (HHSC), arranges transportation and travel-related services for eligible Medicaid, Children with Special Health Care Needs (CSHCN) Services Program, and Transportation for Indigent Cancer Patients (TICP) clients who have no other means of transportation. MTP is responsible for the prior authorization of all MTP services.

MTP provides for the following general services:

- Mass transit (intercity and intracity): Passes or tickets for client transport within a city and from city to city. Air travel is also an allowable service.
- Demand response transportation: Common carriers such as taxi, wheelchair van, and other transportation according to contractual requirements.
- Mileage reimbursement for enrolled individual transportation provider (ITP): The enrolled ITP can be the responsible party, family member, friend, neighbor, or client.
- Meals: Contracted vendors (e.g., hospital cafeteria).
- Lodging: Contracted hotels and motels.
- Advanced funds: Financial services contractor.
- Attendant: Responsible party, parent/guardian, etc., who accompanies the client to a health-care service.

Under the contract between Texas Medicaid & Healthcare Partnership (TMHP) and MTP, TMHP is responsible for enrollment of providers and processing of MTP provider claims.

MTP contracts with various provider types to arrange transportation and travel-related services for eligible MTP clients and their attendants.

There are three MTP provider types that enroll directly with TMHP:

- ITPs
- Lodging providers
- Meal providers

All other transportation providers arrange enrollment through MTP (e.g., transportation service area providers, client services providers).

1.1 Contacting MTP

If health-care providers have MTP-eligible clients who express difficulty accessing health-care services, advise the clients or their advocates to call the statewide MTP toll-free number at 1-877-633-8747 to request transportation services. MTP clients in the Houston/Beaumont area can call 1-855-687-4786 to request services. Clients in the Dallas/Ft. Worth area can call 1-877-687-3255 to request services. For transportation services within the county where the client lives, clients or their advocates must call the MTP office at least 2 business days before the scheduled appointment. For clients who need to travel beyond the county where they live, clients or their advocates must call the MTP office at least 5 business days before the scheduled appointment.

The client must provide the following information to the intake operator at the time of the call:

- Client name, address, and, if available, the telephone number
- Medicaid, TICP or CSHCN Services Program client identification number (if applicable) or Social Security number, and date of birth

- Name, address, and telephone number of health-care provider and/or referring health-care provider
- Purpose and date of trip and time of appointment
- Affirmation that other means of transportation are unavailable
- Special needs, including wheelchair lift or attendant(s)
- Medical necessity verified by the Health Care Provider's Statement of Need, if applicable
- Affirmation that advance funds are needed in order for the recipient to access health-care services

Note: *Clients must reimburse the department for any advance funds, and any portion thereof, that are not used for the specific prior authorized service.*

2 Individual Transportation Provider (ITP)

ITPs are individuals who volunteer to use their personal vehicle to drive themselves, a friend, or a family member safely to the doctor, dentist, or drug store.

2.1 Enrollment for ITPs

ITPs must follow all rules for enrollment that other providers follow when enrolling with TMHP.

To initiate the enrollment process, the MTP client must contact MTP to request a ride from an individual who is a potential ITP. This request is the first step in the enrollment process for the ITP.

After the client's call, MTP sends the potential ITP's information to TMHP, and TMHP mails the potential ITP an enrollment package. The ITP must fill out the Individual Transportation Provider Enrollment Application and mail it to TMHP with all requested documentation.

The provider must identify the MTP clients they will be transporting and whether they are related to the client. The application packet also includes an Electronic Funds Transfer (EFT) Agreement form that authorizes TMHP to deposit payments directly into a bank account, which results in faster payments.

After the ITP application has been processed, the ITP will receive a letter from TMHP that includes the Atypical Provider Identifier (API) and the Texas Provider Identifier (TPI) to be used when the ITP submits claim forms for mileage reimbursement.

2.2 Prior Authorization for ITPs

Once an ITP is enrolled with TMHP and a client calls MTP to request a ride, MTP will mail a preprinted ITP Service Record (Form H3017) to the MTP client. The H3017 is the form the provider must mail to TMHP to be reimbursed for the ride.

Important: *Only claims that are authorized by MTP will be considered for payment. All claims must be prior authorized to be paid.*

Refer to: Section 5, "Prior Authorization" in this handbook.

2.3 Claims Filing for ITPs

To file a claim, an ITP completes the H3017 form that was sent to the Medicaid client and mails it to TMHP at the following address:

Texas Medicaid & Healthcare Partnership
Claims
PO Box 200555
Austin, TX 78720-0555

The H3017 includes the following transportation details:

- Date of the ride
- Number of miles authorized
- Prior authorization number
- MTP client's name
- ITP's name.

The H3017 claim form must be signed by the doctor, dentist, or drug store representative that rendered services to the MTP client. This signature stands as proof that the ride authorized by MTP was taken. The ITP must also sign the claim form and include the API and TPI that was assigned to them by TMHP. If any of this required information is missing, the claim will be denied.

The provider must mail the completed claim form to TMHP after the client's authorized ride, but no later than 95 days from the date of the ride. Any claims received by TMHP more than 95 days after the date of the ride will be denied.

An ITP may not charge an MTP client a fee for completing claim forms. TMHP also cannot be charged for the filing of claim forms.

3 Lodging Provider

Lodging providers are businesses that have entered into an enrollment contract to provide hotel/lodging facilities for MTP clients' attendant(s) when authorized by MTP.

3.1 Enrollment for Lodging Providers

Lodging providers must be enrolled with TMHP as an MTP provider to receive reimbursement for claims.

Lodging providers enroll in MTP in one of two ways:

- Providers can download and fill out a paper Lodging Provider Enrollment Application and mail it to TMHP.
- Providers can complete the enrollment process through the Provider Enrollment on the Portal (PEP) application on the TMHP website at www.tmhp.com.

The provider must complete and return the entire provider enrollment application including the Lodging Provider Rate Information Sheet and the Internal Revenue Service (IRS) W-9 Tax Identification form. The enrollment packet contains an EFT form that authorizes direct deposit payments for faster reimbursement; however, completion of the EFT form is not a requirement for enrollment.

Lodging providers can download an application for MTP by visiting the MTP Lodging page on the TMHP website at www.tmhp.com/Pages/MTP/MTP_lodging.aspx.

3.2 Prior Authorization for Lodging Providers

An MTP client must contact MTP to request a lodging stay to initiate the claims process for lodging providers.

When MTP authorizes a request from the client for a lodging stay, the lodging provider will be sent the approved authorization and information including the client's name and the date of stay. Each approved authorization is for one overnight stay and will have a unique authorization number.

Each overnight stay must be authorized by MTP, and a separate claim form must be submitted to TMHP for each individual overnight stay. It is the lodging provider's responsibility to obtain the MTP client's signature on each authorization form before it is submitted to TMHP.

Refer to: Section 5, "Prior Authorization" in this handbook.

3.3 Claims Filing for Lodging Providers

There are two ways for lodging providers to submit claims to TMHP, including:

- *By paper* using the CMS-1500 paper claim form.

Refer to: Subsection 6.6, "Paper Claims" in this handbook.

- *Electronically*, using TMHP electronic data interchange (EDI) or the TexMedConnect functionality through the TMHP website.

Refer to: Subsection 6.5, "Electronic Claims" in this handbook.

Lodging providers may not charge an MTP client a fee for completing claim forms. TMHP also cannot be charged for the filing of claim forms.

4 Meals Provider

4.1 Enrollment for Meals Providers

Meal providers can enroll with TMHP in one of two ways:

- Download and fill out a paper Meal Provider Enrollment Application and mail it to TMHP.
- Complete the enrollment process through the PEP application on the TMHP website at www.tmhp.com.

Meals providers can download an application for MTP by visiting the MTP Meals page on the TMHP website at www.tmhp.com/Pages/MTP/MTP_meals.aspx.

The provider must complete and return the IRS W-9 Tax Identification Form as part of the enrollment process. The enrollment packet contains an EFT form that authorizes direct deposit payments for faster reimbursement; however, completion of the EFT form is not a requirement for enrollment.

4.2 Prior Authorization for Meals Providers

An MTP client must contact MTP to request meal services to initiate the claims process for meal providers.

Upon authorization of meal services, MTP will send an authorization form directly to the MTP client. This form will include the MTP client's name, the attendant's name, and the date of the authorized meal(s). The MTP client's attendant must present this authorization form to the meal provider for meals to be received by the client.

Important: *Only claims for authorized meal services are considered for payment.*

One authorization covers all authorized meals for a single day. Each day of meals must be authorized by MTP and will be assigned a unique authorization number.

Refer to: Section 5, "Prior Authorization" in this handbook.

4.3 Claims Filing for Meals Providers

Providers must submit a separate claim form to TMHP for each unique authorization number (or day of meals).

There are two ways for providers to submit claims to TMHP:

- *By paper* using the CMS-1500 paper claim form.
Refer to: Subsection 6.6, “Paper Claims” in this handbook.
- *Electronically*, using TMHP electronic data interchange (EDI) or the TexMedConnect functionality through the TMHP website.
Refer to: Subsection 6.5, “Electronic Claims” in this handbook.

Meals providers may not charge an MTP client a fee for completing claim forms. TMHP also cannot be charged for the filing of claim forms.

5 Prior Authorization

All MTP services must be prior authorized by MTP, which issues all prior authorizations for transportation services. The eligible MTP client must contact MTP to obtain an authorization. Claims that are submitted without proper prior authorization will be denied.

5.1 Retention of Prior Authorization Documents

MTP prior authorization documents relating to Medicaid services or benefits provided to clients who are 20 years of age and younger must not be destroyed until the provider receives notice from HHSC. Examples of such documents include but are not limited to:

- Correspondence with HHSC/MTP;
- Invoices
- Receipts
- Contacts with clients who are class members

5.2 Definition of Prior Authorization Documents

The term “prior authorization document” is broad and includes, but is not limited to, the following:

- Paper records
- Electronic files in any format
- Database entries
- The original *and* any drafts or non-identical copies of any document
- Exhibits or attachments to documents
- Handwritten documents
- Emails
- Drawings, graphs, charts
- Electronic or videotape recordings
- Computer disks
- Other forms of computer memory storage

5.3 Copies of Prior Authorization Documents

Providers are not required to retain multiple *exact* copies of a document. For example:

- An exact electronic copy (e.g., scanned computer image, microfiche) may be retained instead of a paper copy.
- If the last in a chain of emails is retained, it is not necessary to retain each of the individual emails included in the chain, as long as the email that is retained reflects all of the earlier emails.

However, a document containing any substantive editorial comment, margin notes, underlining, etc., is *not* an exact copy and becomes a new original that must be retained.

5.4 Storage of Prior Authorization Document Storage

Relevant information and documents should be stored in a way that is protected from unintentional disclosure or destruction.

6 Claims Filing

This section contains instructions for completion of Medicaid-required claim forms. When filing a claim, providers should review the instructions carefully and complete all requested information. A correctly completed claim form is processed faster.

Texas Medicaid cannot make payments to clients, so the provider who performs the service must file an assigned claim. Federal regulations prohibit providers from charging clients a fee for completing or filing Medicaid claim forms. Providers are not allowed to charge TMHP for filing claims. The cost of claims filing is part of the usual and customary rate for doing business. Providers cannot bill Texas Medicaid or Medicaid clients for missed appointments or failure to keep an appointment. Only claims for services rendered are considered for payment.

Medicaid providers are also required to complete and sign authorized medical transportation forms (e.g., Form 3103, Individual Driver Registrant (IDR) Service Record, or Form 3111, Verification of Travel to Healthcare Services by Mass Transit) or provide an equivalent (e.g., provider statement on official letterhead) to attest that services were provided to a client on a specific date. The client presents these forms to the provider.

Providers are not allowed to bill clients or Texas Medicaid for completing these forms.

Medicaid claims are subject to the following procedures:

- TMHP verifies all required information is present.
- Claims filed under the same provider identifier and program and ready for disposition at the end of each week are paid to the provider with an explanation of each payment or denial. The explanation is called the Remittance and Status (R&S) Report, which may be received as a downloadable portable document format (PDF) version or on paper. A Health Insurance Portability and Accountability Act (HIPAA)-compliant 835 transaction file is also available for those providers who wish to import claim dispositions into a financial system.

An R&S Report is generated for providers that have weekly claim or financial activity with or without payment. The report identifies pending, paid, denied, and adjusted claims. If no claim activity or outstanding account receivables exist during the time period, an R&S Report is not generated for the week.

Providers can participate in the most efficient and effective method of submitting claims to TMHP by submitting claims through the TMHP Electronic Data Interchange (EDI) claims processing system using TexMedConnect or a third party vendor. Claims must contain the provider's complete name, address, and provider identifier to avoid unnecessary delays in processing and payment.

6.1 Claims Filing Deadlines

All claims for services rendered to eligible MTP clients are subject to a filing deadline from the DOS of:

- 95 days for in-state providers
- 365 days for out-of-state providers

Claims submitted by newly-enrolled MTP providers must be received within 95 days of the date the atypical provider identifier (API) is issued, and within 365 days of the date of service (DOS). Providers with a pending application should submit any claims that are nearing the 365-day deadline from the DOS. TMHP will reject all claims until an API is issued. MTP providers can use the TMHP rejection report or Return to Provider (RTP) letters as proof of meeting the 365- day deadline and submit an appeal.

6.2 Auditing of Claims

Reimbursement may be recouped when the medical record does not document that the level of service provided accurately matches the level of service claimed. Furthermore, the level of service provided and documented must be medically necessary based on the clinical situation and needs of the patient.

HHSC and TMHP routinely perform retrospective reviews of all providers. HHSC ultimately is responsible for Texas Medicaid utilization review activities. This review includes comparing services billed to the client’s clinical record. The following requirements are general requirements for all providers. Any mandatory requirement not present in the client’s medical record subjects the associated services to recoupment.

6.3 Important Codes for All MTP Providers

MTP providers must use the following codes when submitting claims:

- Benefit Code = MTP
- Provider Type = MT
- Diagnosis Code = 799.9
- Place of Service = 09 for paper claims, 99 for TexMedConnect claims
- Type of Service = 9

The following table shows additional codes that TMHP recommends for filing MTP claims. The codes are based on transportation provider type:

MTP Provider Description	Provider Specialty	Taxonomy Code	Recommended Procedure Code	Modifier Codes
Client Financial Services (CFS)	T1	347E00000X	A0170	
Individual Transportation Provider (ITP)	T4	347C00000X	S0215	

MTP Provider Description	Provider Specialty	Taxonomy Code	Recommended Procedure Code	Modifier Codes	
Lodging	T6	177F00000X	A0180	U1	Single occupancy
				U2	One-bedroom suite
				U3	Executive/concierge
				U4	King bedroom rate
				U5	Double occupancy room
				U6	Two bedroom suite
				U7	Additional person charge
				U8	Other
				U9	Lodging taxes
Meals	T8	174200000X	A0190		
Transportation Service Area Provider (TSAP)	T0	343800000X	A0100	U1	In-county
				U2	Out of county
				U3	Reduced rate in-county
				U4	Reduced rate out of county

6.4 Delegation of Signature Authority

A provider that delegate signatory authority to a member of the office staff or to a billing service *remains responsible* for the accuracy of all information on a claim submitted for payment. A provider’s employees or a billing service and its employees are equally responsible for any false billings in which they participated or directed.

If the claim is prepared by a billing service or printed by data processing equipment, it is permissible to print “Signature on File” in place of the provider’s signature. When claims are prepared by a billing service, the billing service must obtain and keep a letter on file that is signed by the provider authorizing claim submission.

6.5 Electronic Claims

6.5.1 TMHP Electronic Data Interchange (EDI)

Providers are encouraged to submit claims using electronic methods. Providers can participate in the most efficient and effective method of submitting requests to TMHP by submitting through the TMHP EDI Gateway. TMHP uses the HIPAA-compliant American National Standards Institute (ANSI) ASC X12 4010A1 file format through secure socket layer (SSL) and virtual private networking (VPN) connections for maximum security. Providers can access TMHP’s electronic services through the TMHP website at www.tmhp.com, TexMedConnect, vendor software, and billing agents. Providers may also submit claims using paper forms. Version 2001 0805 3 MTP Claim Filing.

6.5.2 TexMedConnect

TexMedConnect is a free, web-based, claims submission application provided by TMHP. Technical support and training for TexMedConnect are also available free from TMHP. Providers can submit claims, eligibility requests, claim status inquiries, appeals, and download ER&S Reports (in either PDF or ANSI 835 formats) using TexMedConnect. TexMedConnect can interactively submit individual claims that are processed in seconds. To use TexMedConnect, providers must have:

- An internet service provider (ISP)
- Microsoft Internet Explorer, version 7 or version 8

A broadband connection is recommended but not required. Providers that use TexMedConnect can find the online instruction manual on the home page and on the EDI page of the TMHP website at www.tmhp.com.

6.5.3 Vendor Software

Providers that do not use TexMedConnect may use vendor software to create, submit, and retrieve data files. Providers can use software from any vendor listed on the EDI Submitter List, which is located on the [EDI Vendor Testing web page](#) of the TMHP website at www.tmhp.com. There are hundreds of software vendors that have a wide assortment of services and that have been approved to submit electronic files to TMHP. Providers that plan to access TMHP's electronic services with vendor software should contact the vendor for details on software requirements. TMHP does not make vendor recommendations or provide any assistance for vendor software. Not all vendor software offers the same features or levels of support. Providers are encouraged to research their software thoroughly to make certain that it meets their needs and that it has completed testing with TMHP.

Providers must setup their software or billing agent services to access the TMHP EDI Gateway. Providers who use billing agents or software vendors should contact those organizations for information on installation, settings, maintenance, and their processes and procedures for exchanging electronic data.

Providers that download the ANSI 835 file through TexMedConnect and providers that use vendor software must request a submitter ID. A submitter ID is necessary for vendor software to access TMHP's electronic services. It serves as an electronic mailbox for the provider and TMHP to exchange data files. To order a submitter ID, providers must call the EDI Help Desk at 1-888-863-3638. Providers that use a billing agent do not need a submitter ID.

Providers may receive an ER&S Report by completing the Electronic Remittance and Status (ER&S) Agreement and submitting it to the EDI Help Desk after setting up access to the TMHP EDI Gateway. 4 Version 2001 0805 MTP Claim Filing.

6.5.4 Third Party Vendor Implementation

TMHP requires all software vendors and billing agents to complete EDI testing before access to the production server is allowed. Vendors that wish to begin testing may either call the EDI Help Desk at 1-888-863-3638 or visit the EDIFECs testing site at editesting.tmhp.com and use the TMHP Support link. An EDIFECs account will be created for the vendor to begin testing EDI formats once they have enrolled for testing. After the successful completion of EDIFECs testing and the submission of a Trading Partner Agreement, vendors must then complete end-to-end testing on the TMHP test server. Software vendors and billing agents must be partnered with at least one Texas provider before a test submitter ID can be issued. When end-to-end testing has been completed, the software vendor or billing agent will be added to the EDI Submitter List. Providers and billing agents may then order production submitter IDs for use with the vendor's software. Companion guides and vendor specifications are available in the [EDI section](#) of the TMHP website at www.tmhp.com.

6.6 Paper Claims

MTP providers can also file claims using the CMS-1500 paper claim form. Providers obtain copies of the CMS-1500 paper claim form from a vendor of their choice; TMHP does not supply them.

Providers must submit paper claims to TMHP at the following address:

Texas Medicaid & Healthcare Partnership
Claims
PO Box 200555
Austin, TX 78720-0555

6.6.1 Tips on Expediting Paper Claims

Use the following guidelines to enhance the accuracy and timeliness of paper claims processing.

6.6.1.1 General requirements

- Use original claim forms. Don't use copies of claim forms.
- Detach claims at perforated lines before mailing.
- Use 10 x 13 inch envelopes to mail claims. Don't fold claim forms, appeals, or correspondence.
- Don't use labels, stickers, or stamps on the claim form.
- Don't send duplicate copies of information.
- Use 8 ½ x 11 inch paper. Don't use paper smaller or larger than 8 ½ x 11 inches.
- Don't mail claims with correspondence for other departments. Version 2001 0805 5 MTP Claim Filing

6.6.1.2 Data Fields

- Print claim data within defined boxes on the claim form.
- Use black ink, but not a black marker. Don't use red ink or highlighters.
- Use all capital letters.
- Print using 10-pitch (12-point) Courier font, 10 point. Don't use fonts smaller or larger than 12 points. Don't use proportional fonts, such as Arial or Times Roman.
- Use a laser printer for best results. Don't use a dot matrix printer, if possible.
- Don't use dashes or slashes in date fields.

6.6.1.3 Attachments

- Use paper clips on claims or appeals if they include attachments. Don't use glue, tape, or staples.
- Place the claim form on top when sending new claims, followed by any medical records or other attachments.
- Number the pages when sending when sending attachments or multiple claims for the same client (e.g., 1 of 2, 2 of 2).
- Don't total the billed amount on each claim form when submitting multi-page claims for the same client.

***Note:** It is strongly recommended that providers who submit paper claims keep a copy of the documentation they send.*

- All paper claims must be submitted with a TPI and NPI.

- Modifiers describe and qualify the services provided by Texas Medicaid. A modifier is placed after the five-digit procedure code.

6.6.1.4 Attachments to Claims

To expedite claims processing, providers must supply all information on the claim form itself and limit attachments to those required by TMHP or necessary to supply information to properly adjudicate the claim.

6.6.2 CMS-1500 Instruction Table

The table below describes what information must be entered in each of the block numbers of the CMS-1500 claim form. Providers obtain copies of the CMS-1500 paper claim form from a vendor of their choice; TMHP does not supply them.

Block numbers not referenced in the table may be left blank. They are not required for TMHP to process MTP claims.

CMS 1500 - Required MTP Information		
Block No	Description	Guidelines
1a	Insured’s ID No. (for program checked above, include all letters)	Enter the patient’s MPCN (10-digit) patient number from the MTP authorization form.
2	Patient’s name	Enter the patients last name, first name, and middle initial as printed on the MTP authorization form. If the insured uses a last name suffix (e.g., Jr, Sr) enter it after the last name and before the first name.
21	Diagnosis or nature of illness or injury	The ICD-9-CM diagnosis codes recommended for MTP claims is 799.9
23	Prior authorization number	Enter the Prior Authorization Number issued by MTP.
24a	Date(s) of service	Enter the date of service for each MTP authorization provided in a MM/ DD/YYYY format.
24b	Place of service	The recommended POS code for MTP paper claims is 09. For electronic filing using TexMedConnect, the POS code is 99.
24d	Fully describe procedures, medical services, or supplies furnished for each date given	“The recommended procedure code for TSAP claims is A0100 The recommended procedure code for CFS claims is A0170“
24e	Diagnosis pointer	The recommended diagnosis code is 799.9 for all MTP claims
24f	Charges	Indicate the charges for the service listed
24g	Days or units	Enter the number of services performed (such as the quantity billed) per MTP.
27	Accept assignment	Required All providers of the Texas Medicaid must accept assignment to receive payment by checking Yes.
28	Total charge	Enter the total charges.

CMS 1500 - Required MTP Information		
Block No	Description	Guidelines
31	Signature of physician or supplier	An authorized representative must sign and date the claim. Billing services may print "Signature on File" in place of the provider's signature if the billing service obtains and retains on file a letter signed by the provider authorizing this practice.
33	Billing provider info & PH #	Enter the billing provider's name, street, city, state, ZIP+4 code, and telephone number.
33A	NPI	Enter your API
33B	Other ID #	Enter your TPI number

1 General Information

This handbook contains information about Texas Medicaid fee-for-service benefits. For information about managed care benefits, refer to the *Medicaid Managed Care Handbook*.

Managed care carve-out services are administered as fee-for-service benefits. A list of all carve-out services is available in Section 8, “Carve-Out Services” in the *Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks)*.

The information in this handbook is intended for nursing and therapy services. Nursing services include home health skilled nursing visits and home health aide services. Therapy services include occupational therapy (OT), physical therapy (PT), speech therapy (ST), and certified respiratory care practitioners (CRCP) services. The Handbook provides information about Texas Medicaid’s benefits, policies, and procedures applicable to these therapies.

This section does not apply to Comprehensive Outpatient Rehabilitation Facility (CORF), Outpatient Rehabilitation Facility (ORF), or Inpatient Rehabilitation Facility (Freestanding) services provided through the Comprehensive Care Program (CCP).

Refer to: Subsection 2.5, “Comprehensive Outpatient Rehabilitation Facilities (CORFs) and Outpatient Rehabilitation Facilities (ORFs)” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for more information.

Subsection 2.16, “Inpatient Rehabilitation Facility (Freestanding) (CCP)” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for more information.

Important: *All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

Refer to: Section 1: Provider Enrollment and Responsibilities (*Vol. 1, General Information*) for more information about enrollment procedures.

Subsection 2.14, “Therapy Services (CCP)” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for more information about providing OT, PT, and ST services.

2 Certified Respiratory Care Practitioner (CRCP) Services

2.1 Enrollment

To enroll in Texas Medicaid, a CRCP must be certified by the Department of State Health Services (DSHS) to practice under the Texas Occupations Code, Chapter 604. For CRCPs, Medicare certification is not a prerequisite for Medicaid enrollment. A provider cannot be enrolled if his license is due to expire within 30 days; a current license must be submitted. CRCPs must enroll as individual providers and comply with all applicable federal, state, and local laws and regulations.

2.2 Services, Benefits, Limitations, and Prior Authorization

Respiratory therapy services provided by a Texas Medicaid provider enrolled as a CRCP may be reimbursed when services are reasonable, medically necessary, and prescribed by the client's physician. These services are for all age groups and do not require the client to be homebound.

CRCP services are a benefit of Texas Medicaid with prior authorization when provided in the home setting for ventilator-dependent clients. Providers must use procedure code 99504 when billing for in-home respiratory services.

Benefits include, but are not limited to, the following:

- Respiratory therapy services and treatments prescribed by a physician who is familiar with the client's medical history and care, and who has medically determined that in-home care is safe and feasible for the client.
- Education of the client, the appropriate family members, and support people about the in-home respiratory care (must include the use and maintenance of required supplies, equipment, and techniques appropriate to the situation).

2.2.1 Prior Authorization

Prior authorization is required for in-home CRCP services (procedure code 99504).

To avoid unnecessary denials, the provider must submit correct and complete information including documentation of medical necessity for the service requested. The prescribing physician and provider must maintain documentation of medical necessity in the client's medical record. The requesting provider may be asked for additional information to clarify or complete a request for the service.

Prior authorization requests for traditional Medicaid clients must be submitted by the physician or the CRCP to the Special Medical Prior Authorization (SMPA) Department by approved electronic method using the SMPA Request Form.

When required, the requests must include the physician's original signature and the date signed. Stamped or computerized signatures and dates are not accepted. Without this information, requests will be considered incomplete.

The SMPA Request Form must be submitted with the following documentation supporting medical necessity for the requested procedure:

- The client is on a ventilator at least six hours per day.
- The client has been ventilator-dependent for at least 30 consecutive days or more as an inpatient in one or more hospitals, skilled nursing facilities (SNF), or intermediate care facilities (ICF).
- The respiratory therapy services are in lieu of respiratory services requiring the client to remain in an inpatient care setting.
- Identification of the adequate support services in place that allow the client to be cared for at home.
- The respiratory services and goals for the services that will be provided by the CRCP.
- The frequency and number of home visits requested by the CRCP.
- The client's wish to be cared for at home.

- Documentation supporting why the respiratory therapy visits included in the Home Health durable medical equipment (DME) rental of a ventilator, or the monthly respiratory therapy visit included in the Ventilator Service Agreement authorized to a Home Health DME provider would not meet the client's medical needs.

Note: For clients who are birth through 20 years of age, CRCP services that do not meet the criteria above, may be considered through the Comprehensive Care Program (CCP) when prior authorized and billed with procedure code 99503.

The prior authorization request may be authorized for up to a 12-month period. Prior authorization requests for more than 24 visits in a 12-month period will be referred for the medical director to review and a determination will be based on the individual client's medical needs.

Retrospective review may be performed to ensure documentation supports the medical necessity of the service when billing the claim for procedure codes 99503 or 99504.

Refer to: [Special Medical Prior Authorization \(SMPA\) Request Form](#) on the TMHP website at www.tmhp.com.

2.3 Documentation Requirements

All supporting documentation must be included with the request for prior authorization. Providers should send requests and documentation to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-A Riata Trace Parkway, Suite 100
Austin, TX 78727
Fax: 1-512-514-4213

2.4 Claims Filing and Reimbursement

2.4.1 Claims Information

CRCP services must be submitted to the Texas Medicaid & Healthcare Partnership (TMHP) in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 paper claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (*Vol. 1, General Information*) for information on electronic claims submissions.

Section 6: Claims Filing (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in Section 6, "Claims Filing" (*Vol. 1, General Information*). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Electronic billers must submit the prior authorization number (PAN) on the electronic claim form. Providers should consult the software vendor for the location of this field in the software.

2.4.2 Reimbursement

Respiratory therapy services provided by a participating CRCP are reimbursed the lesser of the provider's billed charges or the rate calculated in accordance with 1 TAC §355.8089.

Providers can refer to the [Online Fee Lookup \(OFL\)](#) or the applicable fee schedule on the TMHP website at www.tmhp.com.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

Refer to: Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

The professional service may be billed by the CRCP for services provided in the client’s home (procedure code 99504). The professional service will be allowed once per day up to a limit of 24 visits per year. The recommended frequency for CRCP services is as follows: 7 visits during the first week, a total of 6 visits during the second through fourth weeks, and 11 monthly visits for the second through the 12th month.

Providers will not be reimbursed for procedure codes 99503 and 99504 on the same date of service, any provider.

Disposable respiratory supplies and respiratory equipment rental or purchase are a home health services benefit and are not reimbursed to the certified respiratory therapist.

Refer to: Subsection 2.2, “Services, Benefits, Limitations, and Prior Authorization” in the *Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook (Vol. 2, Provider Handbooks)* for DME or medical supplies prior authorization information.

3 Home Health Nursing and Therapy Services

3.1 Enrollment

To enroll in Texas Medicaid as a provider of home health services, Home Health Services and Home and Community Support Services Agency (HCSSA) providers must complete the Texas Medicaid Provider Enrollment Application. Medicare certification is required for providers that are licensed as a Licensed and Certified Home Health Agency. Providers that are licensed as a Licensed Home Health Agency are not required to enroll in Medicare as a prerequisite to enrollment with Texas Medicaid.

Licensed and Certified Home Health agencies that are enrolled as Medicaid providers can provide personal care services (PCS) using their existing provider identifier. PCS for clients who are 20 years of age and younger will be provided by the Texas Health and Human Services Commission (HHSC) under the PCS benefit.

Refer to: Subsection 2.11, “Personal Care Services (PCS) (CCP)” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)*.

To provide CCP services, HCSSA providers must follow the enrollment procedures in subsection 5.2, “Enrollment” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)*.

Providers may download the Texas Medicaid Provider Enrollment Application at www.tmhp.com or request a paper application form by contacting TMHP directly at 1-800-925-9126.

Providers may also obtain the application by writing to the following address:

Texas Medicaid & Healthcare Partnership
Provider Enrollment
PO Box 200795
Austin, TX 78720-0795
1-800-925-9126
Fax: 1-512-514-4214

Providers may request prior authorization for home-health services by contacting:

Texas Medicaid & Healthcare Partnership
Home Health Services
PO Box 202977
Austin, TX 78720-2977
1-800-925-8957
Fax: 1-512-514-4209

3.1.1 Change of Address and Telephone Number

A current physical and mailing address and telephone number must be on file for the agency/company to receive reimbursement checks, Medicaid provider procedures manuals, and all other TMHP correspondence. Promptly send all address and telephone number changes to:

Texas Medicaid & Healthcare Partnership
Provider Enrollment
PO Box 200795
Austin, TX 78720-0795
1-800-925-9126
Fax: 1-512-514-4214

3.1.2 Pending Agency Certification

Home health agencies submitting claims before the enrollment process is complete or without prior authorization for services issued by the TMHP Home Health Services Prior Authorization Department will not be reimbursed. The effective date of enrollment is when all Texas Medicaid provider enrollment forms are received and approved by TMHP.

Upon the receipt of notice of Texas Medicaid enrollment, the agency must contact the TMHP Home Health Services Prior Authorization Department before serving a Texas Medicaid client for services that require a prior authorization number. Prior authorization cannot be issued before Texas Medicaid enrollment is complete. Regular prior authorization procedures are followed at that time.

Home health agencies that provide laboratory services must comply with the rules and regulations of the Clinical Laboratory Improvement Amendments (CLIA). Providers who do not comply with CLIA will not be reimbursed for laboratory services.

Refer to: Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

3.1.3 Home Health Skilled Nursing and Home Health Aide (HHA) Services Provider Responsibilities

Providers must be licensed home health agencies, enrolled in Texas Medicaid, and must comply with all applicable federal, state, and local laws and regulations and Texas Medicaid policies and procedures. All providers must maintain written policies and procedures:

- That meet the standards of the Texas Family Code, Chapter 32 for obtaining consent for the medical treatment of clients in the absence of the primary caregiver.
- For obtaining physician signatures for all telephone orders within 14 calendar days of receipt of the order.

Providers must only accept clients on the basis of a reasonable expectation that the client’s needs can be adequately met in the place of service (POS). The essential elements of safe and effective home health SN or HHA services include a trained parent, guardian, or caregiver, a primary physician, competent providers, and an environment that supports the client’s health and safety needs.

Necessary primary and back-up utility, communication, and fire safety systems must be available.

Note: *A parent or guardian, primary caregiver, or alternate caregiver may not provide SN or HHA services to their family member even if he or she is an enrolled provider or employed by an enrolled provider.*

3.2 Services, Benefits, Limitations, and Prior Authorization

3.2.1 Home Health

Prior authorization must be obtained for all professional services (SN, HHA, OT, PT, most DME, and some medical supply services). Prior authorization requests for SN, HHA, DME and some medical supply services must be submitted within three business days of the start of care (SOC), and within five business days for PT and OT services.

The benefit period for home health professional services is up to 60 days with a current plan of care (POC). This extended prior authorization period begins on the date that clients receive their first prior authorized home health service. Texas Medicaid allows prior authorization of additional visits that have been determined to be medically necessary and have been prior authorized by TMHP Home Health Services Prior Authorization Department. These records and claims must be retained for a minimum of five years from the date of service (DOS) or until audit questions, appeals, hearings, investigations, or court cases are resolved. Use of these services is subject to retrospective review.

3.2.1.1 Client Eligibility

It is the provider's responsibility to determine the type of coverage (Medicare, Medicaid, or private insurance) that the client is eligible to receive. To verify client Medicaid eligibility and retroactive eligibility, the home health agency, DME, or medical supplier must contact the Automated Inquiry System (AIS) at 1-800-925-9126 or the TMHP Electronic Data Interchange (EDI) Help Desk at 1-888-863-3638. Home health clients do not need to be homebound to qualify for services.

The Medicaid client must be eligible on the DOS and must meet all of the following requirements to qualify for Home Health Services:

- Have a medical need for home health professional services, DME, or medical supplies that is documented in the client's POC and considered a benefit under Home Health Services
- Receive services that meet the client's existing medical needs and can be safely provided in the client's home
- Receive prior authorization from TMHP for most home health professional services, DME, or medical supplies

Refer to: "Automated Inquiry System (AIS)" in "Preliminary Information" (*Vol. 1, General Information*).

Note: *Texas Health Steps (THSteps)-eligible clients who qualify for medically necessary services beyond the limits of this Home Health Services benefit may receive those services through CCP.*

3.2.1.2 Prior Authorization Requests for Clients with Retroactive Eligibility

Retroactive eligibility occurs when the effective date of a client's Medicaid coverage is before the date the client's Medicaid eligibility is added to TMHP's eligibility file, which is called the "add date."

For clients with retroactive eligibility, prior authorization requests must be submitted after the client's add date and before a claim is submitted to TMHP.

For services provided to fee-for-service Medicaid clients during the client's retroactive eligibility period, i.e., the period from the effective date to the add date, prior authorization must be obtained within 95 days from the client's add date and before a claim for those services is submitted to TMHP. For services provided on or after the client's add date, the provider must obtain prior authorization within 3 business days of the date of service.

The provider is responsible for verifying eligibility. The provider is strongly encouraged to access AIS or TexMedConnect to verify eligibility frequently while providing services to the client. If services are discontinued before the client's add date, the provider must still obtain prior authorization within 95 days of the add date to be able to submit claims.

Refer to: Section 4: Client Eligibility (*Vol.1, General Information*).

3.2.1.3 Client Evaluation

When a home health agency receives a referral to provide home health nursing and therapy services for a client who is eligible for Texas Medicaid, the agency-employed registered nurse (RN) must evaluate the client in the home before calling TMHP for prior authorization. A home evaluation by the agency-employed RN is required for SN, HHA, OT, PT, DME, or medical supplies requested on a Home Health Services POC. It is expected that appropriate referrals will be made between home health agencies and DME suppliers for care. It is recommended that DME suppliers keep open communication with the client's physician to ensure the client's medical record is current.

This evaluation must include assessment of the following:

- Medical necessity for Home Health Services, DME, or medical supplies requested
- Client safety
- Appropriateness of care in the home setting
- Capable caregiver available if clients are unable to perform their own care or monitor their own medical condition

Following the RN's assessment/evaluation of the client in the home setting for Home Health Services needs, the agency-employed RN who completed the home evaluation must contact TMHP for prior authorization within three business days of the SOC.

3.2.2 Benefits

Home Health Services include SN, HHA, OT, PT, DME, and medical supplies that are provided to eligible Medicaid clients at their place of residence.

Note: *THSteps-eligible clients who qualify for medically necessary services beyond the limits of this Home Health Services benefit may receive those services through CCP.*

Refer to: Subsection 2.14, "Therapy Services (CCP)" and subsection 2.13, "Private Duty Nursing (PDN)(CCP)" in the *Children's Services Handbook (Vol. 2, Provider Handbooks)* for more information on nursing and therapy benefits for clients who are 20 years of age and younger.

The Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook (Vol. 2, Provider Handbooks).

An SN or HHA visit may be reimbursed for up to a maximum of 2.5 hours per visit. A combined total of three SN or HHA visits may be reimbursed per date of service. When services are provided to more than one client in the same setting, only the units directly provided to each client at distinct, separate time periods will be reimbursed. Provider documentation must support that the services were delivered at distinct, separate time periods. Total Home Health Services billed for all clients cannot exceed the individual provider's total number of hours spent at the POS.

One SN visit as needed (PRN) may be reimbursed every 30 days outside of the prior authorized visits when SN visits have been prior authorized for the particular client. For reimbursement purposes, home health SN and HHA services are always billed as POS 2 (home) regardless of the setting in which the services are actually provided. SN and HHA services provided in the day care or school setting will not be reimbursed.

OT and PT services must be billed one visit per day, per therapy.

The quantity billed must be identified and each procedure code must be listed as separate line items on the claim.

Procedural modifiers are required when billing SN, HHA, OT, and PT visits.

Modifier	Visit Service Category
U2	SN or HHA second visit per day
U3	SN or HHA third visit per day
GO	OT
GP	PT

Note: The U2 and U3 modifiers are only required if a PRN SN visit is the second or third SN or HHA visit performed on the same date of service.

3.2.3 Home Health Skilled Nursing Services

Home health SN services are a benefit of Texas Medicaid when a client requires nursing services for an acute condition or an acute exacerbation of a chronic condition that can be met on an intermittent or part-time basis and typically has an end-point. SN visits may be provided on consecutive days. SN visits are intended to provide SN care to promote independence and support the client living at home. Home Health Services must be provided by a licensed and certified home health agency enrolled in Texas Medicaid.

Note: Nursing visits for the primary purpose of assessing a client's care needs to develop a POC are considered administrative and not billable. These visit costs are reflected on the cost report.

An acute condition is a condition or exacerbation that is anticipated to improve and reach resolution within 60 days. An intermittent basis is an SN visit that is provided for less than eight hours per visit and less frequently than daily. Intermittent visits may be delivered in interval visits up to 2.5 hours per visit, not to exceed a combined total of three visits per day. A part-time basis is an SN visit that is provided less than eight hours per day for any number of days per week. Part-time visits may be continuous up to 7.5 hours per day (not to exceed a combined total of three 2.5 hour visits).

SN visits are considered medically necessary for clients who require the following:

- Skillful observations and judgment to improve health status, skilled assessment, or skilled treatments and procedures
- Individualized, intermittent, acute skilled care
- Skilled interventions to improve health status, and if skilled intervention is delayed, it is expected to result in the deterioration of a chronic condition or one of the following:
 - Loss of function
 - Imminent risk to health status due to medical fragility, or risk of death

When documentation does not support medical necessity for home health SN visits, providers may be directed to possible alternative services based on the client's age and needs.

Note: *For Medicaid clients who are 20 years of age or younger, home health skilled nursing services are available when the client requires nursing services for an acute condition, acute exacerbation of a chronic condition, or a chronic condition that can be treated on an intermittent or part-time basis.*

3.2.3.1 SN Visits

SN visits (procedure code G0154) are limited to SN procedures performed by an RN or licensed vocational nurse (LVN) licensed to perform these services under the Texas Nursing Practice Act and include direct SN care, and parent or guardian, caregiver training, and education as well as SN observation, assessment, and evaluation by an RN, provided a primary physician specifically requests that a nurse visit the client for this purpose, and the physician's order reflects the medical necessity for the visit.

For all clients, SN visits may be provided in the following locations:

- Home of the client, parent, guardian, or caregiver
- Foster homes
- Independent living arrangements

The cost of incidental medical supplies used during an SN or HHA visit may be added to the charge of the visit (\$10 maximum for medical supplies is included in G0154 visit code).

3.2.3.1.1 SN Care

SN care consists of those services that must, under state law, be performed by an RN or LVN, and meet the criteria for SN services specified in the Title 42 Code of Federal Regulations (CFR) §§ 409.32, 409.33, and 409.44. In determining whether a service requires the skill of a licensed nurse, consideration must be given to the inherent complexity of the service, the condition of the client, and the accepted standards of medical and nursing practice.

The fact that the SN service can be, or is taught to the client or to the client's family or friends does not negate the skilled aspect of the service when the service is performed by a nurse. If the service could be performed by the average nonmedical person, the absence of a competent person to perform it does not cause it to be an SN service. If the nature of a service is such that it can safely and effectively be performed by the average nonmedical person without direct supervision of a licensed nurse, the service cannot be regarded as an SN service.

Some services are classified as SN services on the basis of complexity alone (e.g., intravenous and intramuscular injections or insertion of catheters), and if reasonable and necessary to the treatment of the client's illness or injury, would be covered on that basis. However, in some cases, the client's condition may cause a service that would ordinarily be considered unskilled to be considered an SN service. This may occur when the client's condition is such that the service can be safely and effectively provided only by a nurse.

A service which, by its nature, requires the skills of a nurse to be provided safely and effectively continues to be a skilled service even if it is taught to the client, the client's family, or other caregivers. Where the client needs the SN care and there is no one trained, able and willing to provide it, the services of a nurse would be reasonable and necessary to the treatment of the illness or injury.

SN services must be reasonable and necessary to the diagnosis and treatment of the client's illness or injury within the context of the client's unique medical condition. To be considered reasonable and necessary for the diagnosis or treatment of the client's illness or injury, the services must be consistent with the nature and severity of the illness or injury, the client's particular medical needs, and within

accepted standards of medical and nursing practice. A client's overall medical condition is a valid factor in deciding whether skilled services are needed. A client's diagnosis should never be the sole factor in deciding whether the service the client needs is either skilled or not skilled.

The determination of whether the services are reasonable and necessary should be made in consideration of the primary physician's determination that the services ordered are reasonable and necessary. The services must, therefore, be viewed from the perspective of the condition of the client when the services were ordered, and what was, at that time, reasonably expected to be appropriate treatment for the illness or injury throughout the certification period.

SN care must be provided on a part-time or intermittent basis.

3.2.3.1.2 Professional Nursing

Professional nursing provided by an RN, as defined in the Texas Nursing Practice Act, means the performance of an act that requires substantial specialized judgment and skill, the proper performance of which is based on knowledge and application of the principles of biological, physical, and social science as acquired by a completed course in an approved school of professional nursing. The term does not include acts of medical diagnosis or the prescription of therapeutic or corrective measures.

Professional nursing involves:

- The observation, assessment, intervention, evaluation, rehabilitation, care and counsel, or health teachings of a person who is ill, injured, infirm, or experiencing a change in normal health processes.
- The maintenance of health or prevention of illness.
- The administration of a medication or treatment as ordered by a physician, podiatrist, or dentist.
- The supervision of delegated nursing tasks or teaching of nursing.
- The administration, supervision, and evaluation of nursing practices, policies, and procedures.
- The performance of an act delegated by a physician.
- Development of the nursing care plan.

3.2.3.1.3 Vocational Nursing

Vocational nursing, as defined in the Texas Nursing Practice Act, means a directed scope of nursing practice, including the performance of an act that requires specialized judgment and skill, the proper performance of which is based on knowledge and application of the principles of biological, physical, and social science as acquired by a completed course in an approved school of vocational nursing. The term does not include acts of medical diagnosis or the prescription of therapeutic or corrective measures.

Vocational nursing involves:

- Collecting data and performing focused nursing assessments of the health status of an individual
- Participating in the planning of the nursing care needs of an individual
- Participating in the development and modification of the nursing care plan
- Participating in health teaching and counseling to promote, attain, and maintain the optimum health level of an individual

Vocational nursing also involves assisting in the evaluation of an individual's response to a nursing intervention and the identification of an individual's needs and engaging in other acts that require education and training, as prescribed by board rules and policies, commensurate with the nurse's experience, continuing education, and demonstrated competency.

3.2.4 Home Health Aide Services

HHA visits (procedure code G0156) are a benefit of Texas Medicaid when a client requires nursing services for an acute condition or an acute exacerbation of a chronic condition that can be met on an intermittent or part-time basis. HHA visits will not be considered unless the client also requires SN or therapy services. HHA visits may be provided on consecutive days. HHA visits are intended to provide personal care under the supervision of an RN, occupational therapist, or physical therapist employed by the home health agency to promote independence and support the client living at home.

An acute condition is considered a condition or exacerbation that is anticipated to improve and reach resolution within 60 days. An intermittent basis is considered an HHA visit provided for less than eight hours per visit and less frequently than daily. Intermittent visits may be delivered in interval visits up to 2.5 hours per visit, not to exceed a combined total of three visits per day. A part-time basis is considered an HHA visit provided less than eight hours per day for any number of days per week. Part-time visits may be continuous up to 7.5 hours per day (not to exceed a combined total of three 2.5 hour visits).

HHA visits are considered medically necessary for clients who require the following:

- Skillful observations and judgment to improve health status, skilled assessment, or skilled treatments or procedures
- Individualized, intermittent, acute skilled care
- Skilled interventions to improve health status, and if skilled intervention is delayed, it is expected to result in the deterioration of a chronic condition or one of the following:
 - Loss of function
 - Imminent risk to health status due to medical fragility, or risk of death
- General supervision of nursing care provided by an HHA over whom the RN, occupational therapist, or physical therapist is administratively or professionally responsible

When documentation does not support medical necessity for HHA visits, providers may be directed to possible alternative services based on the client's age and needs.

3.2.4.1 HHA Visits

HHA visits are intended to provide hands-on personal care, performance of simple procedures as an extension of therapy or nursing services, assistance in ambulation or exercises, and assistance in administering medications that are ordinarily self-administered.

Any HHA services offered by a home health agency must be provided by a qualified HHA under the supervision of a qualified licensed individual (RN, occupational therapist, or physical therapist) employed by the home health agency.

For all clients, HHA visits may be provided in the following locations:

- Home of the client, parent, guardian, or caregiver
- Foster homes
- Independent living arrangements

The duties of an HHA during a visit include, but are not limited to the following:

- Ambulation
- Assistance with medication that is ordinarily self-administered
- Assisting with nutrition and fluid intake
- Completing appropriate documentation
- Exercise

- Household services essential to the client's health care at home
- Obtaining and recording the client's vital signs (temperature, pulse, respirations, and blood pressure)
- Observation, reporting, and documentation of the client's status, and the care or service furnished
- Personal care (hygiene and grooming), including, but not limited to the following:
 - Sponge, tub, or shower bath
 - Shampoo, sink, tub, or bed bath
 - Nail and skin care
 - Oral hygiene
- Positioning
- Range of motion
- Reporting changes in the client's condition and needs
- Safe transfer
- Toileting and elimination care

3.2.4.2 Supervision of HHA

Supervision, as defined by the Texas Nursing Practice Act, is the process of directing, guiding, and influencing the outcome of an individual's performance of an activity. An RN, occupational therapist, or physical therapist must provide the HHA written instructions for all the tasks delegated to the HHA. An occupational therapist or physical therapist may prepare the written instructions if the client is receiving only HHA visits, which do not include delegated SN tasks, in addition to the therapy services.

The requirements for HHA supervision are as follows:

- When only HHA visits are provided, an RN must make a supervisory visit to the client's residence at least once every 60 days. The supervisory visit must occur when the HHA is providing care to the client.
- When SN, OT, or PT visits are provided in addition to an HHA visit, an RN must make a supervisory visit to the client's residence at least every two weeks. The supervisory visit must occur when the HHA is providing care to the client.
- When only OT or PT visits are provided in addition to HHA visits, the appropriate therapist may make the supervisory visit in place of an RN. The supervisory visit must occur when the HHA is providing care to the client.
- Documentation of HHA supervision must be maintained in the client's medical record.

3.2.5 DME and Medical Supplies Submitted with a Plan of Care (POC)

The cost of incidental medical supplies used during an SN or HHA visit may be added to the charge of the visit (\$10 maximum for medical supplies and included in G0154 visit code). Medical supplies left at the home for the client to use must be billed with the provider identifier enrolled as a DME supplier after prior authorization has been granted by the TMHP Home Health Services Prior Authorization Department.

Refer to: Subsection 2.2, "Services, Benefits, Limitations, and Prior Authorization" in the *Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook (Vol. 2, Provider Handbooks)* for DME or medical supplies prior authorization information.

When the Home Health Services POC is used to submit a prior authorization for DME or medical supplies that will be used in conjunction with the professional services provided by the agency, such as SN, HHA, OT, or PT, the home health agency's DME provider identifier must be submitted on the POC, and all of the requested DME and medical supplies must be listed in the "Supplies" section of the POC. The POC does not require a physician's signature before prior authorization of professional services, DME, or medical supplies is requested but does require the assessing RNs dated signature. The POC must be signed and dated by a primary physician familiar with the client prior to submitting a claim for services and no later than 30 days from the SOC date.

If the home health agency uses the [Home Health Services \(Title XIX\) DME/Medical Supplies Physician Order Form](#), the agency must complete Section A. A primary physician familiar with the client must complete Section B, sign, and date it prior to submission to TMHP for prior authorization of the requested DME or medical supplies.

The following information is required to consider these medical supplies for prior authorization:

- Item description
- Procedure code
- Quantity of each medical supply requested
- Manufacturer's suggested retail price (MSRP) for items that do not have a maximum fee assigned

Refer to: Subsection 2.2, "Services, Benefits, Limitations, and Prior Authorization" in the *Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook (Vol. 2, Provider Handbooks)* for DME or medical supplies prior authorization information.

3.2.6 Medication Administration Limitations

Nursing visits for the purpose of administering medications are not a benefit if one of the following conditions exists:

- The medication is not considered medically necessary to the treatment of the individual's illness or is not approved by the Food and Drug Administration (FDA) or is being used for indications not approved by the FDA.
- The administration of medication exceeds the therapeutic frequency or duration by accepted standards of medical practice.
- A medical reason does not prohibit the administration of the medication by mouth.
- The client, a primary caregiver, a family member, or neighbor have been taught or can be taught to administer subcutaneous (SQ/SC), intramuscular (IM), and intravenous (IV) injections and has demonstrated competency.
- The medication is a chemotherapeutic agent or blood product SQ/SC, IM, and IV injections.

3.2.7 Occupational Therapy (OT) Services

As stated in 1 TAC §354.1039, to be payable as a Home Health Services benefit, OT services must be:

- Provided by an occupational therapist or an OT assistant who is currently registered and licensed by the Executive Council of Physical Therapy and Occupational Therapy Examiners
- For the evaluation and function-oriented treatment of individuals whose ability to function in life roles is impaired by recent or current physical illness, injury, or condition

- For specific goal-directed activities to achieve a functional level of mobility and communication to prevent further dysfunction within a reasonable length of time based on the therapist's evaluation, physician's assessment, and POC

Note: *THSteps-eligible clients who qualify for medically necessary services beyond the limits of this Home Health Services benefit will receive those services through CCP.*

Refer to: Subsection 2.14, "Therapy Services (CCP)" in the *Children's Services Handbook (Vol. 2, Provider Handbooks)* for OT benefits for clients who are 20 years of age and younger and Section 4, "Therapists, Independent Practitioners, and Physicians" in this handbook for OT benefits provided by a physician.

3.2.8 Physical Therapy (PT) Services

As stated in 1 TAC §354.1039, in order to be payable as a Home Health Services benefit, PT services must be:

- Provided by a physical therapist or PT assistant who is currently licensed by the Executive Council of Physical Therapy and Occupational Therapy Examiners.
- For the treatment of an acute musculoskeletal or neuromuscular condition or an acute exacerbation of a chronic musculoskeletal or neuromuscular condition.
- Expected to improve the client's condition in a reasonable and generally predictable period of time, based on the physician's assessment of the client's restorative potential after any necessary consultation with the therapist.
- Provided only until the client has reached the maximum level of improvement. Repetitive services designed to maintain function when the maximum level of improvement has been reached are not a benefit. Additionally, services related to activities for the general good and welfare of clients, such as general exercises to promote overall fitness and flexibility, and activities to provide diversion or general motivation are not reimbursed.

Note: *THSteps-eligible clients who qualify for medically necessary services beyond the limits of this Home Health Services benefit may receive those services through CCP.*

Refer to: Subsection 2.14, "Therapy Services (CCP)" in the *Children's Services Handbook (Vol. 2, Provider Handbooks)* for PT benefits for clients who are 20 years of age and younger.

Section 4, "Therapists, Independent Practitioners, and Physicians" in this handbook for PT benefits provided by a physician.

3.2.9 Occupational Group Therapy and Physical Group Therapy

Group therapy consists of simultaneous treatment of two or more clients who may or may not be doing the same activities. If the therapist is dividing attention among the clients, providing only brief, intermittent personal contact, or giving the same instructions to two or more clients at the same time, the treatment is recognized as group therapy. The physician or therapist involved in group therapy services must be in constant attendance, but one-on-one client contact is not required.

3.2.9.1 Group Therapy Guidelines

The following guidelines must be followed in order to meet the Texas Medicaid criteria for group therapy:

- Physician prescription for group therapy. ECI providers are excluded from this requirement.
- Performance by or under the general supervision of a qualified licensed therapist as defined by licensure requirements.
- The licensed therapist involved in group therapy services must be in constant attendance (meaning in the same room) and active in the therapy.

- Each client participating in the group must have an individualized treatment plan for group treatment, including interventions, short and long-term goals, and measurable outcomes.

Texas Medicaid does not limit the number of clients who can participate in a group therapy session. Providers are subject to certification and licensure board standards regarding group therapy.

3.2.9.2 Group Therapy Documentation Requirements

The following documentation must be maintained in the client's medical record:

- Physician prescription for group therapy. ECI providers are excluded from this requirement.
- Individualized treatment plan that includes frequency and duration of the prescribed group therapy and individualized treatment goals.

Documentation for each therapy session must include the following:

- Name and signature of the licensed therapist providing supervision over the group therapy session
- Treatment goal addressed in the group
- Specific treatment techniques utilized during the group therapy session
- How the treatment technique will restore function
- Start and stop times for each session
- Group therapy setting or location
- Number of clients in the group

The client's medical record must be made available upon request.

When physical or occupational group therapy is administered, providers must bill procedure code 97150 for each member of the group.

Note: *There is an exception to these requirements for Early Childhood Intervention (ECI) Services. The group therapy guidelines for ECI services are outlined in Section 2.7, "Early Childhood Intervention (ECI) Services" in the Children's Services Handbook.*

3.2.10 Prior Authorization

To initiate a new prior authorization request, or request an extension of an existing prior authorization, home health services providers are required to submit the request online using the TMHP secure provider portal or on paper by faxing or mailing TMHP the appropriate paper prior authorization form.

The following prior authorization requests can be submitted on the TMHP website at www.tmhp.com:

- Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form
- Home Health Services POC

Refer to: Subsection 5.5.1, "Prior Authorization Requests Through the TMHP Website" in Section 5, "Prior Authorization" (*Vol. 1, General Information*) for more information, including mandatory documentation requirements.

Providers can still call the Home Health Inquiry and Prior Authorization telephone number to inquire about the status of home health prior authorization requests that have been initially submitted to TMHP online or by fax or mail.

The Home Health Inquiry and Prior Authorization telephone number is 1-800-925-8957.

If a client's primary coverage is private insurance and Medicaid is secondary, prior authorization is required for Medicaid reimbursement. If the primary coverage is Medicare, Medicare approves the service, and Medicaid is secondary, prior authorization is not required. If Medicare denied the service, then Medicaid prior authorization is required. Contact TMHP within 30 days of the date of Medicare's

final disposition. The medicare remittance advice notice (MRAN) containing Medicare's final disposition must accompany the prior authorization request. If the service is a Medicaid-only service, prior authorization is required within three business days of the SOC date.

The provider is responsible for determining if eligibility is effective by using AIS or an electronic eligibility inquiry through the TMHP EDI gateway.

The provider must contact the TMHP Home Health Services Prior Authorization Department within three business days of the SOC for professional services or the DOS for DME or medical supplies to obtain prior authorization following the RN's assessment/evaluation of the client in the home setting. When contacting TMHP by telephone for prior authorization, the nurse who made the initial assessment visit in the client's home must make this call to answer questions about the client's condition as it relates to the medical necessity.

If inadequate or incomplete information is provided or medical necessity is lacking, the provider will be requested to furnish additional documentation as required to make a decision on the request. Because it often must be obtained from the client's primary physician, providers have two weeks to submit the requested documentation. If the additional documentation is received within the two-week period, prior authorization can be considered for the original date of contact. If the additional documentation is received more than two weeks from the request for the documentation, prior authorization is not considered before the date the additional documentation is received. It is the home health agency's responsibility to contact the primary physician to obtain the requested additional documentation.

The Home Health Prior Authorization Checklist is a useful resource for home health agency providers completing the prior authorization process. This optional form offers the nurse a detailed account of the client's needs when completed.

Refer to: Subsection 2.2.2, “* Durable Medical Equipment (DME) and Supplies” in the *Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook (Vol. 2, Provider Handbooks)* for DME or medical supplies prior authorization.

[Home Health Prior Authorization Checklist](http://www.tmhp.com) on the TMHP website at www.tmhp.com.

Client eligibility for Medicaid is for one month at a time. Providers should verify eligibility every month. Prior authorization does not guarantee payment.

3.2.10.1 Home Health SN and HHA Services Prior Authorization Requirements

SN and HHA services require prior authorization. Requests must be submitted in writing, by fax or mail. Providers must obtain prior authorization within three business days of the SOC date for an initial prior authorization. For extension of the prior authorization providers must obtain prior authorization within seven business days of the new SOC date. During the prior authorization process, providers are required to deliver the requested services from the SOC date, which is the date agreed to by the primary physician, the RN, the home health agency, and the client, parent, guardian, or caregiver. The SOC date must be documented on the POC.

Prior authorization of SN or HHA visits requires that a client's primary physician complete the following steps:

- Provide specific, written, dated orders for SN or HHA visits or recertification that identifies that the prescribed visits are medically necessary as defined in subsection 3.2.3, “Home Health Skilled Nursing Services” and subsection 3.2.4, “Home Health Aide Services” in this handbook.
- Maintain documentation in the client's medical record that supports the medical necessity of the prescribed visits.
- Maintain documentation in the client's medical record that demonstrates that the client's medical condition is sufficiently stable to permit safe delivery of the prescribed visits as described in the client's Home Health Services POC.

- Establish a medical POC that is maintained in the client's medical record.
- Provide continuing care and medical supervision.
- Review and approve the client's Home Health Services POC once every 60 days or more frequently if the primary physician determines it to be necessary, including but not limited to a change in the client's condition.

Providers who request prior authorization for SN or HHA services must submit the following documentation:

- A completed client assessment
- A completed Texas Medicaid Home Health Services POC that must:
 - Be signed and dated by the assessing RN
 - Signed and dated by the primary physician or submitted with the signed and dated physician's orders

All signatures and dates must be current, unaltered, original, and handwritten; computerized or stamped signatures or dates will not be accepted. All documentation, including all written and verbal orders, and all physician-signed POCs, must be maintained by the ordering physician. The home health agency must keep the original, signed copy of the POC in the client's medical record.

Requests must be based on the medical needs of the client. Documentation must support the quantity and frequency of intermittent or part-time SN and HHA visits that will safely meet the client's needs. The amount and duration of SN and HHA visits requested will be evaluated by the claims administrator. The home health agency must ensure the requested services are supported by the client assessment, POC, and the physician's orders.

If a client is already receiving authorized SN visits, instructions to the client or caregiver in the self-administration of prescribed injections (IM, SQ, or IV), including, but not limited to, Factor 8 and intravenous immunoglobulin (IVIg), are considered part of the existing authorized SN home visits. Additional nursing visits for instruction and initial supervision of the client or caregiver will not be allowed.

Instruction and initial supervision must be provided by an RN who is appropriately trained in the administration of the drug or product being administered, and the client and caregiver must be involved in the decision to self-administer the medication.

In order to qualify for self-administration of prescribed injections, the client must be medically stable, and the client or caregiver who is administering the injectable medication (IM, SQ, or IV) must:

- Have a history of compliance with other medications.
- Have a simple drug regimen.
- Have the ability to read and understand directions on the medication label.
- Demonstrate knowledge of the administration technique, maintenance of the required supplies and equipment, and storage requirements.

The length of the prior authorization is determined on an individual basis and is based on the goals and timelines identified by the primary physician, home health agency, RN, and client, parent, guardian, or caregiver. SN and HHA visits will be prior authorized for no more than 60 days at a time.

As a client's problems are resolved and goals are met, a client's condition is expected to become more stable, and the client's needs for SN and HHA services may decrease.

Private duty nursing (PDN) and SN should not be routinely performed on the same date during the same time period. PDN and SN will not be considered for reimbursement when the services are performed on the same date during the same time period without prior authorization approval.

Both the intermittent SN visit and the PDN services provided during the same time period may be recouped if the documentation does not support the medical necessity of each service provided.

3.2.10.1.1 Routine Laboratory Specimens

SN visits to obtain routine laboratory specimens may be considered when the only alternative to obtain the specimen is to transport the client by ambulance.

3.2.10.1.2 Home Phototherapy

SN visits to address hyperbilirubinemia will not be considered for prior authorization if the client has an open prior authorization for home phototherapy. Home phototherapy is reimbursed as a daily global fee and includes coverage of SN visits for parent or caregiver teaching, client monitoring, and obtaining customary and routine laboratory specimens.

3.2.10.1.3 Prothrombin Time/Internationalized Normalized Ration (TP/INR) Home Testing Device

SN visits will not be authorized for setting up a TP/INR home testing device or training clients to use it.

3.2.10.1.4 Total Parenteral Nutrition (TPN)

SN visits to address TPN must:

- Be provided by an RN appropriately trained in the administration of TPN.
- Include education of the client or caregiver regarding the in-home administration of TPN before administration initially begins.
- Include the use and maintenance of required medical supplies and DME.
- Occur at least once every month to monitor the client's status and to provide ongoing education to the client and caregiver regarding the administration of TPN.

For clients receiving PDN who also require TPN administration education, intermittent SN visits may be considered for separate prior authorization when:

- The PDN provider is not an RN appropriately trained in the administration of TPN, and the PDN provider is not able to perform the function.
- There is documentation to support the medical need for an additional skilled nurse to perform TPN.

For clients receiving PDN who also require TPN administration education, the SN services may be prior authorized only for the client/caregiver training in TPN administration.

The nurse providing the intermittent SN visit for TPN services will only be reimbursed for time spent delivering client and family instruction and for direct client TPN services. The services delivered must be documented in the client's medical record.

If the SN visit for TPN education occurs during a time period when the PDN provider is caring for the client, both the PDN provider and the nurse educator must document in the client's medical record the skilled services individually provided, including, but not limited to, the following:

- The start and stop time of each nursing provider's specialized tasks
- The client condition that requires the performance of skilled PDN tasks during the SN visit for TPN education
- The skilled services that each provided during that time period

Up to a maximum combined total of three SN and HHA visits may be prior authorized per day.

When documentation does not support medical necessity for home health SN and HHA visits, providers may be directed to possible alternative services based on the client's age and needs.

A prior authorization for SN and HHA visits is no longer valid when:

- The client is no longer eligible for Medicaid.
- The client no longer meets the medical necessity criteria for SN or HHA services.
- The place of service cannot provide for the health and safety of the client.
- The client, parent, guardian, or caregiver refuses to comply with the primary physician's plan of treatment and compliance is necessary to ensure the health and safety of the client.
- The client changes providers and the change of notification is submitted to the claims administrator in writing with a prior authorization request from the new provider.

An SN or HHA visit may be prior authorized to provide services to more than one client over the span of the day as long as each client's care is based on an individualized POC and each client's needs and POC do not overlap with another client's needs and POC. Settings in which an SN or HHA provider may provide services in a provider-client ratio greater than 1:1 include, but are not limited to, homes with more than one client receiving Home Health Services, foster homes, and independent living arrangements.

Refer to: Subsection 2.13, "Private Duty Nursing (PDN)(CCP)" in the *Children's Services Handbook (Vol. 2, Provider Handbooks)* for information about PDN.

3.2.10.2 Canceling a Prior Authorization

The client has the right to choose their home health agency provider and to change providers. If the client changes providers, TMHP must receive a change of provider letter with a new POC or [Home Health Services \(Title XIX\) DME/Medical Supplies Physician Order Form](#). The client must sign and date the letter, which must include the name of the previous provider, the current provider, and the effective date for the change.

The client is responsible for notifying the original provider of the change and the effective date. Prior authorization for the new provider can only be issued up to three business days before the date TMHP receives the change of provider letter and the new [Home Health Services \(Title XIX\) DME/Medical Supplies Physician Order Form](#).

3.2.10.3 Home Health SN and HHA Services That Will Not Be Prior Authorized

SN visits requested primarily to provide the following will not be prior authorized:

- Respite care
- Child care
- Activities of daily living for the client
- Housekeeping services
- Routine post-operative disease, treatment, or medication teaching after a physician visit
- Routine disease, treatment, or medication teaching after a physician visit
- Individualized, comprehensive case management beyond the service coordination required by the Texas Nursing Practice Act
- SN visits will not be approved for the sole purpose of instructing the client on the use of the subcutaneous injection port device. Any necessary instruction must be performed as part of the office visit with the primary physician.

HHA visits requested primarily to provide the following will not be prior authorized:

- Housekeeping services
- Services provided to a client residing in a hospital, SN facility, or intermediate care facility

Certain facilities are required by licensure to meet all the medical needs of the client. SN or HHA visits will not be prior authorized for clients receiving care in any of the following facilities:

- Hospitals
- SN facilities
- Intermediate care facilities for individuals with intellectual disabilities (ICF-IID)
- Special care facilities, including but not limited to, sub-acute units and facilities for the treatment of acquired immunodeficiency syndrome (AIDS)

3.2.10.4 OT and PT Prior Authorization Requirements

Additional information is available on the TMHP website at www.tmhp.com. For requests that are submitted on or after April 1, 2014, providers must follow all guidelines that became effective January 1, 2014.

Prior authorization requests for occupational or physical therapy services, provided through a home health agency for an acute condition or an exacerbation of a chronic condition, must be obtained by contacting the TMHP Home Health Department.

The date and time that therapy began and ended must be documented and maintained in the client's medical record.

The submitted POC must include all information as shown on the Texas Medicaid Home Health POC form. The Home Health POC form is recommended but not required. The Medicare POC (485/486) will not be accepted.

Prior authorization for individual therapy services will be considered when all of the following criteria are met:

- The client has an acute condition or acute exacerbation of a chronic medical condition resulting in a significant decrease in functional ability that will benefit from therapy services that can be performed in a home setting.
- Documentation supports treatment goals and outcomes for the specific therapy disciplines requested.
- Services do not duplicate those that are provided concurrently by any other therapy.
- Services are within the provider's scope of practice, as defined by state law.

A nursing POC that addresses the OT or PT services must be completed, signed, and dated by the RN who performed the client's admission home assessment prior to the RN requesting authorization and must include:

- Diagnoses (including ICD-9-CM diagnosis codes)
- Treatment goals
- Duration of need
- Frequency
- Requested dates of service

To complete the prior authorization process by paper, the provider must complete and submit the prior authorization requirements documentation through fax or mail. The provider must maintain a copy of the prior authorization request and all submitted documentation in the client's medical record at the therapy provider's place of business.

To complete the prior authorization process electronically, the provider must complete and submit the prior authorization requirements documentation through any approved electronic method. The provider must maintain a copy of the prior authorization request and all submitted documentation in the client's medical record at the therapy provider's place of business.

To avoid unnecessary denials, the physician must provide correct and complete information, including documentation of medical necessity for the services requested. The physician must maintain documentation of medical necessity in the client's medical record. The requesting therapy provider may be asked for additional information to clarify or complete a request.

In addition to the nursing POC, home health agencies must provide the following information at the time each request for OT or PT is made:

- The requested OT or PT procedure codes with the appropriate GO or GP modifier
- OT or PT evaluation or re-evaluation results
- An initial or subsequent therapy treatment plan to include occupational or physical goals and dates of service requested

Prior authorization may be granted for a period not to exceed 60 days. A prior authorization request may be extended for an additional 60 days when requests are submitted with supporting documentation. Subsequent prior authorization requests may be granted for an additional 60 days, not to exceed a total of 180 days, when submitted with documentation.

Requests are not accepted from, nor are authorizations granted directly to the occupational therapist, physical therapist, OT assistant, or PT assistant.

If a client discontinues therapy with a provider, and a new provider begins therapy during an existing authorization period, submission of a new POC and documentation of the last therapy visit with the previous provider is required, along with a letter from the client, parent, or guardian stating the date therapy ended with the previous provider.

Group therapy procedures involve constant attendance of the physician, occupational therapist, or physical therapist, but by definition do not require one-on-one client contact by the physician, occupational therapist, or physical therapist. Procedure code 97150 may be submitted for each member of the group.

3.2.10.4.1 Initial Prior Authorization Requests

The initial request for prior authorization must be received no more than five business days from the date the therapy treatments are initiated. Initial prior authorization requests that are received after the five business-day period will be denied for dates of service that occurred before the date that the request was received.

The following supporting documentation must be submitted for an initial prior authorization request:

- A completed Home Health Services Plan of Care (POC) form. The request form must be signed and dated by the ordering physician. If the prior authorization form is not signed and dated by the physician, the form must be accompanied by a written order or prescription that is signed and dated by the physician, or a documented verbal order from the physician that includes the date the verbal order was received.

Note: *A verbal order is considered current when the date received is on, or no more than, 60 rolling days before the start of therapy. A written order or prescription is considered current when it is signed and dated on, or no more than, 60 rolling days before the start of therapy. A request received without a physician's signature, documented verbal order, or written prescription will not be processed and will be returned to the provider.*

Prior authorization requests that were submitted to the TMHP Prior Authorization

Department using the previously published Request for Outpatient Physical, Occupational, or Speech Therapy (PT, OT, ST) Prior Authorization form will be considered on a case-by-case basis.

- A current therapy evaluation that documents the client's age at the time of the evaluation for each therapy discipline.

Note: *A therapy evaluation submitted with an initial request for prior authorization is current when it is performed within 60 rolling days before the initiation of therapy services.*

- A client-specific, comprehensive treatment plan that is established by the ordering physician or therapist to be followed during treatment in the home setting and includes all of the following:
 - Date and signature of the licensed therapist
 - Diagnosis
 - Treatment goals for the therapy discipline and associated disciplines requested that are related to the client's individual needs
 - A description of the specific therapy disciplines being prescribed
 - Duration and frequency of therapy
 - Date of onset of the illness, injury, or exacerbation requiring the home health services
 - Requested dates of service

3.2.10.4.2 Subsequent Prior Authorization Requests

A prior authorization request for subsequent services must be received no more than 30 days before the current authorization expires. Prior authorization requests for subsequent services received after the current authorization expires will be denied for dates of service that occurred before the date the submitted request was received.

Prior authorization requests for subsequent services may be considered for increments up to 60 days for each request with documentation that supports medical necessity and includes all of the following:

- A new, completed Home Health Plan of Care (POC) form, signed and dated by the ordering physician. If the prior authorization form is not signed and dated by the physician, the form must be accompanied by a written order of prescription that is signed and dated by the physician, or a documented verbal order from the physician that includes the date the verbal order was received.

Note: *A verbal order is considered current when the date received is on, or no more than, 60 rolling days before the start of therapy. A written order or prescription is considered current when it is signed and dated on, or no more than, 60 rolling days before the start of therapy. A request received without a physician's signature, documented verbal order, or written prescription will not be processed and will be returned to the provider.*

- A current therapy evaluation or re-evaluation for each therapy discipline documenting the client's age at the time of evaluation or re-evaluation

Note: *A therapy evaluation or re-evaluation for subsequent services is current when performed within 30 days before the prior authorization request is received.*

For example:

- If an authorization period ends on July 31, 2014, TMHP must receive the prior authorization request for subsequent services between July 1, 2014, and July 31, 2014.
- The therapy evaluation or re-evaluation for subsequent services can be performed up to 30 days before the date TMHP receives the prior authorization request.
- If TMHP receives the prior authorization request for subsequent services on July 1, 2014, the evaluation or re-evaluation can be performed June 1, through July 1, 2014.

- If TMHP receives the prior authorization request for subsequent services on July 31, 2014, the evaluation or re-evaluation can be performed July 1, 2014, through July 31, 2014.

An updated client-specific comprehensive treatment plan established by the ordering physician or therapist to be followed during treatment in the home health setting must include all of the following:

- Date and signature of the licensed therapist
- Diagnosis(es)
- Updated treatment goals that are related to the client's individual needs for the therapy discipline and associated disciplines requested
- A description of the specific therapy disciplines that are being prescribed
- Duration and frequency of therapy
- Date of onset of the illness, injury, or exacerbation that requires the home health services
- A brief summary of the outcomes of the previous treatment as it relates to the client's debilitating condition
- Requested dates of service

3.2.10.4.3 Revisions to Existing Prior Authorization Requests

A prior authorization request for revisions to services may be considered up to the end of the current approved prior authorization.

Requests for revisions to an existing prior authorization must be received no later than five business days from the date that the revised therapy treatments are initiated.

Requests for revisions that are received after the five business-day period will be denied for dates of service that occurred before the date that the request was received.

If a provider or client discontinues therapy during an existing prior authorized period and the client requests services through a new provider, the new provider must submit all of the following:

- A new therapy request form
- A new evaluation with required documentation
- A change-of-provider letter signed and dated by the client or responsible adult documenting the date the client ended therapy (effective date of change) with the previous provider, the names of the previous and new providers, and an explanation of why providers were changed

A change of provider during an existing authorization period will not extend the length of the original authorization with the new provider. The original authorized period will apply to services that are performed by the new provider.

3.2.10.4.4 Physical Therapy and Occupational Therapy Frequency Levels

Physical therapy and occupational therapy services may be provided at one of the following levels commensurate with the client's medical condition, life stage, and therapy needs that are identified in the documentation submitted:

- **High Frequency:** Therapy provided three or more times a week may be considered when documentation supports all of the following:
 - Client has a medical condition that is rapidly changing
 - Client has a potential for rapid progress or rapid decline or loss of functional skill

- The client's therapy plan and home program require frequent modification by the licensed therapist
- The client requires a high frequency of intervention for a limited duration (60 days or fewer) to recover function lost due to surgery, illness, or trauma
- **Moderate Frequency:** Therapy provided two times a week may be considered when documentation supports one or more of the following:
 - The client is making functional progress toward goals
 - The client is in a critical period to restore function or is at risk of regression
 - The licensed therapist needs to adjust the client's therapy plan and home program weekly or more often than weekly, based on the client's progress and medical needs
 - The client has complex needs requiring on-going education of the responsible adult
- **Low Frequency:** Therapy provided one time per week may be considered when the documentation supports one or more of the following:
 - The client is making progress toward the client's goals, but the progress has slowed, or the client may be at risk of deterioration due to the client's medical condition
 - The licensed therapist is required to adjust the client's therapy plan and home program weekly based on the client's progress.

As a client's condition improves and goals are met, it is anticipated that the therapy will decrease to a lesser frequency level.

3.2.10.5 Medicare and Medicaid Prior Authorization

Qualified Medicare Beneficiaries (QMB) are not eligible for Medicaid benefits. Providers should not submit prior authorization requests to the TMHP Home Health Services Prior Authorization Department for these clients.

For eligible Medicare and Medicaid clients, Medicare is the primary insurance and providers must contact Medicare first for prior authorization and reimbursement. Home health service prior authorizations may be given for HHA services, certain medical supplies, or DME suitable for use in the home in one of the following instances:

- When an eligible Medicaid client (enrolled in Medicare) does not qualify for Home Health Services under Medicare because SN care, OT, or PT are not a part of the client's care.
- When the medical supplies and DME are not a benefit of Medicare Part B and are a home health services benefit.

Federal and state laws require the use of Medicaid funds for the payment of most medical services only after all reasonable measures have been made to use a client's third party resources or other insurance.

Note: *If the client has Medicare Part B coverage, contact Medicare for prior authorization requirements and reimbursement. If the service is a Part B benefit, do not contact TMHP for prior authorization.*

To ensure that Medicare benefits are used first in accordance with Texas Medicaid regulations, the following procedures apply when requesting Medicaid prior authorization and payment of Home Health Services for clients:

- Contact TMHP for prior authorization of Medicaid services (based on medical necessity and home health services benefits) within 30 days of the date on the MRAN. Fax a copy of the original MRAN and the Medicare appeal review letter to the TMHP Home Health Services Prior Authorization Department for prior authorization.

- An MRAN is not required when a client is eligible for Medicare/Medicaid and needs HHA visits only. However, a skilled supervisory nursing visit must be made on the same day as the initial HHA visit and at least every 60 days (on the same day an HHA visit is made) thereafter as long as no skilled need exists. An SN supervisory visit is reimbursable, but an SN visit made for the primary purpose of assessing a client's nursing care is not. The SOC date will be the date of the first requested Medicare Home Health Services visit as listed on the original MRAN.

Note: *Claims for State of Texas Access Reform (STAR)+PLUS MQMB clients (those with Medicare and Medicaid) should always be submitted to TMHP as noted on these pages. The STAR+PLUS health plan is not responsible for these services if Medicare denies the service as not a benefit.*

For Medicaid qualified Medicare beneficiary (MQMB) clients, do not submit prior authorization requests to TMHP if the Medicare denial reason states "not medically necessary." Medicaid will only consider prior authorization requests if the Medicare denial states "not a benefit" of Medicare.

- When the client is 65 years of age or older or appears otherwise eligible for Medicare (e.g., a person who is blind or disabled), but has no Part A or Part B Medicare, the TMHP Home Health Services Prior Authorization Department uses regular prior authorization procedures. In this situation, the claim is held for a midyear status determined by HHSC. The maximum length of time a claim may be held in a "pending status" for Medicare determination is 120 days. After the waiting period, the claim is paid or denied. If denied, the EOB code on the R&S report indicates that Medicare is to be billed.

Refer to: Subsection 3.2.3, "Home Health Skilled Nursing Services" in this handbook.

Home health providers should follow these guidelines:

- Clients who are 64 years of age and younger without Medicare Part A or B:
 - If the agency erroneously submits an SOC notice to Medicare and does not contact TMHP for prior authorization, TMHP does not assume responsibility for any services provided before contacting TMHP. The SOC date is no more than three business days before the date the agency contacts TMHP. Visits made before this date are not considered a benefit of Texas Medicaid.
- Clients who are 65 years of age and older without Medicare Part A or Part B and clients with Medicare Part A or B regardless of age:
 - In filing home health claims, home health providers may be required to obtain Medicare denials before TMHP can approve coverage. When TMHP receives a Medicare denial, the SOC is determined by the date the agency requested coverage from Medicare. If necessary, the 95-day claims filing deadline is waived for these claims, provided TMHP receives notice of the Medicare denial within 30 days of the date on the MRAN containing Medicare's final disposition.
 - If the agency receives the MRAN and continues to visit the client without contacting TMHP by telephone, mail, or fax within 30 days of the date on the MRAN, TMHP will provide coverage only for services provided from the initial date of contact with TMHP. The SOC date is determined accordingly. TMHP must have the MRAN before considering the request for prior authorization.

TMHP will not prior authorize or reimburse the difference between the Medicare payment and the retail price for Medicare Part B eligible clients.

Refer to: Subsection 4.12, "Third Party Liability (TPL)" in Section 4, "Client Eligibility" (*Vol. 1, General Information*).

3.2.10.6 Procedure Codes that Must be Included with the Prior Authorization Request

The following procedure codes are not automatically included in the prior authorization requests for PT and OT services unless requested:

PT and OT Procedure Codes That Require Separate Prior Authorization for Home Health									
97012	97014	97016	97018	97022	97024	97026	97028	97032	97033
97035	97150	97535	97537	97542	97799				

Prior authorization requests for any of the procedure codes listed above must include documentation of:

- The frequency of therapy for the procedure code
- The total amount of time in units or visits requested for the procedure code
- The therapeutic activities for which the procedure code will be used
- The specific, measurable short-term and long-term goals for the procedure code
- The appropriate modifier for the type of therapy being requested

3.2.11 Limitations and Exclusions

Payment cannot be made for any service, medical supply, or DME for which federal financial participation (FFP) is not available.

Refer to: Subsection 2.1, “CCP Overview” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* to find which of these items are a benefit for CCP clients who are 20 years of age and younger and who are eligible to receive THSteps services.

Home Health Service benefits do not include the following:

- Aids for daily living, such as toothpaste, spoons, forks, knives, and reachers
- Allergy injections
- Any services, including medical supplies or DME, furnished to a client who is a resident of a public institution or a client in a hospital, SN facility, or intermediate care facility
- Any services, including medical supplies, furnished to a client before the effective date of Medicaid eligibility as certified by HHSC or after the date of termination of Medicaid eligibility
- Any services, including medical supplies, furnished without prior authorization by TMHP, except as listed
- Application of a modality to one or more areas; hot or cold packs
- Developmental therapy
- Inpatient rehabilitation
- Nursing visits to administer long-term SQ/SC, IM, oral, or topical medications, such as insulin, vitamin B12, or deferoxamine, or to set up medications such as prefill insulin syringes or medication boxes, on a long-term basis
- PDN services
- Personal protective equipment (such as gloves, masks, gowns, and sharps containers) for use by a health-care provider, including but not limited to an RN, LVN, or attendant in the home setting.
- Respite care (caregiver relief)
- Services that are not medically necessary, including, but not limited to:

- Massage therapy that is the sole therapy or is not part of a therapeutic plan of care to address an acute condition
- Hippotherapy
- Treatment solely for the instruction of other agency or professional personnel in the client's physical or occupational therapy program
- Training in non-essential tasks (e.g., homemaking, gardening, recreational activities, cooking, driving, assistance with finances, scheduling)
- Maintenance therapy, including passive range of motion and exercises, which are not directed towards restoration of a specific loss of function
- Emotional support, adjustment to extended hospitalization or disability, and behavioral readjustment
- Therapy prescribed primarily as an adjunct to psychotherapy
- ST provided in the home
- Visits made primarily for performing housekeeping services are not considered a benefit of Texas Medicaid. These requests should be referred to in-home and family support service at HHSC

Any therapy services that exceed 180 rolling days from the start of therapy are not considered to be acute and will not be covered.

Refer to: Subsection 1.11, "Texas Medicaid Limitations and Exclusions" in Section 1, "Provider Enrollment and Responsibilities" (*Vol. 1, General Information*).

Subsection 2.7, "Early Childhood Intervention (ECI) Services" in the *Children's Services Handbook (Vol. 2, Provider Handbooks)*.

Subsection 2.16, "Inpatient Rehabilitation Facility (Freestanding) (CCP)" in the *Children's Services Handbook (Vol. 2, Provider Handbooks)*.

3.3 Documentation Requirements

All documentation, including that which supports medical necessity, and the comprehensive treatment plan related to the therapy services that were prior authorized and provided, must be maintained in the client's medical record and made available upon request.

For each therapy discipline provided, the documentation maintained in the client's medical record must identify the therapy provider's name and must include all of the following:

- Date of service
- Start time of the therapy
- Stop time of the therapy
- Total minutes of therapy
- Specific therapy performed
- Client's response to the therapy

3.3.1 Written POC

A Home Health Services POC is required for SN, HHA, OT, or PT services. The POC is not required as an attachment with the claim, but a signed and dated POC must be maintained by the provider and primary physician in the client's medical record. The client's primary physician must recommend, sign, and date a POC. The POC must be initiated by the RN in a clear and legible format.

The POC must contain the following information:

- Activities permitted
- All pertinent diagnoses
- Available caregiver
- Client's Medicaid number
- Date the client was last seen by the primary physician. The client must be seen by a primary physician within 30 days of the initial SOC and at least once every six months thereafter unless the client's condition changes. The primary physician visit may be waived when a diagnosis has already been established by the primary physician and the recipient is under the continuing care and medical supervision of the primary physician. Any waiver must be based on the primary physician's written statement that an additional evaluation visit is not medically necessary. The original must be maintained by the primary physician and a copy must be maintained in the primary provider's files
- DME or medical supplies required
- Instructions for timely discharge or referral
- List of all community or state agency services the client receives in the home (e.g., Primary Home Care (PHC), PCS, community-based alternative [CBA], Medically Dependent Children's Program [MDCP])
- Medications including the dose, route, and frequency
- Mental status
- Nutritional requirements
- Physician's license number
- Prior and current functional limitations
- Prognosis
- Provider Medicaid number
- Rehabilitation potential
- Safety measures to protect against injury
- SOC date for Home Health Services
- Treatments, including amount, duration, and frequency
- Types of services including amount, duration, and frequency
- Wound care orders and measurements

Primary physicians that order OT or PT services must include the ICD-9-CM diagnosis codes for an acute or exacerbated event when OT and PT is being requested and the following documentation is included with the request:

- Specific procedures and modalities to be used
- Amount, frequency, and duration of therapy needed
- Physical and occupational therapy and goals
- Name of therapist who participated in developing the POC

The primary physician and home health agency personnel (SN, HHA, OT, or PT) must review the POC as often as the severity of the client's condition requires or at least once every 60 days. This signed and dated documentation must be maintained in the client's medical record and must include the primary physician and requesting provider information. This applies to all written and verbal orders, and POCs.

Verbal physician orders may be given only to people authorized to receive them under state and federal law. They must be written, signed, and dated by the RN or qualified therapist who is responsible for furnishing or supervising the ordered service and placed in the client's medical record. The physician who gave the verbal order must sign the written copy of the verbal order within two weeks or per agency policy if less than two weeks. The original verbal order (without the physician's signature) and a copy of the verbal order that has been signed by the physician must be maintained in the client's medical record.

The type and frequency of visits, DME, or medical supplies must appear on the POC *before* the primary physician signs the POC and must not be added after the primary physician has signed the POC. If any change in the POC occurs during a prior authorization period (e.g., additional visits, DME, or medical supplies), the home health agency must contact the TMHP Home Health Services Prior Authorization Department for prior authorization and maintain a completed, revised POC that has been signed and dated by the primary physician.

Coverage periods do not necessarily coincide with calendar weeks or months but instead cover a number of services to be scheduled between a start and end date that is issued for the prior authorization.

Providers may request the frequency of physical, occupational, or speech therapy services either by week or by month, but not both.

A week includes the day of the week on which the prior authorization period begins and continues for seven days. For example, if the prior authorization starts on a Thursday, the prior authorization week runs Thursday through Wednesday. The number of therapy services authorized for a week must be provided within the prior authorized week.

A month includes the day of the month on which the prior authorization period begins and continues for 30 days. The number of therapy services authorized for a month must be provided within the prior authorized month.

Services billed in excess of those authorized for the prior authorization week or month are subject to recoupment.

Refer to: [Home Health Plan of Care \(POC\)](#) on the TMHP website at www.tmhp.com.

Subsection 3.2.8, "Physical Therapy (PT) Services" in this handbook.

3.3.1.1 Physician Supervision-POC

For the Home Health Services POC to be valid, the primary physician must sign and date it, and indicate when the services will begin. The home health agency must update and maintain the POC at least every 60 days or as necessitated by a change in the client's condition.

Medicare Form 485 is not accepted as a POC. The Home Health Services POC is the only acceptable form for prior authorization through Texas Medicaid.

3.3.2 Home Health SN and HHA Services Assessments and Reassessments

When a provider has received a referral and has physician orders for SN or HHA services, the provider must have an RN perform an initial client assessment in the client's home. A client can be referred to a home health agency for SN or HHA services by the client, the client's primary physician, or the client's family.

The client assessment or reassessment should include, but is not limited to, the following:

- Whether the setting can support the health and safety needs of the client and is adequate to accommodate the use, maintenance, and cleaning of all medical devices, DME, and medical supplies required by the client
- Comprehension level of client, parent, guardian, or caregiver
- Receptivity to training and ability level of the client, parent, guardian, or caregiver
- A nursing assessment of medical necessity for the requested visits which includes:
 - Complexity and intensity of the client's care
 - Stability and predictability of the client's condition
 - Frequency of the client's need for SN care
 - Identified medical needs and goals
 - Description of wounds, if present
 - Cardiac status

The initial assessment and any reassessments that are required because of changes in the client's condition that occur during the course of the authorization period must be performed by an RN and must document medical necessity to support the requested service. If there is no change in the client's condition, the reassessment must document medical necessity to support continued and ongoing SN or HHA visits beyond the initial 60-day prior authorization period.

***Note:** Nursing visits for the primary purpose of assessing a client's care needs to develop a POC are considered administrative and not billable. These visit costs are reflected on the cost report.*

3.4 Claims Filing and Reimbursement

3.4.1 Claims Information

Providers must use only type of bill (TOB) 321 in Form Locator (FL) 4 of the UB-04 CMS-1450. Other TOBs are invalid and will result in a claim denial. Home Health Services must be submitted to TMHP in an approved electronic format or on a CMS-1500 or a UB-04 CMS-1450 paper claim form. Submit home health DME and medical supplies to TMHP in an approved electronic format, or on a CMS-1500 or on a UB-04 CMS-1450 paper claim form. Providers may purchase CMS-1500 or UB-04 CMS-1450 paper claim forms from the vendor of their choice. TMHP does not supply them.

When completing a CMS-1500 or a UB-04 CMS-1450 paper claim form, all required information must be included on the claim, as TMHP does not key information from attachments.

***Refer to:** Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.*

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Section 6.5, "CMS-1500 Paper Claim Filing Instructions" in Section 6, "Claims Filing" (Vol. 1, General Information) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Subsection 6.6, "UB-04 CMS-1450 Paper Claim Filing Instructions" in Section 6, "Claims Filing" (Vol. 1, General Information).

Outpatient claims must have the appropriate revenue code and, if appropriate, the corresponding Healthcare Common Procedure Coding System (HCPCS) code or narrative description. The prior authorization number must appear on the CMS-1500 paper claim form in Block 23 and in Block 63 of

the UB-04 CMS-1450 paper claim form. The certification dates or the revised request date on the POC must coincide with the DOS on the claim. Prior authorization does not waive the 95-day filing deadline requirement.

Home health service claims should not be submitted for payment until Medicaid certification is received and a prior authorization number is assigned.

3.4.2 Reimbursement

The reimbursement methodology for professional services delivered by home health agencies is a statewide visit rate calculated in accordance with 1 TAC §355.8021(a).

Home health agencies are reimbursed for DME and medical supplies in accordance with 1 TAC §355.8021. Providers can refer to the [OFL](#) or the applicable fee schedule on the TMHP website at www.tmhp.com. Providers may also request a hard copy of the fee schedule by contacting the TMHP Contact Center at 1-800-925-9126. DME and medical supplies, other than nutritional products, that have no established fee are subject to manual pricing at the documented MSRP less 18 percent or the provider's documented invoice cost.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled "Adjusted Fee" to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

For reimbursement, providers should note the following:

- The client's primary physician must request professional, SN, and HHA services through a home health agency, and sign and date the POC.
- Claims are approved or denied according to eligibility, prior authorization status, and medical appropriateness.
- Claims must represent a numerical quantity of one-month for medical supplies according to the billing requirements.
- SN, HHA, OT, and PT services must be provided through a Medicaid-enrolled home health agency. These services must be billed using the home health agency's provider identifier. File these services on a UB-04 CMS-1450 claim form.
- OT and PT are always billed as POS 2 (home) and may be prior authorized to be provided in the home of the client or the home of the caregiver/guardian.
- DME or medical supplies must be provided by either a Medicaid enrolled home health agency's Medicaid/DME supply provider or an independently-enrolled Medicaid/DME supply provider. Both must enroll and bill using the provider identifier enrolled as a DME supplier. File these services on a CMS-1500 claim form.

Note: *Medical social services and speech-language pathology services are available to clients who are 20 years of age and younger and are not a home health services benefit. These services may be considered a benefit for clients who qualify for CCP.*

Texas Medicaid does not reimburse separately for associated DME charges, including but not limited to, battery disposal fees or state taxes. Reimbursement for any associated charges is included in the reimbursement for a specific piece of equipment.

Refer to: Subsection 2.2, "Fee-for-Service Reimbursement Methodology" in Section 2, "Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*).

3.4.3 Prohibition of Medicaid Payment to Home Health Agencies Based on Ownership

Medicaid denies Home Health Services claims when TMHP records indicate that the physician ordering treatment has a significant ownership interest in, or a significant financial or contractual relationship with, the nongovernmental home health agency billing for the services. Federal regulation Title 42 CFR §424.22 (d) states that “a physician who has a significant financial or contractual relationship with, or a significant ownership in a nongovernmental home health agency may not certify or recertify the need for Home Health Services care services and may not establish or review a plan of treatment.”

A physician is considered to have a significant ownership interest in a home health agency if either of the following conditions apply:

- The physician has a direct or indirect ownership of five percent or more in the capital, stock, or profits of the home health agency.
- The physician has an ownership of five percent or more of any mortgage, deed of trust, or other obligation that is secured by the agency, if that interest equals five percent or more of the agency’s assets.

A physician is considered to have a significant financial or contractual relationship with a home health agency if any of the following conditions apply:

- The physician receives any compensation as an officer or director of the home health agency.
- The physician has indirect business transactions, such as contracts, agreements, purchase orders, or leases to obtain services, medical supplies, DME, space, and salaried employment with the home health agency.
- The physician has direct or indirect business transactions with the home health agency that, in any fiscal year, amount to more than \$25,000 or five percent of the agency’s total operating expenses, whichever is less.

When providing CCP services and general Home Health Services, the provider must file these on two separate UB-04 CMS-1450 paper claim forms with the appropriate prior authorization number, and should send them to the appropriate address. Claims denied because of an ownership conflict will continue to be denied unless the home health agency submits documentation indicating that the ordering physician no longer has a significant ownership interest in, or a significant financial or contractual relationship with the home health agency providing services. Documentation should be sent to TMHP Provider Enrollment at the address indicated in the “Appendix A: State, Federal, and TMHP Contact Information” (*Vol. 1, General Information*).

3.4.4 Claims Filing for OT Services

Providers must use the codes listed under subsection 3.4.8, “OT Procedure Codes” in this handbook to submit claims for Title XIX OT services that are provided through a home health agency. Indicate modifier AT (indicating the service procedure is an acute treatment) on each OT procedure code. OT services must be billed on a UB-04 CMS-1450 claim form.

3.4.5 Claims Filing for PT Services

Providers must use the procedure codes listed in subsection 3.4.9, “PT Procedure Codes” in this handbook to submit claims for Title XIX PT services provided through a home health agency. Indicate modifier AT (indicating the service procedure is an acute treatment) on each PT procedure code. PT services must be billed on a UB-04 CMS-1450 claim form.

Refer to: Subsection 2.14, “Therapy Services (CCP)” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for CCP OT and PT services.

Subsection 6.3.5, “* Modifiers” in Section 6, “Claims Filing” (*Vol. 1, General Information*).

3.4.6 OT Limitations

The AT modifier indicates an acute service and must be billed with the appropriate OT procedure codes identifying the therapy service provided. OT services billed without the AT modifier will be denied.

In addition to the AT modifier, the GO modifier must also be billed with all OT procedure codes except evaluation and re-evaluation procedure codes 97003 and 97004.

Providers must use procedure code 97003 when billing for OT evaluations. OT evaluations are payable once in 180 rolling days to any provider. Providers must use procedure code 97004 when billing for OT re-evaluations. OT re-evaluations are payable when documentation supports a change in the client’s status or with a request for extension of services, or with a change in provider.

An evaluation or re-evaluation performed on the same date of service as therapy from a different therapy discipline must be performed at distinctly separate times to be considered for reimbursement.

A client may receive therapy in more than one distinct therapy discipline in one day when:

- Therapy is rendered at different times
- Reimbursement in any one distinct therapy type does not exceed one evaluation or one re-evaluation

If a therapy evaluation or re-evaluation procedure code and therapy procedure codes for the same discipline are billed for the same date of service by any provider, the like therapy evaluation or re-evaluation will be denied. OT evaluations (procedure code 97003) or re-evaluations (procedure code 97004) will be denied as part of the following OT procedure codes billed with modifier GO.

Procedure Codes									
97012	97014	97016	97018	97022	97024	97026	97028	97032	97033
97035	97039	97110	97112	97116	97124	97139	97140	97150	97530
97535	97537	97542	97799						

3.4.7 PT Limitations

The AT modifier indicates an acute service and must be billed with the appropriate PT procedure codes identifying the therapy service provided. PT services billed without the AT modifier will be denied.

In addition to the AT modifier, the GP modifier must also be billed with all PT procedure codes except evaluation and re-evaluation procedure codes 97001 and 97002.

Providers must use procedure code 97001 when billing for PT evaluations. PT evaluations are payable once every 180 rolling days for any provider. Providers must use procedure code 97002 when billing for PT re-evaluations. PT re-evaluations are payable when documentation supports a change in the client’s status or with a request for extension of services, or with a change of provider.

An evaluation or re-evaluation performed on the same date of service as therapy from a different therapy discipline must be performed at distinctly separate times to be considered for reimbursement.

A client may receive therapy in more than one distinct therapy discipline in one day when:

- Therapy is rendered at different times.
- Reimbursement in any one distinct therapy type does not exceed one evaluation or one re-evaluation.

If a therapy evaluation or re-evaluation procedure code and therapy procedure codes for the same discipline are billed for the same date of service by any provider, the like therapy evaluation or re-evaluation will be denied. PT evaluations (procedure code 97001) or re-evaluations (procedure code 97002) will be denied as part of the following PT procedure codes billed with modifier GP.

Procedure Codes											
97012	97014	97016	97018	97022	97024	97026	97028	97032	97033		
97035	97039	97110	97112	97116	97124	97139	97140	97150	97530		
97535	97537	97542	97799								

3.4.8 OT Procedure Codes

OT services may be reimbursed using the following procedure codes:

Procedure Codes									
97003	97004	97012	97014	97016	97018	97022	97024	97026	97028
97032	97033	97035	97039	97110	97112	97116	97124	97139	97140
97150	97530	97535	97537	97542	97799				

OT services are billed one visit per day, per therapy, and are reimbursed at the statewide visit rate available on the TMHP web site at www.tmhp.com.

The documentation retained in the client's file must include the billable start time, billable stop time, total billable minutes, and activity that was performed.

3.4.9 PT Procedure Codes

PT services may be reimbursed using the following procedure codes:

Procedure Codes									
97001	97002	97012	97014	97016	97018	97022	97024	97026	97028
97032	97033	97035	97039	97110	97112	97116	97124	97139	97140
97150	97530	97535	97537	97542	97799				

PT services are billed one visit per day, per therapy, and are reimbursed at the statewide visit rate available on the TMHP web site at www.tmhp.com.

The documentation retained in the client's file must include the billable start time, billable stop time, total billable minutes, and activity that was performed.

4 Therapists, Independent Practitioners, and Physicians

4.1 Enrollment

To enroll in Texas Medicaid, licensed therapists and physicians must be enrolled in Medicare.

Refer to: Subsection 9.1.1, "Physicians and Doctors" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for information about physician enrollment requirements.

If providers are currently enrolled with Texas Medicaid or plan to provide regular acute care services to clients with Medicaid coverage, enrollment in CCP is not necessary. All non-CCP therapy services must be billed with the current provider identifier.

Providers cannot be enrolled if their license is due to expire within 30 days of applying. A current license must be submitted.

4.2 Services, Benefits, Limitations, and Prior Authorization

OT, PT, and ST are benefits of Texas Medicaid for an acute condition or an exacerbation of a chronic condition when all of the following criteria are met:

- Treatments are expected to significantly improve the client's condition in a reasonable and generally predictable period of time, based on the physician's assessment of the client's restorative potential.
- Treatments are directed towards restoration of or compensation for lost function.
- Services do not duplicate those provided concurrently by any other therapy.
- Services are provided within the provider's scope of practice, as defined by state law.

PT, OT, and ST services are a benefit for 180 rolling days from the first date of therapy services. If the client's condition persists for more than 180 rolling days from the start of the therapy services, the condition is considered chronic.

Therapy may be performed by a licensed occupational therapist, physical therapist, speech therapist, or one of the following under the supervision of a licensed therapist: licensed therapy assistant or licensed speech-language pathology intern.

Services performed by an OT aide, OT orderly, OT student, OT technician, PT aide, PT orderly, PT student, PT technician, SLP aide, SLP orderly, SLP student, or SLP technician are not benefits of Texas Medicaid.

Therapy services performed by an unlicensed provider are subject to retrospective review and recoupment.

OT, PT, and ST that is not a benefit of traditional Medicaid may be covered:

- In the physician's office, or Medicaid-enrolled private therapist's office for a chronic condition.
- Through the SHARS program.
- In an outpatient rehabilitation or free-standing rehabilitation facility.
- In a licensed hospital.

OT, PT, and ST services that are not benefits of traditional Medicaid may be benefits under CCP.

Professional services for selective wound debridement (procedure codes 97597 and 97598) may be reimbursed to a licensed physical therapist or physical therapy group when the service is determined to be within the provider's scope of practice and the service is prescribed by a Medicaid-enrolled supervising physician or qualified non-physician provider.

Refer to: Subsection 2.14, "Therapy Services (CCP)" in the *Children's Services Handbook (Vol. 2, Provider Handbooks)* for therapy benefits for clients who are 20 years of age and younger.

4.2.1 OT Services

Payment for OT is limited to the treatment of disease for individuals whose ability to function in life roles is impaired. OT can be provided by a physician or occupational therapist and may include physical agents such as massage, electricity, traction, or exercises as forms of therapy. Examples of what may be considered acute are as follows:

- A new injury
- Therapy before or after surgery
- Acute exacerbations of conditions

OT is considered acute for 180 calendar days from the first date (onset) of therapy for a specific condition. Providers may file an appeal for claims denied as being beyond the 180 days of therapy with supporting documentation that the client’s condition has not become chronic and the client has not reached the point of plateauing.

A client may receive therapy in more than one distinct therapy discipline on the same date of service when the therapy is rendered at different times.

An evaluation or re-evaluation that is performed on the same date of service as a therapy from a different therapy discipline must be performed at distinctly separate times to be considered for reimbursement.

Claims for OT services must include modifier GO to be considered for reimbursement. Modifier AT must also be submitted with all claims for therapy procedure codes for acute conditions or the claims will be denied. Modifiers are not required for evaluations or re-evaluations.

Reimbursement for OT procedure codes is based on the actual amount of billable time associated with the service. Services for which the unit of service is 15 minutes (1 unit = 15 minutes) must be rounded up or down to the nearest quarter hour. To calculate billing units, count the total number of billable minutes for the calendar day for the client, and divide by 15 to convert to billable units of service. If the total billable minutes are not divisible by 15, the minutes are converted to one unit of service if they are greater than seven and converted to 0 units of service if they are seven or fewer minutes.

For example, 68 total billable minutes divided by 15 equals 4 units plus 8 minutes. Since the 8 minutes are more than 7 minutes, those 8 minutes are converted to one unit. Therefore, 68 total billable minutes = 5 units of service.

Time intervals for 1 through 8 units are identified in the following table:

Units	Number of Minutes
0 units	0 minutes through 7 minutes
1 unit	8 minutes through 22 minutes
2 units	23 minutes through 37 minutes
3 units	38 minutes through 52 minutes
4 units	53 minutes through 67 minutes
5 units	68 minutes through 82 minutes
6 units	83 minutes through 97 minutes
7 units	98 minutes through 112 minutes
8 units	113 minutes through 127 minutes

The following procedure codes may be reimbursed in 15-minute increments for a combined maximum of four units (one hour) per day, per therapy type:

Procedure Codes									
97032	97033	97034	97035	97036	97039	97110	97112	97113	97116
97124	97139	97140	97530	97750	97799				

If the therapy services billed exceed four units a day, the claim will be denied and may be appealed. On appeal the provider must document the prior authorization period week for the date of service appealed.

The appeal must include an attestation that the provider has billed all therapy services for the week in question.

Occupational group therapy procedures involve constant attendance of the physician or therapist, but by definition do not require one-on-one client contact by the physician or therapist. When billing for occupational group therapy, procedure code 97150 must be used for each member of the group.

Procedure codes 97012, 97014, 97016, 97018, 97022, 97024, 97026, 97028, and 97150 are limited to one per day, per therapy type.

Procedure codes 97535, 97537, and 97542 are only payable for clients who are 20 years of age and younger in an outpatient rehabilitation setting or through CCP.

Evaluation procedure code 97003 is reimbursed once in 180 rolling days to any provider. Re-evaluation procedure code 97004 is payable when documentation supports a change in the client’s status, a request for extension of services, or a change of provider.

OT evaluations or re-evaluations (procedure code 97003 or 97004) will be denied when any of the procedure codes in the following table are billed with modifier GO by any provider on the same date of service:

Procedure Codes									
97012	97014	97016	97018	97022	97024	97026	97028	97032	97033
97034	97035	97036	97039	97110	97112	97113	97116	97124	97139
97140	97150	97530	97750	97799					

The documentation retained in the client’s file must include the billable start time, billable stop time, total billable minutes, and activity that was performed.

4.2.2 PT Services

Payment for PT is limited to acute disorders of the musculoskeletal and neuromuscular systems. PT can be provided by a physician or physical therapist and may include physical agents such as massage, electricity, traction, or exercises in the treatment of disease. Examples of what may be considered acute are as follows:

- A new injury
- Therapy before or after surgery
- Acute exacerbations of conditions
- Interventions that result in a change in a client’s condition, such as a newly implanted pump to administer an antispasmodic
- Botulinum toxin type A injections

PT is considered acute for 180 calendar days from the first date (onset) of therapy for a specific condition. Providers may file an appeal for claims denied as being beyond the 180 days of therapy with supporting documentation that the client’s condition has not become chronic and the client has not reached the point of plateauing.

A client may receive therapy in more than one distinct therapy discipline on the same date of service when the therapy is rendered at different times.

An evaluation or re-evaluation performed on the same date of service as a therapy from a different therapy discipline must be performed at distinctly separate times to be considered for reimbursement.

Claims for PT services must include modifier GP to be considered for reimbursement. Modifier AT must also be submitted with all claims for therapy procedure codes for acute conditions or the claims will be denied. Modifiers are not required for evaluations or re-evaluations.

Reimbursement for PT procedure codes is based on the actual amount of billable time associated with the service. Services for which the unit of service is 15 minutes (1 unit = 15 minutes) must be rounded up or down to the nearest quarter hour. To calculate billing units, count the total number of billable minutes for the calendar day for the client, and divide by 15 to convert to billable units of service. If the total billable minutes are not divisible by 15, the minutes are converted to one unit of service if they are greater than seven and converted to 0 units of service if they are seven or fewer minutes.

Refer to: Subsection 4.2.1, “OT Services” in this handbook for an example of the 15-minute conversion table.

The following procedure codes may be reimbursed in 15-minute increments for a combined maximum of four units (one hour) per day, per therapy type:

Procedure Codes									
97032	97033	97034	97035	97036	97039	97110	97112	97113	97116
97124	97139	97140	97530	97750	97799				

If the therapy services billed exceed four units a day, the claim will be denied, and may be appealed.

On appeal, the provider must document the prior authorization period week for the date of service appealed. The appeal must also include an attestation that the provider has billed all therapy services for the week in question.

Physical group therapy procedures involve constant attendance of the physician or therapist, but by definition do not require one-on-one client contact by the physician or therapist. When billing for physical group therapy, procedure code 97150 must be used for each member of the group.

Procedure codes 97012, 97014, 97016, 97018, 97022, 97024, 97026, 97028, and 97150 are limited to one per day, per therapy type.

Procedure codes 97535, 97537, and 97542 are only payable for clients who are 20 years of age and younger in an outpatient rehabilitation setting or through CCP.

Evaluation procedure code 97001 is payable once per 180 rolling days, any provider. Re-evaluation procedure code 97002 is payable when documentation supports a change in the client’s status, a request for extension of services, or a change of provider.

PT evaluations or re-evaluations (procedure code 97001 or 97002) will be denied when any of the procedure codes in the following table are billed with modifier GP by any provider on the same date of service:

Procedure Codes									
97012	97014	97016	97018	97022	97024	97026	97028	97032	97033
97034	97035	97036	97039	97110	97112	97113	97116	97124	97139
97140	97150	97530	97750	97799					

The documentation retained in the client’s file must include the billable start time, billable stop time, total billable minutes, and activity that was performed.

4.2.3 ST Services

ST is limited to treatment of conditions of the head or neck which affect speech production. ST may be provided by a physician or speech-language pathologist (SLP). Examples of what may be considered acute are as follows:

- Stroke or Cerebral vascular accident (CVA)
- Neoplasms of the head or neck

- Open or closed head trauma

ST is considered acute for 180 calendar days from the first date (onset) of therapy for a specific condition. Providers may file an appeal for claims denied as being beyond the 180 days of therapy with supporting documentation that the client's condition has not become chronic and the client has not reached the point of plateauing.

A client may receive therapy in more than one distinct therapy discipline on the same date of service when the therapy is rendered at different times.

An evaluation or re-evaluation performed on the same date as a therapy from a different therapy discipline must be performed at distinctly separate times to be considered for reimbursement.

ST evaluations are performed before the initiation of speech therapy. The speech therapy may be performed by an SLP if the SLP is on staff at the hospital or under the personal supervision of a physician.

Claims for ST services must include modifier GN to be considered for reimbursement. Modifier AT must also be submitted with all claims for therapy procedure codes for acute conditions or the claims will be denied. Modifiers are not required for evaluations or re-evaluations.

Reimbursement for ST procedure codes is based on the actual amount of billable time associated with the service. Services for which the unit of service is 15 minutes (1 unit = 15 minutes) must be rounded up or down to the nearest quarter hour. To calculate billing units, count the total number of billable minutes for the calendar day for the client, and divide by 15 to convert to billable units of service. If the total billable minutes are not divisible by 15, the minutes are converted to one unit of service if they are greater than seven and converted to 0 units of service if they are seven or fewer minutes.

Refer to: Subsection 4.2.1, "OT Services" in this handbook for an example of the 15-minute conversion table.

Procedure codes 92526 and 92610 may be reimbursed for the treatment and evaluation of swallowing dysfunctions and oral functions for feeding.

Procedure codes 92507, 92508, and 92526 may be reimbursed in 15-minute increments, and are limited to four units (one hour) per day.

Speech group therapy procedures involve constant attendance of the physician or therapist, but by definition do not require one-on-one client contact by the physician or therapist.

If reassessment is necessary within the 180-day period, payment will be considered for procedure code S9152 when documentation supports a change in the client's status, a request for extension of services, or a change of provider.

ST evaluations or re-evaluations (procedure code 92521, 92522, 92523, 92524, or S9152) will be denied when billed on the same date of service, any provider as procedure codes 92507 and 92508 with modifier GN.

The documentation retained in the client's file must include the billable start time, billable stop time, total billable minutes, and activity that was performed.

Refer to: Subsection 3.2.1.3, "Auditory Rehabilitation" in the *Vision and Hearing Services Handbook (Vol. 2, Provider Handbooks)* for information about aural rehabilitation services.

4.2.4 Therapy in a Nursing Facility

Separate payment cannot be made to therapists, independent practitioners, or physicians who provide therapy services to a resident of a nursing facility. These services must be made available to nursing facility residents as needed and must be provided directly by the staff of the facility or furnished by the facility through arrangements with outside qualified resources as part of the daily care. Nursing facilities should refrain from admitting clients who need goal-directed therapy if the facility is unable to provide these services.

4.2.5 Group Therapy Definition

Group therapy consists of simultaneous treatment to two or more clients who may or may not be doing the same activities. If the therapist is dividing attention among the clients, providing only brief, intermittent personal contact, or giving the same instructions to two or more clients at the same time, the treatment is recognized as group therapy. The physician or therapist involved in group therapy services must be in constant attendance, but one-on-one client contact is not required.

4.2.5.1 Group Therapy Guidelines

In order to meet Texas Medicaid criteria for group therapy, all of the following applies:

- Physician prescription for group therapy
- Performance by or under the general supervision of a qualified licensed therapist as defined by licensure requirements
- The licensed therapist involved in group therapy services must be in constant attendance (meaning in the same room) and active in the therapy
- Each client participating in the group must have an individualized treatment plan for group treatment, including interventions, short and long-term goals, and measurable outcomes.

Note: Texas Medicaid does not limit the number of clients who can participate in a group therapy session. Providers are subject to certification and licensure board standards regarding group therapy.

4.2.6 Authorization Requirements

PT, OT, and ST evaluations or re-evaluations do not require prior authorization when provided within the limits of the provider's practice. PT, OT, and ST services performed within the office or outpatient setting do require prior authorization.

The physician must maintain documentation of medical necessity, including the treatment plan and therapy evaluation or re-evaluation, in the client's medical record. The provider requesting the therapy may be asked for additional information to clarify or complete a request for therapy. The date, time, and duration of services provided must be documented and maintained in the client's medical record.

Prior authorization for individual therapy services may be considered when all of the following criteria are met:

- The client has an acute condition or an acute exacerbation of a chronic medical condition resulting in a significant decrease in functional ability that will benefit from services that can be performed in the office or outpatient setting
- Documentation must support treatment goals and outcomes for specific therapy disciplines requested
- Services do not duplicate those provided concurrently by any other therapy
- Services are provided within the provider's scope of practice, as defined by state law

Therapy procedure codes that may be authorized in 15-minute units will be limited to a combined maximum of four units (one hour) per day, per therapy type. Additional services may be considered without prior authorization.

4.2.6.1 Procedure Codes that Must be Included with the Prior Authorization Request

The following procedure codes are not included in PT, OT, and ST prior authorizations unless requested:

PT and OT Procedure Codes That Require Separate Prior Authorization for Acute Services									
97012	97014	97016	97018	97022	97024	97026	97028	97033	97034
97035	97799								

ST Procedure Code That Requires Separate Prior Authorization
97535

Note: Procedure code 97535 is used for ST services for training for augmentative communication devices (ACD).

Prior authorization requests for any of the procedure codes listed above must include documentation of:

- The frequency of therapy for the procedure code
- The total amount of time in units or visits requested for the procedure code
- The therapeutic activities for which the procedure code will be used
- The specific, measurable short-term and long-term goals for the procedure code
- The appropriate modifier for the type of therapy being requested

4.2.6.2 Initial Prior Authorization Request for Therapy Services

The initial request for authorization must be received no later than five business days from the date the therapy treatments are initiated. Requests received after the five business-day period will be denied for dates of service that occurred before the date that the request was received.

Therapy services may be initiated upon the receipt of the physician's order. Therapy services initiated before the date of the physician order will not be approved.

Prior authorization may be given for a service period not to exceed 90 days per event for acute care services only. An additional 90-day period may be requested with documentation submitted through prior authorization.

Subsequent prior authorizations beyond 180 days will not be authorized, as treatment for chronic conditions is not a benefit. Prior authorizations may be approved for a time period less than the established maximum.

Supporting Documentation for Initial Prior Authorization Requests

Supporting documentation must be submitted for an initial request and must include all of the following:

- A completed Request for Outpatient Physical, Occupational, or Speech Therapy (PT, OT, ST) Special Medical Prior Authorization Form. The request form must be signed and dated by the ordering physician. The following also applies:
 - If the prior authorization form is not signed and dated by the physician, the form must be accompanied by a written order or prescription signed and dated by the physician, or a documented verbal order from the physician that includes the date the verbal order was received
- A verbal order is considered current when the verbal order is received on, or no more than, 60 rolling days before the start of therapy

- A written order or prescription is considered current when it is signed and dated on, or no more than, 60 days before the start of therapy
- A request received without a physician's signature or documented verbal order or written prescription will not be processed and will be returned to the provider
- A current therapy evaluation for each therapy discipline documenting the client's age at the time of the evaluation (A therapy evaluation is current when performed within 60 rolling days before the initiation of therapy services)
- A client-specific comprehensive treatment plan established by the ordering physician or therapist to be followed during treatment in the office or outpatient setting must include all of the following:
 - Date and signature of the licensed therapist
 - Diagnosis(es)
 - Treatment goals for the therapy discipline and associated disciplines requested related to the client's individual needs
 - A description of the specific therapy disciplines being prescribed
 - Duration and frequency of therapy
 - Date of onset of the illness or injury or exacerbation requiring the office or outpatient services
 - Requested dates of service

4.2.6.3 Subsequent Prior Authorization Requests for Therapy Services

A prior authorization request for subsequent services must be received no more than 30 days before the current authorization expires. Prior authorization requests for subsequent services received after the current authorization expires will be denied for dates of service that occurred before the date the submitted request was received.

Prior authorization requests for subsequent services may be considered for increments up to 90 days for each request with documentation supporting medical necessity that includes all of the following:

- A new, completed Request for Outpatient Physical, Occupational, or Speech Therapy (PT, OT, ST) Special Medical Prior Authorization Form. The request form must be signed and dated by the ordering physician.
- If the prior authorization form is not signed and dated by the physician, the form must be accompanied by a written order or prescription signed and dated by the physician, or a documented verbal order from the physician that includes the date the verbal order was received. A verbal order is considered current when the verbal order is received on, or no more than, 60 rolling days before the start of therapy.
- A written order or prescription is considered current when it is signed and dated on, or no more than, 60 rolling days before the start of therapy. A request received without a physician's signature, documented verbal order, or written prescription will not be processed and will be returned to the provider.
- A current therapy evaluation or re-evaluation for each therapy discipline documenting the client's age at the time of the evaluation or re-evaluation.

A therapy evaluation or re-evaluation for subsequent services is current when performed within 30 days before the prior authorization request is received. For example:

- If an authorization period ends on July 31, 2014, TMHP must receive the prior authorization request for subsequent services between July 1, 2014, and July 31, 2014. The therapy evaluation or re-evaluation for subsequent services can be performed up to 30 days before the date TMHP receives the prior authorization request.

- If TMHP receives the prior authorization request for subsequent services on July 1, 2014, the evaluation or re-evaluation can be performed June 1, through July 1, 2014.
- If TMHP receives the prior authorization request for subsequent services on July 31, 2014, the evaluation or re-evaluation can be performed July 1, 2014, through July 31, 2014.

Updated Treatment Plan or Prior Authorization Revisions

An updated client-specific comprehensive treatment plan established by the ordering physician or therapist to be followed during treatment in the office or outpatient setting must include all of the following:

- Date and signature of the licensed therapist
- Diagnosis(es)
- Updated treatment goals for the therapy discipline and associated disciplines requested related to the client's individual needs
- A description of the specific therapy disciplines being prescribed
- Duration and frequency of therapy
- Date of onset of the illness, injury, or exacerbation requiring the office or outpatient hospital services
- A brief summary of the outcomes of the previous treatment relative to the client's debilitating condition
- Requested dates of service

Requests for revisions of prior authorization must be received no later than five business days from the date the revised therapy treatments are initiated. Requests for revisions received after the five business-day period will be denied for dates of service that occurred before the date the request was received. A prior authorization request for revisions to services may be considered up to the end of the current approved prior authorization.

Discontinuation of Therapy or Change in Provider

If a provider or client discontinues therapy during an existing prior authorized period and the client requests services through a new provider, the new provider must submit all of the following:

- A new therapy request form
- A new evaluation with required documentation
- A change of provider letter signed and dated by the client or responsible adult documenting the date the client ended therapy (effective date of change) with the previous provider, the names of the previous and new providers, and an explanation of why providers were changed

The change of provider letter should be submitted with the provider's initial request for services to avoid a delay in processing the request. A change of provider during an authorization period will not extend the authorization period. Regardless of the number of provider changes, clients may not receive therapy services beyond the limitations outlined in this policy.

Speech Therapy Services Frequency Levels

PT, OT, and ST services may be provided at one of the following levels commensurate with the client's medical condition, life stage, and therapy needs identified in the documentation submitted. As the client's condition improves and goals are met, it is anticipated that the therapist will decrease the frequency to a lesser level.

High Frequency: Three or more times per week may be considered when documentation supports all of the following:

- The client has a medical condition that is rapidly changing.
- The client has a potential for rapid progress, rapid decline, or loss of functional skill.
- The client's therapy plan and home program require frequent modification by the licensed therapist.
- The client requires a high frequency of intervention for a limited duration (60 days or fewer) to recover function lost due to surgery, illness, or trauma.

Moderate Frequency: Two times per week may be considered when documentation supports one or more of the following:

- The client is making functional progress toward goals.
- The client is in a critical period to restore function or is at risk of regression.
- The licensed therapist needs to adjust the client's therapy plan and home program weekly, or more often than weekly, based on the client's progress and medical needs.
- The client has complex medical needs requiring on-going education of the responsible adult.

Low Frequency: One time per week may be considered when the documentation supports one or more of the following:

- The client is making progress toward the client's goals, but the progress has slowed, or the client may be at risk of deterioration due to the client's medical condition.
- The licensed therapist is required to make weekly adjustments to the client's therapy plan and home program based on the client's progress.

4.2.7 Noncovered Services

The following services are not a benefit of Texas Medicaid:

- Therapy services that exceed 180 rolling days from the start of therapy are not considered to be acute and will not be covered
- Application of a modality to one or more areas; hot or cold packs
- Services that are not considered medically necessary. Examples include, but are not limited to the following:
 - Massage therapy that is the sole therapy or is not part of a therapeutic POC to address an acute condition
 - Hippotherapy
 - Treatment solely for the instruction of other agency or professional personnel in the client's OT, PT, and ST program
 - Separate reimbursement for VitalStim therapy for dysphagia
 - Training in nonessential tasks (e.g., homemaking, gardening, recreational activities, cooking, driving, assistance with finances, and scheduling)
 - Maintenance therapy, including passive range of motion and exercises that are not directed towards restoration of a specific loss of function
 - Emotional support, adjustment to extended hospitalization, or disability behavioral readjustment

- Therapy prescribed primary as an adjunct to psychotherapy

Note: *Therapy that exceeds 180 days may be considered for prior authorization for clients who are birth through 20 years of age through CCP.*

4.2.8 Rehabilitative Services

Rehabilitative Services is a program administered by TMHP to nursing facility clients who need rehabilitation. These services must be prior authorized through TMHP before the therapy is provided and reimbursed by TMHP. Covered services include OT, PT, and ST to clients who are eligible for Texas Medicaid, with an acute onset of an illness or injury, with the expectation that function will be improved measurably. For all rehabilitative services inquiries, call Rehabilitative Services at 1-800-792-1109.

Refer to: Subsection 2.16, “Inpatient Rehabilitation Facility (Freestanding) (CCP)” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for more information.

4.3 Documentation Requirements

Therapy must be provided under the current written orders of a physician and based on medical necessity. A prescription is considered current when it is signed and dated on or no later than 60 days before the start of therapy. Therapy may be performed by auxiliary personnel under the direct supervision of the physician or the licensed, independently practicing therapist.

All documentation, including that which supports medical necessity, and a comprehensive treatment plan related to the therapy services prior authorized and provided must be maintained in the client’s medical record and made available upon request. For each therapy discipline provided, the documentation maintained in the client’s medical record must identify the therapy provider’s name and must include all of the following:

- Date of service
- Start time of the therapy
- Stop time of the therapy
- Total minutes of therapy
- Specific therapy performed
- Client’s response to therapy

To complete the prior authorization process by paper, the provider must complete and submit the prior authorization requirements documentation through fax or mail, and must maintain a copy of the prior authorization request and all submitted documentation in the client’s medical record at the therapy provider’s place of business.

To complete the prior authorization process electronically, the provider must complete and submit the prior authorization requirements documentation through any approved electronic method, and must maintain a copy of the prior authorization request and all submitted documentation in the client’s medical record at the therapy provider’s place of business.

To avoid unnecessary denials, the physician must provide correct and complete information, including documentation of medical necessity for the services requested. The physician must maintain documentation of medical necessity in the client’s medical record. The requesting therapy provider may be asked for additional information to clarify or complete a request.

If a client discontinues therapy with a provider and a new provider begins therapy, submission of a new plan of care and documentation of the last therapy visit with the previous provider is required, along with a letter from the client, parent, or guardian stating the date therapy ended with the previous provider.

4.3.1 Group Therapy Documentation Requirements

The following documentation must be maintained in the client's medical record:

- Physician prescription for group therapy
 - Note: Physician prescription for group therapy is not required in the medical record of Early Childhood Intervention clients.*
- Individualized treatment plan that includes frequency and duration of the prescribed group therapy and individualized treatment goals

Documentation for each group therapy session must include the following:

- Name and signature of the licensed therapist providing supervision over the group therapy session
 - Treatment goal addressed in the group
 - Specific treatment techniques utilized during the group therapy session
 - How the treatment technique will restore function
 - Start and stop times for each session
 - Group therapy setting or location
 - Number of clients in the group

The client's medical record must be made available upon request.

When physical or occupational group therapy is administered, providers must bill procedure code 97150 for each member of the group.

Note: There is an exception to these requirements for ECI services. The group therapy guidelines for ECI services are found in the current Texas Medicaid Provider Procedures Manual, Children's Services Handbook, Subsection 2.7.2, "Services, Benefits, Limitations, and Prior Authorization".

4.4 Claims Filing and Reimbursement

4.4.1 Claims Information

The Medicaid rates for therapists, independent practitioners, and physicians are calculated in accordance with 1 TAC §355.8081 and §355.8085.

Providers can refer to the [OFL](#) or the applicable fee schedule on the TMHP website at www.tmhp.com.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled "Adjusted Fee" to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

Refer to: Subsection 2.2, "Fee-for-Service Reimbursement Methodology" in Section 2, "Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*).

Subsection 2.7, "Medicare Crossover Claim Reimbursement" in Section 2, "Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for additional information about Medicare coinsurance and deductible payments.

Therapy services must be submitted to TMHP in an approved electronic format or on a CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms. Claims may be filed electronically in a CMS-1500 format as long as the nine-digit prior authorization number is reflected in the equivalent electronic field.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (*Vol. 1, General Information*) for information on electronic claims submissions.

Subsection 6.4, “Claims Filing Instructions” in Section 6, “Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (*Vol. 1, General Information*). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

5 Claims Resources

Providers may refer to the following sections or forms when filing claims:

Resource	Location
Appendix A: State, Federal, and TMHP Contact Information	Appendix A (<i>Vol. 1, General Information</i>)
Appendix D: Acronym Dictionary	Appendix D (<i>Vol. 1, General Information</i>)
Automated Inquiry System (AIS)	“Appendix A: State, Federal, and TMHP Contact Information” (<i>Vol. 1, General Information</i>)
CMS-1500 Paper Claim Filing Instructions	Subsection 6.5 (<i>Vol. 1, General Information</i>)
Section 3: TMHP Electronic Data Interchange (EDI)	Section 3 (<i>Vol. 1, General Information</i>)
TMHP Electronic Claims Submission	Subsection 6.2 (<i>Vol. 1, General Information</i>)
UB-04 CMS-1450 Paper Claim Filing Instructions	Subsection 6.6 (<i>Vol. 1, General Information</i>)

6 Contact TMHP

The TMHP Contact Center at 1-800-925-9126 is available Monday–Friday from 7 a.m. to 7 p.m., Central Time.

7 Forms

The following linked forms can also be found on the [Forms](#) page of the Provider section of the TMHP website at www.tmhp.com:

Forms
Home Health Plan of Care (POC) Instructions
Home Health Plan of Care (POC)
Home Health Prior Authorization Checklist
Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form Instructions
Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form
Special Medical Prior Authorization (SMPA) Request Form

8 Claim Form Examples

The following linked claim form examples can also be found on the [Claim Form Examples](#) page of the Provider section of the TMHP website at www.tmhp.com:

1 General Information

This information is intended for Texas Medicaid independent (freestanding) laboratories, radiological laboratories, and physiological laboratories. The handbook provides information about Texas Medicaid's benefits, policies, and procedures applicable to these providers.

Important: *All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

Refer to: Section 1: Provider Enrollment and Responsibilities (*Vol. 1, General Information*).

1.1 Payment Window Reimbursement Guidelines for Services Preceding an Inpatient Admission

According to three-day and one-day payment window reimbursement guidelines, most professional and outpatient diagnostic and nondiagnostic services that are rendered within the designated timeframe of an inpatient hospital stay and are related to the inpatient hospital admission will not be reimbursed separately from the inpatient hospital stay if the services are rendered by the hospital or an entity that is wholly owned or operated by the hospital.

These reimbursement guidelines do not apply in the following circumstances:

- The professional services are rendered in the inpatient hospital setting.
- The hospital and the physician office or other entity are both owned by a third party, such as a health system.
- The hospital is not the sole or 100-percent owner of the entity.

Refer to: Subsection 3.7.3.8, "Payment Window Reimbursement Guidelines" of the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for additional information about the payment window reimbursement guidelines.

2 Independent Laboratory

The requirements in this section apply to all providers who bill laboratory services.

2.1 Enrollment

Providers must meet the following requirements and submit a complete application in order to enroll as independent (freestanding) laboratory providers:

- The provider must be actively enrolled in Medicare as an independent laboratory.
- The independent laboratory must be independent from a physician's office or hospital.
- The independent laboratory must meet staff, equipment, and testing capability standards for certification by the Health and Human Services Commission (HHSC).

2.1.1 Clinical Laboratory Improvement Amendments (CLIA)

CLIA regulations set standards that are designed to improve quality in all laboratory testing and include specifications for quality control (QC), quality assurance (QA), patient test management, personnel, and proficiency testing.

The regulations concern all laboratory testing that is used for the assessment of human health or the diagnosis, prevention, or treatment of disease. Under CLIA 88, all clinical laboratory providers (including those located in physicians' offices), regardless of location, size, or type of laboratory, must meet certain standards based on the complexity of the tests they perform.

Providers must hold the appropriate CLIA certificates to perform certain tests as indicated in this handbook.

Refer to: The Centers for Medicare & Medicaid Services (CMS) website at www.cms.gov for the CLIA rules and regulations. The regulations are found at Title 42 Code of Federal Regulations, Part 493.

2.1.2 CLIA Requirements

To be eligible for reimbursement by Medicare and Medicaid, all providers that perform laboratory tests must do the following:

- Pay the applicable fee to CMS.
- Contact HHSC at 1-512-834-6650 to receive a CLIA registration or certification number. Submit CLIA applications to the following address:

Health Facility Licensing and Certification Division
HHSC
1100 West 49th Street
Austin, TX 78756

- Notify the Texas Medicaid & Healthcare Partnership (TMHP) of the assigned CLIA number at the following address:

Texas Medicaid & Healthcare Partnership
Provider Enrollment
PO Box 200795
Austin, TX 78720-0795

TMHP monitors claims that are submitted by clinical laboratory providers to verify that the clinical laboratory has a CLIA number on file. If the provider does not have a CLIA number on file with TMHP, the laboratory services claims may be denied.

2.2 Services, Benefits, Limitations, and Prior Authorization

Texas Medicaid only covers professional and technical services that an independent laboratory is certified by CLIA to perform.

Provider documentation must be maintained in the client's medical record and must delineate the medical need for administering the laboratory test.

The physician is responsible for providing to the performing laboratory the clinical diagnosis code that is associated with the individual test so that the performing laboratory may bill Texas Medicaid directly for the analysis of the specimen.

2.2.1 CLIA Certificates

Texas Medicaid follows the Medicare categorization of tests for CLIA certificate holders.

Refer to: The CMS website at www.cms.gov/CLIA/10_Categorization_of_Tests.asp for additional information.

2.2.2 Laboratory Handling Fees and Reference Laboratories

2.2.2.1 Independent Laboratory Providers

An independent laboratory provider may be reimbursed for tests performed in the laboratory and for laboratory handling fees for tests that are forwarded to another laboratory (i.e., reference laboratory).

An independent laboratory that forwards a specimen to another laboratory without performing any tests on that specimen may not bill for any laboratory tests.

An independent laboratory may only bill Texas Medicaid for tests referred to another independent or hospital laboratory if it performs at least one test that it is certified by CLIA to perform, and forwards a portion of the same specimen to the other laboratory to have one or more tests performed. The referring laboratory may then bill for tests it has performed on the specimen. When billing, the following information must be on the claim:

- Block 20: “Yes” box must be checked.
- Block 32: The name, address, and ZIP Code of the reference laboratory (i.e., the laboratory to which the specimen was referred).
- Block 24-J: The provider number of the reference laboratory must be included next to each procedure to be performed by the reference laboratory.

An independent laboratory that forwards a specimen to another laboratory (independent or hospital) may bill a handling fee (procedure code 99001) for collecting and forwarding the specimen to the other laboratory if the specimen is collected by routine venipuncture or catheterization.

2.2.2.2 Physician Providers

A physician may bill only one laboratory handling charge (procedure code 99000) per client visit when the specimen is collected by drawing a blood sample through venipuncture or collecting a urine specimen by catheterization, unless the specimen is divided and sent to different laboratories or there are different specimens collected and sent to different laboratories.

The claim must indicate the name and address of each laboratory where a specimen is sent for more than one laboratory handling charge to be paid.

Refer to: Subsection 9.2.41, “Laboratory Services” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information about laboratory services reimbursed to physician providers.

2.2.2.3 Outpatient Hospital Providers

An outpatient hospital may be reimbursed for a laboratory handling charge (procedure code 99001) for each independent laboratory to where it sends specimens when the laboratory handling charge is not being billed through other methods.

2.2.2.4 Family Planning Laboratory Tests

Family planning agencies must use procedure code 99000 with a family planning diagnosis code to bill their laboratory handling charges for laboratory specimens sent out; modifier FP must be omitted. Providers may refer to the appropriate section in the provider manual for instructions for billing family planning services. As with procedure code 99000, only one handling fee may be charged for each laboratory to where the agency sends specimens, regardless of the number of specimens taken.

When family planning test specimens, such as Pap smears, are collected, providers must direct the laboratory to indicate that the claim for the test is to be billed as a family planning service.

Refer to: Subsection 3.3, “Services, Benefits, Limitations, and Prior Authorization” in the *Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks)* for the complete list of family planning diagnosis codes.

2.2.3 Nonclinical Laboratory Procedures

The reimbursement for nonclinical laboratory procedure codes can be found on the appropriate Texas Medicaid fee schedules on the TMHP website at www.tmhp.com.

2.2.4 Clinical Laboratory Procedures

The reimbursement for clinical laboratory procedures can be found on the appropriate [Texas Medicaid fee schedule](#). [Fee schedules are available](#) on the TMHP website at www.tmhp.com.

2.2.4.1 Repeat Procedures

Modifier 91 should be used for repeat clinical diagnostic tests as follows:

- Modifier 91 must not be used when billing the initial procedure. It must be used to indicate the repeated procedure.
- If more than two services are billed on the same day by the same provider, regardless of the use of modifier 91, the claim or detail is denied.
- If a repeated procedure performed by the same provider on the same day is billed without modifier 91, it is denied as a duplicate procedure.
- If a claim is denied for a quantity more than two or as a duplicate procedure, the times of these procedures and services must be documented on appeal.

Providers may appeal claims that have been denied for documentation of time. Most procedure codes that initially required modifier 91 will continue to be audited for modifier 91.

When appealing claims with modifier 91 for repeat procedures, providers must separate the details. One detail should be appealed without the modifier and one detail with the modifier, including documentation of times for each repeated procedure.

2.2.5 Automated Laboratory Tests and Laboratory Paneling

The reimbursement for the complete panel procedure code represents the total payment for all automated laboratory tests that are covered under that panel combined with any other automated tests that are billed for the client for the same date of service. The Texas Medicaid allowable fee for the individual components of the complete laboratory panel will not exceed the automated test panel (ATP) fee for the total number of automated tests that are billed for the client for the same date of service.

When all of the components of the panel are performed, the complete panel procedure code must be billed. When only two or more components of the panel are performed, the individual procedure codes for each laboratory test performed may be billed.

2.2.5.1 Fee Calculations for Automated Tests and Laboratory Panels

Automated test and laboratory panel procedure codes may be reimbursed according to the appropriate ATP level payment based on the total number of automated tests that are performed on the same day for the same client.

Refer to: The “Clinical Laboratory, Automated Test Panels - Insert” [Texas Medicaid fee schedule](#) on the TMHP website at www.tmhp.com for the ATP level payment for automated test and lab panel procedure codes.

ATP Level Pricing

The amount that is allowed for each automated test and lab panel procedure code that is billed with the same date of service for the same client will be a percentage of the total ATP level payment. To calculate the automated test pricing, the following information is necessary:

- The number of automated tests that are billed for the client for the same date of service (including individual automated tests and all automated tests that are represented by the laboratory panels.) Procedure codes that are duplicated between panels are not counted more than once.
- The ATP pricing fee that corresponds to the number of automated tests that are billed for the client for the same date of service.
- The total billed amount for all automated test and laboratory panel procedure codes that are billed for the client for the same date of service.

The automated test pricing may be calculated as follows:

Step 1

A percentage for each automated test or lab panel detail is derived from dividing the billed amount (B/A) for each procedure by the total billed amount (TB/A) for all automated test and laboratory panel procedure codes with the same date of service for the same client.

Example:

Automated Test	B/A	Percentage
Detail 1 Automated Test	= \$50.00	= 29%
Detail 2 Automated Test	= \$25.00	= 14%
Detail 3 Lab Panel	= \$100.00	= 57%
Detail 4 Clinical Lab Test	= \$20.00	= 0%
	TB/A = \$175.00	

Note: The TB/A is for automated test and laboratory panel procedure codes (details 1, 2, and 3 only). Detail 4 is not included in the calculations for the automated tests because it is a clinical lab procedure code and may be reimbursed as indicated on the fee schedule.

Calculations:

Detail 1	= 50.00 / 175.00	= .285714285714...	= 29%
Detail 2	= 25.00 / 175.00	= .142857142857...	= 14%
Detail 3	= 100.00 / 175.00	= .571428571428...	= 57%

Step 2

The detail allowed amount for each automated test (AT) procedure code will be the calculated percentage of the ATP level payment.

Example:

Automated Test	Number of Automated Tests	Allowed Amount
Detail 1 Automated Test	= 1	= \$3.10
Detail 2 Automated Test	= 1	= \$1.55
Detail 3 Lab Panel	= 4	= \$6.19
Detail 4 Clinical Lab Test	= 0	= Fee Schedule
ATP = 6 = \$10.84		

Note: The total number of automated tests includes the individual automated test procedure codes and the number of automated tests that are represented by each panel procedure code that is billed. Automated tests that are duplicated between panels are not counted more than once.

Calculations:

Detail 1	= 29% of 10.84	= (.285714285714...)X(10.84)	= \$3.10
Detail 2	= 14% of 10.84	= (.142857142857...)X(10.84)	= \$1.55
Detail 3	= 57% of 10.84	= (.571428571428...)X(10.84)	= \$6.19
			\$10.84

Note: If a clinical laboratory procedure code is included in a panel, the fee schedule rate for the clinical laboratory procedure is added to the ATP rate, and the resulting sum is divided among the automated test and laboratory panel procedure codes that are billed for the date of service.

The total allowed amount for all laboratory services that are billed for the client for the same date of service will represent the ATP level pricing combined with any clinical laboratory test fee schedule pricing.

2.2.6 Breast Cancer Gene 1 and 2 (BRCA) Testing

Breast Cancer Gene 1 and 2 (BRCA) testing services are benefits of Texas Medicaid when billed with the following procedure codes:

Procedure Codes						
81211	81212	81213	81214	81215	81216	81217

Breast cancer gene 1, early onset (BRCA1) and breast cancer gene 2, susceptibility protein (BRCA2) are tumor repressor genes responsible for keeping breast cells from growing too rapidly or in an uncontrolled way. Mutations within the gene interrupt this regulatory function and increase the risk of breast and ovarian cancer, have been linked to other types of cancer such as pancreatic and prostate, and can be inherited from a person's mother or father.

Note: Coverage of BRCA mutation analysis testing, including large rearrangement gene mutation analysis testing, are based on the National Comprehensive Cancer Network (NCCN) guidelines.

Interpretation of gene mutation analysis results is not separately reimbursable. Interpretation is part of the physician E/M service.

BRCA gene mutation analysis testing must be ordered based on familial medical history and the availability of previous familial gene mutation analysis testing results and only if the test results will affect treatment decisions or provide prognostic information.

Unaffected male or females with a family history of breast cancer, including diagnosis of ductal carcinoma in situ (DCIS), should only be considered for testing when the appropriate affected family member is unavailable. Clinical judgment should be used to determine if the client has a reasonable likelihood of a mutation, considering the client's current age and the age of the unaffected female relatives who link the client with the affected relatives.

It is mandatory that a client who is at risk for BRCA1, BRCA2, or BRCA large rearrangement genetic mutation receive genetic counseling before and after BRCA gene mutation testing.

BRCA gene mutation analysis testing (procedure codes 81211, 81212, 81213, 81214, 81215, 81216, and 81217) is limited to once per lifetime. Additional testing services may be considered for BRCA1 and BRCA2 comprehensive sequencing gene mutation analysis testing (procedure code 81211) on a case-by-case basis with prior authorization.

Note: Additional BRCA large rearrangement gene mutation analysis testing is not a benefit.

2.2.6.1 Genetic Counseling

Genetic counseling must be provided by a trained genetic counselor, nurse specialist in genetics, or other medical provider possessing expertise in genetic counseling that is not affiliated with the genetic testing laboratory for clients before and after BRCA gene mutation testing.

Both pre- and post-test counseling must provide the depth of content and time for the client to make an informed testing decision. The genetic counseling must be nondirective, and information about the purpose and nature of the tests must be provided to the client.

Pre-test genetic counseling must include:

- The risks and benefits of the specific genetic testing.
- The limitations of the specific genetic testing to be performed and the limitations of interpreting test results for an unaffected individual.

2.2.6.2 Documentation

Providers must maintain the following gene mutation analysis testing documentation in the client's medical record:

- The appropriateness of the genetic testing
- The client's specific high-risk criteria
- The benefit of the specific genetic testing to be performed
- Pre-testing genetic counseling, including all of the following:
 - Pre-test counseling date with the name and qualifications of the counseling professional
 - The risks, benefits, and limitations discussed with the client
 - The client's ability to understand the risks, benefits, and limitations and the client's informed choice to proceed with the specific gene mutation analysis testing as evidenced by the client's signature on a consent form specific to the genetic mutation testing to be performed.
- The client's BRCA1 and BRCA2 comprehensive gene mutation analysis testing results to support medical necessity for BRCA large rearrangement gene mutation analysis testing
- The client's BRCA large rearrangement gene mutation analysis testing results
- Post-testing genetic counseling, including all the following:
 - Post-test counseling date with the name and qualifications of the counseling professional
 - The client's ability to understand the results of the gene mutation analysis testing and the appropriate medical treatment resulting from the test results.

- The client's treatment plan and any treatment plan changes based on interpretation of the test results

The medical record is subject to retrospective review.

2.2.6.3 Prior Authorization for BRCA Testing

Prior authorization is not required for BRCA large rearrangement gene mutation analysis testing (procedure code 81213) when submitted with a negative test result for procedure code 81211.

Prior authorization is required for initial BRCA testing (procedure codes 81211, 81212, 81214, 81215, 81216, and 81217). The prior authorization request must include documentation that indicates that the client meets one or more of the criteria below:

- An individual (male or female) from a family with a known deleterious BRCA1/BRCA2 mutation
- A female with a personal history of breast cancer, including invasive or ductal carcinoma in situ (DCIS), diagnosed at age 45 years or younger
- A female with a personal history of breast cancer, including DCIS, diagnosed at any age and of an ethnicity associated with higher mutation frequency, such as: Ashkenazi Jewish, Icelandic, Swedish, or Hungarian descent
- A female with a personal history of epithelial ovarian cancer, including fallopian tube and primary peritoneal cancers, diagnosed at any age
- A male with a personal history of breast cancer, including DCIS, diagnosed at any age
- A female with a personal history of breast cancer, including DCIS, diagnosed at age 50 years or younger, and has one of the following:
 - An additional primary (2 primary sites, including bilateral or clearly separate ipsilateral) tumors occurring either synchronously or asynchronously
 - At least one close blood relative with breast cancer at any age
 - An unknown or limited family history
- A female with a personal history of breast cancer, including DCIS, diagnosed at age 60 years or younger with triple negative breast cancer
- A female with a personal history of breast cancer, including DCIS, diagnosed at any age, and has one of the following:
 - At least one close blood relative with breast cancer diagnosed at age 50 years or younger
 - At least two close blood relatives with breast cancer at any age
 - At least one close blood relative with epithelial ovarian cancer, including fallopian tube and primary peritoneal cancers
 - At least two close blood relatives with pancreatic cancer or prostate cancer (Gleason score 7 or greater) at any age
 - A close male blood relative with breast cancer at any age
- A male or female with a personal history of pancreatic cancer or prostate cancer (Gleason score 7 or greater) at any age regardless of ancestry with at least two close blood relatives with one of the following:
 - Breast cancer
 - Ovarian cancer, including fallopian tube and primary peritoneal cancers
 - Prostate cancer (Gleason score 7 or greater)

- Pancreatic cancer
- A male or female with a personal history of pancreatic cancer at any age and of an ethnicity associated with higher mutation frequency, such as Ashkenazi Jewish, Icelandic, Swedish, or Hungarian descent and one or more close blood relatives with pancreatic cancer
- A male or female with a family history of breast or ovarian cancer, including DCIS with one of the following:
 - At least one first or second degree blood relative meeting any of the criteria above; or
 - At least one third degree blood relative who has breast cancer, including DCIS, or ovarian cancer, including fallopian tube and primary peritoneal cancers, and at least two close blood relatives with one of the following:
 - Breast cancer, including DCIS, of which at least one with breast cancer was diagnosed at 50 years of age or younger
 - Ovarian cancer, including fallopian tube and primary peritoneal cancers

Note: *The term "close blood relative" includes first-degree male or female relatives (e.g., parents, siblings), second-degree relatives (e.g., aunts, uncles, grandparents), and third-degree relatives (e.g., first cousins, great grandparents), from the same side of the family as the client.*

Prior authorization for additional BRCA testing may be considered on a case-by-case basis by Medical Director review when testing criteria for these studies are met for clients who:

- Have previously been tested for BRCA1 and BRCA2 comprehensive sequencing gene mutation analysis testing and received negative results. Documentation of negative results for BRCA1 and BRCA2 comprehensive sequencing gene mutation analysis testing are required for medically necessary BRCA large rearrangement gene mutation analysis testing.
- Results are not available and every reasonable effort has been made to obtain the results. Documentation of the specific efforts to obtain results from the client's genetic testing physician or the testing laboratory must be included with the prior authorization request.
- BRCA1 and BRCA2 comprehensive sequencing or founder gene mutation analysis testing was obtained and interpreted before BRCA large rearrangement gene mutation analysis testing (procedure code 81213) was available.

A completed Hereditary Breast and Ovarian Cancer (HBOC) Genetic Testing Prior Authorization Request Form that has been signed and dated by the referring provider must be submitted.

A provider's signature on a submitted document indicates that the provider certifies, to the best of the provider's knowledge, the information in the document is true, accurate, and complete.

All documentation that is submitted with a handwritten physician's signature must have a handwritten date next to the signature and must be kept in the client's medical record. Stamped or digitalized signatures will not be accepted.

For comprehensive sequencing, the physician must indicate one of the following on the prior authorization request form:

- The client's familial genetic history that supports medical necessity for the requested BRCA1 and BRCA2 comprehensive sequencing, founder gene mutation analysis, or known familial variant gene mutation analysis testing.
- Every reasonable effort was made to obtain the client's familial genetic history and have been unable to obtain BRCA1 and BRCA2 comprehensive sequencing gene mutation analysis testing results for the affected family member(s). Documentation of the specific efforts made to obtain the client's familial genetic history must be submitted with the request.

To facilitate a determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including accurate medical necessity of the services requested. Medical documentation that is submitted by the physician must verify the client's diagnosis or family history. Requisition forms from the laboratory are not sufficient for the establishment of a client's personal and family history.

To complete the prior authorization process, the provider must mail or fax the request to the TMHP Special Medical Prior Authorization Unit and include documentation of medical necessity.

A request for retroactive authorization must be submitted no later than seven calendar days beginning the day after the lab draw is performed.

2.2.7 Complete Blood Count (CBC)

A CBC and its components may be reimbursed by Texas Medicaid without prior authorization. The medical necessity for all laboratory services must be documented in the client's medical record, and the services must be referenced to an appropriate diagnosis code.

Texas Medicaid considers a baseline CBC appropriate for the evaluation and management of existing and suspected disease processes. CBC tests should be individualized and based on client history, clinical indications, or proposed therapy, and will not be reimbursed for screening purposes.

When related CBC procedure codes are billed for the same date of service by the same provider, the first procedure code will be reimbursed and all other procedure codes will be denied.

Reticulocyte procedure codes may be reimbursed in addition to the CBC, hemogram, differential analysis, and platelet procedure codes indicated above.

Refer to: The appropriate [Texas Medicaid fee schedule](#) on the TMHP website at www.tmhp.com for CBC procedure codes that may be reimbursed.

2.2.8 Evocative and Suppression Testing

The following procedure codes for evocative and suppression testing may be reimbursed by Texas Medicaid:

Procedure codes									
80400	80402	80406	80408	80410	80412	80414	80415	80416	80417
80418	80420	80422	80424	80426	80428	80430	80432	80434	80435
80436	80438	80439							

Note: The procedure codes above do not require prior authorization.

Providers are encouraged to reference the American Board of Internal Medicine (ABIM) Foundation's "Choosing Wisely" lists to determine appropriateness of laboratory tests.

2.2.9 Genetic Testing for Colorectal Cancer

Genetic testing is provided to clients who have a first- or second-degree relative who has or has had colorectal cancer in order to determine if the client may have increased risk for developing colorectal cancer.

Note: A first-degree relative is defined as: sibling, parent, or offspring. A second-degree relative is defined as: uncle, aunt, grandparent, nephew, niece, or half-sibling.

Interpretation of gene mutation analysis results are part of the evaluation and management service and will not be reimbursed separately.

Genetic test results, when informative, may influence clinical management decisions. The documentation that is maintained in the client's medical record must reflect that the client or family member has been given information on the nature, inheritance, and implications of genetic disorders to help them

make informed medical and personal decisions prior to the genetic testing. The testing must be medically necessary and supported by documentation with a clear rationale for testing, which must be retained in the client's medical record and made available upon request.

2.2.9.1 Documentation Requirements

Providers must maintain the following documentation in the client's medical record for genetic testing for colorectal cancer:

- Documentation of formal pre-test counseling, including assessment of the client's ability to understand the risks and limitations of the test.
- The client's informed choice to proceed with the genetic testing for colorectal cancer.

The provider must order the test based on the familial medical history and the availability of previous family testing results. The medical record is subject to retrospective review.

Refer to: The appropriate [Texas Medicaid fee schedule](#) on the TMHP website at www.tmhp.com for genetic testing procedure codes that may be reimbursed.

2.2.9.2 Authorization Requirements

Prior authorization is required for gene mutation analysis. Prior authorized services may be reimbursed once per lifetime when billed by any provider. Additional services will not be prior authorized.

Prior authorization requests may be considered for Familial Adenomatous Polyposis (FAP) testing for clients of any age with well defined hereditary cancer syndromes and for which either a positive or negative result will change medical care. The client for whom the request is made must have more than 20 polyps or a first-degree relative with FAP and a documented mutation.

Note: *Clients who are seven years of age or younger must have clear rationale for testing and documentation of medical necessity from the client's medical record must be submitted with the prior authorization request.*

Prior authorization requests may be considered for Hereditary Nonpolyposis Colorectal Cancer (HNPCC) testing for clients of any age. Testing for HNPCC is used to determine whether an individual has an increased risk for colorectal cancer or other HNPCC-associated cancers. Results of the test may influence clinical management decisions. The request must include one or more of the following criteria for testing:

- The client has three or more family members (at least one must be a first-degree relative) who have colorectal cancer, and FAP has been ruled out. Two successive generations were affected, and one or more of the relatives was diagnosed with colorectal cancer at 50 years of age or younger.
- The client has had two HNPCC cancers.
- The client has colorectal cancer and a first-degree relative who also has colorectal cancer or HNPCC extracolonic cancer at 50 years of age or younger or colorectal adenoma at 40 years of age or younger.
- The client has had colorectal cancer or endometrial cancer at 50 years of age or younger.
- The client has had right-sided colorectal cancer with an undifferentiated pattern on histology at 50 years of age or younger.
- The client has had signet-cell type colorectal cancer at 50 years of age or younger.
- The client has had colorectal adenoma at 40 years of age or younger.

- The client is an asymptomatic individual with a first- or second-degree relative with a documented HNPCC mutation.

Note: Clients who are 20 years of age or younger must have clear rationale for testing and documentation of medical necessity from the client's medical record must be submitted with the prior authorization request.

A provider's signature, including the prescribing provider's, on a submitted document indicates that the provider certifies, to the best of the provider's knowledge, the information in the document is true, accurate, and complete.

All documentation that is submitted with a handwritten provider's signature must have a handwritten date next to the signature and must be kept in the client's medical record. Stamped and digitalized signatures will not be accepted.

To complete the prior authorization process, the provider must mail or fax the request to the TMHP Special Medical Prior Authorization Unit and include documentation of medical necessity. Requisition forms from the laboratory are not sufficient for verification of the personal and family history.

To facilitate a determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including accurate medical necessity of the services requested. Medical documentation that is submitted by the physician must verify the client's diagnosis or family history.

Guidelines for MLH1 and MLH2 mutation testing are based on guidelines established by the American College of Medical Genetics and the American Gastroenterological Association.

A request for retroactive authorization must be submitted no later than seven calendar days beginning the day after the lab draw is performed.

2.2.10 Human Immunodeficiency Virus (HIV) Drug Resistance Testing

Types of testing for HIV drug resistance include:

- Genotypic test that identifies the presence of mutations that are known to cause reduced drug susceptibility.
- Phenotypic test that measures drug susceptibility of the virus by determining the concentration of drug that inhibits viral replication in vitro.

Standard treatment regimens for HIV therapy require a combination of three or more drugs. Standard therapy continues if a reduction in viral load is achieved. Incomplete virus suppression favors the development of a drug resistance and jeopardizes the success of future therapy. Testing for drug resistance as a prerequisite to further therapy is indicated under such circumstances.

In order to ensure accurate testing results, the client should be on appropriate antiretroviral therapy at the time of testing or within four weeks of discontinuing the drug regimen.

Testing for antiretroviral drug resistance is recommended before the initiation of therapy in treatment-naïve children.

Testing for antiretroviral drug resistance is indicated in certain clinical situations. These indications include any of the following:

- Individuals who have achieved a suboptimal response after the initiation of antiretroviral therapy
- Individuals who have an initial (new onset) acute HIV infection, to determine if a drug-resistant viral strain was transmitted and to plan a drug regimen accordingly.
- Individuals who have virological failure during antiretroviral therapy, laboratory results showing HIV RNA levels greater than 500 and less than 1,000 copies/ml.
- HIV-infected pregnant women before initiation of therapy.

- HIV-infected pregnant women entering pregnancy with HIV RNA levels at or below 400 copies/ml while the women are on therapy.

Documentation must be maintained in the client's medical record to support medical necessity for the drug-resistance testing. Specific documentation requirements are dependent on the rationale for the testing. Documentation must include, but is not limited to, the date the drug regimen was initiated, the dosage and frequency of the prescribed medication, and laboratory tests that support all of the following:

- Suboptimal response to the specific drug therapy
- Acute HIV infection, with identification of the specific viral strain
- HIV RNA levels greater than 500 and less than 1,000 copies/ml
- Positive pregnancy results in an HIV positive female client
- HIV RNA levels of 400 copies/ml or less during pregnancy

Drug resistance testing is not recommended when one of the following criteria is met:

- The drug regimen has been discontinued for more than four weeks
- The viral load is less than 500 copies/ml

The following procedure codes for antiretroviral therapy drug resistance may be reimbursed by Texas Medicaid:

Procedure Codes				
87900	87901	87903	87904	87906

Procedure code 87904 may be reimbursed only when it is billed with the same date of service by the same provider as procedure code 87903.

Procedure codes 87900, 87901, 87903, and 87906 may each be reimbursed once per day and up to twice per rolling year when they are billed by the same provider.

If additional drug-resistance testing is performed within the same rolling year, the provider must submit documentation that supports the medical necessity of the additional testing.

Authorization is not required for either genotypic or phenotypic testing.

Refer to: Subsection C.1.1, "Routine HIV Testing Procedure Codes" in Appendix C, "HIV/AIDS" (*Vol. 1, General Information*) for additional information about HIV testing laboratory procedures.

2.2.11 Iron Studies

Iron studies are used in the evaluation of disorders of iron metabolism and are primarily indicated for the workup of iron deficiency and iron overload.

Iron studies may be reimbursed when the appropriate procedure code is billed with one of the following diagnosis codes:

Diagnosis Codes									
23871	23872	23873	23874	23875	23876	23877	23879	24900	24901
24910	24911	24920	24921	24930	24931	24940	24941	24950	24951
24960	24961	24970	24971	24980	24981	24990	24991	25000	25001
25002	25003	25010	25011	25012	25013	25020	25021	25022	25023
25030	25031	25032	25033	25040	25041	25042	25043	25050	25051
25052	25053	25060	25061	25062	25063	25070	25071	25072	25073

Diagnosis Codes									
25080	25081	25082	25083	25090	25091	25092	25093	2570	2572
2578	2579	27501	27502	27503	27509	2800	2801	2808	2809
2810	2811	2812	2813	2814	2818	2819	28241	28242	28249
28260	28261	28262	28263	28264	28268	28269	2827	2828	2829
2839	2850	28521	28522	28529	2859	33399	4254	4260	42610
42611	42612	42613	4262	4263	4264	42650	42651	42652	42653
42654	4266	4267	42681	42682	42689	4269	4270	4271	4272
42731	42732	42741	42742	42760	42761	42769	42781	42789	4279
4280	4281	42820	42821	42822	42823	42831	42832	42833	42840
42841	42842	42843	4289	4481	57140	57141	57142	57149	5715
5718	5719	5738	5739	60784	6083	6260	6261	70400	70900
70909	7099	7130	71500	71504	71509	71510	71511	71512	71513
71514	71515	71516	71517	71518	71520	71521	71522	71523	71524
71525	71526	71527	71528	71530	71531	71532	71533	71534	71535
71536	71537	71538	71580	71589	71590	71591	71592	71593	71594
71595	71596	71597	71598	71640	71641	71642	71643	71644	71645
71646	71647	71648	71649	71650	71651	71652	71653	71654	71655
71656	71657	71658	71659	71660	71661	71662	71663	71664	71665
71666	71667	71680	71681	71682	71683	71684	71685	71686	71687
71688	71689	71690	71691	71692	71693	71694	71695	71696	71697
71698	71699	7891	7892	78951	78959	7904	7906		

Procedure code 83550 will be denied if it is billed with the same date of service by the same provider as procedure code 84466. All other iron studies may be reimbursed if they are billed with the same date of service by the same provider.

Modifier 91 may be used if a repeat procedure on the same day by the same provider is medically necessary.

Refer to: The appropriate [Texas Medicaid fee schedule](#) on the TMHP website at www.tmhp.com for iron studies procedure codes that may be reimbursed.

2.2.12 Urinalysis

Urinalysis laboratory tests may be reimbursed without prior authorization.

Refer to: The appropriate [Texas Medicaid fee schedule](#) on the TMHP website at www.tmhp.com for urinalysis procedure codes that may be reimbursed.

When related urinalysis procedure codes are billed for the same date of service by the same provider, the first procedure code will be reimbursed and all other procedure codes will be denied. Claims will be denied with an explanation directing the provider to appeal with a copy of their Remittance and Status (R&S) Report and the appropriate comprehensive procedure code if they are not satisfied with their reimbursement.

Example: *If a provider bills procedure codes 81002 and 81015 for the same date of service, the first procedure code billed may be reimbursed and the second procedure code billed will be denied. The provider will be directed to appeal the claim with the more inclusive procedure code (in this example, procedure code 81000).*

Procedure code 84578 may be reimbursed for the same date of service as procedure code 81000, 81001, 81002, 81003, 81005, or 81020.

2.2.13 Additional Laboratory Services

2.2.13.1 Colorectal Cancer Screening

Refer to: Subsection 4.2.8, “Colorectal Cancer Screening” in the *Hospital Services Handbook (Vol. 2, Provider Handbooks)*.

Subsection 9.2.15.2, “Colorectal Cancer Screening” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

2.2.13.2 Cytopathology Studies

Refer to: Subsection 9.2.26.4, “Cytopathology Studies—Other Than Gynecological” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

Subsection 5.15, “Pap Smear (Cytopathology Studies)” in the *Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks)*.

2.2.13.3 Helicobacter pylori Testing

Refer to: Subsection 9.2.26.8, “Helicobacter Pylori (H. pylori)” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

2.2.13.4 Laboratory Services for Clients on Dialysis

Refer to: Subsection 6.2.9, “Laboratory and Radiology Services” in the *Clinics and Other Outpatient Facility Services Handbook (Vol. 2, Provider Handbooks)*.

2.2.13.5 Prognostic Breast and Gynecological Cancer Studies

Refer to: Subsection 6.2.9, “Laboratory and Radiology Services” in the *Clinics and Other Outpatient Facility Services Handbook (Vol. 2, Provider Handbooks)*.

2.2.13.6 THSteps Outpatient Laboratory Services

Refer to: Subsection 5.3.11.6, “Laboratory Test” in the *Children’s Services Handbook (Vol.2, Provider Handbooks)*.

2.2.13.7 Authorization Requirements

Prior authorization is not required for most laboratory services. Providers may refer to the specific sections for those services that require authorizations.

2.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including independent laboratory services. Independent laboratory services are subject to retrospective review and recoupment if documentation does not support the service billed.

Independent laboratory documentation must include the physician’s signed and dated order for the laboratory tests. The specific tests ordered by the physician must be listed on the order. The test results must also be included in the documentation.

2.4 Claims Filing and Reimbursement

2.4.1 Claims Information

When family planning test specimens, such as Pap smears, are collected, providers must direct the laboratory to indicate that the claim for the test is to be billed as a family planning service using a family planning diagnosis code.

Refer to: Section 2.2, “Services, Benefits, Limitations, and Prior Authorization” in the *Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2 Provider Handbooks)* for information about Medicaid Title XIX Family Planning Services.

Section 3.3, “Services, Benefits, Limitations, and Prior Authorization” in the *Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2 Provider Handbooks)* for information about the Texas Women’s Health Program.

A National Provider Identifier (NPI) is required for all claims. In addition, for paper claims, the Texas Provider Identifier (TPI) is required for the billing and performing provider only. NPI-only is required for all other fields.

Providers must submit independent laboratory services to TMHP in an approved electronic format or on a CMS-1500 paper claim form. Providers must purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (*Vol. 1, General Information*) for information on electronic claims submissions.

Section 6: Claims Filing (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” (*Vol. 1, General Information*). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

2.4.1.1 Electronic Filing for Laboratory Providers

Referring provider information is always required on laboratory claims. Failure to submit this data will result in a claim rejection on the TMHP Electronic Data Interchange (EDI).

When the place of service is 6, and the billing provider identifier belongs to a laboratory, there is no need to submit the same provider identifier in the facility ID field. This notation causes the claim to suspend processing unnecessarily, and may cause a delay in the disposition of the claim. For questions about the electronic fields, contact the commercial software vendor or the TMHP EDI Help Desk at 1-888-863-3638.

2.4.2 Reimbursement

The Medicaid rates for independent laboratories are calculated in accordance with 1 TAC §355.8081 and §355.8610, and the Deficit Reduction Act (DEFRA) of 1984. By federal law, Medicaid payments for clinical laboratory services cannot exceed the Medicare payment for that service.

As the result of the Tax Equity and Fiscal Responsibility Act (TEFRA) of 1982, independent laboratories are not directly reimbursed by Texas Medicaid when providing tests to clients who are registered as hospital inpatients. Hospital reimbursements (i.e., inpatient DRG reimbursement) include payment for all pathology and laboratory services, including those sent to referral laboratories. Hospital-based and

referral laboratory providers must obtain reimbursement for the technical portion from the hospital. The technical portion includes the handling of specimens and the automated or technician-generated reading and reporting of results. These services are not billable to Medicaid-covered clients.

Refer to: Subsection 2.2, “Fee-for-Service Reimbursement Methodology” (*Vol. 1, General Information*).

Texas Medicaid pays up to the amount allowed for the total component for the same procedure, same client, same date of service, any provider.

- Providers who perform the technical service and interpretation must bill for the total component.
- Providers who perform only the technical service must bill for the technical component.
- Providers who perform only the interpretation must bill for the interpretation component.

Claims filed in excess of the amount allowed for the total component for the same procedure, same dates of service, same client, any provider, are denied. Claims are paid based on the order in which they are received.

For example, if a claim is received for the total component and TMHP has already made payment for the technical or interpretation component for the same procedure, same dates of service, same client, any provider, the claim for the total component will be denied as previously paid to another provider. The same is true if a total component has already been paid and claims are received for the individual components. Texas Medicaid implemented mandated rate reductions for certain services. The Online Fee Lookup (OFL) and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

2.4.2.1 National Correct Coding Initiative (NCCI) and Medically Unlikely Edit (MUE) Guidelines

The Healthcare Common Procedure Coding System (HCPCS) and Current Procedural Terminology (CPT) codes included in the *Texas Medicaid Provider Procedures Manual* and the *Texas Medicaid Bulletin* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals and bulletins. Providers should refer to the [CMS NCCI web page](#) for correct coding guidelines and specific applicable code combinations.

3 Radiological and physiological laboratory services

3.1 Enrollment

To enroll in Texas Medicaid, physiological laboratory, portable X-ray supplier, independent diagnostic testing facility (IDTF), and radiological laboratory providers must be actively enrolled in Medicare.

3.1.1 Enrollment Criteria for Mammography Providers

All mammography providers, including those providing stereotactic biopsies, must be certified by the Bureau of Radiation Control (BRC).

Additionally, the Department of State Health Services (DSHS) issues mammography certification to providers who render mammography services. Providers can submit this certification to the TMHP Provider Enrollment Department in lieu of certification issued by the Food and Drug Administration (FDA), because a mammography certification issued by DSHS is recognized by the FDA. TMHP will also accept mammography certification issued by the FDA. The certificate will contain the BRC certification number, dates of issue and expiration, type of service, and Texas Medicaid and Children with Special Health Care Needs (CSHCN) Services Program provider identifiers.

Providers must check the expiration date of their mammography certification and submit an updated mammography certification prior to the expiration date. The certifications may be mailed or faxed to:

Texas Medicaid & Healthcare Partnership
 Provider Enrollment
 PO Box 200795
 Austin, TX 78720-0795
 Fax: 1-512-514-4214

3.2 Services, Benefits, Limitations, and Prior Authorization

The following high-technology radiology services may be reimbursed by Texas Medicaid with prior authorization:

- Cardiac nuclear imaging
- Computed tomography (CT)
- Computed tomography angiography (CTA)
- Functional MRI (fMRI)
- Magnetic resonance imaging (MRI)
- Magnetic resonance angiography (MRA)
- Positron emission tomography (PET) scan imaging

Note: Providers and facilities are required to use the lowest possible radiation dose that is consistent with acceptable image quality for cardiac nuclear imaging, CT, and PET examinations of all clients. It is recommended that providers and facilities use national standards such as those established by the American College of Radiology in their ACR Practice Guidelines and Technical Standards manual.

Radiology interpretations in any place of service will be denied if they are billed by the attending physician. Services that are billed by the attending physician are included in the facility fee and are not reimbursed separately.

Note: The 3-dimensional (3-D) obstetric ultrasound is not a benefit of Texas Medicaid.

Refer to: PA section for exceptions to prior authorization.

3.2.1 Cardiac Nuclear Imaging

Cardiac nuclear imaging is a benefit of Texas Medicaid and may be reimbursed using the following procedure codes:

Procedure Codes									
78414	78428	78451	78452	78453	78454	78466	78468	78472	78473
78481	78483	78494	78496						

The cardiac nuclear imaging study may be reimbursed separately from the diagnostic radiopharmaceutical.

Refer to: The [online fee lookup \(OFL\)](#) or the applicable fee schedules on the TMHP website at www.tmhp.com to review the diagnostic radiopharmaceuticals that are reimbursed by Texas Medicaid.

3.2.1.1 Authorization Requirements

Authorization is required for cardiac nuclear imaging.

Refer to: Subsection 3.2.6, “Authorization Requirements for CT, CTA, MRI, fMRI, MRA, PET, and Cardiac Nuclear Imaging Services” in this handbook.

3.2.2 Computed Tomography and Magnetic Resonance Imaging

CT, CTA, MRI, fMRI, and MRA services are benefits of Texas Medicaid.

The following procedure codes may be reimbursed with prior authorization for CT, CTA, MRI, fMRI, and MRA radiology services:

Procedure Codes									
70336	70450	70460	70470	70480	70481	70482	70486	70487	70488
70490	70491	70492	70496	70498	70540	70542	70543	70544	70545
70546	70547	70548	70549	70551	70552	70553	70554	70555	71250
71260	71270	71275	71550	71551	71552	71555	72125	72126	72127
72128	72129	72130	72131	72132	72133	72141	72142	72146	72147
72148	72149	72156	72157	72158	72159	72191	72192	72193	72194
72195	72196	72197	72198	73200	73201	73202	73206	73218	73219
73220	73221	73222	73223	73225	73700	73701	73702	73706	73718
73719	73720	73721	73722	73723	73725	74150	74160	74170	74174
74175	74176	74177	74178	74181	74182	74183	74185	75557	75559
75561	75563	75565	75571	75572	75573	75574	75635	76376	76377
76380	76390	76497	76498	77011	77058	77059	77084		

Texas Medicaid may reimburse the total component for procedure codes 76497 and 76498 when the service is rendered in the office and outpatient hospital setting by radiation treatment center providers.

The professional component may be reimbursed when the service is rendered in the office, inpatient hospital, or outpatient hospital setting by physician providers.

The technical component will be a benefit when rendered in the office setting by physician, radiation treatment center, portable X-ray supplier, radiological laboratory, and physiological laboratory providers.

Procedure codes 76497 and 76498 will be a benefit when rendered in the outpatient hospital setting by radiation treatment center providers.

The following revenue codes must be billed with the most appropriate corresponding procedure code for CT, CTA, MRI, fMRI, and MRA radiology services rendered by outpatient hospital providers:

Revenue Codes							
350	351	352	359	610	611	612	619

The addition of post 3-D reconstruction (procedure codes 76376 and 76377) CT, CTA, MRI, and MRA studies must be prior authorized. No additional payment will be made in absence of prior authorization.

3.2.2.1 Functional MRI (fMRI)

Texas Medicaid considers fMRI medically necessary when it is being used as part of a preoperative evaluation for a planned craniotomy and is required for localization of eloquent areas of the brain, such as those responsible for speech, language, motor function, and senses, which might potentially be put at risk during the proposed surgery.

Neurofunctional testing procedure code 96020 must be reported in conjunction with brain fMRI procedure code 70555. Procedure code 96020 is informational and will not be reimbursed separately.

3.2.2.2 Intraoperative MRI (iMRI)

Indications for intracranial neurosurgical procedures using intraoperative MRI (iMRI) include, but are not limited to, the following:

- Oncologic neurosurgical procedures
- Epilepsy
- Chiari surgery
- Deep brain stimulators

Only one iMRI procedure code may be billed per operative session. Procedure codes 70557, 70558, and 70559 must not be billed in conjunction with procedure code 61751, 77021, or 77022.

Intraoperative MRI procedure codes 70557, 70558, and 70559 that are billed with modifier 26 may be reimbursed to physician providers for interpretation.

Procedure codes 75559 and 75563 must be billed in conjunction with stress testing procedure codes 93015, 93016, 93017, and 93018.

3.2.2.3 Authorization Requirements and Flexibility

Authorization is required for CT, CTA, MRI, fMRI, and MRA procedures.

Note: *Intraoperative MRI (iMRI) does not require prior authorization.*

Refer to: Subsection 3.2.6, “Authorization Requirements for CT, CTA, MRI, fMRI, MRA, PET, and Cardiac Nuclear Imaging Services” in this handbook.

If the ordering physician or radiologist determines that a CT, CTA, MRI, fMRI, or MRA procedure that is different from the authorized procedure is required or that additional procedures are required, the following will apply:

- The procedure performed is less complex than the procedure authorized but of the same modality (e.g., an MRI with contrast is prior authorized and the actual procedure performed is an MRI without contrast). Full reimbursement is allowed for the billed procedure.
- The authorized procedure is performed and an additional higher-level procedure of the same modality is deemed medically necessary within the same authorization period. A separate authorization is required. The additional procedure must be prior authorized separately and submitted on a separate claim.
- The procedure billed is more complex than the procedure authorized but of the same modality. No authorization update will result in reimbursement according to the rate of the lesser authorized code. For full reimbursement of the more complex procedure, the authorization requires an update.

The following table includes the recognized relationships for authorization flexibility:

Level 1 (High)	Level 2 (Moderate)	Level 3 (Low)
70470	70460	70450
70482	70481	70480
70488	70487	70486
70492	70491	70490
70543	70542	70540
70546	70545	70544
70549	70548	70547
70553	70552	70551

Level 1 (High)	Level 2 (Moderate)	Level 3 (Low)
71270	71260	71250
71552	71551	71550
72127	72126	72125
72130	72129	72128
72133	72132	72131
72156	72142	72141
72157	72147	72146
72158	72149	72148
72194	72193	72192
72197	72196	72195
73202	73201	73200
73220	73219	73218
73223	73222	73221
73702	73701	73700
73720	73719	73718
73723	73722	73721
74170	74160	74150
74178	74177	74176
74183	74182	74181
75559	75557	
75563	75561	

3.2.3 Positron Emission Tomography (PET) Scan Imaging

PET scan imaging services are benefits of Texas Medicaid and may be reimbursed using the following procedure codes:

Procedure Codes						
78608	78811	78812	78813	78814	78815	78816

Procedure codes 78459, 78491, and 78492 are not reimbursed by Texas Medicaid.

The PET scan procedure may be reimbursed separately from the diagnostic radiopharmaceutical.

Refer to: The [online fee lookup \(OFL\)](#) or the applicable fee schedules on the TMHP website at www.tmhp.com to review the diagnostic radiopharmaceuticals that are reimbursed by Texas Medicaid.

3.2.3.1 Authorization Requirements

Prior authorization is required for PET imaging services.

Refer to: Subsection 3.2.6, “Authorization Requirements for CT, CTA, MRI, fMRI, MRA, PET, and Cardiac Nuclear Imaging Services” in this handbook.

3.2.4 Radiology/Diagnostic Imaging Policy

Radiography and fluoroscopy radiology/diagnostic imaging may be reimbursed by Texas Medicaid using the following procedure codes:

Procedure Codes				
74775	75956	75957	75958	75959

Procedure code 74775 may be reimbursed for services rendered to clients who are 20 years of age and younger.

The procedure code in Column A must be billed with the procedure codes in Column B by the same provider with the same date of service to be reimbursed:

Column A	Column B
75956	33880
75957	33881
75958	33883 or 33884
33884	33883
75959	33886

Texas Medicaid may reimburse the professional interpretation component only when the physician bills procedure codes 75956, 75957, 75958, or 75959. The professional and technical service may be reimbursed to the inpatient hospital through the DRG reimbursement.

3.2.4.1 Authorization Requirements

Prior authorization is not required for the radiology/diagnostic imaging procedure codes in this section.

3.2.5 Physician-Performed Radiology Services

Refer to: Subsection 9.2.64, “Radiology Services” in *Medial and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 1, Provider Handbooks)*.

3.2.6 Authorization Requirements for CT, CTA, MRI, fMRI, MRA, PET, and Cardiac Nuclear Imaging Services

Prior authorization is not required for emergency department services, outpatient observation services, or inpatient hospital radiology services.

Prior authorization is required for outpatient nonemergent services (i.e., those that are planned or scheduled). Prior authorization must be obtained before the service is rendered.

The following table summarizes the authorization requirements for CT, CTA, MRI, fMRI, MRA, PET, and cardiac nuclear imaging services:

Condition	Authorization Requirements
Emergency department visit	<p>Authorization is not required for emergency department radiology services that are rendered during an emergency department visit.</p> <ul style="list-style-type: none"> For professional claims, the appropriate radiology procedure code must be billed with modifier U6. The facility may be reimbursed using the appropriate, corresponding emergency services revenue code.

Condition	Authorization Requirements
Outpatient emergent condition	<p>Retroactive authorization is required for unplanned radiology procedures performed during other planned or scheduled outpatient visits or procedures.</p> <p>Texas Medicaid defines an emergent condition as a medical condition (including emergency labor and delivery) manifesting itself by acute symptoms of sufficient severity (including severe pain, psychiatric disturbances, or symptoms of substance abuse) such that a prudent layperson with an average knowledge of health and medicine could reasonably expect the absence of immediate medical attention to result in at least one of the following:</p> <ul style="list-style-type: none"> • Placing the recipient’s health (or, with respect to a pregnant woman, the health of the woman or her unborn child) in serious jeopardy • Serious impairment to bodily functions • Serious dysfunction to any bodily organ or part <p>The physician must determine that a medical emergency, which imminently threatens life or limb exists and that the medical emergency requires advanced diagnostic imaging.</p> <p>Refer to: Subsection 3.2.6.1, “Retroactive Authorization” in this handbook.</p>
Inpatient hospital	Authorization is not required for inpatient hospital radiology services.

Prior authorization of nonemergent services is considered on an individual basis, adhering to standard clinical evidence-based guidelines. Documentation must support medical necessity for the service and must be maintained in the client’s medical record, both by the ordering physician (i.e., the physician who orders the study) and the performing facility.

Nationally-accepted guidelines and radiology protocols based on medical literature are used in the authorization processes for urgent, emergent, and nonemergent services. These include, but are not limited to:

- American College of Radiology (specifically, their Appropriateness Criteria)
- American Academy of Neurology
- American Academy of Orthopedic Surgeons
- American College of Cardiology
- American Heart Association
- National Comprehensive Cancer Care Network

Refer to: Subsection 3.2.2.3, “Authorization Requirements and Flexibility” in this handbook for information about authorization flexibility for CT, CTA, MRI, fMRI, and MRA procedures.

3.2.6.1 Retroactive Authorization

A request for retroactive authorization for an emergent or urgent CT, MR, PET, or cardiac nuclear imaging service must be submitted no later than 14 calendar days after the day on which the study was completed.

Retroactive authorization of urgent or emergent services is considered on an individual basis, adhering to standard clinical evidence-based guidelines. Documentation must support medical necessity for the study and must be maintained in the client's medical record, both by the ordering physician (i.e., the physician ordering the study) and the performing facility.

Retroactive authorization for outpatient urgent services is considered when all of the following criteria are met:

- The physician who renders the imaging service determines, during the provision of prior-authorized services, that additional or alternate procedures are medically indicated.
- The urgent condition requires additional or alternate advanced diagnostic imaging.

Retroactive authorization for outpatient emergent services is considered when all of the following criteria are met:

- The physician determines that a medical emergency that imminently threatens life or limb exists.
- The medical emergency requires advanced diagnostic imaging.

Retroactive authorization is not required when a prior-authorized CT or MR procedure is changed by the ordering physician or radiologist to a lesser procedure of the same modality (e.g., MRI with contrast is authorized and the actual procedure performed is MRI without contrast).

3.2.6.2 Request Form and Documentation

Regardless of method of submission, the ordering physician must complete and retain the Radiology Prior Authorization Request Form with an original signature in the client's medical record.

Providers must submit the form with the request information related to the medical necessity for the service, including all of the following:

- Diagnosis
- Treatment history
- Treatment plan
- Medications that the client is currently taking
- Previous imaging results

Providers may also be asked to provide additional documentation as necessary during the authorization process.

The physician's signature must be current, unaltered, original, and handwritten. A computerized or stamped signature and date is not acceptable.

Section 1 of the Radiology Prior Authorization Request Form must be completed, signed, and dated by the ordering physician before requesting prior authorization, regardless of the method of request for authorization.

Section 2 of the Radiology Prior Authorization Request Form must be completed, signed, and dated by the physician who performs the service prior to requesting retroactive authorization for urgent or emergent studies.

Residents, physician assistants (PAs), and nurse practitioners (NPs) may order radiological procedures; however, the ordering or referring clinician must sign the authorization form and provide the group or supervising provider's provider identifier.

The Radiology Decision Support Tool is provided by MedSolutions as a resource for providers. MedSolutions uses the evidence-based guidelines to authorize advanced imaging services for TMHP, and these guidelines help providers determine the most appropriate treatment option for the client related to advanced imaging services. The documents include the recognized clinical guidelines for CT, CTA, MR, MRA, PET, and cardiac nuclear imaging studies.

Refer to: Section 3, “Inpatient Hospital (Medical/Surgical Acute Care Inpatient Facility)” in *Hospital Services Handbook (Vol. 2, Provider Handbooks)*.

Section 9, “Physician” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information on MRI and contrast material.

The [Radiology Prior Auth Services](http://www.tmhp.com) page of the TMHP website at www.tmhp.com for the Radiology Decision Support Tool.

3.2.6.3 Methods of Submission

Authorization requests for CT, CTA, MRI, fMRI, MRA, PET, and cardiac nuclear imaging studies for Texas Medicaid clients must be submitted to MedSolutions. MedSolutions is the TMHP subcontractor for high-tech radiology services. Providers can submit authorizations to MedSolutions:

- Online at www.tmhp.com, on the [Radiology Prior Auth Services page](http://www.tmhp.com), or on the MedSolutions website at www.medsolutionsonline.com
- By telephone to 1-800-572-2116
- By fax to 1-800-572-2119
- By mail to:

Texas Medicaid & Healthcare Partnership
730 Cool Springs Blvd, Suite 800
Franklin, TN 37067

All prior authorization requests for outpatient urgent or emergent radiology services should be made by telephone in order to ensure a timely response. Requests for retroactive authorization may be submitted online using the MedSolutions prior authorization portal, or by telephone, fax, or mail.

Requests for authorization that are submitted by fax or mail must be submitted using the Radiology Prior Authorization Request Form.

3.2.7 Additional Radiology and Physiological Laboratory Services

3.2.7.1 Ambulatory Electroencephalogram

Refer to: Section 9.2.26.2, “Ambulatory Electroencephalogram (Ambulatory EEG)” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

3.2.7.2 Brachytherapy

Refer to: Subsection 9.2.63.1, “Brachytherapy” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

3.2.7.3 Diagnostic Doppler Sonography

Refer to: Subsection 9.2.46.6, “Doppler Studies” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

3.2.7.4 Electrocardiograms

Refer to: Subsection 9.2.26.6, “Electrocardiogram (ECG)” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

3.2.7.5 Electromyography (EMG and Nerve Conduction Studies (NCS))

Refer to: Subsection 9.2.26.7, “Esophageal pH Probe Monitoring” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information.

Subsection 4.2.10, “Electrodiagnostic (EDX) Testing” in *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)*.

3.2.7.6 Esophageal pH Probe Monitoring

Refer to: Subsection 9.2.26.7, “Esophageal pH Probe Monitoring” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

3.2.7.7 Mammography Services

The following procedure codes will be denied if the provider does not have a BRC mammography certification on file:

Procedure Codes					
77057	77056	77055	77054	77053	77032

Refer to: Subsection 9.2.15.5, “Prognostic Breast and Gynecological Cancer Studies” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information about mammography services.

3.2.7.8 Nonsurgical Vision Services

Refer to: Subsection 4.3.5.4, “Ophthalmic Ultrasound” in *Vision and Hearing Services Handbook (Vol. 2, Provider Handbooks)*.

3.2.7.9 Obstetric Services

Refer to: Subsection 9.2.46.9, “Obstetric Ultrasound” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

3.2.7.10 Radiation Therapy Services

Refer to: Subsection 9.2.63, “Radiation Therapy” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for information about radiation therapy, including brachytherapy and stereotactic radiosurgery.

3.2.7.11 Screening and Diagnostic Studies of the Breast

Refer to: Subsection 9.2.15.4, “Mammography (Screening and Diagnostic Studies of the Breast)” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

3.2.7.12 Sleep Studies

Refer to: Subsection 9.2.69, “Sleep Studies” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

3.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including radiological and physiological laboratory services. Radiological and physiological laboratory services are subject to retrospective review and recoupment if documentation does not support the service billed.

3.4 Claims Filing and Reimbursement

3.4.1 Claims Information

Claims for radiological and physiological laboratory services and portable X-ray supplier services must include the referring or ordering provider. Radiological and physiological laboratory services and portable X-ray supplier services must be submitted to TMHP in an approved electronic format or on a CMS-1500 paper claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (*Vol. 1, General Information*) for information on electronic claims submissions.

Section 6: Claims Filing (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (*Vol. 1, General Information*). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

3.4.1.1 Diagnosis Requirements

A diagnosis is not required with a provider’s request for payment except when providing the following services:

- Ambulatory Electroencephalogram (A/EEG)
- Arteriogram
- Cardiac nuclear imaging
- Chest X-ray
- Computed tomography imaging (CT)
- Echography
- Electrocardiogram (ECG)
- Functional MRI (fMRI)
- Magnetic resonance angiography (MRA)
- Magnetic resonance imaging (MRI)
- Mammographies, noninvasive diagnostic studies
- Positron emission tomography (PET) scan
- Polysomnographies
- Venographies

Claims for all services provided to clients who are eligible for “Emergency Care Only” must have a diagnosis to be considered for reimbursement. As with all procedures billed to Texas Medicaid, most baseline screening or comparison studies are not a benefit.

Refer to: Section 9, “Physician” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*) for more information on these services.

3.4.1.2 Modifier Requirements for Type of Service Assignment

For the radiology, physiological lab, and X-ray procedures in this chapter, providers must bill modifier 26 for the interpretation component or modifier TC for the technical component. No modifier is necessary for the total component.

Refer to: Subsection 6.2.5, “Modifier Requirements for TOS Assignment” in Section 6, “Claims Filing” (*Vol. 1, General Information*).

Subsection 6.3.2, “Type of Service (TOS)” in Section 6, “Claims Filing” (*Vol. 1, General Information*).

3.4.2 Reimbursement

Radiological and physiological laboratory and portable X-ray supplier providers are reimbursed in accordance with 1 TAC §355.8081 and §355.8085. Providers can refer to the [Online Fee Lookup \(OFL\)](#) or the applicable fee schedule on the TMHP website at www.tmhp.com.

Refer to: Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

Texas Medicaid pays only up to the amount allowed for the total component for the same procedure submitted for reimbursement by the same provider for the same client with the same date of service. Providers who perform the technical service and the interpretation must bill the total component. Providers who perform only the technical service must bill the technical component, and those who perform only the interpretation must bill the interpretation component. The total component and the technical or interpretation component for the same procedure are not reimbursed separately when billed by any provider with the same date of service; the first claim may be reimbursed and the additional claim(s) will be denied. Claims are considered for reimbursement based on the order in which they are received.

For example, if a claim is received for the total component and TMHP has already made payment for the technical or interpretation component for the same procedure with the same date of service for the same client, regardless of provider, the claim for the total component is denied. The same is true if a total component has already been paid and claims are received for the individual components.

Radiology and physiological laboratory and portable X-ray services are not payable when the client is in an inpatient setting. The reimbursement for these services are included in the diagnosis-related group (DRG) payment.

Imaging services submitted by outpatient hospital providers may be reimbursed a flat fee.

Imaging services procedure codes can be found on the TMHP fee schedule website titled, “Hospital Outpatient Imaging Services.”

Texas Medicaid implemented mandated rate reductions for certain services. The Online Fee Lookup (OFL) and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

3.4.2.1 NCCI and MUE Guidelines

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* and the *Texas Medicaid Bulletin* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals and bulletins. Providers should refer to the [CMS NCCI](#) web page for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

1 General Information

This handbook contains information about Texas Medicaid fee-for-service benefits. For information about managed care benefits, refer to the *Medicaid Managed Care Handbook*.

Managed care carve-out services are administered as fee-for-service benefits. A list of all carve-out services is available in Section 8, “Carve-Out Services” in the *Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks)*.

The information in this handbook is intended for home health agencies, hospitals, nurse practitioners (NP), clinical nurse specialists (CNS), certified nurse midwives (CNM), licensed professional counselors (LPC), licensed marriage and family therapists (LMFT), licensed clinical social workers (LCSW), physicians, physician assistants (PA), psychologists, licensed psychological associates, provisionally licensed psychologists, and licensed dietitians.

Important: *All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

Refer to: Section 1: Provider Enrollment and Responsibilities (*Vol. 1, General Information*).

2 Enrollment

Providers may provide telecommunication services for Texas Medicaid clients under the provider’s Texas Medicaid provider identifier. No additional enrollment is required to provide telemedicine or telehealth services.

Home health agency and hospital providers who wish to provide telemonitoring services must notify the Texas Medicaid & Healthcare Partnership (TMHP) as follows:

- Current providers must use the Provider Information Management System (PIMS) to indicate that they provide telemonitoring services.
- Newly enrolling or re-enrolling home health agency or outpatient hospital providers must indicate whether they provide telemonitoring services during the enrollment process.

Refer to: Subsection 3.1, “Provider Enrollment” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for information about CNM provider enrollment.

Subsection 8.1, “Enrollment” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for information about NP and CNS provider enrollment.

Subsection 9.1, “Enrollment” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for information about physician provider enrollment.

Subsection 10.1, “Enrollment” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for information about PA provider enrollment.

Subsection 4.1, “Enrollment” in the *Behavioral Health, Rehabilitation, and Case Management Services Handbook (Vol. 2, Provider Handbooks)* for information about LPC, LMFT, and LCSW provider enrollment.

Subsection 6.1, “Enrollment” in the *Behavioral Health, Rehabilitation, and Case Management Services Handbook (Vol. 2, Provider Handbooks)* for information about psychologist and licensed psychological associate provider enrollment.

Subsection 2.9.1, “Enrollment” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for information about licensed dietician enrollment.

3 Services, Benefits, Limitations, and Prior Authorization

Telemedicine and telehealth services must be provided in compliance with standards established by the respective licensing or certifying board of the professional providing the services.

Only those services that involve direct face-to-face interactive video communication between the client and the distant-site provider constitute a telemedicine or telehealth service. Telephone conversations, chart reviews, electronic mail messages, and fax transmissions alone do not constitute a telemedicine or telehealth interactive video service and will not be reimbursed as telemedicine or telehealth services.

Use of telemedicine and telehealth services within Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF-IID) or State Supported Living Centers is subject to the policy established by the Department of State Health Services (DSHS) and the Texas Department of Aging and Disability Services (DADS) established policies.

The audio and visual fidelity and clarity, and field of view of the telemedicine or telehealth service must be functionally equivalent to an evaluation performed on a client when the provider and client are both at the same physical location or the client is at an established medical site.

More than one medically necessary telemedicine or telehealth service may be reimbursed for the same date and same place of service if the services are billed by providers of different specialties.

Providers may not disclose any medical information revealed by the client or discovered by a provider in connection with the treatment of the client through telemedicine or telehealth without proper authorization from the patient.

All confidentiality and Health Insurance Portability and Accountability Act (HIPAA) standards apply to telemedicine and telehealth transmissions.

Refer to: Subsection 1.6.4, “Release of Confidential Information” in Section 1: Provider Enrollment and Responsibilities (*Vol.1, General Information*) for more information about confidentiality standards.

3.1 Telemedicine Services

Telemedicine is defined as a health-care service that is either initiated by a physician who is licensed to practice medicine in Texas or provided by a health professional who is acting under physician delegation and supervision. Telemedicine is provided for the purpose of the following:

- Client assessment by a health professional
- Diagnosis, consultation, or treatment by a physician
- Transfer of medical data that requires the use of advanced telecommunications technology, other than telephone or facsimile technology, including the following:
 - Compressed digital interactive video, audio, or data transmission.
 - Clinical data transmission using computer imaging by way of still-image capture and store-and-forward.
 - Other technology that facilitates access to health-care services or medical specialty expertise.

3.1.1 Distant Site

A distant site is the location of the provider rendering the service. Distant-site telemedicine benefits include services that are performed by the following providers, who must be enrolled as a Texas Medicaid provider:

- Physician
- CNS
- NP
- PA
- CNM

The following procedure codes, when billed with the GT modifier, are a benefit for distant-site telemedicine providers:

Procedure Codes									
90791	90792	90832	90833	90834	90836	90837	90838	90951	90952
90954	90955	90957	90958	90960	90961	99201	99202	99203	99204
99205	99211	99212	99213	99214	99215	99241	99242	99243	99244
99245	99251	99252	99253	99254	99255	G0406*	G0407*	G0408*	G0425
G0426	G0427								
<p>*Procedure codes are limited to one service per day. Note: Procedure codes for behavioral health services are subject to the benefits and limitations outlined in Chapter 29, "Outpatient Behavioral Health." Procedure codes 90833, 90836, and 90838 are add-on codes and must be billed with a primary E/M procedure code in order to be reimbursed.</p>									

3.1.2 Patient Site

A patient site is where the client is physically located while the service is rendered. The patient-site must be one of the following:

- *Established medical site*—A location where clients will present to seek medical care. There must be a patient-site presenter and sufficient technology and medical equipment to allow for an adequate physical evaluation, as appropriate for the client’s presenting complaint. A defined physician-client relationship is required. A client’s private home is not considered an established medical site.
- *State mental health facility*—A hospital with an inpatient component funded or operated by DSHS.

- *State-supported living center*—A state-supported and structured residential facility operated by DADS to provide individuals with intellectual and developmental disabilities a variety of services, including medical treatment, specialized therapy, and training in the acquisition of personal, social, and vocation skills, as defined in Health and Safety Code 431.002(17).

Patient-site providers that are enrolled in Texas Medicaid may only be reimbursed for the facility fee using procedure code Q3014. Procedure code Q3014 is payable to NP, CNS, PA, physicians, and outpatient hospital providers. Charges for other services that are performed at the patient site may be submitted separately.

All patient sites must maintain documentation for each service, including:

- The date of the service.
- The name of the client.
- The name of the distant-site provider.
- The name of the patient-site presenter.

A patient-site presenter introduces the client to the distant-site provider for examination and performs any tasks and activities that are delegated by the distant-site provider. A patient-site provider must be at least one of the following:

- An individual who is licensed or certified in Texas to perform health-care services and who presents or is delegated tasks and activities only within the scope of the individual's licensure or certification
- A qualified mental health professional-community services (QMHP-CS) as defined in Title 25 Texas Administrative Code (TAC) 412.303

The patient-site presenter must maintain the records created at the distant site unless the distant-site provider maintains the records in an electronic-health-record format.

3.2 Telehealth Services

Telehealth is defined as health services, other than telemedicine, that:

- Are delivered by licensed or certified health professionals who are acting within the scope of their license or certification.
- Require the use of advanced telecommunications technology, other than telephone or facsimile technology, including the following:
 - Compressed digital interactive video, audio, or data transmission.
 - Clinical data transmission using computer imaging by way of still-image capture and store-and-forward.
 - Other technology that facilitates access to health care services or medical specialty expertise.

Before receiving a telehealth service, the client must receive an in-person evaluation for the same diagnosis or condition. An in-person evaluation is a client evaluation that is conducted by a provider who is at the same physical location as the client.

Exception: *Clients who have a mental health diagnosis or condition may receive a telehealth service without an in-person evaluation if the purpose of the initial telehealth appointment is to screen and refer the client for additional services. The referral must be documented in the medical record.*

To continue receiving telehealth services, the client must have had an in-person evaluation by a person who is qualified to determine a need for services at least once in the 12 months before the telehealth service.

Written policies and procedures must be maintained and evaluated at least annually by both the distant-site provider and the patient-site presenter and must address all of the following:

- Client privacy, to assure confidentiality and integrity of client telehealth services
- Archival and retrieval of client service records
- Quality oversight mechanisms

3.2.1 Distant Site

A distant site is the location of the provider rendering the service. Distant-site telehealth benefits include services that are performed by the following providers, who must be enrolled as a Texas Medicaid provider:

- Licensed professional counselor
- LMFT
- LCSW
- Psychologist
- Licensed psychological associate
- Provisionally licensed psychologist
- Licensed dietician

The following procedure codes, when billed with the GT modifier, are a benefit for distant-site telehealth providers:

Procedure Codes							
90791	90832	90834	90837	97802	97803	97804	S9470
<p>Note: Procedure codes for behavioral health services are subject to the benefits and limitations outlined in Section 4, “Licensed Clinical Social Worker (LCSW), Licensed Marriage and Family Therapist (LMFT), and Licensed Professional Counselor (LPC)” and Section 6, “Physician, Psychologist, and Licensed Psychological Associate (LPA) Providers” of the <i>Behavioral Health, Rehabilitation, and Case Management Services Handbook (Vol. 2, Provider Handbooks)</i>.</p>							

3.2.2 Patient Site

A patient site is where the client is physically located while the service is rendered. The patient-site must be one of the following:

- *Established health site*—A location where clients will present to seek a health service. There must be a patient-site presenter and sufficient technology and medical equipment to allow for an adequate physical evaluation or assessment, as appropriate for the client’s presenting complaint. A defined health provider-client relationship is required. A client’s private home is not considered an established health site.
- *State mental health facility*—A hospital with an inpatient component funded or operated by DSHS.
- *State-supported living center*—A state-supported and structured residential facility operated by DADS to provide individuals with intellectual and developmental disabilities a variety of services, including medical treatment, specialized therapy, and training in the acquisition of personal, social, and vocation skills, as defined at Health and Safety Code 431.002(17).

The facility fee (procedure code Q3014) is not a benefit for telehealth services. Charges for other services that are performed at the patient site may be submitted separately.

All patient sites must maintain documentation for each service, including:

- The date of the service.

- The name of the client.
- The name of the distant-site provider.
- The name of the patient-site presenter.

A patient-site presenter must introduce the client to the distant-site provider for examination and must perform any tasks and activities that are delegated by the distant-site provider. A patient-site provider must be at least one of the following:

- An individual who is licensed or certified in Texas to perform health-care services and who presents or is delegated tasks and activities only within the scope of the individual's licensure or certification
- A qualified mental health professional-community services (QMHP-CS) as defined in Title 25 Texas Administrative Code (TAC) 412.303

For telehealth services, the patient-site presenter must be readily available.

Note: Readily available means in the same room or (at the discretion of the licensed or certified professional that is providing the service) not in the same room as the client, but within a proximity determined by the licensed or certified professional who is providing the telehealth service.

If the telehealth services relate only to mental health, a patient-site presenter does not have to be readily available unless the client is a danger to himself/herself or to others.

The patient-site presenter must maintain the records created at the distant site unless the distant-site provider maintains the records in an electronic-health-record format.

3.3 Telemonitoring Services

Home telemonitoring is a health service that requires scheduled remote monitoring of data related to a client's health, and transmission of the data from the client's home to a licensed home health agency or a hospital. The data transmission must comply with standards set by HIPAA.

Data parameters are established as ordered by a physician's plan of care.

Data must be reviewed by a registered nurse (RN), NP, CNS, or PA, who is responsible for reporting data to the prescribing physician in the event of a measurement outside the established parameters.

Online evaluation and management for home telemonitoring services (procedure code 99444) is a benefit in the office or outpatient hospital setting when services are provided by an NP, CNS, PA, or physician provider. Procedure code 99444 is limited to once per seven days and is denied if it is submitted within the postoperative period of a previously completed procedure or within seven days of a related evaluation and management service by the same provider.

Scheduled periodic reporting of the client data to the physician is required, even when there have been no readings outside the parameters established in the physician's orders. Telemonitoring providers must be available 24 hours a day, 7 days a week. Although transmissions are generally at scheduled times, they can occur any time of the day or any day of the week, according to the client's plan of care.

The physician who orders home telemonitoring services has a responsibility to ensure the following:

- The client has a choice of home telemonitoring providers.
- The client has the right to discontinue home telemonitoring services at any time.

Although Texas Medicaid supports the use of home telemonitoring, clients are not required to use this service.

3.3.1 Facility Services

The provision and maintenance of home telemonitoring equipment is the responsibility of the home health agency or the hospital. The initial setup and installation (procedure code 99090) of the equipment in the client's home is a benefit when services are provided by a home health agency or an outpatient hospital. Hospital providers must submit revenue code 780 or 789 with procedure code 99090.

Procedure code 99090 is limited to once per episode of care even if monitoring parameters are added after initial setup and installation. A claim for a subsequent set up and installation is not reimbursed unless there is a documented new episode of care or unless the provider submits documentation of extenuating circumstances that require another installation of telemonitoring equipment.

Daily home monitoring (procedure code 99090 with modifier GQ) is a benefit when services are provided by a home health agency or an outpatient hospital. The home health agency or hospital may submit a claim for the daily rate each day the telemonitoring equipment is used to monitor and manage the client's care. Hospital providers must submit revenue code 780 or 789 with the procedure code for daily home monitoring.

Procedure code 99090 with modifier GQ is limited to once per day, regardless of the number of transmissions, for the length of the prior authorization period.

3.4 Prior Authorization

Prior authorization is not required for telemedicine or telehealth services; however, it may be required for the individual procedure codes billed.

3.4.1 Prior Authorization of Telemonitoring Services

Procedure code 99090 with or without modifier GQ requires prior authorization. Home telemonitoring services may be approved for up to 60 days per prior authorization request. If additional home telemonitoring services are needed, the home health agency or hospital must request prior authorization before the current prior authorization period ends.

Requests for additional home telemonitoring services that are received after the current prior authorization expires will be denied for dates of service that occurred before the date the submitted request was received.

To be eligible for home telemonitoring services, clients who are diagnosed with diabetes or hypertension must exhibit two or more of the following risk factors:

- Two or more hospitalizations in the previous 12-month period
- Frequent or recurrent emergency department visits
- A documented history of poor adherence to ordered medication regimens
- Documented history of falls in the previous 6-month period
- Limited or absent informal support systems
- Living alone or being home alone for extended periods of time
- A documented history of care access challenges

A completed Home Telemonitoring Services Prior Authorization Request form must be submitted to request home telemonitoring services.

If the prior authorization form is not signed and dated by the physician, the form must be accompanied by a written order or prescription that is signed and dated by the physician, or a documented verbal order from the physician that includes the date that the verbal order was received. The verbal order may be documented on a plan of care or treatment plan.

***Note:** A verbal order is considered current when the date received is on, or no more than, 30 days before the start of home telemonitoring services. A written order or prescription is considered current when it is signed and dated on, or no more than, 30 days before the start of home telemonitoring services.*

A request received without a physician's signature, documented verbal order, or written prescription will not be processed and will be returned to the provider.

The request must include the physician-ordered frequency of the clinical data transmission and the client's diagnoses and risk factors that qualify the client for home telemonitoring services.

Providers can also request prior authorization online through the secure TMHP provider portal. The initial request for prior authorization must be received no more than three business days from the date that the home telemonitoring services are initiated. Requests that are received after the three business-day period will be denied for dates of service that occurred before the date that the request was received.

3.5 Documentation Requirements

Documentation for a telecommunication service must be the same as for a comparable in-person service.

3.5.1 Documentation Requirements for Telemonitoring Providers

The home health agency or hospital must maintain documentation of all of the following in the client's medical record:

- The telemonitoring equipment meets all of the following requirements:
 - Capable of monitoring any data parameters included in the plan of care
 - Food and Drug Administration (FDA) Class II hospital-grade medical device
 - Capable of measuring and transmitting client glucose or blood pressure data
- The provider's staff is qualified to install the needed telemonitoring equipment and to monitor the client data, which will be transmitted according to the client's care plan.
- Clinical data will be provided to the client's primary care physician or his/her designee.
- Services are not duplicated under the disease management programs described in Texas Human Resources Code, Section 32.057.
- Monitoring of the client's clinical data is not duplicated by any other provider.
- Written protocols, policies, and procedures on the provision of home telemonitoring services are available to HHSC or its designee upon request. Written protocols must address all of the following:
 - Authentication and authorization of users
 - Authentication of the origin of client data transmitted
 - Prevention of unauthorized access to the system or information
 - System security, including the integrity of information that is collected, program integrity, and system integrity
 - Maintenance of documentation about system and information usage
 - Information storage, maintenance, and transmission

- Synchronization and verification of patient profile data
- The client is able to operate the equipment or has a willing and able person to assist in completing electronic transmission of data. (Not required if the equipment does not require active participation from the client.)

4 Claims Filing and Reimbursement

4.1 Claims Information

Claims for telecommunication services must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form or the UB-04 CMS-1450 paper claim form. Providers may purchase CMS-1500 paper claim forms or UB-04 CMS-1450 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 paper claim form or a UB-04 CMS-1450 paper claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills and itemized statements are not accepted as claim supplements.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (*Vol. 1, General Information*) for information on electronic claims submissions.

Section 6: Claims Filing (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” and subsection 6.6, “UB-04 CMS-1450 Paper Claim Filing Instructions” in Section 6: Claims Filing (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

4.1.1 Telemonitoring Services

Providers may submit claims for home telemonitoring services that were provided to Medicaid Qualified Medicare Beneficiary (MQMB) clients directly to TMHP without first submitting a claim to Medicare.

Home telemonitoring services are not a benefit of Medicare, so the requirement that claims for MQMB clients be submitted to Medicare first does not apply. Since claims for home telemonitoring services are not submitted to Medicare first, they are subject to the standard 95-day claim-filing deadline from the date of service.

4.2 Reimbursement

For fee information, providers can refer to the Online Fee Lookup (OFL) on the TMHP website at www.tmhp.com.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

Refer to: Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in Section 2: Texas Medicaid Fee-for-Service Reimbursement (*Vol. 1, General Information*) for more information about reimbursement.

1 General Information

The information in this handbook is intended for optometrists (doctors of optometry), ophthalmologists, and opticians who render services related to the eye and vision and for hearing aid professionals (fitters and dispensers, physicians, and audiologists) who provide hearing evaluations or fitting and dispensing services. The handbook provides information about Texas Medicaid's benefits, policies, and procedures applicable to these providers.

Important: *All providers are required to read and comply with Subsection 4.1, "Enrollment". In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide healthcare services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver healthcare items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

Refer to: Section 1: Provider Enrollment and Responsibilities (*Vol. 1, General Information*).

This handbook contains information about Texas Medicaid fee-for-service benefits. For information about managed care benefits, refer to the *Medicaid Managed Care Handbook (Vol.2, Provider Handbooks)*.

Managed care carve-out services are administered as fee-for-service benefits. A list of all carve-out services is available in Section 8, "Carve-Out Services" in the *Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks)*.

1.1 Payment Window Reimbursement Guidelines for Services Preceding an Inpatient Admission

According to the three-day and one-day payment window reimbursement guidelines, most professional and outpatient diagnostic and nondiagnostic services that are rendered within the designated timeframe of an inpatient hospital stay and are related to the inpatient hospital admission will not be reimbursed separately from the inpatient hospital stay if the services are rendered by the hospital or an entity that is wholly owned or operated by the hospital.

These reimbursement guidelines do not apply in the following circumstances:

- The professional services are rendered in the inpatient hospital setting.
- The hospital and the physician office or other entity are both owned by a third party, such as a health system.
- The hospital is not the sole or 100-percent owner of the entity.

Refer to: Section 3.7.3.8, "Payment Window Reimbursement Guidelines" of the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for additional information about the payment window reimbursement guidelines.

2 Nonimplantable Hearing Aid Devices and Related Services

2.1 Enrollment

To enroll in Texas Medicaid, hearing aid professionals (physicians, audiologists, and hearing aid fitters and dispensers) who provide hearing evaluations or fitting and dispensing services must be licensed by the licensing board of their profession to practice in the state where the service is performed. Hearing aid providers are eligible to enroll as individuals and facilities. Audiologists are eligible to enroll as individuals and groups. Audiologists may enroll as both audiologists and as hearing aid fitters and dispensers by completing an enrollment application for each type of provider (i.e., select “Audiologist” on one application and “Hearing Aid” on the other application).

Providers cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

2.1.1 School Districts, State Agencies, and Inpatient Facilities

To be reimbursed for audiology and audiometry evaluation and diagnostic services for suspected and confirmed hearing loss (other than audiology evaluation and therapy services reimbursed to School Health and Related Services [SHARS] providers), audiologists employed by or contracted with school districts, state agencies, and inpatient hospitals must enroll as individual practitioners or group practitioners by choosing “Audiologist” on the enrollment application.

To be reimbursed for hearing aid devices and accessories, and fitting and dispensing visits and revisits, audiologists and hearing aid fitters and dispensers employed by or contracted with school districts, state agencies, and inpatient hospitals must enroll as individual practitioners or facilities by choosing “Hearing Aid” on the enrollment application.

Appropriately-licensed providers who want to provide both audiology services and hearing aid fitting and dispensing services must complete applications for audiologist and for hearing aid fitter and dispenser for each program for which they want to enroll.

Note: A SHARS Texas Provider Identifier (TPI) cannot be used to bill for these services.

2.2 Services, Benefits, Limitations, and Prior Authorization

The Texas Medicaid hearing services benefit includes those services that are medically necessary for clients of any age who have suspected or identified hearing loss that can be improved or ameliorated using a hearing aid device. Such services may be reimbursed to audiologists or hearing aid fitters and dispensers.

Note: Hearing-related services that are medically necessary because of a medical condition that cannot be improved or ameliorated using a nonimplantable hearing aid device are not considered part of the Texas Medicaid hearing services benefit. Providers may refer to the other Texas Medicaid Provider Procedures Manual Handbooks for benefit and limitation information about other hearing-related services.

Texas Medicaid clients of any age are eligible to receive medically necessary hearing aid devices and services through the hearing services benefit outlined in the following sections. The Texas Medicaid hearing services benefit includes a broad range of hearing services for clients of all ages and reimburses providers who are appropriately enrolled with Texas Medicaid in accordance with their licensure and scope of practice. Prior authorization is not necessary for benefits within program limitations unless specifically addressed in the sections below.

The following hearing services are benefits of Texas Medicaid to appropriately-enrolled audiologists, hearing aid fitters and dispensers, and physicians according to their licensure, scope of practice, and enrollment as indicated:

- Audiologists and physicians may be reimbursed for audiology and audiometry evaluation and diagnostic services for suspected and confirmed hearing loss.
- Hearing aid fitters and dispensers may be reimbursed for hearing aid devices and accessories and fitting and dispensing visits and revisits.
- Physicians may be reimbursed for physician otology and otorhinolaryngology (ENT) services.

Texas Medicaid clients whose jobs are contingent on their possessing a hearing aid or who appear to have vocational potential and who need a hearing aid may be referred to the Texas Department of Assistive and Rehabilitative Services (DARS) for hearing aids.

2.2.1 Limitations and Required Forms

All services provided to Texas Medicaid clients must be medically necessary. Unless otherwise specified, services may be reimbursed without prior authorization within the set limitations. In addition to services that always require prior authorization, providers may request prior authorization for medically necessary services that exceed benefit limitations.

Required forms, which are indicated in the specific sections below, are not required to be submitted with the claim, but the forms must be completed and maintained in the client's medical record and made available upon request by the Texas Health and Human Services Commission (HHSC) or the Texas Medicaid & Healthcare Partnership (TMHP) for retrospective review.

2.2.2 Hearing Screenings

Hearing screening provided due to client concern, or at the provider's discretion, is a benefit for clients of any age when the client is referred by a Medicaid-enrolled physician, and the screening is provided by a Medicaid-enrolled provider licensed to perform these services.

Routine newborn hearing screenings and Texas Health Steps (THSteps) medical checkup hearing screenings are benefits for Texas Medicaid clients, and are included in the reimbursement for the routine service or visit.

2.2.2.1 Routine Hearing Screenings

Routine hearing screenings that are required as part of the newborn hospital stay and as part of a THSteps medical checkup are included in the Texas Medicaid hearing services benefit. These routine screenings are not reimbursed to audiologists, hearing aid fitters and dispensers, or physicians.

Newborn Hearing Screen

The newborn hearing screening is included in the reimbursement to the hospital for the newborn hospital stay and is not reimbursed separately. A newborn hearing screening must be offered to each newborn by the facility where the birth occurs, through a program mandated by the Texas State Legislature and certified by the Texas Department of State Health Services (DSHS). The screening is covered as part of the newborn delivery. An infant born outside a birthing facility and not admitted to a birthing facility shall be referred to a facility that provides newborn hearing screening. If a facility is not required by legislative mandate to perform newborn hearing screening, a referral must be made to a facility that offers the screening.

Refer to: Subsection 5.3.9, "Newborn Examination" in Children's Services Handbook (Vol. 2, Provider Handbooks) for more information about the newborn hearing screening.

THSteps Medical Checkup Hearing Screen

Hearing screening is a required component of the THSteps medical checkup, and a standardized audiometric hearing screening is required at specific ages according to the periodicity schedule.

Refer to: The THSteps Medical Checkups Periodicity Schedule including the footnotes, which is available on the DSHS website at www.dshs.state.tx.us/thsteps/providers.shtm, for coverage criteria when performed as part of a THSteps medical checkup.

Subsection 5.3.11.2.3, “Hearing Screening” in *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for more information on THSteps checkup hearing screening.

2.2.2.2 Additional Hearing Screenings

A hearing screening requested outside of a routine newborn or THSteps medical checkup may be reimbursed as medically necessary without prior authorization using procedure code 92551.

Further diagnostic testing may also be reimbursed using the appropriate procedure code as indicated in subsection 2.2.3, “Audiology and Audiometry Evaluation and Diagnostic Services” in this handbook

2.2.2.3 Abnormal Hearing Screening Results

If the screening returns abnormal results, the client must be referred to a Texas Medicaid-enrolled provider who is a licensed audiologist or physician who provides audiology services. Clients who are 20 years of age or younger and have abnormal screening results must be referred to a Texas Medicaid-enrolled provider who is an audiologist or physician who is experienced with the pediatric population and who offers auditory services.

The referring physician who performs the screening must complete the Physician’s Examination Report, which is maintained in the client’s medical record. A new Physician’s Examination Report must be completed whenever there is a change in the client’s hearing or a new hearing aid is needed. Retrospective review may be performed to ensure documentation supports the medical necessity of the service.

In addition to being referred to an appropriate provider for further testing, clients who are 35 months of age and younger and have suspected hearing loss must be referred to Early Childhood Intervention (ECI) as soon as possible but no longer than 7 days after identification, even if the client was referred to an appropriate provider for further testing.

Refer to: Subsection 2.7, “Early Childhood Intervention (ECI) Services” in *Children’s Services Handbook (Vol. 2, Providers Handbooks)* for more information about ECI.

2.2.3 Audiology and Audiometry Evaluation and Diagnostic Services

Audiometry is a benefit of Texas Medicaid for clients of any age. Physicians must recommend hearing evaluations based on examination of the client. Only physicians or licensed audiologists will be reimbursed for hearing evaluations. Hearing aid fitters and dispensers are not reimbursed for hearing evaluations.

Important: *The date of service for audiology and audiometry evaluations and diagnostic services is the date the service is rendered to the client. The date of service that is billed on the claim must match the date of service that is documented in the client’s medical record.*

The following audiometry procedure codes are benefits of Texas Medicaid for a basic comprehensive audiometry survey:

Procedure Codes						
92550	92551	92552	92553	92555	92556	92557

The following additional procedure codes may be benefits for audiometric testing:

Procedure Codes									
92558	92563	92565	92567	92568	92570	92571	92572	92575	92576

Procedure Codes									
92578	92579	92582	92583	92584	92585	92586	92587	92588	

Refer to: The appropriate Texas Medicaid fee schedule on the TMHP web site at www.tmhp.com for procedure codes that may be reimbursed to individual types of providers.

Auditory brainstem response (ABR) and otoacoustic emissions (OAE) are benefits for clients of any ages when performed to identify and diagnose hearing loss and for newborns when performed for the purpose of a newborn hearing screening.

Note: *ABR and OAE tests performed as part of the newborn hearing screen are reimbursed as part of the hospital visit and are not reimbursed separately.*

2.2.3.1 Otological Examinations

Otological examinations are a benefit when medically necessary and provided by a Medicaid-enrolled physician licensed to perform this service.

Procedure codes 92504 and 92505 are benefits for otological examinations.

An otological examination may also include physician evaluation and management (E/M) services provided to diagnose or treat medical conditions.

Refer to: Subsection 9.2.59.4, “Group Clinical Visits” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for information about medically necessary physician E/M services.

2.2.3.2 Vestibular Evaluations

Vestibular evaluations are a benefit when medically necessary and provided by a Medicaid-enrolled physician or nonphysician provider licensed to perform this service.

The following procedure codes for vestibular evaluations are benefits:

Procedure Codes									
92531	92532	92533	92534	92540	92541	92542	92543	92544	92545
92546	92547								

2.2.3.3 Forms and Documentation

Providers of hearing evaluations must have a report in the client’s record. Providers must include in the report hearing evaluation test data. The Hearing Evaluation, Fitting, and Dispensing Report (Form 3503) must be completed by the physician or audiologist who conducts the diagnostic testing. The provider who signs the report must maintain it in the client’s file. The report includes audiometric assessment results of the hearing evaluation and must provide objective documentation that amplification improves communication ability. Retrospective review may be performed to ensure documentation supports the medical necessity of the service.

For physician diagnostic hearing services (procedure codes 92502, 92504, 92540, 95940, and 95941), providers must maintain documentation of medical necessity in the client’s medical record. Retrospective review may be performed to ensure that the documentation supports medical necessity for the service.

2.2.3.4 Prior Authorization

Hearing screening and testing services do not require prior authorization. Documentation of medical necessity must be maintained by the provider in the client’s medical record. Retrospective review may be performed to ensure that the documentation supports medical necessity for the service.

2.2.3.5 Limitations

Newborn hearing screenings provided during the birth admission are considered part of the newborn delivery payment to the facility and are not reimbursed as separate procedures.

An otological examination is a benefit of Texas Medicaid when medically necessary and provided by a Medicaid-enrolled physician licensed to perform this service.

An otological examination may also include physician E/M services provided to diagnose or treat medical conditions.

Refer to: Subsection 9.2.59.4, “Group Clinical Visits” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for information about medically necessary physician E/M services.

Audiometry survey procedure codes and evoked potential and otoacoustic emissions screening procedure codes may be reimbursed once per day.

Procedure code 92568 may be reimbursed when billed with one of the following diagnosis codes:

Diagnosis Codes									
2251	3510	3511	3518	3519	38600	38601	38602	38603	38604
38610	38611	38612	38619	3862	38630	38631	38632	38633	38634
38635	38640	38641	38642	38643	38648	38650	38651	38652	38653
38654	38655	38656	38658	3868	3869	3870	3871	3872	3878
3879	3882	38830	38831	38832	38840	38841	38842	38843	38844
38845	3885	38900	38901	38902	38903	38904	38905	38906	38910
38911	38912	38913	38914	38915	38916	38917	38918	38920	38921
38922	3898	3899	7443	7804					

Providers may bill only one of the pure tone audiometry procedure codes (92551, 92252, and 92553) per day, any provider.

Procedure codes 92553 and 92556 are not reimbursed on the same day by any provider. If these procedure codes are billed for the same date of service, they are denied with instructions to bill with the more appropriate, comprehensive audiometry procedure code 92557.

Tympanometry

Tympanometry (procedure code 92567) must be limited to selected individual cases where its use demonstrably adds to the provider’s ability to establish a diagnosis and provide appropriate treatment. Tympanometry is limited to three services per rolling year when billed by any provider and is based on medical necessity, which must be documented in the client’s medical record.

Electrical Testing

Electrical testing may be reimbursed for services rendered to clients of any age.

Electrical testing (procedure code 92547) must be billed with the same date of service by the same provider as procedure code 92541, 92542, 92543, 92544, 92545, or 92546.

Vestibular Evaluation

Vestibular evaluation is a benefit of Texas Medicaid when medically necessary and provided by a provider who is licensed to provide this service.

Hearing pathway tests such as audiometry, ABR, and electrocochleography (ECoG) can also be used for the same purpose and are frequently combined with vestibular tests.

ABR and OAE Hearing Screening Services

Evoked response testing (procedure codes 92558, 92585, 92586, 92587, and 92588) is considered a bilateral procedure. If separate charges are billed for left- and right-sided tests of the same type, the tests are combined and reimbursed as a quantity of one. An electroencephalogram (EEG) may be reimbursed for the same date of service as evoked response testing by any provider.

Procedure code 92591 may be reimbursed as often as is medically necessary.

Texas Medicaid may reimburse physicians for ear and throat examination procedure codes 92502, 92504, and 92540. Audiologists will not be reimbursed for these services.

Refer to: Subsection 9.2.59, “Physician Evaluation and Management (E/M) Services” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information about these services.

Procedure codes 95940 and 95941 may be reimbursed in addition to each evoked potential test. Procedure codes 95940 and 95941 are limited to a maximum of 2 hours per day, per client, any provider, without documentation of medical necessity. Procedure codes 95940 and 95941 cannot be reported by the surgeon or anesthesiologist.

2.2.3.6 SHARS Audiology Services

Audiology evaluation and therapy services procedure codes 92507, 92508, 92521, 92522, 92523, 92524, and 92620 may be reimbursed to school districts and state agencies that are enrolled with Texas Medicaid as SHARS providers.

Refer to: Section 3, “School Health and Related Services (SHARS)” in *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for more information about SHARS services.

Other hearing evaluation, diagnostic, and hearing aid services may be reimbursed to appropriately-enrolled audiologists, hearing aid fitters and dispensers, and physicians as outlined in this section.

2.2.3.7 Noncovered Services

Texas Medicaid does not reimburse for a hearing screening completed for day care, Head Start, or school unless it is part of an acute-care visit in a clinic setting. Separate procedure codes must not be billed for these services.

2.2.4 Hearing Aid Devices and Accessories (Nonimplantable)

Texas Medicaid may reimburse hearing aid fitters and dispensers for the following devices and accessories:

Service	Limitation
Hearing aid devices	<p>Limitation:</p> <ul style="list-style-type: none"> • For clients who are 20 years of age and younger, 1 hearing aid device per ear may be reimbursed every 5 years from the month it is dispensed. • For clients who are 21 years of age and older, if the client has at least a 35 dB hearing loss in both ears, 1 hearing aid device may be reimbursed every 5 years from the month it is dispensed. Either the left or the right may be reimbursed, but not both in the same 5 year period.

Service	Limitation
	<p>Refer to: Subsection 2.2.4.1, “Forms and Documentation” in this handbook for additional medical necessity criteria.</p> <p>Replacement hearing aid devices that are required within the same 5-year period must be prior authorized.</p> <p>Repairs or modifications may be reimbursed without prior authorization once per year after the 1-year warranty period has lapsed if the requested repair or modification is a better alternative than a new purchase.</p> <p>Procedure codes: See below for monaural and binaural procedure codes.</p> <p>Procedure code V5014 may be reimbursed for repairs and modifications.</p> <p>Date of service: The date of service for the initial hearing aid device is the date the client successfully completes the 30-day trial period and accepts the hearing aid device.</p> <p>Note: <i>During the warranty period, Texas Medicaid may reimburse providers for a replacement hearing aid and replacement hearing aid batteries. Texas Medicaid will not reimburse hearing aid repairs or modifications that are rendered during the 12-month manufacturer’s warranty period. Providers must follow the manufacturer’s repair process as outlined in their warranty contract.</i></p>
Hearing aid accessories	<p>Limitation: As often as is medically necessary for clients who are 20 years of age and younger with prior authorization.</p> <p>Note: <i>Hearing aid accessories include, but are not limited to, chin straps, clips, boots, and headbands.</i></p> <p>Procedure code: V5267</p> <p>Date of service: The date of service is the date the client successfully completes the 30-day trial period and accepts the hearing aid device or the date the client receives the replacement accessory item.</p>
Ear impression	<p>Limitation: 1 each per hearing aid device as follows:</p> <ul style="list-style-type: none"> • For one impression, bill a quantity of 1. • For two impressions, bill a quantity of 2. <p>Procedure codes: V5275</p> <p>Date of service: The date of service for the ear impression is the date the ear impression is taken.</p>
Ear mold	<p>Limitation: As medically necessary for clients who are 20 years of age and younger.</p> <p>For clients who are 21 years of age and older:</p> <ul style="list-style-type: none"> • 3 ear molds per rolling year for custom ear molds • 4 ear molds per rolling month for disposable ear molds <p>Ear molds must be billed using the appropriate LT or RT modifier. Replacement ear molds may be reimbursed as often as is medically necessary without prior authorization. Documentation of medical necessity must be maintained in the client’s medical record.</p> <p>Procedure codes: V5264 and V5265</p> <p>Date of service: The date of service for the ear mold is the date the ear mold is taken.</p>

Service	Limitation
Batteries (Replacement only)	<p>Limitation: Replacement batteries may be reimbursed as often as is medically necessary when a hearing aid device has been previously reimbursed by Texas Medicaid.</p> <p>Note: <i>If a hearing aid has not been reimbursed by Texas Medicaid in the last 5 years, the replacement batteries may be reimbursed on appeal with a statement that documents medical necessity.</i></p> <p>Procedure code: V5266</p> <p>Date of service: The date of service is the date the client receives the replacement batteries.</p>

The following monaural procedure codes may be reimbursed for medically necessary hearing aid devices and replacements that are rendered to clients of any age when they are billed with the appropriate modifier LT or RT to indicate for which ear the hearing aid device was purchased and fitted:

Procedure Codes									
V5030	V5040	V5244	V5245	V5246	V5247	V5254	V5255	V5256	V5257
V5298									

Procedure codes V5170 and V5180 may be reimbursed for monaural hearing aids that are rendered to clients who are 20 years of age and younger only.

The following binaural procedure codes may be reimbursed for medically necessary hearing aid devices and replacements that are rendered to clients who are 20 years of age and younger:

Procedure Codes									
V5100	V5210	V5220	V5249	V5250	V5251	V5252	V5253	V5258	V5259
V5260	V5261	V5298							

Binaural hearing aid procedure codes must be submitted with a quantity of 1 per procedure code. Providers can refer to the [Online Fee Lookup \(OFL\)](#) or the applicable fee schedule on the TMHP website at www.tmhp.com for reimbursement rates.

Refer to: Section 2.4.2, “Reimbursement” in this handbook for more information about manual pricing.

2.2.4.1 Forms and Documentation

Monaural hearing aids may be reimbursed for clients who have no medical contraindication for using a hearing aid and who have documentation of medical necessity. The following documentation of medical necessity must be maintained in the client’s medical record:

- Hearing loss in the better ear of 35 dB or greater for the pure tone average of 500, 1000, 1500, and 2000 Hz, or a spondee threshold in the better ear of 35 dB or greater when pure tone thresholds cannot be established
- Documentation of communication need and a statement that the patient is alert and oriented and able to use the device appropriately by themselves or with assistance

Clients who are 21 years of age and older must meet the medical necessity criteria outlined above and have at least a 35 dB hearing loss in both ears to qualify for the purchase of a monaural hearing aid device.

Clients who are 20 years of age and younger must meet the medical necessity criteria outlined above and have at least a 35 dB hearing loss in both ears to qualify for the purchase of binaural hearing aid devices.

Claims for non-implantable hearing aid devices must be submitted with a manufacturer invoice showing the net acquisition cost of the non-implantable hearing aid device.

An invoice printed from an email or the Internet will not be accepted and should not be submitted with the claim as documentation to show the net acquisition cost of the hearing aid device unless the invoice reflects the actual price the provider paid for the hearing aid device.

Note: *The requirement to submit the net acquisition cost of the hearing aid device applies only to non-implantable monaural and binaural hearing aid devices including, but not limited to, procedure code V5298.*

Refer to: Subsection 6.3.1.1, “Place of Service (POS) Coding” in Section 6, “Claims Filing” (*Vol. 1, General Information*) for more information about coding place of service for other locations.

2.2.4.2 Prior Authorization

Prior authorization is not required for medically necessary hearing aid devices and supplies that are provided within the limitations outlined in the table above.

Prior authorization is required for the following:

- ***Replacement hearing aid devices that are required within the same 5-year period.*** A replacement hearing aid device may be considered for prior authorization when loss or irreparable damage has occurred. A copy of the police or fire report, when appropriate, and measures to be taken to prevent reoccurrence must be submitted with the prior authorization request. Replacements will not be authorized when the equipment has been abused or neglected by the client, the client’s family, or the caregiver.
- ***Hearing aid accessories for clients who are birth through 20 years of age.*** Requests for prior authorization for children’s hearing aid accessories including, but not limited to, chin straps, clips, boots, and headbands will be considered when the requests are submitted with documentation that shows that the client is birth through 20 years of age and that the requested supply is medically necessary for the proper use or functioning of the hearing aid device.
- ***Hearing aid devices that are not currently a benefit of Texas Medicaid but that are medically necessary for clients who are birth through 20 years of age (using procedure code V5298).***

The prior authorization request must include:

- The medical necessity for the requested hearing aid device.
- The name of the manufacturer.
- The model number, serial number, and the dates that the warranty is in effect for the requested hearing aid.
- Additional medically necessary repairs or modifications beyond 1 per year.
For additional repairs or modifications, requests for prior authorization must include documentation that supports the need for the requested repair.

For services that require prior authorization, prior authorization must be obtained before the services are rendered. The prior authorization number must be included on the claim form when the claim is submitted to TMHP.

Prior authorization requests must be submitted to the TMHP Special Medical Prior Authorization (SMPA) Department with documentation that supports medical necessity for the requested device, service, or supply. Authorization may be submitted on the TMHP website at www.tmhp.com or by fax to 1-512-514-4213.

Important: *For clients who are birth through 20 years of age, if the authorization request is denied because it does not meet benefit criteria, the TMHP SMPA Department will refer the request to the TMHP Comprehensive Care Program (CCP) Department for consideration under CCP. The provider is not required to complete additional forms or request referral to the TMHP CCP Department.*

Providers may use the form of their choice to submit the required information to the TMHP SMPA Department. No specific request form is required.

Refer to: Section 6: Claims Filing (*Vol 1, General Information*) for more information about the authorizations and claims filing processes.

2.2.4.3 Limitations

The following services and supplies must be provided to Texas Medicaid clients if a nonimplantable hearing aid device is medically necessary:

- An individual client assessment to identify the appropriate type of device
- The fitting/implantation of the device
- The re-assessment to determine whether the device allows for adequate hearing
- Expendable supplies that are necessary to keep the device functioning properly, such as batteries and accessories

A hearing aid dispensed through Texas Medicaid must meet the following criteria:

- Be a new and current model
- Meet the performance specifications indicated by the manufacturer
- Include, at minimum, a standard 12-month warranty that begins on the dispensing date of the hearing aid.

Providers must dispense each hearing aid reimbursed through Texas Medicaid with all necessary hearing aid accessories and supplies, including a 1-month supply of batteries. The reimbursement for monaural and binaural procedure codes includes the required hearing aid package as follows, and no separate reimbursement will be made for these items:

- Acquisition cost of the hearing aid (the actual cost or net cost of the hearing aid after any discounts have been deducted)
- Manufacturer's postage and handling charges
- All necessary hearing aid accessories or supplies
- Instructions for care and use
- A 1-month supply of batteries

Note: *TMHP does not supply the hearing aid devices, supplies, and accessories. Providers must purchase equipment directly from manufacturers and vendors of their choice and submit claims to TMHP for reimbursement using the appropriate procedure codes.*

Procedure code V5298 may be reimbursed with prior authorization for hearing aid devices that are not currently a benefit of Texas Medicaid but that are medically necessary for clients who are birth through 20 years of age.

Services for residents in a skilled nursing facility (SNF), intermediate care facility (ICF), or extended care facility (ECF) must be ordered by the attending physician. The order must be on the client’s chart, must state the condition that necessitates the hearing aid services, and must be signed by the attending physician.

2.2.5 Hearing Aid Services

The following additional hearing aid related procedures are benefits for services that are rendered to clients of any age:

Procedure Codes							
92590	92592	92594	V5010	V5011	V5264	V5265	V5275

The following additional hearing aid related procedures are benefits for services that are rendered to clients who are 20 years of age and younger only:

Procedure Codes		
92591	92593	92595

Texas Medicaid may reimburse hearing aid fitters and dispensers for the following services:

Service	Limitation
Hearing test for sensitivity	Limitation: As often as is medically necessary Procedure code: 92564 (SISI hearing test)
Fitting and dispensing visits	Limitation: 1 fitting per hearing aid procedure code per 5 rolling year period, regardless of the number of times a device is returned as unacceptable during a 30-day trial period Procedure code: V5011 Limitation: 1 dispensing fee each time a hearing aid is dispensed and a new 30-day trial period begins Procedure codes: V5090 and V5241 (for clients of any age) and V5110, V5160, V5200, and V5240 (for clients who are 20 years of age and younger) The dispensing fee may be reimbursed separately from the fitting of the hearing aid. The post-fitting check is included in the reimbursement for the dispensing procedure and is not reimbursed separately.
Revisit(s)	Limitation: 2 per calendar year when billed by any provider Procedure codes: 92592 (first and second revisits for monaural fittings for clients of any age) and 92593 (first and second revisits for binaural fittings for clients who are 20 years of age and younger) Note: Services for Texas Medicaid clients who are 21 years of age and older and who received 2 hearing aid devices (binaural) on or before October 1, 2012, may be reimbursed to the client’s treating physician or audiologist using procedure codes 99211 and 99212. Hearing aid revisits are limited to a total of two per calendar year by any provider.

2.2.5.1 Forms and Documentation

The forms and documentation required for the fitting and dispensing visits are as follows:

- Physician Examination Report
- Hearing Evaluation, Fitting, and Dispensing Report (Form 3503)
- Client acknowledgement statement (created by the provider)
- 30-day trial period certification statement (created by the provider)
- Additional necessary documentation

Physician's Examination Report—The referring physician who performs the screening must complete the Physician's Examination Report, which is maintained in the client's medical record.

Hearing Evaluation, Fitting, and Dispensing Report (Form 3503)—The Hearing Evaluation, Fitting, and Dispensing Report (Form 3503) must be completed by the fitter/dispenser that conducts the fitting and dispensing visit. The provider who signs the report must maintain it in the client's file. The report includes audiometric assessment results of the hearing evaluation and must provide objective documentation to support improved communication ability with amplification. Retrospective review may be performed to ensure documentation supports the medical necessity of the device, service, or supply.

Client Acknowledgement Statement (created by the provider)—At the time the hearing aid device and supplies are dispensed, the client must sign a client acknowledgement statement to verify the client was evaluated and offered an appropriate hearing aid that meets the client's hearing need. The acknowledgement statement must include language that indicates the client is responsible for paying any hearing aid rental fees if charged. The provider must obtain the signed acknowledgment statement before dispensing the hearing aid device and supplies and must keep the signed acknowledgment statement in the client's file. Retrospective review may be performed to ensure documentation supports the medical necessity of the device, service, or supply.

30-Day Trial Period Certification Statement (created by the provider)—Fitters and Dispensers must inform clients in writing of the trial period lasting 30 consecutive days. The statement, which must be created by the provider and signed by the client, must contain the start and end dates of the trial period, all charges and fees associated with the trial period, an acknowledgment that the client accepts responsibility for any assessed rental fees, and the name, address, and telephone number of the State Board of Examiners for Speech-Language Pathology and Audiology. The client must receive a copy of this agreement.

After at least 30 days and the successful completion of the trial period, the provider must update the statement to indicate that the trial was successful and the client accepted the dispensed hearing aid device. The updated statement must be maintained in the client's file. Retrospective review may be performed to ensure documentation supports the medical necessity of the device, service, or supply.

For hearing aids that are dispensed in a provider's office, if a client fails to return by the end date of the trial period, the provider must contact the client. After 3 attempts have been made, if the client does not return to the provider's office, the provider must document all attempts to contact the client and must maintain this documentation in the client's file. Retrospective review may be performed to ensure documentation supports the contact attempts and the client's failure to return to the provider's office. This requirement does not apply for services that are rendered to clients who receive hearing aids in other places of service (i.e., nursing homes)

2.2.5.2 Prior Authorization

Prior authorization is not required for fitting and dispensing visits and revisits.

2.2.5.3 Limitations

The following hearing aid visits may be reimbursed by Texas Medicaid:

- The fitting and dispensing visits that encompass a 30-day trial period and include a post-fitting check 5 weeks after the trial period has been successfully completed
- A first revisit as needed after the post-fitting check
- A second revisit as needed after the first revisit

The fitting visit includes the fitting, dispensing, and post-fitting check of the hearing aid.

Providers must allow each Texas Medicaid client a 30-consecutive-day trial period that begins with the dispensing date. This trial period gives the client time to determine whether the hearing aid device meets the client's needs. If the client is not satisfied with the purchased hearing aid, the client may return it to the provider, who must accept it. If the device is returned within 30 days of the date it was dispensed, the provider may charge the client a rental fee not to exceed \$2 per day. This fee is not a benefit of Texas Medicaid and will not be reimbursed. The client is responsible for paying the hearing aid rental fees if the provider chooses to charge a fee for the rental of returned hearing aid devices.

During the trial period, providers may dispense additional hearing aids as medically necessary until either the client is satisfied with the results of the hearing aid or the provider determines that the client cannot benefit from the dispensing of another hearing aid. The dispensing date of each additional hearing aid starts a new trial period.

The licensed audiologist or fitter/dispenser must perform a post-fitting check of the hearing aid within 5 weeks of the initial fitting.

The first and second revisits are available if additional visits are required after the post-fitting check.

- **First revisit.** The first revisit must include a hearing aid check.
- **Second revisit.** The second revisit is available as needed after the post-fitting check and first revisit. The second revisit must include either a real ear measurement or aided sound field testing according to the guidelines specified for the hearing evaluation. If the aided sound field test scores suggest a decrease in hearing acuity, the provider must include puretone and speech audiometry readings from the first evaluation.

Home visit hearing evaluations and fittings are permitted only with the physician's written recommendation.

Services for residents in an SNF, ICF, or ECF must be ordered by the attending physician. The order must be on the client's chart, must state the condition that necessitates the hearing aid services, and must be signed by the attending physician.

2.3 Documentation Requirements

All services, including hearing services, require documentation to support the medical necessity of the service rendered. Hearing services are subject to retrospective review and recoupment if documentation does not support the service billed.

Required forms for nonimplantable hearing devices and services, which are indicated in the specific sections above, are not submitted with the claim to TMHP, but the forms must be completed and maintained in the client's medical record and made available upon request by HHSC or TMHP for retrospective review.

2.4 Claims Filing and Reimbursement

2.4.1 Claims Filing

Hearing services must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 paper claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

Subsection 1.6.9, “Billing Clients” in Section 1, “Provider Enrollment and Responsibilities” (*Vol. 1, General Information*).

Section 3: TMHP Electronic Data Interchange (EDI) (*Vol. 1, General Information*) for information on electronic claims submissions.

Subsection 6.1, “Claims Information” in Section 6, “Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (*Vol. 1, General Information*). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Providers must file all claims electronically or on the appropriate Centers for Medicare & Medicaid Services (CMS) paper claim form after providing the services.

Exception: *Claims for non-implantable hearing aid devices must be submitted on the CMS-1500 paper claim form because electronic claim submissions do not allow for the submission of attachments.*

Claims must include the following information:

- The most appropriate 3- to 5-digit *International Classification of Diseases*, Ninth Revision, Clinical Modification (ICD-9-CM) diagnosis code that represents the purpose for the service.
- The most appropriate Current Procedural Terminology (CPT) or Healthcare Common Procedure Coding System (HCPCS) procedure code(s) that represent the service(s) provided.
- The appropriate information as indicated on the provider enrollment letter (Electronic claims must also include the most appropriate attested taxonomy code.)

Note: *For Texas Medicaid managed care clients, all hearing aid benefits and otology, and audiometry services are administered by the client’s Medicaid managed care organization (MCO).*

2.4.1.1 Non-implantable Hearing Aid Devices

To be reimbursed for a non-implantable hearing aid device, providers must submit documentation with the paper claim showing their cost for the hearing aid device. The Texas Health and Human Services Commission (HHSC) requires providers to submit non-implantable hearing aid claims using the CMS-1500 paper claim form because electronic claim submissions do not allow for the submission of attachments.

Providers must use the net acquisition cost as the amount billed on the claim. The net acquisition cost is the actual price the provider paid for the device, including the wholesale cost plus sales tax, shipping and handling, and any reductions resulting from discounts or rebates. Providers must not use usual and customary fees as the amount billed.

The documentation submitted with the claim must be a manufacturer invoice showing the net acquisition cost of the non-implantable hearing aid device.

An invoice printed from an email or the Internet will not be accepted and should not be submitted with the claim as documentation to show the net acquisition cost of the hearing aid device unless the invoice reflects the actual price the provider paid for the hearing aid device.

2.4.1.2 Third Party Liability

Standard third party liability (TPL) rules apply to all hearing services claims.

Refer to: Subsection 4.12, “Third Party Liability (TPL)” in Section 4, “Client Eligibility” (*Vol. 1, General Information*).

2.4.2 Reimbursement

Hearing aid devices and all hearing and audiological services are reimbursed in accordance with 1 TAC §355.8141. To be reimbursed for both audiology services and hearing aid fitting and dispensing services, audiologists must enroll with Texas Medicaid as audiologists and also as hearing aid fitters and dispensers. Audiology services must be billed using the audiologist provider number and benefit code (for electronic claims only) as indicated on the provider enrollment letter that indicates “Audiologist,” and hearing aid and fitting and dispensing services must be billed with the hearing aid provider number and benefit code (for electronic claims only) as indicated on the provider enrollment letter that indicates “Hearing Aid.”

Requested items that are not represented by a specific procedure code must be prior authorized and are priced manually during the authorization process. Manually priced items for clients who are birth through 20 years of age require prior authorization that must be obtained through the TMHP SMPA Department. The reimbursement will be determined based on either the MSRP less 18 percent or based on the provider’s documented invoice cost if there is no MSRP available.

Manually priced items are indicated with “Note Code 5” in the Texas Medicaid fee schedule.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

Providers may refer to the [OFL](#) or the applicable fee schedule on the TMHP website at www.tmhp.com.

2.4.2.1 National Correct Coding Initiative (NCCI) and Medically Unlikely Edit (MUE) Guidelines

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals. Providers should refer to the [CMS NCCI web page](#) for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

3 Implantable Hearing Devices and Related Services

3.1 Enrollment

To enroll in Texas Medicaid, hearing services professionals who provide implantable hearing devices and services must be appropriately enrolled according to their licensure and scope of practice.

Providers cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

3.2 Services, Benefits, Limitations and Prior Authorization

Implantable hearing devices, including the cochlear implant device, the auditory brainstem implant (ABI), and the bone anchored hearing aid (BAHA), are benefits of Texas Medicaid for clients of all ages.

The following services and supplies must be provided to Texas Medicaid clients if an implantable hearing aid device is medically necessary:

- An individual client assessment to identify the appropriate type of device
- The fitting of the device
- The reassessment to determine whether the device allows for adequate hearing
- Expendable supplies that are necessary to keep the device functioning properly, such as batteries and accessories

3.2.1 Cochlear Implants

The following procedure codes may be reimbursed for the cochlear implant device, separate components, and services:

Procedure Codes									
69930	L7368	L8499	L8614	L8615	L8616	L8617	L8618	L8619	L8621
L8622	L8623	L8624	L8627	L8628	L8629				

The following procedure codes may be reimbursed for diagnostic analysis of the cochlear implant:

Procedure Codes			
92601	92602	92603	92604

3.2.1.1 Prior Authorization

Prior authorization is required for the following:

- Cochlear implant surgery, device, and replacement parts
- Sound processor repair or replacement
- Battery recharger unit
- Replacement batteries beyond the limitations outlined in the sections below

Requests for prior authorization must be submitted by the provider to the SMPA Department with documentation supporting the medical necessity for the requested device, service, or supply.

Note: *Requests for clients who are 20 years of age or younger who do not meet the medical necessity criteria may be considered through Comprehensive Care Program (CCP).*

Documentation submitted for review must indicate who will be providing the cochlear implant device (i.e., the facility or the Durable Medical Equipment (DME) or medical supplier). The supplier's provider number must be included on the prior authorization request.

Prior authorization for a unilateral or bilateral cochlear implant may be granted for clients who are 12 months of age and older with documentation of all of the following criteria:

- Cognitive ability to use auditory cues and written documentation of agreement by the client or the client's parent or guardian that the client will participate in a program of post-implantation auditory rehabilitation. This documentation must be maintained in the client's medical record.
- Postlingual deafness or prelingual deafness.
- Freedom from middle-ear infection, an accessible cochlear lumen that is structurally suited to implantation, and freedom from lesions in the auditory nerve and acoustic areas of the central nervous system.
- No contraindications to surgery.
- Inability to derive benefit from appropriately fitted hearing aid devices.
- Documentation of poor speech discrimination and a recommendation for cochlear implant candidacy and one of the following diagnoses for severe-to-profound bilateral sensorineural hearing loss:

Diagnosis Codes						
38910	38911	38912	38914	38916	38918	38922

The initial lithium ion battery recharger unit, additional medically necessary units, and additional replacement batteries beyond the limitations indicated in the following sections may be reimbursed with prior authorization. Documentation must be submitted with the prior authorization request to support medical necessity for the request.

Refer to: Subsection 3.2.4, "Sound Processor Replacement and Repair" in this handbook for more information about sound processor repair or replacement.

3.2.1.2 Limitations

Surgery

Procedure code 69930 with the appropriate modifier LT or RT may be reimbursed for unilateral cochlear implantation. Procedure code 69930 with modifier 50 may be reimbursed for bilateral cochlear implantation performed simultaneously.

Device and Components

Procedure codes L8627, L8628, and L8629 for the cochlear implant device and components may be reimbursed for clients who are 12 months of age and older as follows:

- The device must be approved by the Food and Drug Administration (FDA) and be age-appropriate for the client.
- One per day may be reimbursed with prior authorization.

The cochlear implant device and the surgery to implant the device may be reimbursed separately.

Replacement Batteries and Related Items

Replacement batteries and related items for the cochlear implant device include non-rechargeable batteries, rechargeable batteries, and recharger units as follows:

Procedure Code	Prior Authorization	Limitation
L8621 (Zink air non-rechargeable)	Not required	Maximum of 50 per month
L8622 (Alkaline non-rechargeable)	Not required	Maximum of 31 per month
L8623 (Lithium ion rechargeable)	Not required	2 batteries per calendar year

Procedure Code	Prior Authorization	Limitation
L8624 (Lithium ion rechargeable)	Not required	2 batteries per calendar year
L7368 (Battery recharger unit for lithium ion rechargeable batteries)	Required	1 replacement unit every 5 rolling years

Replacement batteries for clients with bilateral cochlear implants and two sound processors may be reimbursed when billed with the applicable battery procedure code and the appropriate LT or RT modifier.

Replacement batteries for the cochlear device are limited to clients with a previously paid cochlear implant procedure, device, or supply. Replacement batteries for clients who did not receive the cochlear implant through Texas Medicaid will be considered for reimbursement on appeal with a physician's statement documenting medical necessity.

Additional batteries and lithium ion battery recharger units beyond these limitations may be reimbursed with prior authorization.

3.2.1.3 Auditory Rehabilitation

Auditory rehabilitation is a benefit of Texas Medicaid when it is medically necessary for clients who have received a surgically implanted hearing device, or who have prelingual or postlingual hearing loss when the treating physician has determined that auditory rehabilitation would be beneficial.

The following procedure codes may be reimbursed for auditory rehabilitation:

Procedure Codes			
92626	92627	92630	92633

One auditory rehabilitation evaluation and 12 visits per six rolling months may be reimbursed without prior authorization. Additional visits during a six rolling month period for clients who are 12 months of age through 20 years of age require prior authorization.

Procedure code 92627 is an add-on procedure, and must be billed with the primary procedure code 92626 to be considered for reimbursement.

Note: Additional therapy services may be a benefit through the Texas Medicaid speech therapy benefit.

Refer to: Subsection 2.5.5, "Speech Therapy (ST)" in the *Children's Services Handbook (Vol. 2, Provider Handbooks)* and subsection 4.2.3, "ST Services" in the *Nursing and Therapy Services Handbook (Vol. 2, Provider Handbooks)* for information about the speech therapy benefit.

Frequency modulated (FM) systems are not benefits of Texas Medicaid.

3.2.2 Auditory Brainstem Implant (ABI)

The following procedure codes may be reimbursed for the ABI, related components, and services:

Procedure Codes					
92640	L8499	L8614	L8621	L8622	S2235

3.2.2.1 Prior Authorization

The following implantable hearing devices and services require prior authorization:

- ABI surgery, device, and replacement parts
- Sound processor repair or replacement

- Replacement batteries beyond the limitations outlined in the sections below

Requests for prior authorization must be submitted to the SMPA Department with documentation supporting the medical necessity for the requested device, service, or supply.

Prior authorization requests and claims for ABI must be submitted with diagnosis code 23772 and 23773.

Refer to: Subsection 2.2.1, “Limitations and Required Forms” in this handbook for additional information about replacement batteries.

Subsection 3.2.4, “Sound Processor Replacement and Repair” in this handbook for more information about sound processor repair or replacement.

3.2.2.2 Limitations

ABI is a benefit for clients who are 12 years of age and older.

Diagnostic analysis of the ABI (procedure code 92640) is limited to 2 hours per day when billed by any provider.

3.2.3 Bone-Anchored Hearing Aid (BAHA)

The following procedure codes must be submitted for the BAHA and related components:

Procedure Codes								
69714	69715	69717	69718	L8690	L8691	L8692	L8693	V5266

3.2.3.1 Prior Authorization

The following implantable hearing devices and services require prior authorization:

- BAHA implant surgery, device, and replacement parts
- Sound processor repair or replacement

Requests for prior authorization must be submitted to the SMPA Department with documentation supporting the medical necessity for the requested device, service, or supply.

Prior authorization requests may be granted for clients who are 5 years of age and older with all of the following:

- Documentation of previous attempts at hearing aid devices and why these devices are inadequate or have failed
- Documentation of scores on hearing tests for bone conduction thresholds and on maximum speech discrimination
- Documentation of audiological testing showing good inner ear function
- Documentation of a multidisciplinary assessment including physical, cognitive, communicative, and behavioral limitations describing the client’s auditory disability and expected benefit with use of the BAHA implant
- Documentation of an appropriate diagnosis. Covered diagnoses may include, but are not limited to:

Diagnosis Codes						
38901	38902	38908	38915	74401	74402	7560

Refer to: Subsection 3.2.4, “Sound Processor Replacement and Repair” in this handbook for more information about sound processor repair or replacement.

3.2.3.2 Limitations

BAHAs are a benefit for clients who are 5 years of age and older.

Replacement batteries for the BAHA (procedure code V5266) do not require prior authorization. The replacement batteries are limited to clients with a previously paid hearing device. Replacement batteries for clients who did not receive the hearing device through Texas Medicaid will be considered for reimbursement on appeal with a physician's statement documenting the medical necessity.

Procedure codes L8691, L8692, and L8693 will be denied as part of another service when billed by any provider with the same date of service as procedure code L8690.

Procedure code L8692 for the BAHA device and components may be reimbursed once per day with prior authorization.

Bilateral BAHA procedures are not benefits of Texas Medicaid.

3.2.4 Sound Processor Replacement and Repair

3.2.4.1 Prior Authorization

Replacement and repair of a sound processor require prior authorization.

Documentation by the provider must explain the need for the replacement of the sound processor. The processor must be used for a minimum of 12 months before replacement of the unit will be considered.

The prior authorization request must include evidence of the purchase, such as the manufacturer's warranty.

Repair of a sound processor will be considered for prior authorization with documentation of medical necessity for the requested repair. Repair of a sound processor will be manually priced at the time the prior authorization is reviewed and granted. If the actual cost of the repair differs from the prior authorized fee, the provider must contact the SMPA Department to update the authorization before filing a claim for the repair services.

3.2.4.2 Limitations

Procedure code L8499 with modifier RB may be reimbursed for sound processor repair.

Repair or replacement of a sound processor is not a benefit during the manufacturer's warranty period.

3.2.5 Electromagnetic Bone Conduction Hearing Device - Removal Only

The removal of the electromagnetic bone conduction hearing aid may be reimbursed by Texas Medicaid using procedure code 69711.

The removal or repair of an electromagnetic bone conduction hearing device is limited to two procedures per lifetime when billed by any provider.

The implantation of the device is not a benefit of Texas Medicaid.

3.3 Documentation Requirements

All implantable hearing aid services require documentation to support the medical necessity of the service rendered. Hearing services are subject to retrospective review and recoupment if documentation does not support the service billed.

3.4 Claims Filing and Reimbursement

3.4.1 Claims Filing

Hearing services must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 paper claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

Subsection 1.6.9, “Billing Clients” in Section 1, “Provider Enrollment and Responsibilities” (*Vol. 1, General Information*).

Section 3: TMHP Electronic Data Interchange (EDI) (*Vol. 1, General Information*) for information on electronic claims submissions.

Subsection 6.1, “Claims Information” in Section 6, “Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (*Vol. 1, General Information*). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Note: For Texas Medicaid managed care clients, all implantable hearing devices and services are administered by the client’s Medicaid MCO.

3.4.1.1 Third Party Liability

Standard TPL rules apply to all hearing services claims.

Refer to: Subsection 4.12, “Third Party Liability (TPL)” in Section 4, “Client Eligibility” (*Vol. 1, General Information*).

3.4.2 Reimbursement

Implantable hearing aids and related services are reimbursed in accordance with 1 TAC §355.8141.

Implantable hearing aids and related services are reimbursed at the lesser of the billed charges or the published Texas Medicaid fee. Unless otherwise indicated, providers may not make additional charges to the client for covered services; such charges constitute a breach of the Texas Medicaid contract.

Requested items that are not represented by a specific procedure code must be prior authorized and are priced manually during the authorization process. Manually priced items for clients who are birth through 20 years of age require prior authorization that must be obtained through the TMHP SMPA Department. The reimbursement will be determined based on either the MSRP less 18 percent or based on the provider’s documented invoice cost. Manually priced items are indicated with “MP” in the reimbursement rate table at the end of this article.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

Providers may refer to the [OFL](#) or the applicable fee schedule on the TMHP website at www.tmhp.com.

3.4.2.1 NCCI and MUE Guidelines

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals. Providers should refer to the [CMS NCCI web page](#) for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

4 Vision Care Professionals

4.1 Enrollment

To enroll in Texas Medicaid, optometrists (doctors of optometry [ODs]) and ophthalmologists must be licensed by the licensing board of their profession to practice in the state where the service is performed, at the time the service is performed, and be enrolled as Medicare providers.

An optometrist or ophthalmologist cannot be enrolled if their license is due to expire within 30 days; a current license must be submitted.

4.2 Provider Responsibilities

Suppliers of eyewear must comply with all Medicaid provider responsibilities and adhere to the following guidelines:

- Do not delay the ordering of eyewear or the dispensing of eyeglasses to the client while payment is pending from TMHP.
- Deliver the eyewear in a reasonable amount of time (usually two or three weeks from the date the order is placed by the client).
- Obtain the required eligibility information from the client's Your Texas Benefits Medicaid card.
- Refer to the Your Texas Benefits Medicaid card website at www.YourTexasBenefitsCard.com to determine whether eyeglasses have been reimbursed by Texas Medicaid within the last 24 months. Providers are advised to ask clients if they have recently received vision care services that may not appear on the Your Texas Benefits Medicaid card website because of the delay in updating form information.
- Submit claims for eyewear services as soon as possible so the client's record indicates that eyewear or eyeglasses have been dispensed.
- Have the client, parent, or guardian sign and date the Vision Care Eyeglass Patient (Medicaid Client) Certification Form and retain it in their records. When a client chooses an eyeglass or contact lens option beyond the program limitations, or if nonprosthetic eyeglasses or contact lenses are replaced because of loss or destruction, the client must acknowledge their choice and his/her liability for the cost difference by signing the Vision Care Eyeglass Patient (Medicaid Client) Certification Form. The form must remain in the provider's records.
- Do not charge a Medicaid client more than a patient not enrolled in Texas Medicaid for noncovered services (e.g., tints, oversized lenses, or frames).
- Keep invoices on file for a minimum of five years.
- Submit claims using the date eyeglasses were ordered as the date of service (DOS) (the start of the 95-day filing period), not the date the eyewear was dispensed.

4.3 Services, Benefits, Limitations, and Prior Authorization

Examination and treatment of eye conditions, including prescribing and dispensing of medically necessary eyeglasses or contact lenses, are benefits of Texas Medicaid and may be reimbursed to optometrist, ophthalmologist, and optician providers as is within the scope of practice for each.

The following services are included in other services and will not be considered for separate reimbursement:

- Vision screening conducted to meet State screening requirements, such as the DSHS School Vision and Hearing Screening Program.
- Expenses for medical supplies, equipment, and other items that are not specifically made-to-order for the client are considered to have been incurred on the date the item is delivered.

Ophthalmologist and Optometrist

Examination and treatment services rendered by an ophthalmologist or optometrist are not limited to the procedure codes included in this handbook.

Refer to: The [Texas Medicaid fee schedules](#) on the TMHP web site at www.tmhp.com for a complete list of procedure codes that may be reimbursed by Texas Medicaid.

Optician

Services rendered by an optician are limited to fitting and dispensing of medically necessary eyeglasses and contact lenses.

Note: *In accordance with the Omnibus Reconciliation Act of 1986, Section 9336, a Doctor of Optometry is considered a physician, with respect to the provision of any item or service the optometrist is authorized to perform by state law or regulation.*

4.3.1 Services Performed in Long-Term Care Facilities

Ophthalmological, optometric, and eyeglass or contact lens services provided in a skilled or intermediate care facility may be reimbursed when the client's attending physician has ordered the service and the signed order is included in the client's medical record at the nursing facility.

The ordering physician's name and provider identifier must be documented on the claim when ophthalmological, optometric, or eyeglasses or contact lenses services are performed in a skilled or intermediate care facility.

4.3.2 Services Performed in Federally Qualified Healthcare Centers (FQHC)

Vision services rendered by FQHC providers may be reimbursed based on an all-inclusive rate per visit.

Refer to: Subsection 2.2, "Services, Benefits, Limitations, and Prior Authorization" in *Clinics and Other Outpatient Facility Services Handbook (Vol. 2, Provider Handbooks)* for information about vision services that may be reimbursed to FQHC providers.

4.3.3 THSteps Medical Checkup Vision Screening

A vision screening must be completed during each THSteps medical checkup with standardized screenings performed at specific ages, as listed in the THSteps Periodicity Schedule. Providers may perform a vision screening during an acute care visit with the appropriate screening tools or refer at-risk infants and children to an optometrist or ophthalmologist who is experienced with the pediatric population and who can perform further testing, diagnosis, and treatment.

Refer to: Subsection 5.3.11.2.4, "Vision Screening" in *Children's Services Handbook (Vol. 2, Provider Handbooks)* for information about THSteps medical checkup vision screenings.

4.3.3.1 Vision Screening Outside of a THSteps Preventive Care Medical Checkup

Vision screening for clients who are birth through 20 years of age may be completed at any office visit upon the following:

- Request from a parent
- Referral from a school vision screening program
- Referral from a school nurse

Clients who are birth through 20 years of age must be screened for eye abnormalities by history, observation, and physical exam. Clients who are identified as high risk must be referred to an appropriate Medicaid-enrolled provider that is experienced with the pediatric population.

4.3.4 Noncovered Services

The following services and supplies are not a benefit of Texas Medicaid:

- Artificial eyes for clients who are 21 years of age and older.
- Eyeglasses for residents of institutions where the reimbursement formula and vendor reimbursement include this service.
- Eyeglasses or contact lenses prescribed or dispensed to clients at a hospital or nursing facility without documented orders of the attending physician in the client's medical records.
- Low vision aids.
- Optional eyeglass features that are requested by the client but that do not increase visual acuity (e.g., lens tint, industrial hardening, and decorative accessories or lettering).
- Plano sunglasses.
- Prisms that are ground into the lenses.
- Extended color vision examination (procedure code 92283), dark adaptation examination (procedure code 92284), and vision screening (procedure code 99172 or 99173).
- Spectacle (eyeglass) fitting services.

Clients may be billed for noncovered frames and other items beyond Medicaid benefits. Providers must have the client sign and date the Vision Care Eyeglass Patient (Medicaid Client) Certification Form and retain it in the provider's records. The client payment amount is not considered other insurance and must not be entered as a credit amount in the electronic field.

Example: *Texas Medicaid may reimburse providers a total of \$30.36 for eyeglass frames that are within the provider's selection for Medicaid reimbursement plus the allowed cost per lens. If the client chooses a pair of frames (such as \$200 frames) that are outside of the provider's selections for Medicaid reimbursement and if the client chooses other items or services that are not a benefit of Texas Medicaid (such as tinted lenses for an extra \$10 charge), the client is responsible for and may be billed for the balance of the cost of the frames (\$169.64) and the other items that are not a benefit of Medicaid (\$10 for tinted lenses).*

The provider may withhold the noncovered eyewear, contacts, or eyeglasses until the client pays for those items. If the client fails to pay for the noncovered items or has not returned for finished eyewear within a reasonable length of time (two to three months), the provider may return any reusable items to stock. Any payment made by TMHP for frames or lenses must be refunded to Texas Medicaid. If a client requests eyewear that is beyond program benefits (for example, scratch-resistant coating), Medicaid allows reimbursement up to the maximum fee. The provider may charge the client the difference

between the Medicaid payment and the customary charge for the eyewear requested, when the client has been shown the complete selection of Medicaid-covered eyewear and when the following conditions are met:

- The client rejects the Medicaid-covered eyewear and wants eyewear that complies with Texas Medicaid specifications, but is not included in the selection of Medicaid-covered eyewear.
- The client indicates a willingness to pay the difference between the Medicaid payment and the actual charge. The provider must have the client sign the Vision Care Eyeglass Patient (Medicaid Client) Certification Form and retain it in the provider's records.

Note: *A client who requires low vision aids or who experiences vision-related difficulty with daily living activities or with employment may be referred to the DARS Division for Blind Services for evaluation and any appropriate resources.*

4.3.5 Vision Testing

Vision testing and examination and treatment of eye conditions are benefits of Texas Medicaid and may be reimbursed to ophthalmologist or optometrist providers.

Eye examinations with refraction testing may be reimbursed using the following procedure codes:

Procedure Codes	
S0620	S0621

Medical evaluation and examination may be reimbursed using the following procedure codes:

Procedure Codes				
92002	92004	92012	92014	92015

Refer to: Subsection 9.2.59.1.1, "New and Established Patient Services" in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for information about new patient and established patient E/M services.

Vision testing procedure codes are subject to the CMS NCCI relationships. Claims that are submitted by physicians with the same specialty who are in the same group practice are processed as if they were the same provider. Providers should refer to the *Current Procedural Terminology (CPT) Manual* for additional information about intermediate and comprehensive ophthalmological services.

4.3.5.1 Routine Vision Testing

Procedure codes S0620 and S0621 may be reimbursed for routine vision testing with refraction when they are billed with diagnosis code V720.

Clients who are birth through 20 years of age are eligible for a routine eye examination with refraction testing for the purpose of obtaining eyeglasses or contact lenses once every state fiscal year (September 1 through August 31). The limitation for refraction testing can be exceeded for clients who are birth through 20 years of age only when:

- The parent, teacher, or school nurse requests the refraction testing and it is medically necessary.
- There is a significant change in vision, and documentation supports a diopter (d) change of 0.5d or greater in the sphere, cylinder, prism measurements, or axis changes.

Clients who are 21 years of age and older are eligible for a routine eye examination with refraction testing for the purpose of obtaining eyeglasses or contact lenses once every two state fiscal years (September 1 through August 31). The limitation for refraction testing can be exceeded for clients who are 21 years of age and older only when there is a significant change in vision, and documentation supports a diopter change of 0.5d or more in the sphere, cylinder, prism measurements, or axis changes.

4.3.5.2 Medically Necessary Eye Examinations

An eye examination with or without refraction (procedure code 92002, 92004, 92012, 92014, or 92015) may be reimbursed for medical evaluations and examinations of the eye. Procedure codes 92002, 92004, 92012, 92014, and 92015 will not be reimbursed for routine exams.

Providers must use one of the following diagnosis codes for medical evaluations and examinations of the eye:

Diagnosis Codes

V595	V6751	V711							

Documentation in the client's medical record must support the medical necessity of the service performed.

Procedure codes 92002, 92004, 92012, 92014, and 92015 may be reimbursed as often as is medically necessary to ophthalmologist or optometrist providers for medically necessary eye examinations without refraction.

Procedure code 92015 may be reimbursed to ophthalmologist or optometrist providers for refraction in addition to the eye examination procedure code 92002, 92004, 92012, or 92014. A refractive state (procedure code 92015) will be denied as part of another service if it is billed with the same date of service by the same provider as procedure code S0620 or S0621.

4.3.5.3 Ophthalmological Examination and Evaluation with General Anesthesia

An ophthalmological examination and evaluation under general anesthesia (procedure codes 92018 and 92019) may be medically necessary when a client has significant injury or cannot otherwise tolerate the procedure while conscious.

Procedure codes 92018 and 92019 may be reimbursed once per service, per day, when billed by any provider.

4.3.5.4 Ophthalmic Ultrasound

Ophthalmic ultrasound is an ultrasonic diagnostic test that uses high frequency sound waves that are used to provide additional information about the interior of the eye and surrounding areas. The following procedure codes may be reimbursed for ophthalmic ultrasound services:

Procedure Codes					
76510	76511	76512	76513	76516	76519

One of the following diagnosis codes must be submitted with the most appropriate ophthalmic ultrasound procedure code:

Diagnosis Codes									
1900	1901	1984	2240	2241	2340	2388	23981	24941	24950
24951	24960	24961	24970	24971	24980	24981	24990	24991	25050
25051	25052	25053	36050	36051	36052	36053	36054	36055	36059

36615	36616	36617	36618	36619	36620	36621	36622	36623	36630
36631	36632	36633	36634	36641	36642	36643	36644	36645	36646
36650	36651	36652	36653	3668	3669	37100	37101	37102	37103
37104	37105	37110	37111	37112	37113	37114	37115	37116	37120
37121	37122	37123	37124	37130	37131	37132	37133	37140	37141
37142	37143	37144	37145	37146	37148	37149	37150	37151	37152
37153	37154	37155	37156	37157	37158	37160	37161	37162	37170
37171	37172	37173	37181	37182	37189	3719	3766	37921	37926
37931	37932	37933	37934	37939	37992	74330	74331	74332	74333
74334	74335	74336	74337	74339	8704	8715	8716	9300	9301
9302	9308	9309							

Procedure code 76514 may be reimbursed once per lifetime when billed by any provider with one of the diagnosis codes in the following diagnosis code table:

Diagnosis Codes									
36500	36501	36502	36503	36504	36505	36506	36510	36511	36512
36513	36514	36515	36520	36521	36522	36523	36524	36531	36532

Diagnosis Codes									
36541	36542	36543	36544	36551	36552	36559	36560	36561	36562
36563	36564	36565	36570	36571	36572	36573	36574	36581	36582
36583	36589	3659							

Procedure code 76529 may be reimbursed for locating a foreign body in the eye.

Procedure code 76999 may be reimbursed with prior authorization.

Ophthalmic ultrasounds may be reimbursed when they are billed with the same date of service by the same provider as an eye examination visit or consultation.

Ophthalmic ultrasounds (procedure codes 76514 and 76516) are limited to one service, per day, by any provider for medical evaluations and examinations of the eye. Procedure codes 92002, 92004, 92012, 92014, and 92015 will not be reimbursed for routine exams.

Procedure code 76519 may be reimbursed as follows:

- The professional interpretation component may be reimbursed when procedure code 76519 is billed with modifier LT or RT to identify the eye on which the service was performed.
- The technical component may be reimbursed once when the service is performed on one or both eyes on the same date of service by the any provider.
- The total component may be reimbursed along with an additional professional service when the service is performed on both eyes on the same date of service by the any provider. The claim for the additional interpretation component must include modifier LT or RT.

Providers must use one of the following diagnosis codes for medical evaluations and examinations of the eye:

Diagnosis Codes									
36422	36477	3670	37100	37101	37102	37103	37104	37105	37110
37111	37112	37113	37114	37115	37116	37120	37121	37122	37123
37124	37131	37132	37133	37140	37141	37142	37143	37144	37145
37146	37148	37149	37150	37151	37152	37153	37154	37155	37156
37157	37158	37160	37161	37162	37170	37171	37710	37711	37712
37713	37714	37715	37716	74320	74341	74342	74343	99651	V425
V5871									

Ophthalmic ultrasound procedure codes are subject to CMS NCCI relationships. The following relationships are exceptions to the published NCCI relationships:

Procedure code 76511 will be denied when it is billed with the same date of service by the same provider as procedure code 76506.

Refer to: The [CMS NCCI web page](#) for the published correct coding guidelines and specific applicable code combinations.

Prior Authorization Requirements

Procedure code 76999 requires prior authorization. The provider must submit the following documentation with the request:

- A clear, concise description of the ophthalmic ultrasound being performed.

- A procedure code that is comparable to the ophthalmic ultrasound being requested or the provider’s intended fee for performing the ophthalmic ultrasound.

Note: Services and procedures that are investigational or experimental are not a benefit of Texas Medicaid.

4.3.5.5 Corneal Topography

Procedure code 92025 may be reimbursed for corneal topography when it is billed with one of the following diagnosis codes:

Diagnosis Codes									
37000	37001	37002	37003	37004	37005	37006	37007	37100	37101
37102	37103	37104	37120	37121	37122	37123	37140	37141	37142
37146	37148	37149	37160	37161	37162	37170	37171	37172	37173
37234	37240	37241	37242	37243	37244	37245	37281	37289	8710
8711	9402	9403	9404	99651	V425	V4561	V4569		

Corneal topography may be reimbursed when it is billed with the same date of services by the same provider as an eye examination visit or consultation.

Corneal topography (procedure code 92025) is limited to one service, per day, by any provider.

4.3.5.6 Sensorimotor Examination

A sensorimotor examination with interpretation and report consists of multiple ocular deviation measurements and includes, but is not limited to, visual motor integration, reversal frequency (letters and numbers), motor speed and precision, visual memory, and visualization to test eye movement and control, focusing ability, eye teaming ability, depth perception, and visual perception skills.

Procedure code 92060 may be reimbursed for a sensorimotor examination when it is billed with one of the following diagnosis codes:

Diagnosis Codes									
36801	36802	36803	37801	37802	37803	37804	37805	37806	37807
37808	37811	37812	37813	37814	37815	37816	37817	37818	37821
37822	37823	37824	37831	37832	37833	37834	37835	37841	37842
37843	37844	37845	37861	37862	37871	37873	37883	37884	37885
37951	37952	37953	37954	37955	37957	37958			

Procedure code 92060 may be reimbursed once per day and twice per calendar year when it is billed by any provider and may be reimbursed in addition to an eye examination visit.

4.3.5.7 Orthoptic or Pleoptic Training

Orthoptics, a component of vision training or vision therapy, are exercises designed to improve the function of the eye muscles with an emphasis on binocular vision and eye movements. Pleoptics are exercises designed to improve impaired vision when there is no evidence of organic eye diseases.

Procedure code 92065 may be reimbursed for orthoptic or pleoptic training when it is billed with one of the following diagnosis codes:

Diagnosis Codes									
36801	36802	36803	37801	37802	37803	37804	37805	37806	37807
37808	37811	37812	37813	37814	37815	37816	37817	37818	37821

Diagnosis Codes									
37822	37823	37824	37831	37832	37833	37834	37835	37841	37842
37843	37844	37845	37861	37862	37871	37873	37883	37884	37885
37951	37952	37953	37954	37955	37957	37958			

Orthoptic or pleoptic training may be reimbursed one service per day for up to 6 services when it is billed with one of the diagnosis codes in the above diagnosis table. Up to an additional 6 services may be reimbursed with prior authorization for a total of 12 services per lifetime.

The provider must attest that current therapy has resulted in an improvement with presenting symptomatology over the course of treatment, including, but not limited to:

- Blurred vision
- Double vision
- Amblyopia
- Accommodation or near point of convergence measurements

Note: Orthoptic or pleoptic training services over the 12 per lifetime limit may be considered with prior authorization through CCP for clients who are birth through 20 years of age. Documentation for medical necessity must be submitted with the prior authorization request.

Procedure code 92065 may be reimbursed in addition to an eye examination visit.

4.3.5.8 Ophthalmoscopy, Angioscopy or Angiography

Routine ophthalmoscopy is part of general and special ophthalmologic services whenever indicated and may be reimbursed using the following procedure codes:

Procedure Codes						
92225	92226	92230	92235	92240	92250	92260

Ophthalmoscopy and fluorescein angioscopy or angiography (procedure codes 92225, 92226, 92230, and 92235) are considered unilateral procedures and may be reimbursed for a quantity of two if both the left and right eyes are evaluated. If two services are billed for the same date of service, one may be reimbursed at the full rate, and the other may be reimbursed at half rate.

Procedure codes 92225 and 92226 may be reimbursed once per eye, per day when they are billed by any provider.

Procedure codes 92225 and 92226 must be billed with modifier LT or RT to identify the eye on which the service was performed.

Ophthalmoscopy, angioscopy, and angiography procedure codes are subject to CMS NCCI relationships.

In addition to CMS NCCI relationships, the procedure codes in Column A of the following table will be denied if they are billed with the same date of service by the same provider as the corresponding procedure codes in Column B:

Column A (Denied)	Column B
92132, 92133, 92134	92250
92230	92235
92240	92230, 92250

Refer to: The [CMS NCCL web page](#) for the published correct coding guidelines and specific applicable code combinations.

4.3.5.9 Other Professional Services

The following procedure codes may be reimbursed by Texas Medicaid when the services are medically necessary:

Procedure Codes									
92020	92081	92082	92083	92100	92132	92133	92134	92136	92140
92227	92228	92265	92270	92275	92285	92286	92287		

Procedure codes 92227 and 92228 may each be reimbursed once per day.

Visual field examination procedure codes 92081, 92082, 92083 may be reimbursed twice per calendar year when billed by any provider.

Procedure codes 92132, 92133, and 92134 may be reimbursed once per day, when it is billed by any provider.

Serial automounter (procedure code 92100), ophthalmic biometry (procedure code 92136), and provocative tests for glaucoma (procedure code 92140) may be reimbursed once per day when they are billed by any provider.

External ocular photography (procedure code 92285) may be reimbursed once per day, when it is billed by any provider.

Procedure codes 92285, 92286, and 92287 may be reimbursed when they are billed with one of the following diagnosis codes:

Infectious and Parasitic Diseases

For other professional services, fitting services are included in the reimbursement for prosthetic eyeglasses or contact lenses.

4.3.6 Vision Services for Nonprosthetic Eyewear

Definition: Nonprosthetic eyewear is medically necessary to correct defects in vision. Providers may refer to TAC §354.1015 for more information.

Limitations: Nonprosthetic eyeglasses or contact lenses may be reimbursed for clients of any age when there is no other option available to correct or ameliorate a visual defect. Prescribing and dispensing medically necessary eyeglasses or contact lenses are benefits of Texas Medicaid as follows:

- Nonprosthetic eyeglasses or contact lenses may be reimbursed once every 24 months. Additional services within the 24-month period may be considered when documentation in the client's medical record supports medical necessity that includes a diopter change of 0.5d or more in the sphere, cylinder, prism measurements, or axis changes. A new 24 month benefit period for eyewear begins with the placement of the new nonprosthetic eyewear.
- Replacement of nonprosthetic eyeglasses or contact lenses because of loss or destruction is a benefit of Texas Medicaid for clients who are birth through 20 years of age. If the eyeglasses or contact lenses are lost or destroyed, the provider must have the client sign the Vision Care Eyeglass Patient (Medicaid Client) Certification Form and the signed form must be maintained in the client's medical record.
- For clients who have had insertion of an intraocular lens (IOL), one pair of eyeglasses or contact lenses may be reimbursed. Additional eyeglasses or contact lenses may be considered when documentation in the client's medical record supports medical necessity that includes a diopter change of 0.5d or more in the sphere, cylinder, prism measurements, or axis changes.

Note: Because the IOL is considered the prosthetic device, the eyeglasses or contact lenses, and any replacements, are considered nonprosthetic.

Refer to: Subsection 4.3.5.1, "Routine Vision Testing" in this handbook for information about vision testing for the purposes of prescribing eyewear.

The prescription for eyeglasses must be given to the client upon request. A provider may not withhold a prescription for eyeglasses from a client even if Medicaid reimbursement for the eye examination has not been received.

To be considered by Texas Medicaid, the eyeglasses or contact lenses must be:

- Medically necessary.
- Prescribed by a doctor of medicine, optometry, or osteopathy.
- Prescribed to significantly improve vision or correct a medical condition.
- In compliance with eyeglass program specifications for frames and lenses as stated in TAC Rule 354.1017, Specifications for Eyewear and Rule 363.503, Specifications for Eyewear.

4.3.6.1 Eyeglass Lenses and Frames

The following eyeglass lens procedure codes may be billed with frame procedure codes V2020 and V2025 for reimbursement of a pair of eyeglasses:

Procedure Codes									
Single Vision Lenses									
V2100	V2101	V2102	V2103	V2104	V2105	V2106	V2107	V2108	V2109
V2110	V2111	V2112	V2113	V2114	V2115	V2118	V2121		
Bifocal Lenses									
V2200	V2201	V2202	V2203	V2204	V2205	V2206	V2207	V2208	V2209
V2210	V2211	V2212	V2213	V2214	V2215	V2218	V2219	V2220	V2221
Trifocal Lenses									
V2300	V2301	V2302	V2303	V2304	V2305	V2306	V2307	V2308	V2309
V2310	V2311	V2312	V2313	V2314	V2315	V2318	V2319	V2320	V2321

For the purpose of Texas Medicaid, high-powered lenses are lenses with a sphere greater than 7.00d or a cylinder greater than 4.00d.

Providers must bill a quantity of two when billing for bilateral lenses with the same prescription.

The following procedure codes may be reimbursed for add-on services:

Add-On Procedure Codes									
V2410	V2430	V2700	V2710	V2715	V2718	V2730	V2755	V2770	V2780
V2784									

Add-on procedure codes will not be reimbursed unless they are billed with the appropriate lens procedure code by the same provider for the same date of service.

The fitting of eyeglasses (procedure codes 92340, 92341, 92342, and 92370) is considered part of the dispensing procedure and is not separately reimbursed.

Polycarbonate Lens

Procedure code V2784 for polycarbonate lens is considered an add-on procedure code. Polycarbonate lenses may be reimbursed for clients with one of the following medical or physical conditions that are a high risk for eye injuries due to eyewear breakage (this list is not all-inclusive):

- Cerebral palsy
- Multiple sclerosis
- Muscular dystrophy
- Epilepsy
- Autism
- Down syndrome
- Brain trauma
- Balance disorders
- Parkinson disease
- Seizure disorder

- Motor ataxia
- Marfan's syndrome
- Ocular prostheses
- Amblyopia

In addition to the medical or physical conditions identified above, polycarbonate lenses also may be reimbursed when the client meets the following criteria:

- Lens power in at least one meridian of -5.25/+4.00 diopters or more and the eyeglasses are not functional in regular standard glass or plastic lens materials due to weight, thickness or aberration
- Monocular vision with functional vision in one eye
- Retinal detachment or risk for retinal detachment (e.g., lattice degeneration, history of retinal detachment in the family, posterior vitreous detachment)

Procedure code V2784 may be reimbursed when it is billed with one of the following diagnosis codes:

Diagnosis Codes									
29900	29901	29910	29911	29980	29981	29990	29991	30722	33182
33183	3320	3321	340	3430	3431	3432	3433	3434	3438
3439	34500	34501	34510	34511	3452	3453	34540	34541	34550
34551	34560	34561	34571	34580	34581	34590	34591	3590	3591
35921	35922	35923	35924	35929	3593	3594	3595	3596	35971
35979	35981	35989	3599	36101	36102	36103	36104	36105	36106
36107	36112	36113	36130	36131	36132	36133	36181	36189	3619
36800	36801	36802	36803	36970	36972	36973	36974	36975	36976
38600	38601	38602	38603	38604	38610	38611	38612	38619	38630
38631	38632	38633	38634	38635	38640	38641	38642	38643	38648
38650	38651	38652	38653	38654	38655	38656	38658	7580	75982
7670	85400	85401	85402	85403	85404	85405	85406	85410	85411
85412	85413	85414	85415	85416	85419	99651	99653	99669	

For lens power in at least one meridian of -5.25/+4.00 diopters or more, and the eyeglasses are not functional in regular standard glass or plastic lens material due to weight, thickness or aberration, providers must submit one of the following lens procedure codes:

Procedure Codes									
V2101	V2102	V2105	V2106	V2107	V2108	V2109	V2110	V2111	V2112
V2113	V2114	V2201	V2202	V2205	V2206	V2207	V2208	V2209	V2210
V2211	V2212	V2213	V2214	V2301	V2302	V2306	V2307	V2308	V2309
V2310	V2311	V2312	V2313	V2314					

For diagnoses not listed in the above table or for lens power other than those listed in this section, providers must submit documentation of medical necessity. If documentation is not submitted with the claim, the polycarbonate lenses will be denied.

Undeliverable Eyeglasses

The provider may be reimbursed for the lenses based on the services furnished and the materials used up to the time the provider learned that the eyeglasses were undeliverable due to any of the following:

- The client cancels an order for eyeglasses prior to their completion and delivery.
- The prescription changes prior to completion and delivery of the eyeglasses.
- The client dies prior to completion and delivery of the eyeglasses.

Reimbursement will not be made for the frames.

4.3.6.2 Contact Lens and Corneal Bandage

The following procedure codes may be reimbursed for prosthetic and nonprosthetic contact lenses:

Procedure Codes									
92326	V2500	V2501	V2502	V2510	V2511	V2512	V2513	V2520	V2521
V2522	V2523	V2530	V2531	V2599					

The following procedure codes may be reimbursed for the fitting or modification of a contact lens:

Procedure Codes									
92071	92072	92310	92311	92312	92313	92314	92315	92316	92317
92325									

Note: Procedure codes 92071 and 92072 must be submitted with modifier LT or RT and will be denied if it is billed with the same date of service as procedure codes 92018 and 92019.

Corneal Bandage

A soft corneal plano bandage lens may be medically necessary for eye protection to prevent blindness due to a disease process. Procedure codes 92071 and 92072 may be reimbursed for the fitting of the corneal bandage for treatment and management.

Corneal bandage may be reimbursed once per eye, per day when it is billed by any provider. Modifier LT or RT must be included on the claim to identify the eye on which the service was performed.

Prior Authorization Requirements

Nonprosthetic contact lenses and corneal plano bandage lenses must be prior authorized. The following documentation must be submitted with a request for nonprosthetic contact lenses and must be signed and dated by the prescribing physician or optometrist:

- Diagnosis causing the refractive error (such as keratoconus)
- Include the current and new prescriptions supporting a change of 0.5d or more in the sphere, cylinder, or prism measurements
- Indicate which eyes to be treated
- Specify the procedure codes requested
- Include a brief statement addressing the medical necessity for vision correction by contact lens(es) and specify why eyeglasses are inappropriate or contraindicated for this client

For the soft corneal plano bandage lens (procedure code 92071 or 92072), nonprosthetic contact lenses for nonemergency placement require prior authorization that must be obtained before the lenses are dispensed. Documentation submitted with the request must include the information listed above.

Nonprosthetic contact lenses for emergency placement do not require prior authorization. The emergency condition necessitating a corneal bandage must be documented on the claim.

- Additional nonprosthetic contact lenses may be considered more frequently than the limitations outlined in this handbook when documentation in the client's medical record supports medical necessity for a diopter change of 0.5d or more in the sphere, cylinder, prism measurements, or axis changes.

4.3.6.3 Dispensing Requirements

Providers must be able to dispense standard size frames at no cost to the eligible client. The following criteria must be met for the dispensed frames:

- Providers must offer each client who is 20 years of age or younger a choice of six styles in three colors for each type of frame: metal, zylonite, or combination of metal and zylonite.
- Providers must offer each client who is 21 years of age or older a choice of three styles in three colors for each type of frame: metal, zylonite, or combination of metal and zylonite.

When a client chooses eyeglass or contact lens options that are beyond program limitations, the client must acknowledge their choice and his or her liability for the cost difference by signing the Vision Care Eyeglass Patient (Medicaid Client) Certification Form.

Dispensing of contact lenses include the fabrication, ordering, adjustment, dispensing, sale, and delivery to the client of the contact lenses prescribed by and dispensed in accordance with a prescription from a licensed physician or optometrist.

Dispensing of eyeglasses includes the design, verification, fitting, adjustment, sale, and delivery to the client of (1) fabricated and finished spectacle lenses, (2) frames, or (3) other ophthalmic devices, prescribed by and dispensed in accordance with a prescription from a licensed physician or optometrist.

4.3.6.4 Repair

The eyeglass supplier is required to perform minor repairs on request (without charge) on eyeglasses that they have dispensed regardless of the client's age. Minor repairs are those that cost \$2 or less. The minor repairs are included in the reimbursement for the eyeglasses and are not reimbursed separately.

For clients who are birth through 20 years of age, repairs that cost \$2 or more may be reimbursed using procedure code V2799. The following criteria apply:

- The cost of repair supplies cannot exceed the cost of replacement eyeglasses.
- All repair supplies must be new and at least equivalent to the original item.
- The provider must maintain in the client's medical record an itemized list of repairs and the replacement cost to determine whether criteria are met for repair.

For clients who are 21 years of age and older, repair of nonprosthetic eyeglasses or contact lenses is not a benefit when the actual cost of materials exceeds \$2.

The provider must make the client's medical record available for review upon request.

4.3.6.5 Replacement

Clients who are birth through 20 years of age may obtain replacement nonprosthetic eyeglasses if the first pair is lost or destroyed. There are no limitations on the number of replacements a client who is birth through 20 years of age may receive. If the eyewear is lost or destroyed, the provider must have the client sign the Vision Care Eyeglass Patient (Medicaid Client) Certification Form. Claims for replacement lenses must be submitted with the RB modifier to ensure accurate processing. Prior authorization is not required for the replacement of nonprosthetic eyeglasses.

Replacement of eyeglasses or contact lenses is also allowed with a change in axis. A new prescription must have at least one of the following changes:

- A change of 0.50 diopters or more in any corresponding meridian.
- A cylinder axis change of at least 20 degree for a cylinder power of 0.50-0.62 diopters.
- A cylinder axis change of at least 15 degree for a cylinder power of 0.75-0.87 diopters.
- A cylinder axis change of at least 10 degree for a cylinder power of 1.00-1.87 diopters.
- A cylinder axis change of at least 5 degree for a cylinder power of 2.00 diopters or greater.

Note: Replacement glasses will not be reimbursed for a cylinder power of 0.12-0.37 diopters with a change in axis.

Prior authorization is required for replacement of non-prosthetic contact lenses.

If the client is diagnosed with aphakia, procedure code 92326 may be reimbursed for the replacement of a contact lens. Procedure code 92326 is limited to aphakia.

4.3.6.6 Medicare Coverage for Nonprosthetic Eyewear

Eye examinations for the purpose of prescribing, fitting, or changing eyeglasses or contact lenses because of refractive errors are not a benefit of Medicare. These services must be filed directly to Texas Medicaid when performed for a Medicaid Qualified Medicare Beneficiary (MQMB) client. Medicare coverage is limited to eye examinations for treatment of eye disease or injury and for a diagnosis of aphakia. When performing an eye examination with refraction for an MQMB client diagnosed with aphakia or disease or injury to the eye, the following procedures must be followed:

- Procedure code 92015 must be used to bill Texas Medicaid for the refractive portion of the examination and is payable with a diagnosis of aphakia or ocular disease only.
- The medical portion of the eye examination (procedure code 92002, 92004, 92012, or 92014) is covered by Medicare and must be billed to Medicare first. Medicare forwards this portion of the examination automatically to TMHP for deductible and coinsurance payment consideration according to current guidelines.

Refer to: Subsection 2.7, “Medicare Crossover Claim Reimbursement” in Section 2, “Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about current coinsurance and deductible payment guidelines.

Important: Providers performing eye exams for refractive errors on Medicaid Qualified Medicare Beneficiary (MQMB) clients must bill TMHP. Do not send the refraction (procedure code 92015) to Medicare first. Texas Medicaid will not waive the 95-day filing deadline if the claim is billed to Medicare in error, nor will Medicare transfer the refraction to Texas Medicaid for payment.

Medicare allows payment of one pair of conventional eyewear (contact lens or glasses) for clients who have had cataract surgery with insertion of an IOL. Medicare considers the IOL the prosthetic device. Texas Medicaid providers must bill Medicare for the conventional (nonprosthetic) eyewear provided following an IOL insertion and bill Texas Medicaid for any replacements of the conventional (nonprosthetic) eyewear using the procedure codes in subsection 4.3.6, “Vision Services for Nonprosthetic Eyewear” in this handbook.

4.3.7 Vision Services for Prosthetic Eyewear

Definition: Prosthetic eyeglasses or contact lenses are lenses that replace the eye’s organic lens when it is absent due to congenital or acquired aphakia. Aphakia may be the result of a congenital abnormality or defect or an acquired condition as a result of trauma or cataract removal.

Limitations: Prosthetic eyeglasses or contact lenses may be provided based on medical necessity. Eye examinations and prosthetic eyewear may be reimbursed as follows:

- Eye examinations for aphakia (including congenital aphakia) and disease or injury to the eye may be reimbursed as often as is medically necessary.
- One pair of permanent prosthetic eyeglasses or contact lenses is a benefit during a client’s lifetime.
- Replacement of prosthetic eyeglasses or contact lenses may be reimbursed for clients of any age due to loss or destruction of the eyewear or due to a significant change in visual acuity with a diopter change of 0.5d or more in the sphere, cylinder, prism measurements, or axis changes. The provider must maintain in the client’s medical record documentation that supports the medical necessity for the replacement eyeglasses or contact lenses.

Prosthetic eyeglasses or contact lenses may be reimbursed when billed with modifier VP and one of the following aphakia diagnosis codes:

Diagnosis Codes					
37931	37932	37933	37934	74335	V431

Refer to: Subsection 4.3.6, “Vision Services for Nonprosthetic Eyewear” in this handbook for the eyeglass lens, frame, and contact lens procedure codes and dispensing requirements that apply to prosthetic and nonprosthetic eyewear.

Prior authorization is not required for prosthetic eyeglasses or contact lenses.

The date of cataract surgery is not required on the claim for permanent prosthetic eyeglasses.

4.3.7.1 Temporary Eyeglasses or Contact Lenses

Temporary prosthetic eyeglasses or contact lenses after cataract surgery may be reimbursed when it is billed with the appropriate lens and frame procedure codes and diagnosis code V431.

Temporary prosthetic eyeglasses may be reimbursed for up to 4 months after surgery until the client is ready for permanent prosthetic lenses. The date of surgery is used to determine the convalescence period for temporary prosthetic eyeglasses. Temporary lenses will be denied if they are dispensed more than 4 months after the date of surgery.

Temporary prosthetic lenses may be reimbursed as often as is medically necessary during the postsurgical convalescence period.

4.3.7.2 Contact Lens Fitting and Modification

The following procedure codes may be reimbursed for prosthetic and nonprosthetic contact lenses fitting:

Procedure Codes									
92071	92072	92310	92311	92312	92313	92314	92315	92316	92317
92325									

Fitting services are included in the reimbursement for prosthetic and nonprosthetic eyeglasses or contact lenses.

Prior authorization for a prosthetic contact lens is not required.

4.3.7.3 Repair

The eyeglass supplier is required to perform minor repairs on request (without charge) on eyeglasses that they have dispensed regardless of the client’s age. Minor repairs are those that cost \$2 or less. The minor repairs are included in the reimbursement for the eyeglasses and are not reimbursed separately.

Repairs that cost \$2 or more may be reimbursed using procedure code V2799. The following criteria apply:

- The cost of repair supplies cannot exceed the cost of replacement eyeglasses.
- All repair supplies must be new and at least equivalent to the original item.
- The provider must maintain in the client’s medical record an itemized list of repairs and the replacement cost to determine whether criteria are met for repair.

The provider must make the client’s medical record available for review upon request.

4.3.7.4 Replacement

Replacement prosthetic eyeglasses or contact lenses may be reimbursed as often as is medically necessary if the replacement is due to loss, destruction, or a significant change in visual acuity.

Replacement of eyeglasses or contact lenses is also allowed with a change in axis. A new prescription must have at least one of the following changes:

- A change of 0.50 diopters or more in any corresponding meridian.
- A cylinder axis change of at least 20 degree for a cylinder power of 0.50-0.62 diopters.
- A cylinder axis change of at least 15 degree for a cylinder power of 0.75-0.87 diopters.
- A cylinder axis change of at least 10 degree for a cylinder power of 1.00-1.87 diopters.
- A cylinder axis change of at least 5 degree for a cylinder power of 2.00 diopters or greater.

Note: Replacement glasses will not be reimbursed for a cylinder power of 0.12-0.37 diopters with a change in axis.

The appropriate eyeglass and frame or contact lens procedure codes must be billed with modifier RB to indicate replacement.

Refer to: Subsection 4.3.6, “Vision Services for Nonprosthetic Eyewear” in this handbook for the eyeglass lens, frame, and contact lens procedure codes and dispensing requirements that apply to prosthetic and nonprosthetic eyewear.

Procedure code 92326 for the replacement of a contact lens may be reimbursed when it is billed with a diagnosis of aphakia:

Diagnosis Codes					
37931	37932	37933	37934	74335	V431

4.3.7.5 Intraocular Lens (IOL) and Additional Eyewear

Intraocular lenses are benefits of Texas Medicaid. If conventional eyewear is medically necessary in addition to the IOL, the IOL is considered the prosthetic device, and the eyewear and any replacements are considered nonprosthetic.

Refer to: Subsection 9.2.48.4, “Intraocular Lens (IOL)” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information about IOL benefits.

Subsection 4.3.6, “Vision Services for Nonprosthetic Eyewear” in this handbook for more information about nonprosthetic eyewear.

4.3.7.6 Artificial Eyes

For clients who are birth through 20 years of age, artificial eyes may be considered under CCP.

4.3.7.7 Ultraviolet (U-V) Protection

Procedure code V2755 may be reimbursed for U-V protection when it is billed with an aphakia diagnosis code (diagnosis code 37931, 37932, 37933, 37934, 74335, or V431).

UV lens procedure code V2755 will be denied when billed with the same date of service by the same provider as polycarbonate lens procedure code V2784.

UV and polycarbonate lens procedure codes are subject to CMS NCCI relationships.

Refer to: The [CMS NCCI web page](#) for the published correct coding guidelines and specific applicable code combinations.

4.3.8 Surgical Vision Services

Refer to: Subsection 9.2.39.12, “Fluocinolone Acetonide (Retisert)” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information about fluocinolone acetonide benefits.

Subsection 9.2.48, “Ophthalmology” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information about surgical vision services.

4.4 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including vision services. Vision services are subject to retrospective review and recoupment if documentation does not support the service billed.

The client must sign and date the Vision Care Eyeglass Patient (Medicaid Client) Certification Form, and the provider must retain it in the provider’s records.

When a client chooses an eyeglasses or contact lens option beyond the program limitations, or nonprosthetic eyeglasses or contact lenses are replaced because of loss or destruction the client must acknowledge their choice and liability for the cost difference by signing the Vision Care Eyeglass Patient (Medicaid Client) Certification Form and retain it in the provider’s records.

The current and previous prescriptions must be documented in the client’s medical record.

The provider must make the client’s medical record available for review upon request by the following:

- HHSC
- Office of the Attorney General
- TMHP

4.5 Claims Filing and Reimbursement

4.5.1 Claims Filing

Vision care service claims must be submitted to TMHP in an approved electronic format or on a CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms. When completing a CMS-1500 paper claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

When submitting the client’s old and new prescriptions to show an axis change or a diopter change of .5 or more, enter the new prescription in Block 24D, line 5, and the old prescription in Block 24D, line 6 of the CMS-1500 paper claim form.

Claims for eye examination services require a diagnosis. If eyeglasses are not prescribed, diagnosis code V720 may be used. Diagnosis code V720 must not be used on claims for eyewear. If the diagnosis is not known by the supplier of the eyewear, diagnosis code 3689 is acceptable. Claims for eye examinations that lack a diagnosis are listed as an incomplete claim on the Remittance and Status (R&S) report and must be resubmitted for payment consideration. Electronic claims that lack a diagnosis will be rejected. A letter with the reason for rejection and instructions for resubmission will be mailed the following business day.

When the eye exam limitation is exceeded for clients who are 20 years of age and younger, identify one of the following situations in Block 19 of the CMS-1500 paper claim form:

- A school nurse, teacher, or parent requests the eye examination.
- The eye examination is medically necessary.

4.5.2 Reimbursement

Professional services by an optometrist for contact lenses and prosthetic eyewear are reimbursed in accordance with 1 TAC, §§355.8001, 355.8081, and 355.8085.

FQHCs are paid an all-inclusive rate per visit for payable services in accordance with 1 TAC, §355.8261.

Suppliers of nonprosthetic lenses and frames are reimbursed the lesser of their billed amount or of the established maximum allowable fee in accordance with 1 TAC, §355.8001. See the [OFL](#) or the applicable fee schedule on the TMHP website at www.tmhp.com.

Refer to: Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

[Vision Services](#) on the TMHP website at www.tmhp.com for a claim form example.

The nonsurgical vision procedure codes included in this handbook may be subject to the CMS NCCI relationships.

Refer to: The CMS website at www.cms.gov for more information about NCCI relationships.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

4.5.2.1 NCCI and MUE Guidelines

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals. Providers should refer to the [CMS NCCI web page](#) for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

If applicable and consistent with CMS billing guidelines, procedure codes must be billed with modifier LT (left side) or RT (right side) to identify the eye on which the service was performed.

5 Claims Resources

Refer to the following sections and forms when filing claims:

Resource	Location
Appendix D: Acronym Dictionary	Appendix D (<i>Vol. 1, General Information</i>)
Automated Inquiry System (AIS)	“Appendix A: State, Federal, and TMHP Contact Information” (<i>Vol. 1, General Information</i>)
CMS-1500 Paper Claim Filing Instructions	Subsection 6.5 (<i>Vol. 1, General Information</i>)
Appendix A: State, Federal, and TMHP Contact Information	Appendix A (<i>Vol. 1, General Information</i>)
Section 3: TMHP Electronic Data Interchange (EDI)	Section 3 (<i>Vol. 1, General Information</i>)
TMHP Electronic Claims Submission	Subsection 6.2 (<i>Vol. 1, General Information</i>)

6 Contact TMHP

The TMHP Contact Center at 1-800-925-9126 is available Monday through Friday from 7 a.m. to 7 p.m., Central Time.

7 Forms

The following linked forms can also be found on the [Forms](#) page of the Provider section of the TMHP website at www.tmhp.com:

Forms
Hearing Evaluation, Fitting, and Dispensing Report (Form 3503)
Physician’s Examination Report
Vision Care Eyeglass Patient (Medicaid Client) Certification Form
Vision Care Eyeglass Patient (Medicaid Client) Certification Form (Spanish)

8 Claim Form Examples
